U Ed BSO 97-05 DS417gJps

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, February 14

- "A Tribute to Black Music," noon, Kern. Graduate Commons, noon, Kern Lobby.
- "Urban Fusion."

School of Music, 6 p.m., Old Main Lobby. "Celebration of Love." For tickets, phone (814) 865-0431.

School of Music, 8 p.m., Eisenhower Auditorium. "School of Music Montage." For tickets, phone (814) 865-0255.

Saturday, February 15

- African Student Association, 6 p.m., Findlay-Johnston Commons. Dinner and dance titled "A Touch of Africa."

School of Music, 7:30 p.m., Old Main Lobby. "Celebration of Love." For tickets, phone (814) 865-0431.

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Battle of the Big Bands, Round 2." For tickets, phone (814) 865-0255.

School of Music, 8 p.m., Recital Hall. Student Recital presents Michael Hooper, percussion.

Sunday, February 16

- Center for the Performing Arts, 3 p.m., Eisenhower Auditorium. "Nai-Ni Chen Dance Recital." For tickets, phone (814) 865-0255.

School of Music, 8 p.m., Recital Hall. Graduate Recital presents Tim McKay, trombone.

Monday, February 17

School of Music, 8 p.m., Recital Hall. Faculty Recital presents John Daniel, trumpet.

School of Music, 8 p.m., 122 Music II. "Kierman Recital/Lecture"

- Paul Robeson Cultural Center, 7:30 p.m. Film titled "Sankofa."

Tuesday, February 18

School of Music, 8 p.m., Recital Hall. Student Recital presents Douglas Fisk, piano.

School of Music, 8:30 p.m., Eisenhower Chapel. Faculty Recital presents Tim Hurt, oboe.

Wednesday, February 19

- International Student Council, 7 p.m., Paul Robeson Cultural Center. Italian Dance Group (Iguillari di Piazza).

School of Music, 8 p.m., 122 Music II. "Kierman Duet Recital."

Thursday, February 20

School of Music, 8 p.m., Recital Hall. "Kierman Recital." through Feb. 21.

Friday, February 21

Kern Graduate Commons, noon, Kern Lobby. Concert titled "Susan & Andy."

- International Coffee House, 7 p.m., HUB Ballroom. "The Penn State International Dancers."

University Resident Theatre Company, 8 p.m., The Playhouse. "A Raisin in the Sun." by Lorraine Hansberry, directed by Charles Dumas, through March 1. For tickets, phone (814) 865-0255.

Saturday, February 22

- Penn State Filipino Association, 5 p.m., 102 Kern. "Barrio Fiesta." For tickets, phone (814) 867-7166 or (814) 234-6267.

School of Music, 8 p.m., Recital Hall. Student Recital presents Andrea Henry, horn.

- Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "National Traditional Orchestra of China." For tickets, phone (814) 865-0255.

School of Music, 8 p.m., Recital Hall. Student Recital presents Jeannie Onnemus, oboe.

Practice makes perfect

Members of Pennsylvania Dance Theatre rehearse for, "Winter Concert of World Premieres," which they'll perform at 8 p.m. Friday, Feb. 14, and Saturday, Feb. 15, at the Pavilion Theatre on the University Park campus. For ticket information, call the Eisenhower Ticket Center at (814) 865-0255.

Sunday, February 23

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents "Painting by The Light at the Palmer Museum," by Robin Seymour.

School of Music, 2 p.m., Recital Hall. Student Recital presents an organ studio recital.

School of Music, 2 p.m., 122 Music II. Student Recital presents Michael Rider, voice.

SEMINARS

Friday, February 14

Geography, 4 a.m., 206 Walker. Cynthia Brewer on "Killer Cartography: Map Design Research for the NCHS Atlas of United States Mortality."

Philosophy, 4 p.m., 124 Sparks. Joseph Flay on "Difference and Identity."

Saturday, February 15

Sociology, 11 a.m., 101 Thomas. Svante Paabo on "Human History as Seen Through Genetics: Ancient and Modern DNA Sequences Reveal New Aspects of Our History."

Monday, February 17

Continuing and Distance Education and the College of Education's Adult Education Program, 11:45 a.m. to 1 p.m., 502 Keller. Kimberly A. Townsend on "Human Resource Development Function as an Adult Education Application."

Catholic Faculty and Staff Fellowship, noon to 1 p.m., 212 Eisenhower Chapel. The Rev. Joseph Adamon on "Lunch with the Bishop: Open Forum."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. John Harwood on "CAC Support for Teaching."

Gravity Center, 2 p.m., 339 Davey Laboratory. Rodolfo Gambini on "Chern Simons Theory and Spin Knot Invariants."

Physics, 3:30 p.m., 339 Davey Laboratory. Charles Kane on a subject to be announced.

- Australia-New Zealand Studies Center, 3:30 p.m., 102 Weaver. Barry Gustafson on "Race, Land and Politics in New Zealand: Compromise or Confrontation?"

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. Norman Swanson on "Computing Issues in Econometrics."

Computer Science and Engineering, 4 p.m., 302 Pond Laboratory. Ilano Cervantes on "A Linear Logic Framework."

Tuesday, February 18

- Center for Women Studies, noon to 1:15 p.m., CWS Resource Room, 120 Boucke. Film titled "Jessie Norman."

Physics, 3:30 p.m., 339 Davey Laboratory. Francis Halzen on "Toward a Kilometer-Scale Neutrino Detector: The Amanda Experiment."

Computer Science and Engineering, 4 p.m., 302 Pond Laboratory. Fairouz Kaharedine on a subject to be announced.

Wednesday, February 19

Gerontology Center, 12:15 to 1:15 p.m., The Living Center, 110 Henderson. Eric T. Poehlman on "Regulation of Energy Metabolism and Substrate Utilization in Aging Humans."

- Center for Ethics and Religious Affairs, 7:30 p.m., Paul Robeson Cultural Center. Shahid Athar on "Malcolm X: A Perspective from the Islamic Community."

Thursday, February 20

Gravity Center, 11:30 a.m., 339 Davey Laboratory. Alejandro Corichi on "Quantizing 2+1 Gravity with Λ not equal to 0."

Physics, 3:30 p.m., 101 Osmond Laboratory. Melvin Kalos on "Supercomputing Science in the Next Century."

American Studies, 4 p.m., Women's Studies Lounge, Sparks. Murry R. Nelson on "Basketball as Cultural Capital: The Original Celtics in Early 20th Century New York City."

Computer Science and Engineering, 4 p.m., 302 Pond Lab. Kevin Brown on "Network Architecture and Communication Protocols for Mobile Computing."

Food Science, 4 p.m., 117 Borland Laboratory. Pat Lawlor on "Kinetic and Polymorphic Advantages of Polar Lipids During Cocoa Butter Solidification."

- Center for Ethics and Religious Affairs, 7:30 p.m., Paul Robeson Cultural Center. Shahid Athar on "Malcolm X: A Perspective from the Islamic Community."

Friday, February 21

Philosophy, 4 p.m., 124 Sparks. Vincent Coplietio on "Reconfiguring Need and Desire: Dewey in Light of Lacan."

- Geography, 4 p.m., 26 Hosler. Anthony Cohen on "The Underground Railroad Walk to Canada."

Sunday, February 23

Paul Robeson Cultural Center, 25th anniversary celebration, 4:30 p.m. Cultural Center. Paul Robeson Jr. to speak.

CONFERENCES

Monday, February 17

"Food Service Manager 2002 Institute," through Feb. 18. For additional information, phone (814) 865-5140.

Wednesday, February 19

"Christmas Tree Management," Penn State Scanlon, through Feb. 21.

EXHIBITS

HUB Art Alley Cases

- African artifacts by Sharon and Jim Mortensen, through Feb. 16.
- Office of International Studies presents "International Festival," Feb. 20 through April 6.

HUB Art Alley Panels

Unity Days and graphic design "Imagine a World," through Feb. 23.

HUB Browning Gallery

- Photography exhibit titled "Our Land" by Jay Sieminski, through Feb. 23.

HUB Formal Gallery

"Memories of Childhood," through Feb. 22.

HUB Sculpture Corner

"American Gothic Revisited," by Jane Richey, through May 21.

Kern Panels

Perry Oliver, international printmaker, displays works, through Feb. 20.

Kern Titled and Flat Cases

Visual art display "Dust-Jackets" by Chip Kidd, through Feb. 16.

Palmer Museum of Art

"Disarm Science: Photo Works by Alan Sekula, 1972-1996," through March 16.

"Capturing the Light: A Selection of 20th-Century American Watercolors" by Winslow Homer, through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through Feb. 15.

Zoller Gallery

School of Visual Arts, "Undergraduate Juried Exhibition," through March 28.

- Reflects an international perspective.

For a full listing of University Park activities, including sports events, go to the Web at URL <http://cac.psu.edu/calendar/>

Faculty/Staff Alerts

Commission for Women to hold annual spring banquet March 17

The 12th Annual Spring Banquet of the Commission for Women, "On Our Own... Challenges, Success and Looking Toward the Future," will be held on Monday, March 17, at the Nittany Lion Inn on the University Park campus. A reception will be held at 5:30 p.m., with dinner beginning at 6 p.m. The banquet is traditionally held in March as part of the celebration of Women's History Month.

This year's program will focus on the challenges women at Penn State have met in years past, the success women have experienced in a variety of areas and the future directions of our women students. Special presentations will be made to honor the first members of the Commission for Women. In addition, the 1997 Rosemary Schraer Mentoring Award will be presented. Women artists also will be showcased in performances during the program.

Tickets are \$18 for non-students and \$10 for students. Reservations must be made by March 7. Child care will be available for children 2 years old or older (pre-registration required). Banquet invitations and information are available from the Commission for Women Office, 311 Grange Building, or by calling (814) 865-1863. As in the past, tables will be available for purchase by individual units or organizations.

In addition, scholarships are available for students; donations toward these scholarships will be accepted along with payment for tickets. For more information, please contact Tracy Leitzel at the Commission for Women, (814) 865-1683 or e-mail at tll8@psu.edu.

Health Promotion Programs

The following programs are being offered by the Office of Human Resources:

■ Self Defense for Life

This introductory seminar explains how prevention, assertion and confrontation/coping skills can be used for self-defense against attackers and stressors. Meets Thursday, Feb. 20, from noon to 1 p.m. in 101 Kern Building. Cost: \$7, reimbursable to HMO participants. To register, contact Jan Hawbaker at (814) 865-3085 or JQH3@psu.edu.

■ Adult Children of Alcoholics

This session will now meet each Thursday in February from noon to 1 p.m. in the Harshbarger Room of the Eisenhower Chapel. No prior registration required, and there is no cost. All faculty, staff and students are welcome.

HUB offers art classes

The Hetzel Union Center for Arts and Crafts in Room 312 of the HUB offers instruction in a variety of arts and craft areas, membership to a ceramic studio and access to pottery tools, equipment and supplies. The programs are offered for students, faculty, staff, spouses and residents of the surrounding community. Most adult classes meet once a week for six weeks from 7 to 9 p.m. There are some morning and afternoon classes available. The second session begins the week of March 24 and classes are filled on a first-come-first-served basis. Class fees range from \$50 to \$65 and some classes include bead working, drawing, bookmaking, mixed media, painting, stained glass and pottery.

For more information on the classes, to register or to be put on the center's mailing list, contact Bernadette Carroll at (814) 863-0611.

Creative juices flowing

Matt Coon, a senior majoring in sculpture, puts the finishing touches on a life-size mold that will be cast as a fiberglass figure. He and other arts students were hard at work in the Visual Arts studios on the University Park campus recently.

Photo: Greg Grieco

Telecommunications laboratory a boon to undergraduate students

A state-of-the-art wireless telecommunications laboratory to serve undergraduate programs in electrical engineering technology has been established at Penn State Harrisburg.

Created at a cost in excess of \$150,000, the lab was funded by a National Science Foundation grant and matching funds from Penn State Harrisburg and the University.

"The lab will answer the needs of engineering education in the rapidly expanding area of telecommunications," said Ali Behagi, associate professor of electrical engineering at Penn State Harrisburg. "It has given us great capability, expanding the design, fabrication and measurement range in the lab to nearly the highest available frequency."

Wireless and satellite communications are currently

among the fastest-growing technologies. With the rapid expansion of local, regional and global communication systems such as cordless and cellular phones, microwave and satellite communication and distance learning, the demand for wireless and microwave has grown considerably.

The newly installed automated test instruments have extended the frequency range of Penn State Harrisburg's lab from about 100 megahertz to more than 20,000 megahertz. This extended range makes it possible for students to design, fabricate and elevate circuits for all types of wireless communication systems. It is also envisioned that the facility will be an essential part of the proposed bachelor of science degree in electrical engineering at that location.

High-tech twist added to Spanier's radio show

The February edition of President Graham B. Spanier's monthly radio show, "To the Best of My Knowledge," will focus on information technology. To emphasize the point, the Feb. 18 show will include some high tech aspects. The show airs at 7 p.m.

Not only can listeners of the WPSU-FM (90.1, 91.5 and 106.7) radio

"To the Best of My Knowledge" will air at 7 p.m. Tuesday, Feb. 18, on WPSU-FM (90.1, 91.5 and 106.7).

show that reaches 14 counties in central and northern Pennsylvania take part, but anyone in the world with access to the Internet also will be able to participate in this special program on technology.

One of the LionCams — cameras that the office of University Relations, the Center for Academic Computing and the Penn State Alumni Association have placed at various locations around the University Park campus so that various sites on campus can be viewed from the World Wide Web — will be moved into the studio in Wagner Building Annex where the radio show originates.

Spanier's hourlong radio show traditionally includes questions from the listening audience through a special telephone line, 1-800-543-8242. This show about technology will include a special e-mail address that has been established so people also can use the Internet to submit questions. The e-mail address, response@psu.edu, can be used beginning at noon Tuesday, Feb. 18, and will be in operation until the end of the show, at 8 p.m.

As part of a test of new technology, there also will be an experiment using RealAudio technology to broadcast the radio show live over the Internet to a small number of listeners around the world. Those listeners also can submit questions during the show using e-mail. Spanier will have a computer in the sound booth where he can read the incoming electronic mail during the show.

Joining Spanier will be two guests taking part from remote locations via telephone. They are Robert Heiterik, president of a consortium of universities that represents higher education interests in information technology issues, and James Ryan, vice president for Outreach and Cooperative Extension at Penn State.

■ Fulbright Program

Grant recipients come from several locations

In the U.S. Fulbright Program for 1996-97, four of the six Penn State Fulbright recipients were faculty members from locations other than University Park. Scholar Fulbright grants for 1996-97 were awarded to:

— **Simon J. Bronner**, professor of folklore at Penn State Harrisburg campus of the Capital College, Japan.

— **David M. Esposito**, instructor of history at Penn State Altoona College, Indonesia.

— **Kenneth K.T. Louie**, associate professor of economics at Penn State Erie, The Behrend College, the People's Republic of China.

— **John D. Matthews**, director of the Communications and Space Sciences Laboratory, Department of Electrical Engineering, Sweden.

— **David Miller**, professor of physics at Penn State Hazleton campus, Poland.

— **Merlin A. Vannice**, distinguished professor in the Department of Chemical Engineering, Germany. Fulbright grants allow professors to teach, research and share their expertise with colleagues in other countries.

In addition to Penn State faculty going abroad, many international scholars come to the University to work with faculty and students as well. The following international Fulbright scholars are now at University Park teaching, consulting and conducting research with Penn State colleagues as under the sponsorship of the J. William Fulbright Foreign Scholarship Board and the United States Information Agency.

The scholars, who they are working with and their area of study are:

— **Olexander Hrytsenko**, Institute of Cultural Policy, Ukrainian Centre of Cultural Studies, Kiev, Ukraine. He will be here until August 1997, studying U.S. public cultural policy and private patronage of the arts.

— **Bogdan Stefanescu**, the faculty of Foreign Languages and Literatures, the University of Bucharest, Romania. He will be here until June 1997 studying the rhetoric of post-totalitarian discourse.

— **Tatyana Sayenko**, associate professor, Department of English Language at Kiev Linguistic University, Kiev, Ukraine. She will be here until September 1997, researching cross-cultural differences in the usage of economic terminology in English and Ukrainian.

— **David B. Lewis**, chief inspector and head of training at the Durham Police Training Centre in England. He will be here until April 1997 learning about the continuing education of law enforcement personnel in the U.S.

Monty L. Christiansen, associate professor of recreation and parks management, and **Hans Vogelsgang**, Ph.D. candidate in leisure studies, are co-editors of *Play It Safe: An Anthology of Playground Safety*, Second Edition.

Published by the National Recreation and Park Association, the second edition of this anthology updates every chapter to include new changes in playground evaluation and management, adds a new chapter on court litigation techniques, includes a detailed comparison of the two major playground safety documents, and provides readers with the first globally collected glossary of terms related to playground safety and a detailed index. The book will be used as a text for the National Playground Safety Institute's certified playground safety inspector course, as well as for a Penn State distance education course.

Katherine T. Frith, associate professor of advertising in the College of Communications, is editor of *Advertising in Asia: Communication, Culture and Consumption* (Iowa State University Press).

The book examines how advertising operates in the more developed countries of the Asia/Pacific region, including Japan, Hong Kong, China, Taiwan, Korea and India. Written by practitioners and scholars from throughout Asia, *Advertising in Asia* examines current issues such as political structure, national development policies, cultural and religious systems, press policies and advertising regulations.

S.K. Majumdar, Lafayette College, **E. Willard Miller**, professor emeritus of geography at Penn State, and **Fred J. Brenner** of Grove City College are co-editors of *Foresis: A World Perspective* published by The Pennsylvania Academy of Science.

In the book, the authors address a variety of topics related to the ecology and management of forest resources. Part one on forest ecology considers such aspects as forest regions of the world, forest hydrology and entomology, regeneration ecology and an integrated model of forest dynamics. Part two, on environmental aspects, treats modeling forest response to climatic change, diversity loss, effects of acid deposition on forests, effects of radiation on forest and other environmental topics. Part three deals with socio-economic aspects such as forest-based economic development, urban forest management, spatial and temporal trends in agricultural woodlands and appropriate export strategies. Part four provides an international perspective with case studies from India, Russia, Sweden, the Sahel, the Himalayas and Brazil.

Chapters from Penn State faculty include **J. Christopher Haney**, **William Merrill**, **Wayne L. Myers**, **Jonathan Lyon**, **William E. Sharpe**, **Stephen M. Smith**, **James C. Finley**, **William Elmendorf** and **Paul M. Smith**.

John D. Martz, distinguished professor of political science, is the author of *The Politics of Clientelism; Democracy and the State in Colombia*, published by Transaction Publishers (1997). Before this book, Martz wrote *United*

States Policy in Latin America: A Decade of Crisis and Challenge, University of Nebraska Press, in 1995.

E. Willard Miller, professor emeritus of geography and associate dean for resident instruction in the College of Earth and Mineral Sciences, and **Ruby M. Miller**, associate librarian emeritus, Pattee Library, are co-authors of *United States Immigration*, published by ABC/CLIO, Santa Barbara, Calif.

This book gives a comprehensive overview of the roots of immigration, the development of U.S. immigration policy and trends in legal, illegal and refugee immigration. It also presents a chronology and summary of immigration laws and regulations; a directory of organizations; extensive annotated bibliography of books, as well as more than 600 articles from journals and government publications; and an annotated list of videos and films. The book is a valuable resource for research on one of the most complex issues in contemporary society.

Steam locomotive operation and the Reading Railroad may be long gone, but thanks to author **Jeremy F. Plant**, they are not forgotten. Plant, professor of public policy and administration at Penn State Harrisburg, has written a new book, *Reading Steam in Color*, which features more than 200 color photographs of the last 10 years of steam locomotive operation on the Reading Railroad.

The hardbound book, published by Morning Sun Books Inc. of Edison, N.J., is filled with never-before-published vintage photos. Plant provides a guide to the history and operations of the Reading, with a special emphasis on its three major roles: serving the needs of the metropolitan Philadelphia region, providing a bridge line for traffic between Pennsylvania and other sections of the country, and service to the anthracite coal industry of northeastern Pennsylvania.

A new book by **Lynne Vernon-Feagans**, professor of human development and associate dean in the College of Health and Human Development, examines the relationship between children's transition to school and their cultural, ethnic and economic backgrounds.

Children's Talk in Communities and Classrooms, published by Blackwell Publishers, traces the transition to school of a group of poor African American children in semi-rural North Carolina. Half of the children were part of an intensive early day-care intervention program designed to prepare them for formal schooling and half were not. Vernon-Feagans describes the less than optimal treatment given to the children during the transition to public school, as well as describing the many strengths of the children's home communities. Her conclusions provide strategies for the successful engagement between child and classroom.

David Wormley, dean of the College of Engineering, has co-authored a textbook titled *System Dynamics: An Introduction* published by Prentice-Hall Inc., with **Derek Rowell**, professor of mechanical engineering at Massachusetts Institute of Technology.

The text, a direct outgrowth of the many years both authors spent teaching a sophomore-level course in system dynamics at M.I.T., is organized for use in a range of courses from undergraduate to the graduate level. Engineering systems, ranging from large structures excited by wind and seismic forces, to ocean ships and platforms excited by wind and waves, are covered in this book. The system dynamics approach of the book "provides important unifying concepts for the analysis of systems which span the traditional engineering disciplines."

Appointments

Behrend welcomes new director of development

Judy Lawrence, director of major gifts at Franklin & Marshall College in Lancaster, Pa., has been named director of development at Penn State Erie, The Behrend College. As the college's chief advancement officer, she will be responsible for supervising staff in fund raising, public information, alumni relations and special events.

JUDY LAWRENCE

As director of major gifts at Franklin & Marshall, Lawrence played a key role in the college's capital campaign and carried out stewardship responsibilities for about 750 major gift donors and prospects. She joined F&M in 1993 as director of corporate and foundation relations. From 1987 to 1993, she was director of corporate relations at Claremont McKenna College in Claremont, Calif. She also served as executive assistant to the president and vice president of Clarkson University, Potsdam, N.Y., from 1983 to 1986.

Lawrence is a native of Erie and holds bachelor's and master's degrees from Edinboro University of Pennsylvania. She reports to Elaine Rhodes, director of University development at University Park.

Eberly College of Science Advising Center welcomes director

James Levin has been named director of the Eberly College of Science Advising Center.

Levin earned his bachelor's degree in civil engineering at Drexel University in 1968, his master's degree in ocean engineering at the University of Hawaii in 1970, and his doctoral degree in curriculum and instruction at Penn State in 1981. He has authored or coauthored seven books, including *Principles of Classroom Management: A Professional Decision Making Model* (2nd Edition) and *The Self Control Classroom: Understanding and Managing the Disruptive Behavior of All Students Including Students with ADHD*. He has authored or coauthored more than 40 articles published in professional journals. Levin has been certified to teach mathematics, physics and general science in Pennsylvania and has served as a professional consultant for more than 50 school districts and universities.

He was a mathematics teacher in the Philadelphia school system from 1968 to 1969 and a mathematics and science teacher in the Cheltenham Township School District from 1970 to 1976. He joined Penn State in 1978 as an instructor of education, serving as a university supervisor of secondary student teachers until 1980, when he became assistant professor of education in the Division of Curriculum and Instruction. Levin was an academic adviser in the Division of Undergraduate Studies from 1982 to 1989 and was a staff associate for program development and analysis in the Division of Undergraduate Studies from 1989 to 1993.

Since 1982, he has been a member of the graduate faculty and an affiliate assistant professor in the College of Education Division of Curriculum and Instruction. He has been the senior Division of Undergraduate Studies programs coordinator and the coordinator of advising research, training, and

program development in the Eberly College of Science since 1993.

Nittany Lion Inn sales manager moves to position in Smeal College

Meredith Williams, formerly a sales manager at the Nittany Lion Inn, is the new coordinator of student organizations in The Smeal College of Business Administration. In her new post, she will be responsible for guiding student service activities for the college's 27 undergraduate student organizations. Williams succeeds Rebecca Olson who recently stepped down as student organizations coordinator after five years.

MEREDITH WILLIAMS

While a sales manager at the Nittany Lion Inn, Williams served on the facility's Total Quality Management Team. That group developed ways to increase teamwork among the inn's employees, standardize communication methods and reduce negative work habits.

Before she joined the University staff, Williams was employed in human resources with the Ritz-Carlton Hotel Co. in Tysons Corner, Va. From May 1992 to August 1992, she was an administrative resident at North Penn Hospital in Lansdale, Pa. Williams graduated from Penn State in 1993, with a B.S. degree in health policy and administration. She is a member of the American College of Health Care Executives, the Washington Area Concierge Society and the Penn State Alumni Association.

Promotions

Staff

Mark E. Amsler, complex manager in College of Agricultural Sciences.

Frederick B. Angell, office information specialist in Continuing and Distance Education.

Joseph E. Brote-Markle, engineering aide in the Applied Research Laboratory.

Deborah M. Davies, unit coordinator, Expanded Food and Nutrition Education Program in College of Agricultural Sciences.

Ruth DeShong, staff assistant VII at Penn State Altoona College.

Philip M. Devan, manager, Network Design Services in Computer and Information Systems-Telecommunications.

Linda L. Drye, staff assistant VI at The Hershey Medical Center.

Colleen M. Evans, development assistant in Division of Development and Alumni Relations.

Carol L. Fisher, unit coordinator, Expanded Food and Nutrition Education Program in College of Agricultural Sciences.

Kevin M. Fox, art editor, Applied Research Laboratory.

Priscilla A. Garthwaite, staff assistant

VI in Division of Development and Alumni Relations.

Ethel L. Gunnett, staff assistant V at Penn State Altoona Campus.

Donna M. Harpster, staff assistant VII at Penn State Altoona College.

Anita A. Heichel, staff assistant VI, Commonwealth Educational System.

Beth H. Irvin, staff assistant VII in College of Agricultural Sciences.

Jennifer C. Kerr, staff assistant VI in Computer and Information Systems-Center for Academic Computing.

Darlene K. Kolovsky, staff assistant V in Student Affairs.

Mary E. Kunze, lab supervisor in Research and Graduate School.

Linda J. Nedimyer, staff assistant VII at Penn State Altoona College.

Ruth E. Nyman, staff assistant IX in College of Agricultural Sciences.

Joseph W. Reasy, director of development in Division of Development and Alumni Relations.

Michael S. Rineer, senior microcomputer system consultant in The Smeal College of Business Administration.

Shani L. Schalles, research support associate at The Hershey Medical Center.

Sheri L. Shawver, staff assistant V in College of Agricultural Sciences.

Susan R. Smith, administrative assistant I, Commonwealth Educational System.

Deborah A. Snyder, staff assistant VII in Division of Development and Alumni Relations.

Randall L. Swope, coordinator of support units in College of Agricultural Sciences.

Paul T. Tarbay, supervisor, mail and processing in College of Agricultural Sciences.

Susan L. Taylor, assistant manager, Call Center Services in Computer and Information Systems-Telecommunications.

Michael R. Teeters, education and training officer in University Safety.

Kelly R. Tetkoskie, staff assistant VI at The Hershey Medical Center.

William R. Valonis, microcomputer information specialist, The Smeal College of Business Administration.

Anna M. Very, staff assistant VII at Penn State Altoona College.

Elizabeth K. Wilson, associate director, marketing and membership in Division of Development and Alumni Relations.

Mary Ann Winkler, operations coordinator II in Computer and Information Systems-Telecommunications.

Ronald R. Zimmerman, staff assistant VI at The Hershey Medical Center.

Shawn M. Zimmerman, network analyst, Commonwealth Educational System.

Technical Service

Donald R. Confer, catering attendant in Housing and Food Services.

Michael D. Jackson, groundskeeper/landscape A in the Office of Physical Plant.

Jeffrey F. Kavelak, catering attendant in Housing and Food Services.

Terry L. Prisk, athletic equipment/laundry worker in Intercollegiate Athletics.

Alan W. Shaffer, residence hall preventive maintenance worker in Housing and Food Services.

Shirley A. Stouffer, snack bar worker B in Housing and Food Services.

Lesli J. Stone, food preparer at Penn State Beaver campus.

Research

Researchers ask miners to help spy fossil meteorites in coal mines

By ANDREA ELYSE MESSER
Public Information

Looking for a meteorite is like looking for a needle in a haystack. Looking for fossil meteorites, which fell in the distant past and are now embedded in sedimentary rock, is even more difficult, but researchers think they have a way to pare down the haystack.

"There are very few known fossil meteorites," Andrew A. Sicree, graduate student and curator of the Earth and Mineral Sciences Museum, said. "In collections worldwide, there are fewer than 20 meteorites that fell to Earth more than 2 million years ago. Many meteorites are recovered from Antarctica, but almost all fell in the last million years. If we could find a reliable source of old meteorites, they would begin to tell us something about our solar system in the distant past."

Sicree, David P. Gold, professor of geosciences, and Kevin Hoover of EES Environmental Group suspect that working coal mines might be the place to find fossil meteorites in good condition. Tramp-iron magnets already in use at coal mines could already be picking up iron meteorites, the researchers said.

Coal mines use large magnets to remove iron from the coal stream to pro-

David P. Gold, professor of geosciences, left, and Andrew A. Sicree, graduate student and curator of the Earth and Mineral Sciences Museum on the University Park Campus, examine a fossil meteorite. The two are researching the history of the solar system using information from the extra-terrestrial fossils.

Photo: Greg Grieco

tect equipment down the line. Most of the iron removed is from hardened steel tools that break or otherwise fall in with the coal. "We thought, maybe the magnets are already doing the job and we just don't know about it," said Sicree. "Hopefully, all we have to do is look in the tramp metal bins next to the magnets."

After they began visiting coal mines and talking to miners in Wyoming and

Montana, they realized that often there were no bins next to the magnets and the iron removed from the coal stream was immediately thrown out or, if it was stored, was not sorted before it was sent to a reclaimer.

"So far, no iron meteorites, or other types of meteorites have been found in coal mines," Sicree said.

"However, as we talk to miners and mine owners, they seem willing to save

whatever the magnets collect."

The researchers hope that miners and mine owners will send them any objects which are picked up by their tramp metal magnets, yet are obviously not man-made. To this end, the researchers are contacting mining professionals and distributing information, including a poster, on this project which is funded by NASA's Pennsylvania Space Grant Consortium.

Tips for winter driving

In 1995, The Milton S. Hershey Medical Center treated more than 1,100 adult and pediatric trauma injuries, 43 percent of which were due to motor vehicle collisions. The Penn State Coalition for Lifetime Injury Prevention (CLIP) at the medical center provides the following tips for winter driving conditions and to help prevent you from becoming a statistic.

- Always wear your seat belt.
- Make sure your mirrors and seat are positioned so you can see well.
- Check to make sure your mirrors and windshield are clear of frost, snow and dirt, and make sure the washer fluid is filled and wipers are in good condition.

- Leave enough time to get to your appointment. Don't be in a rush.
- Have an "emergency kit" in your car which includes: flashlight, flares, snacks, jumper cables, gloves, hat, blanket, boots, sand and a shovel so you're prepared if your car gets stuck.

- If you start to skid, pump your brakes. Or, if your car has an "Anti-Lock Brake System" (ABS) maintain continuous pressure on the brakes. In both cases, turn your car to follow the direction of the skid so you can maintain control.

A new tint to pest control

Research in the College of Agricultural Sciences credits colored plastic mulches with increasing crop yields, showing that plants like a little color in their lives. As it turns out, insects may be more likely to make a bee-line to tinted mulches as well.

This colorful research has particular implications for Pennsylvania's greenhouse vegetable growers, said Cathy Thomas, research assistant in horticulture. Thomas, who is in the preliminary stages of a three-year study, said growers may be able to use colorful mulches to better manage beneficial insects that prey on agricultural pests.

"In essence, the colored mulch works as a trap crop for pests," Thomas said. "The challenge in using any biological control is finding the pests so the predator can be introduced close to the infested area. You can make things easier for the bio-controls by using colored mulches to attract the pests to certain areas, making the placement of beneficial insects more effective."

The mulches benefit your garden in another way, as well. They prevent rapid evaporation, so you don't have to water as often.

Hershey involved in national robotics research

Penn State's College of Medicine at The Milton S. Hershey Medical Center is one of four institutions nationwide that will work with Computer Motion Inc. to help perfect the company's robotically-assisted microsurgery systems and participate in the studies necessary for the systems to receive Food and Drug Administration clearance. The robotic systems will be used in endoscopic cardiac surgery procedures to allow multiple vessel coronary artery bypass grafting through holes smaller than the diameter of a pencil.

Cardiovascular disease is the No. 1 cause of death in the United States and most industrialized nations.

More than 700,000 coronary bypass grafts and 200,000 heart valve replacements are performed annually worldwide. More than 99 percent of these procedures are performed as open-heart surgeries, requiring a patient's breast bone to be cut in half to allow access to the heart. This practice is necessary, as today's technology is not capable of supporting the clinical demands of a fully endoscopic surgical approach.

Computer Motion's robotically-assisted microsurgical systems enable surgeons to videoscopically perform delicate, precise surgical maneuvers through endoscopic ports. With the assistance of robot-

ics, new procedures will be able to be performed safely and with consistent high quality.

"With the advent of computer-controlled medical robotics, we now have a platform of technology that will enable us to devise innovative minimally-invasive procedures to reduce the complications and cost associated with these operations," said Dr. Ralph J. Damiano, chief of cardiothoracic surgery at The Hershey Medical Center.

Computer Motion, the world's leading supplier of medical robotics, also has partnered with the Cleveland Clinic, Sarasota Memorial Hospital, and Barnes Hospital, Washington University in St. Louis to study the device.

ATHLETICS

A regular column provided by Intercollegiate Athletics

New assistant coach

Former Nittany Lion tennis player **Chad Skorupka** has joined the Penn State staff as the assistant women's tennis coach.

Skorupka, a 1994 graduate of Penn State, was a tri-captain during his senior year (1993-94). Since graduating, Skorupka has been an assistant tennis professional in Lakewood, Ill., and was the coordinator for Play Tennis America in King of Prussia, Pa. Before joining the Lady Lion staff, Skorupka was the player development/district coordinator for the United States Tennis Association/Middle States Section in Indianapolis.

Directors' Cup

For the fourth consecutive year, Penn State is at or near the top in the Sears Directors' Cup survey through fall sports.

The Nittany and Lady Lions earned 277.5 points from the program's fall sports. Nebraska is the leader with 282 points, followed by Penn State, Notre Dame (256), North Carolina (233) and Stanford (232.5). The all-sports competition is presented by the National Association of Collegiate Directors of Athletics (NACDA) and *USA Today*. Standings for the Sears Directors' Cup will be updated follow the winter season and the 1996-97 champion will be announced in June.

Fiesta earns high rating

Penn State's 38-15 victory over Texas in the Tostitos Fiesta Bowl earned the third-highest television rating among all 1996-97 post-season contests: The Nittany Lions' sixth Fiesta Bowl victory in as many fights posted a 9.5 rating on CBS, topped only by the 17.9 rating for the Nokia Sugar Bowl and the 16.5 for the Rose Bowl.

Preseason recognition

The Penn State baseball team, which posted a 32-24-1 record in 1996 and won the Big Ten championship, has been recognized in Collegiate Baseball's 1997 preseason poll. Coach Joe Hindelang's Nittany Lions garnered a No. 34 ranking in the publication's "Fabulous 40" and are the highest ranked team in the Big Ten.

For the Record

The photo on page 9 of the Feb. 6 *Intercom* was misidentified. The picture was part of the "Recent Gifts and Acquisitions: Works on Paper" exhibit, which is on display at the Palmer Museum of Art on the University Park campus through June 15.

Snow business

Erica Bralis pelts Rob Williams with a snowball during the two students' winter battle behind the HUB parking deck on the University Park campus. This photo was taken by photojournalist Bryan Harkins, a student in Jack Lauterer's "Introductory to Photojournalism" class. The assignment was to capture a scene depicting the weather.

Road Scholars trip on horizon for May 12-13

New faculty at Penn State will soon receive invitations to take part in President **Graham Spanier's** second annual bus trip to sites around the Commonwealth, dubbed the Road Scholars Travel Seminar.

This year's trip, scheduled for May 12-13, will take two buses full of faculty who have been hired within the past two years to sites across western Pennsylvania. The travel seminar, which is free of charge to faculty, will include stops at several Penn State campuses and an overnight stay in the residence halls at one of the Pittsburgh-area campuses.

Other tentative stops include visits to a farm and one or more factories; meetings with legislators; dining with Penn

State alumni, business leaders and university donors; and stops at tourist attractions, such as a riverboat ride in Pittsburgh.

More details about the travel seminar will be included in upcoming issues of *Intercom*. If you have questions about the travel seminar you can contact **Melissa DeLong** at (814) 863-5117 or send an e-mail note to: msw7@cdc.psu.edu.

Spanier introduced the travel seminar last year and approximately 70 faculty from several Penn State campuses filled the two buses.

Penn State alumnus is star One of film's first talking pictures found in Russia

BY KAREN WAGNER
Public Information

For almost 20 years they searched. Collectors and archivists were missing an important piece of film history—one of the first two talking motion pictures ever made, starring **Fred Waring** and his Pennsylvanians.

For **Peter Kiefer**, coordinator of University Libraries' Fred Waring collection and former Waring road manager, the missing piece left a noticeable void.

"We have just about everything else from his career," Kiefer said. Waring, who died in 1984, was an internationally known band leader and choral director and a Penn State alumnus.

Film star **Dorothy Lee** was also interested in finding a copy of "Syncopation." Besides starring in the film, Lee was a former Waring group member herself. Kiefer, who visited Lee in her San Diego home describes her as "a very vivacious, outgoing and attractive woman at 85 years old."

In 1929, RKO released the film "Syncopation," the first all-talking, all-singing motion picture in movie history. Produced before but released just after Al Jolson's "The Jazz Singer," the Waring movie was an instant hit. Aspiring dancers competed in local contests, hoping that they too might become "Syncopation girls."

Waring received top billing in the film, which also starred **Morton Downey Sr.**, **Barbara Bennett**, **Bobby Watson**, **Ian Hunter**, **Osgood Perkins** and **Lee**. Waring's Pennsylvanians and Dorothy Lee

Stepping lightly

Undergraduate student **Heather McGinnis** is poised to begin in **Vicky McGuade's** advanced ballet class in 108 White Building on the University Park campus. The class is part of the Dance Program offered through the Department of Kinesiology.

■ Call for presentations

Penn State to be site of special diversity conference

Industry, labor and higher education are putting their heads together in a first-ever collaboration to identify best practices in diversity.

Provosts and vice chancellors at the Big 10 universities, CEOs of Fortune 1000 corporations and labor union leaders are planning a three-day working conference at The Penn State Scanticon in September to exchange practical strate-

gies on how to improve the work climate through diversity-related programming.

Academics and industry leaders nationwide have received a call for papers on how to develop effective ways to incorporate diversity into the fabric of corporate, labor and

Child care center to be built at Research Park

Penn State has signed a contract with **Children's World Learning Centers** of Golden, Col., to design, build and operate a child care and educational facility at the Research Park. Construction will begin soon and the facility is expected to begin operation in August.

"Children's World has designed and constructed nearly 400 child care centers and operates more than 500 nationally," Billie S. Willis, assistant vice president for Human Resources, said. "We look forward to our collaboration with Children's World, which will provide opportunities for both quality child care as well as academic research."

The 13,000-square-foot facility will be built next to The Penn State Scanticon and is expected to provide care for approximately 200 infant to school-age children.

According to Children's World Learning Centers, its mission is to provide children with a nurturing environment where individual talents are allowed to flourish and grow. Included in its approach to providing quality child care is the use of developmentally appropriate educational programming, which allows each child to succeed at his or her own pace.

Other child care programs at the University Park campus include the center at Cedar Building and the College of Health and Human Development Child Development Laboratory in Henderson Building. The University also manages the Imagination Station Child Care Center at CATO Industrial Park in partnership with Arc of Centre County.

For more information, contact **Linda Pierce**, coordinator of the Work/Life Programs in the Office of Human Resources, at (814) 865-5886.

More is better when it comes to computers

It's always fun to get a package, but when you get 202 computer packages in a day, that's news. On Tuesday, Feb. 18, two truckloads of computers arrived at the Pollock Undergraduate Library, and were hoisted by crane through a hole in the side of the building and stacked ready to be installed in Penn State's newest student computer lab.

"We are always upgrading computer services for students, but this new lab is going to be a wonderful addition," said James Kerlin, deputy director of the Computer Center.

The new lab will have 66 Macintosh computers and 144 IBM computers with four IBM and four Mac computers equipped for multimedia creation in two rooms set up for collaborative learning so students can work together on class projects. One collaborative room will be dedicated to Macs and one to IBMs. Desks around the sides of the main room will be equipped with Ethernet ports to allow students to plug their own lap-

tops directly into the Pollock Lab LAN and access the University computer backbone (and hence the entire Internet). In the Fall of 1996, the Mac lab on the first floor was converted to a dual function IBM lab/seminar facility.

Scheduled to open in April — just in time for final projects and papers — the lab will be available to all Penn State students with a computer access account, including those who live both on and off campus, as well as those from other campuses. Alan Williams, CAC director of distributed computing, said,

The new lab will have two computer consultant areas with at least one consultant scheduled on duty 24-hours a day, seven days a week. Student rovers will also check laboratory equipment on a regular basis. Currently 13 of the 28 CAC computer laboratories have consultants on duty during peak hours, but the Pollock Lab will be the first with continuous consultant assistance.

Wires first, then computers

Jim Johnson, front, and Dale Hemmings install wiring for computers at Pollock Library on the University Park campus. The second floor of the library houses a new computer lab.

Photo: Greg Grieco

This is cooperative initiative spanning several departments and budgets. The cost of the computers will be covered by the student computer fee.

By April, students will have access to about 1400 CAC computers in labo-

ratories across campus in addition to about 2100 computers in now in college and departmental labs.

For more information, contact Kerlin at (814) 863-0421, or Williams at (814) 865-4760.

College of Agricultural Sciences to have new dean as of July 1

Robert D. Steele, associate dean for research in the College of Agricultural and Life Sciences and executive director of the Wisconsin Agricultural Experiment Station at the University of Wisconsin-Madison, has been named dean of the College of Agricultural Sciences, effective July 1. Formal approval will be taken up by the Board of Trustees at its March 21 meeting.

"Dr. Steele is an accomplished administrator known nationally for his research in nutritional sciences, and we are very pleased that he will join Penn State as dean of one of our key colleges," said President Graham B. Spanier. "He has a proven track record in the integration of teaching, research and service, and we look forward to working with him."

As associate dean since 1993, Steele is responsible for the day-to-day operation of the research division, administering approximately \$70 million of research activity from federal, state and private sources encompassing nearly 600 projects by 300 research faculty in 22 departments and numerous centers. He also has overall responsibility for the operation of 13 research stations throughout the state of Wisconsin, and administers a \$4 million internal competitive grants program. He served as acting associate dean for the 1991-92 academic year.

Among his initiatives as associate dean have been the development of a Research Advisory Council to recommend policy and review processes for research proposals, the development of a home page and a database for the college.

His principle areas of research include amino acids; nitrogen and sulfur metabolism in liver disease; interactions of retinol and one-carbon metabolism; blood-brain barrier transport of nutrients; and ethionine hepatotoxicity. His more than 50 articles have been published in such journals as *Biochemical Pharmacology*, the *Journal of Nutrition* and the *American*

Steele has been a professor in the Department of Nutritional Sciences since 1987, where he teaches both graduate and undergraduate programs in nutritional sciences as well in the Biocore and Ways of Knowing programs. He helped develop the Interdepartmental Graduate Program in Nutritional Sciences, worked toward integrating research and undergraduate programs and served as chair of the departmental Graduate Admissions Committee.

Before joining the University of Wisconsin-Madison in 1982 as an assistant professor, Steele was an assistant professor of nutrition at Rutgers University from 1978 to 1982. He received his B.S. in nutritional sciences and his M.S. in biochemistry and nutrition from the University of Arizona in 1970 and 1973, respectively, and his doctorate in nutritional sciences from the university of Wisconsin-Madison in 1978.

Among his awards are the Bio-Serve Award for Experimental Nutrition from the American Institute of Nutrition, and a New Investigator Research Award from USPHS.

He is currently a member of the North Central Regional Research Committee, responsible for review of all Hatch regional research projects; chair of the ESCOP subcommittee on human nutrition, and member of the Board of Scientific Advisors for the American Council on Science and Health.

Steele also has served as institutional representative to such boards as the National Agricultural Biotechnology Council and the Agricultural Research Institute; was conference chair of the Ross Laboratories 12th Nutritional Conference on Medical Issues and co-chair of the A. E. Harper Symposium on emerging aspects of amino acid metabolism. He is a member of a number of professional societies such as the American Farmland Trust, American Society for Biochemical and molecular biology and American Institute of Nutrition, among others and as such has served on numerous committees for

Conference

continued from page 1

institutional organizational structures. Members of the Penn State community are invited to submit a presentation proposal for the September conference, "Best Practices in Diversity: Exploring Practical Applications for the 21st Century," planned for the University Park campus.

Topics for presentation can include policy, institutional and organizational philosophy and administrative initiatives on ethnic and racial diversity, gender, disability issues, international and cross-cultural issues, gay, lesbian and bisexual issues and age.

Specifically, planners of the Sept. 18-20 conference are looking for such practical applications — what works and what doesn't work — as hiring, retention and promotion practices, diversity training and programming initiatives and industry expectations of college graduates. The conference will address a wide spectrum of areas including ethnic and racial diversity; gender; disability issues; international and cross-cultural issues; gay, lesbian and bisexual issues; and age.

Those who want to participate in the conference will be able to register in March. In addition to keynote speeches, panel discussions and roundtables, there will be up to 45 interactive workshops and discussion groups over the three days that deliberately mix and match participants from labor, industry and education. Reservations will be restricted to about 300 to 400 participants.

Presentation proposals, including a one-page summary, are due March 1 and authors will be notified by May 1. For more information, visit the Best Practices in Diversity Web site at <http://www.cde.psu.edu/C&I/BestPracticesinDiversity/> or contact Marc Levey, Office of the Vice Provost for Educational Equity, at (814) 863-2294 or by e-mail at MBL1@psu.edu.

Waring film

continued from page 1

made the film in a Brooklyn studio at the same time they were appearing in the Broadway show "Hello Yourself!"

Syncopation's plot revolves around two vaudeville dancers barely getting by when a savvy entrepreneur invites them to join his dance club band played by Fred Waring's Pennsylvanians. Fortunes are won and lost and won again in a film best noted for its sound quality, even 68 years later.

Kiefer stayed in contact with Lee and her two sons, who continued looking for the film.

"Among us, we thought we had exhausted every lead," Kiefer recalled. They had searched the Library of Congress, the American Film Institute at UCLA, Turner Broadcasting archives among others, but found no prints.

Kiefer had all but given up hope when Lee phoned in December with good news. A copy of the film had been located in Russia by James Cavallo, a

San Diego film buff and Dorothy Lee fan. Cavallo discovered that the Gosfilmofond of Russia, a film library in Moscow, contained a copy of "Syncopation." With some difficulty overcoming the language barrier, Cavallo verified that the Russian copy was an unaltered 1929 original and not the 1940 remake.

Lee told Cavallo of Penn State's interest in the film and Cavallo forwarded a copy to Kiefer at no charge. Penn State's University Libraries is still interested in obtaining an original print and may at some point query the Gosfilmofond of Russia about their interest in selling the original.

A 20-year search has ended and a famous piece of film history is restored. Thanks to some persistent sleuthing, the mystery has been solved. Fans and film buffs in the U.S. can enjoy one of the few surviving copies of a Fred Waring original and one of the first two motion pictures recorded with sound.

While there are no plans at present to re-release the video, the tape is available for viewing in VHS format. For more information, contact Kiefer at (814) 863-2911.

Good old days

Manager retires after 30 years of service

Thomas W. Seiler, facilities services manager with Continuing and Distance Education, retired after 30 years of service to the University.

Seiler came to Penn State as a student and continued to take courses in management throughout his career. In 1966, he accepted a position as a senior clerk in the Department of Production Stores in Keller Building. That department changed its name and functions over the years, eventually becoming facilities services as Seiler became supervisor, then manager of the operation.

"The most satisfying part of my work at the University was the last two years when I coordinated the renovation of Keller Building and commissioned the mural depicting the history of C&DE at Penn State," Seiler said.

Seiler now resides in Cooper City, Fla., with his partner, Jonathan Tubman, an associate professor at Florida International University. After an extended "vacation" learning to play golf, he plans to resume working for another 10 years, drawing on the experience he gained during the Keller renovation.

THOMAS W. SEILER

Appointments

Department of Biology names new head

William R. Jeffery, professor of biology, is the new head of the Department of Biology, succeeding

WILLIAM R. JEFFERY

Robert Mitchell, professor of biology, who has served as interim department head since April 1995.

Jeffery, who previously was a professor of molecular and cellular biology at the University of California at Davis, has research interests in gene regulation during embryo development, RNA localization during development, the evolution of develop-

mental mechanisms and molecular evolution. He is setting up a laboratory at Penn State to house six endangered populations of eyeless cave fish that evolved in isolation from each other during the past 100,000 years. Jeffery plans to study the evolution of eyelessness. He also is known for his research on the development of the ascidian (sea squirt).

Jeffery earned his bachelor's degree in biology at the University of Illinois in 1967, his doctoral degree in cell and developmental biology at the University of Iowa in 1971, and completed two postdoctoral positions in molecular biology, one with the McArdle Laboratory for Cancer Research at the University of Wisconsin at Madison from 1971 to 1972, and one with the Department of Biochemistry and Pharmacology at Tufts University School of Medicine in Boston from 1972 to 1974.

After completing his postdoctoral work, he joined the University of Houston in 1974 as an assistant professor and, in 1977, moved on to the University of Texas at Austin. After a series of promotions, he was named Johann Friedrich Miescher Regent's professor of molecular biology in 1987, a position he held until 1990. Jeffery then joined the University of California at Davis, where he served as professor in the Department of Zoology until 1993, when he became a professor of molecular and cellular biology in the Division of Biological Sciences and the Bodega Marine Laboratory. He also was a visiting professor in the Department of Cell Biology at Vanderbilt University School of Medicine from 1995 to 1996.

He is a Fellow of the American Association for the Advancement of Science, a member of Sigma Xi, and a member of the American Society for Cell Biology. He was president of the Society for Developmental Biology from 1995 to 1996 and a member of its board of trustees from 1986 to 1990 and from 1994 to 1997.

Jeffery has received numerous honors including the American Society of Zoologists Outstanding Service Award in 1990. He is a member of the editorial boards of nine scientific journals and is the author or coauthor of more than 115 published scientific research papers.

LECTURES

Science talk uncovers our past through bones

"On Becoming Human" is the topic of the spring semester 1997 Penn State Lectures on the Frontiers of Science. Designed for the enjoyment and education of central Pennsylvania residents, the lectures take place on six consecutive Saturday mornings from 11 a.m. to noon on the University Park campus.

The fifth lecture in the series, "Behavior from Bones: The Diet, Locomotion and Sex Lives of Our Ancestors," will be given on Feb. 22 by **Alan Walker**, distinguished professor of anthropology and biology, in 101 Thomas Building. Walker is one of the world's foremost experts on the evolution of primates and humans. He will discuss the methods by which we can determine some of the behaviors and life-history strategies of early humans and their extinct relatives and will show how old some of our own behaviors are.

ALAN WALKER

The remaining event in the spring 1997 Penn State Lectures on the Frontiers of Science is on March 1: "The Evolution of the Mind: Speculations from Contemporary Biology Based on the Musings of a Young British Victorian Naturalist," by **Jeffrey A. Kurland**, associate professor of anthropology and human development at Penn State, in 111 Warkik Laboratory.

Parking is available at the HUB Deck parking garage on Shortridge Road. For more information, contact the Eberly College of Science at (814) 863-8453 or (814) 863-4682, or by e-mail at science@psu.edu.

Australian multiculturalism to be topic of Feb. 24 talk

James Jupp, director of the Centre for Immigration and Multicultural Studies in the Research School of Social Sciences at the Australian National University in Canberra, Australia, will present a seminar titled "The Debate Over Australian Immigration and Multiculturalism: From 'White Australia' to the Challenge of Diversity" at 11:45 a.m. Monday, Feb. 24, in 406 Oswald Tower on the University Park campus. Educated at the London School of Economics and the University of London, Jupp has held a number of government and academic positions having to do with Australian immigration. He was general editor of the *Bicentennial Encyclopedia of the Australian People*, a member of the Adv-

sory Council on Multicultural Affairs, chairman of the government-related "Review of Migrant and Multicultural Programs and Services," and a member of the planning and steering committee for the Global Cultural Diversity conference held in Sydney in 1995. Jupp has published widely on immigration and multicultural affairs. His most recent book is the 1996 volume *Understanding Australian Multiculturalism*.

The lecture, which is open to the public, is being co-sponsored by the Australia-New Zealand Studies Center and the Population Research Institute. For more information, contact **Pat Corbett** at e-mail pac@psu.edu; or by phone at (814) 863-1603.

Learn about sports in black America

Discover the sporting world that black America created on its own before integration when **Robert Ruck**, adjunct professor of history at the University of Pittsburgh, presents "Kings on the Hill: Baseball's Forgotten Men," a lecture at 1 p.m. Wednesday, Feb. 26, in Penn State Berks campus' Room 101.

In a presentation that includes segments of "Kings on the Hill," an Emmy-winning documentary about the Negro Leagues, Ruck will focus on Pittsburgh, the center of black baseball in the 1930s and 1940s. He will analyze what was lost when Jackie Robinson integrated the major leagues in 1947 and the Negro League disappeared.

Engineer and educator to speak on "biosoma"

George Bugliarello, a distinguished engineer and educator, will present a public lecture titled "Biology, Society and Machines: The Biosoma Issues," at 7 p.m. Tuesday, Feb. 25, in Room 26 of the Mineral Sciences Building on the University Park campus as part of the STS Distinguished Speaker Series.

"Biosoma" is Bugliarello's word for the interaction among biology, society and machines, an interaction which he feels will shape our future. He will discuss these complex interactions and how they will influence the pure evolution of society.

Bugliarello is chancellor of Polytechnic University and previously served as president of that university from 1973-1994. He has a broad background ranging from fluid mechanics to computer languages, biomedical engineering and science policy. Bugliarello holds a doctor of science degree in engineering from the Massachusetts Institute of Technology, and was awarded honorary degrees from Carnegie Mellon University, the University of Trieste, the Milwaukee School of Engineering, the Illinois Institute of Technology and Pace University.

Bugliarello is the first speaker in a new series of distinguished lectures sponsored by Penn State's Science, Technology and Society (STS) Program. For more information about this speaker or the seminar series, contact **Hector Flores**, director of the STS Program, at (814) 865-3043.

Baseball Hall of Famer coming to University Park

Hall of Famer **Jim Palmer** is coming to University Park on Thursday, Feb. 27, to speak in Schwab Auditorium at 8 p.m. The free presentation, which will focus on motivation, is part of the Distinguished Speaker Series.

Palmer's strong beliefs in motivation and persistence have propelled him through his life. In 1990, he was awarded baseball's highest honor by being elected into the Baseball Hall of Fame in his first year of eligibility. He received 92.6 percent of the vote and is the only American League Hall of Fame pitcher to win the Cy Young Award three times, as well as four Gold Glove Awards.

At 18, Palmer signed a \$50,000-bonus contract with the Baltimore Orioles, which brought him to immediate superstar status. He stayed with the Orioles for his entire 21-year career.

Since his retirement in 1984, Palmer has kept busy as a commentator on radio and TV. There will be an autograph session after the presentation.

Harrisburg presentation about impact of welfare reform

The federal government recently made changes in the nation's 60-year-old welfare system that gave individual states freedom to experiment with their own welfare programs.

A March 11 Penn State Harrisburg Eastgate Center presentation by associate professor of finance **Jacob DeRooy** will focus on the impact of welfare reform on employment and earnings of welfare recipients. DeRooy's noon to 1 p.m. presentation is the latest installment in the yearlong Current Issues in Business lecture series coordinated by the Penn State Harrisburg School of Business Administration. The lecture is free to the public. For registration or information, call (717) 772-3590.

Among the questions DeRooy will address in his lecture are: what economic hardship, if any, is likely to result from reform; will welfare reform increase the supply of workers in the job market; how effective are employer subsidies for creating jobs for welfare recipients; and what have we learned from innovative programs in Wisconsin, North Carolina and Washington.

LGB workshop focus is on lesbians, gays in classroom

"Gay, Lesbian and Bisexual Issues in the Classroom," a workshop set for March 24, will focus on both pedagogical and curricular issues related to gays and lesbians in the classroom and will cover the connections between sexual orientation and other diversity issues (including race, gender, social class and ability/disability).

Facilitated by **Elizabeth J. Tisdell** of Antioch University in Seattle, the workshop will begin at 1 p.m. in the HUB Gallery Lounge on the University Park campus and will last until 4 p.m. In the first half of the workshop, several different models of curriculum integration will be presented and discussed. The second half of the session will focus on issues of the group process and how to deal with potentially controversial issues in the learning environment. This participatory workshop is designed for faculty, graduate students and others interested in these issues. Participants are encouraged to bring syllabi and classroom incidents based on their own experiences in teaching about these issues.

To register for this workshop, sponsored by the Commission on Gay, Lesbian and Bisexual Equity, the colleges of Education and Health and Human Development, the Affirmative Action Office, the Division of Undergraduate Education and Residence Life, contact **Julie Acker** at ja10@psu.edu.

More Lectures

Cognitive psychologist's lecture centers on memory formation

Elizabeth F. Loftus, a cognitive psychologist who has specialized in the reliability of eyewitness testimony and repressed memories and has provided expert testimony in many high-profile legal cases, will deliver the inaugural Herschel W. and Eileen Wirtshafter Leibowitz Lecture in Behavioral Sciences in the College of the Liberal Arts.

The lecture, to be held at 8 p.m. Thursday, March 20, in 112 Kern Building on the University Park campus, will center on new studies that show the power of imagination to make people believe they have had experiences they didn't have. Loftus is professor of psychology and adjunct professor of law at the University of Washington, Seattle. She received her Ph.D. in psychology from Stanford University. Since then, she has published 18 books and more than 300 scientific articles. Her fourth book, *Eyewitness Testimony*, won a National Media Award (Distinguished Contribution) from the American Psychological Foundation. Her most recent book, *The Myth of Repressed Memory*, co-authored with Katherine Ketcham, was published by St. Martin's Press and has already been translated into a number of foreign languages.

Loftus has been an expert witness or consultant in hundreds of cases, including the McMartin Preschool molestation case, the trial of Oliver North, the trial of the officers accused in the Rodney King beating, the Menendez brothers and the Oklahoma bombing litigation. Her research over the last 20 years has focused on human memory, eyewitness testimony and courtroom procedure. She has won numerous accolades, and in 1995 was selected by the American Academy of Forensic Psychology to be the recipient of their Distinguished Contributions to Forensic Psychology Award.

The Leibowitz lectureship, named in honor of Herschel W. Leibowitz, Evan Pugh professor emeritus and member of the faculty in the Department of Psychology, and his wife, Eileen, who established an endowment for the lectureship in the College of the Liberal Arts, will present speakers on interdisciplinary topics in the behavioral sciences in recognition of Professor Leibowitz's distinguished contributions in psychology and Mrs. Leibowitz's long-standing commitment to development at Penn State. The lecture is open to the public.

ELIZABETH F. LOFTUS

Paul Robeson Jr. to speak at center's 25th anniversary gala

The opening event in the 25th anniversary celebration of Penn State's Paul Robeson Cultural Center this spring will be a public lecture by Paul Robeson Jr., at 4:30 p.m. Sunday, Feb. 23, at the center. A reception will follow.

Son of one of the most remarkable men in American history, Robeson will talk about his father's life and legacy using slides, film and tapes. He worked closely with his father for 16 years as his representative and adviser. Since his father was frequently refused access to recording studios and concert halls during the 1950s, the younger Robeson produced, recorded and edited many of his recordings, some of which have been released on major record labels.

PAUL ROBESON JR.

Paul Robeson (1898-1976) was a legendary star of concert halls and screen, and known for such movies as "Emperor Jones," (1933), "Jerico," (1937) and "Proud Valley," (1940). He also was a scholar, college athlete and is perhaps best known as a civil rights activist in the 1950s and 1960s.

The younger Robeson is the founder and president of the Paul Robeson Archives and lectures widely in the United States and abroad on American and Russian history and sociology as well as on the life and achievements of his father.

He is author of *Paul Robeson Jr. Speaks to America*, which focuses on recent controversies about multiculturalism, and *The Secret War Against Paul Robeson*.

Learn how to protect drinking water

Few topics are as important to our communities as protection of drinking water source areas. "Tools for Drinking Water Protection" is a national teleconference scheduled for 2-30 to 4 p.m. Wednesday, March 19, in Studio D, Mitchell Building on the University Park campus. This live satellite broadcast with the country's top water protection experts also will be available on the Penn State cable channel 9 at University Park, which will allow student groups and classes to view the program.

The program will consist of rural, urban and suburban cases. Topics to be addressed include land use decisions, water quality monitoring and planning for emergencies. The overall goal of the broadcast is to convey strategies to communities for establishing drinking water protection programs.

The experts, who will be available live during the teleconference to answer questions from local groups, are: Douglas Hall, director of Dayton, Ohio, Environmental Management, which spearheaded

development of the Well Field Protection Program; Ken Lustig, director of environmental health for Coeur D'Alene, Idaho, where he coordinates the Rathdrum Aquifer project; and John Witten, project manager with the Environmental Protection Agency, who developed strategies for guiding land development to protect wetlands, estuaries and coastal waters. Local experts Caren Clouty, professor of forestry, and Neil Korostoff, associate professor of landscape architecture and a member of the American Society of Landscape Architects, will be available in Studio D to discuss issues with the local audience when the satellite portion is complete.

There is no charge for attendance in Studio D, but seating is limited. Room 106 in Rouse Building is also reserved. To reserve a seat, please call the League of Women Voters at (814) 867-0106 or Carol Hodes at (814) 865-7679. "Tools for Drinking Water Protection" is being underwritten by the EPA.

Choreo-poem reading set for March 19

The author of the acclaimed choreo-poem, "for colored girls, who have considered suicide/when the rainbow is enuf," Ntozake Shange, will present a dramatic reading at the Penn State Harrisburg campus of the Capital College on March 19. Shange, one of America's most lyrical black voices as a playwright, novelist, poet and performer, will appear at 7 p.m. in the college's Student Center in the Capital Union Building.

Widely acclaimed as a representative for blacks, women and all struggling to find their own voice, Shange has earned countless awards for her works, which include three novels, several books of poetry and many plays. She burst onto the New York literary scene in 1976 with her innovative and widely acclaimed "for colored girls ...," which became a best-selling book and later won critical acclaim in a television version for PBS. She received an Obie Award off-Broadway for "for colored girls ...," which also received a Tony nomination after enjoying a lengthy stint on Broadway. With *Liliane*, her newest and most provocative novel, she continues

to explore the female intellect and sensuality by weaving together love, self-discovery, sex and race.

Shange, 46, garnered much from her childhood experiences in segregated St. Louis to create *Liliane*, who fights to maintain control of her life in spite of the "constant and random interruptions of white people as an abstract idea or in person."

An educator as well as an author, she has taught courses in the literature of people of color, feminist, aesthetics and writing and performance art at Rice University, Villanova University and the Maryland Institute of Art. As the Taos Heavyweight Poetry Champion of the World for three consecutive years, she continues to produce theatre pieces and do poetry readings and guest lectures. She is currently working on a project for HBO about the history of jazz.

The March 19 performance is open to the public and is sponsored by the Penn State Harrisburg Student Activities Office and its Women's Studies and Women's programs. For information, call (717) 948-6273.

The Arts

AT PENN STATE

Special exhibit

The HUB's Art alley exhibits an "International Festival" through April 6.

An annual event sponsored by the Office of International Programs, the exhibit features the art from many countries and cultures. Penn State international students share their native art with the community and the exhibit accompanies the International Festival, which runs through Feb. 27 on the University Park campus.

A Raisin In The Sun

The Penn State University Resident Theatre Company will present Lorraine Hansberry's highly acclaimed drama, *A Raisin In The Sun*, on the University Park campus. The play will open in the Playhouse Theatre on Friday, Feb. 21, and will run through Saturday, March 1, with student previews on Wednesday, Feb. 19, and Thursday, Feb. 20.

The play features Frances Foster as Mama Foster, a member of the original Broadway production, received the 1985 Obie Award for Sustained Excellence of Performance.

A Raisin In The Sun is directed by Charles Dumas, associate professor of theatre arts.

For tickets, call the Arts Ticket Center at (814) 863-0255. For the evening performances, tickets are \$10, non-students; \$8 students. For matinees: \$9 non-students; \$7 students. Tickets for the student previews, with ID, are \$6.

"Schoolhouse Rock"

The Penn State Thespians will present "Schoolhouse Rock, Live!" in Kern Graduate Commons Auditorium at 8 p.m. Thursday, Feb. 20, and Friday, Feb. 21, and again Saturday, Feb. 22, at 2 and 8 p.m. on the University Park campus. All tickets are \$4.75 and may be purchased through the thespian box office across from the HUB desk or at the door.

"Schoolhouse Rock Live!" is the stage adaptation of the Saturday morning TV show that aired between 1973 and 1985. For more information or to reserve tickets, call (814) 865-9461.

Orchestra of China

On Saturday, Feb. 22, at 8 p.m., the Center for the Performing Arts will present the 95-member National Traditional Orchestra of China at Eisenhower Auditorium on the University Park campus.

In its first American tour, the orchestra brings together Beijing's foremost exponents of traditional music.

Tickets are available through the Arts Ticket Center in Eisenhower Auditorium. Tickets also may be purchased by phoning, (814) 863-0255.

Student organ recital

Ten students from the organ studio of June Miller, associate professor of music, will perform in a free 2 p.m. recital on Sunday, Feb. 23, in the College of Art and Architecture's School of Music Recital Hall on the University Park campus.

Voice and piano recital

Michael C. Rider, tenor, and Matthew Doebler, pianist, will present a free recital at 2 p.m. Sunday, Feb. 23, in room 122 of Music Building II on the University Park campus. Rider is a student of Susan Boardman, associate professor of music, and Doebler is a student of Marylene Dosse, professor of music.

"CATS" at Penn College

"CATS," one of the most successful musicals in all of Broadway history, will see its road company return to the Community Arts Center stage in Williamsport for three performances this month. Evening performances are set for Tuesday, Feb. 25, and Wednesday, Feb. 26, at 7:30 p.m., and a special Wednesday matinee at 2 p.m. The center is part of the Pennsylvania College of Technology.

Tickets are priced between \$27.50 and \$45.50. For more information, please call (717) 326-2424.

Bach's Lunch

The Hi-Lo's from the Penn State Glee Club, directed by Bruce Trinkley, associate professor of music, will perform at the free Bach's Lunch concert at 12:10 p.m. Thursday, Feb. 27, in the Helen Eakin Eisenhower Chapel on the University Park campus. The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

Audience members may take a bag lunch to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Philharmonic potpourri

The Penn State Philharmonic, under the direction of Pu-Qi Jiang, will feature the winners of the student competition at 8 p.m. Friday, Feb. 28, in Eisenhower Auditorium on the University Park campus.

The winners include Louis Hodgson, flute; Matthew Shaw, baritone;

Lunchtime entertainment

Urban Fusion, featuring Andrew Jackson on drums, Brian Watson on saxophone, Tommy Wareham on piano and guitar, and Tom Jordan on bass, played for the lunchtime crowd at the Kern Graduate Center on the University Park campus. The performance, "A Tribute to Black Music," was part of the celebration of Black History Month.

Photo: Greg Gienio

Seong-Ae Lim, piano; and Fouad Fakhouri, composition. During the performance, Fakhouri's winning composition "Beneath the Rubble" will be given its world premiere. Gregory Woodbridge, a master's student of Jiang, will be a guest conductor.

Tickets for the performance are \$4 for non-students, \$2 for students, and are available at the Arts Ticket Center.

Undergraduate exhibition

The School of Visual Arts Undergraduate Juried Exhibition opens today in the Zoller Gallery in the Visual Arts Building on the University Park campus.

Gerald Haggerty, an art critic and educator working and residing in New York City, is the juror for this year's exhibition. The Undergraduate Juried Exhibition is an annual event, showcasing the best of undergraduate work in visual arts.

The free exhibition continues through March 23.

"Appalachian Year"

"Appalachian Year," a collection of paintings by an award-winning artist who is a native of South America, will be on exhibit in the Gallery Lounge at the Penn State Harrisburg campus of the Capital College through March 24.

L. Beatriz Arnillas, who earned a master's of fine arts degree from the University of Kentucky, incorporates art work from three consecutive periods of her life for this show. Arnillas was born and raised in Peru, where her family resided until 1986 when they emigrated to the United States. Her work represents her feelings and experiences from life in both Peru and the United States.

Odyssey on WPSU

Susan Harris of the Department of English discusses her newest book, *The Courtship of Olivia Langdon and*

Mark Twain, on the next episode of *Odyssey through Literature*. Harris has a unique way of using people's diaries, letters and the books they read to interpret the world they lived in. She and series host S. Leonard Rubinstein devote a portion of their discussion to comparing Olivia Langdon's and Mark Twain's very different views on Shakespeare's "The Merchant of Venice."

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WPSU, 91.5 FM, from University Park, 106.7 FM in Altoona and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://www.library.psu.edu/compil/odyssey/odyssey.htm>.

Exhibit focus is diversity

"What is Diversity?," a three-part exhibit on display in the East Corridor Gallery of Pattee Library until the end of spring semester, includes profiles of University Libraries employees and features items in four of the Libraries' collections. Also showcased are the services provided by the Libraries to connect patrons with the information they seek.

The exhibit was designed by cataloging assistant Jeff Edmunds in collaboration with the Libraries' Diversity Committee and with assistance from faculty and staff in Microforms, the Education Library, Historical Collections and Labor Archives, the Rare Books Room, Libraries Services for People with Disabilities, Interlibrary Loan, the Arts Library, Maps, Facilities Planning and Maintenance, Preservation, and Public Information and Relations. In addition, a World Wide Web version of the exhibit designed by Wilson Hutton is available at <http://www.libraries.psu.edu/pubinfo/dlto/exhibit.html>.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, February 21
Kern Graduate Commons, noon, Kern Lobby.
Concert "Susan & Andy."

■ International Coffee House, 7 p.m., HUB Ballroom. "The Penn State International Dancers."

University Resident Theatre Company, 8 p.m., The Playhouse. "A Raisin in the Sun," by Lorraine Hansberry, directed by Charles Dumas, through March 1. For tickets, phone (814) 863-0255.

Saturday, February 22
■ Penn State Filipino Association, 5 p.m., 102 Kern. "Barrio Fiesta." For tickets, phone (814) 867-7166 or (814) 234-6267. School of Music, 5 p.m., Recital Hall. Student Recital presents Andrea Henry Horn.

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "National Traditional Orchestra of China." For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Student Recital presents Jeannie Ohnemus, cello.

Sunday, February 23
Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents "Painting by The Eight" at the Palmer Museum," by Robin Seymour.

School of Music, 2 p.m., Recital Hall. Student Recital presents an organ studio recital. School of Music, 2 p.m., 122 Music II. Student Recital presents Michael Rider, voice.

Monday, February 24
School of Music, 8 p.m., Recital Hall. Faculty Recital presents Lisa Brongher, horn.

Tuesday, February 25
School of Music, 8 p.m., Eisenhower Auditorium. "German Family Names in America," with Dennis Glocke and O. Richard Bundy, conductors.

Wednesday, February 26
School of Music, 8 p.m., Recital Hall. Symphonic Wind Ensemble with Dennis Glocke, conductor.

Center for Women Students, 8 p.m., 112 Kern. Performance artist Nancy Hulse presents "That Ain't No Way to Treat a Lady."

Thursday, February 27
■ B'nai B'rith Hill Foundation, 7:30 p.m., Palmer Lipson Auditorium. Film titled "Eastern Wind-Hamsin."

■ Brazilian film titled "Quilombo," 7:30 p.m., Paul Robeson Cultural Center.

Friday, February 28
Kern Graduate Commons, noon, Kern Lobby. Concert titled "Appalachian Spring." School of Music, 8 p.m., Eisenhower Auditorium. Philharmonic Student Concertos with Pu-Qi Jiang, conductor.

Saturday, March 1
Center for the Performing Arts, 8 p.m., Schwab Auditorium. "Los Angeles Piano Quartet." For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Student Recital presents Amanda Silker, voice.

Sunday, March 2
School of Music, 2 p.m., Recital Hall. "The Armstrong Flute & Percussion Duo" with Eleanor Armstrong, flute, and Dan Armstrong, percussion.

■ Palmer Museum of Art, 2 p.m. Gallery Talk presents Katherine Bentz on "Italian Baroque Painting at the Palmer Museum." School of Music, 8 p.m., Recital Hall. Student Recital presents Kyle Glaser and Sue

At the Palmer

"Capturing the Light: A Selection of 20th-Century American Watercolors" by Winslow Homer, is on display at the Palmer Museum of Art on the University Park campus through May 18.

Keamey on the saxophone.

SEMINARS

Friday, February 21
Economics, 3:30 p.m., 420 Kern. Kyle Bagwell on "Reciprocity, Non-discrimination and Preferential Agreements in the Multilateral Trading System."

Philosophy, 4 p.m., 124 Sparks. Vincent Colapietro on "Reconfiguring Need and Desire: Dewey in Light of Lacan."

■ Geography, 4 p.m., 26 Hosier. Anthony Cohen on "The Underground Railroad Walk to Canada."

Saturday, February 22
Science, 11 a.m., 101 Thomas Building. Alan Walker on "Behavior from Bones: The Diet, Locomotion and Sex Lives of Our Ancestors."

Sunday, February 23
Paul Robeson Cultural Center 25th anniversary celebration, 4:30 p.m., Cultural Center. Paul Robeson Jr. to speak.

Monday, February 24
■ Australia-New Zealand Studies Center and The Population Research Institute, 11:45 a.m., 406 Oswald Tower. James Jupp on "The Debate over Australian Immigration and Multiculturalism: From 'White Australia' to the Challenge of Diversity."

■ Continuing and Distance Education and the College of Education's Adult Education Program, 11:45 a.m. to 1 p.m., 502 Keller. David Lewis on "Continuing Professional Education in Great Britain."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Jim Hill on "Engineering Opportunities in Precision Agriculture."

Gravity Center, 2 p.m., 339 Davey Laboratory. L.S. Frinn on "Gravitational Radiation, Binary Inspiral and Cosmology."

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. Dan Lenosi on "cc-NUMA and Origin 2000 Architecture."

■ History, 4 p.m., 102 Weaver. Michelle Mart on "Constructing a Universal Ideal: Antisemitism, American Jews and the Founding of Israel."

Computer and Engineering, 4 p.m., Paul

Plasman on a subject to be announced.

Tuesday, February 25
Food Science, 10:30 a.m., 120 Barbara Building. Syed Rizvi on a subject to be announced.

Physics, 3:30 p.m., 339 Davey Laboratory. Mirjam Cvetc on a subject to be announced.

Nutrition, 4 p.m., S-209 Henderson. Paula Folt-Waslesky on "Current and Future Concepts in Parenteral Nutrition and Automated Technology."

Geoscience, 4 p.m., 112 Walker. Simon Brasell on "Molecular Records of Climatic Variability."

■ German, 4:30 p.m., 109 Boucke. Juergen Eichhorn on "The Trials and Tribulations of German Family Names in America."

Science, Technology and Society Program, 7 p.m., Room 26, Mineral Sciences. George Bugliarello on "Biology, Society and Machines: The Biosoma Issues."

Wednesday, February 26
Gerontology Center, 12:15 to 1:15 p.m., The Living Center, 110 Henderson. Janet Friedmann on "Does Anyone Have the 'Right to Die'?" Withholding or Withdrawing Nutrition Support."

Engineering Science and Mechanics, 3:35 p.m., 212 Hammond. Joseph L. Rose on "Ultrasonic Guided Waves NDE."

"Creating High-Performance Teams," 4 p.m., Presidential Room 3, The Penn State Scanlon.

■ Center for Russian and East European Studies, 7:30 p.m., 307 HUB Victor Isarelyan. Sergio Mikoyan and Vagan Gevorkyan on "Russian Views about NATO Expansion."

Thursday, February 27
Gravity Center, 11:30 a.m., 339 Davey Laboratory. Roumen Borisov on "Hamiltonian Constraints."

Physics, 3:30 p.m., 101 Osmond Laboratory. Daniela Borioletto on "Is the Top Quark Special?"

Computer Science and Engineering, 4 p.m.,

302 Pond Laboratory. William Farmer on "The Little Theories Method for Specifying Complex Systems."

Landscape Architecture, 8 p.m., 101 Jobb Thomas Building. Julie Mor Messervy on "The Inward Garden."

Distinguished Speaker Series, 8 p.m., Schwab Auditorium. Jim Palmer gives a talk on motivation and persistence.

Friday, February 28
Palmer Museum of Art, 2 p.m., Palmer Lipson Auditorium. Glenn Williamson, curator, on "Allan Sekula and the Documentary Tradition."

Economics, 3:30 p.m., 420 Kern. Linda Goldberg on "Employment vs. Wage Adjustment and Exchange Rates: A Cross Country Comparison."

Saturday, March 1
Office for Minority Faculty Development, 9 a.m. to noon, 110 Agricultural Sciences and Industries. Robert Kiloren on "Seeking Grant Funds Electronically: Register by Feb. 26, phone (814) 863-1663."

CONFERENCES
Friday, February 21
ACHE Annual Meeting Planning Committee, The Penn State Scanlon, through Feb. 22.

Monday, February 24
PGA Golf Pro Seminar, The Penn State Scanlon.

Wednesday, February 26
Continuing and Distance Education Systemwide Conference, The Penn State Scanlon, through Feb. 28.

Thursday, February 27
PA Junior Science and Humanities Symposium, The Penn State Scanlon, through Feb. 28.

EXHIBITS
HUB Art Alley Cases
■ Office of International Students presents "International Festival," through April 6.

HUB Art Alley Panels
Unity Days and graphic design "Imagine a World," through Feb. 23.

HUB Browning Gallery
■ Photography exhibit titled "Our Land" by Jay Sieminski, through Feb. 23.

HUB Formal Gallery
"Memories of Childhood," through Feb. 22.

HUB Sculpture Corner
"American Gothic Revisited" by Jane Richey, through May 21.

Palmer Museum of Art
"Disimal Science: Photo Works by Alan Sekula, 1972-1996," through March 16.

"Capturing the Light: A Selection of 20th-Century American Watercolors" by Winslow Homer, through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 15.

Zoller Gallery
School of Visual Arts, "Undergraduate Juried Exhibition," through March 28.

■ Reflects an international perspective.

For a full listing of University Park activities, including sports events, go to the Web at URL <http://cac.psu.edu/calendar/>

Behrend team improves admissions processes

The assistant director of admissions and financial aid at Penn State-Behrend, Jane Braedy, is leading a CQI team to review and improve admissions publications. Team members include Bob Light (facilitator), Paul Benim, Kris Motta, Anne Marie Welsh, Mari Trenkle, Paul Newlin, Ed Mulfinger and Katie McClelland. Mary-Ellen Madigan is the team sponsor. The team's major accomplishments include:

- A review of all the recruitment material distributed by Behrend's Admissions Office;
- Flow charting the sequence of publications sent to prospective students;
- Collecting numerous search pieces and view books from other colleges and universities and conducting four student focus groups to evaluate the materials;
- Based on the "best practices" identified in the material, fine-tuning Behrend's admissions literature.

Initiatives in the Face of Resistance

On March 4, Tom Poole, acting deputy vice provost for educational equity, and Larry Young, director of the Paul Robeson Cultural Center on the University Park campus, will offer a new program on "Introducing New Initiatives in the Face of Resistance." This workshop will examine the relationship between CQI and diversity and ways to make them work in the work place. Those committed to improvement must be able to see the relationship between these initiatives, convey those connections to others and build bridges among component groups. The program will be held in 319 Rider Building from 8:15 - 11:15 a.m. If you would like to attend, please call the HRDC at (814) 865-8216 and ask to register for CQI 053.

Quality Expo

Need information about the Quality Expo? Visit the Web site at <http://www.psu.edu/president/cqi>.

For additional information about continuous quality improvement, please contact Louise Sandmeyer, executive director of the Center for Quality and Planning, (814) 865-8721 or e-mail LES1@PSU.EDU.

Top-rate job

Jim Stania cleans one of the cars at Fleet Operations on the University Park campus. Keeping the 400 cars, trucks, vans and buses clean is especially difficult during the winter months because of bad weather and road salt.

Photo: Greg Grieco

News in Brief

Health Promotion

The following Health Promotion Programs are being offered in the coming weeks. To register for any of them, contact Jan Hawbaker at 865-3085 or JQH3@psu.edu.

■ **Enlightening Lunch — Cancers Men Should Know About**
Meets Friday, Feb. 28, from noon to 1 p.m., 110 Henderson Building (The Living Center). Cost: None

■ **Wellness and Employee Assistance Program (EAP): Special Informal Discussions**

The EAP and the faculty/staff health promotion division of the Office of Human Resources are offering two programs to help faculty and staff deal with difficult situations in their lives. Cost: None.

— **Juggling the Two-Career Family**
Meets Feb. 28 from 9-10 a.m., 125 Reber Building

— **Be Your Own Best Friend — The Power of Self-Esteem**
Meets Feb. 28 from 10:30-11:30 a.m., 125 Reber Building

Know Your Numbers Cardiovascular Risk Appraisal

The next open session of the Know Your Numbers Program is Wednesday, March 5, in the HUB Gallery Lounge. Program includes screenings for blood pressure, body mass index and total and HDL cholesterol, as well as an explanation of results. This program is open to all faculty and staff. Cost is \$15, reimbursable to HMO participants.

Depressed people sought

Most people feel depressed at some time or another in their life, but some experience major depression. A study being conducted at Penn State is designed to help people with this problem.

If you believe that you are experiencing major depression and would like to be considered for this study, please call (814) 863-4833.

Louis Castonguay, assistant professor of psychology, is the principal investigator in this study.

Faculty/Staff Alerts

Reminders from Mailing Services

■ Late mail

Mailing managers at universities across the country have reported experiencing mail delivery delays from the United States Postal Service. Locally for example, it has been documented that some mail has required a week between its postmark in Lewistown and its arrival at University Park. Please keep this in mind when using the USPS. All incoming U.S. mail is delivered on campus the same day it is received from the post office. Also, all outgoing first class mail picked up by the campus mail system goes to the post office on the same day.

■ UPS ad in the telephone books

Federal Express is the contractual carrier for express package and letter delivery service for Penn State, and Penn State departments receive a substantial discount by using this contractual carrier. You may use UPS international and next-day service for your personal packages, but payment must be made by you for personal packages.

■ First-class mail

To ensure that your first class mail gets to the U.S. Postal Service on the same day, please have it into Mailing Services by 4 p.m.

■ Change in custom forms

The United States Postal Service has implemented new changes for Canada, Mexico and international packages weighing more than one pound at the first-class rate. A barcoded form must be filled out by the department and attached to each package going to non-domestic locations. The old forms are no longer valid. New forms are available at Mailing Services. Please call (814) 865-7544. All packages that do not have the proper form will be returned to the sender.

Staff Focus Committee has a site on the Web

The Staff Focus Committee, an advisory group to Penn State that is staffed by Billie Willis, assistant vice president for Human Resources, now has a Web site on the Office of Human Resources home page.

To access the site, go to URL <http://www.ohr.psu.edu> and click on "Documents." The Staff Focus Committee will appear under the "Informational" section. The Web site provides immediate access to the list of committee members. It is hoped that staff will contact this group with issues and concerns that impact on the University's programs.

State College attorney is honorary alumnus

Delbert J. McQuaide — a prominent State College attorney, Penn State's general counsel since 1970, and valued confidante and adviser to Penn State presidents, trustees and administrators — has received the Honorary Alumnus Award from the Penn State Alumni Association.

The award, established in 1973, is the highest award given by the Alumni Association to a non-alumnus. It honors those who have made significant contributions to Penn State's welfare, reputation and prestige and who greatly enhance the University through their commitment and service.

Peter Weiler, associate vice president for development and alumni relations, said that McQuaide has "devoted virtually his entire professional career to the well-being of Penn State. He has guided and counseled Penn State on hundreds of legal matters, large and small, and he has witnessed and helped bring about substantial growth and change at Penn State. In short, for more than 25 years, he has participated in every major decision made at the University."

Over the years, Penn State has turned to

McQuaide for counsel on a wide range of issues. He has been involved in decisions involving the development of The Bryce Jordan Center, several expansions of Beaver Stadium, and the expansion of the Palmer Museum of Art, to name just a few; the governance of the university; changes in policies affecting students; contracts; personnel issues; and many more.

McQuaide is the author of the governance documents by which the University operates — documents recognized as models nationwide. University administrators say McQuaide's style is understated. He has always played a quiet, behind-the-scenes

DELBERT J. MCQUAIDE

role, and he has never sought the spotlight. McQuaide is known for his keen legal mind, his careful analysis of the issues, and his sound, dispassionate judgment.

His guidance is viewed as crucial to the success and progress of Penn State, and his dedication to the University is of the kind usually demonstrated only by the most loyal and enthusiastic alumni, according to University leaders.

McQuaide earned his undergraduate degree from Juniata College and his law degree from New York University, where he was a Root-Tilden Scholar. He was admitted to the New York bar in 1961 and the Pennsylvania bar in 1964. He serves on the boards of Quaker State Corp. and Mid-State Bank. He is past president of the Centre County Bar Association and chair of the board of trustees of Juniata College.

Other recipients of the honorary alumni awards include former Penn State presidents **Joab L. Thomas** (1955) and **H. Bryce Jordan** (1987), **Barbara R. and James R. Palmer** (1987), and head football coach **Joe Paterno** (1973).

Penn College, Mack Trucks offer diesel technology degree

Mack Trucks Inc. and the Pennsylvania College of Technology have formed an alliance to offer an associate degree in diesel technology, with an emphasis on Mack components. The degree program is the only one of its kind in the nation involving an integrated heavy-duty truck manufacturer and an accredited college. It is slated to begin this fall.

"Given the severe shortage of qualified technicians, Mack believes businesses associated with the trucking industry have to step up and assist local schools in the development of service personnel," said **Russ Raine**, Mack's vice president of customer product support. "If the trend isn't reversed, owner-operated vehicles and fleet trucks alike may face significant downtime due to repair and maintenance delays. Today, there is an estimated one technician for every 30 trucks on the road; a tolerable ratio is one technician for every 20 trucks."

The association between Penn College and Mack is designed to provide students with "real world" experience to prepare them for careers as diesel technicians. Mack supplies Penn College with the latest engine, transmission and rear axle components, as well as the latest electronic technology with V-MAC, Mack's vehicle management and control system. They also train the Penn College instructors on Mack components and make available all

"Today, there is an estimated one technician for every 30 trucks on the road; a tolerable ratio is one technician for every 20 trucks."

Russ Raine, vice president customer product support
Mack Trucks Inc.

the training programs and materials used by Mack's service training schools. In addition, dealers can sponsor students. A student sponsorship includes forgiveness of loans of \$500 per semester for a total of \$2,000 for the two years, payment of test registration fees, an internship and employment upon graduation.

Graduates of the program will receive certification in five areas of Mack specialization. Mack is one of North America's largest producers of heavy-duty trucks, in addition to major product components. The company also markets a line of medium-duty diesel trucks throughout North America. Mack vehicles are sold and serviced in more than 65 countries worldwide. For more information about Mack, visit its Web site at <http://www.macktrucks.com>.

Grant to upgrade Warminster center

The Pennsylvania Department of Commerce recently granted the Applied Research Laboratory \$52,467 to upgrade the Navigational Research and Development Center (NRDC) in Warminster, Pa. The funds were made available through the Department of Commerce's

Infrastructure Development Program. The Federal Lands Reuse Authority (FLRA) of Bucks County applied for the grant on behalf of ARL. The funds will be used to provide the facility with necessary improvements to conduct navigational research operations. . . .

Prominent speaker

The Rev. Jesse Jackson, founder and president of the National Rainbow Coalition and one of America's foremost social and political figures, gives his autograph to Andrea Carr, a freshman from Erie, center, and Sheron Alexander, a member of the Community Advisory Council for Underrepresented Groups at Penn State State Erie, The Behrend College, before his Feb. 12 talk, "Keep Hope Alive." Jackson's visit was one of the activities at the campus in celebration of Black History Month.

Agenda full for Faculty Senate meeting

The University Faculty Senate will meet Feb. 25 at 1:30 p.m. in Room 112 Kern Graduate Building on the University Park campus.

- Items to be addressed include:
 - Curriculum Report of Feb. 17.
 - Modification of Senate Policy 58-50—Conditions for re-enrollment as a degree candidate (legislative)
 - Revision of Article II: Senate Committee Structure (legislative)
 - Procedures for terminating tenure-protected faculty (advisory/consultative)
 - Access to personnel files (advisory/consultative)
 - Status Report from the chair of the Commonwealth Educational

System Reorganization Steering Committee (oral informational)

—The effect of excessive alcohol consumption on student life case management by the Office of Judicial Affairs (informational)

Members of the University community are invited to attend this meeting. Any member of the University Community not a member of the Senate may request the privilege of the floor on any item of business already before the Senate. Such a request must be made to the chair, through the executive secretary of the Senate, at least four calendar days before the meeting at which the individual wishes to speak.

Commission for Women seeking new members

The Commission for Women, an advisory group to the president on matters affecting women of the University, is actively seeking nominations — including self-nominations — from all women, particularly those whose cultural, racial or ethnic backgrounds would enrich the understanding of the needs and concerns of women throughout the University. The commission values diversity in its membership and is looking for a broad base of nominations.

In addition to being an advisory body, the Commission for Women also promotes the efforts of women and serves as a forum for the exchange of ideas within Penn State. The entire women's community of

Penn State is represented by the Commission for Women and its membership includes faculty, staff exempt and non-exempt personnel, administrators, technical service workers and graduate and undergraduate students. Members of the commission come from throughout the Penn State system and are appointed to serve three-year terms.

Nomination forms may be obtained from the Commission for Women office, 311 Grange Building, University Park, or by calling (814) 865-1683. Nominations must be returned to the commission office no later than April 1. For more information, please call the commission at the above number.

Advisory body accepting nominations through Feb. 28

The Commission on Racial/Ethnic Diversity, an advisory body to the University president on matters relating to racial and ethnic diversity, is seeking nominations and applications for positions that will be open July 1.

Membership includes administrators, faculty, staff exempt, staff non-exempt, technical service employees and undergraduate and graduate students. Full members are appointed by the president to serve four-year terms or, in the case of students, until graduation. Associate members serve one-year renewable terms.

The commission, dedicated to enhancing diversity, actively seeks a broad base of nominations — including self-nominations — from all racial/ethnic backgrounds.

For more information and a nomination form, call the commission office at (814) 863-8493 or copy the nomination form from the diversity Web page at URL <http://www.psu.edu/staff/diversity/racial.html>. Nomination forms must be received in 330 Grange Building by Friday, Feb. 28.

Penn Staters

Micaela Amateau Amato, associate professor of art and women's studies and area head of painting and drawing, presented a paper at the International Conference of the Society for Crypto-Judaic Studies held in Albuquerque, N.M. Amato's paper was titled "Fertile Grounds of Conflict."

Dean Arnold, adjunct assistant professor of aquatic ecology, was recently named a Fellow of the American Institute of Fishery Research Biologists.

The Project on Death in America of the Open Society Institute has selected **Dr. Susan McGarrity**, assistant professor of anesthesia and director of palliative care at The Milton S. Eshersky Medical Center, as a Soros Faculty Scholar.

McGarrity and 22 other Soros Faculty Scholars will share approximately \$1.6 million to pursue projects dedicated to improving the care of dying people. The term palliative care refers to maximizing comfort, independence and quality of life for people whose disease cannot be cured and for whom prolonging life is no longer the goal. She is one of 10 new scholars named, who represent 10 major medical institutions in the United States and Canada.

Gerald M. Moser, retired faculty member in the

Department of Spanish, Italian and Portuguese and the Department of Comparative Literature, edited a special issue of the *Luso-Brazilian Review* on Luso-African literatures. The issue contains contributions by scholars from Germany, Mozambique, Angola, Portugal, Canada, Guinea-Bissau, Russia, France and the United States. The *Luso-Brazilian Review*, published twice a year by the University of Wisconsin Press, is the only publication of its type in this country that is exclusively concerned with the Portuguese language and the Portuguese literature of seven countries on three continents.

Robert E. Newnam, associate director of the Intercollegiate Materials Research Laboratory and Alcoa professor of the solid state, delivered an invited lecture on "Smart Ceramics" at the international meeting on the Science and Art of Ceramics held at the Royal Institution in London.

Jane Ridley, associate professor of theatre arts, played various roles in five new international and national plays at the Festival of New Works for a New World at the La Mama E.T.C. Theatre in New York City. As a member of the acting company of the Shenandoah International Playwrights Retreat (SIPR), Ridley worked with playwrights from Egypt,

Open house planned for Feb. 27

The Penn State Harrisburg campus of the Capital College is hosting a Feb. 27 Open House Information Night aimed at familiarizing area residents with its list of graduate programs.

The open house, which begins with a registration period from 5:30 to 6 p.m., will feature individual program presentations, explanations from faculty, and information on application and financial aid. Penn

State Harrisburg offers 17 master's degree programs in a variety of areas. Also offered is certification in secondary education mathematics, English and social studies, principal's certification, and doctorates in public administration and adult education.

For information or registration, contact Penn State Harrisburg Enrollment Services at (717) 948-6250 or (800) 222-2056.

Israel, Jordan and Vietnam. The SIPR provides a meeting ground for theatre artists of the world to explore the richness of theatrical diversity.

Della M. Roy, professor emerita of materials science, was recently appointed to the Committee on Non-Conventional Concrete Technologies for Renewal of the Infrastructure of the National Research Council Commission on Engineering and Technical Systems. This committee is part of the National Materials Advisory Board.

Weaver Santaniello, assistant professor of philosophy at the Penn State Berks campus, presented a paper on "Nietzsche and Religion" for the Friedrich Nietzsche Society of Great Britain. The annual conference was held at Manchester University in England.

Work developing materials for acid mine drainage abatement done by **Barry Sheetz** and **Michael Silsbee**, senior research associate and associate professor of materials, of the Intercollegiate Materials Research Laboratory was honored with a 1996 Governor's Award for Environmental Excellence for outstanding achievement in technological innovation.

'To be or not to be' wasn't Hamlet's only question

Astrophysicist finds scientific meaning in Shakespeare's work

By BARBARA K. KENNEDY
Eberly College of Science

Shakespeare's *Hamlet* has been analyzed by scholars for centuries for its literary significance, but only now has a researcher found astronomical meaning in the play.

Peter D. Usher, professor of astronomy and astrophysics, has presented evidence that *Hamlet* is "an allegory for the competition between the cosmological models of Thomas Digges of England and Tycho Brahe of Denmark." Usher said his findings are significant because Shakespeare favors the Diggesian model, the forerunner of modern cosmology.

"As early as 1601, Shakespeare anticipated the new universal order and humankind's position in it," Usher said. "The play therefore manifests an astronomical cosmology that is no less magnificent than its literary and philosophical counterparts."

Claudius Ptolemy perfected his model of the universe in the second century A.D. that remained the standard model into the 16th century. In this model, the Earth was stationary at the center of the universe and everything else revolved around it. In 1543, Nicholas Copernicus of Poland published a revolutionary model — essentially the one in use today — in which the Earth rotates on its axis once a day and is merely one of several planets that revolve about the Sun. Though the Copernican model had been published

Peter Usher, professor of astronomy and astrophysics, gives evidence that Shakespeare was interested in astronomy as well as literature.

Photo: Greg Grieco

lished before Shakespeare was born, it was not yet in vogue in his lifetime.

However, both the Ptolemaic and the Copernican systems were contained in a crystalline sphere, beyond which lay Paradise and the realm of the Prime Mover. By contrast, in 1576 when Shakespeare was 12 years old, the English scientist and military scholar Thomas Digges extended the Copernican model by suggesting that the stars were like the Sun and were distributed throughout infinite space. He was therefore the first Renaissance scholar to publish the idea of an infinite universe. Eight years later similar ideas were published in a book by the

Italian philosopher Giordano Bruno.

Shakespeare would have known of the existence of these competing cosmological models through his acquaintance with Digges.

This paper suggests that *Hamlet* dramatizes the struggle of Renaissance scholars to discover the real picture of the universe from the appearances in the sky. "When *Hamlet* states: 'I could be bounded in a nutshell and count myself a king of infinite space . . .,' he is contrasting the shell of fixed stars in the Ptolemaic, Copernican and Tychoenic models with the Infinite Universe of Digges," Usher said.

Usher listed several other examples of this type throughout the play that support his findings, including the play's climax.

The chief climax of the play is the return of Fortinbras from Poland and his salute to the ambassadors from England," Usher said. "Here Shakespeare signifies the triumph of the Copernican model and its Diggesian corollary."

While the last year of the 16th century saw the martyrdom of Bruno, the first year of the 17th century sees the completion of *Hamlet* and the Bard's magnificent poetic affirmation of the infinite universe of stars," Usher concludes.

Arabian Sea monsoons control productivity and carbon export

By A'NDREA ELYSE MESSER
Public Information

Investigation of the oxygen and nutrient content of the Arabian Sea could show how monsoons influence ocean productivity and the carbon cycle, according to an oceanographer.

"The monsoons of the Arabian Sea create peculiar ocean currents in the area," Raymond Najjar, assistant professor of meteorology, said.

In the summer, the monsoon blows from the southwest up the Arabian Sea toward Pakistan. Because of a combination of wind and the Earth's rotation, the summer monsoon pushes water away from the Somali coast and the eastern edge of the Arabian peninsula. The water that leaves these coastal areas is replaced by water that wells up from depths and is very high in nutrients. In the winter, the monsoon reverses and blows from the northeast.

"This monsoon does not have as much impact," Najjar said. "However, the strong winds cause turbulent mixing, which brings up some nutrients."

Najjar is using data compiled by the National Oceanographic Data Center since 1900 to assess the average nutrient content of Arabian Sea surface waters on a monthly basis throughout the year. His goal is to understand the role that the ocean plays in the climate system, especially in regulating the amounts of carbon dioxide — a greenhouse gas — in the atmosphere.

Earthquakes illuminate the structure of mantle under Tibet

A new way of looking at seismic waves recorded at monitoring stations in Tibet can shed light on the structure of the mantle beneath this immense push, according to a researcher.

"Tibet is interesting because of its high elevation and because there, the Indian

and Asian continents meet and form the Himalayas," Kevin P. Furlong, professor of geosciences, said. "This makes it a very important site to study the role of plate tectonics in the evolution of continents."

"We tend to know very little about the deformation

beneath the crust. If we have some insight into how the crust and mantle deforms where continents collide, we can better model these collisions."

Working with Thomas J. Owens of the University of South Carolina, Furlong looked at individual seismic events that occurred in the

southwestern Pacific and western North America but were recorded at one of the 11 monitoring stations in Tibet.

"These seismic events are the proper distance from Tibet so that the seismic wave must go through the Earth's core before it arrives in the mantle

beneath Tibet," Furlong said.

The researchers are combining the information they have on the mantle fabric with models of rock deformation to determine the plate tectonic processes which led to the development of the Himalayan and Tibetan Plateau.

Bookshelf

Anthony Cutler, professor of art history, is co-author of *Byzance Medievale 700-1204*, published by Gaillmard of Paris. The book is Volume 41 of a series produced by L'Univers des Formes. Cutler's co-author, J.M. Spieser, is an art historian at Strasburg University specializing in architecture and wall paintings. The book's specializations relating to the book are mosaics, icons and manuscripts.

The book is available only in French or German. In the work, Cutler breaks down the habitual distinction between the religious and the profane, placing them in the context of the larger notion of the sacred. Additionally, Cutler and Spieser do not neglect the economic aspects of art production; they illuminate the interface of Byzantine art with the Islamic world of the Byzantine Empire in its middle period, considered the most remarkable period. The authors also reconsider numerous traditional views of Byzantine art, emphasizing the secular rather than religious aspects, aspects Cutler's research has shown to have been more important than what was previously believed. The book also contains hundreds of full color reproductions of artwork, most of which have not been previously published.

The 1836 London Diary of James Stratton Carpenter, edited and annotated by T. Reed Ferguson, vice president emeritus for public affairs in the Office of Governmental Affairs, was published by Minerva Press. Carpenter, a young physician of English descent living in Pottsville, Pa., kept a detailed diary of his 1836 journey of six months that records the sights, sounds and personalities of London. The diary, complete with Ferguson's explanatory notes, offers unique insights into London during the time of Charles Dickens.

Pro Choice/Pro-Life Issues in the 1990s: An Annotated, Selected Bibliography, compiled by two Penn State librarians, was recently published by Greenwood Press, Westport, Conn.

Richard Fitzsimmons, director of the library at the Penn State Worthington Scranton campus, and **Joan P. Diana**, director emerita of the library at the Penn State Wilkes-Barre campus, have examined more than 4,000 pro-choice and pro-life publications and releases from 1990-1994, and selected 1,600 for inclusion in the bibliography.

The book provides access to significant literature published in the United States that will assist readers in reaching informed decisions on the pro-choice/pro-life issue. As a "selected" bibliography, the book includes only materials fitting parameters of research in the ethical, legal, moral, religious and social arenas.

For the Record

The photo of the Pennsylvania Dance Theatre rehearsal on page 7 of the Feb. 13 *Intercom* was taken by Helena Lukas Martemucci. The photo credit was unintentionally omitted.

Temporary relief

Dancers get a short break and a baby powder rubdown by morale team members, left, during the 25th Interfraternity Panhellenic Dance Marathon, held Feb. 14-16 at the White Building on the University Park campus.

Below, junior Brett Stackhouse ices his forehead to refresh himself while dancing.

A record \$1,528,425.64 was raised for the Four Diamonds Fund at The Hershey Medical Center, which benefits children with cancer. Alpha Tau Omega fraternity and Zeta Tau Alpha sorority teamed up to raise the most money, \$175,802.45.

Out of the 550 dancers who started the marathon, 534 were still standing at the end of the 48-hour event.

Private Giving

Couple funds scholarships for DuBois Campus

Albert L. Good never attended classes at the Penn State DuBois campus. In fact, he wasn't a college graduate. He and his wife, **Harriet**, had no children of their own, but they were concerned about access to higher education in the DuBois area. Today, as the result of their generosity, more than two dozen DuBois campus students are getting a financial boost toward their college degrees.

Albert Good was involved in the insurance and real estate business in DuBois for nearly four decades. He was a president of the Rotary Club of DuBois, a director of Deposit Bank and involved with the YMCA, the Tri-County Board of Realtors and the City Parking Authority. He and his wife were both active members of the Mt. Zion United Methodist Church. Albert died in 1990; his wife, Harriet, died in 1994.

Through their will, the Goods endowed a trust fund of nearly \$380,000 that will ensure their names are not forgotten at the DuBois campus. The interest from that fund each year is channeled into scholarship awards for campus students. Scholarship guidelines require only that the students have financial need, academic ability and are residents of either Clearfield, Jefferson or Elk counties. Scholarship money was awarded for the first time from the fund this fall.

The DuBois Educational Foundation, the campus advisory board, helped design the funding path for the annual proceeds in cooperation with officers of First Commonwealth Trust Company of DuBois, who manage the principal.

Lasting impression

Ralph O. Mumma, distinguished professor of environmental quality, has just had an endowed professorship named in his honor. Mumma is the first to hold the Ralph O. Mumma Professorship in Entomology, but plans to retire later this year. The University now has 77 endowed professorships.

Photo: Greg Grieco

State College couple honors professor with endowment

A \$500,000 gift from M. Michael and Mitra Arjmand of State College will create a new professorship in entomology named in honor of Ralph O. Mumma, distinguished professor of environmental quality.

The Ralph O. Mumma Professorship in Entomology will be based in the College of Agricultural Sciences in recognition of Michael Arjmand's continuing friendship with Mumma, who plans to retire this year. The distinguished professor was a mentor to Arjmand, now president of Centre Analytical Laboratories, during his master's and doctoral degree studies in entomology at Penn State in

the 1970s, and later helped him move to America from his native Iran.

"I believe education to be the fundamental element of freedom, and what better way to make the point than to honor my own professor," Arjmand said.

Arjmand was further assisted by Mumma in the creation of Centre Analytical Laboratories, which now employs nearly 60 people to perform chemical analyses for a number of environmental concerns, including testing residential drinking and waste water and helping create environmen-

University budget now available on World Wide Web

Thanks to technology, the University's budget is even easier to access.

Available to the media and the public in libraries across the state since the 1980s, the budget is now just a mouse click away — on the World Wide Web.

"Penn State's open budget is one of the most comprehensive, detailed documents of its type in higher education," said President **Graham B. Spanier**. "We believe that moving the 500-plus pages of budget information onto the Web will open it up to wider audiences and give the public additional information about how the University operates."

The budget can be found by pointing a Web browser, such as Netscape, to Penn State's home page at <http://www.psu.edu>. From there, hotlinks will lead electronic visitors to Penn State's fiscal blueprint. Those wanting to review the document will need to download a reader, Adobe Acrobat, which is provided free of charge.

For approximately a decade, Penn State's budget and related documents totaling thousands of pages of information have been placed in the

See "Open budget" on page 3

HUB/Robeson plans move along on schedule

Plans for the expansion and renovation of the Hetzel Union Building (HUB) and the construction of the new Paul Robeson Cultural Center, both on the University Park campus, are moving ahead as planned.

"The design committee, which includes faculty, staff and students, has been working closely with the architects since spring 1986 on design, budget and program issues," said **Craig Millar**, committee chair and associate vice president for student affairs. "We have talked with many units and the public about how best to accommodate the needs of students, faculty, staff and visitors."

See "HUB" on page 7

More construction information on page 6.

Q. What is a "Nittany Lion?"

—The McKevitt Family
Hanover Park, Ill.

A. The name "Nittany" is apparently derived from the Native Americans (Mohicans) who lived here in central Pennsylvania used to describe the mountain that today overlooks the University Park campus. The term meant either "single mountain" or "barrier against the winds." Nittany Mountain, truly an impressive barrier, was thus named by settlers many years before Penn State's founding in 1855.

Penn State athletic teams had no mascot as late as 1906, when the baseball team played Princeton. Sensing the need for a counterpart to that university's famous tiger, student H.D. "Joe" Mason ('07) urged adoption of a fierce mountain lion. But to give it a distinctive Penn State flavor and avoid confusion with cats of various kinds used as mascots by other schools, Mason coined the term "Nittany Lion." Students and fans immediately accepted the appellation.

—Mike Bezilla
director

Development Communications and Special Projects

Q. Who is entitled to draw retirement pay from the University

—J.A.H.
University Park

A. Eligible University faculty and staff may elect to participate in either the State Employees' Retirement System (SERS) or the Teachers Insurance and Annuity Association and College Retirement Equities Fund (TIAA-CREF) as required by state law.

Each program has eligibility requirements for drawing a retirement pension. There are several qualifying events which must take place first: Primary importance is given to meeting the vesting requirements for either plan. SERS participants must have 10 years of credited service, or be at least age 60 with three years of service to be eligible for a pension benefit. TIAA-CREF participants are fully vested upon enrollment.

For specific questions related to eligibility rules, please contact Debra L. Wolfe, benefits specialist, at (814) 865-1473; or e-mail DLW3@psu.edu.

—Billie S. Willis
assistant vice president for Human Resources

Appointments

Vice president for research named

Rodney A. Erickson, dean of the Graduate School, has been named, in addition, vice president for research.

He had been serving as interim vice president for research since David Shirley, his immediate predecessor as vice president, retired in December.

RODNEY A. ERICKSON

As vice president for research, Erickson will lead a \$350 million a year research enterprise that is the largest among universities in Pennsylvania and 10th among all American universities. Penn State also ranks second in the nation, behind the Massachusetts Institute of Technology, in industry-supported research.

In recent years Penn State's faculty and students have made discoveries and innovative advancements in fields as diverse as medical diagnostics, affordable housing, effective wastewater treatment systems, weather prediction, astronomy, early childhood development, global economic competition, feminism, and the effects of space flight, to name only a few areas of research.

In addition to his administrative post, Erickson is a professor of geography and business administration. He was head of the Department of Geography in the College of Earth and Mineral Sciences from 1990-94. From 1981 to 1995, he served as director of the Center for Regional Business Analysis and, from 1984-1995, was associate director of the Division of Research in The Smeal College of Business Administration. He was appointed dean of the Graduate School on July 1, 1995.

Erickson earned graduate degrees at the University of Minnesota and the University of Washington. He joined the Penn State faculty in 1977. His teaching and research have focused on urban and economic geography, and he has published widely on topics including regional economic growth theory, industrial location, international trade and economic development policies.

Erickson has served in leadership roles in professional organizations for geography and business administration, and currently is a member of the editorial boards of four journals. A former Fulbright Research Scholar in the United Kingdom, he also has been a Simon Senior Research Fellow at the University of Manchester, and a National Science Foundation/American Statistical Association Research Fellow at the U.S. Bureau of the Census. His current research involves the foreign trade and international investment of manufacturing and service industries across U.S. regions, and the evaluation of public policies for export expansion.

Smeal College appoints director of development

Beverly McAlister, formerly with Arizona State University, has been appointed the new director of development in The Smeal College of Business Administration.

McAlister was director of development for Arizona State's University Libraries, which serve the school's 43,000 students and faculty members and are ranked among the top 30 Academic Research Libraries in the U.S. and Canada. Under her leadership, the libraries raised more than \$3 million in three years. She also organized efforts which resulted in a 97 percent increase in gifts disbursed to benefit ASU students and faculty members through the advancement of library resources.

Before joining Arizona State in 1993, McAlister developed and implemented the annual fund-raising plan for the March of Dimes Birth Defects Foundation in Phoenix.

BEVERLY McALISTER

As director of development for the organization for six years, she is credited with overseeing a 75 percent increase in corporate and major gifts. From 1975 to 1987, she was deputy director of the Community Care Network in Phoenix and an account executive with James Holechek & Associates Inc., Baltimore. At James Holechek & Associates, she won a Public Relations Society of America award for her work.

McAlister graduated cum laude from the University of Maryland in 1975 with a bachelor's degree in journalism. She is a member of the National Society of Fund Raising Executives, and is past president of Women in Communication Inc.

Director to oversee development for Berks-Lehigh Valley College

Kimberly J. Murphy, a certified fund-raising executive, has been appointed director of development for the Berks-Lehigh Valley College. Murphy will oversee development and university relations for the Berks and Allentown campus locations.

Since Murphy's arrival as director of university relations at Penn State Berks in 1992, the campus has doubled its scholarship endowments, now exceeding \$1 million. She earned her certification as a fund-raising executive from the National Society of Fund Raising Executives. In addition, she will continue to oversee all public relations and alumni events for the college.

She is a member of the Junior League of Reading and sits on the board of directors of the Berks County Chapter of the American Red Cross and Beacon House, a transitional housing program. A Penn State alumna, Murphy is past president of the Penn State College of Education Alumni Society Board and is an active volunteer for the Penn State Alumni Association.

Open budget

continued from page 1

libraries at its 23 campus locations. Each copy of the budget and the related documents cost about \$100 to photocopy. Making the volumes of information available on the Web will save the University thousands of dollars annually, administrators said.

In addition to the open budget, Penn State also produces an annual expenditures report totaling hundreds of pages. This report is also placed in each of its libraries around the state. Press releases and the public information staff of the University provide other financial information about the University throughout the year, ranging from fundraising results to the cost of new buildings.

"This is our first attempt to organize the hundreds of pages of budget detail for World Wide Web users and we hope in coming months to make the volumes of information increasingly easier to explore," said P. Richard Althouse, the University's budget officer.

Examples of budget information that can be found in the Web documents range from budgets for the University Faculty Senate and The Bryce Jordan Center, to the cost of fire insurance and hazardous waste disposal. Interested in incoming funds? The largest portion of income in Penn State's total operating budget — 27.2 percent — is generated by tuition, with the second largest source coming into the University through research funding — largely from sources outside of the Commonwealth. The smallest of the three main sources of operating income for Penn State is through the annual state appropriation.

Many thousands of other pages of information about Penn State are also accessible through the University's main home page on the Web.

"I doubt that there are many universities in the country as large as Penn State that provide this kind of easy access to this much budget information," Spanier said. "The budget available in all of our libraries and now on the Web is a copy of the same budget that sits in my office."

"Penn State is a world leader in the use of information technology and this seemed like a good time to turn to the Web to help us make this information more widely available," Spanier said.

Professorship

continued from page 1

tally friendly pesticides.

The Arjmand gift will supplement the Department of Entomology's normal support for the new professorship, which will open for possible hiring in the first half of 1997. The gift will be used for research, education and travel expenses, and stipends for graduate student assistance.

The department currently houses 19 tenure track and nearly 30 total faculty members. Mumma, a native of Mechanicsburg, Pa., did his undergraduate work at Juniata College and earned his Ph.D. in organic chemistry from Penn State in 1960. He joined the Pesticide Research Laboratory at Penn State in 1966 and was the first faculty member of the College of Agricultural Sciences to be named a distinguished professor and to win the University-wide Howard B. Palmer Faculty Mentoring Award.

Mumma's research has focused on the fate of pesticides in the agro-ecosystem, the development of analytical methods to analyze for these agrochemicals, and, more recently, on plant mechanisms for resistance to insects.

■ Outreach

E-mail network helps dairy farmers

By ESTON MARTZ
College of Agricultural Sciences

For the last 10 months, an innovative electronic mail group in western Pennsylvania has provided a new way for Penn State Cooperative Extension to serve local dairy farmers.

"We gave 40 dairy producers in western Pennsylvania a computer account with electronic mail capabilities," said Gary Sheppard, extension agent in Westmoreland County, who established the West Dairy Producers Network with colleagues in Crawford, Erie, Indiana, Lawrence, Mercer and Somerset counties and technical assistance from the computer support unit in the College of Agricultural Sciences.

"We wanted to show dairy producers the potential uses of the Internet and explore the use of computer networks in our educational mission," Sheppard said. "What has evolved is a very active network of 56 producers."

The e-mail discussion list enables producers to share information and ask questions about any aspect of the dairy business in western Pennsylvania. The extension agents on the list make sure that research-based information is available to producers who have specific questions. For instance, when a dairy farmer had a question about some cows that had developed large udders, Sheppard was able to put him in touch with Lawrence Hutchinson, professor of veterinary science at Penn State.

The network also offers significant opportunities for farmers to benefit from cooperation.

"Large farms have tremendous buying power," said Sheppard. "If smaller operations could easily find other local farmers who need to buy the same supplies, this buying power also could be theirs. A farmer can simply ask others in the group if they want to split a tractor-trailer load of seed. If the

"Anyone with Internet access can pose as an expert, even if they aren't qualified ... extension can help producers who use the Internet to find the best sources of information, without bias."

— Gary Sheppard
extension agent

mailing list is well-managed and regional, such opportunities are endless."

The sheer volume of information created by worldwide e-mail discussion groups is difficult for a single person to manage. "Extension is in a unique position to use the Internet to help farmers, who are extremely busy, to reap the benefits of this information explosion," said Sheppard.

"As extension agents, my colleagues and I monitor a wide range of Internet discussion groups focusing on dairy management, veterinary medicine, grazing and other topics. We sort through the discussions and send items of regional importance to the producers we work with."

Penn State Cooperative Extension's educational role also helps farmers avoid invalid or distorted information.

"Anyone with Internet access can pose as an expert, even if they aren't qualified," Sheppard said. "Also, commercial groups on the Internet may be more interested in sales than in helping a producer solve a problem. Extension can help producers who use the Internet to find the best sources of information, without bias."

LECTURES

Free high performance computing application seminars

The Institute for High Performance Computing Applications is offering a free seminar every week during spring semester on the University Park campus. The following seminars are for March. All seminars listed, unless otherwise noted, will be held in Room 215 Hammond Building from 3:35 to 4:25 p.m.

— March 3: **Jim Anderson**, professor of chemistry at Penn State, will discuss "Quantum Monte Carlo;"

— March 10: Spring break;

— March 17: **Iain Boyd**, professor of aerospace engineering at Cornell University, will focus on "Parallel Implementation of a Monte Carlo Method for Nonequilibrium Gas Dynamics;"

— March 24: **George Karniadakis**, professor of applied mathematics at Brown University, will talk about "Spectral/hp Element Methods for Parallel Computers;" and

— March 31: **D. Yung** from IBM, Toronto, will discuss "High Performance Fortran and Java Compilers."

For a full listing of seminars planned, visit the institute's Web site at <http://cac.psu.edu/~hlh/pca/spring597e97.html>

Learn about drug targeting for cancer therapy

The annual Mylar Giri Lecture on the Penn State Hazleton campus featuring speaker **Ned D. Heindel**, Bunn Chair professor of chemistry at Lehigh University, will be held at 7:30 p.m. Monday, March 3, in the Evelyn Graham Academic Building. Heindel will discuss "Drug Targeting for Cancer Therapy."

Heindel is also a visiting professor of nuclear medicine at Hahnemann University. He received his B.S. degree in chemistry and mathematics from Lebanon Valley College, and his Ph.D. in organic chemistry from the University of Delaware. He was a Fellow in medicinal chemistry at Princeton University, and received honorary doctoral degrees from Lebanon Valley College and Albright College.

The Mylar Giri Lecture is presented annually in honor of the late Hazleton campus physics professor. The lecture is free to the public.

Examine welfare reform problems March 4

Sheldon H. Danziger, professor of social work and public policy at the University of Michigan, will present "What Went Wrong with Welfare Reform?" a seminar at 11:45 a.m. Tuesday, March 4, in 406 Oswald Tower on the University Park campus.

Danziger is a nationally known scholar on poverty and welfare, and co-author of *Unequal* (Harvard University Press, 1995). He will discuss how economic, public policy and family structure changes over the past two decades contributed to high rates of poverty and welfare dependency. In his talk, Danziger will argue that the welfare reform legislation of 1996 is flawed because it ignores the key findings from evaluations of welfare-to-work programs and from labor market research. Building on these key findings, he will suggest ways the welfare reform process could be improved. He also will discuss a welfare reform research agenda on major unresolved issues.

Please contact **Laura Zimmerman** at (814) 865-0486 or lzimmer@pop.psu.edu for additional information.

Psychology lecture planned for March 4

The Robert G. Bernreuter Lecture in School Psychology will be held at 7:30 p.m. Tuesday, March 4, in Kern Auditorium on the University Park campus. **George Albee** will be the featured speaker.

Albee, who was honored in 1993 by the American Psychological Association with the Gold Medal Award for Life Contributions by a Psychologist to the Public Interest, also directed the Task Force on Manpower for President Eisenhower's Joint Commission on Mental Illness and Health, and the Task Panel on Prevention for President Carter's Commission on Mental Health. He and his colleagues have edited 17 volumes on primary prevention, based on annual conferences at the University of Vermont. Albee is a long-time advocate of a social-cultural model of mental disorders and finds causation in class exploitation, sexism and racism.

Probe evolution of social behavior March 1

"On Becoming Human" is the topic of the spring semester 1997 Penn State Lectures on the Frontiers of Science. Designed for the enjoyment and education of central Pennsylvania residents, the lectures take place on six consecutive Saturday mornings from 11 a.m. to noon on the University Park campus.

The final lecture in the series, "The Evolution of the Mind: Speculations from Contemporary Biology Based on the Musings of a Young British Victorian Naturalist," will be given on March 1 by **Jeffrey A. Kurland**, associate professor of anthropology and human development at Penn State, in 111 Wartik Laboratory. Kurland is known for his

JEFFREY A. KURLAND

research on the evolution of social behavior in nonhuman primates and in humans. He will show that humans share with their closest living primate relatives certain features of behavior and cognition — and hence, "the mind" — that may help us understand our roots within the process of evolution.

The Penn State Lectures on the Frontiers of Science are sponsored by the Eberly College of Science. Parking is available at the HUB Deck parking garage on Shortlidge Road. For more information, contact the College of Science Office of Public Information by telephone at (814) 863-8453 or (814) 863-4682, or by e-mail at science@psu.edu.

Explore an "Inward Garden" at tonight's Bracken Lecture

Julie Moir Messervy, Principal of Messervy Associates, a landscape design consulting firm specializing in the design of contemplative gardens, will be the second speaker in this year's John R. Bracken Lecture Series. The Bracken Lecture Series is sponsored by the Department of Landscape Architecture of the College of Arts and Architecture.

The lecture, "The Inward Garden," is scheduled for 8 tonight in 101 Joab Thomas Building on the University Park campus.

Messervy received her bachelor of arts from Wellesley College and attended the Massachusetts Institute of Technology's School of Architecture, where she received her master's of architecture and master's in city planning. She trained with the eminent Japanese garden master Kinsaku Nakane in Kyoto, Japan, first as a Henry Luce Scholar and later as a Japan Foundation Fellow.

Messervy has built gardens throughout the Boston area for the past 15 years, working with institutions and private individuals. Recent

JULIE MOIR MESSERVY

clients include the Arnold Arboretum, the Friends of the Public Garden, Mount Auburn Cemetery and the Museum of Fine Arts, Boston, where she designed Tenshin-en, The Garden of the Heart of Heaven with professor Kinsaku Nakane. She has taught in programs at MIT, Harvard, Radcliffe, the New York Botanical Garden and the Arnold Arboretum, and lectured around the country and in Canada.

Messervy's first book, *Contemplative Gardens*, was published in September 1990 and was called one of the 10 best garden books of 1990 by *The New York Times*. Little, Brown released Messervy's second book, *The Inward Garden*, in March, 1995.

Messervy is currently collaborating with internationally acclaimed artist Yo-Yo Ma in designing a music garden. This will be the first in a series of six artistic collaborations which will be filmed by Rhombus Media Productions of Canada.

A reception and book signing will be held after the lecture. The lecture is free to the public.

More Lectures

Activist women to be discussed March 4

The third speaker of the Women's Studies Feminist Scholars Series, **Temma Kaplan**, will present "Crazy for Democracy: Women in the Environmental Movement" at 7:30 p.m. Tuesday, March 4, in 101 Kern Building on the University Park campus.

Kaplan, a professor of women's studies and history at the State University of New York at Stony Brook, is the author of *Anarchists of Andalusia, 1868 to 1903*; *Red City, Blue Period: Social Movements in Picasso's Barcelona*; and *Crazy for Democracy*. A book signing for her most recent publication will follow the lecture.

Kaplan focuses her work on the efforts ordinary women have made to fight for social justice and human rights. As an activist and historian, Kaplan is particularly concerned with the gendered nature of social struggles. Through her work she has

TEMMA KAPLAN

attempted to broaden theoretical interpretations of leadership and social action to highlight women's grassroots movements at the international level. Specifically, Kaplan's work is based on her extensive comparative studies of women's social movements in Europe, Africa, Latin America and the United States.

She was director of the Bernard Center for Research on Women from 1983 to 1991, and also has participated in international conferences such as the Fourth United Nations Conference on Women, held in Beijing in 1995.

The Feminist Scholars Series is sponsored in part by a grant from the Equal Opportunity Planning Committee, Women's Equity Fund. For information on this lecture or the Feminist Scholars Series, please contact the Women's Studies Program at (814) 863-4025.

Diversity workshop to be held at Nittany Lion Inn

The President's Commission on Racial/Ethnic Diversity (CORED) will sponsor a one-day workshop, "Diversity ... Beyond Awareness and Education," on Monday, March 31, at The Nittany Lion Inn on the University Park campus.

Open to the entire University community, this workshop is designed to provide Penn State employees with an opportunity to share their ideas about multiculturalism and their experiences. In addition, there are sessions planned to provide new employees, particularly people of color, with resources for professional success. The commission is hoping to obtain fresh input on strategic directions for the future.

The tentative schedule includes sessions on affirmative action in the 21st century, career opportunities and networking, defining multiculturalism broadly, thriving in a majority environment, and the mentoring process. A representative from Corning Ashi Video Products Co. in State College will provide an industry viewpoint about diversity.

There is a registration fee of \$20,

which includes lunch and some resource materials. Registration deadline is March 21. For questions about the program, please contact Vicki Fong, CORED member and workshop coordinator, at (814) 865-9481 or at vf1@psu.edu; for questions on registration, contact Shannon Hoover at (814) 863-8493 or at sh7@psu.edu.

CORED was appointed in 1989 as a University-wide advisory body to the president on matters relating to cultural diversity throughout all Penn State locations in the Commonwealth, and to serve as a forum for the exchange of ideas within the University. For more information about the group, check the home page at <http://www.psu.edu:80/staff/diversity/racial.html>.

CORED also will sponsor a Best Practices in Diversity conference this September, along with the College of Education and the Committee on Institutional Cooperation, the academic arm of the Big Ten universities and the University of Chicago.

For more information, visit the home page at <http://www.cde.psu.edu/C&I/BestPracticesInDiversity/>.

Atomic physics talk is meant for everyone

Carl Wieman, a leader in the field of ultra-low-temperature atomic physics, will give the 1997 E. W. Mueller Memorial Lectures in Physics on March 5 and 6, on the University Park campus.

Wieman's first lecture, which is intended for a general audience, is titled "The Chilling Story of an Atomic Identity Crisis: Bose-Einstein Condensation at 1 Millionth of a Degree above Absolute Zero" and will take place at 8 p.m. Wednesday, March 5, in 112 Kern Building. His second talk, a physics colloquium, is titled "Bose-Einstein Condensation in an Ultracold Gas" and will take place at 3:30 p.m. Thursday, March 6, in 101 Osmond Laboratory.

Professor Wieman recently made a landmark accomplishment by performing the first Bose-Einstein condensation of an atomic vapor, a transition that had been sought in many laboratory experiments for nearly two decades.

Wieman received his Ph.D. from Stanford University in 1977. After

CARL WIEMAN

seven years at the University of Michigan, he moved to the University of Colorado, where he holds positions in both the Department of Physics and the Joint Institute for Laboratory Astrophysics. His research has led to many discoveries in atomic physics and these, in turn, have resulted in numerous honors, including membership in the National Academy of Sciences in 1994, the Einstein Medal for Laser Science in 1995 by the Society for Optics and Quantum Electronics, and the Fritz London Prize in Low Temperature Physics in 1996 by the International Union of Pure and Applied Physics.

The E. W. Mueller Memorial Lectures in Physics are sponsored by the Department of Physics and honor Erwin Mueller, who was a member of the department from 1952 until his death in 1977. He invented the field ion microscope at Penn State, which enabled him to be the first person to see individual atoms.

Communications systems, network overview to be presented March 6

Moshen Kavehrad, professor of electrical engineering and director of the Center for Information and Communications Technology Research (CICTR), will present a public lecture at 2:45 p.m. Thursday, March 6, in 128 Sackett Building. The lecture, "Broadband Communications Systems & Networks: An Overview," will focus on the explosive growth in Internet applications which represents an increasing demand for multimedia interactive applications in future network architectures. An overview of hybrid networks and their infrastructures will be presented during the lecture, along with related research findings from the CICTR.

Kavehrad is the holder of the W. L. Weiss chair in information and communications technology at Penn State. He serves on the editorial board of the *International Journal of Wireless Information Networks*, and has published nearly 200 papers.

Kavehrad received his Ph.D. in 1977 in electrical engineering from Polytechnic University and was a professor of electrical engineering at the University of Ottawa before joining the Penn State faculty in January of this year.

March 19 lecture at Berks campus to mark Women's History Month

Just in time for Women's History Month, Penn State Berks, Berks-Lehigh Valley College hosts "Women and Race Relations in Early Pennsylvania" at 1 p.m. Wednesday, March 19, in the Perkins Student Center Theatre.

Alison Duncan Hirsch, assistant professor of American studies and history at Penn State Harrisburg, Capital College, contends that the language of race relations historically has been male. From 18th-century abolitionists

to the 20th-century civil rights movement, "brotherhood" has been the goal of those seeking racial equality.

Hirsch's talk looks at the role of women in the creation of American patterns in race relations by examining specific historical documents and incidents involving African American, Native American and European-American women interacting with each other and with men of different backgrounds. The event is free to the public.

New library wing construction to begin in April

In April, the University Libraries—specifically Pattee Library on the University Park campus—will begin a two-year transformation process with the help of a backhoe and a wrecking ball. That's when ground will be broken for the start of phase one of the construction of the new Paterno Library at Pattee, a project that is expected to vastly improve the facility from a users' point of view and provide much-needed space.

In the works for years, the \$26.5 million Paterno Library will add a new entrance from Curtin Road, a major five-story addition to the east, and a redesigned circulation space. The familiar glass facade of East Pattee (facing Weaver Building) will be removed to join the new addition and the facility will house the Special Collections Library, including Rare Books Room, University Archives/Penn State Room, Historical Collections and Labor Archives—and that's just the first floor. The other floors will be home to the Social Sciences and Life Sciences libraries, to name a few.

Preparation for the upcoming addition and renovation to Pattee Library is set to begin the first week of March. During this time, fencing will be erected around the construction site, including the areas directly behind and to the east of Central and East Pattee (roughly bounded by Curtin Road, the Weaver Building and Mueller Lab).

Initially, this first phase of construction will have the following effects:

- Parking lots will be closed at this time, as well as several pedestrian sidewalks on the east side of Pattee. The pedestrian walkway that passes under the connector between Central and East Pattee will be closed.

- The existing handicapped and staff entrance in the rear of the building near Curtin Road will be closed. A new one will be installed at the front door of East Pattee, and the existing handicapped

Groundbreaking ceremony is planned for April 25

To kick off the University Libraries' two-year construction project, a groundbreaking ceremony will be held on April 25. The creation of the Paterno Library and the renovation of Pattee will help to achieve better library space for users, collections, services and technology. It will be both a comfortable facility for students and scholars and a campus-wide center for the electronic flow of information.

For more information and updates on the

Libraries' building project, check out the construction Web site at <http://www.libraries.psu.edu/pubinfo/construction/>. Send your questions and comments to nacc@psu.edu.

In the coming months, *Interim* will continue to update readers on the Paterno Library project, as well as other construction projects across the University. Watch for more information on road closings and changes brought on by construction.

entrance in West Pattee will continue to be available. The handicapped parking spaces in the Yellow lot will be relocated near West Pattee.

- The drive-up book drop at the rear of Central Pattee (off Curtin Road) will be closed. Additional book drops will be set up outside of Pattee in the near future to allow patrons easy access for dropping off

materials. Books can continue to be dropped at points in East and West Pattee, as well as the Mathematics, Engineering, Pollock, Physical Sciences, and Earth and Mineral Sciences libraries on campus.

- All other services will continue undisturbed until further construction takes place. No changes in library hours are planned.

Mont Alto facility to be dedicated April 10

A new 8,000-square-foot Bookstore and Continuing Education Center at the Penn State Mont Alto campus was opened in January, replacing an 85-year-old structure that was demolished last year.

On April 10, campus officials will dedicate the new \$1.3 million facility, that was built to accommodate rising enrollment numbers, especially in continuing education. Over the last five years, Mont Alto's enrollment numbers have gone from 938 in 1991 to 1,205 in 1996.

The new Bookstore, partially funded by a grant from Barnes and Noble, will provide better access and space for all bookstore activities including the sale of Penn State clothing and memorabilia to the general public. The structure will also house student mailboxes and an automated teller machine and give students 24-hour access to this area. The old bookstore located in the General Studies Building will be renovated into a student computer lab and a new learning and technology center.

The Continuing Education Center will be home to two, state-of-the-art classrooms furnished in boardroom style. One of the classrooms will have the ability to be used as a mobile computer lab, complete with laptop computers. The Department of Continuing Education has moved their offices from their previous location in Conklin Hall to the new building.

"We desperately need this new facility. The classrooms will provide additional flexibility when scheduling classes, outreach programs and campus events," said William Curley, acting campus executive officer. "It will also allow us the opportunity to better serve all of our students."

Open for business

The Bookstore and Continuing Education Center at Mont Alto campus opened in January.

The structure that was taken down to make way for the new building, Double Cottage, was constructed in 1911 by the Pennsylvania State Forest Academy to house faculty. One family resided on either side of the cottage, including at one time, the director of the campus. In 1929, when the Forest Academy became a Penn State campus, the Double Cottage became faculty offices, a dormitory, storage, a gymnasium, and men's and women's locker rooms. It served as locker rooms until 1993 when the Multipurpose Activity Center was opened.

The dedication ceremony is planned for Thursday, April 10, at 6:30 p.m. The public is welcome to attend. For more information, contact Laura Frome at (717) 749-6112.

Campus master plan is back on the agenda

A group of University administrators, faculty, students, staff, community leaders and consultants will take a giant step toward developing a new comprehensive master plan for the University Park campus during a kick-off presentation and discussion next week.

They will meet from 10 a.m. to noon Wednesday, March 5, at the Penn State Scanton Hotel and Conference Center.

The configuration of campus buildings, walkways, open spaces and utility systems have been guided by a master plan first developed in 1907 and periodically updated as new opportunities emerged. But much has changed since its last major update in 1987, and much more will need to be evaluated in order to guide the future development of the campus into the 21st century.

In 1994, the University began a master planning process review and in 1995 laid the groundwork for ways to proceed, including guidelines for selecting a campus planning consultant. Last September, Johnson, Johnson & Roy Inc. of Ann Arbor, Mich., was selected to develop the plan. Richard Rietzkin, a partner in the firm, will be the senior planning consultant for the project and will give a presentation at the kick-off meeting.

Rietzkin will talk about his firm's approach to master planning, suggest a framework for the planning process and look for input from master plan participants on how to involve the whole University community. The master planning process is expected to take about a year and a half.

HUB

continued from page 1

"The architects have been very responsive to everyone's suggestions and are working right now to complete drawings for final approval," he said. "In the meantime, we had to balance construction and budget cost considerations, while maintaining the program and design concepts."

Designed by Williams Trebilcock Whitehead Architects of Pittsburgh, the HUB/Robeson project is expected to add approximately 90,000 square feet to the existing 154,000 square feet in the HUB and the Robeson Center's 9,000 square feet. Built in 1955, the HUB is the main student union at the University Park campus, serving more than 50,000 students, faculty, staff and visitors. The HUB was expanded in 1974 and remodeled in 1981, but over the last 15 years, there has been significant growth in the number of students, faculty and staff at the campus. Approximately 25,000 people are estimated to use the building each day, and nearly 7,000 events are scheduled each year in the facility.

The Robeson Cultural Center sponsored 561 events in 1995, attracting 24,000 participants. The center is located in a World War II building that was moved to the campus in the early 1950s and designated as a temporary student union building.

While design details are still being finalized, the current design proposes features such as an atrium with a pedestrian concourse, dedicated study spaces, redesigned food and business services, an expanded ballroom, information and computer services, and improved access for users with disabilities. The attention to detail in the design process is essential because of the important role of a student union building in campus life, Millar said.

A union serves as the community center of a university for all students, faculty, staff, administrators, alumni and visitors. In addition to the services provided, the union brings people together in educational programs and informal settings, according to Millar.

"In addition, a cultural center encourages appreciation and understanding of diverse cultures, as well as supports cross-cultural interactions among students of all races and ethnicities," he said.

Final plans are expected to be presented to the Board of Trustees at its March 21 meeting in Hershey. The budget is currently estimated at \$29 million, and the schedule calls for construction to begin in late spring with targeted completion by the start of fall semester 1999.

There will be one more public forum on the project design this semester, and a groundbreaking ceremony is tentatively scheduled for May 2.

Row for shore

Unseasonably warm temperatures last week melted most of the accumulated snow and cataloged the intersection of North University Drive and Services Road on the University Park campus into a small lake.

State College attorney, honorary alumnus dies

Delbert J. McQuaide, Penn State's general counsel who helped guide and direct the University through virtually every major decision for the past 25 years, died Feb. 19 at the age of 60.

McQuaide, who just this month was named an Honorary Alumnus of Penn State — the highest award given by the Alumni Association to a non-alumnus, was a valued confidante and adviser to Penn State presidents, trustees and administrators.

For more than a quarter of a century Penn State has turned to McQuaide, a prominent State College attorney, for advice on a wide range of issues. He has been involved in decisions relating to the development of The Bryce Jordan Center, several expansions of Beaver Stadium and the expansion of the Palmer Museum of Art, to name just a few. The governance of the University; changes in policies affecting students, contracts, personnel issues and many more. In addition, he is the author of the governance documents by which the

University operates — documents recognized as models nationwide.

A member of the law firm McQuaide Blasko Schwartz Fleming & Faulkner Inc., McQuaide earned his undergraduate degree from Juniata College and his law degree from New York University, where he was a Root-Tilden Scholar. He was admitted to the New York Bar in 1961 and the Pennsylvania Bar in 1964. He served on the boards of Quaker State Corp. and Mid-State Bank, and was past president of the Centre County Bar Association and chair of the board of trustees of Juniata College.

McQuaide is survived by his wife, Barbara R.; his daughter, Jennifer Lockett of Perkasie, Pa.; two sons: Mark A. of Bear, Del., and James T. of Pleasant Gap, Pa.; and four grandchildren.

Memorial contributions may be made to the Delbert J. McQuaide Distinguished Lecture in History fund at Juniata College, 1700 Moore St., Huntingdon, Pa. 16652, or to the State College Presbyterian Church.

Faculty/Staff Alerts

Learn more about LIAS

The University Libraries are offering the following series of seminars during March to help library users learn more about the growing number of databases accessible through the Library Information Access System (LIAS) and on CD-ROM. LIAS searching techniques that enable users to maximize their searching power also will be presented.

To register or learn more about the seminars and their content, send an e-mail to signup@psuilibs.psu.edu. If you have any additional questions, contact **Doris Herr** at (814) 863-0325. Information on the seminars also can be found by typing **HELP WORK-SHOP** when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>.

■ Penn State Libraries Catalog in LIAS

Overview of The CAT in LIAS and hands-on practice: March 19, from 1-3 p.m. All sessions take place in Tower Room 402, Central Pattee Library.

■ **Beilstein CrossFire** (the electronic version of the Beilstein Handbook of Organic Chemistry)

March 10, from 8 to 10 a.m., Room 5, Central Pattee Library

■ Education databases

March 17, from 10 a.m. - noon, Tower Room 402, Central Pattee Library

■ Electronic Text in the Humanities

It is now possible in the humanities to use computer technology to search large bodies of primary source material for combinations of words or phrases. Participants will receive an overview of textual databases available: March 27, 10 a.m. - noon, Tower Room 402, Central Pattee Library

■ Literature databases

March 20, 10 a.m. - noon, Tower Room 402, Central Pattee Library

■ Maps and Spatial Data on the Web

This hands-on seminar provides an overview of cartographic and spatial data. March 6, 10 a.m. - noon, Tower Room 402, Central Pattee Library

■ Music (electronic resources)

March 4, 10 a.m. - noon, Tower Room 402, Central Pattee Library

■ NEXIS databases

(Note: LEXIS/NEXIS is available only for Penn State faculty, staff and students engaged in course-related research. Participants must present a valid Penn State ID at the seminar) to be held March 5, from 10 a.m. - noon, Tower Room 402, Central Pattee Library

■ Spanish and Latin American Resources

March 18, from 10 a.m. - noon in Tower Room 402, Central Pattee Library

News in Brief

Adult Children of Alcoholics

This support/discussion group will meet at University Park campus every Thursday in March from noon to 1 p.m. in the Harshbarger Room of the Eisenhower Chapel. No prior registration is required, and there is no cost.

All faculty, staff and students are welcome.

The

ARTS

AT PENN STATE

Dress rehearsal

Ruth (Cynthia Baldessaro) and Maria (Frances Foster) discuss the death of an infant in the play *A Raisin in the Sun*, directed by Charles Dumas, associate professor of theatre arts. The Penn State University Resident Theatre Company production ends March 1. For tickets, call the Arts Ticket Center at (814) 863-0255.

Flute and percussion duo

The Armstrong Flute and Percussion Duo, consisting of **Dan C. Armstrong**, professor of percussion, and **Eleanor Duncan Armstrong**, associate professor of flute, will perform a free recital of works for various combinations of flutes and percussion instruments at 2 p.m. Sunday, March 2, in the School of Music Recital Hall on the University Park campus.

Featured will be the world premiere of a new work by University of Texas composer **Dan Welch**. Assisting the duo will be local professional percussionist Victoria Daniel.

Martha Reeves and The Vandellas to perform

Motown legend Martha Reeves and The Vandellas will star in "Ain't Misbehavin'" at 8 p.m. Wednesday, March 5, and Thursday, March 6, in Eisenhower Auditorium on the University Park campus. The concert continues the Bright Lights series sponsored by the Center for the Performing Arts.

Martha Reeves and the Vandellas, best known for their hit songs "Dancing in the Street," "Nowhere to Run" and "Heat Wave," lead the cast in paying tribute to Fats Waller's music including blues, swing, jazz and stride piano songs. This Fats Waller Broadway musical brings to life the glamour, the spirit and the excitement of the swingin' '30s in Harlem. "Ain't

Misbehavin'" was a success when it opened on Broadway in 1978. It ran for almost four years on Broadway and is the only show in history to win Tony, Drama Critics, Drama Desk, Obie and Grammy awards.

Tickets for general admission are \$32.00, \$27.50 and \$23.50; students \$27.50, \$23.50 and \$20.50. For tickets or more information, contact the Arts Ticket Center, open Monday through Friday, from 8:30 a.m. until 4:30 p.m., at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Bach's Lunch

The Saxophone Ensemble, directed by professor **Dan Yoder** of the School of Music will perform at the free Bach's Lunch concert at 12:10 p.m. Thursday, March 6, in the Helen Eakin Eisenhower Chapel on the University Park campus. The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish. The Saxophone Ensemble consists of 15 saxophone majors from Yoder's studio.

Audience members may take a bag lunch to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Flute Ensemble

The 10-member Penn State Flute Ensemble, directed by **Eleanor Dun-**

can Armstrong, associate professor of flute, will present a free program of chamber music for flutes at 8 p.m. Thursday, March 6, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

Employing a wide range of instruments in the flute family, the ensemble will perform works drawn from the renaissance, baroque, classical and contemporary repertoire.

Odyssey on WPSU

On the March 2 episode of *Odyssey Through Literature* host **Leonard Rubinstein** and **John Fyler**, chair of the English Department at Tufts University, discuss the plight of the poet as historian — or as pandering.

Fyler discusses with Rubinstein his article "Fabrications of Pandarus," which analyzes the Chaucer tale "Troilus and Cressida."

Odyssey Through Literature is produced by the Penn State Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WPSU-91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://juncy.le.psu.edu/comp/lit/odyssey/odyssey.htm>.

Concert and commentary

The Cleveland Duo, joined by saxophonist **James Umble**, will combine musical performance with lively commentary for a free performance at 8:15 p.m. Tuesday, March 18, in Room K-1, Costos Classroom Building on the Penn State Hazleton campus.

The group, consisting of pianist **Carolyn Warner** and violinist **Stephen Warner**, blends well-known classical masterpieces with new compositions. The two have been members of the Cleveland Orchestra since 1979. Umble is associate professor of music at Youngstown State University's Dana School of Music.

A look back

The history of the "largest student-run philanthropy in the world" — Penn State's Dance Marathon — is on display through April in Pattee Library's Penn State Room and main lobby in an exhibit titled "Honoring: Celebrating 25 Years of Dance Marathon." The exhibit, created by the University Archives/Penn State Room, takes a look at not only the dancers, but also the behind-the-scenes work involving more than 1,200 student volunteers. The exhibit includes emotional letters of thanks from families who have benefited from the money raised by the "Thon." Also on display are Dance Marathon buttons from different years, newspaper clippings, and of course, photographs of the dancers themselves. The 1997 Dance Marathon, held Feb. 14-16, raised more than \$1.5 million.

BRYCE JORDAN CENTER

Kiss to appear March 29

The rock group Kiss will appear at The Bryce Jordan Center at 7:30 p.m. Saturday, March 29. Tickets are \$40 and \$28.50 for reserved seating.

Gene Simmons, **Paul Stanley**, **Peter Criss** and **Ace Frehley** were reunited at the Kiss Unplugged session on MTV. Following their successful release of the Kiss Unplugged CD, the band decided to tour. Formed in 1972, Kiss used make-up to gain attention, beginning a legacy lasting almost 25 years.

Collins visits March 30

Phil Collins will appear at The Bryce Jordan Center at 8 p.m. Sunday, March 30. Tickets are \$45 and \$28.50 for reserved seating.

Collins was almost 30 years old when his first single, "In the Air Tonight," became a top 20 hit in the U.S. His history with Genesis is well documented, from their art-rock beginnings to their rise to multi-platinum, stadium-packing status. Collins launched his solo career with "Face Value" in 1981, followed by several others including his new album, "Dance Into the Light." He has won six Grammy Awards.

Sesame Street Live on stage April 1-2

Sesame Street Live "Let's Be Friends" will appear at The Bryce Jordan Center at 7 p.m. Tuesday, April 1, and 10:30 a.m. and 7 p.m. Wednesday, April 2. Tickets are \$13.50 and \$11.50 for adults, \$12 and \$10 for children ages 1 to 10 for reserved seating. There will be an opening night special with all seats priced at \$8.50.

This story teaches kids about helping others and shows them that everyone is different and special in his or her own way.

Upcoming events

■ **March 2:** Metallica with Corrosion of Conformity, 7 p.m. Tickets: \$35.50 and \$25.50 for reserved seating.

■ **March 7-9:** 13th Annual Builders Association Home Show, Friday, noon to 9 p.m.; Saturday, 10 a.m. to 9 p.m.; Sunday, noon to 5 p.m. Admission: \$3, parking free.

■ **March 22-23:** Thruendational Monster Trucks, Saturday, 8 p.m.; Sunday, 2 p.m. Tickets are \$12 for reserved seating.

■ **April 4:** Garth Brooks, 8 p.m. Ticket information to be announced.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, February 28
Kern Graduate Commons, noon, Kern Lobby
Concert titled "Appalachian Spring."
School of Music, 8 p.m., Eisenhower Auditorium. Philharmonic Student Concertos with Pu-Qi Jiang, conductor.

Saturday, March 1
Nittany Valley Symphony, 3 p.m., Eisenhower Auditorium. "The Mysteries of Music" For tickets, phone (814) 863-0255.

Center for the Performing Arts, 8 p.m., Schwab Auditorium, "Los Angeles Piano Quilts." For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Student Recital presents Amanda Siliker, voice.

Sunday, March 2
School of Music, 2 p.m., Recital Hall. "The Armstrong Flute & Percussion Duo" with Eleanor Armstrong, flute, and Dan Armstrong, percussion.

Palmer Museum of Art, 2 p.m. Gallery Talk presents Katherine Bentz on "Italian Baroque Painting at the Palmer Museum."

Odyssey Through Literature, 6:30 p.m., WPSU. Leonard Rubinstein and John Fyler discuss "Fabrications of Pandarus," which analyzes the Chaucer tale "Troilus and Criseyde."

School of Music, 8 p.m., Recital Hall. Student Recital presents Kyle Glaser and Sue Kearney on the saxophone.

Monday, March 3
School of Music, 8 p.m., 122 Music II. Percussion Studio Recital.

Wednesday, March 5
Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Ain't Misbehavin'," through March 6. For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Faculty Jazz.

Thursday, March 6
School of Music, 8 p.m., Recital Hall. Flute Ensemble.

SEMINARS

Friday, February 28
Palmer Museum of Art, 2 p.m., Palmer Lipton Auditorium. Glenn Williamson, curator, on "Allan Sekula and the Documentary Tradition."

Biology, 2:30 p.m., 8 Mueller Laboratory. Vivian Irish on "Genetic Analysis of Floral Development in Arabidopsis."

Economics, 3:30 p.m., 428 Kern. Linda Goldberg on "Employment vs. Wage Adjustment and Exchange Rates: A Cross

On stage

Martha Reeves and the Vandellas will perform in "Ain't Misbehavin'" March 5 and 6 in Eisenhower Auditorium on the University Park campus. For tickets, call (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Country Comparison."

Saturday, March 1

Science, 11 a.m. to noon, 111 Wartik Laboratory. Jeffrey A. Kurland on "The Evolution of the Mind: Speculations from Contemporary Biology Based on the Musings of a Young British-Victorian Naturalist."

Monday, March 3

Continuing and Distance Education and the College of Education's Adult Education Program, 11:45 a.m. to 1 p.m., 502 Keller. Dale A. Moore on "Continuing Professional Education Program for Veterinarians."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Carl Mitcham on "Engineering Morals and Ethics."

Gravity Center, 2 p.m., 339 Davey Laboratory. Domenico Giulini on "Determination and Reduction of Large Deformation." Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. Jim Anderson on "Quantum Monte Carlo."

Philosophy, 4 p.m., 124 Sparks. Richard Lee on "Grasping the Universe: Ordo as the Fundamental Presupposition of Aquinas' Thought."

Tuesday, March 4

Nutrition, 4 p.m., S-209 Henderson. Beverly Lindsay on "Perspectives on International Program Opportunities at Penn State."

Geoscience, 4 p.m., 112 Walker. Martin Slute on "Glares Temperatures Derived from Noble Gases in Groundwater."

Education, 7:30 p.m., Kern Auditorium. George Albee to speak on educational psychology.

Women's Studies, 7:30 p.m., 101 Kern. Temma Kaplan on "Crasy for Democracy: Women in the Environmental Movement."

Wednesday, March 5

Russian and East European Studies, noon, 124 Sparks. Elena Galinova on "Bulgaria in the Nineties: The Rough Road to Changes."

Gerontology Center, 12:15 to 1:15 p.m., The Living Center, 110 Henderson. Anne Edwards on "Employed Caregivers of Cognitively-impaired Elderly Relatives: An Application of Role Theory" and Shannon Jarrott on "Effects of Day Care on Time Estimates of Employed and Non-employed Caregivers."

Center for Women Students, noon to 1 p.m., CWS Resource Room, 120 Boucke. Sab-

rina C. Chapman on "What is meant by a 'chilly classroom climate?'"

Engineering Science and Mechanics, 3:35 p.m., 212 Hammond. Donald E. Vogt on "Physical and Mechanical Properties of Ice."

Physics, 8 p.m., 112 Kern. Carl Wieman on "The Chilling Story of an Atomic Identity Crisis: Bose-Einstein Condensation at 1 Millionth of a Degree above Absolute Zero."

Thursday, March 6

Physics, 3:30 p.m., 101 Osmond Laboratory. Carl Wieman on "Bose-Einstein Condensation in an Ultracold Gas."

Food Science, 4 p.m., 117 Borland Laboratory. Harvey Manbeck, Virendra Puri and Paul Walker on "Collaborative Activities in Food Engineering."

Computer Science and Engineering, 4 p.m., 302 Pond Laboratory. Roldan Pazy on "C++ Library Design for Matrix Computations on High Performance Architectures."

EXHIBITS

HUB Art Alley Cases

Office of International Studies presents "International Festival" through April 6.

HUB Sculpture Corner
"American Gothic Revisited" by Jane Richey, through May 21.

Kern Exhibition Area

Photographic work of David Driscoll, March 4 through April 6.

Kern Flat Cases

Jewelry by Lavelle Piemme, March 4 through April 6.

Kern Tall Cases

Handwoven and handspun items by The State College Weavers Guild, March 4 through April 6.

Palmer Museum of Art

"Dismal Science: Photo Works by Allan Sekula, 1972-1996," through March 16.

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 15.

Zoller Gallery

School of Visual Arts, "Undergraduate Junior Exhibition," through March 28.

Reflects an international perspective.

FEBRUARY 28 - MARCH 9

Bookshelf

Christine Avery and Diane Zabel, social science librarians in the University Libraries, have written *The Quality Management Sourcebook: An International Guide to Materials and Resources* (London: Routledge, 1996). The sourcebook traces the evolution of quality management, examines its applications in manufacturing and non-manufacturing settings and explores its future. It is the first in-depth, international guide to the most useful material (including books, articles, software and training materials) and sources of information. It will be of interest to people in industry, government and academia. The book can serve as a desk reference for organizations implementing or actively involved in quality management.

G.J. Babu, professor of statistics, and Eric D. Feiglson, professor of astronomy and astrophysics, are

co-authors of a new book titled *Astrostatistics*, published by Chapman and Hill.

Astrostatistics is the first comprehensive overview of the emerging field of the interface between astronomy and statistics. The book discusses the vast range of challenging statistical problems that modern astronomers encounter. The first half of the book introduces the subject of astronomy to statisticians and the subject of statistics to astronomers. The second half of the book is organized by statistical topic. Each chapter provides examples of problems arising in recent astronomical research and emphasizes challenging methodological issues. An extensive bibliography assists readers in pursuing the issues in more detail.

Simon Bronner, distinguished professor of folklore and American studies and coordinator of the Amer-

ican studies program at Penn State Harrisburg, is the author of *In Popularizing Pennsylvania: Henry W. Shoemaker and the Progressive Uses of Folklore and History*, the first full-length biography of Shoemaker.

Shoemaker (1880-1958), who devoted his life's work to preserving Pennsylvania's cultural and natural heritage, lives on in the legends he helped to promote, such as that of the Indian princess "Nittany Nee," for whom Central Pennsylvania's Nittany Mountain is supposedly named. He also was instrumental in creating Pennsylvania's noted system of parks and forests and the Pennsylvania Historical and Museum Commission.

Bronner's book, published by The Penn State Press, includes never-before-available private papers and interviews with many people who knew Shoemaker.

Highlight on Undergraduate Education

High schoolers get introduction to college life

By KAREN WAGNER
Public Information

Promising young high school students are conducting research at Penn State and getting familiar with academic life as a result of the Minority Research Apprenticeship Program (MRAP) in the College of Health and Human Development.

Each year, academically promising 11th- and 12th-grade students with an interest in the biomedical sciences compete for a place in the eight-week summer program that for many, leads to continuing research throughout college and graduate school.

"Each student in the program is assigned a faculty mentor who is conducting research over the summer and attends weekly research seminars," Daniel Trevino, assistant dean for minority programs for the College of Health and Human Development, said. "This year we expect to be able to accept 10 students and two high school teachers who will also help promote careers in science research to other students."

Approximately 63 percent of the participants enroll and continue their research at Penn State. Some continue at other universities.

Monique Jones and Renee Clemente of Philadelphia describe their experiences as life shaping.

"I already knew I wanted to attend Penn State," said Jones, who heard about the program from her West Philadelphia High School guidance counselor. Her research in MRAP focused on sports medicine and engineering — two fields she was interested in pursuing in college. Under the tutelage of Peter Cavanaugh, professor of locomotion studies and biobehavioral health, she was able to test the waters working as an apprentice at the Center for Locomotion Studies. Jones, who is now a freshman, is pursuing her studies in engineering at Penn State, and continues to work at the center's lab on a part-time basis.

Hands-on learning

Lorraine M. Mullinger, program coordinator for the Center for Locomotion Studies, left, assists research apprentice Monique Jones.

Photo: Greg Grieco

"Over the summer I had the opportunity to work with computers. It helped me decide that becoming a computer engineer is something I want to do," said Jones, who advises interested students to "study hard."

Jones is following her own advice. Hard work paid off when she made the dean's list last fall.

"Nationally, minorities continue to be severely underrepresented in all health professions that require a bac-

calaureate or higher degree," Trevino said. "MRAP is specifically designed to stimulate entries in these fields and encourage students to work toward professional careers in health."

Renee Clemente is another program success. She first heard about MRAP when it was announced over the loudspeaker at her Upper Merion High School.

"It seemed like a good opportunity," she said. "I had been accepted at Penn State in the fall, but my parents couldn't afford to send me in the summer." Clemente applied, was accepted and participated in a food study in Penn State's nutrition lab where she learned to do research under the guidance of Barbara Rolis, professor of

nutrition and holder of the Guthrie chair in nutrition.

"It was really a good experience — the greatest thing ever," said Clemente, who is "definitely interested" in pursuing a graduate degree.

Applications for MRAP were mailed in January to 150 Pennsylvania high schools with high minority enrollments. Students must apply by March 1 and are selected based on their interest in research, their high school grade point average, scholastic aptitude scores and the recommendations of high school teachers and counselors. Preference is given to students who plan to attend Penn State.

To date, Penn State has enrolled 60 out of 98 MRAP participants in baccalaureate degree programs. One former student completed a master's degree in audiology. Others are in the process of completing master's degrees in engineering and education. One has entered optometry school and three have entered medical school. Three former participants have entered doctoral programs in clinical psychology and neuroscience, and one has completed a Ph.D. in microbiology and immunology.

"The National Institutes of Health, which provides the bulk of the funds for MRAP, recognizes that a large segment of our population, especially those groups that are low income and reside in urban areas, suffer disproportionately from death and illness," Trevino said. "MRAP gives the young people from these areas an incentive to begin preparing for a professional career that will enable them to help their home communities. Penn State also benefits from the enthusiastic and capable research accomplishments of these young scientists."

Promotions

Staff

Lori Baney, associate director in Division of Development and Alumni Relations.

Craig D. Boughton, manager, Facility and Material Services in Continuing and Distance Education.

Helen G. Brennan, director, annual giving in Division of Development and Alumni Relations.

L.S. Boor, computer support facility coordinator in Research and Graduate School.

Jacqueline M. Calvin, network coordinator at Penn State Schuylkill campus of the Capital College.

Richard L. Clark, staff assistant VI in College of the Liberal Arts.

Rachael A. Diamond, manager, Financial and Administrative Services in Continuing and Distance Education.

Allen Fasnacht, nurse manager at The Hershey Medical Center.

Tracy L. Gross, computer support assistant in Continuing and Distance Education.

John W. Hanold, proposal and grant assistant in Research and Graduate School.

Elizabeth M. Henson, staff assistant V in Sports Medicine.

Kathleen K. Hevey, staff assistant VII at Penn State Great Valley.

Todd F. Holbrook, network support specialist in Research and Graduate School.

Kathryn L. Holsopple, staff assistant V in Continuing and Distance Education.

Carol A. Julg, staff assistant IV at Penn State Abington College.

Corry L. Kutzinger, staff assistant VIII in College of Arts and Architecture.

Carol Lewis, student aide adviser in Vice Provost and Dean for Enrollment Management and Administration.

Gengrong Lin, technician/research at The Hershey Medical Center.

Sharon Ludwig, staff assistant VI at The Hershey Medical Center.

Holly A. Mack, research support technician II in College of Health and Human Development.

Jack E. McMahon, associate director I in Division of Development and Alumni Relations.

Amy L. Nace, staff assistant VI at The Hershey Medical Center.

Nancy L. Norris, staff assistant VI in Division of Development and Alumni Relations.

Steven O. Pierce, senior support and training analyst in Computer and Information Systems, Center for Academic Computing.

Carolyn Saona, student aide adviser in Office of Vice Provost and Dean for Enrollment Management and Administration.

Laurie M. Salepeck, information technology associate in the Eberly College of Science.

Sherry L. Schnarrs, staff assistant V in Sports Medicine.

Kelly L. Seesholtz, staff assistant V at The Hershey Medical Center.

Jodi L. Stover, administrative assistant I in Research and Graduate School.

Suzanne E. Trosko, senior data management analyst at The Hershey Medical Center.

Kathy L. Tyson, research support associate at The Hershey Medical Center.

Adora A. Way, student affairs specialist in Business Administration.

Partnership between Dance Marathon, Four Diamonds Fund is couple's legacy

The founders of the Four Diamonds Fund, inspiration for the nation's largest student-run philanthropic event, have been named honorary alumni of Penn State. Since its beginning in 1972, the Four Diamonds Fund has received more than \$10 million, including the more than \$1.5 million raised by this year's Dance Marathon.

It all started a quarter of a century ago when a group of fraternity and sorority students decided to hold a dance marathon to raise money for charity. That same year, Charles and Irma Millard lost their son Christopher to leukemia. In his memory, they set up a fund to assist the families of children suffering from cancer and to promote education and research on pediatric cancer at The Hershey Medical Center.

The Millards named the Four Diamonds Fund for an essay written by their son shortly before his death. Christopher wrote about the exploits of a knight named Sir Millard who earned the four diamonds of courage, wisdom, honesty and strength in order to gain his freedom. Early on, the Millards raised money for the fund themselves.

"They went to friends and neighbors, small businesses and community organizations, and raised about \$6,000 that first year," Dr. John E. Neely, chief of pediatric oncology/hematology at Hershey, said. "We didn't have many pediatric cancer patients back then, so whenever somebody had bills not covered by insurance, that money paid them."

The fund grew slowly, aided by an annual mailing to past contributors. By 1976, the fund earned about \$40,000, almost all from small contributions.

The Dance Marathon also grew slowly, raising money for some local charities. In 1977, the Dance Marathon's charity of choice was The Four Diamonds Fund.

"In that first year, they almost doubled the fund," Neely said. The total has grown each year and the event is now regarded as the largest student-run philanthropy in the nation.

The Millards are a strong driving force behind this success. They have been to countless Dance Marathons since 1977, inspiring those involved.

Then 97

Tod Frankenstein creates a baby powder cloud in preparation for the dancers' quick bathroom break and rubdown during the Dance Marathon. This year, the event raised more than \$1.5 million for the Four Diamonds Fund at The Hershey Medical Center.

Photo: Greg Grieb

"The dancers thank us for starting the fund and for being there, but we feel grateful to them," Irma Millard said in a telephone interview from her home in Port Townsend, Wash. "To us it's a pleasure when they're with all of those young people. They're just marvelous."

When the Millards started the Four Diamonds Fund, they hoped it would make a difference. At the 25th anniversary celebration this month where they were named honorary alumni of Penn State, they got to see just how big a difference it has made.

"There were a lot of people there who we first saw as bald, sickly, frail children. Now, they're all grown up, healthy, with full heads of hair and doing very well," Irma Millard said. "I think now we're having more successes than failures."

Neely agrees.

"In 1975, the survival rate for children with cancer was about 70 percent. We've had an almost linear increase in survival of 1 percent to 1.5 percent a year, and now the overall survival rate is about 80 percent to 85 percent," he said.

Neely estimates that roughly 1,000 children have been treated for cancer at Hershey, with half still receiving some treatment. Between 200 and 250

have died, and the rest are considered to have been successfully treated.

The doctors at Hershey are working on getting the survival rate even higher, and the Four Diamonds Fund is helping to make that possible.

The Millards have had an indelible effect on the overall view of how children are treated," Neely said. "They have been like bulldogs, relentlessly following the mission of the fund, which is that this money goes to children with cancer at The Hershey Medical Center."

Charles Millard taught music at Elizabethtown High School from 1959 until he retired in 1984. Irma Millard taught classical ballet at Elizabethtown College, the Elizabethtown Studio of Fine Arts, the Lancaster Institute of Fine Arts and the Dancers Workshop. Former residents of Elizabethtown, the Millards moved to Lancaster in 1979 and to Port Townsend, Wash., in 1994.

The Honorary Alumni Awards have been given by the Penn State Alumni Association since 1973 to honor people who are not graduates of Penn State, but who have made significant contributions toward its welfare, reputation or prestige. With the naming of the Millards, Penn State now has 48 honorary alumni.

EMPLOYEE BENEFITS

A regular column provided by the Office of Human Resources

Tax-deferred annuities

As the deadline for filing federal income tax returns approaches, faculty and staff are reminded that tax-deferred annuities (TDAs) provide an excellent opportunity to help individuals save for the future, while sheltering some of their income from current federal income taxes. Taxes on the amounts deposited, as well as the interest earned or appreciation realized, are deferred until the money is withdrawn, usually at a more favorable tax rate.

All full-time faculty and staff and part-time faculty and staff enrolled in either of the University's retirement plans may elect to contribute additional money to a TDA as a supplement to their basic retirement plans. Participation in a TDA may begin at any time. Contributions are made through payroll deductions, and a minimum contribution of \$25 per month or \$12 per biweekly pay is required. Contributions also may be expressed as a percentage of gross pay rather than a fixed dollar amount. Part-time faculty and staff must express their deductions as a percentage of pay.

Previously, TDA participants were restricted to only one election of a contribution amount or percentage in any one calendar year. Recent legislation lifted that restriction and participants now are free to change the amount of the TDA contribution as often as they choose. Because of the tax advantages of TDAs, the Internal Revenue Service limits the total amount that may be contributed each year.

The Employee Benefits Division provides a Tax-Deferred Annuity Summary, which includes more information about the five companies authorized to offer TDAs at Penn State, and the investment options. The summary is available from the Employee Benefits Division and also can be accessed at the Office of Human Resources web site <http://www.ohr.psu.edu>.

If you have specific questions regarding your eligibility to participate, your maximum annual contribution, IRS regulations or changes in TDA companies, contributions, etc., contact the Employee Benefits Division at (814) 865-1473 or e-mail ben@psu.edu.

Private Giving

Software donation bolsters engineering programs

Penn State Harrisburg students are now using the latest estimating computer software program which takes the guesswork and labor out of the complicated project-bidding process, thanks to a donation from Credomet Inc., a Maryland-based company.

Michael J. Tyler, principal of Credomet, recently donated "Credo," a one-of-a-kind interactive communication software network to Penn State Harrisburg. This software makes the bidding process easier and will keep students in the Structural Design and Construction Engineering Technology Program up to date. The gift to the college is valued at \$50,000.

Credo, developed by Credomet Inc. of Baltimore, enables

general contractors to control the basic module, giving them access to all data in the system. Using the basic module, the general contractor and project managers can break up the construction project into its various jobs and send each out for bids from subcontractors and suppliers. With a few keystrokes, the contractor can send the request for bid to literally thousands of potential bidders using the Credo system.

Subcontractors and suppliers use the support module of the Credo system, which allows them to receive bid requests and respond. The bid is returned electronically and can be tracked and evaluated by the general contractor. The software program analyzes and collates the bids, collecting them and allowing hand-entered bids.

■ Women's History Month

Variety of activities planned at all University locations

Beginning next week, Penn State will celebrate Women's History Month with lectures, films, discussions, readings and receptions at campuses across the state. The following programs are open to faculty, staff, students and the community.

ALTOONA

— March 3 through May 12: Light Bearers: Terra Cotta Tiles and Sculptures exhibit by **Terry Johnson** in the Sheetz Gallery on campus (call for gallery hours).

BEAVER

— Tuesday, March 4: At 7:30 p.m., a "History Profile on Margaret Sanger" by **Robert Szymczak**, professor of history, in Room 16. **Study Learning Center.**

— Wednesday, March 5: Speaker **Anita Sincic-Maler** from the Pennsylvania Education Association on Eating Disorders will discuss eating disorders at 8 p.m. in Harmony Hall Lobby.

— Tuesday, March 18: At 8 p.m. in the Student Union Lounge, Citizens Against Crime Self-Defense Seminar.

— Wednesday, March 19: Maestrom Jazz Percussion Ensemble will perform at 7:30 p.m. in the Study Learning Center Auditorium.

— Thursday, March 20: Olympic Gold Medalist **Julie Smith**, infielder for the U.S. Women's Softball Team, will speak at 7 p.m., Study Learning Center Auditorium.

— Monday, March 31: Speaker **Lisa Patch** from the Family Planning Research Office on "Rage: Women's Hospital," will discuss "Women's Health Issues: Update on Emergency Contraception" at 8 p.m., Harmony Hall Lobby.

— Date to be announced: "Aging Women in the Media" talk given by **Jane Crawford**.

BERKS

— Wednesday, March 19: A free lecture, "Women and Race Relations in Early Pennsylvania," by **Alison Duncan** will discuss at 1 p.m. in the Perkins Student Center Theatre.

DELAWARE COUNTY

— Thursday, March 6: A rousing celebration of music, dance and film, "Sisters with Voices," explores Afro-American history through the triumphs of the incredible divas of black music; 12:30-1:30 p.m., Large Conference Room, Commons.

— Monday, March 17: **Lillian Green** from the North Institute will focus on the history of the Civil Rights era as a grassroots movement through photography and poetry. Adapted from "Through the Lens: Civil Rights and Film and Photography," 12:30-1:30 p.m., Student Lounge, Main Building.

— Wednesday, March 19: "Body Image/Body Dissatisfaction: The Search for the Perfect Body" at 12:30 p.m. in the Large Conference Room, Commons; a look at the Reinforce Center — which has made a difference in the lives of thousands of women who have struggled with their body image.

— Thursday, March 20: **Wanjiru Kamau**, formerly of the Delaware County Campus Student Life Office, shares her stories from interviewing Akikiyu women of Kenya in the fall of 1996 in a talk titled "Menopause and Sexuality: The Akikiyu Women of Kenya," 11:30 a.m. to 1 p.m., Large Conference Room, Commons.

— Thursday, March 27: "Paris in the Spring Time," the Women's Commission luncheon, at 11:30 a.m. to 1 p.m., Large Conference Room, Commons. Join the Commission as it announces the Delaware County campus "Woman of the Year" award.

DUBOIS

— Wednesday, March 5: **Josephine Randolph**, a senior LAS major with a history minor at DuBois campus, will present the story of Ida M. Tarbell, the nation's first woman investigative reporter who played a key role in uncovering the Standard Oil monopoly which spurred ground-breaking anti-trust legislation in the early 1900s. The play is based on Randolph's original research; noon to 1 p.m., Hiller Building Lunch Lounge.

— Saturday, March 5: Introduction to the Internet, a beginners' seminar. Learn to surf the Net while learning more about women and their many-faceted roles around the world and throughout time. The seminar is set for 9:30 a.m. in 103 Swift Building with content geared to women's interests in celebrating Women's History Month. Preregistration is not required but appreciated. Contact: **Catherine Lee** at (614) 375-4756.

— Thursday, March 20: **Diana Hume George**, author and professor of English and women's studies at Penn State

Erie, The Behrend College, will present a reading of her original work beginning at 3 p.m. in Room 148 Sneal.

— Thursday, March 27: "Weathering the Storm: Women's Lives During the American Revolution," presented by **Mary Ann Barber**, instructor in history and political science at the University of Pittsburgh-Titusville, at 1:30 p.m. in the Small Conference Room.

— Monday, March 31, from noon to 1:30 p.m.: The Book Discussion Group is reading Margaret Alwood's *The Edible Woman* for a round table discussion in the Hiller Building Lunch Lounge.

— In addition, to celebrate the month, head Librarian **Catherine Lee** will mount a photo display, "DuBois Campus Women Across the Years," in the library featuring photos of women faculty, staff, and students from the 1940s on. She is developing the display from photo archives housed in the library and in university relations.

GREAT VALLEY

— Thursday, March 6: Film on women's issues from noon to 2 p.m. in room 230; brown-bag lunch.

— Monday, March 24: Luncheon from noon to 2 p.m. featuring speaker **Sophia Wisniewska**, Administrative Fellow at University Park. She will discuss "On the Edge of Time: Russian Women Creating the Next Millennium."

PENN STATE HARRISBURG

— Monday, March 5: Lectures on Social Issues (All in Hallway Lounge), **Susan Rankin**, senior diversity planning analyst, will give three talks: "Coming Out to Your Family" at noon; "Recreation/Athletics and the Gay Athlete" at 1 p.m.; and "Hierarchy of Oppression" at 4 p.m.

— Wednesday, March 5: **Allida Black**, assistant professor of history at the University of Baltimore, will discuss "Turf Battles in the White House: The Roosevelts, Reagans and Clintons and the Rise of the Modern Presidential Couple," at 8:30 a.m., Penn State Downtown Center.

— Wednesday, March 19: **Ntozake Shange**, noted playwright, novelist, poet, performer and author of the play "For Colored Girls Who Have Considered Suicide (The Rainbow is Enuf)," will give a talk/round 3:30 to 4:30 p.m. and again from 7 to 8 p.m. in the Gallery Lounge.

— Thursday, March 20: At Penn State Harrisburg Eastgate Center **Kenneth C. Wolensky** will discuss "Creating a Water Movement: The ILGWU (International Ladies Garment Workers Union) in Northeast Pennsylvania, 1944-1963" at noon.

— Thursday, March 20: Gallery talk and reception in the Penn State Harrisburg Gallery Lounge by artist **L. Beatriz Armitage**, 12:30-1:30 p.m. on display from 12:30 p.m. to 4:30 p.m. through March 21. The exhibit is titled "Appalachian Years."

— Tuesday, March 25: Reception commemorating the Penn State Harrisburg Alice Marshall Collection of women's history, Swalera Building, Main Lobby.

— Wednesday, March 26: **Frederic Baird**, director of Penn State Harrisburg's Women's Enrichment Center, will talk about "Community Women's Shared Voices" at 2 p.m. in the Gallery Lounge.

NEW KENSINGTON

Penn State New Kensington's "Celebration of Women" has been expanded to include students from area high schools. The theme for the 1997 celebration is "Educating Women: 21st Century Career Paths." On March 26, five New Kensington faculty members will help students explore career paths in health, science and technology. The presenters, all of whom are women, will provide information on employment forecasts and professions in medical technology, chemistry and engineering. In addition to the workshops, students have an opportunity to win awards for papers and essays, posters and photographs that explore the lives and history of women.

At noon, the Commission for Women will present awards to three exceptional women who have enriched their respective communities: an alumna, a community leader and a student leader will be recognized at a special luncheon. For information, call **Catherine Herbert** at (412) 339-6029.

UNIVERSITY PARK

— Sunday, March 2: Project Growth, a student organization sponsored by the Office of the Vice Provost for Educational Equity, will sponsor a series of four films and discussions regarding women's issues in America. The first film will be "Visions of the Spirit: A Portrait of Alice Walker," at

7:30 p.m. in 268 Willard. For more information contact **Ellen Brodlo** (614)865-0799. Other films will be shown on March 23, April 6 and April 13.

— Monday, March 4: The third speaker in the Women's Studies Feminist Scholars Series, **Temma Kaplan**, professor of women's studies and history, at SUNY Stony Brook, will present, "Crazy for Democracy: Women in the Environmental Movement" at 7:30 p.m. in 101 Kern.

— Wednesday, March 5: The Center for Women Students Brown Bag Lunch Series, "Classroom Climate for Women," presented by **Sabrina C. Chapman**, director of the center, from 1 to 1 p.m. in the CWS Resource Room, 120 Boucke.

— Thursday, March 6: Women's Studies Brown Bag Video Series "The Original Gloria Steinem." A personal interview with Gloria Steinem, speaking about her life, the choices women make, and how there is no right choice for every woman, noon to 1 p.m., 12 Sparks.

— Tuesday, March 18: Center for Women Students Brown Bag Lunch Series film, "Susan B. Anthony Slept Here." Correspondent Lynn Sherr takes viewers on a trip across the nation to visit landmarks and places that celebrate famous American women, including Bae Dirikson-Zaharias, Annie Oakley, Georgia O'Keeffe, Bessie Smith and others, noon to 1 p.m. in the CWS Resource Room, 120 Boucke.

— Tuesday, March 18: The MFA program presents **Diana Hume George**, English and women's studies, who will give a reading from her new book of essays, *The Lonely Other: A Woman Watching America*, 7:30 p.m., in the HUB Gallery.

— Wednesday, March 19: The sixth speaker in the Women's Studies Brown Bag Series, **Nalini Krishnakurthy**, instructor in women's studies, will present: "Legacy of the Past, Dreams of the Future," noon to 1:30 p.m., 12 Sparks.

— Thursday, March 20: Women's Studies Brown Bag Video Series, "The Role of the First Lady." A moderator questions four panelists about what they think the role of the First Lady has been and what they think it should be, noon to 1 p.m., 12 Sparks.

— Monday, March 24: The Center for Women Students Sexual Assault Awareness/Prevention film, "She Cried No," a recent movie, which gives a realistic look at the impact of acquaintance rape on the life of a first-year college student, her friends and her family, 7 p.m. in 102 Thomas.

— Wednesday, March 26: Center for Women Students Brown Bag Lunch Series, "The Power of the Pen: Susan B. Anthony, Gay, Bisexual, Free Week film, For Better or Worse: Same-Sex Marriage," features interviews with same sex couples, noon to 1 p.m. in CWS Resource Room, 120 Boucke.

— Wednesday, March 26: **Lori Ginzberg**, associate professor of history and women's studies, presents "Sexuality and Citizenship: Women's Rights and the American Revolution." 7:30 p.m. in 102 Kern.

— Wednesday, March 26: "Female Circumcision: Rite of Passage or Genital Mutilation?" at 7 p.m. in 123 Chambers.

— Thursday, March 27: Women's Studies Brown Bag Video, "The American Experience 2. Ida B. Wells: A Passion for Justice." Ida B. Wells was an activist and journalist. The program is at noon in 12 Sparks.

— Thursday, March 27: **Lynda Goldstein** and **Virginia Smith** will present "Martha Stewart: Domestic Dominance as Cultural Icon," at 4:50-5:30 p.m., 102 Weaver.

— Thursday, March 27: The fourth speaker in the Women's Studies Feminist Scholars Series, **Mary Hill**, presidential professor of history, Bucknell University, will present: "Charlotte Perkins Gilman: A Woman's Struggle with Womanhood," 7:30 p.m. in 101 Kern.

— For more information, contact **Monica Barczak** in the Women's Studies Program at JA510@psu.edu or by phone at (614) 863-9806, or **Cindy Doran** in the Center for Women Studies at (614) 863-0225.

WORTHINGTON SCRANTON

— Tuesday, March 18: The Penn State Worthington Scranton Cultural Events Series will feature recording artist and performer **Barb Martin** in a program titled "Women in Blues" at 7:30 p.m. in the Campus Study Learning Center. Other events will be announced in March.

YORK

— Monday, March 3: The York campus will host a special dinner beginning at 5:30 p.m. and featuring **Blackella V.A.**, artist **Martha Dill** and **Barb Martin**. The dinner will feature a narration of her experiences as a woman in the world of art. Dinner is \$8. Dillard's exhibit is open from 7 to 9 p.m. Call **Tom Schaefer** at ext. 605 for reservations.

Engineering seeks head of corporate relations and outreach

The College of Engineering is conducting a search for director of corporate relations and outreach. The director will serve as the administrator of the Office of Corporate Relations and Outreach for the college, with responsibilities for overseeing Continuing and Distance Education activities and programs; and directing, organizing and coordinating corporate interactions within the college. The person in this position also will serve as an advocate and facilitator for corporate/university partnerships; create economic development and technology transfer opportunities; promote college research and related facilities; assist college faculty members and departments in the development, design and production of conferences, workshops, credit/non-credit

courses and degree programs delivered by traditional classroom instruction and/or media-based methods; work with other University Continuing and Distance Education units in market research, client development, program marketing and delivery; and manage the corporate relations and outreach office functions. The director reports to the associate dean for Graduate Studies and Research.

The candidate should have a master's degree in engineering, education and training or technology management preferred; familiarity with Penn State's distributed campus structure, especially as it relates to Continuing and Distance Education and experience in marketing and delivery of Continuing and Distance Education programs. In addition, the can-

didate also should have experience in initiating, developing and promoting industry/university/government relationships involving cooperative research opportunities, technology transfer and economic development. A minimum of five to seven years combined experience in the areas mentioned above is required.

Applications will be accepted until March 20. To apply for this position, submit a cover letter and resume to: **Laura E. Frye**, manager, College of Engineering Human Resources, 101 Hammond Building, University Park, Pa. 16802. Penn State is an equal opportunity employer. Women and minorities are encouraged to apply.

Artist at work

Hisakaki Wake, a comparative literature graduate student and a member of the Japanese Friendship Association, made paper cranes and flowers to demonstrate the art of origami at the International Arts and Crafts Fair at the Hetzel Union Building on the University Park Campus Sunday, Feb. 23.

Administrative Fellows applications deadline near

The deadline to apply for the 1997-98 Administrative Fellows Program is rapidly approaching. Applications are due March 1.

Three fellows are being sought, one to serve under the mentorship of **John A. Brighton**, executive vice president and provost, one to work with **Gary C. Schultz**, senior vice president for finance and business, and the third to serve with **Robert E. Dunham**, senior vice president and dean of the Commonwealth Educational System.

The Administrative Fellows Program provides career development opportunities for women and minority faculty and staff. Fellows

will have an opportunity to broaden their perspectives and experience in higher education administration.

For more information about the program, please see page 11 of the Jan. 15 *Intercom*.

Applications for the Administrative Fellows Program are available from the Office of Human Resources at (814) 863-6188 or at the OHR Web site under "What's New" at URL <http://www.ohr.psu.edu>. Applications should be returned to the Office of Human Resources, Box 6, Rider Building, University Park, as soon as possible, but no later than March 1. For more information, call **Robert L. Kidder** at (814) 863-4606.

LGB equity panel seeks members

The Commission on Lesbian, Gay and Bisexual Equity in the Office of the Vice Provost for Educational Equity is actively seeking nomination for membership for the 1997-98 academic year.

The commission serves as an advisory group to the vice provost for educational equity on matters affecting the climate for gay, lesbian and bisexual members of the Penn State community. Its purpose is to foster a positive working and living environment for all members of the academic community regardless of sexual orientation. The commission's membership includes representation from all

employee classifications, as well as graduate and undergraduate students. Members are appointed to three-year terms.

The commission values diversity in its membership and is actively seeking nominations from culturally, racially and ethnically diverse populations. Self-nominations are encouraged.

Nominations forms may be obtained from the commission office, 313 Grange Building, or by calling (814) 863-8415. Nominations must be returned to the commission office no later than March 17. For more information, please call (814) 863-8415.

Award

Journal of Buddhist Ethics is honored as the "Most Popular Web Resource"

In a recent competition to name the "Best of 1996 Social Sciences, Humanities and Asian-Pacific Studies World Wide Web Resources," the *Journal of Buddhist Ethics* won the "Most Popular Web Resource" for the third consecutive year. Additionally, it was also voted the "Most Elegant WWW Resource" and finished third in the "Highest Data Quality WWW Resource" and "Best Structured WWW Resource" categories. Overall, it received 22 percent of all votes cast.

The *Journal of Buddhist Ethics*, the first academic

journal dedicated entirely to Buddhist ethics, is co-edited by **Charles Frishman**, professor of religious studies at Penn State, and **Damien Keown** of Goldsmiths College, London, and **Wayne Husted** from Penn State. The journal, published electronically only, functions as a traditional scholarly journal.

The journal has also recently received an honorable mention award in the "Best Educational Site" category in "The Best of the Web" competition; and in December was awarded a "Medaille d'Or for Web

Site Excellence" award by a World Wide Web evaluating site in England. It was one of only four religious sites designated. The site's URL is <http://www.psu.edu/jbe/jbe.html>.

In addition, in the "Best of 1996 Social Sciences, Humanities and Asian-Pacific Studies World Wide Web Resources" competition, Penn State's Australia-New Zealand Study Center garnered two second place awards. The competition is sponsored by the Combs Computing Unit of the Australian National University.

Penn Staters

Abhay Ashtekar, holder of the Eberly Family Chair in physics and director of the Center for Gravitational Physics and Geometry, presented plenary lectures at seven international conferences. His topic was "Geometric Issues in Quantum Gravity" at the International Conference of Geometric Issues in Science in Oxford, England. At the Erwin Schrödinger International Institute for Mathematical Sciences in Vienna, Austria, he presented "Scientific Director of the Workshop on Mathematical Problems of Quantum Gravity." At the Institute of Theoretical Physics of the University of Vienna, Austria, his topic was "Quantum Theory of Geometry." At the Max Planck Institute for Gravitational Physics in Potsdam, Germany, he held seminars on "Asymptotic Structure of Symmetry Reduced General Relativity" and "Quantum Theory of Geometry." At the Schrödinger Institute of Vienna, Austria, he presented seminars on "Probing Quantum Gravity Through Mid-Superspaces" and "Geometry of Quantum Mechanics."

Eunice N. Askov, professor of education and director of the Institute for the Study of Adult Literacy, organized, chaired and made a presentation at an all-day preconference institute of the International Reading Association's World Congress held in Prague, Czech Republic.

H.L. Barnes, distinguished professor of geochemistry and director of the ore deposits research section, recently gave the inaugural lectures of the new Distinguished Lecture Series established at the Indian Institute of Technology at Bombay, India. He presented a series of lectures on "Hydrothermal Ore-Forming Processes" and an institute colloquium on "Providing of Metals—The Search for Ores."

William L. Boyd, professor of education, served as a visiting scholar at the University of Wales at Cardiff, U.K., and presented several invited lectures across Europe and Australia during that time. He was the keynote speaker for British Columbia's Forum on School Choice in Vancouver, B.C., and also served as the keynote speaker for the National Conference of the Australian Council for Educational Administration and the Australian College of Education in Perth, Western Australia.

Paul Carrick, adjunct associate professor of philosophy in the Division of Humanities at Penn State Harrisburg, has been appointed visiting professor of philosophy in the Department of Humanities at the Penn State College of Medicine, Hershey Medical Center.

A. Welford Castleman Jr., Evan Pugh professor of chemistry, was invited to participate in a Nobel Symposium in Björkholm, Sweden. His lecture was titled "Femtochemistry and Femtobiology: Ultrafast Reaction Dynamics at Atomic-Scale Resolution." In Leeds, England, at the 14th International Symposium on Gas Kinetics, he presented the opening plenary address titled "Dynamics of Intrachain Reactions via Ultra Time Resolved Spectroscopy."

George S. Dulikravich, associate professor of aerospace engineering, has been elected a Fellow of the American Society of Mechanical Engineers. He also has been recognized as an honorary member of the Asociación Argentina de Mecánica Computacional and has received an ALCOA Faculty Fellow Research Award for 1996/97.

Terry Ehterton, distinguished professor of animal nutrition, gave an invited talk on "Different Strategies to Improve Meat and Milk Production" at a symposium on Gene and Biotechnology in Animal Production and Meat Processing in Lillehammer, Norway.

Hattie M. Faison, University physician at University Health Services, recently passed the 1996 Certifying Board Examination. She is now certified as a diplomate in internal medicine by the American Board of Internal Medicine. Certification by the ABIM recognizes excellence in the discipline of internal medicine, its subspecialties and areas of added qualifications.

Eric D. Feiglson, professor of astronomy and astrophysics, was invited to lecture on "The Emerging Field of Astrostatistics" at the Sydney International Statistical Congress in Australia.

Richard Fiene, professor-in-charge of early childhood education at Penn State Harrisburg, was one of 15 experts in his field invited to attend a national meeting on "Protecting Children from Harm: The Role of Child Care Licensing Standards" in Washington, D.C. The purpose of the "think tank" was to identify key licensing standards that protect children from harm while in child care facilities and to make recommendations to the president and Congress. Fiene's latest research into identifying core national health and safety standards was used as the measurement tools for formulating the recommendations.

Richard Fitzsimmons, director of the library at the Worthington Scranton campus, was one of 25 people invited from the United States and Europe to present a paper at the Libraries, Books, Ideology During the Second World War (1939-1945) conference, sponsored by the National Library of Latvia. Fitzsimmons' presentation, "Intellectual Freedom, Librarianship and the Democratic State," dealt with censorship and the role librarians play in supporting intellectual freedom.

Gregory L. Geoffroy, dean of the Eberly College of Science, was honored as an alumni Fellow by the University of Louisville, Ky., where he earned his bachelor of science degree with honors in 1968.

Jack Gido, director of PENNTAP (Pennsylvania Technical Assistance Program) received a special recognition award from the National Technology Transfer Center for leading a consortium of nine similar programs in four states in developing a national industrial extension training curriculum.

Drew Hyman, professor public policy and community systems, and **Mollie Van Loon**, graduate student in rural sociology, presented the paper "Leadership Self-Efficacy, Perceptions of Power Structures and Community Participation: An Interactionist Hypothesis" at the International Conference of the Community Development Society in Melbourne, Australia.

Ronald G. Iacocca, research associate in the Department of Engineering Science and Mechanics, is the recipient of the 1996 American Institute of Mining, Metallurgical and Petroleum Engineer Rossiter W. Raymond Memorial Award. The award was established in 1945 and honors the most outstanding research or technical paper published within a specific time period. Iacocca was chosen for his paper "The Effect of Thermal Cycle on the Microstructural Development of a Power Metallurgy Superalloy Brazed Lattice."

Akhlesh Lakhtakia, associate professor of engineering science and mechanics, has been elected a Fellow of the Institute of Physics. Fellows are distinguished members of their field who have made significant contributions through research, service and international leadership. About 10 percent of the members of the Institute of Physics have achieved fellow status; about 100 members are elected fellows each year.

Donald W. Leslie, associate dean for undergraduate studies in the College of Arts and Architecture and associate professor of landscape architecture, has been named president of the American Society of Landscape Architects.

The American Society of Landscape Architects represents more than 11,000 members of the landscape architecture profession in the United States and throughout the world.

Jorge Pullin, assistant professor of physics and a research fellow in the Center for Gravitational Physics and Geometry, presented the following invited talks: "Quantum Gravitational Dynamics and Semiclassical Relations" at the Erwin Schrödinger Institute in Vienna, Austria; and "Colliding Black Holes with Boost and Spin" at the Albert Einstein Institute of the Max Planck Foundation in Potsdam, Germany.

Gary Rogers, associate professor of dairy and animal science, presented a paper titled "Genetic Correlations Among U.S. Traits and Udder Health Measures from Denmark and Sweden" at a meeting of the European Association of Animal Production in Lillehammer, Norway.

Dr. Diane E. Schuller, chief pediatric allergy, immunology and pulmonology at The Milton S. Eshelby Medical Center, was recently presented the Distinguished Fellow Award by the American College of Allergy, Asthma & Immunology.

Schuller and five others were recognized for their distinguished contributions to the specialty of allergy, asthma and immunology. ACAAI is a professional association of 3,900 allergists/immunologists.

Ellen Taricani, training and support specialist in computer services, received the Information Technology Award of Excellence from Agricultural Communicators in Education.

The independent learning/distance education course, "Psychology of Discipline" designed by **Robert T. Tauber**, professor of education at Penn State Erie, The Behrend College, has been named the 1996 American Association for Collegiate Independent Study (AACIS) Outstanding Independent Study Course. AACIS recognizes only one outstanding course annually.

Bruce Trinkley, associate professor of music, has won second prize in this year's Chautauque Chamber Singers Choral Composition Contest for his choral cycle "Images and Elegies," from Mountain Laurels. The Chautauque Chamber Singers contest is one of the premiere chorale contests in the United States.

Jean-Claude Vuillemin, associate professor of French literature, gave an invited lecture: "Staging the Prince: Power of Semiotics and Semiotics of Power" at the University of Paris-I Sorbonne, Paris, France.

M. Susie Whittington, assistant professor of agricultural and extension education, will serve on the task force for Reinventing Agricultural Education 2020, part of an effort funded by the National Council for Agricultural Education, the Kellogg Foundation and the National FFA.

Donald Willower, distinguished professor of education, gave the keynote address at an international conference on Values and Educational Leadership, held at the University of Toronto. His talk was titled "Values and Valuation: A Naturalistic Approach."

Behemoth animals may follow same extinction patterns

By A'NDREA ELYSE MESSER
Public Information

Dinosaurs and elephants may have had similar patterns in their long slide to extinction, a paleontologist has discovered.

"If we look at the last five million years before extinction for both dinosaurs and proboscideans, we find a surprisingly similar pattern of extinction," Roger J. Cuffey, professor of geosciences, said.

The proboscideans—mammoths, mastodons, stegodons and elephants—are not quite extinct, but with only two species left, they are far reduced from their heyday. The African and Indian elephants are the remnant of what, at its height during the late Miocene, was a group of some 30 types of animals roaming the Earth.

"Interestingly, at their height, dinosaurs also had a diversity of about 30 species," Cuffey said.

Cuffey and Joey H. Eichelberger, an undergraduate, compared the diversity of dinosaurs and proboscideans over the last five million years of their existence in a poster presentation.

"Most people believe that we understand the extinction of the dinosaurs

Roger J. Cuffey, professor of geosciences, right, and undergraduate Joey H. Eichelberger have found similar patterns in the histories of dinosaurs and elephants.

Photo: Greg Grieco

now that we have proof of a large meteor event at the time of their final demise," Cuffey said. "The KT meteor was only the final death blow for the dinosaurs; they had been declining in diversity and number for at least five million years."

For the proboscideans, the final death blow will probably be by the hand of

humans, but these elephant-like animals also suffered a gradual decline in species number over the past five million years and only now approach extinction.

Although dinosaurs and proboscideans ruled at different times, placing both decline curves on the same graph show that in their individual five million

year periods, these giant beasts shared a very similar pattern of decline.

"No one has ever put both graphs on the same chart before," Cuffey said. "Because the patterns appear to be similar, perhaps we can learn something about the decline of the dinosaurs from the more recent decline of the elephants."

TQM is indicator of quality in home health care

A survey of U.S. Medicare-certified home health agencies shows that total quality management (TQM) practices are related to human resource effectiveness.

Since effective human resources management is a prerequisite for achieving quality-related goals, such as patient satisfaction and improved clinical outcomes, the investigators say their results and analysis suggest a number of factors for home care consumers to consider in selecting a provider.

Kathryn H. Dansky, assistant professor of health policy and administration, and Diane Brannon, associate professor of health policy and administration, surveyed home health agency CEOs or executive directors in 11 states that represent the major U.S. regions.

Dansky said a total quality management program is one of the first signs of quality for which a consumer should look. The authors define TQM as a "structured, systematic process for planning and implementing continuous improvements in quality."

The researchers note that 70 percent of the home health agencies (HHAs) participating in the study reported that they were involved in an organized TQM program. Not-for-profit organizations were significantly more likely to report TQM participation while public HHAs were least likely to report TQM involvement. Hospital-affiliated HHAs were more likely than free-standing HHAs to report participation.

Links between health, wealth confusing among pastoralists

By A'NDREA ELYSE MESSER
Public Information

Apparent health is not necessarily a good indicator of children's health among pastoralists in Africa, based on one anthropologist's findings.

A study of the Herero, a group of pastoralists who herd cattle and goats in the northern fringe of the Kalahari Desert of southwestern Botswana in southern Africa, suggests that apparent wealth, in the form of dairy cattle, may not be a good indicator of the health of children below the age of 10.

"The Herero are generally prosperous, but there are a wide range of livestock holdings among families," Renee L. Pennington, research associate in anthropology, said. "There also are differences among women in survival of their children."

The normal assumption would be that the wealthier the family, the healthier and more likely the children were to survive.

"Previous research shows that Herero women have differences in offspring survival. Some women successfully raise children while others are less successful," Pennington said.

"We are trying to determine if these differences in offspring survival are caused by behavioral characteristics of the mothers, or environmental factors like poor nutrition or disease," she said.

A study of heights, weights and triceps skin fold measurements—used as an indication of body fat—showed that children between the ages of 2.5 and 9.5 from the wealthiest families had less body fat than those in the less wealthy families.

"Children under age 2.5 from cattle-rich households have thicker triceps skinfolds, are heavier and

taller for their age than children from cattle-poor households," Pennington said. "From age 2.5 to 9.5, the reverse holds."

This suggests that children from the less wealthy families have a better chance of survival, but, because of the overall prosperity of the Herero, mortality of children above 1 year of age is very low among all children.

A possible explanation may be that the wealthier children work harder and therefore have less stored fat, or the wealthier children are competing with more calves intended to increase the already bountiful flocks.

A regular column provided by Intercollegiate Athletics

Paterno honored

Coach Joe Paterno has been selected as the recipient of the fifth annual Duffy Daugherty Award. The honor is named for Michigan State's legendary football coach from 1954-1972 and is presented to an individual who has made outstanding contributions to college football.

Penn State third in licensed sales

Penn State ranked third nationally in the sale of licensed merchandise in the first half of 1996-97, according to the Collegiate Licensing Company. The CLC recently reported that during the first two quarters of the 1996-97 fiscal year, July-December 1996, sales of Penn State licensed products trailed only Michigan and Kentucky nationwide. The CLC represents approximately 150 Division I institutions across the nation. During the 1995-96 fiscal year, Penn State also was ranked No. 3 nationally in licensed sales.

Hall of Famer

Dave Robinson, a dominant two-way end for the Nittany Lions of the early 1960s, has been elected to the National Football Foundation's College Football Hall of Fame. Robinson was chosen as a member of the Hall of Fame's Class of 1997. Robinson becomes the 13th ex-Nittany Lion player to earn election to the Hall of Fame and the third in the last five years. Chosen in the first round of the 1963 pro draft by Green Bay, Robinson became an integral member of Coach Vince Lombardi's Packers and played in both Super Bowls I and II. Robinson was the first Penn State athlete to win a Super Bowl ring.

College teams up with liquor board to curb binge drinking

Recognizing the relationships among student attitudes and behaviors toward alcohol, a dozen professors in the College of Communications, in conjunction with the Pennsylvania Liquor Control Board (PLCB), have launched a bold experiment, with the goal of bringing "theory to practice and thought to action."

Several spring semester classes in the college are taking on the tasks of conducting market research and developing public service announcements, advertising campaigns and multimedia products to address burgeoning alcohol-related problems like teen and young adult binge drinking.

Last fall, the college began a working relationship with the Commission for the Prevention of Alcohol, Tobacco and Other Drug Abuse. As a result of this relationship and as part of the college's SOURCE initiative, students are being given the opportunity to identify and examine real community problems within the context of a highly disciplined classroom curriculum. SOURCE, which stands for Service, Out-

reach, Unity, Research, Communication and Education, is a service learning program in the college under the direction of Jeremy Cohen, associate dean for undergraduate education.

"The PLCB initiative will provide students with an opportunity to understand the relationship between our work as communication professionals and the information children, students and adults use to make decisions," Cohen said.

On Tuesday, several members of the PLCB visited campus to meet with classes and discuss the students' progress. Already, students have filmed footage taken during a "ride along" with police officers in the community, conducted focus groups with students about binge drinking, and started work on a Web site. In addition to these efforts, students will produce public service announcements targeting high school students at prom time, research the impact of alcohol advertising on young people, and develop print and broadcast advertising campaigns to discourage binge drinking.

Spanier tells state Legislature more funding is needed

By LISA M. ROSELLINI
Public Information

In an effort to convince lawmakers to provide additional funding to Penn State, President Graham B. Spanier traveled to Harrisburg twice over the last two weeks to attend both the Senate and the House budget appropriations hearings.

After the announcement in early February of Gov. Tom Ridge's proposed spending plan, which includes a 2 percent increase for Pennsylvania's public universities, Penn State officials said the slight boost was not enough to cover some of the University's most critical needs. In his testimony before the Senate on Feb. 25 and the House on March 3, Spanier told legislators that the University is "greatly challenged" in fulfilling its mission because of a state appropriation that has declined 6.6 percent since 1991-92, when adjusted for inflation. The University is seeking \$305 million — 8.6 percent more than last year's appropriation — to continue adequately serving students and the state and to keep tuition as affordable as possible. Without state support, Spanier indicated that tuition could rise more than the planned 2.9 percent.

"Our appropriation request for next year includes only the

Spring break promises to be true learning experience for Altoona College students

For a group of Penn State Altoona College students, this coming spring break will not be their normal respite from classes. Although the students will be in a balmy location, their planned activities are a far cry from the MTV image of sun, surf and fun.

Following an application and interview process in October, the students were selected to be a part of Habitat for Humanity International. Instead of hightailing it to Fort Lauderdale or Ocean City, these students are going to Totonicapán, Guatemala, in Central America to build houses in partnership with Habitat for Humanity International and Guatemalans from the area. The students will function

No glasses needed

Dr. Maria Moon, a State College optometrist, checks a pig's vision in preparation for research by Stanley Curtis, professor of animal sciences. Curtis is using video games developed for use with nonhuman primates to research the mental processes of pigs, and needed to know how far away from the pigs to place the monitors. Curtis said using the video games eliminates the possibility of the pigs picking up clues to the correct answers from a human tester.

The project, which is just beginning, has caught the attention of the BBC. A crew from the British television network visited the Agricultural Sciences and Industries Building on the University Park Campus on last week to tape some segments for a documentary and will be back in April to tape additional segments. The BBC plans to air the documentary in Great Britain early this summer.

Pioneering women to be honored

By LISA M. ROSELLINI
Public Information

In the early 1980s, while the nation watched as the first woman was appointed to the U.S. Supreme Court, a handful of University women sensed it was time for change at Penn State as well.

Taking a long look around, these pioneering women — some students, some staff and some administrators — decided to lift their voices in unison to be heard on issues of equity, child care, accessibility, classroom climate and a mul-

titude of other concerns that had been brewing beneath the surface. With the help and support of some key people, including Rosanel Oswald, wife of Penn State's 13th President John Oswald, the Commission for Women was born. This year, on March 17 at its annual banquet at the Nuttany Lion Inn, the Commission for Women will honor these 20 trailblazing females for their guidance, leadership and dedication — because, according to some, without that first commission, the advances currently being made would not be possible.

West Campus update

Design funds released, utility expansion project moving ahead

By LISA M. ROSELLINI
Public Information

Plans for a utility expansion for a portion of the West Campus development at University Park are inching forward with the latest news that the state has released \$2.5 million of an authorized \$15 million, for design of the project. The \$2.5 million also includes funds for contingencies, some site work and permitting fees.

Although water and gas lines are hardly anything to write home about, the project is an integral phase in the development of the 53-acre West Campus, roughly bordered by Pollock Road extension, almost to Carl Street, the borough of State College to the south and North Atherton Street.

In July 1994, Gov. Tom Ridge allocated \$15 million for design and construction of this infrastructure improvement project that must be completed concurrent with the construction of the buildings proposed for the site. So far, \$2.5 million has been released and this portion of the project, under the supervision of the state Department of General Services, includes the design of a centralized chilled water system and expansion of water, gas and electric lines, plus the extension of telecommunications lines and associated site improvement work. The main feature of the design work is the chilled water plant which will be built to initially handle the air conditioning and research needs of the next two buildings to be constructed — the Leonard Building and the New Research Center. The plant will be expandable in the future to accommodate the growth of the West Campus.

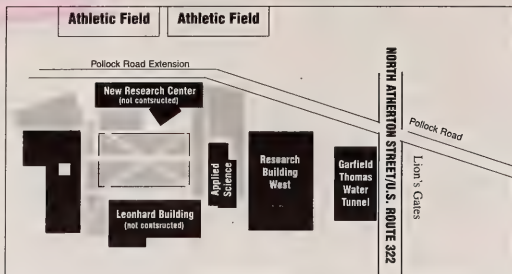

Pat Bianchi, chief of the profession-

al selection section of DGS, said the next step is for Penn State to submit a project program or detailed scope of work that will describe exactly what the design job entails. DGS is currently in the process of advertising for an engineering or architectural firm with similar experience that can take on a design project of this nature. A five-member professional selection committee from DGS will then review the applications and select a short list of three firms to pass on to the secretary of general services.

"A committee here at Penn State has already started a series of meetings to draw up a project program statement to submit to DGS," said Tim Heltman, project manager for West Campus development and chairman of the committee.

"The session will involve identifying the details for the scope of work, planning for how we will proceed and deciding what is the logical progression of work," Rob Cooper, a committee member and manager of engineering services, said. "In addition, we'll be looking at ways to incorporate efficiency, lower maintenance costs and plan for future expansion in the current design."

"It's our goal to move quickly through the design process so that we can meet other goals tied to this project, such as some site improvement

Part of West Campus

The first pedestrian quadrangle on the new West Campus at University Park will be formed in part by the existing Applied Science Building (formerly the ARL Building), the Leonard Building and the New Research Center.

work for the two building construction projects that are already designed," Heltman said.

Design plans for the proposed \$15 million Leonard Building, a teaching and research facility in the College of Engineering that also will house the departments of Industrial and Management Systems Engineering and Nuclear Engineering, were approved by the Board of Trustees in March 1995. The University will kick in \$5 million toward construction of the 95,200-square-foot facility. The 107,000-square-foot New Research Center will house general classrooms and research and teaching laboratories, as well as the Department of Engineering Science and Mechanics in the College of Engineering and the Earth System Science Center, the Department of Mineral Economics and the Office of

the Associate Dean for Research in the College of Earth and Mineral Sciences. Plans for that \$17.7 million structure were approved in May 1995. Again, Penn State will contribute \$5 million to the project, with the remainder to come from the state. These two buildings, along with the existing ARL Building (renamed the Applied Science Building), will form most of the first pedestrian quadrangle on the new West Campus. (See graphic).

Heltman said the programming committee for the infrastructure project should submit its plan to the state within the next 60 days. The design phase for the infrastructure project should take between 10 and 11 months. Once complete, the University will wait for the remainder of the funds for construction of the utility project to be released by the state.

Faculty Senate tackles various issues, hears budget update

At its Feb. 25 meeting, the University Faculty Senate heard from President **Graham B. Spanier** about his testimony before the state Senate during its appropriations hearings that same day. (See story on page 1). Spanier told faculty members that the University would have to work hard to show that the nearly \$305 million appropriation it is seeking has merit.

"I continue to be very positive about the progress we are making at Penn State," he said. "We will continue to communicate with the state Legislature and do the best job that we can."

In other business, the Senate recognized the talent and academic performance of Penn State's first Rhodes Scholar, **Tess Thompson**. An award-winning writer and University Scholar, Thompson also found time for volunteer work while maintaining a 3.95 grade point average.

The Senate also asked the Committee on Adminis-

trations, Records, Scheduling and Student Aid to better define the criteria for re-enrollment. The number of re-enrollments has increased sharply over the past two years, and the Senate is concerned that students are withdrawing to avoid receiving poor grades. Last semester at University Park, 763 students withdrew, 358 in the last two weeks of class. Of the 358 late withdrawals, 203 re-enrolled for spring. The committee proposed a change to the existing policy that would require students to obtain their dean's signature.

In addition, the Senate:

- Heard a report on a new pilot program, which began Feb. 1, at University Park to educate students about the dangers of alcohol abuse. The three-level intervention program is designed to identify at-risk students and enter them in treatment programs. Approximately half of all Penn State residential campuses have some type of program; Penn State Erie,

The Behrend College and the Mont Alto campus already have three-level programs in place. The Office of Judicial Affairs estimates that alcohol is involved in 70 percent to 80 percent of all student violations.

- Agreed to modify policy HR-60 to require human resource representatives to notify faculty or staff members if an accessible document, not bearing the signature of the employee, is added or removed from an employee's file.

- Adopted a revision to the Senate's standing rules on committee structure and discussed proposed changes to its bylaws to reflect Penn State's recent merger with The Dickinson School of Law and the reorganization of the Commonwealth Educational System.

The Senate's next meeting will be at 1:30 p.m. Tuesday, March 25 in 112 Kern Building.

Spring training?

Before the weather turned nasty, Xiaohu Shan found a chance to ride his bike to Pattee Library on the University Park campus. This picture was taken by photojournalism student Allyson Rech as an assignment for class.

Guatemala

continued from page 1

completely in the culture of the Guatemalan people, sharing meals and building homes alongside of them. The trip was facilitated by Altoona Collegiate Outreach Ministry staff workers. Obviously, this is no luxury trip, said work team leaders **Jeff Denlinger** and **Amy Yarnal**.

"The poverty and conditions we will see and experience will change our lives," Denlinger said. "The lessons we will learn about liberty and justice while in Guatemala are ones that will return to campus with us and empower us to educate our peers."

Denlinger and Yarnal believe this trip will serve as a stepping stone in helping Penn State Altoona toward its goal of internationalization.

Much of the students' preparation over the last three months focused on raising support. Work team members can be identified on campus by the red bricks they carry, which symbolize the work they will be doing. Preparation also involved group dynamics to enable them to be sensitive to other cultures.

"The training wasn't focused as much on how to build houses because the students will basically be hired hands," Yarnal said.

"This is an amazing adventure to be taking for spring break," sophomore **Ellen James**, who is majoring in journalism, said. "Most people head down to the beach, but the shore is always going to be there. This is the one chance for me to make a difference in a family's life. It's a once in a lifetime opportunity, and I've been excited about it all year. It's been a lot of hard work but it's all been worth it. It's very exciting."

Sophomore **Leah Morelli**, who is

majoring in art education, said that one of the reasons she wanted to go on this trip is because she has never done any volunteer work involving such a wide-ranging and vast task.

"I'm very excited to travel and to help build a house for someone less fortunate," she said. "I'm anxious to get to know the people from Guatemala and to live in their culture and share my culture with them."

One thing she expects to accomplish from this trip is to come back more knowledgeable about the world and other lifestyles.

Habitat for Humanity International is a non-profit, ecumenical Christian organization dedicated to eliminating poverty housing worldwide. It works in partnership with people in need throughout the world, building simple, decent shelter. To date, the organization has built more than 50,000 homes worldwide.

Members of the team include leaders Denlinger and Yarnal, along with Freeman, James, Morelli, Carrie Arndt, Kim Barnhart, Danielle Morrow, Tim Risser and Barry Scott. Upon their return, the students will present a slide show of their trip at 8 p.m. Wednesday, March 26, in the Community Arts Center at Penn State Altoona. Refreshments will be served. For more information, call (814) 949-5138.

Legislature

continued from page 1

most basic elements to sustain ourselves in an environment of profound change," Spanier said. "Our highest priority is funding 50 new faculty positions to improve the quality of educational programs and reduce class size."

Spanier explained that as part of a three-year plan, Penn State will add a significant number of new faculty positions through state support and internal reallocations from administrative expenditures. The president also told legislators that increased support for the University Libraries and information technology, cooperative extension, medical education and agricultural research was a primary concern.

Calling the appropriation request "necessary and reasonable," Spanier said the money is needed for Penn State to continue its missions in teaching, research and service. Currently, Penn State is Pennsylvania's principal source of research and technology transfer, which since 1965 has provided

free technical assistance to more than 20,000 small Pennsylvania companies — an estimated \$100 million economic benefit for the state. In addition, Penn Staters connected with research and technology transfer have contributed to the creation of more than 5,000 new jobs and the retention of more than 3,500 existing jobs in the Commonwealth. In other areas, Penn State also helps provide not only better economic conditions for residents, but also vast educational opportunities, Spanier said. (See chart below).

A SOLID INVESTMENT FOR THE STATE

In President Spanier's statements to the Legislature, he has tried to stress Penn State's overall benefit and contributions to the Commonwealth. A sampling of those contributions follow:

- Penn State Cooperative Extension programs serve one in six Pennsylvania households annually, while Extension's 4-H youth development program serves 117,000 Pennsylvania youths a year.

- More than 1 million Pennsylvanians participate annually in short courses and Continuing and Distance Education programs yearly serve more than 180,000 nontraditional students.

- Penn State's research budget for 1995-96 was \$350 million, by far the largest university research program in Pennsylvania and one of the largest in the nation. Penn State's research funding is largely from federal sources and is spent almost entirely in the Commonwealth.

- In 1995 alone, more than 700 firms invested in more than 1,200 Penn State projects.

- Penn State has helped to create more than 400 new companies.

Source: *The Value of Partnership: A Report to Pennsylvanians from Your Land-Grant University, 1997*

will directly support the College of Medicine, which is ranked last nationwide for the amount of state support it receives out of a list of 75 public medical colleges.

Spanier pointed out that the University's appropriation request is "substantially backed by internal cost-cutting efforts that have reallocated more than 10 percent of the University's budget in the last five years." The president also said that the new five-year strategic planning process being undertaken by the University Planning Council will include even deeper cuts and more reallocations for academic and support units.

"We are grateful that the governor has recommended an increase in funding... but this proposed 2 percent increase is not enough to keep up with inflation, let alone move Penn State forward in areas where the Commonwealth simply should not fall behind," Spanier said. "There can be no doubt that public higher education must play a vital role if the future is to be enlightened, prosperous and secure."

The House and Senate will continue budget discussions, with proposed legislation expected from those deliberations in April or May. The Legislature has until June 30 to take action on the governor's proposed budget.

Technology in classroom topic of April 5 symposium

Sally Jackson, director of the Communication Collaboratory and acting head of communication at the University of Arizona, will be the keynote speaker for this spring's "Teaching and Learning with Technology Symposium" on Saturday, April 5 at University Park.

This year's fifth annual symposium, which will be held from 9 a.m. to 4:30 p.m. in the Joab L. Thomas Building, will provide a forum for sharing ideas and experiences in using technology for University-level instruction. At the University of Arizona, the Communication Collaboratory is a networked classroom in the Department of Communications that also houses a variety of research and development projects related to communication technology — especially POLIS (Project On-Line Instructional Support), a unique resource for collaborative learning.

Jackson's address will focus on sharing with Penn State the planning, design and development of POLIS and how online resources contribute to improved teaching. POLIS is both an online instructional resource for

students and an online support tool for instructors.

Jackson holds a Ph.D. in speech communication from the University of Illinois at Urbana-Champaign. Before going to Arizona, she taught at the University of Oklahoma, Michigan State and the University of Nebraska-Lincoln. She is the author of numerous articles and books, as well as the recipient of various teaching and research awards.

The daylong event is sponsored by Education Technology Services of the Center for Academic Computing, the College of Education, Deasy Graphics Laboratory, Engineering Instructional Services, the Center for Learning and Academic Technologies and the IDP Center for Excellence in Learning and Teaching. To register, please contact Jean Cowher at ac@psu.edu or (814) 863-4356. You can also register via the World Wide Web at <http://www.psu.edu>. Click on "Computing," then choose "Seminars," then choose "Seminars Schedule."

Anyone with questions about the symposium can call Karen Peters at (814) 863-7763.

Hear prognosis for alternative medicine on March 11

"The Current Status of Alternative Medicine in American Society," will be presented by David J. Hufford, professor of humanities at The Hershey Medical Center, as part of the ongoing "Prognosis for the Decade: The Future of Health and Disease in Pennsylvania" lecture series in Harrisburg.

From 8 to 9 a.m. Tuesday, March 11, at the Penn State Downtown Center, Hufford will discuss alternative medicine. To register for any of the lectures in this series offered by the medical center, call the center at (717) 783-0433.

Learn about multiculturalism in other countries

How do other countries handle issues of diversity and multiculturalism? To find out, attend the March 12 lecture "Diversity and Multiculturalism in Other Countries," from noon to 1 p.m. at the Penn State Harrisburg Eastgate Center.

Hisham Al-Khayat, head of the industrial planning directorate, State Planning Commission in Syria; Ismael Mbaye, assistant director for secondary education, Ministry of National Education in Senegal; and Alexander Razumov, chief of staff, President's Office, Government of Chuvashia, Russia, will lead a panel discussion on the components of diversity and multiculturalism in their respective countries and will talk about how it is impacting their government, culture, politics and economy.

The workshop, presented by the Hubert H. Humphrey Fellows Program, is free, but registration is necessary. To register, contact the Eastgate Center at (717) 772-3590.

Trace history of women's labor movement in state

Kenneth C. Wolensky, who received his Ph.D in adult education from Penn State, will present "Creating a Women's Movement: The ILGWU in Northeastern Pennsylvania 1944-1963," noon Thursday, March 20, at the Penn State Harrisburg Eastgate Center.

Wolensky traces the transformation of The International Ladies' Garment Workers' Union, one of Pennsylvania's largest women's labor unions, from virtual powerlessness in 1944 to an active and vibrant movement by 1963.

Incorporating slides and oral histories of women garment workers, garment factory owners and community activists, the presentation weaves the story of how the union established an educational infrastructure to improve working conditions. The program concludes with a discussion of the state-of-affairs in Pennsylvania's garment industry since the 1960s in view of recent economic developments.

To register for this presentation, co-sponsored by The Pennsylvania Historical and Museum Commission and the Penn State Harrisburg Eastgate Center, call the Eastgate Center at (717) 772-3590.

Light refreshments will be provided.

Ken T. Korbich, senior employment/correspondence specialist in Office of Human Resources.
Gayle J. Leininger, cardio technician/pacemaker at The Hershey Medical Center.
Sherri L. Luchs-Pozza, assistant nurse manager at The Hershey Medical Center.
Barbara A. Mason, staff assistant VII at The Hershey Medical Center.
Joseph T. Mattivi, employment specialist/training coordinator in Housing and Food Services.
Connie J. McCartney, assistant manager, housing in Housing and Food Services.
Patricia H. McCartney, assistant to financial officer II in Corporate Controller's Office.
Kim S. McKillop, staff assistant VI at The Hershey Medical Center.
Dan Meuleners, financial officer III in Corporate Controller's Office.
Lara A. Miller, staff assistant VI at The Hershey Medical Center.
Sheri A. Miller, staff assistant VI in College of the Liberal Arts.
Amy C. Murphy, staff assistant VI at The Hershey Medical Center.

Cheri L. Nearhoof, staff assistant VI in Continuing and Distance Education.
Joanne E. Nocito, staff assistant VI in College of Agricultural Sciences.
Daniel T. O'Donnell, reimbursement analyst at The Hershey Medical Center.
Mark E. Smukler, director, programming and production in Continuing and Distance Education.

Technical Service

Tracey M. Alcalá, escort service aide at The Hershey Medical Center.
John E. Askey, equipment mechanic/operator in College of Agricultural Sciences.
Eunice M. Ferguson, residence hall utility worker in Housing and Food Services.
James T. Kissell, storeroom worker in Housing and Food Services.
Ray J. Konciewicz, maintenance worker utility at Penn State Wilkes-Barre campus.
Todd M. Neidig, maintenance mechanic at The Hershey Medical Center.
Henry G. Shawley, biological technician B in College of Agricultural Sciences.

Outstanding Engineering Alumni named

Leaders in industry, government, medicine and in the development of state-of-the-art technology will be honored as 1997 Outstanding Engineering Alumni at the University Park campus on April 4.

The annual Outstanding Engineering Alumni Awards are the highest honor conferred by the College of Engineering. Only 175 men and women — out of more than 72,000 alumni world-wide — have received the award during the 31 years since its inception.

This year's Outstanding Engineering Alumni are:

■ **William R. Bastian**, retired chairman of the board of AM Communications. Bastian serves on the Penn State Engineering Society (PSES) board of directors.

■ **John H. Bruning**, of Pittsford, N.Y., president and CEO of the Trope Corp., world renowned for his work in the field of interferometry, the science of measuring by using light beams. He is an electrical engineering graduate.

■ **Ernest J. Cross Jr.**, manager of special events at Old Dominion University. He has a background in aeronautical engineering from Penn State.

■ **H. Alfred Eberhardt**, retired president and CEO of Hale Products Inc., best known for having made this 700 employee operation a leading American producer of emergency products. He has a degree in mechanical engineering.

■ **Larry M. Girvin** of Richmond, Va., senior vice president of commercial operations at Virginia Power, with Penn State degrees in industrial and nuclear engineering.

■ **Joseph C. Hurlburt**, president of the engineering consulting firm Innovation by Contract Inc. He holds a degree in agricultural engineering.

■ **James S. Lee**, executive vice president of the Henkel Corp., the North American operating company of the Henkel Group with headquarters in Dusseldorf, Germany. Henkel is a world leader in ingredients for personal-care products and surfactants, and the leading manufacturer of oleochemicals made from natural oils and fats. Lee holds a degree in chemical engineering.

■ **John R. Mashey**, director of systems technology in research and development for Silicon Graphics Computer Systems.

■ **Walter K. Morris**, executive vice president of Gannett Fleming Inc., recognized as an international leader in the water industry. He has a background in sanitary engineering from Penn State.

■ **Dale M. Mosier**, vice president of the Menasha Corp. and president of the corporation's Poly-Hi Solidur component, the world's largest converter of UHMW (ultra high molecular weight) polyethylene. He is an engineering science graduate.

■ **Terry E. Spraker**, self-employed consultant to venture capital firms and medical device industries, perhaps best known as having been president and CEO of the former EP Technologies — a leader in the field of interventional cardiac electrophysiology, catheter-based technologies to diagnose and treat patients suffering from chronic, rapid heartbeats. He is an electrical and bioengineering graduate.

■ **Richard E. Tomlinson II** of Chicago, partner in Skidmore, Owings & Merrill LLP, an international architecture and engineering firm. As project administrator, Tomlinson serves as the firm's liaison with clients. He holds an architectural engineering degree from Penn State.

Fifth Anniversary of CQI

With the advent of the fifth Annual Quality Expo on April 17, this is an opportune time to look back over the past five years, revisit the CQI vision and update readers about some of the activities of the Center for Quality and Planning and the Council on CQI:

■ The center continues to develop, implement and evaluate the University's practice of continuous quality improvement, focusing on the core processes of the institution, stakeholder needs and the integration of quality principles into strategic planning.

■ The Human Resource Development Center continues to provide just-in-time CQI training at no cost. **Barbara Sherlock**, an HRDC CQI specialist, teaches many of these courses and provides professional assistance to the University community on an as-needed basis.

■ Recent activities of the Council on CQI include examining academic climate issues, in particular class attendance, and identification of best practices around staff participation in decision-making and policy formation.

Council update

Penn State's latest cycle of five-year strategic planning is being guided by the University Planning Council. On March 27, a panel of council members will provide an overview of strategic planning and answer questions about UPC activities. Panelists are: **Peter Jurs**, immediate past chair, University Faculty Senate and professor of chemistry; **Betty Roberts**, assistant vice president for Business Services; **Bill Mahon**, director of Public Information; and **Louise Sandmeyer**, executive director of the Center for Quality and Planning, moderator. The panel will be held in the Nittany Lion Inn Fireside Lounge from 8:30 - 10 a.m. If you would like to attend this session, please call HRDC at (814) 865-8216 and ask to register for CQI 057.

For more information about Continuous Quality Improvement, please visit the center's Web site at <http://www.psu.edu/president/cqi/> or contact **Louise Sandmeyer**, executive director of the Center for Quality and Planning, at (814) 865-8721, or e-mail LES1@PSU.EDU.

Agricultural Sciences will hold open house

The College of Agricultural Sciences will hold an open house from 8 a.m. to 4 p.m. Saturday, March 22.

"This event gives visitors a chance to see state-of-the-art facilities while learning more about careers and educational opportunities in agriculture," said **Marianne Fivick**, undergraduate recruitment coordinator in the college.

Registration forms and more information about the event are available from the college's Office for Resident Education at (814) 865-7521.

From 8 a.m. until noon on the first floor of the Agricultural Sciences and Industries Building and Henning Building on the University Park campus, visitors can learn more about Penn State at exhibits highlighting student organizations and societies, academic programs and other aspects of the University, including career development and placement, financial aid and housing and food services.

At 9 a.m., participants can take a bus or walking tour of campus, or choose among several specialized tours. Tours also will be held at 1:15 and 2:15 p.m.

An overview of the college will be held at 10 a.m. in 102 Forster Building. Afterward, prospective students can meet with faculty from each of the college's majors for academic information and advising sessions.

The Office of Student Aid will offer an overview of financial aid and scholarships from 1:15 to 2 p.m. in 101 ASI Building. At the same time, an information session for students at the Commonwealth Campuses will be held in 118 ASI Building. "This session will help these students prepare for the change to the University Park campus," Fivick said.

To help increase diversity in the student body an information session will be held for minority students at 2:15 p.m. in 118 ASI Building. At the same time, a panel discussion on women in the agricultural sciences will be held in 101 ASI Building.

A helping hand

Employees of David Manes and Associates in the Lewistown area get Weaver Building on the University Park campus ready for some roof repair work. New red tiles will match the existing ones on the roof. Weather permitting, work on the roof is scheduled to begin this week.

Undergraduate education seeks assistant/associate dean

Applications and nominations for assistant/associate dean for undergraduate education are being accepted. The committee will start considering applications on April 15 and will continue to do so until the position is filled. The position will be available on or after July 1. The assistant/associate dean reports directly to the vice provost and dean for undergraduate education and is a senior member of the dean's leadership team.

The person selected will have special responsibilities for stimulating, facilitating and advancing academic programming carried out during the summer. The position calls for creative and aggressive leadership to strengthen and expand summer programming through existing mechanisms, through comprehensive marketing and, especially, through innovation. Other duties will be assigned as appropriate. Success in this role depends heavily upon cooperation with a variety of University offices, such as Continuing and Distance Education, Computer

and Information Systems, Enrollment Management and Administration, Student Affairs, the Libraries and the colleges at all Penn State locations.

Essential requirements include high energy and creativity, excellent communication skills, team spirit and an entrepreneurial spirit. Candidates should have an earned doctorate, the potential to serve in a tenured faculty position and knowledge of current developments in higher education. Desired qualities include experience in advancement and promotion of academic programs.

A search and screening committee to identify candidates has been appointed by John J. Cahir, vice provost and dean for undergraduate education. Robert Secor, vice provost for academic affairs and personnel, will chair the committee. Members include: Christopher Bise, Centennial Professor and chairman of the Mining Engineering Section, College of Earth and Mineral Sciences; Patricia Book, associate vice president and associate dean,

Continuing and Distance Education; Blannie Bowen, C. Lee Rumberger and family professor of agriculture, College of Agricultural Sciences; Donald Fahline, associate professor of physics, Altoona College; Nakesha Faison, undergraduate student, McNair scholar; Marianne Kuhns, assistant to the dean, facilities and academic studies, College of Health and Human Development; Rose Marra, director, Instructional Services, College of Engineering; Robert Mitchell, professor of biology, Eberly College of Science; and Howard Way, associate dean, undergraduate education. Gloria Briggs, human resources coordinator, and Shelby Hoy, staff assistant in undergraduate education, will serve as staff.

A letter of application, a full curriculum vita and arrangement for three letters of reference should be sent to: Gloria D. Briggs, human resources coordinator, 1-A Old Main, Box IC, University Park, Pa. 16802.

Agricultural Sciences accepting candidates for associate dean

The College of Agricultural Sciences is seeking candidates for the position of associate dean for research and graduate education and director of the Agricultural Experiment Station. The associate dean and director provides leadership and administration for the college's research and graduate education programs. Reporting to the dean of the college, the associate dean and director is a member of the administrative team of the college, which functions in a collaborative and integrative manner across the teaching, research, cooperative extension and outreach functions of the college. Specific responsibilities of this job include:

- Providing leadership, advocacy and facilitation in support of faculty and staff research;
- Coordinating planning, implementation, evaluation and promotion of research and graduate education programs;
- Establishing and maintaining close working relationships and collaborations within the college, with other colleges' programs and institutes of the University, external constituencies and state and federal agencies;
- Encouraging and assisting faculty in securing external funding;
- Serving as liaison to the dean of the Graduate School and serving as a member of the University Administrative Committee on Research;
- Assuring compliance with all applicable institutional, state and federal reporting requirements; and
- Administering three outlying research centers of the college.

Candidates must have a distinguished record of research achievement in a field of study commonly associated with a college of agricultural sciences with credentials appropriate for rank of professor in her/his discipline. Demonstrated excellence in research and effective administrative, leadership and communication skills are essential. The candidate should be thoroughly familiar with the role and missions of a land-grant university.

Please send nominations, application or inquiries to Steven L. Fales, chair, search committee, College of Agricultural Sciences, 201 Agricultural Administration Building, Box DNT, University Park, Pa. 16802. Candidates should submit a letter of application, curriculum vita, two-page summary of her/his view of the challenges facing a leading agricultural research institution and complete contact information for four references. The search committee will review applications and nominations beginning April 15, and will continue to receive them until the position is filled. Women and minorities are encouraged to apply.

Double duty

Stacy Beth Rader, a film major who also is an ice skating instructor, teaches a class of 3- to 6-year-olds at the ice skating rink in the Greenberg Sports Complex on the University Park campus. For information about the classes or other programs at the rink, call (814) 863-7458.

Photo: Greg Grieco

News in Brief

Participants needed for peanut study

Penny Kris-Etherton, distinguished professor of nutrition, is studying the effects of peanuts and peanut butter on blood cholesterol levels. The study begins on March 17 and continues until July 31, with a break for the July 4 weekend.

To be eligible for the study, you must:

- be between 20 and 60 years of age;
- have average blood cholesterol levels (those conducting the study will test);
- be able and willing to eat a wide variety of foods;
- be able to come to the Diet Study Center (in Henderson Building) for two meals a day, Monday through Friday;
- be willing to eat only the foods supplied to you at the center.

Participants will be provided with all of their food during the 20 weeks of the study and will have their blood cholesterol level determined. In addition, participants will receive \$400 for successful completion of the study. For more information about the peanut study, please call (814) 863-3168.

Faculty/Staff Alerts

Intercom schedule

Because of spring break, there will be no *Intercom* published on Thursday, March 13.

Intercom, the faculty/staff newspaper and official voice of Penn State, will return to its weekly publication schedule on Thursday, March 20, and continue to publish weekly until May 1.

The *Intercom* schedule for the remainder of spring semester and for the summer follows:

Publication date	Copy deadline*
March 20	March 12
March 27	March 19
April 3	March 26
April 10	April 2
April 17	April 9
April 24	April 16
May 1	April 23
May 15	May 7
May 29	May 21
June 12	June 4
June 26	June 18
July 10	July 1
July 24	July 16
Aug. 7	July 30

* All copy is due by noon on deadline day. Please note the early deadline on July 1 due to the July 4 holiday.

Library hours for spring break

University Libraries on the University Park campus will maintain the following schedules during spring break, March 7 through 16:

■ Pattee Library and the Branch Libraries*

Friday, March 7: 7:45 a.m. to 5 p.m.
Saturday, March 8: 1-5 p.m.
Sunday, March 9: 1-5 p.m.
Monday, March 10 through Thursday, March 13: 9 a.m. to 9 p.m.
Friday, March 14: 9 a.m. to 5 p.m.
Saturday, March 15: 1-5 p.m.
Sunday, March 16: Regular schedule
**The Music Listening Room will be closed March 8 and 9; opened from 1 to 5 p.m. March 10 through March 14; and closed again on March 15.*

■ Pollock Library

Will close at 5 p.m. Friday, March 7, and remain closed through Saturday, March 15. Regular 24-hour service will resume at noon Sunday, March 16.

For more information on hours of library service, call (814) 865-3063, type HELP HOURS when using the Library Information Access System (LIAS), or visit the Libraries' home page at <http://www.libraries.psu.edu>

HRDC courses offered

The following courses at University Park are being offered by the Human Resource Development Center. To register for free courses, please call (814) 865-8216. Registration for fee-based courses requires a completed registration form on page 63 of the HRDC course catalog.

■ Coping with Conflict in the Workplace

Provides skills for coping with difficult people and defusing explosive situations. Meets on Tuesdays, March 25 and April 1, from 8:15-11:15 a.m. in 319 Rider Building. Cost: \$55.

■ Developing Effective Study Skills

Provides adult learners with an overview of the skills necessary for success in college. Meets March 14 from 8:30-10:30 a.m. in 319 Rider Building. Cost: \$25.

■ Accelerated Planning through Storyboarding

This program enables participants to lead others through a proven, systematic approach to planning, problem-solving, and decision-making. It emphasizes the use of storyboarding, a technique for achieving focus and flexibility throughout the planning process. Meets Mondays, March 17, 24 and 31 from 1:15-4:45 p.m. in 319 Rider Building. Cost: \$75.

■ Students in Distress: Guidelines for Faculty and Staff Interventions

Participants will be exposed to basic principles and effective responses in order to maximize student safety and successful referral for psychological services. Meets March 24 from 10 a.m. to noon in 118 Agricultural Science and Industries Building.

Health Promotion Programs

To register for any of the following programs, contact Jan Hawbaker at 865-3085 or JQH3@psu.edu.

■ Yoga Series — new section added

Rejuvenate during the workday by participating in this ongoing series. Section three meets from 11 a.m. to noon Tuesdays, March 18 to April 29, in 110 Henderson Building (The Living Center). Cost is \$35 per session, reimbursable to HMO participants who are taking this class for the first time.

■ Culinary Hearts Kitchen

Learn how to cut fat, cholesterol and calories in daily meals. Meets from 4 to 6 p.m. Wednesdays, March 19 to April 23, in Room 7 Henderson Building. Cost is \$40, reimbursable to HMO participants.

■ HIV/AIDS Network Update

Designed for members of Penn State's "You Can Ask Me About AIDS" Network, this session will discuss new information and issues related to HIV/AIDS, as well as explore ways to improve the effectiveness of the network. Meets Monday, March 17, from 12:30-2 p.m. in 16 Ritenour Building. Cost: None. Participants may attend a meeting of the HIV/STD Consortium which precedes the session from 11 a.m. to 12:30 p.m.

■ Health Matters Series — The Signature Program of Faculty/Staff Health Promotion

In this six-week series, a health educator assists participants in exploring and examining various components of wellness, setting goals and determining pathways of success. Group meets Thursdays, March 20-April 24, from noon-1 p.m. in 110 Henderson Building (The Living Center). Cost is \$30, reimbursable to HMO participants.

■ Health Promotion at Altoona College Wellness and Employee Assistance (EAP) Program: Special Informal Discussions

All programs meet in 101 CAC of the Altoona College. To register, contact Ruth or Cheryl at (814) 949-5020 or (814) 949-5021. Cost: None.

March 27: EAP: The Supervisor's Role. 9-10 a.m. and 1:30-2:30 p.m.; Conflict Resolution, 10:30-11:30 a.m.; Managing Change, 3-4 p.m.

Federal Express price change

Due to a temporary fuel increase, Federal Express has increased its prices on all shipments tendered within the United States to compensate for the extra cost. As the non-profit campus mailing center, Mailing Services has no choice but to recover this increase from its customers.

The duration of this price increase is unknown,

but Federal Express has emphasized that it is temporary. If you have any questions or comments about the increase, please contact Gregg J. Ascuitto, manager of Addressing and Mailing Services, at (814) 865-9171.

Office relocation

The Office of the Senior Vice President for Research and Graduate Education has relocated to 304 Old Main from its former location of 207 Old Main. The staff relocating are Rodney Erickson, Jack Yost, Ginny Imboden, Jan Smith and Lori Bryan. Telephone numbers remain the same.

Education technology listserv

Education Technology Services in the Center for Academic Computing has created a moderated listserv to distribute announcements that would be of interest to Penn State faculty and staff working with education technology. This listserv is not meant to be a forum for discussion, but a way to quickly release announcements. To subscribe to the listserv, anyone at Penn State can simply send e-mail to listserv@psuvm.psu.edu. In the body of the note (not the header) type: SUBSCRIBE L-ETA <your full name> (Note: you MUST actually type in the name, but use your name, such as John Smith.)

Dial-in service changes

Due to changes in support for central dial-in services providing access to the data backbone via modem at University Park, the Office of Telecommunications will discontinue the existing dial-in service at (814) 863-9600 on July 1. Effective immediately, account requests for the old dial-in service will no longer be accepted. Users who require a fixed dial-in IP address should apply for a new account to move to the newly introduced OTC-supported modem and ISDN dial-in service at (814) 863-2828 before July 1.

This new dial-in service provides access to the data backbone via modem at speeds of up to 28.8Kbps or ISDN hardware at speeds of up to 128Kbps. The service increases the bandwidth over the existing connection for faculty and staff who need access to more demanding resources on the Internet.

Users of (814) 863-9600 who do not require a fixed IP address are encouraged to use CAC's services. In addition, anyone converting from the old dial-in service who connected to OAS will need to inform OAS that their IP address has changed.

Additional information is available at the Office of Telecommunications Web site at <http://www2.etc.psu.edu/data/isdnandhtml>.

New award created, nominations sought

The Donald W. Davis Award for Ethics in Advertising, funded through a donation to the College of Communications from 1942 alumnus Donald W. Davis, will be given this May to an advertising practitioner or academic who has made a significant contribution to ethics in advertising. The award, to be administered jointly by the American Advertising Federation (AAF) and the Penn State College of Communications, will be given annually and carries a \$1,500 prize.

Nominations will be accepted from any working or retired advertising practitioner or educator. The nomination should include a statement of why the nominee should be honored, evidence of his or her contribution and a biographical sketch of the nominee. The deadline for nominations is March 31.

The ARTS

AT PENN STATE

Coming in April

Sesame Street Live "Let's Be Friends" will be at The Bryce Jordan Center on the University Park campus April 1 and 2. For tickets, call (814) 865-5555 or (800) 863-3336.

Odyssey on WPSU

On the March 9 episode of *Odyssey Through Literature* Emmanuel Matateyou, Fulbright Scholar from the Ecole Normale Supérieure in Yaounde, speaks with host Leonard Rubinstein of the origins of writing and storytelling in Cameroon.

Matateyou explains how Shumam, the writing system of Cameroon, started with pictographs which represented events in the environment. He explains how this writing system underwent an evolution like no other system of writing ever has in such a short period of time. This evolution is what made the Shumam alphabet similar to the Western alphabet today.

On the March 16 episode, Rubinstein discusses the traditions and history of Ukranian blind bards, or kobzars, with Natalie Kononenko and Pavlo Suprun.

Suprun starts by singing a song about Chernobyl filled with powerful imagery. The song describes the escaping radiation as a dragon, as the ancient enemy that burned the countryside. The bards often compare ancient events to more recent events, explains Kononenko, Suprun's translator and a professor of Slavic lan-

guages and literature at the University of Virginia. The kobzars also traditionally sing of sad events, which is why the Chernobyl disaster can be integrated into the bardic culture, Kononenko says.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 on WPSU 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://mickley.la.psu.edu/complit/odyssey/odyssey.htm>

Penn College schedule

Upcoming events at the Community Arts Center stage, part of the Pennsylvania College of Technology, in Williamsport include:

- "Tommy," the Who's classic rock opera, at 7:30 p.m. March 12.
- Toby Keith, platinum-selling country star at 7:30 p.m. March 22; tickets are \$28.50/\$23.50/\$18.50.
- "Sesame Street LIVE" at 7 p.m. April 4 and 10:30 a.m., 2 and 5:30 p.m.

April 5; ticket prices range from \$8.75 to \$12.75.

■ "Enchanted Evening," presented by The Williamsport Symphony Orchestra, at 8 p.m. April 12; tickets range from \$12 to \$35.

■ Contemporary Christian acts 4 HIM/Point of Grace at 7:30 p.m. April 15; tickets are \$18.50/\$16.50/\$13.50.

For tickets or additional information, call the center box office at (717) 326-2424 or (800) 432-9382.

Bach's lunch

The Singing Lions, a show choir directed by Peter Keifer, music instructor, will perform at the Bach's Lunch concert on Thursday, March 13, at 12:10 p.m. in the Helen Eakin Eisenhower Chapel on the University Park campus.

The free, 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

The Singing Lions provide programs on and off campus which include a variety of American popular music — jazz, Broadway, movie themes, country-western, patriotic and inspirational music. The Bach's Lunch program will feature some of this repertoire.

The Singing Lions consists of 12 singers and three accompanists and technical support members. The group also will present a concert in Eisenhower Auditorium on the University Park campus on April 27.

Audience members may take a bag lunch to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Legendary bluesman at University Park

Legendary blues artist B.B. King is coming to Eisenhower Auditorium on the University Park campus at 8 p.m. Monday, March 31. Tickets are \$22 for students and \$24 for the general public and are on sale at Eisenhower Box Office, phone (814) 863-0255 or 1-800-ARTS-TIX.

Since his first recording in the late 1940s, B.B. King has been entertaining audiences across the globe. This rhythm and blues legend has topped the charts with countless hits and has been recognized with the Grammy "Lifetime Achievement Award" and has been inducted into the Rock and Roll Hall of Fame.

B.B. King's performance is being presented by the University Concert Committee.

Pennsylvania Centre Stage 1997 season

Pennsylvania Centre Stage, the summer professional theatre at Penn State,

BRYCE JORDAN CENTER

Upcoming events

■ March 7-9: 13th Annual Builders Association Home Show, Friday, noon to 9 p.m.; Saturday, 10 a.m. to 9 p.m.; Sunday, noon to 5 p.m. Admission: \$3, parking free.

■ March 22-23: Thunderdome! Monster Trucks, Saturday, 8 p.m.; Sunday, 2 p.m. Tickets are \$12 for reserved seating.

■ March 29: Kiss, 7:30 p.m. Tickets: \$40 and \$28.50 for reserved seating.

■ March 30: Phil Collins, 8 p.m. Tickets: \$45 and \$28.50 for reserved seating.

■ April 1-2: Sesame Street Live "Let's Be Friends," April 1 at 7 p.m.; tickets: \$8.50, April 2 at 10:30 a.m. and 7 p.m.; tickets: \$13.50, \$11.50 adults; \$12, \$10 children (1-10).

■ April 3-7: Garth Brooks, SOLD OUT.

■ April 19: World Wrestling Federation, 8 p.m. Tickets: \$18, \$14 and \$10.

For more information on Jordan Center events, visit the Web at <http://www.bjc.psu.edu>

announced its 1997 lineup, which includes four shows at University Park:

■ "You're a Good Man, Charlie Brown," which runs from June 6 through 21 in the Pavilion Theatre, a family musical that follows the adventures of Charles Schulz's "Peanuts" characters;

■ "The Mousetrap," scheduled for June 13 through 26 in The Playhouse. An eerie comedy of murders by Agatha Christie, it is the longest-running play of all time on the London stage;

■ "Misalliance," George Bernard Shaw's modern mockery of the age-old institution of marriage, will play from July 11 through 26 in the Pavilion Theatre; and

■ "A Chorus Line," a story of the young women and men who audition for a Broadway show chorus line, will show July 18 through Aug. 2 in The Playhouse.

Pennsylvania Centre Stage allows students to participate in productions with professional actors, directors and designers and is currently in its 12th season. For a free brochure or tickets, contact The Arts Ticket Center, open Monday through Friday, 8:30 a.m. to 4:30 p.m., at (814) 863-0255.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Saturday, March 15

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium, "JAZZ Dance/Danny Buraczek." For tickets, phone (814) 863-0255.

Monday, March 17

School of Music, 8 p.m., Recital Hall. Student Recital presents Jaime Pomponio, flute, and Molly Brennan, oboe.

Tuesday, March 18

School of Music, 8 p.m., Recital Hall. "Centre Dimensions," Dan Yoder, director. For tickets, phone (814) 865-0431.

Wednesday, March 19

School of Music, 8 p.m., Recital Hall. Scholarship Competition, through March 20.

Friday, March 21

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk by Robin Seymour on "Painting by The Eight at the Palmer Museum."

Center for the Performing Arts, 8 p.m., Schwab Auditorium. "Arts Quartet." For tickets, phone (814) 863-0255.

SEMINARS

Tuesday, March 18

The Population Research Institute, 11:45 a.m., 406 Oswald Tower. Michael Flinn to discuss his population research.

Catholic Faculty and Staff Fellowship, noon to 1 p.m., 212 Eisenhower Chapel. E.P. Roy III on "Physical Aspects of the Death of Christ."

Center for Women Students, noon to 1 p.m., CWS Resource Room, 120 Boucke. Lynn Sherr on "Susan B. Anthony Slept Here."

Geoscience, 4 p.m., 112 Walker. Margaret Kneller on "When did Warming after the Last Ice Age First Occur? Pollen Evidence from the North American East Coast."

Nutrition, 4 p.m., S-202 Henderson. Rebecca Stoltz on "Parasites, Anemia and Growth in Zanzibari School Children."

German, 4:30 p.m., 109 Boucke. Donald F. Dumbaugh and Juergen Eichhoff on "Pennsylvania's Crazy Quilt of German Religious Groups."

MFA, 7:30 p.m., Hotel Union Building, Gallery Lounge. Diana Hume George will read from her new book, *The Lonely Other: A Woman Watching America*.

Wednesday, March 19

Women's Studies, noon to 1 p.m., 12 Sparks. A video on "The Role of the First Lady."

Frontispiece portrait from *Memoirs and Poems of Phyllis Wheatley, a Native American and Slave*, Boston, 1838, is among the items on display on the University Park campus in Palfrey Library's Rare Books Room. The exhibit, "African American Slavery and the Abolitionist Movement in the 19th Century," will be on display through March 7.

■ Center for Russian and East European Studies, noon, 124 Sparks. Tatyana Sayenko on "Ukraine-USA: Cross-Cultural Differences in Economic Rhetoric."

Gerontology Center, 12:15 to 1:15 p.m., The Living Center, 110 Henderson. Steven H. Zarit "The Adult Day Care Collaborative Study: Preliminary Findings."

Geosciences, 3:30 to 4:30 p.m., 541 Deike. John R. Kleist on "Supply Challenge for North America Natural Gas: How will Technology and Earth Scientists make an Impact?"

Engineering Science and Mechanics, 3:35 p.m., 212 Hammond. Donald A. Koss on "Fracture of Steels."

Thursday, March 20

Physics, 3:30 p.m., 101 Osmond Laboratory. Pablo Laguna on "Ray-Tracing the Cosmic Microwave Sky."

American Studies, 4 p.m., 102 Weaver. Virginia Smith and Lynda Goldstein on "Martha Stewart as Cultural Icon."

Food Science, 4 p.m., 117 Borland Laboratory. Larry Spence on "Maybe Teaching was a Bad Idea."

Palmer Museum of Art, 7:30 p.m., Palmer Union Auditorium. Walter Reuben on "The Making of a Photographer."

Friday, March 21

Office for Minority Faculty Development, 2 to 4 p.m., 301A Agricultural Administration. Fred Cannon, Dan Trevino, Lisa Williams Walton and Howard Way on "Teaching and Mentoring Minority Undergraduates (Effective Approaches and Strategies)." Reservations must be received by Tuesday, March 18, phone (814) 863-1663.

EXHIBITS

HUB Art Alley Cases

■ Office of International Students presents "International Festival," through April 6.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Kern Exhibition Area

Photographic work of David Driscoll, through April 6.

Kern Flat Cases

Jewelry by Laveta Piemme, through April 6.

Kern Tail Cases

Handwoven and handspun items by The State College Weavers Guild, through April 6.

Palmer Museum of Art

"Dismal Science: Photo Works by Allan Sekula, 1972-1996," through March 16.

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 15.

Zoller Gallery

School of Visual Arts, "Undergraduate Juried Exhibition," through March 28.

■ Reflects an international perspective.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://cas.psu.edu/calendar/>

MARCH 7 - MARCH 21

Bookshelf

John Fixel, associate professor of economics at Penn State Erie, The Behrend College, has had his book, *Baseball Economics: Current Research*, published by Greenwood Publishing Co. of Westport, Conn. Fixel, who edited the book along with Elizabeth Gustafson and Lawrence Hadley, is a microeconomist who has published on a variety of topics including amateur and professional sports.

Baseball Economics: Current Research is a collection of essays by 14 professional economists who analyze the current economic issues in major league baseball. Topics addressed include the impact of construction of new stadiums on attendance, players' salaries, cost of player development and free agency.

Powder Metallurgy Science, by Randall M. German, holder of the Brush Chair in materials, has been translated into Japanese. The book is published by the Metal Powder Industries Federation. This text provides the information necessary to understand the various technological aspects of powder metallurgy, a processing approach which is a subdivision of the metalworking technologies. The applications and specific engineering details provided by this book are used as illustrations while generic principles are emphasized. The book is intended as a text and introductory reference.

Heinz K. Henisch, professor emeritus, and Bridget A. Henisch are the authors of *The Painted Photograph, 1839-1914: Origins, Techniques, Aspirations* published by The Penn State Press. The book is a comprehensive history of overpainting, from its origins to World War I.

With its rich variety of illustrations in color and duotone, the book features 131 illustrations, which draw upon original 19th- and early 20th-century sources. Included are discussions of overpainted death portraits, most commonly those of children, and the origins of popular "picture postcards" featuring overpainted landscape scenes. Both authors have published widely on photo-historical themes, most recently *The Photographic Experience, 1839-1914: Images and Attitudes* (Penn State Press, 1994).

Charles Prebish, associate professor of religious studies, was recently appointed co-editor of a new series of scholarly books devoted to the subject of Buddhism by Curzon Press. With home offices in the United Kingdom, Curzon Press is one of the largest publishers of books on Asian studies in the world. Curzon Press books are distributed in North America by the University of Hawaii Press.

The Critical Studies in Buddhism Series is a comprehensive study of the Buddhist tradition. The

series will explore the complex and extensive Buddhist tradition from a variety of perspectives, using a range of different methodologies. The series also will present materials on modern intellectual historical studies, including the role of Buddhist thought and scholarship in contemporary, critical context and in current social issues.

Jorge Pullin, assistant professor of physics and a researcher in the Center for Gravitational Physics and Geometry, and Rodolfo Gambini of the Universidad de la Republica in Uruguay have co-authored a book titled *Loops, Knots, Gauge Theories and Quantum Gravity*. The book is an introduction to applications of loop representations and knot theory in particle physics and quantum gravity. Loop representation is of great interest to physicists because it provides a unified arena for the study of fundamental forces in quantum gravity. The final chapter assesses the current status of the theory and proposes direction for future research.

The book, published by Cambridge University Press, is written with a foreword by Abhay Ashtekar, holder of the Eberly Family Chair in physics and director of the Center for Gravitational Physics and Geometry.

■ Exploring options

Janitorial worker Ossie Parker, left, listens as Billie Wilits, assistant vice president for human resources, above right, speaks during a workshop for technical service employees at Johnston Commons on the University Park campus. Betty Roberts, assistant vice president for business services, seated next to Wilits, also spoke. The workshop, sponsored by the Commission for Women, was designed to help participants explore non-traditional occupations and to assist in developing strategies for balancing work and personal life.

Student affairs seeks award nominations

The Office of Student Affairs is accepting nominations for the Vice President's Award for Outstanding Service to Students and the Vice President's Award for Quality Improvement.

The Outstanding Service to Students award recognizes student affairs employees at University Park who demonstrate exemplary service to students. The selection committee will evaluate the nominees based on dedication to excellence in providing services to students; professionalism in interactions with students; evidence of sensitivity to the diverse student populations served; and evidence of "going the extra mile" in serving students. Nominations will be accepted from students, administrators, staff or faculty members until Tuesday, April 1.

The Vice President's Award for Quality Improvement recognizes individuals and teams at University Park for

meritorious quality improvement initiatives. This award will go to a nominee or nominees who did an exemplary job examining an issue related to the quality of the division's/unit's programs and/or services; interacting with stakeholders of the processes to identify outcomes; engaging in appropriate benchmarking and data gathering activities; identifying effective performance measures; and implementing change, if appropriate. Nominations may be made by any student affairs staff member until Tuesday, April 1.

Nomination forms for both awards are available at many student affairs offices on the University Park campus including the HUB desk, Paul Robeson Cultural Center and in 135 Boucke Building, or by phone at (814) 865-0181. Recipients of these awards will be recognized at the Student Affairs Awards Reception in May.

Obituaries

Susanne Doucette, administrative aide, Undergraduate Programs, from June 1, 1965, until her retirement March 1, 1990; died Jan. 6. She was 69.

Charles Golab, assistant professor of general engineering at the Mont Alto campus, from Sept. 1, 1963, until his retirement Dec. 1, 1980; died Feb. 1. He was 81.

Gilbert E. Hutchinson, assistant professor of engineering at the DuBois campus, from Sept. 1, 1972, until his retirement Sept. 1, 1982; died Feb. 7 at the age of 79.

Edith L. McIlvaine, janitor, Maintenance and Utilities, from Sept. 15, 1955, until her retirement March 1, 1968; died Jan. 28 at the age of 91.

Hugo A. Meier, associate professor of history in the College of the Liberal Arts, from Sept. 1, 1963, until his retirement June 30, 1983; died Jan. 30. He was 81.

Sadie M. Powell, counter attendant, Housing and Food Services, from Aug. 29, 1960, until her retirement July 1, 1975; died Dec. 14, 1996. She was 87.

Byron M. Robinson, associate professor of general engineering at Abington College, from Sept. 16, 1967, until his retirement June 30, 1987; died Feb. 11. He was 74.

Perrina G. Shultz, laboratory technician in the College of Agricultural Sciences, from Sept. 1, 1949, until her retirement July 1, 1976; died Dec. 20, 1996 at the age of 82.

James E. Wright Jr., professor of genetics in the Eberly College of Science, from Sept. 1, 1947, until his retirement Oct. 19, 1983; died Jan. 21. He was 73.

Henry L. Yeagley Sr., professor of physics, from Feb. 1, 1925, until his retirement Aug. 1, 1958; died Dec. 26, 1996. He was 97.

Funding sources for faculty projects

Detailed information on Penn State funding sources for faculty projects has been assembled in a new informational pamphlet from Socrates, an informal, cross-unit committee whose goal is to improve faculty access to the many resources available for enriching the teaching and learning process.

Funding sources outlined in the pamphlet include programs run by Continuing and Distance Education, the Center for Academic Computing/Educational Technology Services; the IDP Center for Excellence in Learning and Teaching; the Center for Learning and Academic Technologies, Commonwealth Educational System; and the Schreyer Institute for Innovation in Learning.

The pamphlet also includes thumbnail sketches of the groups involved in Socrates, including the Center for Academic Computing, the IDP Center, and the Schreyer Institute. Currently, only a limited number of copies of the pamphlet is available, but the University hopes to reprint it for distribution to all faculty.

Information on faculty resources also is available through the Faculty Services for Instructional Design, Production and Delivery Web site at <http://jets.cac.psu.edu/FacultyServices/>.

Penn Staters

Fourteen scholars and researchers in Penn State's College of Agricultural Sciences have been recognized by the American Society of Agricultural Engineers (ASAE) for the third edition of *The Dairy Reference Manual*.

The manual earned a Blue Ribbon Award in ASAE's 1996 Educational Aids Competition. Nearly 100 entries were displayed and judged at the ASAE Annual Meeting. The manual was among 20 entries to receive recognition.

Penn State faculty and staff who contributed to the manual included **Richard Adams**, professor emeritus of dairy science; **John Comerford**, associate professor of animal science; **Stephen Ford**, associate professor of agricultural economics; **Robert Graves**, professor of agricultural engineering; **William Heald**, professor of dairy science; **Jud Heinrichs**, professor of dairy science; **William Henning**, associate professor of animal science; **Lawrence Hutchinson**, professor of veterinary science; **Virginia Ishler**, program assistant in dairy and animal science; **Michael O'Connor**, professor of dairy science; **Lawrence Specht**, professor emeritus of dairy science; **Stephen Spencer**, professor emeritus of dairy science; **Giabella Varga**, professor of animal science; and **Robert Yonkers**, assistant professor of agricultural economics.

The American Society of Agricultural Engineers presents the Educational Aids Blue Ribbon Award each year in recognition of outstanding effort and

achievement in the development of noteworthy educational aids.

Kathleen Barry, Department of Human Development and Family Studies, was the invited keynote speaker for "Violence, Abuse and Women's Citizenship: An International Conference" in Brighton, U.K. She also has been awarded the 1997 Visiting Professorship at the Queen's University, Belfast, Northern Ireland.

Penn State Harrisburg faculty member **Melvin Blumberg** has been invited to serve as a member of the 1997 Board of Examiners for the Malcolm Baldrige National Quality Award. Blumberg, a professor of management in the School of Business Administration, is one of 400 quality experts selected nationwide to be an examiner for business, education and health care organizations.

The Malcolm Baldrige National Quality Award was established by law in 1987 to improve America's competitive edge by promoting quality awareness and excellence.

Robert Brooks, associate professor of wildlife ecology, was elected chair of the 30-member Wetland Protection Advisory Committee of the Pennsylvania Department of Environmental Protection.

Paul Dimick, professor of food science, spoke on the use of fractionated milk fat in chocolate formulation

at the Production and Application of Confectionery Fats Symposium, sponsored by the Society of Chemical Industry in London, England.

Penn State Behrend cross country Coach **John Drew** has been named one of the head track and field coaches for the World Scholar-Athlete Games scheduled for this summer. More than 2,200 athletes from 100 countries will be competing and participating.

Joy Ellwanger, research support technician in veterinary science, was appointed to serve on the State Board of Veterinary Medicine until the year 2000.

Wolfgang E. Ernst, professor of physics, has been selected as a member of the International Advisory Committee of the Annual International Symposium on Molecular Spectroscopy sponsored by the U.S. Army Research Office and The Ohio State University.

Rick Gray, associate professor of theatre arts, is the project manager for construction of the new Cirque du Soleil theater at the Bellagio Hotel in Las Vegas. The show and theatre will cost an estimated \$70 million. The theatre will have an unusual element — the stage will be a pool for a water show. Cirque du Soleil is a world renowned theatrical troupe based in Montreal with four companies touring worldwide and a permanent venue at Treasure Island Hotel in Las Vegas.

Pioneering women

continued from page 1

"The formation of the Commission for Women really sent a dramatic message to the University community that women mattered and that the institution was really stepping out and saying, 'This is a group that is going to advise the president on women's issues,' and implicit in that message was the sense that changes would happen," said **Carol Cartwright**, a founding member of the commission.

At the time, Cartwright, now president of Kent State University in Ohio, was a professor of education and acting associate dean for the Commonwealth Educational System. As one of the few women in an administrative role, Cartwright said that timing, hard work, planning and a little bit of luck helped the commission come together to help raise awareness and open discussion on women's issues.

Louise Sandmeyer, another founding member, said that although national and statewide events involving women's rights played a role in the creation of the commission, she believes it was "what was going on here" that prompted University women to come together.

Sandmeyer, who at the time was a counselor in Career Development and Placement Services, said that before the commission was formed there was a clear need for more services for women students. There was no returning adult center, limited child care, no women's resource center and few women in positions of influence who could take action on these issues.

"There was a strong community of women who were not satisfied with the status quo," Sandmeyer said. From this dissatisfaction sprouted several initiatives, including the 1983 establishment of the Center for Returning Adult Students; the 1985 creation of the Center for Women Students; the birth of the Women's Studies Program; a raised awareness of sexual harassment issues; an expansion of child care options; the formation in 1986 of the Administrative Fellows program to help women and minorities gain

a foothold in the administrative ranks; and an unprecedented Study on the Status of Women at Penn State — a University-wide look at conditions for female employees.

In that first study, which has since been reassessed and updated several times, more than 1,000 women across the University participated in meetings to voice their concerns and make suggestions for improvements. The ongoing study, which took nearly two years to complete, resulted in more than 192 recommendations to help the University continue its forward progress on women's issues — many of which have been implemented. The study looked at issues such as institutional climate, academic programs and recruitment, retention and advancement opportunities for women.

In an update to the Board of Trustees last fall, the Commission for Women reported that since 1985 — the inaugural year of the landmark study — there has been an 88 percent increase of women faculty at University Park and a 33 percent increase in CES. The commission also noted the increase in child care options. The recent announcement of the construction of a child care facility at the Research Park at University Park boosts the list of available care opportunities. There is still concern over the lack of sustained and substantial growth in the numbers of women in leadership.

As president of Kent State, Cartwright said she is still often the only woman at the table. She was the first female to be named president of any public institution in Ohio and previously in 1988, was the first woman vice chancellor at the University of California at Davis.

"But for Penn State, that first significant study and evaluation would not have been possible at the time without the commission," Cartwright said.

Nancy Tischler, director of Summer Sessions and professor of English and humanities, agrees and said the first commission allowed women to make

Honorees

The 20 women being honored on March 17 for laying the foundation for today's commission include:

Maureen Carr; **Carol Cartwright**; **Patricia Farrell**; **Jane Gamble**; **Rita Hammond**; **Cynthia Johnson**; **Kathryn Johnson**; **Barbara Kautz**; **Jane McCormick Lewis**; **Nancy Lyday**; **Melanie Miller**; **Kathryn Moore**; **Wendy Oakes**; **Jane Oliver**; **Rosanel Oswald**; **Audrey Rodgers**; **Louise Sandmeyer**; **Jackeline Schoch**; **Joan Thomson**; and **Nancy Tischler**

important inroads. Tischler was also a member of the 1981 commission board. **Maureen Carr**, professor of music theory at Penn State and a member of the first commission, thinks the commission's most important contribution, which is still evident today, has been the establishment of a network of women at a University the size and scope of Penn State.

"That was a very special time and I felt privileged to be invited to participate. I feel good that the commission has gone beyond its original intent to further the goals of women and has expanded," Carr said.

"That first commission had a lot of energy to get things done, because a lot of things needed to be done," Sandmeyer, now executive director of the Center for Quality and Planning said. "Women need to work hard to keep a conscience when they get into leadership positions. They need to continue to take risks, be visible and be a voice for fairness and equity."

"The first commission really set the tone for what is happening today," **Anne Ard**, senior diversity planning analyst, said. "And in terms of changes the commission has made in areas that really impact a lot of women at the University — like child care, flex time, benefits, professional development and more opportunities for advancement — those changes have been significant over the last 15 years."

Private Giving

Four to join campaign steering committee

Three central Pennsylvania residents and a western Pennsylvania native have been named members of the steering committee for Penn State's upcoming capital campaign.

The members are **James Broadhurst**, chairman and CEO of Pittsburgh-based Eat'n Park Restaurants; **Marian "Mimi" U. Coppersmith Fredman**, president of the Barash Group publishing and advertising firm of State College; **Barbara R. Palmer**, a State College philanthropist; and **Philip H. Sieg**, chairman of the Sieg Financial Group of Bellefonte.

The new campaign will aim to raise private funds for scholarships, graduate fellowships, faculty endowments and a variety of academic programs. The campaign's dollar goal will be announced later. President **Graham B. Spanier** said.

"Phil, Mimi, and Barbara have been vital supporters of Penn State in the past and the value of their in-depth knowledge of the University and this region cannot be overstated. Jim is one of the most highly regarded leaders in the Pittsburgh region and is well known there for his support of Penn State," Spanier said. "Penn State has more alumni in Allegheny County than any other county in Pennsylvania, and more students attend Penn State from Allegheny County than from any other county except Centre."

Broadhurst, a native of Titusville and a 1965 Penn State graduate in economics, will chair the volunteer committee that seeks major gifts

JAMES BROADHURST

MARIAN "MIMI" U. COPPERSMITH FREDMAN

BARBARA R. PALMER

PHILIP H. SIEG

from other Penn State alumni and friends in the Pittsburgh region. Broadhurst and Eat'n Park have supported such Penn State efforts as the construction of the Mater Building for the School of Hotel, Restaurant and Recreation Management, The Hershey Medical Center's Four Diamonds Fund and WPSX-TV programming. In January, Penn State named him a Distinguished Alumnus, the highest honor it bestows on its graduates.

Coppersmith Fredman, a native of Kingston, is a 1954 Penn State graduate in journalism and a member and past president of the University's Board of Trustees. She has been a volunteer with and donor to a variety of Penn State efforts, including the Renaissance Scholarship Fund, the Palmer Museum of Art and Alumni Communications advisory boards, the University Libraries, The Bryce Jordan Center, the College of the Liberal Arts, the Pennsylvania Centre Stage and the

Wilkes-Barre campus Center for Technology.

Palmer, a former director of C-Cor Electronics and an honorary Penn State alumna, will encourage support for the arts and programs for students as her primary role in the campaign. A 1946 graduate in home economics from Iowa State University, she is a past president and member of the board of directors of the Friends of the Palmer Museum and a current member of the advisory boards to the Palmer Museum and the Renaissance Scholars Fund.

In 1986, she and her husband, retired C-Cor founder and executive **James R. Palmer**, were the primary donors toward the expansion of the University's museum of art, which was renamed in their honor. Other gifts have created the Palmer Chair in Telecommunications and supported the construction of the Mater Building for the School of

Hotel, Restaurant and Recreation Management.

Sieg, a Bellefonte native and a 1957 Penn State graduate in business administration, will chair the central Pennsylvania segment of the campaign. Before starting the real estate-oriented Sieg Financial Group, he and a partner formed the Federated Home & Mortgage Co. to develop and manage a chain of Holiday Inns in Pennsylvania and three other states, and Tofrees, Pennsylvania's first planned community.

Sieg and his wife, **Judy**, a 1959 graduate in journalism, were supporters of the Campaign for the Library at Penn State and of the campaign for The Bryce Jordan Center. They also created a professorship in The Smell College of Business Administration and aided the recent expansion efforts of WPSU-Radio. Penn State named Philip Sieg an Alumni Fellow in 1988 and a Distinguished Alumnus in 1993.

Tulane president emeritus pledges \$100,000 to Agricultural Sciences

Herbert E. Longenecker, president emeritus of Tulane University, has committed \$100,000 to the College of Agricultural Sciences. The college will use the gift to create an endowment that will enable undergraduates to conduct research under the direction of faculty mentors.

"What I experienced as a student at the University, I have always sought to make possible for other students. My hope is that undergraduates will continue to have opportunities to initiate and conduct research projects," Longenecker said.

Longenecker earned his bachelor's, master's and doctoral degrees from the University in agricultural biochemistry in the 1930s. In 1936, he won a national competition for a National Research Council post-doctoral fellowship for research in England, Germany and Canada.

Before serving as president of Tulane from 1960-1975, Longenecker

was vice president in charge of the University of Illinois' medical center in Chicago and taught at the University of Pittsburgh from 1938-1955. Active in military, business and civic pursuits, Longenecker was a member of the Food and Nutrition Board, an adviser to the Army Chemical Corps on defense against biological and chemical warfare, and chair of the Department of Defense advisory committee.

A Birmingham, Ala., resident, Longenecker also has served as chairman of the Nutrition Foundation, as a trustee of both the Bush Foundation and the Alfred P. Sloan Foundation, and as a director of CPC International and of the Equitable Life Assurance Society. Penn State named him a Distinguished Alumnus in 1960, the highest honor it can bestow on its graduates.

The University will invest his gift in its endowment fund.

Endowment to aid Schuylkill County

Jim Stine headed Cressona Aluminum Co. — one of Schuylkill County's largest employers — for more than 15 years before retiring in 1995. Now, as a way of saying thanks to the community for supporting the company, he and his wife, **Peg**, have committed \$500,000 to endow scholarships for Penn State students who are Schuylkill County residents.

He headed the management team that formed Cressona Aluminum Co. in 1979, shortly after the Cressona-based plant was closed by its original owner, Alcoa. Under his leadership, it became a nationally acclaimed model for good customer and employee relations. The firm now ranks as America's largest aluminum extrusion manufacturer.

The Stines, who now reside in Annapolis, Md., designated their endowment to assist undergraduates who have both outstanding academic records and financial need. Pref-

erence will be given to students enrolled in business, science or engineering, although superior students in other fields will be considered as well.

Each year, a Jim and Peg Stine Scholarship will be awarded to a student at the Schuylkill campus of the Capital College in the amount of one-half in-state tuition, and a University Park campus student for 75 percent of in-state tuition. The scholarships will begin in 1997-98 and can be renewed. Thus, when the scholarship is in full effect, at least eight students will benefit in any given year.

Jim Stine's affiliation with Penn State dates from the late 1980s, when he co-chaired a Schuylkill campus campaign that raised more than \$1 million in private gifts to help build what is today the Cletti Memorial Library. In addition, the Stines' son, **David**, and daughter, **Sarah**, both attended University Park.

Programs still helping students succeed in college

A small group of Penn State programs for low-income and first-generation college students is making a big difference in the success rate of high school seniors who graduate and continue their education.

In cooperation with school districts in central and western Pennsylvania, Penn State offers the federally funded Upward Bound and Upward Bound Math and Science programs for high school students and Talent Search program for students in grades six through 12. The results of these TRIO programs have been remarkable, according to **Howard Wray III**, associate dean for undergraduate education, who supervises the University's state and federally funded assistance programs.

"Compared to 62 percent of all U.S. high school seniors who graduated from high school and enrolled in post secondary institutions last year, 75 percent of high school seniors enrolled in Penn State's Talent Search programs, 95 percent of Penn State Upward Bound seniors and 100 percent of Penn State Upward Bound Math and Science seniors, enrolled in post secondary institutions," he said. (See chart).

Even more impressive is the fact that Penn State TRIO Programs are enrolling students in colleges from school districts that have substantially lower postsecondary enrollment rates than the national average.

In Upward Bound school districts, 40 percent of graduating seniors enroll in postsecondary institutions, compared to 95 percent of the Penn State Upward Bound seniors; and 58 percent of graduating seniors from Upward Bound Math and Science school districts enroll in postsecondary institutions, compared to 100 percent of Penn State Upward Bound Math and Science seniors. Upward Bound enrolls about 120 stu-

dents annually and Upward Bound Science and Math enrolls 50.

In school districts where Penn State's Talent Search program is offered—Alquippa, Clairton, Duquesne, Farrell, New Kensington and Sharon—49 percent of all graduating seniors enroll in postsecondary education, compared to 75 percent of the seniors in Talent Search. This program serves about 1,200 students each year.

"Penn State also administers three TRIO programs for adults and low-income and first-generation college students, and these also have a remarkable track record of success," said Wray, who oversees these as well.

Among Penn State's college-based TRIO pro-

grams, Student Support Services (SSS) helps low-income, first-generation college students stay in college and graduate through counseling, tutoring, supplemental instruction, academic advising and other academic service. About 200 students are enrolled in the SSS program, which has a retention rate of 81 percent.

The Ronald E. McNair Post-Baccalaureate Achievement Program, which helps prepare low-income and first-generation college students for doctoral study, is the newest of the TRIO programs.

Since 1992, 52 percent of all McNair graduates at Penn State have enrolled in graduate school, and 8 percent have enrolled in doctoral programs. Nationally, only about 28 percent of all college graduates enroll in graduate school and less than 2 percent of low-income college students enroll in graduate schools.

Penn State's program currently enrolls 30 students, including five in a partnership with Virginia State University, a historically black institution.

In 1993, Penn State also initiated a College Assistance Migrant Program (CAMP) in collaboration with the federal government to enroll and serve freshmen from migrant families. CAMP is the only such program in the eastern United States and last year 96 percent of its freshman class returned this fall.

In other programs to provide access to low-income students, Penn State offers a Comprehensive Studies Program through the state-funded Educational Opportunity Program to low-income Pennsylvania students who do not meet traditional admissions criteria. Approximately 90 percent of the freshman in this program return after their first year and since 1990, 61 percent have been retained or have graduated.

"The evidence is clear," said Wray, "Federal and state programs for low-income and first-generation college students work extremely well."

Graduate Research Exhibition will be held March 21-22

Watch a computer simulation of the evaporation process or discover new theories on depression during the 12th Annual Graduate Research Exhibition from March 21-22 in the Kern Building on the University Park campus.

At this event, which highlights a segment of Penn State research, give graduate students a forum for sharing their work with people outside their own fields. For many of the 10,000 graduate students at Penn State, research is the heart of their degree, and as competition for research funds increases, it becomes more and more important for researchers to discuss their work with the general public.

The 150-plus graduate student exhibits in this year's event span the research spectrum from the arts and humanities to engineering, encompassing

health, life sciences, physical sciences, social sciences and behavioral sciences. The public can view posters of the students' work beginning at 10 a.m. on March 22 in the Hetzel Union Building.

On Friday, March 21, **Michael J. Zigmond** of the University of Pittsburgh will open the 1997 Graduate Research Exhibition with a discussion of professional conduct in graduate education. He will speak at 3:30 p.m. in 112 Kern. Zigmond is a professor of neuroscience, psychiatry and education, and his research focuses on the neurobiology of synaptic transmission in the brain, as well as on such neurological and psychiatric disorders as Parkinson's disease, post-traumatic stress disorder and schizophrenia.

Also on Friday, something new this year, beginning at 8 p.m. there will be a performance option in 122

Music II Building. The performance option is designed for graduate students who must perform (music, dance, theatre) or for those whose research or creative activity cannot be presented in a static medium. Performances will be judged by a panel of six for artistry, technique and suitability of the work performed.

The poster exhibits will be judged on content, display and an oral presentation describing the research project. Graduate students will be competing for awards totaling \$10,200.

The Graduate Research Exhibition is sponsored by the Graduate Council Committee on Research and the Graduate School. For more information about the event, see the Graduate School's World Wide Web site at <http://www.gradsch.psu.edu>, and click on the link to "news and announcements."

Internal search being conducted for department head in College of Education

The College of Education is conducting an internal search for the head of the Department of Adult Education, Instructional Systems and Worker Education and Development. The person in this role will be responsible for providing leadership for programs, research and professional service activities of the department; organizing and recommending faculty assignments; evaluating and making recommendations concerning promotion, tenure and salary; maintaining a positive climate of productivity and cooperation among faculty; mentoring tenure-track junior faculty; managing the department's operating budget; serving as chief administrative officer of the depart-

ment; and pursuing relevant scholarship, research and teaching.

Qualifications include appointment as a tenured professor or associate professor in one of the programs within the department; ability to work effectively with students, faculty, staff and other administrative personnel in the college and University, as well as with state and national agencies; knowledge and experience in performing administrative responsibilities and managing a budget; excellent record of teaching, scholarship and research, including experience with funded projects; experience with student advising and program development; understanding of and com-

mitment to school and educational reform; ability to maintain a supportive and nurturing climate; and demonstrated experience and commitment to working with diverse populations.

The appointment will be effective July 1, or as soon after that date as possible.

Interested people should submit applications and nomination to **Francis M. Dwyer**, chairperson, 411 Keller Building, University Park, Pa. 16802. Applicants should submit a letter of interest, a current curriculum vitae, and the names, mailing and e-mail addresses, and telephone and fax numbers of three professional references. The application deadline is April 4.

Awards

Miner Training Program wins four national awards

The Miner Training Program of the Department of Mineral Engineering has won four awards in a national competition for health and safety training materials for the mining industry. The competition was sponsored by the U.S. Department of Labor's Mine Safety and Health Administration through its state grants program and was open to 46 grantee recipients. Entries were judged by independent experts in three categories: coal mining, Mmetal/nonmetal mining and general mining. The Department of Mineral Engineering submitted seven entries.

Penn State entries, consisting of videos and a foreman's pocket handbook, were awarded first-place certificates in each category. The video in the metal/nonmetal category also received the grand prize for best overall entry. The award-winning videos, shot on location at Pennsylvania mines, show the sequence of events leading up to a dramatic injury scene. In the aftermath, actors demonstrate the right and wrong ways to respond to the accident.

The foreman's handbook is a small laminated booklet, a ready reference guide to job information and job responsibilities, presented in an easy-to-use outline form. The materials were developed by **Mark Radomsky**, director of field services, and mine safety instructors **Ron Witt** and **Joe Flick**, and the project was directed by **R.V. Ramanani**, head of the Department of Mineral Engineering.

Revenue manager is box office manager of year

Jill Baldi, revenue manager at The Bryce Jordan Center, has been named box office manager of the year by Box Office Management International.

Baldi has spent 19 years in the industry and was first recognized for her achievements in 1994 when her Penn State campus ticket office at the Center for the Performing Arts was awarded "Box Office of the Year." At the Jordan Center, Baldi supervises approximately 80 employees.

Baldi's duties as revenue manager are a combination of box office manager and arena finance director. She is in charge of purchasing equipment, software and telephone systems, and establishing statewide ticket outlets for the center, as well as developing financial and operational manuals for the ticket center.

Professor earns McGovern medal for work outside her primary field

Nina V. Fedoroff, professor of biology, director of the Life Sciences Consortium, director of the Penn State Biotechnology Institute, and holder of the Verne M. Willaman Chair in life sciences, has been selected by Sigma Xi, the honorary scientific research society, to receive its 1997 John P. McGovern Science and Society Medal. The award is given to scientists based on their interests beyond their specific research area. According to the society, Fedoroff was selected for her interest in "the emerging, important issue of the reform of graduate education as it relates to alternative careers for scientists and engineers."

Fedoroff is perhaps best known for her research on the molecular biology of mobile genetic elements, also known as transposons, in plants and on the developmental regulation of gene expression. She has served on the Council of the National Academy of Sciences, the board of directors of the International Science Foundation and the board of trustees of the Biological Sciences Information Service (Biosis).

She is involved in a number of professional activities in the national and international science communities, among them: as a member of both the National Institutes of Health Recombinant DNA Advisory Committee and the international advisory committee to the Human Frontiers of Science Program; the board of directors of the Genetics Soci-

NINA V. FEDOROFF

ety of America; and as a member of the board of directors of the Sigma-Aldrich Corp. and a member of the editorial board of *The Proceedings of the National Academy of Sciences*, *The Plant Journal* and *Perspectives in Biology and Medicine*.

She served the National Academy of Sciences as a member of three National Research Council organizations and is a member of the International Advisory Board to the Engelhardt Institute of Molecular Biology in Moscow.

In the past, she has received a number of National Science Foundation Undergraduate Research Awards and has held fellowships at various institutions and received a number of national awards. She

presently is the holder of National Institutes of Health MERIT Award. She is a member of the National Academy of Sciences, the American Academy of Art and Sciences, and the Phi Beta Kappa and Sigma honorary societies.

Fedoroff earned her bachelor's degree in biology and chemistry at Syracuse University in 1966, graduating summa cum laude, and her doctoral degree in molecular biology at The Rockefeller University in 1972 and has held numerous positions over the last two decades. She joined the Penn State faculty in 1995. She was named director of the Life Sciences Consortium in 1996.

Associate dean receives Schraer award

Herbert M. Lundegren, senior associate dean of the College of Health and Human Development, has received the Rosemary Schraer Mentoring Award from the Commission for Women. The Schraer award, created in June 1994, recognizes a University employee for mentoring by advising, facilitating, encouraging and/or paving the way for others to recognize and realize their potential in both personal and professional endeavors. The award was established by the family, friends and colleagues of **Rosemary Schraer**, former associate provost of Penn State and former chancellor of the University of California, Riverside.

Lundegren's service to the University spans 37 years. Before serving as senior associate dean, she held the positions of interim dean for the College of Health and Human Development, acting chair for the Department of Recreation and Parks, associate dean for research and graduate studies, and professor of physical education and leisure studies.

Lundegren's commitment to mentoring is evidenced by her Penn State career. She has assisted more than 146

HERBERT M. LUNDEGREN

master's and doctoral candidates, has served as a member and chair of the Faculty Senate, has served on numerous University Graduate Council's advisory committees, and was a member and chair of the Commission for Women.

Several nominators commented that Lundegren has served the University in the same way as Schraer as teacher, researcher and administrator, but clearly focusing on her role as teacher/adviser/mentor. As one nominator stated, "She empowers her students and colleagues to the point where one feels as if a large share of the success is really yours." And another, "... the quiet background adviser and professional

director, always urging others to step forward ... to serve, learn and produce at ever-increasing levels of scholarship and academic performance. Standards were always higher than could be imagined."

It is because of her role as mentor and adviser to students and faculty that the commission will present this award to her on March 17 during its annual banquet.

Mont Alto staff assistant rewarded for service excellence

Kathy Mertz, staff assistant to the campus executive officer, Penn State Mont Alto campus, has been awarded the third annual John F. Benchoff Award for Excellence in Service.

Mertz, a Mont Alto campus staff member for more than 20 years, has served in her current position since 1987. Throughout her tenure, Mertz has worked in the offices of business, finance, student affairs and continuing education.

The Benchoff award was created in memory of the late

John F. Benchoff, who served for 23 years as a staff member at Mont Alto campus. He died in 1993. When he retired in 1991, Benchoff was the assistant director of student programs and services. He also served as the campus basketball coach for 22 years.

This memorial award was created by an anonymous donor to be presented each year to an individual who exhibits outstanding performance in a non-faculty role. All staff, advisory board members and students are eligible for this award.

Research

Rural men tend to outlive their urban and suburban peers

By PAUL A. BLAUM
Public Information

People who are wealthy and wise are generally expected to be more healthy, but rural men may hold an extra card that promises longevity: strong ties to friends, neighbors and family. When men with similar characteristics are compared, rural men live longer than either urban or suburban men.

"The greater longevity of rural men may seem at first a paradox," Mark D. Hayward, professor of sociology, said. "Rural residents have historically had restricted access to a broad spectrum of health care services due to the rural dweller's lower income, lack of private health insurance, greater traveling distances, lack of public transportation and shortage of health care providers and specialists."

Hayward did the research along with Diane K. McLaughlin, deputy director of the Population Research Institute and assistant professor of rural sociology, and Amy Pienta, postdoctoral fellow at the Population Research Institute.

While new technological and medical advances promote health, the prosperous and well-educated are more likely to take advantage of them. Because of this, longevity for urban and suburban men is directly related to the amount of education and economic resources people acquire in their early and middle years.

"Our research has shown, however, that this is largely not true for rural men," McLaughlin said. "Advanced technology and modes

Mark D. Hayward, Amy Pienta and Diane K. McLaughlin have found that men living in rural areas tend to live longer than those who reside in cities and suburbs, regardless of their education and economic resources.

Photo: Greg Grieco

of care may not be readily available in rural areas that have small hospitals and few specialists. Those with high and low education and income in rural areas use the same local physicians and hospitals."

"Even when differences in lifestyle risk factors such as drinking and smoking are controlled, rural men outlive their urban counterparts," Hayward said.

The study could not specifically

identify why rural men live longer. However, McLaughlin said, "Those in rural communities may benefit from social networks made up of strong ties: long-time friends, neighbors and siblings. Those are the people who would be most likely to provide consistent and long-term social support and assistance."

The study was based on the National Longitudinal Study of Older Men from 1966 to 1990.

All areas cannot be treated identically. Natural and human resources must be considered when deciding where the federal government can improve the situation and where it cannot.

The researcher suggests that any development policy must consider a region's resources. She warns that programs on a national level probably will not be sensitive to local particularities.

Once the myth of regional development without an infusion of federal money, expertise and preferentiality is laid to rest, developing areas can learn much from the commercialization of the rural South and from the mistakes that were made.

New protein proves effective in battle against Kaposi's sarcoma

Laboratory tests recently revealed that a new, genetically-engineered toxic protein is effective against Kaposi's sarcoma, the most common malignant complication of the AIDS virus, according to a report in February's *Clinical Cancer Research*.

"It's amazing, but it's true," said Dr. Waldemar Debinski, director of tumor research in the Department of Surgery in the Division of Neurosurgery at The Hershey Medical Center.

Lab tests showed that all five Kaposi's sarcoma cell lines were highly and specifically sensitive to the toxic protein. In-vitro tests indicated very low concentrations of the toxic protein were required to kill the cancer cells. Tests on mice also showed pronounced anti-tumor activity.

Debinski generated the new protein in his lab, and in 1995 found it to be effective against brain cancer, one of the deadliest forms of cancer. The Food and Drug Administration, The National Cancer Institute and Penn State are in the process of patenting the new compound, called IL 13-PE38QRQ.

The substance is a combination of two proteins: interleukin 13, a naturally-occurring human protein which promotes the growth of white blood cells, and a genetically engineered bacterial toxin, *Pseudomonas exotoxin A*.

Certain cancer cells — like brain cancer, Kaposi's sarcoma and renal cancers — have thousands of receptor sites that act as open doors to interleukin 13. The compound gains access to the cancer cell through the "doorway" of interleukin 13 and then attacks the cancer with the toxin.

The finding builds upon scientific developments from the past 15 years of research, a time during which the field of targeted therapy has evolved rapidly.

In addition to Hershey, several labs were involved in the current discovery of the new compound's effectiveness against Kaposi's sarcoma. The Food and Drug Administration's Laboratory of Molecular Tumor Biology, Division of Cellular and Gene Therapies, Center for Biologics Evaluation and Research; University of Southern California's School of Medicine; and the Laboratory of Molecular Biology, Division of Basic Sciences at the National Cancer Institute of the National Institutes of Health.

Research shows that Dixie may not rise again

Countries like Mexico that look at the amazing rise of commerce and industrialization in the rural American South for guidance may benefit from looking at the realities rather than the rhetoric, according to a geographer.

"The so-called free market approach of the South has been recommended as a development model for other regions and countries," said Amy K. Glasmeier, professor of geography and the John D. Whisman Appalachian Regional Scholar.

"However, government policies in the South — particularly infrastructure investments and trade protection — played a key role in the South's transformation."

This transformation began after World War I and reached its peak in the late 1970s. The conversion from rural farm to rural industrialized society was not without its consequences and was certainly not achieved in a laissez-faire, free-market climate.

The South embraced certain aspects of the New Deal programs of the 1930s, particularly infrastructure, but explicitly rejected the social aims.

In the course of industrializing the economy, the social structure remained backward.

Using the example of the South, it seems clear that strong, stable, national macroeconomic policies are necessary for successful regional policies, said Glasmeier.

Annual event to take daughters to work slated for April 24

Penn State will once again participate in "Take Our Daughters to Work Day" on Thursday, April 24. The day is a national event sponsored by the Ms. Foundation on which parents or mentors bring their daughters to work to give them a firsthand look at what occurs in the workplace and expose them to the range of life options open to them.

As part of Penn State's participation, the Commission for Women is sponsoring a morning program at University Park which will

allow girls in grades six through 12 to experience not only the workplace of the parent or mentor, but also some exciting "career sites" at University Park. Fifty sites are participating this year by opening their facilities and resources to the girls and their mentors. The girls will have the opportunity to visit three different career sites for 45-minute sessions. Career sites range across many disciplines, and the Commission for Women program will place a special emphasis on science and technology, since women are underrepresented in those fields.

The Commission for Women's program will begin with registration and a brief welcome at Kern Auditorium. The girls and their mentors will then visit three career sites, which will be assigned on a first-come-first-served basis. The program will end with a box lunch in the South Annex of The Bryce Jordan Center, sponsored by the Office of the President. This lunch will be open to participants in the Commission for Women's program, as well as the community. **Rene Portland**, head coach of the Lady Lion Basketball team will be the featured speaker. The program will end after lunch and the girls will spend the afternoon with their mentors at their workplace.

Brochures will be mailed in mid-March to all University Park employees explaining the program and providing a registration form. Cost for the program is \$10 per girl (there is no cost for the mentor). Deadline for registration is April 1. Questions can be directed to the Commission for Women office at (814) 865-1683 or to **Debbie Meder**, chair of the commission's Outreach Committee, at (814) 865-1821 or e-mail dmm4@psu.edu.

The Take Our Daughters to Work Day was launched in 1993 in response to disturbing research findings on the adolescent development of girls. Studies by Harvard University researchers, the AAUW and the Minnesota Women's Fund indicate that during adolescence girls often receive less attention than boys in school and in youth-serving programs, suffer from lower expectations than do their male counterparts, and tend to like or dislike themselves based on aspects of their physical appearance.

The commission encourages all parents to bring their daughters to work on April 24, even if they are not participating in the commission's program. Several campuses are also planning programs for the day.

Test time

Bryan Speck, an undergraduate majoring in psychology, gears up for mid-semester exams on the lawn of Old Main on the University Park campus. With exams past, Speck and thousands of other University students across the state will enjoy a brief rest — spring break is March 10 through 16.

Appointment

CEO named dean for Berks-Lehigh Valley College

Frederick H. Gaige has been appointed dean of Penn State Berks-Lehigh Valley College. In this position he will oversee all aspects of administration, including academic affairs, student affairs, finances, fund raising and alumni activities for the Berks and Lehigh Valley campuses.

Gaige joined the Berks campus as campus executive officer in 1984. Since then, the campus has grown significantly in both size and programs. Under his leadership, the campus acquired an additional 110 acres of land for the development of an agricultural program. In addition, student housing, an expanded student center, bookstore, athletic facilities and a new academic building have been added.

Before coming to Penn State, Gaige was dean of the College of Arts and Sciences, Fairleigh Dickinson University in Madison, N.J. Gaige also was involved in the study

of nation building in Nepal.

He earned a master's degree at Brown University and spent two years at the University of Bombay as a tutor in history, before returning to the United States to earn his doctorate in South Asian studies at the University of Pennsylvania.

He was awarded a Fulbright Fellowship to conduct research in Nepal. As a result, the University of California Press published his book *Regionalism and National Unity in Nepal*. He was asked by the U.S. Embassy to visit Nepal again after a 1989 revolution to predict the outcome of the first national election in May 1991.

Gaige has been actively involved in many civic and community organizations, including serving on the boards of the Reading Hospital and Medical Center, the Hispanic Center and the Police Athletic League, to name a few.

Conference Center and Inn going through transformation

By ANNEMARIE MOUNTZ
Public Information

May 6 marks a new beginning for Penn State in the area of hospitality. That's the day The Nittany Lion Inn and the Penn State Conference Center Hotel (currently The Penn State Scanticon) join forces under Penn State Hospitality Services.

The combination of the two facilities will create the largest self-operating hospitality conference organization in higher education.

The change, announced in May 1996, is being

made to streamline the University's overall hospitality organization.

"When President Graham Spanier arrived at Penn State, he saw an outside contractor and University employees each operating a hospitality organization independently from one another. We had The Nittany Lion Inn operating and doing certain things and we had The Penn State Scanticon doing things consistent with the University's mission and what they've been asked to do—but basically doing the same thing. So it was clearly legitimate for him to ask, 'What options are there for change, for im-

Two engineering departments to merge by 1998

Plans are being developed for two engineering departments—mechanical and nuclear—to merge, effective for the fall semester 1998. The new administrative unit will be the Department of Mechanical and Nuclear Engineering.

This administrative consolidation is a result of the College of Engineering's five-year strategic planning process and an analysis of enrollment trends based on a decline in nuclear engineering enrollments.

"A principle foundation of this merger is to maintain and continue the significant contributions the College of Engineering has had to the nuclear engineering profession and discipline," David N. Wornley, dean of the college, said. "It is planned to continue the accreditation with the Accreditation Board for Engineering and Technology for undergraduate

University begins process to guide development

University administrators, faculty, staff and students joined members of the State College community and a planning consultant earlier this month to begin the long process of updating the University Park Campus Master Plan.

More than 100 people were present at The Penn State Scanticon on March 5 for the kick-off meeting of a process that will see a framework for campus development completed by Aug. 29, 1998. The plan will focus on land inside of U.S. Route 322 to Cori Street, including West Campus.

"The continuing evolution of this campus obviously is of importance both to Penn State's academic community and to the local community," said President Graham B. Spanier. "The planning process will bring a variety of internal and external viewpoints together to identify needs and opportunities for our future."

Emphasizing long-term opportunities, wide campus and community involvement and the importance that image and the quality of the physical environment has on attracting students, faculty

GLAD you asked

Welcome to "Glad You Asked," a column where employees can get answers right from the source.

Q Recently I submitted a request for a job upgrade. I filled out the necessary forms, the request was approved by my immediate supervisor and then by the head of my college. The request was then sent to Human Resources, where a gentleman who doesn't have a clue as to who I am or what my job is like, determined that I did not qualify for an upgrade. Why is this obviously archaic system used? Who knows better than my supervisor whether or not I deserve an upgrade? Why are these demeaning forms necessary?

— Curious at
University Park

A Job evaluation is a system used to establish the value of work in an organization. This in turn is tied to a pay system. That pay system is based to a degree on the marketplace for a particular set of skills and what an employer is capable of paying to maintain a motivated and competent workforce.

Job evaluation systems are not performance systems. This is a common misconception. How well an employee performs his or her duties does not determine the grade of a job. However, employees may from time to time have substantial changes in their jobs that require an examination to determine if their job is properly evaluated. Since job grade changes are based on the duties performed, the University must have a way to describe and measure the amount of change to make a grade determination. The way this is accomplished at Penn State is through the completion of a Position Information Questionnaire (PIQ). Without the PIQ, the employment/compensation specialist cannot make an evaluation and a determination of which job specification (SPEC) best fits the level of the job responsibilities performed. It is important to note that all exempt and nonexempt staff employees use the same PIQ to describe their job responsibilities.

Following the submission of the PIQ, the evaluation phase begins, which focuses on the job duties, scope and level of responsibilities, and several other factors in order to reach a decision. The employment/compensation specialist compares the employee's responsibilities to others across the University who report that they do similar or closely related work. Those employees also have PIQs on file with our office. We use these as reference points to ensure that we are using the same yardstick to measure the level of a job.

— Milton R. Trask
Manager
Employment & Compensation Division

Getting ready to surf

Tarajis Sanduskey, a general engineering major, helps with Internet wiring at Radio Park Elementary School. Sanduskey is just one volunteer in the project to connect the State College school to the Internet. It's all part of a statewide effort to wire 200 schools across Pennsylvania.

Photo: Greg Grieco

Volunteer effort opens door to Internet

An all-female team of University faculty, staff and students has installed high-speed network wiring to modernize the computer facilities at Radio Park Elementary School in State College.

The team is part of a statewide, volunteer effort known as the BuildPEN Partnership that expects to improve the wiring in 200 schools across Pennsylvania so that they can connect to the Internet by the end of this week. PEN stands for the Pennsylvania Education Network and is the centerpiece of Gov. Tom Ridge's Link-to-Learn education technology initiative. Link-to-Learn complements the BuildPEN

Partnership by providing \$121 million over three years to supply schools with computer equipment, planning expertise and other resources.

Kyle Peck, associate professor of instructional systems in the College of Education, heads Penn State's participation. **Allison Carr**, assistant professor of instructional systems, College of Education, is the lead volunteer. **Marilyn Scott**, an architectural engineering major from Tunkhannock, is coordinating participation from the University's Women in Engineering Program.

"March has been designated 'BuildPEN Month' and during that month, many schools across the state will benefit from the

efforts of volunteer groups and the gifts of corporate partners," Scott said. "In general, corporations provide the materials and the local communities provide the 'person power.'"

Tom Mincemoyer, State College Area School District technology coordinator, is technical adviser to the volunteers. He is coordinating their efforts so that the wiring projects dovetail with the school district's new technology plan. Although Radio Park is the first school to be wired, three more schools in State College also will benefit from the effort.

Besides Carr and Scott, a large number of faculty members, students and staff are also participating.

Faculty Senate news

The University Faculty Senate will meet on Tuesday, March 25, at 1:30 p.m. in Room 112 of the Kern Graduate Building on the University Park campus. Some items to be addressed include:

■ Faculty teaching development and evaluation (forensics);
■ Delegation of authority for the law curriculum to The Dickinson School of Law of the Pennsylvania State University;

■ Committees and rules nominating for 1997-98 including: faculty rights and responsibilities, Standing Joint Committee on Tenure and University Promotion and Tenure Review Committee (informational);

■ Roster of Senators for 1997-98 (informational);

■ Voluntary phased-retirement program (informational);

Members of the University community may attend. Anyone who is not a member of the Senate may ask to speak on any item of business already before the Senate. Such a request must be made to the chair, through the executive secretary of the Senate, at least four calendar days before the meeting.

A MESSAGE FROM THE PRESIDENT

University is benefit to entire Commonwealth

By GRAHAM B. SPANIER

I recently had the opportunity to testify before Pennsylvania's

GRAHAM B. SPANIER

House and Senate appropriations committees about Penn State's budget. Many of the questions asked by our elected officials during those hearings centered on how Penn State uses the tax funds it receives. As the Commonwealth's largest publicly supported university, I think it is important that the university be accountable and that Penn State is doing to serve students and taxpayers.

When legislators and citizens ask us what we are doing for Pennsylvania, we believe the answer is "a lot." As a taxpayer, you should feel particularly confident that the state's investment in Penn State is returning substantial dividends and that the University has been, and will continue to be, a careful steward of the funds entrusted to us. As Penn State employees, you should be proud of the continued contribution the University makes in all corners of the state.

Our first priority is our students. As you know, we currently educate more than 77,000 students, and are committed to ensuring that they receive the highest quality education possible. We accomplish this within the context of a budget that might surprise most people.

While many readers are aware that Pennsylvania ranks 47th out of the 50 states in per capita spending on public higher education, some might be surprised to know that Penn State receives less per student than any other public university in the Commonwealth. And we receive less support per student than any of our Big Ten counterparts. These are facts we have had to contend with for years. Yet we haven't let this impede our progress. In fact, the citizens of the Commonwealth should be proud that we have been able to develop and sustain one of the nation's leading universities

while less than 17 percent of Penn State's total budget comes from the state treasury.

As you have read before in *Intercom*, a 1996 survey in *U.S. News and World Report* named Penn State a "best value" institution — the only Pennsylvania college or university among the top "best values" nationwide. *U.S. News* also ranked Penn State among the top 10 most efficient universities in the nation — institutions that "get the most out of their educational expenditures."

The guidebook *by League Pro-*

"Penn State receives less per student than any other public university in the Commonwealth. And we receive less support per student than any of our Big Ten counterparts ... Yet we haven't let this impede our progress."

grams at State School Prices named Penn State one of six public universities nationally — and the only one in the Northeast — that has the very best undergraduate honors programs at a cost most Americans can afford. *Money Guide*, from the editors of *Money* magazine, surveyed the undergraduate honors programs at public universities and included us among a group recognized as "the best in the nation."

Just this month, Kiplinger's rated Penn State a four-star value. Of the 51 state universities reviewed, Penn State was tied with the University of Virginia for highest SAT score average, while having the highest undergraduate enrollment of all the universities listed, a clear reflection of Penn State's commitment to quality plus access.

A Penn State education is something that is in great demand. This past year, for the second year in a

row, more high school seniors — 53,238 — sent their SAT scores to Penn State than to any other university in America. We believe this is a clear reflection of the quality education which we provide at 23 locations around the state. That quality is enriched by a faculty that once again ranks first in the nation in the number of Fulbright Scholars.

Penn State's research mission is also bringing great benefit to the citizens of the Commonwealth. From the development of the artificial heart to the creation of new materials for industry, to cures for crop disease, Penn State research touches the lives of virtually everyone in the state. Penn State currently ranks 10th in the nation in total research and second in the nation (behind MIT) in industry-sponsored research. These research efforts, funded mostly with dollars brought into Pennsylvania from outside the state, are having a dynamic impact on business, industry and citizens.

Penn State's Research and Technology Transfer Organization has contributed to the creation of more than 5,000 new jobs and the retention of more than 3,500 existing jobs. We have increased the competitiveness of thousands of Pennsylvania businesses and helped to create more than 400 new companies.

Our Cooperative Extension programs serve one in six Pennsylvania households annually, and our Continuing and Distance Education programs serve more than 150,000 people per year. The recent creation of the Penn State Geisinger Health System will, in addition to creating a secure funding base for our College of Medicine, enable us to provide state-of-the-art medical care to residents of 40 counties.

We believe the facts show that the Commonwealth's investment in Penn State is a good one and we seek the continued support of the governor, the Legislature and the people of Pennsylvania, to ensure access to a Penn State degree for those who desire it. We believe that we are setting a new standard for the integration of teaching, research and service, and through our efforts in these important areas, helping to build a better future for the Commonwealth and all who live here.

Call for proposals

Schreyer Institute looking to reward new ideas in education

The Schreyer Institute for Innovation in Learning is looking for faculty with new ideas in active and collaborative undergraduate learning. Proposals for innovations to run in the spring 1998 semester are due April 11. The institute hopes to fund at least 20 projects.

Nearly 100 institute Fellows have experienced with collaborative learning using high-performance learning teams, or active learning using realistic problems or cases, in the institute's first two years. They report improvements in student motivation, attendance and intellectual performance.

Selected proposals are supported with funding for student interns to work with the faculty in designing and coordinating new learning experiences. In addition, faculty members can use instructional design and assessment consultants and team-training resources provided by the institute. Project faculty also participate in bi-weekly workshops and conversations that use PictureTel to reach University locations across the Commonwealth.

For application forms and more information, call (814) 865-8681, e-mail INOV@psu.edu or apply directly through the World Wide Web at <http://www.inov8.engr.psu.edu>.

Candidates sought for leadership and service awards

The AT&T Center for Service Leadership is accepting nominations for its 1996-1997 Service Leadership Awards.

■ The Partisan Award recognizes a group member in a non-leadership role who has made a valuable contribution to the organization, the Penn State community and Centre County region.

■ The Eclipse Award recognizes a leader who has served as an officer and/or committee chair demonstrating responsibility for the organization and displaying strong leadership skills.

■ The Rose Colonge Keystone Citizen Award & Laurel Award for Outstanding Services recognize students who have made valuable contributions in the area of service and volunteerism to the Penn State community and Centre County region. The Rose Colonge Keystone Citizen Award recognizes a volunteer who has demonstrated exceptional services and ongoing involvement, particularly in efforts involving social issues. The Laurel Award for Outstanding Service recognizes outstanding "one-time" and ongoing service to the community.

Nomination packets are at the HUB Information Desk on the University Park campus and 101C HUB. Nominations are due noon, March 21, in 101C HUB. For more information call (814) 863-4624.

Master plan

continued from page 1

and visitors, **Richard Rigerink**, a partner at Johnson Johnson & Roy Inc. and senior planning consultant for the master plan, laid out a blueprint for action over the next 18 months. Developing the plan will involve public meetings, focus groups, one-on-one consultations and just plain old walking around and talking to people.

"Don't be surprised to see us in the dining halls, or flagging people down on the mall to find out how they feel about the physical environment of campus," said Rigerink. "We also want to work closely with the neighborhoods and the community and have **Robert Bini**, director of the Centre Region Planning Agency, on the Master Plan Advisory Committee coordinate that input."

The master plan will not affect current building projects such as the Pattee Library and the HUB/Paul Robeson Cultural Center project

While the student population at University Park is not expected to grow significantly over the next 10 to 20 years, growth is likely to occur to accommodate advances in technology and the increasing use of technology in both teaching and research. Facilities will need to be updated and as the University continues its strength in sponsored research, new research facilities may be necessary.

In addition, Penn State is increasingly becoming a point of

destination, a cultural center drawing a range of visitors from prospective faculty, staff and students, to visiting researchers, donors and returning alumni. The master plan will help ensure the University continues in this role.

Among the goals of the plan are to increase campus order, strengthen the campus image, define future opportunities and clarify long-term use patterns for areas which may not currently be used to their potential.

"We will look 10 or more years into the future to explore the issues and alternatives which can ensure future flexibility that will achieve a well-organized, distinctive and aesthetically appropriate environment, and allow us to more fully understand our capacity to support development," **Gary C. Schultz**, senior vice president for finance and business/treasurer, said.

While the project will take 18 months to complete, all meetings will be scheduled as soon as possible. The group that met March 5 will meet twice more.

"The next meeting will be to give you an update and outline the directions the process is taking," Schultz said. "The last one will be a pre-final report presentation of the plan."

The plan will not affect current building projects such as the Pattee addition at Pattee Library and the Hetzel Union Building/Paul Robeson Cultural Center project, which will continue as scheduled.

The configuration of campus buildings, walkways, open spaces and utility systems have been guided by a master plan first developed in 1922 and periodically updated. Its last major update occurred in 1987.

Internal search for department head in education is under way

The College of Education is conducting an internal search for head of the Department of Counselor Education, Counseling Psychology and Rehabilitation Services. Major responsibilities include: providing leadership for the programs; research and professional service activities of the department; organizing and recommending faculty assignments; evaluating and making recommendations concerning promotion, tenure and salary; maintaining a positive climate of professional productivity and cooperation among fac-

ulty; mentoring tenure-track junior faculty; managing the department operating budget; serving as chief administrative officer of the department; and pursuing relevant scholarship, research and teaching.

Qualifications include: appointment as a tenured professor in one of the programs within the department; ability to work effectively with students, faculty, staff and other administrative personnel in the college and University, as well as with state and national agencies; knowledge and experience in perform-

ing administrative responsibilities; experience in managing budgets; record of excellent teaching, scholarship and research including experience with funded projects; experience with student advising and program development; excellent interpersonal skills; understanding of and commitment to school and educational reform; ability to maintain a supportive and nurturing climate for faculty, staff and students; commitment to maintaining excellence in all department activities; demonstrated experience and commit-

ment to working with diverse populations; and commitment to collaboration and collegiality.

The appointment will be effective July 1, or as soon after as possible.

Submit applications and nominations to **Robert B. Slaney**, chair, 327 Cedar Building, University Park, Pa. 16802. Applicants should submit a letter of interest, a current curriculum vitae and the names, mailing and e-mail addresses, and telephone and fax numbers of three professional references. Application deadline is April 19.

Career Day

The seventh annual Pennsylvania Career Day will be held from 10 a.m. to 4 p.m. Thursday, April 10, in The Bryce Jordan Center on the University Park campus. Students and alumni of Pennsylvania colleges and universities will have the opportunity to meet with representatives from more than 140 Pennsylvania organizations. Organization representatives will be accepting resumes for current and projected openings; conducting on-site interviews for full-time and part-time positions, internships and summer employment; and offering information about employment opportunities within specific career fields. Admission and parking at the Jordan Center are free and no preregistration is necessary. Participating students also can take advantage of the free shuttle bus which will pick up and drop off at the HUB and the Jordan Center every 15 minutes throughout the day. For more information, call the Career Development and Placement Services office at (814) 237-7.

CEO for Shenango campus sought

The University is seeking candidates and nominations for the position of campus executive officer (CEO) for the Shenango campus, which on July 1 will become part of the 12-campus Commonwealth College. The CEO is the chief administrative officer of the campus and is responsible for administering all of its programs. The CEO also is responsible for maintaining close relationships with the campus communities, including outreach programs.

Situated on 14 acres in downtown Sharon, the Shenango campus serves its neighboring communities with a wide variety of educational programs and services. The campus enrolls approximately 1,000 students, all of whom commute. The campus offers seven associate degrees; select baccalaureate opportunities; the first two years of almost all of Penn State's 180 baccalaureate majors; and credit and non-credit certificate programs. Several of the degree offerings have an allied-health focus with curricula in physical therapy assistance, occupational therapy assistance and four-year nursing.

Candidates should have an earned doctorate, several years of experience in college and/or

university teaching and substantial experience in academic administration. Send resume to: **John Leathers**, associate vice president, Commonwealth Educational System, 111 Old Main Building, Department CHSV, University Park, Pa. 16802. Application deadline is April 4, or until a suitable candidate is selected. Penn State is an affirmative action, equal opportunity employer. Women and minorities are encouraged to apply.

The committee charged with the search includes: **John Houlihan**, chair and professor of physics, Shenango campus; **Pearl Cohen**, assistant professor, health and human development, Shenango campus; **Catherine Cannon**, campus executive officer, Penn State New Kensington campus; **Richard Lenzi**, director of business services, Shenango campus; **Julie Papadimas**, English instructor, Shenango campus; **Thadd Preisner**, assistant professor of biology, Shenango campus; **Diana Rankin**, student government president, Shenango campus; **Rachel Smith**, budget planning officer, CES, University Park; and **James Stewart**, vice provost for educational equity, University Park.

News in Brief

Maple sugaring techniques demonstrated

Shaver's Creek Environmental Center will host a Winter Harvest Festival from 11 a.m. to 4 p.m. Saturday, March 22, and Sunday, March 23, at the Stone Valley Recreation Center. The Shaver's Creek staff will demonstrate the techniques of old-time maple sugaring. Visitors will have an opportunity to sample the maple syrup on freshly made pancakes. The cost is \$7 for adults; \$4 for Shaver's Creek members. The cost for children between the ages of 4 and 12 years old is \$5; \$4 for members. There is no charge for children under 4. For more information, call Shaver's Creek at (814) 863-2000.

Weight Watchers AT WORK

The Weight Watchers AT WORK program is now available at two locations on the University Park campus. Section 2 will meet Wednesday, March 26-June 4, from noon until 1 p.m. in the Paul Robert Cultural Center auditorium, and Section 3 will meet Tuesdays, March 25 until June 3 in 101 Electrical Engineering East Building. Cost: \$115 (lifetime members, \$105). Members of the HealthAmerica HMO may be reimbursed. To register, contact Jan Hawbaker at (814) 865-3085 or JQH3@psu.edu for a preregistration form.

Science writers discuss cloning

Terry D. Etherton, distinguished professor of animal nutrition, will lead a lunchtime roundtable discussion on the ethics of cloning, sponsored by the Penn State Chapter of the National Association of Science Writers, at noon Wednesday, March 26, in room 114 Ken Building.

Recent reports of the cloning of a sheep in England have once again brought the question of the application of biological principles and practices to humans and other animals to the forefront. Science writers need to know the questions to ask to evaluate both the scientific and ethical implications of this research.

NASW lunchtime programs are open to anyone interested in science communication. For more information, contact Andrea Messer, aem1@psu.edu or 865-9421.

Leadership series for women

"Women as Leaders: A Three-Part Series on the Power of Transformational Leadership" is a discussion on transformational leadership and how women can discover and apply their own styles. This three-part program includes:

- 1) "Perspectives, Myths and Realities," from 3-5 p.m. on March 27; 2) "Talking 8-to-5 and Beyond," from 3-5 p.m. on April 24; and "Barriers and Breakthroughs," from 3-5 p.m. on May 29.

The series will be offered in the Gallery Lounge at the Hetzel Union Building. Cost is \$80 for the complete series, or \$40 for each program. The fee includes the book *The Female Advantage: Women's Ways of Leadership* by Sally Helgesen. Preference will be given to those signing up for the entire series. For more information, call Anne Shields at (814) 865-2563.

Annual used book and record sale

From Saturday, April 5, through Wednesday, April 9, the 36th Annual Used Book and

Record Sale will be held from 9 a.m. to 9 p.m. in the Hetzel Union Building Ballroom and Fishbowl.

The event, sponsored by the American Association of University Women, State College Branch, will feature more than 90,000 books and 2,000 records, plus maps and sheet music for sale. Proceeds benefit local educational projects and fellowships and grants for university women. Last year's proceeds exceeded \$73,000.

On Tuesday, April 8, every item will be marked 50 percent off and on Wednesday, April 9, a full grocery bag of books is only \$5.

Spring luncheon

The University Women's Club members and their guests are invited to attend the Annual Spring Luncheon at the Elk's Club on Tuesday, April 15. A reception will begin at 11:30 a.m. followed by a noon luncheon. An original program will be presented by Grace Holderman. To make your reservation, please contact Susan Klein at (814) 237-3850, April 10.

It's at the Nat

The McCoy Natatorium offers several swimming and diving classes for all age groups, including:

■ Springboard Diving

All levels of divers can participate in one of these three classes offered:

Learn to Dive — for people six years old and up; must be able to swim 25 yards non-stop;

Novice Diving — for those who have participated in a previous Learn to Dive session or have been cleared by the coach to participate;

Junior Olympic Diving — for those who have previous competitive diving experience, have been in the advanced diving class or have the permission of the coach.

■ Nittany Lion Aquatics: Age Group Swimming

A year-round program, it offers training sessions for young swimmers of all ages. Swimmers as young as six are taught the basic techniques of the four competitive strokes; older, more experienced swimmers are introduced to the latest in training philosophies.

■ Aquatics

Available at five different levels of intensity, this course is scheduled at various days and times throughout the week.

■ Masters Swim

For adults of every age, this course offers an opportunity for adults who enjoy swimming to improve their technique and overall level of fitness; it is not designed for only those who have "mastered" the sport of swimming.

For information on any of these classes, call Jon Larson at (814) 865-1432.

Stone Valley Recreation Area schedule

Spring and summer activities at the Stone Valley Recreation Area are gearing up and include everything from boating, fishing, instructional sailing programs and hayrides, to bonfires, canoeing, hiking and special programs.

For additional information on programs or rental facilities, contact Stone Valley at (814) 863-0762 or (814) 667-3792.

National Service Week set for May 19-25

Charles Bierbauer, senior Washington correspondent for Cable News Network, and Suzie McConnell-Serio, former two-time Olympic medalist in basketball, have been named national honorary co-chairs of the Penn State Alumni Association National Service Week in May. They are both Penn State alumni.

The third annual National Service Week, a nationwide community service initiative, will be held May 19-25. Alumni chapters, societies, interest groups, and individuals across the country will do volunteer work to benefit local communities. Projects will include housing construction for Habitat for Humanity; volunteer work in homeless shelters; and participation in blood drives, community cleanup campaigns and philanthropic endeavors.

Last spring, 99 alumni groups in 30 states and the District of Columbia participated, which was 14 more than in 1995 when the program received the first place award for community service from the American Society of Association Executives.

Bierbauer, a native of Allentown, earned Penn State degrees in 1996 and 1997. He has been a journalist for 25 years, including being CNN's senior White House correspondent for nine years during the Reagan and Bush administrations. Penn State has honored Bierbauer as a Distinguished Alumnus and Alumni Fellow.

McConnell-Serio, basketball coach at Kodak Catholic High School in her native Pittsburgh, earned gold and bronze medals as a member of U.S. Olympic basketball teams in 1988 and 1992. A 1988 graduate, McConnell-Serio was a Kodak All-American her senior year.

McConnell-Serio was a four-time Atlantic 10 All-Conference selection. The conference player of the year in 1985, she led the Atlantic 10 in assists four consecutive seasons.

For more Alumni Association news, see <http://www.alumni.nyu.edu>.

A group of Penn State alumni work to sort canned goods at a food drive for a shelter during last year's National Service Week.

Grant funds available

Matching funds of up to \$120,000 per project are available for the development of new or improved products or processes with Pennsylvania companies through the Ben Franklin Partnership's 1997 Challenge Award Program.

Competitive proposals are evaluated on:

- technical feasibility;
- potential for near-term commercialization;
- potential to create jobs in Pennsylvania;
- company matching funds; and
- university/company partnership.

The closing date for proposals for this program is April 1. Projects selected for funding will start July 1. To find out more about the program, contact the Ben Franklin facility near University Park at (814) 863-4558; in Harrisburg at (717) 948-6339; or in Erie at (814) 898-6114.

LECTURES

Professor of astrophysics to give lecture series on planets

Peter Goldreich, the Lee A. DuBridge professor of astrophysics and planetary physics at the California Institute of Technology, will present the 1997 Russell Marker Lectures in Astronomy and Astrophysics from March 24 to 26 at the University Park campus.

The three-lecture series, titled "Thinking About Our Cosmic Environment," is sponsored by the Eberly College of Science and is open to the public.

The lectures include: "Heliocentrismology" at 8 p.m. Monday, March 24, in 111 Boucke Building; "Clues About How Planets Form" at 4 p.m. Tuesday, March 25, in 55 Osmond Laboratory; and "Turbulence on Earth and in Space" at 4 p.m. Wednesday, March 26, in 55 Osmond Laboratory.

Goldreich was one of eight scientists to receive the 1996 National Medal of Science from President Clinton. He was cited for his profound and lasting contributions to planetary sciences and astrophysics. He also has received numerous other awards, including the 1993 Gold Medal of the Royal Astronomical Society. Goldreich's work has addressed some of the most fundamental issues in planetary science.

PETER GOLDBREICH

Lecture by author on March 27 rounds out Feminist Scholars Series

The final speaker in the Women's Studies Feminist Scholars Series, **Mary Hill**, will present a lecture titled "Charlotte Perkins Gilman: A Woman's Struggle with Womanhood" at 7:30 p.m. on March 27. Currently the presidential professor of history at Bucknell University, Hill will speak in 101 Kern Building on the University Park campus.

Hill is the author of three books on Charlotte Perkins Gilman including *Making of a Radical Feminist* and *Endure: The Diaries of Charles Walter Stetson*, as well as the love letters of Gilman in *Charlotte Perkins Gilman: The Journal of a Woman*.

Most recently, Hill's research focus has shifted to her forthcoming text titled *In Search of the Virgin Queen*. In this piece, Hill explores the ways in which women writers of Native American, Black, Hispanic and Chinese-American descent use story telling to provide a level of healing for their peoples.

The recipient of two grants from the National Endowment for the Humanities, Hill received her doctoral degree from McGill University in 1975. She has been teaching at Bucknell University, primarily in women's studies, for more than 20 years.

For information on this lecture or the Feminist Scholar's Series, please contact the Women's Studies Program at (814) 863-4025.

MARY HILL

March 27 talk to focus on cure for AIDS

"AIDS: Search for a Cure," a March 27 luncheon lecture, will be given by **Kenneth A. Johnson**, Paul Berg professor of biochemistry, at noon in 110 N. Henderson, The Living Center, on the University Park campus.

By the year 2000, 40 million people will be infected with HIV, the virus that causes AIDS. There has been considerable excitement over new drugs that may afford a cure in

some individuals. However, this excitement is tempered by concerns over the ability of the virus to mutate rapidly, leading to resistant forms of the virus. Johnson will discuss his research on dealing with these issues in developing better drugs used to treat AIDS.

This free lecture is sponsored by the Penn State Chapter of Sigma Xi.

Panel to take on alcohol and tobacco advertising

With binge alcohol consumption extracting a deadly toll on college campuses and cigarette smoking the chief preventable cause of cancer in the United States, the College of Communications and the Pennsylvania Center for the First Amendment will hold a roundtable discussion to address the legal, ethical, health and marketing issues surrounding the advertising of alcohol and tobacco products.

Slated for 7:30 p.m. Wednesday, March 26, at the Kern Graduate Center in Assembly Room 112, the discussion brings together experts from The Smear College of Business Administration, University Health Services and the College of Communications.

"You've got child-friendly cartoon figures like Joe Camel pushing cigarettes and a flotilla of frogs croaking for Budweiser. Despite the potentially deadly appeal of these figures, the First Amendment protects such commercial speech," said **Cly Calvert**, assistant professor of communications and asso-

ciate director of the Pennsylvania Center for the First Amendment at the University.

Panelists include: **Marvin Goldberg**, a professor in The Smear College of Business Administration who specializes in social marketing; **Natalia Croll**, assistant director of University Health Services; **Chuck McMellon**, professor in the College of Communications who teaches advertising; and **Calvert**, who specializes in media law and policy issues.

Jeremy Cohen, associate dean of undergraduate studies in the College of Communications, will moderate the discussion and invite participation from the audience.

The Pennsylvania Center for the First Amendment, founded in 1992, conducts educational conferences for lawyers, judges, journalists, educators and the general public. In addition, the center is a resource for the media and the public, and has provided expert testimony to courts and legislatures.

Gay activist to give talk at University Park on March 24

Tony Kushner, award-winning author of "Angels in America" and prominent gay activist, will speak in Eisenhower Auditorium at 8 p.m. Monday, March 24.

Known for his Pulitzer Prize- and Tony Award-winning play, "Angels in America," Kushner's famous work consists of two plays: "Millennium Approaches" and "Perestroika." A seven-hour long play dealing with AIDS and the crisis of conscience the epidemic poses to America, "Angels" has won almost every major theatrical award since opening in Los Angeles in 1992. An upcoming major motion picture based on the play will be directed by Robert Altman.

Integrating historical figures such as Ray Cohn with a potpourri of characters both gay and straight, "Angels"

has played to rave reviews in New York City's Walter Kerr Theatre since 1993. In 1994, the play began its national tour.

Kushner has received numerous playwrighting fellowships and awards and taught at New York University, Yale, the University of Iowa, Princeton and the Juilliard School of Drama. He has a bachelor's degree from Columbia University and a master's in fine arts degree from New York University.

Fifth in the Distinguished Speakers Series, Kushner's presentation is co-sponsored by the Lesbian Gay Bisexual Student Association. Tickets are free and will be available in 225 HUB. For more information, contact **Carol German** in the Office of Student Activities at (814) 863-3786.

Nigerian scholar will address feminism and African gender formation

Nigerian scholar **Oyewumke Oyewumi** will discuss "Feminism and African Gender Formation" from 3:30 to 5 p.m. Wednesday, March 26, in the Paul Robeson Cultural Center on the University Park campus.

Oyewumi, who has written such books as *The Complexity of Sisterhood* and *The Complexity of Sisterhood*, is currently a fellow at the UCLA Rockefeller Humanities Institute for the Study of Gender in Africa. Oyewumi also is the author of *The Invention of Women: Making an African Sense of Western Discourse*

on a book in which she interrogates Western feminist theories, while examining the relationship between motherhood, social identities and female agency in an African context.

Oyewumi, who has received numerous honors over the years including being named to several fellowship positions within the University of California system, earned her master's degree and Ph.D. in sociology both from the University of California at Berkeley.

More Lectures

Author and scholar to dispute "Bell Curve"

MICHAEL HOUT

Michael Hout, professor of sociology and director of the Survey Research Center at the University of California - Berkeley, will deliver the 1996 Francis Sim Memorial Lecture at 8 tonight in 101 Thomas Building on the University Park campus. Hout, internationally renowned expert in the field of stratification research, will discuss "Inequality by Design: Myths, Data and Politics." Author (with five Berkeley colleagues) of *Inequality By Design: Cracking the Bell Curve Myth* (Princeton University Press, 1996), Hout challenges the claims of the bestseller by Richard Herrnstein and Charles Murray, *The Bell Curve*, through a re-analysis of the very data used by Herrnstein and Murray to support their assertion that inherited differences in intelligence explain inequality.

Hout's talk will draw upon some of the recent work on the sources of inequality in the United States and assess the arguments of *The Bell Curve*. The lecture is open to the public.

March 25 panel discussion to look at industrial side of science and technology

Executives from DuPont and deans from four Penn State colleges will participate in a panel discussion titled "Science and Technology: An Industrial Perspective" on Tuesday, March 25, from 3 to 4:30 p.m. in 101 Thomas Building on the University Park campus.

The discussion will focus on the role of fundamental research in producing discoveries that could create new businesses. Panel members will talk about the need for cooperative arrangements between research universities and technology-based companies that could speed the route from scientific discovery to technology development of science-based products.

Participants from DuPont include **Joseph Miller**, senior vice president for research and development and chief technology officer, and **Kurt Landgraf**, chief

financial officer. Participants from Penn State include **Theodore Alter**, interim dean of the College of Agricultural Sciences; **Peter Luckie**, associate dean for research in the College of Earth and Mineral Sciences; and **David Wormley**, dean of the College of Engineering. **Gregory Geoffroy**, dean of the Penn State Eberly College of Science, will facilitate the panel discussion.

Miller has been with DuPont throughout his career in a variety of positions involving research and development, manufacturing, business and marketing. Landgraf was president and chief operating officer of the DuPont Merck Pharmaceutical Co. before his recent appointment as DuPont's chief financial officer.

For more information, contact **Theresa Peters** at (814) 865-6553.

Writer to broach subject of "the classics"

Acclaimed film critic for *New York* magazine and contributing editor for *The New Yorker*, **David Denby**, will lecture at the Hazleton campus on Tuesday, March 25. The program will be held in room G-115 of the Evelyn Graham Academic Building and will begin at 7:30 p.m.

Denby will discuss *Great Books: My Adventures with Homer, Rousseau, Woolf and Other Indestructible Writers of the Western World*, his recent book that rediscovers the masterpieces of the Western literary tradition. In his book he relates his struggles to

break out of the media bubble and read seriously.

Denby was film critic at *The Atlantic* and *The Boston Phoenix* before joining *New York* magazine in 1978. His articles and essays on movies, literature and music also have appeared in *The New Yorker*, *The New Republic* and *The New York Review of Books*.

While at Penn State Hazleton, he also will visit with English students at the campus. His appearance is part of the Penn State Hazleton Lecture Series.

Harvard professor to deliver Harrisburg talk

Harvard University Professor **Herman Chernoff** will deliver this year's Distinguished Statisticians Lecture at Penn State Harrisburg, Capital College.

Chernoff, professor of statistics, will discuss the use of DNA profiling in forensic identification and paternity cases at his 1 p.m. lecture on March 27 in Penn State Harrisburg's Capital Union Building.

A member of the Harvard faculty since 1984, Chernoff, in 1987, received the Wilks

Memorial Medal from the American Statistical Association. Before his appointment at Harvard, he served as professor of applied mathematics at the Massachusetts Institute of Technology (1974-84), and as professor of statistics at Stanford University (1986-74). Chernoff's presentation is open to the public and will be preceded by a luncheon at noon. For more information, contact **Winston A. Richards** at (717) 948-6090.

Satellite seminar looks at technology strategies for rural areas

Learn about "Rural Education and the Information Highway: Making Connections, Building Communities" on Tuesday, March 25 at The Penn State Scanton. This live satellite seminar, including special appearances from **President Bill Clinton** and other prominent public officials, will begin at 2 p.m. and conclude at 4:30. Participants will learn proven technology strategies for rural schools and communities.

Panelists will teach those in attendance how to mobilize resources and propose that the key to successful technology initiatives is community-wide effort, particularly in rural schools struggling with a lack of funding and basic infrastructure.

To register, call **Barbara Neving** from Continuing and Distance Education at (814) 863-0229.

Contemporary works of Nigerian printmaker to be examined

Sharon Pruitt, associate professor of art history at East Carolina University and a specialist in African art, will present a lecture at 7:30 p.m. Tuesday, March 25, in the Palmer Lipcon Auditorium of the Palmer Museum of Art on the University Park campus.

Pruitt will examine the traditional style and themes used in contemporary artworks by **Bruce Onobrakpaya**, a Nigerian Urhobo printmaker, painter and sculptor. Belonging to the first generation of contemporary artists graduating from the Nigerian College of Arts, Science and Technology (NCASST, presently known as Ahmadu Bello University), Onobrakpaya's training was based on the Western illuistic tradition of representational art. However, many of his artworks do not reflect his training in Western aesthetics. Instead, they portray stylistic elements and compositions that mirror traditional African figural sculpture and decorative arts.

The lecture, sponsored by the Department of Art History, is free to the public. For more information, contact the museum office at (814) 865-7672.

Professor to address "Why do we eat?"

Barbara Rolls, the Helen A. Guthrie chair and professor of nutrition, professor of biobehavioral health and professor of behavioral science in the College of Health and Human Development, will give the **Pauline Schmitt Russell Distinguished Research Career Lecture** at 4 p.m. Thursday, March 27, in 5209 Henderson Building on the University Park campus. Rolls will talk about "Need or Greed: Why Do We Eat?"

Rolls, also director of the Laboratory for the Study of Human Ingestive Behavior, studies the psychological and physiological controls of food intake and food selection in normal weight and obese humans and in patients with eating disorders. Some of her recent research has involved the fat substitute olestra.

Red China is focus of March 27 panel talk

A panel discussion, "Red China in Black and White: Misrepresentations in the Media Age," will be held at 8 p.m. Thursday, March 27, in Kern Auditorium on the University Park campus.

The panelists are **Liu Kang**, associate professor of comparative literature and principal author of *Demonizing China: Knowledge Production and Aesthetic Representation of China in the U.S.*; **Shari Roberts**, assistant professor of communication; **Erwin Atwood**, senior research associate, Australia-New Zealand Studies Center; and **K. Thomas Berner**, professor of journalism and American studies and Fulbright lecturer at the China School of Journalism, Beijing.

The talk is sponsored by the College of Communications, the Department of Comparative Literature, the Asia-Pacific Task Force and Chinese Culture Club.

In praise of garlic

Can foods such as garlic aid in the fight against cancer?

John Milner of the Department of Nutrition at University Park will discuss "Natural Anti-Cancer Agents in Foods" during an April 3 presentation at the Penn State Downtown Center in Harrisburg at noon.

Milner's presentation will focus on data from several studies which provide evidence that increased consumption of garlic and its associated sulfur compounds can reduce cancer risk.

The presentation, co-sponsored by the College of Health and Human Development and the Downtown Center, is free to the public. To register, call (717) 783-0433.

Engineering

continued from page 1

and graduate degree programs in nuclear engineering and the education, research and service activities of the Breazeale Nuclear Reactor facility."

The basic conditions established for the planned merger are:

■ To continue the degrees currently offered in both the mechanical and nuclear engineering programs.

All students will be able to continue in their current degree program to completion, and the college will continue to recruit and admit students into the nuclear engineering programs at the bachelor's, master's and doctoral levels.

■ No staff will be discharged as a direct result of the merger and faculty tenure processes currently in place will continue.

■ The new department will maintain and enhance the operation and use of the Breazeale Reactor.

Wormley has appointed a committee to identify and prioritize issues related to the merger, and to establish a process to address these issues. The Mechanical and Nuclear Engineering Department Transition Committee consists of two faculty and two staff members, and one graduate student and one undergraduate from each department (See box). The committee is being chaired by George J. McMurtry, associate dean for administration and planning in the college.

COMMITTEE MEMBERS

The Mechanical and Nuclear Engineering Department Transition Committee includes:

— **George J. McMurtry**, associate dean for administration & planning, chair

— **Anthony Baratta**, professor of nuclear engineering

— **Robert Daum**, graduate student, nuclear engineering

— **Robert Heinsohn**, professor of mechanical engineering

— **Daniel Hughes**, senior research assistant, Breazeale Nuclear Reactor

— **Rebecca Levack**, undergraduate student, nuclear engineering

— **Thomas Litinger**, professor of mechanical engineering

— **Arthur Motta**, assistant professor of nuclear engineering

— **Kim Ripka**, administrative assistant, mechanical engineering

— **Sue Ripka**, staff assistant, mechanical engineering

— **Steven Schroeck**, undergraduate student, mechanical engineering

— **Andrew Smith**, graduate student, mechanical engineering

— **Christine Wilson**, staff assistant, nuclear engineering

NEED MORE?

Minutes of the transition committee meetings will be posted to the Web at:

http://www.engr.psu.edu/www/dept/mech_nuce_merger/

and unified department.

The committee will submit its recommended plans for the merger and the process it will undertake to accomplish the move by early this summer. Minutes of the committee meetings will be posted on the Web at

http://www.engr.psu.edu/www/dept/mech_nuce_merger/

There are strong mutual research interests between these two groups of faculty — particularly in the thermal and heat transfer areas," McMurtry said. "This administrative change will foster increased interaction and collaboration among the faculty and students in the two fields."

College leaders expect to submit a formal proposal this summer for consideration by the University Faculty Senate and the administration. It is planned that the merger will become effective July 1, 1998, subject to approval by the Board of Trustees.

Workshops for minority students planned

The College of Communications will again offer the Multicultural Film/Video Workshop from July 6-18.

For the fourth year in a row, the Penn State College of Communications will offer two workshops to high school students interested in the fields of journalism and film/video production. Each workshop offers minority high school students the opportunity to gain hands-on experience and a deeper understanding of careers in journalism, film and television with the added goal of creating future leaders in each of the industries.

The Multicultural Journalism Workshop, which will be held July 6-18, teaches students basic news writing and newspaper production. Aspiring journalists will learn basic reporting, editing and photojournalism, and gain an understanding of media law and ethics. In addition, the workshop's organizers provide tours of the College of Communications, the *Centre Daily Times*, the *Harrisburg Patriot*, the Penn State Daily Collegian, WPSU-FM and WPX-TV.

The Multicultural Film/Video Workshop, which also runs July 6-18, provides students with the opportunity to work in small groups to develop film and video projects that express their views of the world.

The application deadline for both workshops is April 15. Additional information, workshop posters and applications may be obtained by contacting **Mary Leone** at (814) 863-6081 or by writing to **Joseph Selden**, director of multicultural affairs, College of Communications, 205 Carnegie Building, University Park, Pa. 16802-5101.

Promotions

Staff

Barbara Noll, program aide at The Hershey Medical Center.

Susan K. Oram, coordinator, media sales in Continuing and Distance Education.

Barbara Pancerella, staff assistant VI at Penn State Hazleton campus.

Jeffrey J. Place, computer and electronics specialist at Penn State DuBois campus.

Dale Penelope, employment/compensation associate in Office of Human Resources.

Joseph Segilia, director of outreach at Penn State Fayette campus.

Brenda K. Smith, assistant manager, housing, Housing and Food Services.

Debra S. Stauffer, administrative assistant III in The Smell College of Business Administration.

Stanley B. Supon, senior programs coordinator in Division of Undergraduate Studies.

Michelle L. Thorwart, project associate in College of Health and Human Development.

Julia B. Yost, coordinator, community development at The Hershey Medical Center.

Technical Service

Pauline L. Geithmann, residence hall/project worker in Housing and Food Services.

Gayle E. Goodyear, storeroom/transport aide at The Hershey Medical Center.

William Hughes, campus bus driver in Business Services.

Thomas Krivak, maintenance worker-general A at Penn State Worthington Scranton campus.

Eugene J. Krout, group leader-poultry in College of Agricultural Sciences.

Jerry A. Myers, maintenance mechanic, poultry farms in College of Agricultural Sciences.

Nellie A. Palumbo, janitorial worker/caféteria attendant at Worthington Scranton campus.

Jack W. Rohrbach, stock clerk-truck driver in Housing and Food Services.

Robert D. Smith, audio/visual technician B in University Libraries.

David C. Witherite, poultry research technician in College of Agricultural Sciences.

Carolyn Zimmerman, receiving clerk at The Hershey Medical Center.

Changes

continued from page 1

provement?" said James W. Purdum, general manager of The Nittany Lion Inn.

To answer the question, Purdum and Tom Gibson, assistant vice president for auxiliary services, worked on a proposal for self-operation that ultimately led to the decision to terminate the management agreement with Scanticon International, a Princeton, N.J., and Denmark-based hotel and conference center management company.

The decision was one made strictly for operating efficiency, to ensure continued, long-term viability of both The Nittany Lion Inn and the Conference Center Hotel, and not because of any dissatisfaction, Purdum said.

Everything that Scanticon International was asked to do, they've done, and then some," he said. "They've done an extraordinary job in setting up the conference center hotel — opening it, operating it, establishing operational credibility, establishing quality food service, establishing so many things that are positive for Penn State. We plan to expand on what they've built."

Purdum said the main goal is to take the best that Scanticon has brought to Penn State and the best that The Nittany Lion Inn has to offer and create a combined organization that delivers product and services that are better than either one has been able to offer individually.

Customers at the Penn State Conference Center Hotel will see little difference on May 6, other than a change in signs.

"We don't intend to come in and make drastic changes. There's nothing broken as far as the day-to-day operations go," Purdum said. He said all conference and seminar bookings made by Scanticon will be honored by the University.

The new organizational structure will see Purdum as general manager for both facilities with the assistance of an associate general manager. Directors will have organizational responsibility for human resources, sales and marketing, and reception and property operation for both facilities. This will enable The Nittany Lion Inn and the Penn State Conference Center Hotel to operate more efficiently, as one hotel with two locations, according to Purdum.

"This is a proven organizational structure, not experimental. This is something that single owners of hotels in the same geographic region have used to share business," Purdum said. "It's my hope that this structure will have everyone in the organization thinking about where the customer's needs are best served."

A change for employees is that they all will now work for Penn State. Staffs will be interchangeable and will be assigned based on where they are needed most.

"The change will allow us to move staff around to put people where

For all your conference needs

Beginning May 6, employees of both The Nittany Lion Inn and the new Penn State Conference Center and Hotel (shown above) will come together to better accommodate conference attendees and to provide a better response system for customers.

ACADEMIC CONFERENCES AT SCANTICON

Since The Penn State Scanticon opened its doors in May 1994, it has served the University's academic conferencing needs well. To date, Scanticon has:

- delivered 378 academic programs.
- served 31,459 participants.
- involved more than 500 faculty as program developers, content experts and program chairs.
- worked with all colleges including the Capital College.

Source: Mike Ostroski, director of Conferences and Institutes

they're needed and hopefully achieve some efficiencies there. Banquet servers may be at The Nittany Lion Inn one day and at the Penn State Conference Center Hotel the next," Purdum said.

"The people at both locations are extraordinary. They have extraordinary pride in their jobs. What we need to do during this transition is to maintain that sense of pride and that sense of professionalism and get us all committed to the common goals of serving both our guests and our educational mission," Purdum said.

"There will be a gradual influx of more students at the Conference Center Hotel because our mission is directly associated with helping to educate and provide educational work experience for students through our intern program. Scanticon already has been involved in the program," Purdum said.

Patricia Book, associate vice president and associate dean for Continuing and Distance Education, said the changes also should benefit her unit.

"The combined property eliminates any inherent competition and permits everybody to focus on the services and the space most appropriate to the facility, the needs of the academic conference, professional association or corporate training program," Book said. "Continuing and Distance Education is continuously attracting larger pro-

grams and increasing the average size of our programs. When we're working with 1,500 people and need facilities at both places, it's critical that we have a seamless University response."

Book said the consolidation of the two properties under one management system will make it easier for conference planners and attendees alike.

"They will be able to seamlessly reserve overnight accommodations or meeting space without having to deal with separate properties as we have in the past," she said. "Integrating the information systems, guest services and room reservation systems makes it easier and quicker for us to respond to program participants. That's an immediate benefit."

Other changes coming include a central reservation system for both facilities, shared information systems, one sales and catering system and consistent pricing at the facilities' four restaurants.

These steps are all intended to meet Penn State Hospitality Services' stated mission of uniting quality hospitality and education to be the premiere hotel and conference destination in higher education.

"I'm really passionate about this change. I think it's so good for Penn State," Purdum said.

Overflow keeps others hopping

The Nittany Lion Inn, Penn State Scanticon and Bryce Jordan Center have been very good for business, according to those in the State College business community.

Bob Price, president of Downtown State College Inc., said area businesses have seen a "tremendous" impact from both the Jordan Center and Penn State conference business.

"We continue to see increases, and increases and increases in business downtown," he said. "We haven't had the time or money to do an assessment of the financial impact on downtown, but we plan to survey our members and collect that data."

Price said a joint Penn State/State College marketing committee has been formed and meets regularly to analyze just such issues.

Ainslie Mclay, director of sales at the Days Inn Penn State has worked closely with the Nittany Lion Inn and Scanticon. Both facilities rely on the Days Inn to handle overflow guests from Penn State conferences and Jordan Center events such as the Garth Brooks concert.

Although the Days Inn has a clientele all its own, Mclay notes that his sales team is collaborating with its counterparts at the Nittany Lion Inn and the Conference Center, marketing jointly at a number of hospitality sales conventions.

"We are very pleased," she said. According to Mclay, the number of rooms reserved at the Days Inn in conjunction with the Garth Brooks concert has been "phenomenal."

"It's been fantastic, really. The success of the Jordan Center has been amazing. We are certainly filling rooms that we haven't filled before," Mclay said. "We're just glad to have so many people traveling to State College."

Susan Rose, sales manager at the Hampton Inn Hotel agreed.

Hampton Inn room bookings are up and like the Days Inn, the Hampton Inn routinely handles overflow business for the Nittany Lion Inn and Conference Center.

"I'm over there all the time, meeting with the Penn State planners and events staff. We appreciate all three facilities," Rose said.

The ARTS

AT PENN STATE

Nine to participate in Performance Option

This year, organizers of the Graduate Research Exhibition have added a performance component to the competition, acknowledging that many artistic disciplines cannot present their research or achievement in a static medium. Graduate students from the College of Arts and Architecture's School of Music and School of Theatre Arts will perform works at 8 p.m. Friday, March 21, in room 122 Music Building II on the University Park campus.

"Photographs of Australia"

"Photographs of Australia" by Richard Woldendorp are on display at the HUB Browsing Gallery on the University Park campus, through April 27.

Woldendorp was named Photographer of the Year in 1982 by the Australian Institute of Professional Photographers. He uses the exhibit to express his fascination with the landscape of Australia.

Woldendorp will be available at noon Friday, March 21, in the HUB's Gallery Lounge for an informal discussion.

Juried exhibition

Penn State Berks campus' Freyberger Gallery will host the Nittany Lion Juried Exhibition XII: "Timelines," from March 21-April 17. This biennial exhibition highlights some of the most exciting artists of southeast Pennsylvania and beyond. "Timeframes" is a collaborative project with Albright College's Freedman Gallery and the Reading Public Museum. The theme is "time."

Works will be selected from the submitted proposals to be part of the exhibition. Cash merit awards will be presented, and four to five artists will be invited to participate in the Groulx-Kauffman Award Exhibition in fall 1997.

There will be a free public reception from 5-7 p.m. Friday, March 21. For more information, phone Beverly Leviner, gallery director, at (610) 320-4870.

Percussionist to give recital

Douglas Walter, marimbist and vibraphonist, will perform a guest artist recital at 5:30 p.m. Saturday, March 22, in room 122 of the College of Arts and Architecture's Music Building II

on the University Park campus.

Walter, currently teaching at the University of Colorado, is the only percussionist to win the Concert Artists Guild Award. Walter is equally accomplished in the jazz, orchestral and chamber music realms, having performed with organizations from the Philadelphia Orchestra, to the North Texas One O'Clock Jazz Band, to the New American Ragtime Ensemble.

The concert is free to the public.

Chamber orchestra concert

The Penn State Chamber Orchestra, under the direction of Pu-Qi Jiang, associate professor of music, will present a concert at 3 p.m. Sunday, March 23, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

The Chamber Orchestra consists of more than 25 of the School of Music's top instrumentalists. It performs only in the spring. The concert is free to the public.

Behrend Concert Choir prepares for Carnegie Hall

The Concert Choir at Penn State Erie, The Behrend College, made up of students who are not majoring in music, will perform Faure's "Requiem" Sunday, March 23 at 3 p.m. in the Reed Union Building Commons. This presentation will prepare the 40 members of the Concert Choir to perform the same piece one week later, Sunday, March 30, on stage at Carnegie Hall in New York City.

At Carnegie Hall the Concert Choir will combine with 250 voices representing six colleges.

Admission to the Concert Choir performance at Penn State-Behrend on March 23 is \$4. Tickets may be reserved in advance by calling (814) 898-6289.

Odyssey on WPSU

On the next episode of Odyssey Through Literature, Leonard Rubinstein and Wimal Dissayanake of the University of Hawaii discuss Eastern concepts of self. Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WPSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WFSB, 90.1 in northern Pennsylvania.

Art lecture

Sharon Pruitt, associate professor of art history at East Carolina University, will give a lecture at 7:30 p.m. Tuesday, March 25, in the Palmer Lipson Auditorium on the University Park campus. Her talk will focus on the work of Nigerian printmaker Bruce Onobrakpaya.

French Horn Ensemble to play on March 24

The Penn State French Horn Ensemble, directed by Lisa O. Bontrager, associate professor of music, will present a free concert at 8 p.m. Monday, March 24, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

Tuba soloist, Jason Byrnes, a graduate tuba performance student, will be featured in the Bernhard Heiden *Variations for Solo Tuba and Nine Horns*. In addition to the repertoire for the 18-member ensemble, Bontrager and assistant director Kim Rees will present *Calls for Two Horns* by Verne Reynolds.

Film festival

The Mont Alto campus Arts Project, an organization that encourages appreciation of the arts, presents its first Foreign and Cult Film Festival during the month of March. The series is free to the public. Films to be shown are:

- Monday, March 24, "King of Hearts," a 1967 French comedy and '60s cult film.
- Monday, March 31, "Blue Angel," Marlene Dietrich stars in this German '30s classic that launched her career.
- Tuesday, April 1, "Murder on the Orient Express," based on Agatha Christie's mystery novel.

All films will be shown at 7:30 p.m. in the auditorium, General Studies Building, with the exception of "Murder on the Orient Express," which will be shown in the Conklin Hall Game Room.

Following the films, a short panel discussion will be held. For more

information, contact Peggy Russo at (717) 749-6231.

"Faces of America"

A one-person show that addresses the questions of multiculturalism in today's society through the eyes of Generation X will be presented at 8 p.m. Wednesday, March 26, in Schwab Auditorium on the University Park campus. The play, featuring eight characters, is free to the public.

"Faces of America" is based on true stories researched through workshops and interviews with high school and college-age populations. The eight characters depicted, all played by actress Fran de Leon, each represent a different cultural aspect of American society: African, Asian, Mexican-American, Native American Indian, East Indian, European, Hapa (mixed blood) and an "All in One Generation X-er."

First produced at the Los Angeles Theatre Center in March 1995, "Faces of America" has since toured numerous West Coast colleges, as well as several southern California arts and heritage festivals. The play is directed by Colin Cox, artistic director and founder of Will & Company, a Los Angeles-based theatre company dedicated to arts in education and multicultural work in classic and contemporary pieces.

For more information on the event, contact the Paul Robeson Cultural Center at (814) 865-3776.

Bach's Lunch features concert choir

The Penn State Concert Choir, directed by D. Douglas Miller, professor of music, will perform at the free 20-minute Bach's Lunch concert at 12:10 p.m. Thursday, March 27, in the Helen Eakin Eisenhower Chapel on the University Park campus.

Audience members are invited to take their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Trombone choir to mix it up

The Penn State Trombone Choir will present a free performance of the "Requiem" by Gabriel Faure as transcribed by Mark Lusk, associate professor of trombone, on Thursday, March 27 at 8 p.m. in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

The trombone choir, under the direction of Lusk, will be joined by other students from the School of Music. Readings of literature by Donald Hall, T.S. Eliot and Dylan Thomas

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, March 21

Kern Graduate Commons, noon, Kern Lobby. Concert titled "Victorian Brass."

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk by Robin Seymour on "Painting by The Eight" at the Palmer Museum."

Center for the Performing Arts, 8 p.m., Schwab Auditorium. "Arts Quartet." For tickets, phone (814) 863-0255.

"Penn State's 12th Annual Graduate Research Exhibition," 8 p.m., 122 Music II. The "Performance Option" of this exhibition.

Saturday, March 22

"Penn State's 12th Annual Graduate Research Exhibition," 10 a.m. to 6 p.m., HUB Ballroom.

Palmer Museum of Art, 11 a.m., Christoffers Lobby. Jan Kinney presents a "Storyline" for the entire family.

"Thundamental Monster Trucks," 8 p.m., The Bryce Jordan Center. School of Music, 5:30 p.m., 122 Music II. Guest Recital presents Douglas Walter, percussion.

School of Music, 8 p.m., Recital Hall. Graduate Recital presents Jeanne Provane, flute.

Sunday, March 23

"Thundamental Monster Trucks," 8 p.m., The Bryce Jordan Center.

Center for the Performing Arts, 3 p.m., Eisenhower Auditorium. "Wind in the Willows."

For tickets, phone (814) 863-0255. School of Music, 3 p.m., Recital Hall. "Chamber Orchestra" with Pu-Qi Jiang, conductor.

For tickets, phone (814) 865-0431. School of Music, 4 p.m., 122 Music II. Graduate lecture/recital presents Jeanne Nagurny, voice.

Monday, March 24

Center for Women Students, 7 p.m., 102 Thomas. Film titled "She Cried No."

School of Music, 8 p.m., Recital Hall. "Horn Ensemble" with Lisa Bontrager, director.

Tuesday, March 25

School of Music, 8 p.m., Recital Hall. "Flute Studio Recital."

Wednesday, March 26

Center for Women Students, 1200 to 1 p.m., CWS Resource Room, 120 Boucke. Film, "For Better or Worse: Same-Sex Marriage."

School of Music, 8 p.m., Recital Hall. Faculty Recital presents "Pennsylvania Brass Works."

Thursday, March 27

■ B'nai B'rith Hill Foundation, 7:30 p.m., Palmer Lipson Auditorium. Film titled "Siege."

School of Music, 8 p.m., Recital Hall. "Trombone Choir/University Brass" with Mark Luk, director.

Friday, March 28

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Catherine Ciferri on "American Watercolors at the Palmer Museum."

Saturday, March 29

School of Music, 8 p.m., Recital Hall. Student recital presents Nina Solisov, cello.

"A Thousand and One Nights"

The Indianapolis Ballet Theatre presents the original ballet "A Thousand and One Nights" at 8 p.m. Friday, April 4, in Eisenhower Auditorium on the University Park campus. For more information on the production, contact the ticket center at (814) 863-0255.

Kiss: 7:30 p.m., The Bryce Jordan Center.

Sunday, March 30

Phil Collins: 8 p.m., The Bryce Jordan Center.

Monday, March 31

School of Music, 8 p.m., Recital Hall. Student Recital presents Kristin Lunetta, voice, and Tom White, piano.

SEMINARS

Friday, March 21

Office for Minority Faculty Development, 2 to 4 p.m., 301A Agricultural Administration. "Teaching and Mentoring Minority Undergraduates (Effective Approaches and Strategies)."

Biology, 2:30 p.m., 8 Mueller Laboratory. Xing Wang Deng on "A Light-Regulated Developmental Switch in Arabidopsis."

Accounting, 3:30 to 5 p.m., 333 Beam. Dhananjay Nanda on "Non-Financial Measures and Management Control in Cost Centers."

Monday, March 24

Continuing and Distance Education and the College of Education's Adult Education Program, 11:45 a.m. to 1 p.m., 502 Keller. Ann H. Luck on "Nuts and Bolts of Distance Education Capabilities."

■ Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Paul Robillard on "Monitoring Networks in Ecuador: A Fulbright Experience."

Physics, 3:30 p.m., 339 Davey Laboratory. John Hook on "Superfluidity of Helium in Aerogel."

The Institute for High Performance Computing Applications, 3:35 to 4:25, 215 Hammond. George Karniadakis on "Spectral/Ph Element Methods for Parallel

Computers."

Science, 8 p.m., 111 Boucke. Peter Goldreich on "Heliosismology."

Lesbian Gay Bisexual Student Association, 8 p.m., Eisenhower Auditorium. Tony Kushner, author of *Angels in America*, to speak.

Tuesday, March 25

Continuing and Distance Education, 2 to 4:30 p.m., The Penn State Scanticon: Panelists to speak on "Rural Education and the Information Highway: Making Connections, Building Communities."

Science, 3 to 4:30 p.m., 101 Thomas. DuPont executives and four Penn State deans discuss, "Science and Technology: An Industrial Perspective."

Biology, 4 p.m., 8 Mueller Laboratory. Christopher Paradise on "Abiotic Factors, Resources and Treehole Insect Communities."

Science, 4 p.m., SS Osmond Laboratory. Peter Goldreich on "Clues About How Planets Form."

Nutrition, 4 p.m., S209 Henderson. Henry Ginsberg on "Regulation of Lipoprotein Assembly on the University Park campus. For more information on the production, contact the ticket center at (814) 863-0255."

■ Art History, 7:30, Palmer Lipson Auditorium. Sharon Pruitt on "Contemporary Nigerian Art."

Geoscience, 4 p.m., 112 Walker. Jim Kennett on "Causes of Late Quaternary Climate Change: A Santa Barbara Basin Perspective."

■ Art History, 7:30, Palmer Lipson Auditorium. Sharon Pruitt on "Contemporary Nigerian Art."

Women's Studies, noon to 1:30 p.m., 102 Weaver. Lori Ginzberg on "Sexuality and Citizenship."

Gerontology Center, 12:15 to 1:15 p.m., The Living Center, 110 Henderson. Sara Lelich on "A Comparison Between Medical and Social Models of Adult Day Care."

Accounting, 3:30 to 5 p.m., 333 Beam. Christopher L. Jones on "The Association of Discretionary Accruals with Current Returns, Current Market Values and Future Returns."

■ Paul Roberson Cultural Center, 3:30 to 5 p.m. Oyeronke Oyewumi on "Feminism and African Gender Formation."

Engineering Science and Mechanics, 3:35 p.m., 212 Hammond. Mark D. Walters on "MEMS: The Next Industrial Revolution."

Science, 4 p.m., SS Osmond Laboratory. Peter Goldreich on "Turbulence on Earth and in Space."

■ Women's Studies, 7 p.m., 123 Chambers. "Female Circumcision: Rite of Passage or Genital Mutilation?"

College of Communications and the Pennsylvania Center for the First Amendment, 7:30 p.m., Assembly Room 112, Kern Graduate Center. Panelists will hold a roundtable discussion to address the legal, ethical, health and marketing issues surrounding the advertising of alcohol and tobacco products.

Thursday, March 27

Sigma Xi, noon, 110 N. Henderson. Kenneth A. Johnson on "AIDS: Search for a Cure."

Women's Studies, noon, 12 Sparks. Video, "The American Experience 2. Ida B. Wells: A Passion for Justice."

Physics, 3:30 p.m., 101 Osmond Laboratory. Ben Widom on "Phases and Their Interfaces."

Health and Human Development, 4 p.m., S209 Henderson. Barbara Ross on "Need or Greed: Why Do We Eat?"

Women's Studies, 4 to 5:30 p.m., 102 Weaver. Lynda Goldstein and Virginia Smith on "Martha Stewart: Domestic Dominance as Cultural Icon."

Women's Studies, 7:30 p.m., 101 Kem. Mary Hill on "Charlotte Perkins Gilman: A Woman's Struggle with Womanhood."

■ College of Communications, the Department of Comparative Literature, the Asia-Pacific Task Force and Chinese Culture Club, 8 p.m., Kern Auditorium. Panelists on "Red China in Black and White: Misrepresentation in the Media Age."

Friday, March 26

Biology, 2:30 p.m., 8 Mueller Lab. Philip Benfey on "Radial Patterning and Cell Expansion in the Arabidopsis Root."

Monday, March 31

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. D. Yung on "High Performance Fortran and Java Compilers."

CONFERENCES

Wednesday, March 26

Forest Resources, Nittany Lion Inn. Conference on forest issues, through 27.

Monday, March 31

President's Commission on Racial/Ethnic Diversity, Nittany Lion Inn. "Diversity - Beyond Awareness and Education."

EXHIBITS

HUB Art Alley Panels

Oil and print exhibit by Amy Jane Whitney and Darren R. Gier, through May 4.

HUB Browning Gallery

■ "Photographs of Australia" by Richard Woldendorp, through April 27.

HUB Formal Gallery

Mixed media works by Howard Brooks, March 25-May 4.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Kern Exhibition Area

Photographic work of David Driscoll, through April 6.

North Halls

Paintings by Jodi Ruffner, through April 30.

Palmer Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18.

Zoller Gallery

School of Visual Arts, "Undergraduate Juried Exhibition," through March 28.

■ Reflects an international perspective.

Private Giving

Four alumni lead campaign in Mid-Atlantic states

Four more Penn State alumni have been named members of the steering committee for the University's upcoming capital campaign. They will work to secure major gifts from alumni and friends in Philadelphia, New York City and other Mid-Atlantic communities.

The new members are **Edna Peterson Bennett**, a benefactor of the College of Health and Human Development, of Wilmington, Del.; **J. Lloyd Huck**, retired chairman of the board of Merck & Co. and former president of the Penn State Board of Trustees, of Morristown, N.J.; **Ira M. Lubert**, managing director of Technology Leaders L.P. of Wayne, Pa.; and **Arthur J. Nagle**, managing director of Vestar Capital Partners in New York City.

Bennett, a well-known Wilmington area civic leader and philanthropist, is a member of the "Famous 500," the first freshman class of women admitted to Penn State following World War II. She earned her bachelor's degree in home economics with an emphasis in child development in 1953. Her husband, **C. Eugene**, who died in 1996, began his Ph.D. work in chemistry at Penn State and later worked in a variety of settings, including real estate and investments.

The Bennetts' gifts to Penn State have renovated the model preschool playground for the College of Health and Human Development's Child Development Laboratory and established the Bennett Chair in Human Development and Family Studies. Bennett serves on the boards of the Second Baptist Church in Wilmington and of the Delaware Symphony.

Huck, a 1946 graduate in chemistry, will serve as campaign treasurer. Now an emeritus trustee of Penn State, he was president of the board from 1988

EDNA PETERSON BENNETT

J. LLOYD HUCK

IRA M. LUBERT

ARTHUR J. NAGLE

to 1991 and president of the alumni association from 1975 to 1977. After retiring in 1986 from Merck & Co. following nearly 30 years as a research chemist and executive, he was chairman of the board and CEO of Nova Pharmaceutical Corp. until 1991. The University named him a Distinguished Alumnus in 1993.

For Penn State, he has chaired the Campaign for The Hershey Medical Center, served as a committee member of the Campaign for the Library and chaired the leadership committee for establishing the Biotechnology Institute. Among other gifts to the University, he and his wife, **Dorothy**, a 1943 Penn State graduate in home economics, have supported the Biotechnology Institute and endowed chairs in medicine and in molecular and cell biology at The Hershey Medical Center, in nutrition in the College of Health and Human Development and in special collections in the University Libraries.

Lubert, a 1973 graduate in food service and hotel administration, will head the major gifts effort in the Philadelphia region. He was named an Alumni Fellow by Penn State in 1995 and is a mem-

ber of the University Libraries Development Advisory Board and past chair of the advisory board to Abington College. In addition to his work with Technology Leaders L.P., he is president of IL Management, manages two venture capital funds and oversees acquisition strategies for GF Management.

A former Penn State wrestler, he was an alternate member of the 1972 U.S. Olympic Wrestling Team and has started wrestling camps to encourage development of youth in the sport. In addition to supporting other areas, gifts from Lubert and his wife, **Karen**, a 1971 Penn State graduate in education, have endowed a wrestling coach position, scholarships for Abington College and a student professional development program in the School of Hotel, Restaurant and Recreation Management.

Nagle, a 1961 graduate in mathematics and resident of Bronxville, N.Y., will head the major gifts effort in the New York region. Following graduation, he went on to work for IBM and served as an officer in the U.S. Navy before earning an MBA from Columbia University in 1967. He then worked with

investment banking for First Boston Corp. until 1988, when he became a co-founder of Vestar Capital Partners. He is a director of numerous corporations, including Prestone Products, Chart House Enterprises and Remington Products.

At Penn State, he served on the committee leading the campaign to raise funds for The Bryce Jordan Center. Gifts from Nagle and his wife, **Paige**, a Northwestern University graduate and interior designer, have supported the Penn State Education Partnership Program, the Jordan Center and the Campaign for the Library. The Nagles also have endowed several scholarships, including one for women's soccer student-athletes.

The new campaign will aim to raise private funds for scholarships, graduate fellowships, faculty endowments and a variety of academic programs. The campaign's goal will be announced later. The regional members will join campaign chair **Edward R. Hintz** of New York in providing leadership for the fund drive and soliciting major gifts.

Partings

Assistant to dean in Smeal College retires

Trudy A. Smith, The Smeal College's long-time administrator for personnel and facilities, has retired. Holding the title of assistant to the dean for human resources and administrative services, she served the college for 24 years, and worked for the University of Pennsylvania for a total of 30 years.

A native of Germany, she joined Penn State in 1967 as an assistant to **Eugene J. Kelley**, dean emeritus of The Smeal College. In 1973, Smith took on her role as personnel and facilities coordinator. Over the ensuing

TRUDY A. SMITH

years, she served in numerous leadership roles for committees and task forces at both the college and University levels. These groups concerned themselves with a wide range of matters from budgetary and planning subjects to diversity and women's issues. In all, Smith was active in some 40 college and Penn State organizations. In addition, she managed activities for several college and community conferences. In 1988, she was nominated for the John E. Willinson Award for Administrative Excellence.

Smith became associate chair of the Centre County United Way in 1979 and, over the years, also served on groups within the University supporting the United Way. Her successful work with the charitable group was recognized with awards in 1985 and 1996.

She was a member of the American Management Association and the Centre County Personnel Association.

Other retirements

Dorothy I. Barnett, residence hall worker, Housing and Food Services, from March 4, 1976, to Jan. 4.

Anthony N. Bertoni, maintenance mechanic at The Hershey Medical Center, from May 24, 1976, to Dec. 21, 1996.

Zdzislaw T. Bieniawski, director of the Mineral Resources Institute and professor of mineral engineering, College of Earth and Mineral Sciences, from March 1, 1978, to Jan. 1.

Faculty/Staff Alerts

Penn State golf courses

The White Course and Driving Range on the University Park campus are open. The Blue Course will open on Saturday, March 29. Season passes are on sale now. Hours are 9 a.m. to 5 p.m., Monday through Friday.

Registration nears for diversity workshop

The registration deadline for the workshop, "Diversity: Beyond Awareness and Education" on Monday, March 31, at The Nittany Lion Inn, University Park campus, is Friday, March 21.

There is a registration fee of \$20, which includes lunch and some resource materials. For registration information, contact Shannon Hoover at (814) 863-8493 or at sqh7@psu.edu.

Numbers needed

In 1996, more than 13,000 Penn State students were involved in community service totaling more than 255,000 hours across the state. This represents approximately \$1.3 million, based on a minimum wage average.

These numbers are underestimated due to underreporting. Student organizations and University departments are requested to submit their numbers for the 1996-1997 report. If you have not received a report form, please call the Office of Volunteer Programs and Services at (814) 863-4624 for a copy. Deadline is March 31.

SERS counseling center relocates

The State Employees' Retirement System State College Retirement Counseling Center has relocated from its previous location at 208 West Hamilton Ave. in State College, to 2525 Green Tech Dr., Suite AA, State College. The local and toll-free telephone numbers remain the same: (814) 863-6505 and 1-800-633-5461.

Libraries adds new twist to databases

"New Titles," the Library Information Access System's (LIAS) most recent addition to its family of databases, contains new titles that are on order or have been added to Penn State's catalog. The CAT, during the past six months. New Titles contains only "brand new" titles—those not previously found in the CAT. If another copy or location is added to an existing title in the CAT, it isn't considered a new title.

New Titles even includes call number and status information, and is searchable using any LIAS command. To find this resource, go to the selection menu by typing "select" at any LIAS prompt (>>>). Choose "New Titles" and press ENTER. You can search this database by using the familiar LIAS commands and techniques. Type "help new" at any

prompt (>>>) in the CAT for details and examples.

In the early morning hours of the first Saturday of each month, New Titles will be updated so that the previous month's additions are added and the oldest month's titles are discarded. A message on the welcome screen tells you the current date range.

Affirmative action for Vietnam/disabled veterans

The University is a government contractor subject to Section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended. This regulation requires government contractors to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era.

A "disabled veteran" is a person entitled to disability compensation under laws administered by the Veterans Administration, for disability rated at 30 percent or more, or a person whose discharge or release from active duty was for a disability incurred or aggravated in the line of duty.

A veteran of the Vietnam era is someone who served in active duty during the period beginning on Feb. 28, 1961, and ending May 7, 1975, in the case of a veteran who served in the Republic of Vietnam during that period; or the period beginning on Aug. 5, 1964, and ending on May 7, 1975, in all other cases, and qualified for coverage during the first four years following discharge from the service.

If you are a disabled veteran or Vietnam veteran covered by these definitions and would like to be considered under the affirmative action program, please contact the Affirmative Action Office at (814) 863-0471.

The information requested is voluntary and will not be used to adversely affect the terms and conditions of your employment. It will be kept confidential, except that (1) supervisors and managers may be informed regarding restrictions on work duties and necessary accommodations; and (2) first aid personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment.

Affirmative action for individuals with disabilities

Penn State is a government contractor subject to Section 503 of the Rehabilitation Act of 1973, which requires government contractors to take affirmative action to employ and advance qualified individuals with disabilities.

If you have a physical or mental impairment, a record of having had such an impairment or are regarded as having an impairment that substantially limits your ability to secure, retain or advance in employment, we would like to include you under the affirmative action program.

It will assist us in proper placement and appropriate accommodations if you tell us about any special methods, skills or procedures which qualify you for jobs that you might not otherwise be able to do because of your impairment, so that you may be considered for any position of that kind, and (b) possible accommodation which could be made to enable you to perform the job properly and safely.

Submission of this information is voluntary and refusal to provide it will not subject you to discharge or disciplinary treatment. Information obtained concerning individuals shall be kept confidential, except that (1) supervisors and managers may be informed regarding restriction on the work duties of handicapped individuals, and regarding necessary accommodations; (2) first aid and safety personnel may be informed if the condition might require emergency treatment; and (3) government officials investigating compliance with the act will be informed.

If you are an individual with a disability and would like to be considered under the affirmative action program, please contact the Affirmative Action Office at (814) 863-0471 V/TTY.

Religious holidays days

Occasionally students request exemptions from class attendance and other University obligations for purposes of religious observance. The Center for Ethics and Religious Affairs, in consultation with campus and community religious leaders, has compiled a list of holy days of the major world religions for which observance may require a student to depart from his/her normal routine. The list can be obtained by contacting the center at (814) 865-6548, or on the Web at <http://cac.psu.edu/~jcw6/rchln.html>. Only those holy days which occur while classes are in session are listed.

True PSU

In 1994, Penn State introduced True PSU, a residential long-distance program available to full-time faculty and staff. Since then, True PSU Calling Cards with low fixed rates have been offered, discounts have increased, bill changes have been implemented to meet user requests, and a policy change was implemented so retired employees, eligible for benefits, and spouses who are eligible to continue benefits from the University may retain True PSU service.

Detailed information about the True PSU program and features, how the program works, how to enroll and more, can be found at the Office of Telecommunications' Web site at <http://www.etc.psu.edu/services/tru-psu.html>. For those who may not have access to the online information, True PSU program information packets are available by calling the Office of

Telecommunications' Business Office at (814) 865-8311.

Bicycle hazards

As a reminder to the University community, the parking and securing of bicycles in non-approved locations poses a safety hazard. The parking and locking of bikes on exterior ramps, stairs, landings, handrails and guardrails can hinder and block the normal use of these essential building components, as well as entrance and exit doors.

When bikes are taken into buildings similar problems are encountered. Bikes not only impede the movement of building occupants out of the building in an emergency but also can restrict emergency personnel moving into the building. If bikes are observed in non-residential buildings or parked in areas causing a potential hazard, the user can expect the bike to be removed and impounded by Police Services.

For more information, please refer to University Safety Policy SY - 16 "Regulations for Bicycles/Mopeds/Skateboards/Scooters/Roller Blades/Roller Skates."

Taxes on University benefits

Due to changes in the IRS laws regarding the graduate-level tuition discount benefit for employees and their spouses, the University Payroll Office will be withholding taxes on one-third of the benefit in the March 28 biweekly and monthly payrolls. The remaining two-thirds will have the taxes withheld in the following two consecutive pay periods. This legislation has no impact on individuals appointed as graduate assistants. Under the law, the benefit for graduate-level tuition discount is subject to withholding tax and reported as income on the employee's W-2.

Presently, there are three versions of legislation that will remain in bill beyond the June 30, 1997, expiration date. The good news is that all three forms of the current pending legislation will exempt the graduate tuition benefit from being taxed in the future. In addition, both the U.S. House and the Senate's version include language that will make the tax exemption permanent. Only President Clinton's version retracts the exemption as temporary, with an expiration date of Dec. 31, 2000.

If this legislation is not in place in time for the summer '97 sessions, the present plan is to add the benefit received for the summer into the July monthly payroll and the Aug. 1 biweekly payroll. As new information is available regarding this legislation, the University Payroll Office will publicize it to the University community.

Anyone with questions can call the payroll office at (814) 865-7621 or e-mail payroll@psu.edu.

Appointments

Center names associate director

Carol L. Everett has been named associate director of the Center for Quality and Planning. In this position, she will consult with academic and academic support units in planning and quality improvement initiatives. Many of the responsibilities of her former position as assistant director of the CQI Center (1993-1996) will continue into her current position, including consulting with leaders of academic and administrative units to define their core customers or constituents; identifying the unit's critical processes; and assisting in the formation of quality improvement teams around those processes. Everett will continue to develop and implement the University's CQI marketing plan that promotes and recognizes the University's quality improvement initiatives.

CAROL L. EVERETT

Everett has a bachelor's degree in French from the University of Montana, a master's degree in education from the University of North Carolina at Chapel Hill, and an MBA from Penn State. From 1978-1992 she was a senior planning analyst in the Office of Planning and Analysis. Everett is the author of institutional research reports on student retention and student outcomes and was the project director for annual analyses of faculty salaries. As a member of the Equal Opportunity Campus Evaluation Team, she participated in site visits of Penn State's Commonwealth Campuses to evaluate programs and activities for minority students.

Everett served as an examiner for the Pennsylvania Quality Leadership Award in 1996 and represents Penn State on the American Association for Higher Education Campus Quality Coordinators Network.

Planning consultant comes on board

Mary Ellen Litzinger has been named quality and planning consultant facilitator in the Center for Quality and Planning. In this position, she will be responsible for helping units to integrate quality principles and tools into the strategic planning process.

Litzinger received her bachelor's degree in English from Ithaca College in 1971; her master's degree in library science from the University of North Carolina-Chapel Hill in 1972; and her doctoral degree in instructional systems from Penn State in 1994. Since coming to Penn State in 1981, she has served the University Libraries as a general reference librarian, an instructional specialist and an education librarian. Litzinger also is an integral part of the libraries' CQI efforts, and served on a team which investigated the delivery of basic library skills instruction. Among her recent activities are designing and teaching a course in process benchmarking, and investigating quality improvement initiatives in industrial and academic settings.

The author of many articles and book chapters on the role of user education in academic libraries, Litzinger also is the co-author of *Creating Connections: A Four-Step Program for Managing Your Stress*. She has been an adjunct professor at the University of Hawaii

MARY ELLEN LITZINGER

School of Library Science and a consultant to the Bibliothèque Centrale, Université du Burundi.

New CEO named for Mont Alto

David H. Goldenberg, executive dean of The Sage Colleges in Troy and Albany, N.Y., and dean of Russell Sage College, has been named campus executive officer of the Mont Alto campus, effective June 15. The Mont Alto campus will become one of 12 campuses of the Commonwealth College on July 1.

As executive dean, Goldenberg is one of five senior central officers of the multi-campus Sage Colleges, which has a combined enrollment of about 4,000 students. He has been responsible for academic and student affairs, enrollment management, registrar offices, libraries, administrative computing and academic technologies.

He also serves as the chief academic and chief student life officer of Russell Sage College, the undergraduate college for women, and he has the academic rank of full professor in the Department of Education. Contributing author to *Academic Advising and Faculty Roles* (1995) and *Enhancing Academic Advisement Through Faculty Development* (1996), Goldenberg also has written on the law and student discipline, leadership training and models for shared learning.

Before assuming positions at the Sage Colleges in 1991, Goldenberg was at Bellarmine College in Louisville, Ky., from 1986 to 1989 where he served as dean, assistant vice president for academic affairs and associate provost for academic affairs. He was responsible for the academic, financial, technology and international programs of the college. He also managed the Data Courier, an international online database of business information, an industry-college venture in economic development.

From 1978 to 1986 he was at Bradley University in Peoria, Ill., as director of the Center for Orientation, Advancement and Retention and then chair of the Academic Exploration Program. He also was a specialist in student affairs at the University of the State of New York, the State Education Department, Albany, from 1976 to 1978.

Goldenberg received his doctor of education degree in education administration from Illinois State University and his B.S. and M.Ed. from the University of Hartford, Conn. He also has certificates of advanced study from Cornell University in labor law, Harvard University in educational management and a post-doctoral certificate in art history from Oxford University.

Among his most recent awards is a certificate of recognition from the New York State Higher Education Opportunity Program and an outstanding service award from the National Academic Advisers Association. He serves on a number of professional and community boards, including as chairman of the Academic Council for Hudson Mohawk, a consortium of 18 colleges in the area.

Smeal College welcomes new assistant to the dean

Christopher A. Fivek has been appointed the assistant to the dean for human resources in The Smeal College of Business Administration. In his new post, he will coordinate human resources activities and needs for an organization of more than 220 faculty and staff members. Fivek succeeds Trudy A. Smith, who recently retired after 30 years of service at Penn State. (See page 12).

For the majority of Fivek's 21-year professional career, he has been a manager with Agway Inc., joining the company shortly after his graduation from Albright College, Reading, Pa., in 1975. His

CHRISTOPHER A. FIVEK

first position was as a line-planner manager. In 1983, he was named district manager in the firm's energy division, supervising 10 petroleum bulk plant operations in four states. Four years later, he became regional human resource manager, with responsibility for nearly 1,000 employees at 125 locations in Pennsylvania, Maryland and New York.

In 1995, he joined Penn State as human resource officer for the Commonwealth Educational System.

Fivek holds a bachelor of arts degree in sociology from Albright and has taken numerous management and human resource-related training courses. He also is certified in activity vector analysis and workforce empowerment. He is a member of the Society for Human Resources Management and the Harrisburg Area Personnel Association.

Interim CEO in place at Great Valley

Madlyn L. Hanes has been named interim chief executive officer at the Penn State Great Valley Graduate Center, effective March 15.

Hanes, an associate professor of curriculum and instruction, joined Penn State in 1988 as director of academic affairs at the Delaware County campus.

From 1995-96, she served a dual role as director of academic affairs at Penn State Great Valley and Delaware County campuses.

Hanes has served a number of leadership roles in higher education, including a three-year post as chairwoman of Penn State's Commission on Undergraduate Education from 1992-1995. Her international experience includes work with overseas American schools, ministries of education and higher educational institutions in Ecuador, Israel, Korea and Jamaica, and a special appointment to the University Council of Jamaica. Her area of scholarly research includes professional education and curriculum design. She is the author of two books, 30 articles and monographs and 20 technical reports to sponsors on program development and accreditation and professional licensure.

Hanes has presented more than 75 scholarly papers and invited addresses, more recently on matters of educational reform, at a range of national and international professional and technical meetings she currently serves on the state board of the Pennsylvania American Council of Education, and as one of Pennsylvania's three delegates to the national office of women in higher education administration.

Hanes earned her Ph.D. in curriculum and instruction from the University of Florida, where she also earned her B.A. in English and her M.A. in speech pathology. She is a licensed speech-language pathologist with the American Speech-Language Hearing Association. Before joining Penn State, she served as director of graduate studies in the College of Education at the University of South Carolina, where she also headed its graduate reading and language clinic.

MADLYN L. HANES

Arts

continued from page 10

will be interspersed between the movements of the "Requiem."

"A Thousand and One Nights"

Prepare to be whisked away to a far-off land when the Indianapolis Ballet Theatre performs "A Thousand and One Nights" at 8 p.m. Friday, April 4, in Eisenhower Auditorium on the University Park campus. The concert continues the Body Language series sponsored by the College of Arts and Architecture's Center for the Performing Arts.

"A Thousand and One Nights," an original ballet by Indianapolis artistic director **Eldar Aliev**, premiered in April 1995, drew rave reviews from the international media and was named one of the year's "Top 5" dance events by the *Indianapolis Star*. Aliev's two-act rendering was inspired by Fokine's ballet "Scheherazade," adapted from classic literature's *Arabian Nights*.

Tickets for general admission are \$25.50; students \$21.50. For tickets or more information, contact the Arts Ticket Center, open Monday through Friday from 8:30 a.m. until 4:30 p.m., at (814) 863-0255. (Outside the local calling area, phone (800) 278-7849.

Jewelry at the Kern Exhibition Area

The Kern Graduate Jewelry Flat Cases feature the jewelry of **Laveta Piemme** through April 6.

Piemme, who has worked with clay for more than 25 years, has shifted her focus from wheel-thrown pottery to jewelry, while continuing to combine colors that sing in harmony with one another.

Art on the Move

Art on the Move, exhibited in North Halls on the University Park campus, will display the paintings of **Jodi Ruffner** through April 30.

Ruffner has exhibited paintings at the Zoller Gallery and Patterson Gallery at University Park and the Doshi Center for Contemporary Arts in Harrisburg.

A native of York, Pa., Ruffner is a junior majoring in the fine arts.

Special exhibit in HUB's Art Alley

The Hetzel Union Building's Art Alley on the University Park campus features an exhibit of oil and print through May 4.

The printmaking work of **Darren Grier**, a senior art major, and the oil painting of **Amy Whitney**, also a senior art major, is on display.

One-woman show

Fran de Leon portrays eight different people in the March 26 play, "Faces of America," at 8 p.m. in Shwab Auditorium on the University Park campus. For more information on the free show that addresses multiculturalism in today's society, call the Paul Robeson Cultural Center at (814) 865-3776.

Photo: Courtesy of Paul Robeson Cultural Center

Mixed media in the HUB

The Equal Opportunity Planning Committee and the HUB and Kern art galleries present the mixed media works of **Howard Brooks**, March 25-May 5 at the HUB's Formal Gallery on the University Park campus.

Brooks, an artist whose work is done in oils, acrylics and collage techniques, earned his MFA degree at The Cranbrook Academy of Art in Bloomfield Hills, Mich., and his doctor of divinity and doctor of psychology degrees from the College of Divine Metaphysics in Indiana.

Berks Festival Theatre

As the Penn State Berks and Lehigh Valley campuses merge to form the new Penn State Berks-Lehigh Valley College, the college will become home to a new theatre: Berks Festival Theatre. The theatre will feature professional actors, undergraduate and graduate students, and performers from the Reading and Lehigh Valley areas. The 1997 premiere season opens June 20 with "Quilters," a musical based on the lives of American pioneer women, which will run through July 6. "Man of La Mancha," featuring Lehigh Valley veteran performer **Bob Kratz** in the title role, opens July 25 and continues through Aug. 10.

Slavic Folk Festival from April 11-13

The 19th Annual Penn State Slavic Folk Festival, showcasing cultural achievements of Pennsylvania's Slavic-Americans, will be held from 10 a.m. to 10 p.m. Friday, April 11, and Saturday, April 12; and from 12:30 p.m. to 6 p.m. on Sunday, April 13, in the ballroom of Hetzel Union Building on the University Park campus.

The festival will feature exhibits, demonstrations of folk art and live performing groups. There will be book and artifact booths, an ethnic snack bar and special events for children from 10 a.m. to noon Friday, including a balalaika and accordion duo.

The evening performance on Friday, starting at 7 p.m., will feature the Polka Players. On Saturday, the Czechoslovak Moravian Club Folk Dancers of Endicott, N.Y., will perform at 1 p.m.; the Slaviane Folk Ensemble from McKees Rocks and the Kazka Ukrainian Dancers also will be featured. The Saturday evening program will feature the Eastern European Ensemble playing music for listening and dancing, with a polka and a waltz contest.

The Sunday program will include the Original Byzantine Men's Choir, Polish, Polish dances, accordion melodies, as well as the Polka Revolution Band from Houtzdale, Pa., and a classical interlude.

The Ethnic Snack Bar will serve hot foods on Friday and Saturday from 11 a.m. to 2 p.m., and from 5 until 7:30 p.m. A limited menu of hot foods will be available on Sunday from 12:30 until 3:30 p.m. Hot and cold beverages and pastries will be available throughout the festival.

The festival is sponsored by the Penn State Department of Slavic and East European Languages and the Penn State chapter of Dobro Slovo, the national Slavic studies honor society. There is no admission charge and programs are free.

A preliminary program of festival events is available from **Toni Mooney**, festival secretary, at (814) 865-1352.

Graduate researcher

Cheryl Keller from the Department of Biochemistry and Molecular Biology explains her work, "Effects of *Mis-expression of Nautilus on Mesodermal derivatives in Drosophila*" to a curious onlooker at last year's Graduate Research Exhibition. This year's event, which features the research of more than 150 graduate students, will be held from March 21-22 in Kern Building on the University Park campus. For more information on the 12th annual exhibition, log into the Web at <http://www.gradsch.psu.edu> and click on "news and announcements."

Chocolate Chase is looking for runners

Runners may now begin to register for the 19th annual Chocolate Chase, to be held at noon Saturday, April 12 in Hershey. Chocolate Chase is a 10K race beginning and ending at The Hershey Medical Center and winding through scenic, surrounding countryside. A one-mile fun run will be held afterward.

Proceeds from the race will benefit the Dr. Thomas V. N. Ballantine Memorial Scholarship fund for medical students. Ballantine, who died in 1990, was the founder and director of the race. Since the race began in 1978, it has raised approximately \$90,000.

The Ballantine Trophy will be awarded to the top male and female finishers during an awards ceremony after the conclusion of the Fun Run. Competition classes by age group are: 18, 18-29, 30-39, 40-49, 50-59 and over 60.

To pre-register by March 30, call (717) 531-2000, enter mailbox number 3300, and leave a message with your name and address. The first 600 pre-registrants are guaranteed T-shirts in exchange for their \$10 entry fee. The race is sponsored by medical students and the Office of Student Affairs.

Penn Staters

Subhash Chander, professor of mineral processing, has been elected a distinguished member of SME, the Society for Mining, Metallurgy and Exploration Inc.

Edward J. Danis, associate director of the Division of Undergraduate Studies, gave the opening address to the ARGE-Studienberatung Conference (the German Society of Academic Advisers), in Berlin, Germany. His address, "Academic Advising in the United States: What Can We Learn from Each Other?", represents the first formal meeting between academic advisers in the U.S. and on the European continent.

Hector E. Flores, professor of plant pathology and biotechnology and director of the Science, Technology and Society Program, presented an invited workshop on "Biological Literacy" at the World Summit on Science and Science Education. Flores also presented a series of invited lectures and gave a course on "The Biosynthetic Potential of Plants in the Coming Millennium," at the Universidad Nacional Autonoma de Mexico in Mexico City.

Alireza Haghighat, associate professor of nuclear engineering, and his graduate assistant, **Glenn E. Sjoden**, presented four invited papers at the international "3-D Deterministic Radiation Transport Computer Programs: Features, Applications and Perspectives," seminar in Paris. The papers all focused on PENTRAN (Parallel Environment Neutral-particle Transport), a new, 3-D parallel particle transport code which Haghighat and his assistant developed. The code can solve large, 3-D, real-life problems much faster than available "production" codes.

Richard Hogg, professor of mineral processing, has been selected to receive the Arthur F. Taggart Award of SME, the Society for Mining, Metallurgy and Exploration Inc. Hogg, who serves as chair of the Mineral Processing Section in the Department of Mineral Engineering and chair of the geo-environmental engineering program, is being honored for a series of papers in the area of flocculation and dewatering.

Austin J. Jaffe, holder of the Philip H. Sieg professorship of business administration, served as a visiting professor of real estate economics at the Royal Institute of Technology in Stockholm, Sweden. While there, Jaffe, a faculty member in The Smeal College's Department of Insurance and Real Estate, taught a series of doctoral seminars on property rights issues in real estate markets.

James Kerlin, deputy senior director of the Center for Academic Computing, was invited by the government of the People's Republic of China to conduct a series of workshops on technology in education at the Hubei College of Education in Wuhan, China.

Sridhar Komarneni, professor of clay mineralogy in the Department of Agronomy and the Materials Research Laboratory, presented a paper on "Hydrothermal Synthesis for Novel Applications" at the Sixth Tohwa University International Symposium on Nanostructured Ceramics in Fukuoka, Japan. He gave two invited lectures, one on "Porous Materials and Synthesis of Ceramic Powder by Hydrothermal Method" at Saga Ceramics Lab, Saga, Japan, and another on "Conventional vs. Microwave Hydrothermal Processing of Ceramic Powders" at Yamaguchi University, Ube, Japan.

Clifford J. Lissenden, assistant professor of engineering science and mechanics, presented a paper at the ASME International Mechanical Engineering Congress and Exposition. The presentation and accompanying paper, "Critique of Macro Flow/Damage Surface Representations for Metal Matrix Composites Using Micromechanics," examined various effects on the evolution of plastic flow in metal matrix composites.

Andrea Mastro, professor of microbiology and cell biology, was the invited speaker at the International Symposium on Hormones and Bioactive Substances in Milk held at Smolenice Castle in the Slovak Republic. The talk was titled "Prolactin in Milk and Immune Responses."

Peter I. Meszaros, professor and head of the Department of Astronomy and Astrophysics, has been elected a Fellow of the American Physical Society. Meszaros was cited "for valuable and influential contributions to the theory of radiation processes near magnetized neutron stars, gamma-ray burst sources, black holes and galaxy formation."

Lawrence Muller, professor of dairy science, addressed the British Grassland Society in Great Malvern, England on "Grass and Forage for Cattle of High Genetic Merit."

Richard Nichols, professor of theatre arts, was a guest artist in residence at the Central Academy of Drama in Beijing, where he directed a Chinese language theatre production of Eugene O'Neill's "Desire Under the Elms." Supported by a grant from

the Asian Cultural Council, Nichols also lectured on contemporary American theatre and taught workshops in stage voice and speech, acting and directing.

William L. Petersen, associate professor of religious studies and classical and ancient Mediterranean studies, has received a fellowship from the Netherlands Institute for Advanced Studies (NIAS), the research arm of the Royal Netherlands Academy of Sciences, and has been named director of a six-person international research team funded by NIAS for the 1997-98 academic year. The team will conduct research on "The Diatessaron's Text of the Gospel of John."

Jonathan Phillips, professor of chemical engineering, was the keynote lecturer at the 1996 International Symposium on Industrial Applications of the Mössbauer Effect held in Johannesburg, South Africa. He gave a talk titled "Correct Determination of Particle Size Distribution and Phase from Relaxed Mössbauer Spectra." While in Johannesburg, Phillips also gave an invited lecture at Witswatersrand University on "Novel Multimetallic Spillover Catalysts for Olefin and Diolefin Processing."

Charles S. Prebish, associate professor of religious studies, has been awarded a Rockefeller Foundation Fellowship in the humanities, and will spend the 1997-98 academic year at the Centre for the Study of Religion at the University of Toronto, a host institution for this program. The focus of the institute will be "North American Religious Diversity and the Academic Study of Religion." Prebish will continue his ongoing research on American Buddhism.

Jean-Claude Vuillemin, associate professor of French literature, gave the invited lecture "Hypocondria, Illusion and Dramaturgy," at the Corneille International Colloquium in Rouen, France. Vuillemin also was elected vice president of the Pierre Corneille International Research Center.

James C. Wambold, professor emeritus of mechanical engineering, and **John J. Henry**, professor of mechanical engineering, have received the 1996 National Award for Transportation Science and Ethics. The award was given by the Alliance for Transportation Research for "outstanding scientific contribution to transportation, demonstrating a fundamental commitment to safety and the environment."

25-year Awards

H. ANN HARPSTER

HILARY F. KLECKNER

R. THOMAS KLINE

BONNIE RANDOLPH

PEGGY E. REPASKY

JACK C. SHANNON

Observing 25 years of service at the University are, from left, H. Ann Harpster, operator A, Centralized Copy Center in the Office of Business Services; Hilary F. Kleckner, library assistant I, Pattee Library; R. Thomas Kline, environmental systems technician in the Office of Physical Plant; Bonnie Randolph, staff assistant VI in the math department, Eberly College of Science; Peggy E. Repasky, staff assistant VI in the Department of Education Policy Studies, College of Education; and Jack C. Shannon, professor of plant physiology in the College of Agricultural Sciences.

Awards

Professor of philosophy named Fellow

Emily Grosholz, professor of philosophy and Fellow of the Institute for the Arts and Humanistic Studies, has been awarded one of 55 fellowships for postdoctoral research in humanities and social sciences from the American Council of Learned Societies. ACLS is a private, non-profit federation of 58 scholarly associations devoted to the advancement of humanistic studies in all fields of learning.

In a national competition, Grosholz was selected from a pool of 536 applications. The program is partially supported by endowment grants from the Ford Foundation, the Andrew W. Mellon Foundation, the National Endowment for the Humanities and the Rockefeller Foundation.

Grosholz's fellowship supports her work on her book *Rationality and Invention in Mathematics*, that presents a novel model of mathematical reasoning in conjunction with

historical case studies drawn from the work of the German philosopher and mathematician G.W. Leibniz. During the fellowship, Grosholz will be in residence at Penn State; editing and translating manuscripts at the Leibniz Archives in Hannover, Germany; and working at the University of Cambridge, England, where she has been appointed a visiting Fellow at Clare hall and a visiting scholar in the Department of History and Philosophy of Science for 1997-98.

EMILY GROSHOLZ

Art professor receives honor

Paul E. Bolin, associate professor of Art Education, has been selected by the National Art Education Association to receive the 1997 Manuel Barkan Memorial Award. This annual, national award recognizes an NAEA member who, through his or her published work in either *Art Education* or *Studies in Art Education*, has contributed a product of scholarly merit to the field that deals carefully and imaginatively with an important issue, problem or practice in the profession.

NAEA's membership includes elementary and secondary art teachers in 50 states, representatives from America's major art museums, state departments of education, arts councils and major colleges and universities throughout the United States and 66 foreign countries.

Smeal College recognizes outstanding staff members

Alice M. Young and Anna J. Rishel were named the winners of the first Smeal College of Business Administration's Outstanding Staff Awards. Young and Rishel were honored for exceptional professionalism, teamwork, creativity, integrity, professional development, community service and ability to work with a diverse group of colleagues and customers.

This marked the inaugural year for the Outstanding Staff Awards. Selections were made from a field of nominees by a peer committee.

Young is an administrative assistant in The Smeal College's Department of Management Science and Information Systems, reporting to the department chair. She coordinates numerous administrative functions and supervises the

ALICE M. YOUNG

ANNA J. RISHEL

activities of the department support staff. She joined the college in 1975 as a part-time secretary in the Student Records Office and rose to secretary to the assistant dean for undergraduate programs in 1981. In 1989, Young became staff assistant to the director of alumni relations, and was named to her current position in 1993.

Rishel is manager of the college's Center for Business Graphics, a facility which creates numerous electronic and hard-copy materials for students and members of the faculty and staff. Among her numerous duties, she instructs clients in the use of business graphics software. Rishel became a member of the Smeal staff in 1983, serving as an accounting clerk in the financial office. Six years later, she assumed her current duties.

Henszey was recognized with the Undergraduate Teaching Award, Welson, the Undergraduate Advising Award, and Fairbank, the Graduate Student Teaching Award. The awards were created through the generosity of Penn State alumnus Fred Brand Jr. (BA '32), an Insurance executive. The awards are based on nominations from Smeal College students and faculty members, with final selections made by a joint committee of students, and members of the college faculty and staff.

Three lauded for teaching and advising in Smeal College

Three people in The Smeal College of Business Administration were honored recently for their outstanding ability to teach and advise undergraduate students.

Benjamin N. Henszey, professor of business law and director of business programs for the Commonwealth Educational System; **Vernis M. Welson**, instructor in business administration and assistant to the dean for minority affairs and international programs; and **James F. Fairbank**, a doctoral student in management and organization received the 1997 Fred Brand Jr. Awards.

Henszey was recognized with the Undergraduate Teaching Award, Welson, the Undergraduate Advising Award, and Fairbank, the Graduate Student Teaching Award. The awards were created through the generosity of Penn State alumnus Fred Brand Jr. (BA '32), an Insurance executive. The awards are based on nominations from Smeal College students and faculty members, with final selections made by a joint committee of students, and members of the college faculty and staff.

Course earns

Student involvement and teamwork have earned Penn State's Engineering Design and Graphics 100 course this year's Outstanding Practice Award from the Division of Instructional Development of the Association for Educational Communications and Technology. The national award is given annually to honor exemplary instructional materials or systems.

The program was chosen, according to the association, because it presented an outstanding use of technology within a complete course. In addition, its innovative instructional strategy, which is replicable on a broad scale, and its general affordability were noted. For more information about ED&G 100, student projects and course management and assessment resources, visit the project's World Wide Web site at <http://www.cesl.psu.edu/setce/EDG100/>.

It's on the Web!

New Web site allows easier electronic reserve for library materials

Life has become a little bit easier for anyone who makes use of the University Libraries' Electronic Reserve System. Instead of braving the winter cold or a torrential downpour to get an assignment on reserve, some students can sit comfortably in their residence halls or offices and pull them up on the World Wide Web at URL <http://reserve.libraries.psu.edu/>. These people have Access Services Librarian **Joan Reyes** to thank.

As creator of the Web site, Reyes clicks excitedly from one link to another, showcasing the University Libraries' new electronic reserves home page. Beginning with a pilot project this fall that included eight

courses, Reyes said the new information resource offers materials such as exams, lecture notes, journal articles, course syllabi, homework solutions and assignments. All can be accessed 24-hours a day from computer labs, residence halls, University offices and even the students' homes. **Susan McMillan**, assistant professor of political science, has read-just for her international political economy course available on the new system.

"It has improved access to the reserve readings for my students," she said. "Provided they have the proper computer hardware and software, the students seem to like being able to read/print the materials from their dorm room or home."

The test project includes courses in the fields of

computer science and engineering, English, history and political science. Faculty members from the Project Vision program also have taken advantage of electronic reserves. In this process students learn subjects independently with the aid of the latest information technology.

Reyes said reserved items are scanned from an original volume or magazine and the issue of copyright is addressed on the first page of the Web site, requiring users to know the dos and don'ts before they reach the information they are searching. There also are request forms for faculty to reserve materials directly online. In addition, a survey is available for users to voice their opinions and ideas.

BOOK SHELF

Shadrach Minkins: From Fugitive Slave to Citizen, written by Gary Collison, associate professor of English, is the true story of an ordinary man in extraordinary circumstances. The book, published by Harvard University Press, is a historical look at the life of Shadrach Minkins, the first runaway slave to be arrested in New England under the 1850 Fugitive Slave Law. Through Minkins' story, readers see what day-to-day life was like for a slave in Norfolk, Va., for a fugitive in Boston and for a free black man in Montreal. Collison recreates the drama of Minkins' arrest and his subsequent rescue by a band of black Bostonians.

Ministry to the Incarcerated, a book that focuses on the prison system, has been written by Harry Covert, adjunct instructor of administration of justice and pastor of St. Peter's United Church of Christ in State College.

Published by Loyola University Press, the book contains insights for church ministry and pastoral care. Covert uses his experience as both police officer (for 19 years) and prison chaplain to examine the problems of the incarcerated. Covert addresses specific areas of inmate stress, such as low self-esteem, guilt and unrealistic expectations and explains how these can be major obstacles to a prisoner's personal and spiritual development.

Five members of the Department of Art History contributed articles to Grove's new 34-volume *The Dictionary of Art*. Professors Arnold Cutler, Roland E. Fleischer, Hellmut Hager, Elizabeth B. Smith and Craig Zabel—roughly half of the art history faculty—each wrote a chapter on his or her particular specialty for what is described as the "largest international collaboration in the history of art publishing."

The dictionary was published by Grove in New York for circulation in the United States and Canada, and by Macmillan Publishers Limited in London for circulation in the United Kingdom and Europe. In the works since 1982, the set consists of 41,000 signed articles contributed by 6,700 scholars from 120 countries.

Zabel contributed "Bank: Architecture and Decoration," to Vol. 3; Cutler, an authority on Byzantine art, had two entries: "Early Christian and Byzantine Art, Ivorys and Steatites" in Vol. 9, and "Istanbul, Art Life and Organization" in Vol. 16. Fleischer, a specialist in both 17th-century Dutch painting and colonial American painting, contributed an entry for each of

his specialties: "Ludolf de Jongh, 1616-1679" and "Gustavus Hesselius, 1682-1755." Hager, a renowned scholar specializing in the Fortunato family of architects, contributed the following entries to Vol. 11: "Carlo Fontana," "Francesco Fontana," "Girolamo Fontana II" and "Carlo Stefano Fontana," and Smith wrote several entries: "Romanesque Stone Sculptures in the Low Countries" and "Romanesque Wood Sculpture in the Low Countries," both in Vol. 26, "St. Servatius, Maastricht, Architecture and Sculpture" in Vol. 19 and "Tournai Cathedral Sculpture" in Vol. 31.

Dale Jacquette, professor of philosophy, is the author of *Meinongian Logic: The Semantics of Existence and Nonexistence*, published by Walter de Gruyter & Co., 1996. The book offers a systematic revision of formal symbolic logic for the reference and true predication of properties to nonexistent objects. The book's contents are inspired by Austrian philosopher Alexius Meinong (1853-1920) and includes a critique of the distinction between the content and object of thought in the phenomenological psychology; refutation of the theologian and archbishop of Canterbury Anselm's theories about "being" as proof for the existence of God; Meinongian modeling of the logic of scientific law; and a formal resolution of the paradox of analysis. The book serves as a challenge to traditional extensional systems of mathematical logic by acknowledging the intention of thought toward nonexistent as well as existent objects, and the distinction of nonexistent objects by differences among their basic properties.

Ram P. Kanwal, professor emeritus of mathematics, has written the second edition of a book titled *Linear Integral Equations: Theory and Technique*, published by Birkhauser, Boston.

The second edition of this widely used book, first published in 1971, has an emphasis on solving problems in applied mathematics, theoretical mechanics and mathematical physics by integral equation methods. Kanwal presents a variety of techniques and applications and has added additional material extensively throughout the book. Chapters dealing with differential equations and singular integral equations have been expanded. The book is ideal as a text for the beginning graduate course. Its treatment of boundary value problems and extended and up-to-date bibliography make the book useful to research workers in applied fields.

Manfred Kroger, professor of food science, edited the book *The Dictionary of Metaphysical Healthcare: Alternative Medicine Paranormal Healing and Related Methods*, by Jack Raso, published by the National Council Against Health Fraud Inc.

Akhlesh Lakhtakia, associate professor of engineering science and mechanics, is editor of *Models and Modelers of Hydrogen*, a textbook published by World Scientific Publishing Co. and released in July 1996. This book conveys a glimpse of the grandeur of 20th-century physics through nine essays and an interview with Hans Salihofer, an authority on hydrogen and specialty steels. Ideas in the book are simply presented and illustrated throughout, and mathematical treatments are of a tutorial nature. Facsimile reproductions of 10 key papers on the subject also are included—some of which are decades old. The book is intended to be used by high school and university science students and teachers, as well as science enthusiasts.

Christiane P. Makward, professor of French and women's studies, is author with Madeleine Cottenet-Hage of the University of Maryland and general editor of *Dictionnaire litteraire des femmes de langue française, De Marie de France a Marie NDiaye* (Paris, 1996).

Published with support from a French governmental agency for Francophone countries, this dictionary of women writers in French acknowledges its philosophical link with women's studies in the United States and Canada. About 100 critics, French and North American, have contributed to this reference work which includes 200 articles on individual women writers in French, from the origins in medieval France to the present. The work is meant as a feminist research and academic planning tool, as well as a reading companion for the general reader of literatures in French.

In addition, Makward also has prepared Volume II of the complete dramatic works of Corinna Bille (1912-1979), a French-Swiss novelist, short story writer and playwright, which was just published in Switzerland. It is titled *Les Etiranges Noces et autres inedits. Textes etablis et presentes par Christiane Makward* (Lausanne: L'Age d'Homme, 1996).

Donna S. Queeney, director of research and external relations for Continuing and Distance Education, has written *Building Partnerships with Professional Associations* to help colleges, universities and nonprofit organizations involved in continuing higher education address workforce education and training needs. She was invited to write the monograph by the University Continuing Education Association for its new "Workforce Development" Publications Series. It is the first in the series.

A few of the topics Queeney covers in her publication include: benefits of partnerships with associations; preliminary steps to establishing partnerships; identification of potential partners; and tips for making partnerships work. She also cites several successful partnerships.

Richard Robinett, associate professor of physics, is the author of *Quantum Mechanics: Classical Results, Modern Systems and Visualized Examples*, published by the Oxford University Press.

The book is a complete overview of the key concepts of nonrelativistic quantum theory at the undergraduate level. Using examples taken from the modern research literature in atomic, nuclear and elementary physics, Robinett focuses on the visual presentation of quantitative information and qualitative concepts, including imagery of quantum wave functions in one-, two- and three-dimensional systems. Among the other features of this text are a separate chapter on probability theory, an emphasis on the classical limit of quantum mechanics, wave packet solutions, a brief discussion of classical versus quantum chaos and many new end-of-chapter problems.

Ernst Schurer, professor of German and Fellow of the Institute for the Arts and Humanistic Studies, Manfred Keune, associate professor of German, and Philip Jenkins, professor of religious studies, history and criminal justice, are the co-editors of the volume *The Berlin Wall. Representations and Perspectives*, Volume 79 of Studies in Modern German Literature, published by Peter Lang, New York.

The collection of essays in this book—first presented at the international and interdisciplinary conference "The Wall, Reality and Symbol" at Penn State in October 1991—offers reflections on the Berlin Wall (1961-1989) from a wealth of interdisciplinary and international perspectives. The studies of literary and cultural texts, many not easily accessible to the English-speaking public, present the Wall as one of the most powerful phenomena and as a visible and decipherable text of 20th-century life in the heart of Germany. Several essays concentrate on the representation of the Wall in popular culture, in contemporary songs, in the cinema and even through the graffiti on the Wall itself. The final section focuses on the fall of the Wall and its aftermath.

Daniel Walden, professor of American studies, English and comparative literature, has just published *A Tragedy Full of Joy*, Vol. 15 (1996) of "Studies in American Jewish Literature," which he edited. He also contributed an article co-authored with Christina Dokou on "The Pagan Condemnation and Orthodox Redemption of Rabbi Isaac Kornfeld."

Wetlands project seeks evaluation criteria

By JOHN WALL

College of Agricultural Sciences

To most folks, wetlands are marshy ponds with a duck or two floating on the water.

To Robert Brooks, associate professor of wildlife ecology in the School of Forest Resources, "all wetlands are not created equal," and the results of a three-year study of 51 natural wetland sites in Pennsylvania have shown this to be true.

Brooks, director of the Penn State Cooperative Wetlands Center, said Pennsylvania is losing hundreds of acres of wetlands per year to development and other uses. Simultaneously, state agencies, private companies and private citizens are restoring or creating hundreds of wetland acres each year. The project, funded by the Pennsylvania Department of Environmental Protection and the U.S. Environmental Protection Agency, Region III, gives agency employees and other professionals specific guidelines to describe and categorize a variety of wetland types, including natural wetlands used as reference sites for researchers and mitigation projects.

A series of assessment techniques to help professionals evaluate restored or created wetlands have been developed during the study. "A wetland is an elusive thing to categorize," Brooks said. "The best way to describe our work is that we are creating a sort of template or blueprint that can best

Robert P. Brooks, director of the Penn State Cooperative Wetlands Center, visits the Millbrook Marsh reference wetland along Slab Cabin Run.

Photo: Greg Grieco

match the characteristics of a certain type of wetland to the site where you intend to replace or restore a wetland."

The project identified 51 sites as reference wetlands and categorized them into types. At each site, characteristics such as plant life, animal life, soil composition, sedimentation and basin shape also were analyzed and categorized.

The project also extensively researched bird, amphibian and plant species that inhabit only certain wet-

land habitats — called indicator species," Brooks said. "To truly create or restore a wetland in a specific site, you have to match the structure and characteristics of whatever wetland type best fits the site. Otherwise, the wetland will function differently."

Brooks said forested wetlands fed by groundwater are the most abundant type of wetlands in the Mid-Atlantic area, and these forested areas are most commonly lost to develop-

ment. If the forested wetlands are restored or created, the most common type is an open-water pond with emergent forest vegetation.

The flora and fauna associated with forested wetlands and open-water wetlands are markedly different," Brooks said. "What this means is that some types of wetlands will be very hard to replace, and if the choice comes down to destroying a wetland, it's important to know which types can be difficult to replace."

The team's research also revealed that while different types of wetlands obviously have different characteristics, created wetlands have different characteristics from the wetland types they are modeled on. "A created wetland looks like a natural site, but it really doesn't behave like one," he said.

Although Brooks said the wetlands assessment project has given resource professionals the tools with which to identify or describe wetland types, the next step to completing the portrait of the state's wetlands is understanding how wetlands function.

To do this, the Penn State Cooperative Wetlands Center is initiating another three-year wetland project, led by Brooks and C. Andrew Cole, affiliate assistant professor of landscape architecture, designed to discover how wetlands function, including how wetlands change over time and how human disturbances affect their natural progression.

Team strives to make online business routine in 21st century

Sure, you can let your mouse do the shopping on the World Wide Web or you can stroll a virtual mall, but those conveniences are last week's e-news. What if you or corporate consumer could use the Web to save real time and real money? And, what if the seller could learn to serve customers so well that they would come back time after time?

Supported by an IBM grant of \$63,000, a cross-disciplinary team of researchers is trying to create a system to do just that. Plus, one part of the program may even help consumers eat more healthfully. The primary thrust, though, is to capitalize on the power of the Web and database technology to create what is being called a "21st-Century Customer Management System."

Using this system, a customer could, for example, quickly and effectively explore the features and cost tradeoffs between two types of laptop computer, then place an order without reams of order forms and paperwork. Or, a customer could call up a company Web site and, by filling out an electronic form, say, "This is my problem, what can you do for

STANLEY
AUNGST

RUSSELL
BARTON

AUDREY N.
MARETZKI

JANICE
MCCLURE

ANTHONY
VERSTRAETE

DAVID T.
WILSON

me?" Web images of the products would permit a thorough visual inspection of critical features.

At the same time, the laptop computer seller could learn about the customer's likes and dislikes, using that information to better serve the buyer in the future, speed transactions, compile preferences for new designs, and build a closer, long-term relationship between the buyer and seller.

Involved in the project are David T. Wilson, holder of the Alvin H. Clemens professorship of entrepreneurship studies, Anthony Verstraete, senior lecturer in management information systems, and Stanley Aungst,

instructor in management information systems, all with The Smeal College of Business Administration; Audrey N. Maretzki, professor of food science and nutrition, and Janice McClure, research support associate, both in the College of Agricultural Sciences; and Russell Barton, associate professor of industrial engineering, in the College of Engineering.

The goals are to reduce the steps and extraneous cost in a sales transaction, making it easier and quicker for customers to get what they want. At the same time, sellers can learn about the buying habits of their customers so they can do a better job of

delivering what they need.

Researchers are also exploring the possibility of working with a grocery chain, setting up a system whereby seniors living in a retirement community or low-income consumers in a public housing development could jointly order groceries over the Net and have deliveries made right to their home. Costs could be lowered through potential savings in delivery expenses. The Web ordering system also could be set up to display nutritional information on each product as the customer scrolls through the selections on the aisles of the electronic market. A prototype of the system is expected to be complete by June.

Quality Expo now in its fifth year

Penn State will host the Quality Expo April 17 from 11 a.m. to 3 p.m. in the ballroom of The Nittany Lion Inn. This year marks the fifth anniversary of the event, held in celebration of the University's commitment to continuous quality improvement. During its five-year history, Penn State's Quality Expo has showcased the improvement initiatives of 193 teams.

The purpose of the expo is to invite members of the University and local community to learn from each other's experiences in bringing about improvement and spurring effective organizational change.

In addition to reviewing the exhibits of 67 quality teams, visitors will be invited to participate in quality circles — workshops featuring

quality initiatives and techniques. The quality circles will be held in the inn's Fireside Lounge. Provost **John Brighton** will introduce the first presentation, "Innovation in the Classroom," at 11:15 a.m. Other quality circle presentations will highlight team-building skills and strategies for maintaining team momentum. President **Graham B. Spanier** will deliver welcoming remarks at 12:15 p.m. and attendees will be eligible to win prizes.

For a schedule of activities or more information, call (814) 863-8721, or e-mail les1@psu.edu; or visit the Expo Web site at <http://www.psu.edu/dept/president/cgi/expo97>.

Fayette welcomes business development center

The Penn State Fayette campus recently opened its doors to the Saint Vincent College Small Business Development Center. The center, located within the Continuing Education Department at Fayette, will help meet the needs of small businesses.

Working in conjunction with the Fay-Penn Economic Council, the Saint Vincent College Small Business Development Center (SBDC) is one of 950 such locations throughout the United States, Guam and Puerto Rico. The centers offer counseling, research assistance and training to small business owners on a wide variety of topics. They also are able to provide access to experts in many fields. The program at each SBDC is tailored to meet the specific needs of the community in which it

serves, and it offers no-fee consulting services to both new and existing businesses, with emphasis on the benefits of strategic business planning.

The center will provide access to more than 800 online databases containing market, financial and technical information and consultants will help clients identify both public and private sources of capital. The SBDC will work with federal, state, regional and county economic development programs to assemble financing packages for either start-up or expansion purposes.

For more information, call (412) 537-4572, or contact the Penn State Fayette Campus Continuing Education Department at (412) 430-4210.

Winter blast

This view of Old Main from the Sparks Building on the University Park campus shows more of the cold, white stuff that recently blasted the area. With the first official day of spring just around the corner (March 21), brighter days should be ahead.

Carpoolers

Carpooler wanted from Woodward any point after to University Park. Work hours are Tuesday through Friday from 7:30 a.m. to 4:30 p.m. and Saturday from 5:30 a.m. to 2:30 p.m. Contact **Kay** at (814) 865-5182 or (814) 349-5932.

Temporary vanpooler wanted for May, June and July, from Phillipsburg to University Park. Work hours are Monday through Friday 8 a.m. to 4:30 p.m. Please call **Mona** at (814) 342-6246.

For the record

In a "Penn Stater" item of Feb. 27, **Paul Carrick** was listed as a visiting professor in the Department of Humanities at the College of Medicine. His six-month term in that position expired December 31, 1996. The search for an assistant/associate dean for undergraduate education is an internal one. That information was omitted from a story on page 6 of the March 6 *Intercom*.

The appointment of **Frederick H. Gaige** to dean of Penn State Berks-Lehigh Valley College will be effective July 1. This information was omitted from a story which appeared in the March 6 issue of *Intercom*.

Public Information keeps University news at your fingertips

Get connected directly to University news every day through Penn State Newswire, an e-mail delivery from the Department of Public Information to your computer at home or work.

An automatic way to stay up-to-date, Penn State Newswire is sent daily with articles on the Penn State budget, new programs, upcoming events, major new appointments, short features and faculty research from the colleges and institutes. Each transmission distributes news as soon as it is available. Most releases also are posted the same day on the University Relations home page at <http://www.psu.edu/ur> where both news releases and articles from *Intercom*, the faculty/staff newspaper are searchable online.

Penn State Newswire's easy-to-read text format — with a list of stories at the top — allows readers to decide immediately

whether to read it, print it, file it or kill it, according to their interests. Readers with e-mail systems linked to the Internet can double-click on Web addresses referenced in the releases for additional information. They also can link to popular Web sites for weather, sports and calendars. The Newswire has been in operation for about two years for a small number of University administrators, staff and reporters, but advances in technology now make it more widely available.

If you are connected to a modem — slow or fast — you can easily subscribe by sending an e-mail message to pat5@psu.edu and giving your name, your return e-mail address, your Penn State affiliation, if any, and your business or media affiliation, if any. You may unsubscribe at any time. For more information, contact **Christy Rambeau** at (814) 865-7517.

University to receive \$200 million in state construction funding

The governor served up some good news for Penn State during a March 20 dinner with the Board of Trustees and President Graham B. Spanier. At the dinner, Gov. Tom Ridge announced the release of \$200 million in badly needed capital construction funds to the University over the next five years. Penn State will receive \$40 million per year, probably beginning July 1.

"The \$200 million in capital construction funds are critically needed at our 23 campuses, where we have several hundred buildings that are more than 25 years old and that require renovation and safety updating," Spanier said. "We have significant needs for funds for ADA (Americans with Disabilities Act) compliance and infrastructure improvements."

Spanier said the University will reallocate funds internally and seek private funding to add to the state's commitment. The president said a high priority will be given to academic concerns for a select number of new buildings that have already been identified as needed.

More news on the budget and other stories from the Board of Trustees can be found on pages 4-6.

Task force charged to review University's research activities

By BARBARA HALE
Public Information

Rodney A. Erickson, vice president for research, has appointed a task force to evaluate issues and opportunities related to research administration and technology transfer at Penn State and to make recommendations on ways to improve the University's support structure for research activities.

The task force, which meets for the first time today, has been asked to present its report by the end of August.

Erickson cited the significant changes that have taken place in the research environment, including changes in government and industry funding priorities, the adoption of new technologies for research administration and the growing University role in technology transfer as reasons for launching the task force now.

See "Task force" on page 2

Where the rainy season never ends

By GARY W. CRAMER
University Relations

For the past decade, ever so quietly and carefully, the University Park campus has used treated wastewater generated by thousands of students and employees to foster its very own rain forest. That may sound like a hard thing to hide, yet very few people who see the forest recognize it for what it is.

While touring the Deer Pens or State Game Land No. 176 off Fox Hill Road, between the campus and the airport, anyone noticing the sprayers of the Penn State Land Treatment System is seeing

parts of the forest, as well as other land included in the project. Twenty-four hours a day, year-round, different portions of the system whoosh treated wastewater onto acres of trees, undergrowth and cropland. None of this wastewater gets discharged directly into Spring Creek.

The process recycles nearly 1 billion gallons of water each year into the regional groundwater system, which is then reused, in part, to fill the four water towers on campus. Besides recycling the water, the process adds naturally occurring nutrients in the wastewater to the soil for pick-up by the crops and forest growth.

Task force

Continued from page 1

"It's a valuable process to think strategically about these research issues," Erickson said. "The recent transition in leadership provides an opportunity to take a fresh look at many functions and research support services, and to plan for these activities and the associated changes in the coming years."

Erickson has charged the task force to:

- identify major research funding changes likely to affect Penn State in the next few years, areas of opportunity for researchers, and the most critical priority areas for institutional investment in research and research infrastructure.

- evaluate the organizational structure of the Office of the Vice President for Research, including the Research and Technology Transfer Organization.

- evaluate the research administration and technology transfer support services (both pre-award and post-award) provided to faculty researchers, and identify improvements and additional support functions that may be necessary.

- identify mechanisms to strengthen interdisciplinary and intercollege research collaborations including an examination of current organizational structures and operations of Intercollege Research Programs.

- develop strategies to increase the "yield" of graduate student support from research funding, and explore ways to help Penn State researchers be even more competitive in what will undoubtedly be a leaner future funding environment.

Michael Reischman, associate dean for research and graduate studies, College of Engineering, and **Lynne Vernon-Feagans**, associate dean for research, College of Health and Human Development, are serving as task force co-chairs. The other members are **Cheryl Achterberg**, professor of nutrition; **Esther Brooks**, doctoral candidate in physiology; **John Dutton**, dean, College of Earth and Mineral Sciences; **Derek Elsworth**, associate professor of mining engineering; **Irwin Feller**, director, Institute for Policy Research and Evaluation; **Donna Frazier**, deputy controller; **Art Heim**, director, Industrial Research Office; **L. Raymond Hettche**, director, Applied Research Laboratory; **Ernest W. Johnson**, director, Office of Research Affairs, College of Medicine; **Robert Killoren**, director, Office of Sponsored Programs; **Raymond Lombra**, associate dean for research and graduate studies, College of the Liberal Arts; and **Robert C. Meyer**, assistant to the dean, Eberly College of Science.

Frozen rain forest

It may qualify as a rain forest, but the land near the Deer Pens off Fox Hill Road between the University Park campus and the airport still froze this winter. The area is routinely sprayed with treated wastewater.

Photo: Greg Grieco

Rainy

Continued from page 1

"Continuous use of the system since 1983 has resulted in the local groundwater levels remaining relatively stable even in the worst drought conditions of the recent past," according to **Richard Parizek**, a professor of geology who was among the earliest participants in the project and is still a member of its oversight group, the Wastewater Distribution Committee.

"By spraying no more than two inches per acre per week, the total area covered by the system receives about 100 inches per year over and above the natural rainfall — or 30 inches more than needed to qualify as a rain forest."

Owing to its uniqueness, the Land Treatment System over time became a living laboratory for many Penn State wildlife and ecosystem classes. Researchers focus on its effects on the local flora and fauna, and ongoing sampling of water quality is performed at 23 groundwater monitoring wells. All this activity is coordinated by the 14-member Wastewater Distribution Committee which includes University academicians and administrators and representatives of the State Game Commission — which owns some of the land.

"Besides being a pleasant place to hike, bike and hunt, the lands form a very complex biological system that needs to be managed closely, and that's the message the committee is trying hard to get across as we tour groups through it," said committee chairman **John Gaudip**, a utility systems engineer with the University's Office of Physical Plant. "Last year, we gave tours for the state Department of Environmental Protection, Patton Township Supervisors, Pennsylvania Association of Conservation Districts, Centre Region Planning Commission and environmental attorneys from across the state."

During the popular tours, participants learn that hard data drives every bit of fine-tuning made to the system and that challenges abound in finding ways to effectively manage the system in an environmentally sound manner. Despite obstacles, the system is highly sensitive to the diverse interests of the University's physical plant and

"By spraying no more than two inches per acre per week, the total area covered by the system receives about 100 inches per year over and above the natural rainfall — or 30 inches more than needed to qualify as a rain forest."

Richard Parizek
professor of geology

farm operations, various regulatory bodies, adjacent landowners and the Game Commission.

"There are some major hurdles to overcome," said **Les Lanyon**, associate professor of soil fertility and a committee member. "For instance, the normal growing season is out of sync with the periods of increased student activity. (Students) determine the pattern of flow in the system. One method to deal with the imbalance involves double cropping of corn in the summer and winter rye later to keep crop acreage in production as much of the year as possible."

Among the best forage species for removing nutrients from the soil is Reed Canarygrass, which can be fed to University livestock, according to **Harold Harpster**, associate professor of animal science and committee member.

Another important factor in wastewater usage is the influence of age and structure of forest vegetation on nutrient uptake.

"Studies are under way to determine if fast-growing young vegetation in recently cut forests take up nutrients faster compared to older vegetation," said **Gerald Storm**, assistant professor of wildlife science. "Preliminary data from water samples taken at one meter below the surface indicated that nitrate-nitrogen concentrations in areas with young vegetation were significantly lower than in natural forests."

Such results suggest that with the availability of young growth forests and/or croplands, the practices undertaken by Penn State could someday play a role in helping others considering or using a land treatment system.

Hundreds take advantage of free PENNTAP services

In 1996, the Pennsylvania Technical Assistance Program (PENNTAP) provided more than 800 cases of assistance to clients in all 67 counties in the state. Clients reported \$6.1 million in economic benefits as a result of this assistance, and 97 percent of them were satisfied with the help that was provided, according to Jack Gido, PENNTAP director.

In many cases, PENNTAP technical specialists use their own technical expertise to respond to clients' questions or rely on their technical librarian in a Patee Library on the University Park campus to locate information. In other instances, Penn State faculty and staff lend their expertise. In 1996, PENNTAP technical specialists made nearly 600 visits with clients and 75 presentations regarding PENNTAP services, reaching a total of 1,600 participants.

PENNTAP is a partnership between Penn State, the Pennsylvania Department of Community and Economic Development and the U.S. Economic Development Administration. Serving Pennsylvania business and industry statewide since 1965, PENNTAP is one of the nation's first technical assistance programs and has been a model for such programs in many other states and countries. PENNTAP helps Pennsylvania business and industry improve their competitive edge by providing free scientific and technological assistance and information.

More than 80 percent of PENNTAP clients in 1996 were from businesses with fewer than 100 employees.

Construction zone

The construction company Hoy and Harger of Lock Haven is installing 60 feet of 30-inch casing at the intersection of Park Avenue and Bigler Road on the University Park campus. The line is being installed for a new water system.

Search under way for dean of Eberly College

A search committee has been appointed to identify candidates for the position of dean of the Eberly College of Science. **John A. Dutton**, dean of the College of Earth and Mineral Sciences, is committee chair.

The Eberly College dean serves as principal academic leader and chief executive officer of the college and reports directly to the executive vice president and provost of the University. The dean is responsible for planning, budgeting, implementing, fund raising, and for the quality of teaching and research.

The position requires an individual who can lead effectively and manage a large and complex college in a comprehensive University setting. Candidates should have significant academic achievement in a field of study commonly included in a college of science with credentials appropriate for a tenured appointment at the rank of professor. The candidate should have a thorough familiarity with the philosophy and responsibilities of a large, research-oriented, land-grant institution. Prior experience in academic administration with responsibility for personnel programs and/or resources is required. Salary will be commensurate with experience and qualifications.

The Eberly College of Science provides instruction and research opportunities in the biological, mathematical and physical sciences and is one of 10 colleges at University Park. The college had a system-wide enrollment of 3,791 undergraduate students and 579 graduate students in Fall Semester 1996, and has eight academic departments. A full-time equivalent faculty and staff of 925 people serve at

University Park, supported by a budget of approximately \$52.7 million.

Nominations, applications and inquiries should be submitted to Dutton, chair of the search committee for the dean of the Eberly College of Science, The Pennsylvania State University, 201 Old Main, Box PSI, University Park, Pa. 16802. The search committee will review applications and nominations beginning May 1, and will continue to receive them until the position is filled. You can find more information on the Eberly College of Science on the World Wide Web at <http://www.science.psu.edu/>.

Other members of the committee are: **Abhay V. Ashtekar**, Eberly Family Chair in physics; **Augustin Banyaga**, professor of mathematics; **Joanne T. Cahill**, director of development, Eberly College of Science; **Andrew G. Clark**, professor of biology; **Frank R. Deutsch**, professor of mathematics; **Nina V. Fedoroff**, Verne M. Willaman professor of life sciences, professor of biology and director of the Biotechnology Institute; **Eric D. Feiglson**, professor of astronomy and astrophysics; **J. Gregory Ferry**, professor of biochemistry and molecular biology; **Joseph M. Friebe**, undergraduate student; **Barbara J. Garrison**, professor of chemistry; **John P. Lowe**, professor of chemistry, **Elizabeth A. McGraw**, graduate student; **Judith Ozment Payne**, associate professor of chemistry; **James L. Rosenberger**, professor and head of the Department of Statistics; and **Robert Secor**, vice provost for academic affairs and personnel. **Office of the President**, who will serve as an ex-officio member of the committee.

CQI

CONTINUOUS
QUALITY
IMPROVEMENT

Staff assistants improve public broadcasting

It has been nearly two years since **Mark Estling**, general manager of Penn State Public Broadcasting, charged a CQI team of staff assistants at WPSX to analyze their work processes with the intent of improving quality and customer service. Much progress has been made since then; the team has streamlined the pledge process; offered a workshop to staff assistants that focused on processing financial documents; and addressed computer training needs. Pleased with the results of its initial efforts, the staff assistants CQI team then went on to broach broader goals.

Team members surveyed WPSX members to determine their satisfaction with programming; made arrangements to be a pilot group for HRDC courses; requested and received approval from the general manager to have input in decisions on purchasing computer hardware and software and in designing office space allocation; and established a Learning and Training Center, an area dedicated to providing library resources and learning/training activities for all WPSX employees.

Members of the team are **Rose Schwarcing**, **Tammy Hahn**, **Lois Rader**, **Belinda Tyson**, **Deborah Rogers**, **Irene Meeker**, **Martha Mensch**, **Melinda Meyers**, **Nancy Eckenroth**, **Patricia Johnson** and **Sandra Edkins**.

Other universities at Quality Expo

The fifth annual Quality Expo will be held at The Nittany Lion Inn on April 17, from 11 a.m. to 3 p.m. In addition to exhibits from 65 Penn State teams, the following universities will be visible as exhibitors or visitors: Georgetown, Syracuse, the University of Tennessee, Binghamton (exhibiting), the University of Pittsburgh, Rutgers (exhibiting) and the State System of Higher Education.

For more information about *Continuous Quality Improvement*, please contact **Louise Sandmeyer**, executive director of the Center for Quality and Planning at (814) 863-8721, or e-mail ls16@psu.edu. The center's Web site is <http://www.psu.edu/center/cqi/>.

From the Trustees Docket

Final HUB/Robeson project plans are approved

The Board of Trustees approved the final plans for a single complex that jointly will expand the Hetzel Union Building and house the new Paul Robeson Cultural Center at the University Park campus.

The board also gave authorization to receive bids and award the contracts for the project.

Designed by Williams Trebilcock Whitehead Architects of Pittsburgh, the HUB/Robeson project will add 95,000 square feet to the existing 154,000 square feet comprising the HUB.

Sitework is slated to begin in May with building construction starting in July. Completion is targeted for the beginning of fall semester 1999.

The design calls for a linear addition, running from the west end of the HUB and ending in the middle of the south wall of the Penn State Bookstore, preserving nearly all of the HUB lawn area. Near the bookstore, the new Robeson Center will be integrated into the complex, but bear a distinctive identity, using an oval-shaped element.

A glimpse of the future

This is an artist's conception of the inside of the renovated Hetzel Union Building

The heavily used Pollock Road entrance will become more pedestrian-friendly with larger walkway space and a welcoming canopy extending over the entrance. As people enter that entrance, they will see a lobby with significantly more open space and a wide staircase leading down to the ground floor.

The first floor will house a new auditorium, seating 425, additional meeting rooms and the new Paul Robeson Cultural Center. The center is three stories, matching the bookstore level, ground floor level and first floor level. Also on the ground floor, there will be new HUB Eateries dining areas and general seating areas

for eating and studying, as well as a recreation center.

A new four-story atrium space with skylights will connect the addition to the existing building. The exterior of the entire project will be constructed of brick veneer, glass and precast stone, matching the existing HUB's brick veneer, stone-like trim and window curtain walls.

The project also calls for dedicated quiet study lounges, information and computer services, improved access for users with disabilities, art gallery space and an expanded ballroom.

The total construction budget is \$26.8 million. The project will be financed with funds generated by a portion of University Park student activity fees, private support, Housing and Food Services and University funds.

A public forum will be held Thursday, April 17, from 12:30 to 1:30 p.m. in the HUB Gallery Lounge, and the groundbreaking ceremony is scheduled for May 2.

There are more than 425 registered student organizations at University Park, with at least 100 of them expected to have or seek office space in the new HUB or Robeson Center.

Construction slated for Behrend, Beaver campuses

The Board of Trustees approved the appointment of an architect for two new residence halls at Penn State Erie, The Behrend College, and the reconfiguration and expansion of a parking lot for the growing campus community.

The trustees also were informed of renovations to the Food Service Building at the Penn State Beaver campus, which are part of an ongoing series of upgrades to dining facilities at various Penn State campuses and colleges.

For Penn State Erie, the firm of Hoffman Popovich Architects and Associates of Boalsburg will design the two new 200-bed residence halls following the same general plan used for Almy Hall, currently under construction at the campus and also designed by Hoffman Popovich. Almy Hall is scheduled for completion this summer, with the next new unit planned for occupancy in the fall of 1999, followed by the last unit two years later to create a village encompassing all three units.

The parking lot project at Erie, designed by the University's Office of Physical Plant, will convert and enlarge an existing 141-space lot near the main campus entrance into a 406-space facility at a total cost of \$862,500. A pedestrian walkway from the lot

will be created by closing the existing drive to the Reed Building student center to vehicular traffic. A new driveway to the existing Reed Building parking lot will be located opposite the entrance to the redesigned lot; walkways will link the two lots.

At Penn State Beaver during the summer, an entrance vestibule will be added to the east side of the Food Service Building, as well as a 50-seat special events dining room, a market-place-style food court, an outdoor patio dining area, offices for Housing and Food Service staff and a connecting corridor to the Study-Learning Center for a total addition of 4,200 square feet. Architect for the project is Burt Hill Kosar Rittelmann of Butler, with planning assistance from a design team of campus students, faculty and staff.

In the past six years, six of the eight Penn State locations with dining facilities managed by the University's Housing and Food Services — not counting those at the University Park campus — have had similar upgrades to better meet the needs of their users. After the Beaver campus work, the Penn State McKeesport campus will be the final location in this category under consideration for upgrades.

Board adopts revised campus names

A resolution to modify the names of Penn State's campuses was adopted by the University's Board of Trustees on March 21. The changes reflect the locations' newly designated status as colleges and the University's plan for the Commonwealth campuses.

The approved plan for the Commonwealth Educational System designates 14 of Penn State's 17 locations as locations authorized to offer baccalaureate degrees. The plan will not add any new campuses, but makes four-year degree programs more available to place-bound students currently enrolled at Penn State campuses.

Penn State Abington and Penn State Altoona will join Penn State Erie, The Behrend College, in becoming independent four-year colleges. The names of the other campuses will indicate their affiliation as members of either the Commonwealth, Berks-Lehigh Valley or Capital college systems.

Effective July 1, those locations will be named:

- Penn State Abington, Abington College
- Penn State Altoona, Altoona College
- Penn State Beaver, Commonwealth College

- Penn State Erie, Behrend College
- Penn State Berks, Berks-Lehigh Valley College
- Penn State Lehigh Valley, Berks-Lehigh Valley College
- Penn State Harrisburg, Capital College
- Penn State Schuylkill, Capital College
- Penn State Delaware County, Commonwealth College
- Penn State DuBois, Commonwealth College
- Penn State Fayette, Commonwealth College
- Penn State Hazleton, Commonwealth College
- Penn State McKeesport, Commonwealth College
- Penn State Mont Alto, Commonwealth College
- Penn State New Kensington, Commonwealth College
- Penn State Worthington Scranton, Commonwealth College
- Penn State Shenango, Commonwealth College
- Penn State Wilkes-Barre, Commonwealth College
- Penn State York, Commonwealth College

From the Trustees Docket

State releases \$13.1 million in capital funding

Gov. Tom Ridge has released \$13.1 million in capital funding for projects at three University Park facilities to make them more accessible for people with disabilities.

■ \$8 million for the first phase of improvements to 15 University Park facilities to make them more accessible for people with disabilities.

■ \$1.4 million to replace an aged steam distribution system at the Harrisburg campus in Middletown.

■ \$3.7 million for construction of a bio-medical technology center at the Fayette campus in Uniontown. The project will include classrooms, clinical learning laboratories and basic science laboratories. This represents a collaborative effort involving Uniontown Hospital, Penn State and the Commonwealth to begin a nursing degree program at the campus.

Funds

continued from page 1

Ridge also announced March 21 that he released \$13.1 million for construction projects at several University locations. (See story above.) Spanier expressed his gratitude toward the governor for releasing the funds and recognizing "the important role that Penn State plays in the future of the Commonwealth."

"This partnership between Penn State and the Commonwealth will greatly enhance education for our students," Spanier said. "It will facilitate our programs of world-class leadership in research and it will support our service mission."

In addition, Spanier said the project would not only create jobs for Pennsylvanians, but would contribute to the local economy in the many communities where Penn State campuses are located and some of these new facilities will be built. The announcement of the five-year funding from the state will allow the University to better plan for the future. University leaders are expected to move quickly to update Penn State's project priority list.

Hershey, Geisinger move forward, are on schedule for July merger

Much progress has been made since the proposed merger of The Hershey Medical Center and Geisinger was announced Jan. 17, including the naming of new program leadership. The chief executive officers of both Hershey and Geisinger reviewed that progress during the Board of Trustees meeting in Hershey March 21.

Dr. C. McCollister Everts, CEO, senior vice president for health affairs and dean of the College of Medicine at Hershey, and Dr. Stuart Heydt, CEO of Geisinger, said that merger planning and activities were progressing on schedule and that, to date, the regulatory process was proceeding smoothly.

Since January, several series of meetings with employees have been conducted by management at both institutions to address employees' concerns and answer their questions regarding benefits, clinical services and structure of the new organization. Many meetings have been held with faculty members throughout both institutions as well.

Pending approval of the merger, the Penn State Geisinger Health System has identified leadership to direct the newly combined and evolving clinical programs and oversee the distribution of clinical resources to serve the health needs of a regional population. Nine divisions and their directors have been identified: alcohol/chemical dependency, James Dougherty, Geisinger; community medicine, Dr. James M.

PENN STATE

Geisinger Health System

Herman, Hershey; laboratory medicine and pathology, Dr. Conrad Schuerch III, Geisinger; medicine, Dr. Robert E. Albertini, Geisinger; obstetrics and gynecology, Dr. Joanna M. Cain, Hershey; pediatrics, Dr. Ronald L. Poland, Hershey; psychiatry, Dr. Stephen J. Paolucci, Geisinger; radiology, Dr. John E. Madewell, Hershey; and surgery, Dr. Thomas M. Krummel, Hershey.

Associate division directors have been named for medicine, pediatrics, and surgery because of their size and complexity. They are, medicine, Dr. Herbert Y. Reynolds, Hershey; pediatrics, Dr. Richard A. Molteni, Geisinger; and surgery, Dr. Jerry R. Youkey, Geisinger. In addition, planning teams for several clinical areas and their leadership have been named: anesthesia, Dr. Julien F. Biebuyck, Hershey, and Dr. John B. Houston, Geisinger; ophthalmology, Dr. Stuart H. Goldberg, Hershey, and Dr. Robert G. Notz, Geisinger; and orthopedics, Dr. Vincent D. Pellegrini Jr., Hershey, and Dr. Gary L. Wolfgang, Geisinger.

A full-time, eight-member core transition team consisting of employees from both Hershey and Geisinger

has been formed to review operations at Hershey and Geisinger and make recommendations for cooperation and collaboration following the merger. The core team members are Lynn Miller, Suzanne Noll, Ed Winne and Marilyn Spunar, alternate, Hershey; and Mark Bucksbaum, Elaine Glimm, Jim Landon and Annie Beisswanger, alternate, Geisinger. In addition, a number of transition design teams representing employment areas from throughout both institutions are reviewing operations in their respective areas and planning for future collaboration.

Division directors and associate division directors, planning teams, core transition teams and transition design teams have all begun to meet regularly and will continue to do so over the next several months. Likewise, meetings will continue to be held and emerging information will be shared with employees of Hershey and Geisinger in the months to come.

Everts and Heydt are confident that formalization of the new entity, the Penn State Geisinger Health System, will be effective July 1.

Spanier to press for adequate state funding

House and Senate appropriations committee members expressed praise and support for Penn State and its 1997-98 state appropriations request at recent committee hearings. But the committees also displayed "a general lack of will" to fund higher education in Pennsylvania at necessary levels, President Graham B. Spanier told the Board of Trustees March 21.

"We will continue to work to reverse this posture," Spanier said.

The University is seeking an appropriation of \$305 million — 8.6 percent more than last year — to continue adequately serving students and the state and to keep tuition as affordable as possible. Without adequate state support, Spanier has said, tuition could rise more than the planned 2.9 percent.

In early February, Gov. Tom Ridge's office announced a proposed 2 percent increase for Pennsylvania's public universities. Penn State officials were appreciative of the increase, but noted that the slight boost would not be enough to cover some of the University's

"Our primary responsibility is the education of our students, developed in a framework that promotes character, conscience and citizenship."

President Graham B. Spanier

ty's most critical needs.

Spanier said the appropriation request, approved by the trustees in September 1996, includes "only the most basic elements to sustain ourselves in an environment of profound change. I made clear (to the legislators) that above all else, teaching remains the heart of Penn State, as reflected in our highest funding priority for the coming year: 50 new faculty positions."

Academics will always be first at Penn State, Spanier emphasized both before the board last week and earlier this year at the budget hearings. "Our

primary responsibility is the education of our students, developed in a framework that promotes character, conscience and citizenship," Spanier told the board.

"My principal message to the General Assembly was that Penn State is delivering on its promise to become the leading university in America in the integration of teaching, research and service," Spanier said. "At the same time, I explained that we are greatly challenged in fulfilling our mission and preserving our tradition of access and excellence by a state appropriation that has declined 6.6 percent since 1991-92 when adjusted for inflation."

Adding the 50 new faculty positions is part of a three-year plan that will be accomplished through state support and internal reallocations from administrative expenditures. Other high priorities for Penn State are cooperative extension, increased support for the University libraries and information technology, medical education and agricultural research.

From the Trustees Docket

Room and board rates approved for 1997-98

The Board of Trustees approved room and board rates for fall semester 1997 and rental charges at the University Manor, the student housing complex at The Hershey Medical Center. The new rates go into effect July 1.

The 1997-98 room and board charges for an undergraduate student living in a standard double room will increase by \$45 from \$985 to \$1,030 a semester and the charge for Meal Plan 3, the standard plan which provides 12 to 13 meals a week, will increase by \$35 from \$1,100 to \$1,135 a semester.

Overall, the average room and board charge for the 1997-98 academic year will total \$4,330, an increase of \$160 (or 3.8 percent) over the 1996-97 room and board rate of \$4,170 per year.

Graduate residence hall rates for a standard double room at University Park without a meal plan will be \$1,185 a semester. The rate for a double room with a meal plan is \$1,070 a semester plus meal charges from \$1,035 to \$1,290, depending on the meal plan chosen.

Rental costs for Graduate Circle Apartments will be \$415 a month for a one-bedroom unit and \$485 for a two-bedroom unit, while Eastview Apartments will be \$325 a month for a one-bedroom apartment and \$395 for a two-bedroom unit.

Graduate and undergraduate students have several housing and meal options to choose from, ranging from single rooms to six-person apartments and from Meal Plan 1 to Meal Plan 6, depending on the number of meals selected.

At Penn State Erie, The Behrend College, apartment rates for a semester will increase \$60 a semester to \$1,285 a person for a two-bedroom garden apartment for four students and \$1,205 for a three-person apartment.

At Penn State Harrisburg, Meade Heights Apartments will range from \$1,285 to \$1,450 a semester, depending on occupancy.

At The Hershey Medical Center, the cost of renting one of the 24 one-bedroom apartments in University Manor East will increase by \$14 from \$516 to \$530 a month. Rents for the 164 two-bedroom apartments will increase by \$14 from \$612 to \$626 a month; the 44 two-bedroom apartments with washers and dryers will increase by \$14 from \$656 to \$670; and the 16 three-bedroom apartments will increase by \$20 from \$672 to \$692.

The 31 four-bedroom furnished apartments in Hershey's University Manor West complex will increase by \$32 from \$1,168 to \$1,200 a month.

Mealtime

Undergraduate and graduate students will see modest increases in room and board rates for the 1997-98 academic year.

New building to enhance outreach for The Hershey Medical Center

In a move to increase its efforts at meeting the health-care needs of the community, The Hershey Medical Center will shortly begin construction of a new building on Cherry Drive in Hershey. The 52,121-square-foot building will house the Center for Women's Health, general internal medicine, radiology, and pediatrics practices, a blood donor center and a community resource room. It also will house the Senior Citizens Center of the Hershey Area.

A groundbreaking ceremony will be held at the Cherry Drive site on April 6.

Dr. **Herbert Y. Reynolds**, chair of the Department of Medicine, emphasized recently that efforts will be made to accommodate people's wishes, such as more flexibility in nighttime and weekend hours, comprehensive, one-stop services covering a number of health needs; and a greater emphasis on what he calls "the educational component."

In addressing the need for the Center for Women's Health, Dr. **Joanna Cain**, chair of the Department of Obstetrics and Gynecology, said, "At the Penn State Center for Women's Health, our goal is clear: to become the clinical, educational and research resource of choice for all the women of central Pennsylvania and their health providers. As we enter the 21st century, we believe now is the

time to move forward with this important endeavor, providing both urban and rural women of all ages with the specialized, excellent health care they need for the future."

Among the services to be provided at the women's health center are family-centered obstetrics, obstetrical genetic counseling and high-risk pregnancy care, well breast care, nutrition and weight management, family planning, adolescent health, and healthy lifestyles and stress management.

The Department of Radiology's services will include mammography, ultrasound and stereotactic biopsy, and x-rays. The blood donor center and phlebotomy services will be located on the first floor with their own entrance and parking facilities for the convenience of donors.

Commenting on the coexistence of the senior citizens center and medical center services in the new building, Dr. **C. McCollister Everts**, chief executive officer, senior vice president for health affairs and dean of the College of Medicine, said, "We are delighted that we will be together in this new facility. The senior citizens center has always had a wonderful commitment to the community. Together, we can offer the community much more than we could ever provide alone."

Ballot positions announced for upcoming trustee election

Ballot positions for the 1997 election of trustees by alumni have been determined by a drawing, a procedure established by the Board of Trustees.

Paula R. Ammerman, associate secretary of the board, conducted the drawing and said ballots for the trustee election will be mailed to alumni by April 10. All ballots must be returned to the trustees office by the close of the election at 9 a.m. Thursday, May 15.

The names of the candidates for three positions on the board to be elected by alumni, and the order in which they will appear on the ballot, are as follows:

- **David R. Jones**, '54, assistant managing editor, The New York Times, New York, N.Y.
- **Ben Novak**, '65, attorney, Novak, Stover & Furst, State College.
- **Thomas V. Falkie**, '56, '58, '61, president/natural resources, Berwind Property Group Inc., Philadelphia.
- **Anne Riley**, '64, '75g, English teacher, State College Area High School, State College.
- **John W. Gibb**, '70, '72g, managing director of investment banking, Education Securities Inc., Washington, D.C.
- **Robert L. Horst**, '58, consultant, Peak Productivity USA, Lancaster.
- **Louis G. Galliker**, '56, president, Galliker Dairy Co., Johnstown.
- **Donald M. Cook Jr.**, '52, '60g, retired president of SEM-COR Inc., Indianapolis, Fla.
- **Stephen M. Hladik**, '89, attorney, Caplan and Luber, Paoi.

Faculty/Staff Alerts

On the road again

Spaces are still available for new faculty to take part in President **Graham B. Spanier's** second annual bus trip to sites around the Commonwealth.

The trip, dubbed the Road Scholars Travel Seminar, is scheduled for May 12-13. Two buses of faculty hired within the past two years will travel to different points across the state to illustrate Penn State's vast reach and to show how Penn State faculty are touching the lives of residents.

To sign up or get more information on the trip, contact **Melissa DeLong** at (814) 863-5117 or e-mail to msw7@cde.psu.edu.

Spanier introduced the travel seminar last year and approximately 70 faculty from various Penn State locations filled the two buses.

Library workshops

The University Libraries are offering the following series of seminars during April to help library users learn more about the growing number of databases accessible through the Library Information Access System (LIAS) and on CD-ROM.

In an effort to accommodate as many participants as possible, some sessions are offered more than once. To register or learn more about the seminars, send an e-mail to signup@psulias.psu.edu. If you have any additional questions, contact **Doris Herr** at (814) 863-0325. Information on the seminars also can be found by typing **HELP WORKSHOP** when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>.

■ Engineering databases

April 1 from 6 to 8 p.m., Tower Room 402, Central Pattee Library

■ Congress and the Legislative Process on the Internet

General introduction to electronic resources related to the lawmaking activities of Congress. Included are resources for tracking bills and laws and the legislative process; April 2 from 8:30 - 10 a.m., Tower Room 402, Central Pattee Library

Open house

The Eberly College of Science will hold its annual open house for prospective students and their parents from 10 a.m. to 4 p.m. Saturday, April 5, in 133 White Building at University Park.

Representatives from each of the college's departments and programs, financial aid officers and staff members from housing, food services and many other Penn State and local offices will be on hand to answer questions.

Nominations sought

The Staff Focus Committee serves as an advisory group to the University and is currently seeking nominations for members. Its membership includes

exempt staff and non-exempt staff from throughout the University system. Members are appointed to serve three-year terms.

Nominations, including self-nominations, from staff of the University at all locations are welcome. The Staff Focus Committee values diversity in its membership and is actively seeking a broad base of nominations.

Nomination forms or additional information may be obtained from **Carol Griffin** at (814) 863-6188 or cjg3@psu.edu. Nomination deadline is April 18.

Warning about letter scam

University Police are investigating four suspicious letters which have been sent to Penn State department heads, the first of which was received during Fall Semester. These letters, which are associated with the Nigerian Petroleum Corporation (NNPC), are believed to be an attempt at theft by deception. The authors, who request bank account information by fax, propose "participatory financial transactions," in which investors can make money.

Police Services believes this is not a legitimate business transaction and are warning people not to provide account information to these individuals. The U.S. Postal Service is aware of this letter. If you have received any such correspondence from NNPC on the University Park campus, please contact Police Services at (814) 863-1111, or the Pennsylvania Attorney General's Office, Bureau of Consumer Protection at (814) 949-7900. If you received correspondence elsewhere, please contact the Bureau of Consumer Protection directly.

Accuracy of five-digit ZIP codes

If you do "Standard A" bulk mailings, the five-digit ZIP codes must be verified. This is a United States postal regulation which will be fully implemented on July 1. The U.S. Postal Service asks that we comply with this regulation before the full implementation date. Please call either **Beth Catherman** at (814) 865-0761, or **Gregg J. Asciutto** at (814) 863-8153 to verify.

Online resource for administrative computing

A new Web site to serve administrative computing users is in place. Called Administrative Information Systems (AIS), it replaces the existing OAS site. The AIS site includes many sections, such as an overview of IBIS and the technological tools required; systems access and security information; instructions for printing documents from the mainframe; available support services; information on Executive Information Systems and how to use it; a description and link to the Penn State Data Warehouse — which provides quick, easy access to large amounts of current and historical data for analytical and reporting purposes; and more. Useful software also is available for downloading from this site.

The URL is <http://www.oas.psu.edu/>.

Behrend works with Erie steel firm on computer software project to help bids

Erie Forge and Steel and the Ben Franklin Technology Center at Penn State Erie, The Behrend College, have combined to fund the development of new computer software that will increase the speed, accuracy and consistency of Erie Forge and Steel's job bidding process. The software will be created by the Center for Process Manufacturing, a program jointly sponsored by Penn State-Behrend's School of Business and the American Production and Inventory Control Society (APICS).

Erie Forge and Steel has been an employee-

owned company since 1990. In addition to providing products for the forging industry and steel service centers, it makes custom-shaped forgings for commercial and military industries.

"Erie Forge and Steel's future depends upon accurate estimates of job costs," said **Robert Whiting**, director of marketing for the company. "This new software will phenomenally improve the consistency and accuracy of bidding, and it will permit engineers, and in some cases salesmen in the field, to provide job quotes almost immediately. It will allow

Research Web site for student affairs

The Office of Student Affairs has established a Web site to disseminate information about current research projects. Found at URL <http://cac.psu.edu/~cxh25/sauev/sa.html> and then by clicking on "Student Affairs Research and Assessment," the site provides access to results of Penn State Pulse telephone surveys which run the gamut from computer experience, health interests of students and student activity funding, to student affairs services. In addition, data from the Class of 2000 also is posted. Anyone interested in being notified of new postings appearing at this Web site may join the SARA-L@psu.edu listserve also found at the site.

Policies online

The policies in Penn State's Policy Manual have taken on a new colorful look on the World Wide Web at URL http://guru.sp.psu.edu/policies/pol_menu.html. In addition to a "new look," the human resource policies have been returned to it. The policy search function will now include human resource policies in the search. The general public also can access human resource policies at the location <http://www.hr.psu.edu/policy/default.htm>.

Policy updates

Information pertaining to the use of the Penn State Purchasing Card recently has been added to the "Purchasing" tab of the Central Offices' manual in GURU at URL <http://guru.sp.psu.edu/central/centmenu.html>. The documentation contains frequently asked questions, Purchasing Card allowable receipts and other related information and links.

MOC reminders

Any full-time faculty, staff or student considering the purchase of a computer or software program should check with the Microcomputer Order Center in 12 Willard Building on the University Park campus, telephone (814) 865-2100. As a non-profit service of Penn State, the MOC offers low, academic prices on a full range of hardware and software.

For the latest in product and pricing information, visit the MOC Web page at <http://www.moc.psu.edu>. The page has recently been updated to include more comprehensive product information and additional price lists.

Stop smoking

The American Cancer Society's Fresh Start Smoking Cessation Program teaches participants how to deal with smoking as a chemical addiction, a habit and a psychological dependency. Meets April 7, 9, 14 and 16, from 12:30-2 p.m. in 125 Reber Building on the University Park campus. Cost: none. To register, contact **Jan Hawbaker** at (814) 865-3085 or JQH34@PSU.EDU.

the company to increase its bidding productivity and to significantly enhance service to our customers."

The Center for Process Manufacturing, one of Penn State-Behrend's nine advanced technology centers, works toward the advancement of knowledge relating to process-oriented planning and control systems. The Center for Process Manufacturing assists its industrial affiliates, such as Erie Forge and Steel, by creating, applying and disseminating knowledge related to process-oriented manufacturing.

The ARTS

AT PENN STATE

On display

This untitled work by American artist Ann Hamilton, part of the Palmer Museum of Art's permanent collection, is currently on view in the museum's Pincus Gallery of Contemporary Art. The museum, on Curlin Road near the Creamery on the University Park campus, is open Tuesday through Saturday 10 a.m. to 4:30 p.m.; Sunday, noon to 4 p.m. For more information, call (814) 865-7672.

Odyssey Through Literature

On the next episode of Odyssey Through Literature, Leonard Rubenstein discusses the history of Madagascar with Pier Larson of the Penn State history department. Larson explains that in Madagascar there is no distinction between story and history. The stories passed down from generation to generation are treated as accurate, yet different descent groups tell different versions of history during ceremonies centering around competition in public storytelling. Such competitions lead Rubenstein and Larson to discuss how history is influenced by the historian researching it.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 on WPSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://muckey.la.psu.edu/comp/lit/odyssey/aduscd.htm>.

Celebrating diversity

The College of Arts and Architecture will host its inaugural Celebration of Diversity in the Arts on Wednesday, April 2.

The day of celebration is designed to bring faculty, students, staff and the art community together to enjoy the work of artists that espouse multicultural concepts and encourage unity among artists and people of all walks of life. The college plans to make this an annual event.

The celebration will consist of three art exhibitions, a featured speaker, special tours of the Palmer Museum of Art, a major recital in the School of Music and several smaller performances throughout the day.

Three art exhibitions of work by minority faculty and students, as well as non-minority artists whose work focuses on multicultural issues, will be on display in the main lobby of Music Building I, the lobby of the Arts Building and in the conference room in Patterson Building.

The Palmer Museum will feature the works of several artists from outside the community whose works represent multicultural approaches to creativity. The museum staff will provide two special tours of work by Saar, Lorenzen and others on April 2, starting at 2 and 4 p.m. The featured speaker, Anthony Leach, will talk at 2:30

p.m. in the Palmer Lipcon Auditorium, on the topic "Sharing All The Colors Within Us."

A 7:30 p.m. recital will conclude the day's events. The recital, in the School of Music Recital Hall, will include performances by faculty and students from the School of Music.

Bach's Lunch

The Penn State Horn Ensemble, directed by Lisa O. Bontrager, associate professor of music, will perform at the free Bach's Lunch concert at 12:10 p.m. Thursday, April 3, in the Helen Eakin Eisenhower Chapel on the University Park campus. The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

The Horn Ensemble consists of 16 French horns and one tuba. Most of the players are majors in the School of Music.

Recital features Brahms

Violinist James Lyon, performing as Joseph Joachim, and pianist Marylene Dosse, performing as Clara Schumann, will present the three sonatas for violin and piano by Johannes Brahms at 8 p.m. Thursday, April 3, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

This date marks the 100-year anniversary of the romantic composer's death. Dosse is professor of music and Lyon is an associate professor of music. The concert is free to the public.

Trumpet recital on April 5

Susan Bachman will present her senior trumpet recital at 8 p.m. Saturday, April 5, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus. The concert is free to the public.

"A Lion In Winter"

Penn State's University Resident Theatre Company will present James Goldman's dark comedy "A Lion In Winter" from Friday, April 4, through Saturday, April 12, in the Pavilion Theatre on the University Park campus.

It's Christmas of 1183 and the Plantagenets have retreated to their traditional form of family mirth: backstabbing, trickery and verbal assaults. King Henry II, Eleanor and sons merge to celebrate amidst a battle to decide who will be the successor to Henry's throne.

"The Lion in Winter" is directed by Christine Wilson, an MFA candidate in the School of Theatre Arts.

For tickets, call the Arts Ticket Center at (814) 863-0255.

BRYCE JORDAN CENTER

Christian music featured on April 28

Steven Curtis Chapman, contemporary Christian music's top selling artist, with special guests audio adrenaline and Carolyn Arends will perform at 7:30 p.m. on April 28 at The Bryce Jordan Center on the University Park campus. Tickets are \$20/\$24.50 for reserved seating by calling (814) 863-1812.

Chapman's hit singles include "His Eyes," "The Great Adventure" and "What Kind of Joy."

Circus coming in May

The Royal Hanneford Circus will perform four shows at The Bryce Jordan Center on May 3-4. Show times are 2 and 7 p.m. each day. Tickets are \$13/\$11 for adults and \$11/\$9 for children 12 and under. All seats are reserved. Group rates are available by calling (814) 863-1812.

No Doubt returns May 6

No Doubt, comprised of vocalist Gwen Stefani, bassist Tony Kanal, guitarist Tom Dumont and drummer Adrian Young, will perform with special guests Civ and The Vandals at 7:30 p.m. Tuesday, May 6, at The Bryce Jordan Center. Tickets are \$21.50 for reserved seating.

The band, influenced by new wave, guitar-rock, ska, dance, reggae, pop and even show tunes, opened for Bush last April at the Jordan Center.

Upcoming events

- March 29: Kiss, 7:30 p.m. Tickets: \$40 and \$28.50 for reserved seating.
- March 30: Phil Collins, 8 p.m. Tickets: \$45 and \$28.50 for reserved seating.
- April 1-2: Sesame Street Live "Let's Be Friends," April 1 at 7 p.m.; tickets: \$8.50. April 2 at 10:30 a.m. and 7 p.m.; tickets: \$13.50, \$11.50 adults; \$12, \$10 children (1-10).
- April 4: Garth Brooks, 8 p.m. Tickets: \$18. (SOLD OUT)
- April 19: World Wrestling Federation, 8 p.m. Tickets: \$18, \$14 and \$10.

Tickets for all shows may be purchased at the Jordan Ticket Center, Eisenhower Auditorium South Box Office, selected Uni-Mart ticket outlets, Commonwealth campus ticket outlets, or by calling (814) 865-5555 locally, or toll-free at (800) 863-3336.

For more information on Jordan Center events, visit the Web at <http://www.bjc.psu.edu>

Beyond the Classroom Walls

PENN STATE
ide
INNOVATIONS IN DISTANCE EDUCATION

A SPECIAL INSERT TO THE PENN STATE INTERCOM

innovations in Distance Education (IDE) was launched in 1995 with a grant from the AT&T Foundation. The project is a major initiative to help faculty at Penn State and the historically black Lincoln and Cheney universities create a supportive institutional culture in which the possibilities of distance education can be realized.

There are two project components: a Faculty Initiative and Policy Symposia.

Faculty Initiative

This aspect of IDE involves representative faculty from Penn State's academic colleges, and institutional partners Cheyney and Lincoln, each of whom is working on a distance education project. The Faculty Initiative's culminating work is a set of faculty-determined guiding principles and practices for quality distance education based on the professional development and course development experiences gained by the faculty members during the project. Thus far, the IDE faculty and staff are concentrating on six categories within which principles and practices are being developed. These categories include Learning Outcomes, Interactions and Learning, Use of Instructional Media and Tools, Social Relationships and Learning, Assessment and Measurement, and Learner Support Systems and Services.

Because Penn State is hosting the 18th World Conference of the International Council for Distance Education, June 2-6, 1997, IDE participants have a unique opportunity to share their experiences and outcomes with an international audience, as well as with university colleagues. On May 30, IDE faculty will present a day-long preconference: "Innovations in Distance Education: Principles and Practices from a Faculty Perspective." Penn State faculty interested in distance education are encouraged to register for the preconference by calling 1-800-PSU-TODAY.

Policy Symposia

The second major component of IDE is the annual Policy Symposium. It provides a forum

innovations continued on page 3

Rockin' on into the future

"Whether a course is taught in a classroom or from a distance, the instructor has to make the material interesting, clearly important to the students, and worth their time and effort," according to William J. Kelly, associate professor of Theatre and Integrative Arts. "My work in distance education has, so far, focused on finding ways of doing that in a digital environment and doing it as well, if not better, than I can in a classroom."

Kelly is designing a distance education version of INART 115, *The Popular Arts in America: Popular Music*, a course currently offered at University Park to almost 800 students each semester. "Part of the impetus to move into distance is simple supply and demand. I have substantially more requests for enrollment in this course than can be accommodated by resident instruction," he said. "Distance offers the opportunity to expand access to the course and, hopefully, improve the learning environment for students who wish to take it."

Kelly and his IDE team are preparing a demonstration module that focuses on Elvis Presley as an example of how such a course could be taught at a distance. Kelly has written an interactive text, and he and his team have created a variety of support materials and services, including comprehensive digital discographies, study tools and feedback mechanisms.

"What we're aiming at, ultimately, is a hybrid CD-ROM with dedicated Internet linkages," Kelly said. "The CD-ROM gives us speed, high-quality graphics and audio, and a solid platform to work from. The Internet linkages give us flexibility and the ability to expand the interactive capabilities of the course."

Elvis Presley was chosen as a focus for the module, Kelly said, because "he was such an important figure in the development of popular music and because there is a wealth of information and material available on him, which makes our job

College of Education faculty lead state effort to educate and train 100,000+ teachers

DR. KYLE L. PECK

DR. DAVID PASSMORE

Two College of Education faculty members are heading a statewide effort to educate, train and support more than 100,000 teachers and education professionals in using computer technologies to improve the effectiveness of education in

Pennsylvania schools.

Dr. Kyle L. Peck, associate professor of education, and Dr. David L. Passmore, professor of education, are creating a set of learning experiences and tools for more than 100,000 Pennsylvania K-12 teachers and 4,500 school board members, principals and counselors. These materials are for the professional development component of Gov. Tom Ridge's Link to Learn program. The faculty members are working on Link to Learn in conjunction with the Innovations in Distance Education (IDE) project at Penn State.

Link to Learn will connect all

Pennsylvania schools, colleges, universities (public and private) and libraries to a high-speed voice, video and data network called the Pennsylvania Education Network (PEN).

Peck, Passmore and their IDE team are developing education materials to assist teachers and education professionals in using computer network technologies to tap the resources of the Internet for the benefit of students in grades K-12. They will use asynchronous courses delivered on the Web, chat rooms, E-mail, World Wide Web pages, forums, databases and sound and video

technologies as part of the project, as well as create some materials on CD-ROMs and other media for off-network use. Asynchronous courses will allow teachers and education professionals to learn at their own pace and in locations of their choosing.

The faculty members selected these distance education technologies to meet the needs of teachers, who are busy people, Peck said. Passmore added these technologies also will help them handle the instructional load for large numbers of teachers enrolling in the same course. As many as 10,000 teachers could be

connected to the Internet and ready to enroll in courses when the first is launched this summer, Passmore said.

Peck said one of their goals is to use technology to create small communities of learners who can talk with each other about what they are reading and seeing and give each other feedback about their progress. An assessment of the target audience for these materials shows that educators have different levels of knowledge and experience. As a result, they will move through the courses at different rates.

Quotes from Distance Education Policy Symposium participants

JUDITH A.W. THOMAS

The symposium offered the opportunity for interaction and pushing out about the state of the art in distance education at other institutions. Our institutions will benefit from the recommendations made here and the policy issues it discussed. The symposium offers the opportunity for a new level of interaction over present policy and takes a look at the role Lincoln University can play in distance education.

Judith A.W. Thomas
Professor and Chair of the
Department of Education
Lincoln University

ELAINE DIDIER

The symposium provided an opportunity to think more broadly about student issues related to distance education and how we can maintain distance education as part of the array of learning opportunities we offer both on and off campus.

Elaine Didier
Director of Residential and Research
University Programs, Academic
Oquirrh
University of Michigan

CAROLYN Y. WOO

The symposium has been extremely helpful in getting at the more subtle shades of policy issues so that we can distinguish between how policy can help and how it can obstruct.

Carolyn Y. Woo
Associate Executive Vice President
for Academic Affairs
Purdue University

KENNETH LOONEY

It's always very beneficial to attend symposiums such as this one at Penn State. I can go back to my home institution and share this experience from the symposium with my colleagues.

Kenneth Looney
Dean of Extended Education
Tennessee State University

Participating Institutions: University of Illinois at Urbana-Champaign, Georgia State College, Georgia Southern University, Indiana University East, Lincoln University, Michigan State University, North Carolina Central University, Ohio State University, Penn State Harrisburg, Tennessee State University, and the University of Wisconsin-Madison. About 150 faculty, students, and administrators from 15 institutions participated.

DR. MARY FRANCES PICCIAO WITH GLENN JOHNSON, WHO
DESIGNED THE WEB SITE'S ANIMATION, AND NUTRITION
GRADUATE STUDENT AMY MACKAY

Web site enhances classroom learning

"Good instruction is good instruction, regardless of the medium," said Dr. Mary Frances Picciano, who is directing the development of a Web site for Nutrition 251, Introductory Principles of Nutrition.

She acknowledges that this project has challenged some of her assumptions: "I first envisioned this as a distance education version of the class here. But when I got into it, I saw that a Web site can enhance classroom instruction as well."

For example, animations can demonstrate dynamic processes more effectively than textbook illustrations, noted Picciano, professor of nutrition in the College of Health and Human Development. "Visual aspects are really enhanced on the Web," she said. "In the textbook, there's a photo of a bomb calorimeter (used to measure potential food energy). But on the Web, we have animation that actually shows the steps in determining energy content—it can show that fat gives more energy than protein or carbohydrates. A lot of concepts are better taught by animation."

Right now, Nutrition 251 is offered in three sections per semester to about 1,500 students at University Park and other Penn State campuses. It's also one of the 20 highest-enrollment distance education courses, offered as an Independent Learning course with printed materials. Picciano hopes it will be available on the Web this summer or fall.

University Park students already are using the Web site as a supplement to classroom instruction. The address is <http://cac.psu.edu/projects/nutrition/>.

They find lecture notes and links to related information and sites such as the American Dietetic Association and the American Academy of Pediatrics. "It's a neat way of providing background information," Picciano said.

Project Director Gary Miller on Creating a New Learning Environment

At an international meeting of distance education leaders sponsored by the International Council for Open and Distance Education, John Samuel of the South African Ministry of Education described a challenge that faces his colleagues from around the world. "It is not enough," he said, "that we use technology to increase access to education. We must also ask ourselves what we will do with that increased access. We must create a new learning environment if we are to be successful in the long run."

Around the globe, technology is changing the way we work and the way we play. It is changing how we use information and making lifelong learning a necessity almost every walk of life. In the process, it is moving distance education—our ability to meet the changing needs of learners wherever they may be—into the mainstream of our academic community.

Penn State's 1992 Task Force on Distance Education addressed this need directly. One of its recommendations was that the University create an environment that would allow distance education to move into the mainstream of the University's academic life.

Innovations in Distance Education is making an important contribution to that goal. This three-year University-wide effort, now in its second year, has been supported by \$500,000 in grants from the ATRF Foundation.

Learning continued on page 4

Another advantage, she said, for residential as well as distance instruction, is the self-paced nature of a Web site. "If you have a learner who works at a slower pace, you can accommodate that." It also helps to accommodate different learning styles, she said.

Students also can share information and questions, discuss E-mail and chat rooms. But this poses its own set of issues, Picciano cautions: "We're going to have to establish a protocol for electronic media, policies and procedures for appropriate kinds of interactions. Just opening chat rooms to promote student-to-student learning isn't enough; it has to be monitored carefully and constantly evaluated to combat misinformation."

Picciano said development of the Web site has "caused me to dissect and analyze the practices and procedures of graduate and undergraduate education." The project also has required intensive teamwork and technical support, she said. And, there's a certain vulnerability in making one's course materials so accessible: "You have to learn to be open to critical evaluation from peers and students. You can try different things, if they're not working, try others—same as in a lecture," she said.

"We shouldn't think of distance education as a substitute, we have to think of it as another type of student-instructor interaction," Picciano said. "I think there's a false impression about distance education—once a correspondence course was written, interaction was minimal. But with a Web-based course, interaction is actually greater."

Picciano will hold a workshop May 16 at Penn State for all Nutrition 251 instructors to acquaint them with the history and design of the Web site, as well as give them hands-on practice.

Faculty lead (continued)

"We will allow teachers to form groups dynamically," Passmore explained. They will have opportunities to practice and demonstrate that they can perform the activities in the course. They will post some of their work on the Web, where other teachers who enroll in the course at a later date will be able to review this work and provide feedback to the teachers who created it."

Passmore said research shows that learners who are given appropriate guidelines can provide valuable feedback to other learners.

Handling large numbers of students with different educational needs will be a challenge—whether the courses are developed for resident instruction or distance delivery. Peck said he will

use the same tools for creating these professional development courses that he uses for developing resident instruction courses. The only difference between the two kinds of courses is in how students talk to one another.

Passmore said another consideration involved in developing courses using a variety of technologies is time. Development time for a traditional resident instruction course, for example, could average about 100 hours for every hour of instruction delivered, compared with 300 to 400 hours of development for every hour of instruction for a multimedia course.

"A substantial amount of time goes into designing and developing a multimedia course,"

Passmore said, "but the multimedia course has the potential to serve a lot more students."

As they create the framework for these professional development modules, they are carefully focusing on what is needed to deliver education to large numbers of teachers.

Peck said, "The hallmark of good education is having important things happen in the minds of students. Our job is to give them something thought-provoking and an opportunity to reach this information."

He also envisions assessing student learning in new ways. Instead of evaluating student performance by assigning a letter grade (A, B, C), he would like to work with students to help them

master key course objectives; then award them credit for the course. He sees this as a win-win method of assessing learning for instructor and student.

Working on the project is providing both faculty members with opportunities to discuss their ideas, such as new ways to assess learning, with Penn State colleagues and other experts around the state.

The result will be the creation of a new distance education model that can be used to educate any number of students at the same time. The model can then be adapted for other audiences, including the more than two million teachers nationwide, as well as teachers worldwide. Peck said.

Physics students embrace cyber quizzes

A year ago, Dr. Mazural Huq had no access to the Internet. Today, as a result of his IDE involvement, he is moving toward a long-term goal of helping his colleagues develop instructional design skills and using the Web to introduce distance education at Lincoln University.

An associate professor of physics, Huq is taking the first steps by integrating a Web site into a residential version of a two-semester calculus-based physics course at Lincoln.

"It has been a real learning experience for me," he said, "developing graphics, everything pretty much on my own."

Students can log onto the site, at <http://aux.lincoln.edu/departments/physics/> to supplement classroom instruction at Lincoln, about 30 miles southwest of Philadelphia.

"One of the most important elements is the multiple-choice quizzes on the Web," Huq said. "Students can take these and get immediate feedback on their performance."

Eventually, Huq hopes to offer the quizzes for credit and keep track of grades via the Internet.

The 40 students are so enthusiastic, he said, that if he announces in class that he hasn't had time to post the latest round of materials on the Web, he gets audible groans of disappointment.

He plans a more formal evaluation of the Web site with a questionnaire at the end of the course. "It will ask students about their access to the Internet, the number of times a week they get online, what they've found most useful on the site and whether they think it has helped to improve their grade."

He sees the Web as a great tool for introducing distance education at Lincoln. One of the first steps will be to design a template that professors could use to put quizzes on the Web. "It could be adapted to any subject, really," he said.

For Huq, who is teaching Physics 104 for the sixth year, IDE "has opened up my horizon. It's helped me see how I can improve in the classroom. I'm learning so much; I'm really excited about the whole thing. I have shared his project at a brown-bag lunch for other faculty members and is planning a workshop at which professors could get this information on distance education as well as hands-on Web experience."

Concerns that faculty members have expressed about adopting distance education, he said, are the time involved to get comfortable with the technology and other aspects. Supportive administration is crucial, he said. "Number one is faculty evaluation—how does it count toward tenure?" Also, he added, "We have to make sure the technology is in place to support it."

DR. MAZURAL HUQ

Libraries to extend resources to students at a distance

LIAS, the Library Information Access System, currently extends access to the University Libraries' online catalog to anyone with a computer and a modem. Now the Libraries is extending its resources further to serve distant learners.

Carol Wright, associate librarian, and Elizabeth Walker, information technology associate, are partnering with Dr. R. Shannon Duval to develop instructional modules to support students enrolled in STS 101, Science, Technology and Human Values. As part of the Innovations in Distance Education (IDE) project, Wright and Walker are creating a library Web site to be integrated with the Web site being designed for the STS course. Duval, assistant professor of science, technology and society, is developing the interdisciplinary Web-based course for resident and distance delivery.

Science, Technology and Human Values explores the intersection of science and technology with questions of human values and investigates contemporary moral issues involving science and technology. One class project requires students to select a product they use everyday and investigate issues surrounding its production, consumption and impact on the environment. To complete the project, students need to use a wide range of

resources, including library databases, print information resources and Internet resources.

More than simply linking to various Web sites, Wright explained, the goal of the Libraries' IDE project is to "instruct students in the selection and use of appropriate databases and resources, to teach students principles of electronic database searching and to evaluate the suitability and reliability of the information retrieved."

The overload of information available in print, on library databases and on the Internet complicates rather than simplifies the task of retrieving appropriate information, she said, noting that this instructional challenge is magnified in the distance learning environment.

Walker and Wright are examining authoring packages and Java scripting software which allow the creation of interactive instructional modules, such as concept mapping, self-study quizzes and database simulation. Because of the interdisciplinary nature of the STS course, the modules will be generalizable for other courses.

Walker, who has been working with adult learners for more than seven years, said, "There is a myth that in-class instruction is better than instruction at a distance. I've done both kinds of

instruction and found that quality learning results when learners are involved and are interacting with each other and with the instructor." She added that a quality instructor is one who can meet a student at his/her level and guide their learning path.

Wright observed that faculty are excited about working in an electronic information environment and are endorsed about the

DR. PHILIP COCHRAN WITH INSTRUCTIONAL DESIGNER ANGEL HERNANDEZ

The differences are blurring

Dr. Philip Cochran, associate professor in The Smear College of Business Administration, is working with more than 20 other faculty and staff members to create and revise materials for the print and electronic versions of BA 243, Social, Legal and Ethical Environment of Business.

"We're trying to partner with a publisher to produce a multimedia product," he said. "It might be on CD-ROM or on the World Wide Web—or both. This is a whole new approach."

Cochran said the needs and expectations of such a project are dramatically different from producing a textbook, which primarily involves an author and publisher. "Distance education really has to be an integrated effort; it requires a lot of technical support." In The Smear College, the Center for Instructional Technology is involved, for example, to provide computer and other technical support. We are also working closely with corporate partners, including Agupenn and IBM to add real world examples of the principles that we are teaching.

Adding to the complexity is the role of BA 243 in the Business Administration curriculum. BA 243 is designed to provide 40 of 180 modules in an integrated core curriculum, so progress in this class is linked to that in five other courses.

One advantage of this integration, Cochran said, is, "If this works for this course, I feel it could easily be extended to the other five courses—Management Information Systems 204 and Business Administration 301, 302, 303 and 304."

Cochran also sees the materials used for the distance education version easily fitting into a more conventional classroom setting.

"It really doesn't matter if it's residential or distance," he said. "The differences are blurring, and I think they will continue to fade and probably, eventually, they will disappear."

An interesting comparison of residential vs. distance learning, he says, might be to make attendance in an on-campus class optional, with all class materials available in alternative forms. "It

would be interesting; it would allow us to really test it with the same student body," he said.

Increasingly, both residential and distance education demand keeping abreast of the latest developments in a field, Cochran said. "I remember taking classes in which the newest book or article on a reading list was maybe 20 years old," he said. "That can't happen anymore; we have to stay current and bring in real-world examples as they occur. Teaching is becoming a 'just in time' activity."

Ivan Cochran's residential instruction has an element of self-paced learning with interactive materials, he noted. If a student finds a particular concept difficult to understand, Cochran can create Web links to related topics and fuller explanations without slowing down the rest of the class.

As for his own professional development, Cochran said his participation in IDE has "forced me to really think about teaching and learning issues. Moving in a new mode makes you rethink the class—what students should be learning and how. It gives you a different perspective on something you've been doing for a long time."

He says that traditionally it was difficult to devote much time to distance education since it was strictly an additional task on top of a faculty member's normal teaching load. He suggests that if the administration would account for distance education courses as part of the base teaching load, rather than an additional duty, faculty members would give a substantially more attention.

Cochran says President Graham Spanier's commitment to distance education helps make it an integral part of Penn State. "That kind of leadership helps enormously," he said.

"If we're going to move from thinking of college as being for 18- to 21-year-olds to making it a lifelong experience, we have to offer education in this fashion. We can't expect 30- to 40-year-olds to drop what they're doing and return to campus for a year."

Innovations (continued)

for leaders in distance education from members of the CIC and several historically Black institutions to share perspectives and solutions for overcoming barriers to mainstreaming distance delivery into higher education. Symposia in 1995 and 1996 focused on institutional issues and the faculty's pivotal role in distance education. A third symposium to be held during the 1997-98 academic year will address institutional support and policy issues related to curricula and learners.

"A major outcome of the Policy Symposia," said Deborah Kleivens, IDE project manager, "will be a comprehensive policy document that will provide model policy statements addressing each of the three areas for policy development we're considering: administrative issues, faculty roles, and curriculum design and learner support issues." "What we hope to have when we're done is a document we will be able to share with other institutions that are grappling with how to integrate distance delivery into their institutions' mission."

Kleivens said, "We also will have created a network among land-grant and historically Black institutions of people who are on the forefront of the effort to mainstream distance education."

CAROL WRIGHT

ELIZABETH WALKER

Resources continued on page 4

Hard-wired for learning

Dr. Joan S. Thomson credits her participation in IDE with raising her awareness of the opportunities that communications technologies provide for distance education courses.

"I have learned about the technology infrastructure supporting this kind of project through professional development activities I have attended as part of the IDE project," said Thomson, an associate professor of rural sociology.

"Penn State has done a superb job of providing the infrastructure. I have also learned to appreciate the team approach to develop a course. You need a tremendous amount of expertise from many disciplines and a great deal of time to develop a course for distance delivery," she said.

Thomson is creating a Web site where freshman agricultural sciences majors and others interested in food and fiber systems can explore the education options available at Penn State. She is developing an introductory seminar, "Be a Master Student!" (Ag 150) for distance delivery, as well as for resident students' use.

"With more and more College of Agriculture Sciences freshmen beginning their undergraduate experience at a Penn State campus (other than University Park), there is an increasing need for the Be a Master Student seminar," Thomson said. "The seminar is also designed to help students make the transition into the higher-education community and to broaden their perspectives and horizons."

Besides developing the Web site, Thomson said, she is designing an instructor's guide to help instructors incorporate activities and learning experiences on the Web into the seminar curriculum. Such integration is an important facet of helping colleges deal with the changing expectations of students, both on and off campus in the future, she said.

She and her IDE project team are using communications technologies to make it possible for students and their seminar instructors to access the Web resources anytime and from any location equipped with a computer and modem.

In working on the project, Thomson said she finds the same teaching and learning goals apply whether the seminar is to be delivered as resident instruction or at a distance.

DR. JOAN S. THOMSON

"It's important that students learn to solve problems, think critically and use the educational resources available to them both inside and outside the classroom," she noted.

How this learning is achieved is up to the senior college faculty members who learn teach the seminar, she added. In a survey of seminar instructors conducted last fall, she found there is no consensus on the issues and perspectives that need to be

shared with students; however, there is agreement that incoming students have a limited view of the food and fiber system and the career options open to them. Faculty members suggested that a new set of resources be created to supplement those currently available.

Thomson also is concerned about students' computer literacy and the availability of computer equipment. In a separate survey of students enrolled in the seminar last fall, she found that almost all had opened their University E-mail accounts, but only about half have their own personal computers. As a result, most used University computer labs to access the Web.

"We need to ask ourselves how sophisticated we should make the Web site if students have to rely on a lab to access it," Thomson said.

She will start collecting answers to this and other Web usage questions next fall, using a prototype evaluation tool now in development.

As students become more computer literate and use their own computers on campus, at home and work to connect with the University, they will demand that more resources be available electronically, she added.

"Administratively, there is strong support for distance education at Penn State to meet this growing demand," she said.

Thomson plans to share the insights and experiences she has acquired redesigning the freshman seminar with College of Agricultural Sciences faculty members who teach the seminar. She also is writing about her IDE project in professional journals and making presentations.

Rockin' (continued)

in building the example a bit easier." But the primary reason that Kelly decided on Elvis is more personal: "I think that Elvis occupies a unique and special place in our history. As a recording artist, he towers above the competition. In 1952 his sales passed the one billion mark which will likely never be equaled. But more important, he has become a figure of truly mythic proportions who persists in our culture despite the fact that he has been dead for almost twenty years... if, of course, you accept the fact that he actually died."

Kelly uses popular music, especially rock and roll, as an important part of our cultural heritage. "Popular music gives us a wonderful insight into our past and a remarkable means of charting our progress as a people," he said. "As history, it tells the story of all of us—rich and poor, black and white, successful and failed. And it tells it in all of our particular voices so that we can get a sense of what the variety of our experience was and heard that experience honestly and unfiltered. The music also tells us what our experience felt like, and through it we capture the feelings that others had."

"I think that popular music is also one of our greatest cultural gifts to the rest of the world; our music has become everyone's music. So, as an educator, I think that it's important to know where that music came from, how it grew and developed, and, most important, how it changed and helped to shape our lives."

The most profound effect that his exploration of distance education has had on Kelly's perception of education has been "to make me think more about resident instruction and to consider it in ways that have been rather surprising. Like most faculty, I thought that teaching was resident instruction, but it isn't anymore. Some things work better in a face-to-face learning situation and some things don't. Things also work differently for individual students. What's important, I think, is to make sure that we offer our students the best learning environment for their needs, regardless of whether that is a resident or a distance environment."

Kelly is also interested in the lifelong learning opportunities that distance education provides. "In 10 or 15 years, people of my generation are going to begin their retirements, and many are going to see going back to school as an important part of their post-working lives," he said, "not for degrees or to acquire job skills, but for the sheer joy and pleasure of learning. And they'll want to do this at home. Part of what I want to work on is developing and designing those learning opportunities for the future."

GARY MILLER
ASSISTANT VICE PRESIDENT FOR
DISTANCE EDUCATION AND
IDE PROJECT DIRECTOR

Learning (continued)

Much of this funding has been used to provide faculty with opportunities to work with colleagues across disciplines and at other institutions to reflect on their own work in distance education and, together, to identify key principles and practices that contribute to successful course development in distance education.

IDE faculty represent all academic colleges. They represent a broad range of interests and expertise. Some are working on courses that will be offered off campus through the Department of Distance Education. Others are involved in inter-campus courses delivery or are experimenting with the use of distance education media and methods in their on-campus courses. These faculty—along with colleagues from Cheyney University and Lincoln University—have become a team, working together to define the elements that will best help faculty enhance Penn State's learning environment for students both on campus and worldwide.

Resources (continued)

possibilities of incorporating it in their teaching. Students, too, are receptive to the remote user environment, access to remote databases and instructional modules are examples of how the distinctions between resident/remote students are being blurred.

To determine the effectiveness of their project, Wright and Walker plan to evaluate how students use the online instruction and resources, as well as how the integrated approach with the STS class supports the instructor in meeting class goals and objectives.

Participating in the IDE project is helping Walker in her role as the Libraries' trainer for microcomputer systems.

"Working on the IDE project is giving me insights that I can use in developing training for Libraries' faculty and staff at all Penn State locations," Walker said.

Both Wright and Walker agreed that the Libraries' faculty and staff are on the cutting edge of the movement to share information resources on the Web. They noted people want to access information from remote locations, and the same advances in technology that are fueling efforts and agencies for distance education initiatives are applicable to libraries, as well.

Professionals, students to share spotlight

Dr. Craig Bernerke, associate professor of Architectural Engineering estimates that as few as 10 percent of the 10,000-plus lighting professionals have formal education in illumination engineering. Many are missing the fundamentals of lighting design, he said.

Through his IDE project, Bernerke is developing materials for an interactive video presentation and is negotiating a contract with a remote site for AE 451, Basic Theory of Building Illumination. He hopes to offer the course during the fall 1997 semester. Students at a remote site in New York City (where many lighting designers work) will participate with a University Park class via a live, two-way audio-visual system.

It will be a two-way street not only in the sense that students in the classroom and those at the remote site will see and hear one another, but also that resident students and off-campus professionals will interact and learn from one another.

There has been some interest in offering a concentrated version of the course to practicing professionals in Omaha, Nebraska, through a joint effort with the University of Nebraska.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, March 28

Palmer Museum of Art, 2 p.m., Christoffers Lobby Gallery Talk presents Catherine Ciferri on "American Watercolors at the Palmer Museum."

Saturday, March 29

School of Music, 8 p.m., Recital Hall. Student Recital presents Nina Soisson, cello.

Monday, March 31

School of Music, 8 p.m., Recital Hall. Student Recital presents Kristen Lunetta, voice, and Tom White, piano.

Tuesday, April 1

School of Music, 8 p.m., Recital Hall. Student Recital presents Joshua Gray, clarinet.

School of Music, 8 p.m., 122 Music II. Graduate lecture/recital with Jason Byrnes, tuba.

Wednesday, April 2

School of Music, 2:30 p.m., Palmer Lipson Auditorium. Anthony Leach on "Celebration of Diversity in the Arts."

School of Music, 7:30 p.m., Recital Hall. "Celebration of Diversity in the Arts Recital."

Thursday, April 3

School of Music, 8 p.m., Recital Hall. Faculty Recital presents James Lyon, violin.

Friday, April 4

Kern Graduate Commons, noon, Kern. Concert titled "K Jazz" Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "A Thousand and One Nights." For tickets, phone (814) 863-0255

University Resident Theatre Company, 8 p.m., Pavilion Theatre. "The Lion in Winter" by James Goldman, directed by Christine Wilson, through April 12. For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. David Buechner, "Yamaha Concert Artist."

Saturday, April 5

Palmer Museum of Art, 11:30 a.m., Christoffers Lobby. Gallery talk presents Katherine Bentz on "Italian Baroque Painting at the Palmer Museum."

School of Music, 2 p.m., Recital Hall. Student Recital presents Matt Alcora, trumpet, and Courtney Mundy, piano.

School of Music, 5 p.m., Recital Hall. Student Recital presents Kris Laird, tuba/euphonium

School of Music, 8 p.m., Recital Hall. Student Recital presents Susan Bachman, trumpet

Sunday, April 6

United Soul Ensemble, 5 p.m., Eisenhower Auditorium. "United With Praise."

School of Music, 8 p.m., Recital Hall. "Composer's Concert."

SEMINARS

Friday, March 28

Biology, 2:30 p.m., 8 Mueller Lab. Philip Benfey on "Radical Patterning and Cell Expansion in the Arabidopsis Root."

Computer Science and Engineering, 4 p.m., 302 Pond Laboratory. Kishor S. Trivedi on "Reliability Modeling: Tools and Techniques."

Monday, March 31

Agricultural and Biological Engineering, 12:20 p.m., 101 Agricultural Sciences and Industries. Janie Fouke on "Integrating Biology and Engineering."

Setting up

Ann Shields, left, and Ann Donovan work in the Hetzel Union Building Formal Gallery on the University Park campus to hang an exhibit by artist Howard Brooks. The gallery will feature a mixed media exhibit of Brooks' work through May 4

Photo: Greg Gineco

Gravity Center, 2 p.m., 339 Davey Laboratory. Roger Penrose on "How to Co-Patch a Right-Handed Graviton."

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. D. Yung on "High Performance Fortran and Java Compilers"

Tuesday, April 1

Biology, 4 p.m., 8 Mueller Laboratory. Steven Beer on "Peculiar Pathogen Protein Prevents Plant Pathogenesis." Geoscience, 4 p.m., 112 Walker. Lee Kump on "Glaciation in the Ordovician Greenhouse."

Wednesday, April 2

Gerontology Center, 12:15 to 1:15, The Living Center, 110 Henderson. Linda S. Noelker on "Stress and Job Satisfaction Among Nursing Assistants Caring for Residents with Dementia."

Engineering Science and Mechanics, 3:35 p.m., 212 Hammond. David W. Lee on "Evolutionary Engineering in Plants of the Tropic Rain Forest Understory."

Thursday, April 3

Plant Physiology and the Biotechnology Institute, 2:30 to 3:30 p.m., 112 Buckhout. David Galbraith on "Exploring the Plant Cell and its Genome Through Expression of Foreign Proteins."

Physics, 3:30 p.m., 101 Osmond Laboratory. Robert Hilborn on "Experimental Tests of the Spin Statistics Theorem." Food Science, 4 p.m., 117 Bond Laboratory. John Lord on "Overview of St. Joseph's Food Marketing Program." Communications, 4 to 5 p.m. Interactive satellite teleconference with John Riggs on "How to Build a Media Empire: A Tiger by the Tail."

The Center for Ethics and Religious Affairs, 7:30 p.m., Paul Robeson Cultural Center. Cheryl Townsend Gibson presents The 13th Annual Martin Luther King Jr. Memorial Lecture

Civil and Environmental Engineering, 7:30 p.m., Applied Research Laboratory Auditorium. Alan G. Davenport on "Why Worry About Natural Disasters?" Landscape Architecture, 8 p.m., Colonial Room, The Nittany Lion Inn. Carol Johnson on "Variety in Landscape Architecture"

Friday, April 4

Physics, 2:30 p.m., 55 Osmond Laboratory. Tania Slawicki on "Shear-Induced Structures in Aqueous Micellar Surfactant Solutions"

Biology, 2:30 p.m., 8 Mueller Laboratory. Richard Amasino on "Regulation of Flowering and Senescence in Arabidopsis." Physics, 4 p.m., 55 Osmond Laboratory. Tania Slawicki on "Doing Small Angle Neutron Scattering at NIST: Working in a Scientific Melting Pot."

Philosophy, 4 p.m., The Nittany Lion Inn. Drucilla Cornell on "Freedom for Women?"

Waynick Lecture Series, 8 p.m., 112 Walker. Charles L. Hostler on "Fifty-Five Years of Progress in Meteorology and a Look at the Future"

CONFERENCES

Monday, March 31

President's Commission on Racial/Ethnic Diversity, The Nittany Lion Inn. "Diversity—Beyond Awareness and Education."

Tuesday, April 1

The Nittany Lion Inn. Pennsylvania Poultry Sales and Service to hold conference, through April 2

Friday, April 4

"Communication in the Middle Ages," The Nittany Lion Inn, through April 5

Saturday, April 5

Communications, 9 a.m. to 4:30 p.m., Thomas Building. Sally Jackson on "Teaching and Learning with Technology Symposium."

EXHIBITS

HUB Art Alley Panels

Oil and print exhibit by Amy Jane Whitney and Darren R. Grier, through May 4

HUB Browsing Gallery

"Photographs of Australia" by Richard Woodard, through April 27

HUB Formal Gallery

Mixed media works by Howard Brooks, through May 4

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21

Kern Exhibition Area

Photographic work of David Orsillo, through April 6

North Halls

Paintings by Judi Ruffner, through April 30.

Palmer Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18

"Recent Gifts and Acquisitions: Works on Paper," through June 15

Zoller Gallery

School of Visual Arts. "MFA Thesis Exhibitions," drawing/painting by Thomas Birken, through April 15

Reflects an international perspective.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://cac.psu.edu/calendar/>

LECTURES

Bryce Jordan to speak about improving trust

Former Penn State President **Bryce Jordan** is scheduled to be the next speaker on Wednesday, April 16, at The Nittany Lion Inn as part of the Penn State Forum, a speaker series sponsored by the Faculty Staff Club and the Penn State Bookstore. Jordan will discuss "Maintaining and Improving Public Trust: A Challenge for Our Universities."

BRYCE JORDAN

made by mail or by stopping by the Faculty Staff Club office at 110 HUB. Departments may reserve a 10-person table; tickets also will be

on sale at the door.

On May 9, **Ralph Gomory** of the Sloan Foundation is expected to speak. For more information on either event, call (814) 865-7590.

Symposium focus is teaching and learning with technology

Sally Jackson, director of the Communication Collaboratory and acting head of communication at the University of Arizona, will be the keynote speaker for the April 5 "Teaching and Learning with Technology Symposium" at University Park.

This year's fifth annual symposium, which will be held from 9 a.m. to 4:30 p.m. in the Joab L. Thomas Building, will provide a forum for sharing ideas and experiences in using technology for University-level instruction. At the University of Arizona, the Communication Collaboratory is a networked classroom in the Department of Communications that also houses a variety of research and development projects related to communication technology — especially

POLIS (Project On-Line Instructional Support), a unique resource for collaborative learning.

Jackson's address will focus on sharing with Penn State the planning, design and development of POLIS and how online resources contribute to improved teaching. POLIS is both an online instructional resource for students and an online support tool for instructors. To register, please contact **Jean Cowher** at ajc@psu.edu or (814) 863-4356. You also can register via the World Wide Web at <http://hawaii.psu.edu>. Click on "Computing," then choose "Seminars," then choose "Seminars Schedule."

Anyone with questions about the symposium can call **Karen Peters** at (814) 863-7763.

Talk discusses security on the Internet

Colleges, universities and corporations are all concerned about security and the Internet. A computer security group recently conducted a survey which reported three-quarters of the 563 U.S. corporations, government agencies, financial institutions and universities which responded reported suffering financial losses in the last year due to computer security breaches.

An April 16 noon presentation at the Penn State Downtown Center in

Harrisburg will focus on whether information and businesses can ensure safety and security on the Internet. The presenter, **Andrew Walls**, is the technology coordinator for the Commonwealth Educational System and was formerly employed in the software development industry. He holds an MBA from the University of North Carolina-Chapel Hill.

The lecture is free. For information or a reservation, call the Downtown Center at (717) 783-0433.

Change and challenge discussed at Mont Alto

Penn State Mont Alto campus announces its spring series of Campus Theme speakers. This year's theme is "Change and Challenge: Mont Alto and Beyond." All lectures are free to the public. The next lecture in the series will be Thursday, April 3, at 7:30 p.m. **Paul Finkleman**, a historian and author of the University of Miami, addresses "Challenge of Equality: Race Relations in the 21st Century" in the Auditorium, General Studies Building.

For information on this and any other events in the series, call (717) 749-6234.

April 4 lecture challenges equality concept

Drucilla Cornell, professor of law, women's studies and political science at Rutgers University School of Law, will present "Freedom for Women?" as the 1997 Dotterer Lecture, an annual event of the philosophy department.

The lecture — sponsored as a memorial by the family of distinguished philosophy Professor **Ray H. Dotterer** — takes place at 4 p.m. Friday, April 4, at The Nittany Lion Inn on the University Park campus. This lecture challenges the concept of equality between men and women that has been pursued by feminism during the past 30 years and forms part of a forthcoming book *Fragile Freedom: Re-thinking Sex and Equality*.

The lecture and the reception that follows are free to the public.

Business issues talk views a local firm going global

The Current Issues in Business Lecture Series sponsored by the Penn State Harrisburg School of Business Administration continues April 8 with a presentation by **C. Powell Adams** of AMP Inc.

Adams, who holds an MBA from Penn State Harrisburg and who will become the Sara Lodge professor of management at Elizabethtown College in the fall, will focus his noon presentation at the Penn State Harrisburg Eastgate Center on "A Harrisburg Firm Goes Global: Some Observations and Issues."

The one-hour presentation is free to the public. For information or a reservation, call the Eastgate Center at (717) 772-3590.

Learn about carbon during April 10 talk

Linda E. Jones, associate professor of ceramic engineering and sciences at the New York State College of Ceramics, will present "The Performance and Applications of Carbon: A Structural Perspective" from 3 to 4 p.m. on Thursday, April 10, in room C213 of the Coal Utilization Laboratory on the University Park campus.

Jones will discuss how carbon, in all its forms, has been linked to human history and technology, but despite this, its performance and properties are often misunderstood. Carbon is found in everything from eyeliner to diamonds, car tires to rocket nozzles. Carbon is interstellar dust and in people.

This lecture is part of the 1996 George D. Grafflin Lecture Series sponsored by the American Carbon Society and the School of Ceramic Engineering and Sciences at the New York State College of Ceramics.

Refreshments will be served at 2:30 p.m. in the foyer of C213.

Continuing education program deals with trauma

The Department of Nursing at The Hershey Medical Center will sponsor a continuing education program titled "Trauma Impact: Blood, Brain & Body," on Sunday and Monday, April 13 and 14. The program is designed to provide practical information to pre-hospital personnel, nurses and physicians involved in caring for trauma patients. Final registration and lectures will be held from 5:30 to 7:30 p.m. on Sunday, and 7:30 a.m. to 4:30 p.m. on Monday.

The fee for the two-day program is \$110 and includes handout materials, break refreshments and lunch. Enrollment is limited and pre-registration is requested by March 28. For more information, contact the office of Continuing Education at (717) 531-6483.

Presenters rebut assertions made in The Bell Curve

After becoming a *New York Times* bestseller, *The Bell Curve* drew a great deal of national and international attention. A Penn State Harrisburg Eastgate Center presentation at noon on April 30 will examine the publication and its implications.

The featured presenters, **Joe Kincheloe** and **Shirley Steinberg**, editors of *Measured Lies — The Bell Curve Examined*, will reveal what they claim is inaccurate and skewed data in the book. The presenters will discuss the implications of the book's racist message and what accounts for the positive reaction to it.

The presentation is free to the public, but registration is necessary to ensure adequate seating. For information or registration, call (717) 772-3590.

More Lectures

Bracken series ends with talk on variety in landscaping

Carol R. Johnson, chairman and president of Carol R. Johnson Associates Inc., Cambridge, Mass., and 1996-97 Bracken Fellow, will conclude this year's John R. Bracken Lecture Series. The lecture, "Variety in Landscape Architecture," is scheduled for 8 p.m. Thursday, April 3, in the Colonial Room at the Nittany Lion Inn on the University Park campus. The Bracken Lecture Series is sponsored by the Department of Landscape Architecture of the College of Arts and Architecture.

For the past 37 years, Johnson has maintained a diversified professional practice in the areas of landscape architecture and site planning. The firm specializes in site development,

open space and recreation planning, master planning and urban development for municipalities, schools, colleges and universities, corporations and public agencies.

Under Johnson's supervision, firm design projects have received a number of design awards. Johnson received her bachelor of arts from Wellesley College and attended Harvard University, where she received her master's in landscape architecture. Between 1966 and 1973, Johnson taught at the Harvard University Graduate School of Design.

A reception and the presentation of the Bracken medal will be held after the lecture. The lecture is free to the public.

Teleconference to focus on building media empires

John Rigas, president, chair and CEO of Adelphi Cable Communications Inc., will present "How to Build a Media Empire: A Tiger by the Tail," a free interactive satellite teleconference, at 4 p.m. Thursday, April 3.

This hour-long satellite teleconference, sponsored by the James R. and Barbara R. Palmer Chair through the College of Communications' Catalyst Center for Information Technologies, allows participants from colleges across the country to ask questions via an 800 number.

For more information, please contact **Pamela Czaplak** at (814) 865-1875 or e-mail her at pcj2@gmail.psu.edu.

JOHN RIGAS

Computing seminars offered for free this month at University Park campus

The Institute for High Performance Computing Applications is offering a free seminar every week during spring semester on the University Park Campus. The following seminars are for April. All seminars listed, unless otherwise noted, will be held in Room 215 Hammond Building from 3:35 to 4:25 p.m.

— **April 7: Farid Abraham**, IBM, will discuss "Cracking a Tough Nut with a Big Computer: Studying Materials Failure using Millions of Atoms."

— **April 14: Luigi Martinelli**, professor of aerospace engineering at Princeton University, will talk on "Numerical Simulation of Viscous

Flow for Aerodynamic Analysis and Design."

— **April 21: Jeff Nucciarone** from the Center for Aerodynamic Computing at Penn State and **Yusuf Ozyoruk** from aerospace engineering will discuss "High Performance Fortran: Status and Future;" and

— **April 28: Gita Talmadge**, professor of mechanical engineering at Penn State, will give a talk on "The Effects of Magnetic Fields on Electrically Conducting Fluids: An Introduction for Terrestrial Applications."

For a full listing of seminars planned, visit the institute's Web site at <http://cac.psu.edu/~lnl/ilpca/spring97/ent.html>.

Speaker to talk about blending biology and engineering

Janie Fouke is the invited speaker on "Integrating Biology and Engineering" at the Agricultural and Biological Engineering Seminar beginning at 12:20 p.m. Monday, March 31, in 101 ASI Building on the University Park campus. Fouke is director of the Bioengineering and Environmental System Division of the National Science Foundation. She is currently on leave to the NSF from Case Western Reserve University where she has been on the faculty in the Department of Biomedical Engineering since 1981. She recently served her second term as president of the IEEE/Engineering in Medicine and Biology Section, the largest professional society of bioengineers in the world.

Fouke will discuss the promises, problems and pathways of integrating biology into engineering curricula. In addition, she will discuss and interpret the trends she has seen during her tenure at NSF.

Domestic violence is topic of April 3 talk

Elizabeth M. Schneider, professor of law at Brooklyn Law School, will speak about "Gender and the Law: The Problem of Domestic Violence" at 7 p.m. Thursday, April 3, at Penn State Erie, The Behrend College. Her presentation, which continues the Feminist Scholars Speaker Series, will be held in the Reed Union Building Lecture Hall.

Schneider, who also is a visiting professor of law at Harvard Law School, has written and lectured on civil rights, women's rights and violence against women. She has co-authored a law school casebook on domestic violence, and is writing a book on violence against women and feminist legal theory for Harvard University Press. Her presentation is free to the public. For more information call (814) 898-6108.

Professor emeritus to speak on meteorology

Charles L. Hostler will be the speaker for the 1997 Arthur H. Waynick Lecture at 8 p.m. Friday, April 4, in 112 Walker Building on the University Park campus. Hostler is professor emeritus of meteorology, senior vice president for research emeritus and dean emeritus of the Graduate School. The topic of his public lecture is "Fifty-Five Years of Progress in Meteorology and a Look at the Future."

The lecture will focus upon the dramatic increase in the accuracy of weather predictions during the last 50 years. In addition, predictions for the next century of meteorology will be offered.

The Waynick Lecture Series began in 1984 and is made possible each year by the Waynick Memorial Fund, established in memory of former professor of electrical engineering **Arthur Henry Waynick**.

Conference examines history of communication

"Communication in the Middle Ages," a two-day conference on the evolution of various forms of communication featuring a multitude of speakers, is set for April 4-5 at The Nittany Lion Inn on the University Park campus.

Organized by the Center for Medieval Studies and various departments and colleges at Penn State, the conference will focus on understanding the complex political, social and cultural implications of today's communication revolution by fitting it into a historical perspective, particularly in terms of earlier, equally significant communications revolutions in Western history. Some of the topics included in this event are: "Per Imagines Expressa: The Visualization of Religious Messages in the Roman Art of the Middle Ages," presented by **Valentino Pace**, University of Rome; "Communication Through Capital and Trade," given by **Pamela Nightingale**, Ashmolean Museum, Oxford, England; and "Counting, Calendars, and Cosmology: Numeracy in the Early Middle Ages," presented by **John Contreni**, Purdue University.

The conference is free to all students, Penn State faculty and staff, Pennsylvania educators and senior citizens. Registration is \$25 for the general public and outside faculty. A medieval luncheon will be held Friday, April 4, at the inn at a cost of \$12. The Medieval Banquet, featuring period cuisine and followed by a medieval play, will be held Friday evening. Banquet tickets may be purchased for \$21.50.

For information on registering and/or reserving meal tickets, contact **Pat Nickinson** at S 327 Burrows Building, (814) 865-7484, or pan4@psu.edu.

Learn why we should worry about natural disasters

Alan G. Davenport, professor of civil engineering, will present a lecture at 7:30 p.m. Thursday, April 3, in the Applied Research Laboratory auditorium on "Why Worry About Natural Disasters?" Davenport also is director of the Boundary Layer Wind Tunnel Laboratory at the University of Western Ontario.

Davenport has pioneered the application of research from boundary layer wind tunnel to the design of wind-sensitive structures, engineered to overcome common structural problems involving the action of wind. He has acted as engineering consultant for many major structural projects, including projects involving some of the world's tallest buildings such as the World Trade Center in New York City and the Sears Building in Chicago.

The lecture, presented by the Department of Civil and Environmental Engineering, is the fifth annual Thomas C. Kavanagh Memorial Structural Engineering Lecture, named in memory of the late **Thomas C. Kavanagh**.

More Lectures

Miss America to speak on literacy in America

Tara Holland, Miss America 1997, will be the keynote speaker during the Office of Volunteer Programs and Services' celebration of National Volunteer Week, April 13-19. An advocate for literacy awareness and volunteerism, Holland will speak on "Literacy in America: The Power of One" at 7 p.m. Tuesday, April 15, in 112 Kern Building on the University Park Campus. The lecture is free to the public.

As president of the Campus Alliance For Literacy at Florida State University, Holland recruited, trained and placed more than 150 volunteers in 30 classrooms. She was awarded Daily Point of Light No. 723 by former President George Bush and was the Miss America organization's 1995 national community service winner.

TARA HOLLAND

Holland graduated magna cum laude from Florida State University and is pursuing a master's degree in music education at the University of Missouri, Kansas City.

Other activities for the week include a Lions Share recruitment reception from 6:30 to 7:30 p.m. Wednesday, April 16, in 305 Hetzel Union Building. Lions Share coordinators also will be available to answer questions about volunteerism from 10 a.m. to 2 p.m. on April 9, 10, 14, 15 and 16 on the ground floor of the HUB. Lions Share student coordinators match students with volunteer agencies in the community.

For more information, contact the Office of Volunteer Programs and Services at (814) 863-4624 or e-mail Cindy Rudy at ccr20@psu.edu.

Health policy lectures planned for April

Two seminars on issues in health policy and health administration are planned for April on the University Park campus. The seminars, sponsored by the Institute for Policy Research and Evaluation, the Center for Health Policy Research and the Department of Health Policy and Administration, follow:

■ **Friday, April 11: Cynthia Massie**, assistant professor of public affairs, Penn State Harrisburg, on "Long-Term Care: A Policy of

Fragmentation" from 1-2:30 p.m. at The Living Center, Henderson Building.

■ **Monday, April 21: Kevin Frick**, Department of Health Policy and Management, School of Hygiene and Public Health, Johns Hopkins University, on "HMOs and Medical Care Technology: Global Responsibility for Assuring Cost-Effectiveness and Local Coverage Decisions" from 9:30-11 a.m. at The Living Center, Henderson Building.

Arts

Continued from page 8

Country concerts planned

The Community Arts Center in Williamsport has booked its first two New Country concerts for the 1997-98 year.

Tracy Byrd, whose singles "Keeper of the Stars," "Walking to Jerusalem" and "Watermelon Crawl" sent his career into the fast lane and brought him to the Arts Center in August 1995, will return Thursday, Aug. 14, at 7:30 p.m. His current CD, "Big Love," features his No. 1 hit song of the same name.

Kathy Mattea will bring her mix of soulful vocals, bluegrass, gospel and rockability to the Arts Center at 7:30 p.m. Saturday, Oct. 18. Mattea released her 11th studio album, "Love Travels," in January.

Tickets for each show at \$18.50, \$23.50 and \$28.50 will go on sale at 10 a.m. Monday, March 31, at the Arts Center.

For more information, call (717) 326-2424 or (800) 432-9382.

Former ambassador to discuss Marshall Plan

David M. Abshire, former U.S. ambassador to NATO and founder and president of the bipartisan Center for Strategic and International Studies in Washington, D.C., will be the guest lecturer in the George C. Marshall-Penn State Lecture Program on April 17 at the Penn State Fayette campus. Abshire will discuss the historical legacy of the Marshall Plan and its impact on U.S.-European relations today. The free lecture will be held in the Williams Building Auditorium starting at 7:30 p.m. A question-and-answer period will follow the presentation.

In conjunction with the lecture, the Fayette campus library will display a Marshall exhibit for several days before the event. The display will be

moved to the hallway outside of the Williams Building Auditorium on the evening of the lecture.

Abshire served as assistant secretary of state in the early 1970s. During the transition of government in 1980, Abshire was asked by President-elect Reagan to head the National Security Group, including the state and defense departments, the U.S. Information Agency and the Central Intelligence Agency.

From 1983 to 1987, he served as ambassador to NATO, and in 1987 served as special counselor to President Reagan, with cabinet rank. He is the author of five books, including *Putting America's House in Order: The Nation as a Family* (1996).

Short course to teach chromatography techniques

"Advanced Practical Techniques of Gas Chromatography," an intensive short course geared toward faculty and staff members who use chromatography as a research tool, is scheduled for The Penn State Scanton April 14-16 and Oct. 22-24.

This intensive short course combines hands-on lab experience using equipment from Hewlett-Packard, the leading manufacturer of gas chromatography equipment. Graduate and undergraduate students who want practical experience, industrial chemists, technicians and managers who want to know more about analytical separation techniques also may attend. A limited number of spaces are available at a substantially reduced rate for current, full-time students.

For additional information, call (800) PSU-TODAY (778-8632) or log-in to <http://www.cde.psu.edu/C&I/GasChrom/>

Learn about mental health problems of children

Mental health professionals, educators and concerned parents can explore ways to help anxious, depressed children and those with attention deficit disorder/hyperactivity (ADD or ADHD) in two programs at The Penn State Scanton April 21-22.

The April 21 workshop, "Erasing the Shadows: Helping the Depressed and Anxious Child," is primarily for counselors. It includes sessions on fear and anger, intervention and strength through empowerment in the classroom.

A two-session workshop, "Identifying and Managing ADD/ADHD (and its Clones) and Improving a Child's Self-Esteem," will be held April 22.

James D. Sutton, who will lead the workshops, is a consulting psychologist, author and speaker. He specializes in training child service professionals on the campuses of major universities. His latest book is *My Kid's So Nice... Why's He Driving Me Crazy*.

For more information, contact **Chris Dufour**, conference planner, at (814) 863-5110 or by e-mail at Confencinfo1@cde.psu.edu.

Arts Center season

The Community Arts Center in Williamsport, part of Penn College, has announced its 1997-98 Performing Artist Series. Celebrating the fifth full year of arts at the 2,165-seat fully restored venue, the 10-event season is titled "New Traditions."

■ **Starting the season** off on Saturday, Sept. 20, will be TV, movie and comedy icon **Bill Cosby**, with performances at 6:30 and 9 p.m.

■ **One of the world's most popular and vibrant operas**, Bizet's "Carmen," will be performed Tuesday, Nov. 4, by Western Opera Theatre, the touring wing of the San Francisco Opera.

■ **Family adventure** takes to the high seas with "Treasure Island" on Sunday, Nov. 9.

■ **The holidays** start early with "A Judy Collins Christmas" on Sunday, Nov. 30. The evening also features a 30-voice choir.

■ **"My One And Only"** will be performed on Thursday, Jan. 15, 1998.

■ **Tuesday, Feb. 10, 1998**, brings the Bernstein/Sondheim/Laurents/Robbins masterwork "West Side Story" to the stage.

■ **The Broadway musical "Damn Yankees"** will perform Thursday, March 5, 1998.

■ **Doing it "his way"** on Wednesday, March 25, 1998, will be five-decade veteran of stage and song **Paul Anka**.

■ **New Vaudeville sensations** The Flying Karamazov Brothers bring their zany antics to the Arts Center on Wednesday, April 1, 1998.

■ **The season concludes** with "How To Succeed In Business Without Really Trying" on Tuesday, April 21, 1998.

All performance times, other than those for Bill Cosby, will be at 7:30 p.m. Subscriptions for the season will be solicited soon, and subscribers will enjoy an exclusive sales period through Friday, Aug. 8. Single tickets will go on sale Monday, Aug. 18 at 10 a.m.

For more information, please call (717) 326-2424.

Photos: Greg Grieco

■ Graduate Research Exhibition

Health education graduate student Noriko Toyokawa gets help from her husband, Toru Toyokawa, in setting up her research display, "Social Network for Japanese Women: Connection of the People and the Meaning of Support," left, at the start of the Graduate Research Exhibition. During the fair, Chao Zhang demonstrated his research in thermo-acoustic refrigerator design, which shows how temperatures can be controlled through the use of sound, above. More than 150 graduate students had their research represented at the exhibition, held March 21-22 in Kern Building on the University Park campus.

BOOK SHELF

Ministry to the Incarcerated, a book that focuses on the prison system, has been written by **Harry Covert**, adjunct instructor of administration of justice and pastor of St. Peter's United Church of Christ in State College.

Published by Loyola University Press, the book contains insights for church ministry and pastoral care. Covert uses his experience as both police officer (for 19 years) and prison chaplain to examine the problems of the incarcerated. Covert addresses specific areas of inmate stress, such as low self-esteem, guilt and unrealistic expectations and explains how these can be major obstacles to a prisoner's personal and spiritual development.

Pedagogy and the Politics of Hope by **Henry Giroux**, a professor in the College of Education at the University Park campus, is a collection of his writings on critical pedagogy and social criticism.

The book is organized into three sections. The first includes Giroux's most widely read theoretical critiques on the culture of positivism and technocratic rationality. He contends that without a wholistic world view, these approaches fail to take into account social, political and historical forces, or to consider the importance of such connections for the process of schooling.

In the second section, Giroux

expands the theoretical framework for conceptualizing and implementing his version of critical pedagogy. His theory of border pedagogy advocates a democratic public philosophy that embraces the notion of difference as part of a common struggle to extend the quality of public life.

In the last section, Giroux explores a number of contemporary traditions and issues, including modernism, post-modernism and feminism, and discusses cultural difference in the classroom. Finally, in a new essay, Giroux analyzes the assault on education and teachers as public intellectuals that began in the Reagan-Bush era and continues today.

Extreme right wing groups and hate radio have been in the news in recent years, but such groups have always been a part of the American religious and political landscape. And, they have used radio to spread their messages for as long as radio has existed.

A new book by **Philip Jenkins**, a professor of history, religious studies and criminal justice in the College of the Liberal Arts, uses developments in Pennsylvania as a case study of the local activities and broader significance of such organizations.

Hoods and Shirts: The Extreme Right in Pennsylvania, 1925-1950 published by University of North Carolina

Press, highlights the activities of racist, nativist and fascist groups who maintained a stronghold on Pennsylvania's cities during this time. Jenkins traces the uneasy alliances that united these groups in their commitment to a fascist agenda as well as the fundamental ethnic and religious differences that divided them. Jenkins based his research in Pennsylvania's extensive Ku Klux Klan archive and on other original sources and contemporary media accounts.

Jenkins is the author of many other books, including *Pedophiles and Priests: Anatomy of a Social Crisis* and *Using Murder: The Social Construction of Serial Homicide*.

Manfred Kroger, professor of food science, edited the book *The Dictionary of Metaphysical Healthcare: Alternative Medicine Paranormal Healing and Related Methods*, by Jack Raso, published by the National Council Against Health Fraud Inc.

Werner Pluhar, affiliate professor of philosophy at the Fayette campus, is the translator of Immanuel Kant's *Critique of Pure Reason*, with an introduction by Patricia Kitcher, published by Hackett Publishing Co. (1996). This 1,089-page book includes close to 5,000 footnotes and a 189-page index, a glossary and a bibliography. This is the first time that Kant's magnum opus has been translated into English since Norman Kemp Smith's translation appeared in 1929.

B. Allan Quigley, associate professor and regional director of adult education in the College of Education, is author of *Rethinking Literacy Education*.

In this thought-provoking book,

Quigley reveals some unrecognized truths about who illiterate people are and challenges the assumptions and agendas that shaped past literacy education efforts.

Quigley advocates a new view of literacy that focuses on the learner and takes into account a broad array of work, family and cultural consideration. He also provides suggestions and alternatives which practitioners can use to shape a new philosophy of adult literacy and improve the effectiveness of literacy education in America.

Quigley argues policy regarding adult literacy education needs to be based on input from practitioners who have a long-term commitment to the field.

Lita Linzer Schwartz, distinguished professor emerita of educational psychology at Abington College, and **Florence W. Kaslow**, director of the Florida Couples and Family Institute, are co-authors of *Painful Partings: Divorce and Its Aftermath*, published by John Wiley & Sons.

In this new volume, a follow-up to their 1987 *The Dynamics of Divorce*, the authors look at changing life-cycle trends in divorce and explore a host of new economic, cultural and social issues confronting a highly mobile generation of divorced spouses and parents.

The book covers emerging alternatives to litigation — like mediation, and looks at sensitive matters, such as physical and emotional abuse and child custody. It also examines issues like fathers' rights, mid-life divorce and what happens when one partner exits a marriage in order to lead a homosexual lifestyle.

Penn Staters

Marc Abrams, associate professor of forest ecology/physiology, was named to the editorial review board of *Tree Physiology*, published by Heron Publishing.

Paul Barsom, instructor of music in the College of Arts and Architecture's School of Music, has had his original work for solo piano, *Vesper*, performed several times this concert season by pianist **Mia Kim**. Kim performed *Vesper* in Vermont in August 1996; Little Rock, Monticello, Arkadelphia and Magnolia, Ark., in September 1996; Dayton and Zanesville, Ohio, in October 1996; and in Roanoke, Va., in November 1996.

Kim has performed as a soloist and chamber musician throughout the United States, and currently performs the work as a regular part of her recital programs. *Vesper* is in three parts: "Fogs and Winds," "Off The Inland Desert" and "Night-Blooming Jasmine." It has been performed throughout the United States and abroad.

Christopher J. Bise, professor of mining engineering and chair of the Mining Engineering Section in the Department of Mineral Engineering, has been chosen to receive the 1996 Faculty Award of the Old Timers Club in recognition of his accomplishments in the field of mining engineering. The Old Timers Club Inc., a group of leading mineral industry executives, was founded in the 1930s to promote the mining engineering profession and industry.

Refik Culan, associate professor of management at Penn State Harrisburg, Capital College, presented a paper, "International Joint Ventures in Russia: A Critical Analysis," at the Fourth Annual Conference Marketing Strategies for Central and Eastern Europe, in Vienna, Austria.

Daniel Deaver, professor of reproductive physiology, has been named chair of the Intercollege Program in Physiology.

Glenn Firebaugh, professor of sociology, has been named editor of the *American Sociological Review*, which will be housed at Penn State.

Peter B. Flemings, assistant professor of geosciences, has received the 1997 J.C. "Cam" Sproule Award of the American Association of Petroleum Geologists, an award that recognizes the best paper by a young scientist published in the past year by the association. Flemings and Laurel I. Alexander of Shell Offshore Inc. were authors of "Geologic Evolution of a Pliocene-Pleistocene Salt-Withdrawal Minibasin: Eugene Island Block 300, Offshore Louisiana."

Iam-Choon Khoo, professor of electrical engineering, presented an invited paper on "Photoconductivity and photorefractivity of Fullerene and its Derivative-doped Liquid Crystals" at the Fourth International Conference on Frontiers of Polymers and Advanced Materials at Cairo, Egypt. He also chaired the symposium on electronics and photonics materials at the same conference. The co-authors of his paper are graduate stu-

dents **Brett D. Guenther** and **Michael V. Wood**.

Donna C. Nicely, coordinator of the Office of Educational Research, and **Robert E. Nicely Jr.**, professor of education and associate dean for outreach and faculty development, both in the College of Education, presented an invited paper, "Faculty Development: Enhancing the Integration of Research, Teaching and Service in a Land Grant University," at the 1996 annual meeting of the Society of Research Administrators in Toronto, Ontario, Canada.

In addition, **Robert E. Nicely Jr.** was recognized in 1996 by the 200,000-member international Association for Supervision and Curriculum Development (ASCD) for editing the "Best Affiliate Journal." This is the third time in the last four years that ASCD has recognized Nicely's editorial work.

Stuart Patton, Evan Pugh professor emeritus in agriculture, has been selected as the recipient of the Macy-Gyorgy Award for Research on Human Milk and Lactation by the International Society for Research on Human Milk and Lactation. The award honors Patton's outstanding and original scientific contributions. Since retiring in 1980, Patton has been a guest scientist at the University of California, San Diego and in the Penn State laboratory of **Craig Baumrucker**, Department of Dairy and Animal Science.

Jeffrey K. Pinto, associate professor of management at Penn State Erie, The Behrend College, has been named the Samuel A. and Elizabeth B. Breene Fellow in management, Behrend's first-ever endowed faculty fellowship. The five-year appointment will provide support for Pinto's research.

Stephen R. Turns, professor of mechanical engineering, has been awarded the Forest R. McFarland Award by the Society of Automotive Engineers Inc. for his outstanding service.

Gabriella Varga, professor of animal science, was appointed to the National Research Council committee charged with developing the primary document for nutrient requirements for dairy cattle.

M. Susie Whittington, assistant professor of agricultural and extension education, received the Author of the Year Award from the American Association of Agricultural Educators for the article "Thinking Opportunities Provided by Professors in College of Agriculture Classrooms" in the *Journal of Agricultural Education*.

The DuBois campus Web site at <http://twu.ds.psu.edu> has been listed in ComputerWorld Magazine's Premier 100 listing of users of Internet technology. The top 100 are listed alphabetically, not numerically. In the top 100 sites listed, only six are higher education Web addresses. Identifying tender steaks can be a rare thing for consumers

By JOHN WALL
College of Agricultural Sciences

American consumers might have a major beef with cooking. They're finding that it's tougher to recall which cuts of meat make the most flavorful meals — a trend that cuts to the bone of a nation once known for its consumption of steak.

"I see a lot of misunderstanding and lack of knowledge about meats," said Edward Mills, associate professor of dairy and animal science in the College of Agricultural Sciences. "There is less cooking going on at home. More people are eating out, and when someone has to prepare a big family meal for a special occasion, I imagine there is a lot of fear on the part of an unprepared cook."

A recent survey by Yankelovich Partners reports that more than half of the adults questioned thought they had less knowledge of cooking than their mothers. Mills also points to consumer preferences for low-fat meals featuring fish and poultry, changes in how the meat industry markets products and lifestyle changes for a new generation of consumers as factors contributing to the trend away from steaks.

Mills said per-capita beef consumption has held steady at about 66 pounds for most of the past decade. Previously, beef consumption had decreased from a historic high of 94.5 pounds per capita in 1976. In fact, per-capita consumption of beef cuts, including steaks, increased in 1995 and 1996.

"People are still eating beef, but they're eating it in different forms," he said. "Consumption of ground beef products in fast foods such as hamburgers and tacos has risen every year."

Mills points out two other factors that contribute to America's lack of beef knowledge. First, meat processors began shipping pre-cut beef in vacuum-packed cartons, known in the trade as "boxed beef." Previously, beef was shipped by hanging half carcasses. "The boxed beef made it easier for grocery stores to prepare meat cuts, because the carcass was already broken down," Mills said. "Most bones also are removed, which is convenient but makes it harder for consumers to identify certain types of traditional steaks."

Second, the move to boxed beef distribution eliminated the need for grocery stores to have an experienced butcher in every store. Consumers usually buy pre-packaged cuts these

Edward Mills, associate professor of dairy and animal science, said many factors contribute to consumers' lack of knowledge about meats.

Photo: Greg Grieco

days, often without being waited on by a grocery employee.

As a result, consumers can sometimes be at a loss to identify the most tender and flavorful cuts of beef. Mills said it's just a matter of imagining how a cow moves. The muscles that get the most use tend to be less tender. The cuts near the front legs, commonly known as the brisket and chuck sections, and the cuts near the back legs, known as the rump and round sections, are less tender. The cuts from the middle section of the animal, the loin, rib and short loin sections, are the most tender and flavorful.

"The steaks from this section, called 'middle meat,' are New York strip, rib steak, Delmonico, filet mignon and porterhouse, which is a strip steak and filet together," Mills said. "Cuts from the chuck and round section, such as 'English roast' or 'eye

of the round' can also be quite tender when properly cooked."

Mills said some organizations tout beef from specific breeds of cattle, but he said that, among beef breeds in the United States, the differences in taste and tenderness are minor. The most common American beef breeds are Hereford and Angus. Some of the common exotic breeds, which are mostly of European origin, are Charolais, Limousin and Simmental.

Another key to beef flavor is fat and juiciness, Mills said. The amount of marbling, which is flecks of fat within a steak, can mean the difference between gourmet eating and sore gums. "If you seek out a really lean steak, you're probably going to be chewing it for a long time," Mills said. "Consumers should look for steaks with flecks of marbling throughout the meat."

Vegetative filters can ease disposal of milk house wastewater

Some small dairy farms in Pennsylvania are having trouble disposing of the wastewater from their milk houses, but vegetative filters can provide a solution, according to a dairy housing specialist in the College of Agricultural Sciences.

"Milk house wastewater disposal is a problem across Pennsylvania," Robert Graves, professor of agricultural engineering, said. "Whether it comes from a small 30-50 cow milk house or a milking center with a large parlor-utility room complex, milk house wastewater can find no home."

Milk house wastewater, a dilute mixture of washwater from the parlor, equipment sanitation water and manure, usually contains nitrogen, phosphorus, fats and minimal sanitizers and detergents. "Depending on the farm, milk house washwater only amounts to 100-300 gallons per day," Graves said. "It doesn't seem like a lot — unless you're trying to get rid of it."

Subsurface disposal through a settling tank and leach field was a common wastewater disposal method for small farms, but since the early 1960s, no new or repaired subsurface systems are allowed by the state Department of Environmental Protection.

The simplest disposal solution is to collect and pipe the wastewater into a liquid manure system — a time-consuming and annoying task. Another disposal method is the vegetative filter, specially designed acreage where vegetation can absorb wastewater nutrients before being harvested. Graves said, "Parlor wastewater is temporarily held in a tank and then land applied, discharged or allowed to trickle through perforated pipe directly into the field. Properly managed vegetative filters are economical, environmentally sound and approved by DEP. Also, they don't cause fly or odor problems."

Proper design and management are essential, however.

"Filters should be located away from critical areas such as streams and ditches. Harvesting also is critical, because periodic crop removal prevents nutrient buildup in the soil and eventually in the groundwater."

Whichever disposal method they select, Graves urges dairy farmers to consult their milk inspectors.

Obituaries

Mary Ellen Cree, residence hall worker, Housing and Food Services, from Sept. 27, 1965, until her retirement Jan. 1, 1982; died Feb. 10 at the age of 76.

Aaron Druckman, associate professor of philosophy, from Sept. 1, 1935, until his retirement July 1, 1978; died Feb. 23 at the age of 84.

Brian T. Fiedler, maintenance worker, utility, Penn State Shenango campus, from April 12, 1979, until his death March 6. He was 42.

L. Fern Hess, records clerk, Admissions Department, from March 1, 1955, until her retirement March 1, 1966; died Feb. 19. She was 92.

Joseph Nicosia, maintenance worker, utility, Penn State Worthington Scranton campus, from July 1, 1970, until his retirement Jan. 17, 1984; died Feb. 18 at the age of 78.

Walter R. Weber, instructor, Penn State Worthington Scranton campus, from Aug. 16, 1985, until his death Feb. 26. He was 53.

Patricia K. Erdmann, staff assistant VI, Corporate Controller's Office, from Sept. 20, 1973, until her retirement Oct. 1, 1996; died Feb. 18 at the age of 47.

Patricia A. Hankinson, residence hall utility worker, Housing and Food Services, from Jan. 18, 1978, until her retirement Feb. 29, 1992; died March 13 at the age of 67.

Catherine B. Love, assistant professor of consumer economics, College of Agricultural Sciences, from Nov. 7, 1956, until her death Feb. 22. She was 80.

Ralph E. Nielsen, professor of petroleum and natural gas engineering, College of Earth and Mineral Sciences, from Oct. 1, 1940, until his retirement July 1, 1967; died Feb. 25. He was 95.

Ernest C. Pollard, professor of biophysics, Eberly College of Science, from July 1, 1961, until his retirement July 1, 1971; died Feb. 24 at the age of 90.

Marjorie J. Rudy, staff assistant VI, College of Agricultural Sciences, from Jan. 1, 1959, until her death March 8. She was 58.

Almost tee time

Scott Lucas, one of five groundskeepers for the Blue and White golf courses on the University Park campus, trims some of the exotic grasses found on the courses. There are approximately 95 acres devoted to the two courses, which are open to the public as well as the University community. To arrange a tee time at the courses, call (814) 865-1833.

Harrisburg has new dual admission pact with Reading school

Building on recent agreements with Pennsylvania institutions of higher education, Penn State Harrisburg and the Reading Area Community College (in Berks County) signed an articulation and dual admission agreement that will allow students to begin their academic career at RACC and continue through associate's degree studies to a "seamless" transfer to a Penn State Harrisburg baccalaureate program.

Reading Area Community College offers more than 60 different programs of study which lead to a diploma, certificate or associate degree. The programs are spread throughout five academic divisions, — business, health services, humanities, science and mathematics, and social science/human services.

The Reading articulation comes on the heels of a number of other Penn State Harrisburg educational partnerships and linkages.

Private Giving

Alumnus creates merit scholarship

A \$100,000 gift from Penn State alumnus **Bernard A. Newman** of Pompano Beach, Fla., has created a merit scholarship in journalism for the College of Communications. The scholarship will support first-year undergraduates who intend to major in the college's journalism program.

Newman is a 1940 graduate in journalism and a native of Scranton. While working as a student reporter of the *Daily Collegian*, he was instrumental in conceptualizing the Nittany Lion Shrine. He also helped search for a sculptor and promote the fund-raising drive for the shrine, the gift of his senior class to the University.

Following graduation, he worked with the *New York Daily News*, served in the Pacific theater of operations during World War II and was later a sales manager for Pitney-Bowes Inc. offices in Rochester, N.Y., and Denver for 28 years.

UPC making progress in its effort to streamline operations

By LISA M. ROSELLINI
Public Information

University academic and administrative units searching for ways to help close the projected funding gap Penn State faces are proposing sharing resources, increasing collaboration, increasing efficiency through training and eliminating duplication, according to members of the University Planning Council.

With a projected \$12 million a year shortfall in funds over each of the next five years, the UPC has been aggressively pursuing cost-saving ideas identified by academic and administrative leaders. Guid-

ed by a vision to integrate the teaching, research and service missions of Penn State and to concentrate on quality, the UPC is completing an almost two-year process aimed at helping colleges, campuses and administrative units devise strategic plans that will lead them into the future.

As part of the process, the UPC is reviewing every aspect of Penn State and its budget through a variety of means, including holding dozens of hearings. During the hearings, individual units or campuses present their strategic plans outlining their core missions and the areas to be emphasized. In addition to flagging areas that could be enhanced,

Kellogg Commission urges universities to be more student-centered

The Kellogg Commission on the Future of State and Land-Grant Universities, whose membership includes President Graham B. Spanier, on April 2 released a report calling on public institutions of higher education to become more student-centered, to better support and inspire learners of all kinds, and to more comprehensively sustain a healthy learning environment.

"State and land-grant universities like Penn State have been tremendous agents for social change in this century," Spanier said. "With this report, we are urging ourselves and others to reorganize and refocus our missions to move students even closer to the center of all that we do."

The report, called "Returning to Our Roots: The Student Experience," was released by the commission in Washington, D.C.

"The report is a bold framework for reform," Spanier said. "It recognizes that all public colleges and universities are now at a critical juncture in history, facing tough challenges that require us to look more carefully than ever before at our most impor-

Faculty and Staff Campaign starts today

The annual Faculty and Staff Campaign kicks off today, offering Penn State employees the opportunity to help build the firmest possible financial foundation for the University's teaching, research and outreach goals.

Faculty and staff have combined their efforts to help make the University what it is today—and what it will be tomorrow—through their vital work and their tradition of giving to Penn State. Last year, more than 3,600 employees contributed \$1.5 million to support a variety of programs including college and campus initiatives, the University Libraries, arts organizations, intercollegiate athletics and public broadcasting.

"When employees support the University financially, they are enriching the Penn State experience

■ Faculty Senate

Spanier's free expression stance supported

The University Faculty Senate applauded remarks from President **Graham B. Spanier** concerning a controversial art exhibit on the University Park campus and the results of a recent Penn State survey on student alcohol consumption at its March 25 meeting.

"There must be some fundamental principles by which we stand," Spanier said in relation to the artwork that has come under fire. "I can't envision any circumstances under which this University would want to encourage censorship." Spanier's comments were in response to criticism he has received surrounding the display of artwork by student Christine Eneidy titled "25 Years of Virginity: A Self-Portrait." Eneidy exhibited a quilt covered with 25 pairs of underwear, each with a cross stitched on the crotch.

Spanier noted that the School of Visual Arts has a good policy in place that calls for the student and faculty member to discuss public sensitivities and decide together whether or not to display a particular work of art. Eneidy's work was recently on display in Zoller Gallery.

Spanier also commented on Penn State's February 1997 survey on student drinking, which noted that 52 percent of the students surveyed were aware of his stance on alcohol. The president has been outspoken about his desire to curb student drinking.

"I am very pleased to say there is some discernible change this year, for the very first time," he said.

"I can't envision any circumstances under which this University would want to encourage censorship."

President Graham B. Spanier

The survey, "Penn State Pulse, Student Drinking," was a telephone poll of 697 undergraduates. Results showed that 43 percent of men and 46 percent of women abused alcohol this past February, compared to 51 percent of men and 54 percent of women in February 1996.

In summarizing the outcome of the March 21 Board of Trustees meeting, Spanier said that Gov. **Tom Ridge** approved a multi-year \$200 million capital construction funding plan. "Now, we can dust off some of our plans and predict with a little more accuracy which projects will be completed when," Spanier said the approved funding was good news, marking an increase, where funding had been declining or nonexistent in the past.

The Senate held discussion on several agenda items related to faculty development and evaluation, degree audit requirements, course substitution forms and a report on the NCAA's January meeting.

The Senate passed a degree audit amendment that would provide undergraduates access to their degree audit report each semester they are

enrolled and a second amendment requiring the entry of all exceptions to individual student degree requirements in the Integrated Student Information System (ISIS). Both are important reference points in planning a student's course of study and graduation.

John Coyle summarized recent changes in NCAA regulations that affect undergraduate education. Division I schools will shift to a representative form of governance instead of one school, one vote. For the first time, Division I athletes will be permitted to earn on- and off-campus income in combination with other financial aid.

In other business, the Senate:

- Accepted a committee report that recommends a renewed focus on faculty development, encourages mentoring, the use of teaching portfolios and peer evaluation.

- Approved a proposed amendment to its bylaws allowing the academic voting unit of a multi-campus system to determine the allocation of its Senate seats, provided that each geographic location is represented by at least one senator.

- Approved a proposed amendment to its bylaws requiring a voting unit to select as its alternate the candidate receiving the second-highest number of votes. If the elected senator leaves the position before the term ends, the alternate would assume those responsibilities.

The Senate's next meeting will be at 1:30 p.m. on Tuesday, April 22, in 112 Kern Building.

Kellogg

continued from page 1

tant goals and the bottom line. At Penn State, we educate more than 77,000 students, and we are committed to ensuring that they receive the highest-quality education possible. But all of us need to examine our attitudes, orientation, and responsibilities, and move students even closer to the center of the university experience."

The 25-member commission was created by a \$1.2 million grant given by the W.K. Kellogg Foundation to the National Association of State Universities and Land-Grant Colleges. "The Student Experience" is the first of a series of commission reports that will frame a vision for reforming pub-

For more details

The entire text of "Returning to Our Roots: The Student Experience" is available online at the new NASULGC Web site, <http://www.nasulgc.nche.edu>.

lic higher education and outline action steps for change.

E. Gordon Gee, president of The Ohio State University, chairs the commission, and **Dolores R. Spikes**, president of the University of Maryland Eastern Shore, is the commission's vice chair. **John V. Byrne**, former president of Oregon State University, is the executive director.

Also a member of the commission is **Samuel H. Smith**, president of Washington State University and former dean of Penn State's College of

Agricultural Sciences. The foundation's president, **William Richardson**, is former president of Johns Hopkins University and former provost of Penn State.

Action commitments in the report include:

- revitalizing partnerships with elementary and secondary schools;
- reinforcing the commitment to undergraduate instruction;
- strengthening the link between education and career;
- improving teaching and educational quality while keeping college affordable and accessible;
- defining educational objectives more clearly and improving assessment; and
- creating many more opportunities for hands-on learning, including undergraduate research.

The commission also plans to follow up this first letter by launching a "national conversation" through encouraging dialogs around the country to evaluate and discuss the statement of principles and action steps.

"The Kellogg Commission was created because our universities face a crisis," said NASULGC President **C. Peter Magrath**. "Public universities must enjoy the public's confidence to perform their vital and unique missions, and to do that higher education must not simply allow but actively encourage and embrace change."

Commission Chair **Gee** said the commission's report "resembles an architect's rendering of what the public university of the future might look like. It describes ways to create a genuine learning community that has an unflinching commitment to better meeting students' needs."

Campaign

continued from page 1

and setting an example for the alumni, corporations and foundations which are also asked to help keep this a world-class institution," said **Richard E. Tressler**, the 1997 campaign chair and professor and head of the Department of Materials Science and Engineering.

"Whether we teach in the classroom, maintain the physical plant, work in a clerical or administrative position, or conduct research in a laboratory, each of us fills a vital role in making ours a university in which we can take pride," he added.

Two options are available for employees wishing to participate in the Faculty and Staff Campaign — they can make an immediate gift, or sign up for the convenience of payroll deduction by simply filling out the form they will soon receive at their campus address and returning it to the Office of Annual

giving by May 30. They may direct their gift to any area within the University — including specific campuses, colleges, departments, scholarships, endowments, equipment funds, building campaigns and elsewhere, or leave the gift undesignated for use by the university wherever the need is greatest.

For more information, call **Barbara Sarra** in the Office of Annual Giving at (814) 863-2052. At locations other than University Park, contact the director of development.

UPC update

Louise Sandmeyer, executive director of the Center for Quality and Planning, above, left, explained progress made in the University's strategic planning process, during a meeting at The Nittany Lion Inn on the University Park campus. University employees, including Jim Kerlin, above, and Virginia Olexy, below, left, were active participants in the discussion.

Photos: Greg Grieco

UPC

Continued from page 1

units must also identify areas where funding should be reallocated. The vision of each unit or campus should align with Penn State's overall mission and goals.

In a public meeting last week to explain the strategic planning process and the progress the UPC has made to date, a small group of University employees listened as four council members described what was being done and what could be expected in the months to come.

"The last hearing we have scheduled will be held April 14 for The Hershey Medical Center," said Louise Sandmeyer, executive director for the Center for Quality and Planning and a UPC member. "After that, there will be some back and forth between the UPC and the Budget Task Force, the group identified to pinpoint the University's key programs and to direct resources to strengthen these programs."

A draft of the University-wide plan that incorporates the individual strategic plans is expected to be ready by the end of May. Sandmeyer said the most successful strategic plans to date have been those that followed the initial guiding principles spelled out by the UPC. These principles are in line with Penn State's mission as a land-grant institution and its priorities in educating students. Plans stressing diversity, internationalization, interdisciplinary work and a focus on quality, selectivity and depth were well-received. Strategic blueprints that provide data (both internal and external) to support decisions and those that supplied concrete goals and ways to measure these goals were deemed especially well constructed by the UPC.

Most people in attendance expressed a desire to understand how the process was working and to find out what types of data were being used to make decisions. Some participants said they came because they were skeptical of the process and wanted to know if the decisions were being made from the top down, or the bottom up.

Council members said the 30 strategic plans they have seen to date vary in the manner in which they were compiled. The process for some academic departments — is an example — began within that unit and then gradually progressed to the college level. In other

cases, the process may have started at the dean's level and worked its way down. In still other areas, the process was simultaneous, working from top to bottom and bottom to top until agreement was reached.

UPC members stressed that long-term strategic planning is not an easy task for any unit.

"It is our role to help provide balance by looking at things from a broader vantage point," said Betty Roberts, assistant vice president for Business Services and UPC member. "We are looking at these plans from a University-wide perspective and addressing questions like whether providing certain services centrally rather than dispersed would be more beneficial to the entire University. You can't be all things to all people. You have to focus on your core mission."

As part of that process, UPC member Peter Jurs said the council has consistently looked at proposed changes in terms of their effects on students. Jurs stressed that not only financial data is being scrutinized. He said the data underlying the planning process includes enrollment numbers, information on shifting usage patterns, the number of faculty involved in particular areas, needs assessments and comparative data from peer institutions.

Attendee Bill Huston, who held a copy of the strategic plan from his unit — the Office of Student Affairs, indicated that while the planning process has forced units to look at areas and programs they may have otherwise overlooked, it is also requiring them to make some tough choices.

"In addition to looking at areas that need improvement, we have also had to look at areas where the demand for certain services will not decrease," he said. "It is a challenge."

Virginia Olexy from Pattee Library sought reassurances from the UPC members that short-term gains made now through the UPC process would not have long-term costs or repercussions associated with them.

"We promise to keep your voices in the back of our heads," Sandmeyer said.

The strategic plans from all colleges, units and campuses will be open to the public in Pattee Library on the University Park campus by the end of the spring semester. The UPC invites continued comments from the University community via e-mail at response@psu.edu.

About the process:

Through the UPC process, academic and administrative units will reallocate funds, with the administrative units being asked to give back more than academic units. The planning process is being used to identify academic priorities and to provide a boost to those areas. Some of these priorities will be University-wide initiatives, while other funds will be returned directly to the academic colleges.

LECTURES

Stone Memorial Lecture focus will be microbiology

Ralph S. Wolfe, professor of microbiology at the University of Illinois at Urbana-Champaign, will present the 1997 Stone Memorial Lecture at 4 p.m., Monday, April 7, in 110 Wartik Laboratory on the University Park campus.

The lecture, sponsored by the Department of Biochemistry and Molecular Biology, is titled "My Kind of Biology—Challenges of the Hunt."

Wolfe, known for his broad interest in microbial diversity, heads a laboratory known for its role in the discovery of seven new coenzymes important in the biological formation of methane. His laboratory also is known for its research on the biochem-

RALPH S. WOLFE

istry of methanogenesis and for its collaboration with Carl Woese of the University of Illinois on the discovery of the Archaea, the third branch of life.

He received the Carski Distinguished Teaching Award in 1971, the Abbott Lifetime Achievement Award in 1996 from the American Society for Microbiology and the Waksman Award

in Microbiology from the National Academy of Sciences and the American Academy of Arts and Sciences. He has been a faculty member at the University of Illinois since 1953.

The lecture honors Robert W. Stone, head of the former Department of Microbiology for 23 years.

Civil rights in America and Australia contrasted April 7

James Thomson, a senior legal adviser to the attorney general of Western Australia, will present a seminar on "Civil Rights and Constitutionalism: Contrasting Australian and American Experiences" at 3:45 p.m., Monday, April 7, in 102 Weaver Building on the University Park campus.

In addition to his position in the Crown Solicitor's Office in Western Australia, Thomson holds appointments at the University of Western Australia and Murdoch University law schools. He has represented Aus-

tralia at overseas negotiations that have ranged from human rights to the law of the sea, and he holds a master's and doctoral degrees from Harvard and also visiting researchships at Harvard and Columbia.

The lecture, which is open to the public, is being co-sponsored by the Australian-New Zealand Studies Center and the Department of Political Science. For more information, contact Pat Corbett by e-mail at pac9@psu.edu or by phone at (814) 863-1603.

Eberly College of Science heads interim dean

Howard Groth, professor and head of the Department of Physics, has been named interim dean of the Eberly College of Science. Gregory L. Geoffroy, current dean of the college, recently announced he will become vice president for academic affairs and provost of the University of Maryland at College Park effective June 1.

"I have asked Dean Geoffroy and Dr. Groth to use the remaining time before Greg's departure to help bring Howard up to speed so that the college can continue moving forward during this interim period," John A. Brighton, execu-

tive vice president and provost, said. "We have many important projects taking place in the college and we will begin to gear up for the coming academic year, even as this one ends. Howard's work will be invaluable in keeping us on track."

Groth is a specialist in quantum electrodynamics and elementary particle physics research. He conducts theoretical research on the structure of positronium, the Lamb shift and quarkonium. He joined Penn State in 1967 as a research associate and was named assistant professor in 1969,

associate professor in 1973 and full professor in 1974. He was appointed department head in 1988.

He is a Fellow of American Physical Society and a member of Phi Beta Kappa and American Association of Physics Teachers. In 1995, he received the Distinguished Service Award of the Eberly College of Science Alumni Society.

A search committee, chaired by John A. Dutton, dean of the College of Earth and Mineral Sciences, has been appointed to identify candidates for the dean's position.

University hosts global conference on open, distance education

The University Park campus will be transformed into an international village June 2-6 when more than 1,000 educators and professionals from around the world gather for the 18th World Conference of the International Council for Open and Distance Education (ICDE).

The University joins the ranks of Oslo, Norway; Caracas, Venezuela; Bangkok, Thailand; and Birmingham, England, as a host site for an ICDE world conference. These conferences are held every other year.

The theme of the 18th ICDE World Conference is "The New Learning Environment: A Global Perspective." Five renowned speakers and more than 700 educators and professionals from 68 nations will present their research and participate in discussions during the five-day conference.

Gary Miller, assistant vice president for distance education at Penn State and conference program chairman, said the weeklong event will be an intensive discussion and interaction examining the implications of technology on the new learning model that is emerging worldwide.

The International Council for Open and Distance Education is the world association of open and distance learning institutions and professionals and of national and regional open and distance education associations. Representatives from more than 100 nations are members of ICDE, which has headquarters in Oslo, Norway. ICDE is affiliated with the United Nations through the U.N. Educational, Scientific, and Cultural Organization (UNESCO).

Each day of the conference will feature plenary presentations and discussions, poster and orientation sessions on one of four key themes:

— "The Changing Technological Environment;"

— "The New Educational Paradigm;"

— "Technology, Education and Sustainable Development;" and

— "Opportunities for International Cooperation."

These themes will be examined within the context of 10 interest areas, some of which are: primary through secondary school applications; technology applications and emerging technologies; and partnerships and alliances.

Conference papers will be made available to participants in electronic format (computer disk and CD-ROM). In addition, selected papers will be published in an anthology on the theme of the conference. Conference sessions will be held at The Bryce Jordan Center. A Technology Exhibition, showcasing the latest in video, computer and communications technologies, also will be presented in conjunction with the conference. A number of preconference sessions also are planned in association with the 18th ICDE World Conference.

Accommodations for participants include the 18th World Conference International Village, which is being created for the conference, and the Penn State Conference Center and Nittany Lion Inn. The International Village will offer a 24-hour guest services desk and multilingual staff to assist conference participants and their traveling companions and families. There also will be free bus transportation during the conference.

For more information about the conference, visit the Web at <http://www.cde.psu.edu/ICDE/brochure>; or contact Anne Stevens about program content at (814) 865-2143; fax: (814) 865-3290; e-mail: abs4@cde.psu.edu; or Janet Patterson (about registration) at (814) 863-5127; fax: (814) 863-5190; e-mail: ICDE97@cde.psu.edu.

Agricultural Sciences seeks department head

The College of Agricultural Sciences is inviting applications from individuals with outstanding leadership qualities for the position of professor and head, Department of Agricultural and Extension Education. The vision of the department is to be a leader nationally and internationally in preparing formal and nonformal educators in agricultural education, extension education, international agriculture, and youth and family development.

The previous department head, Katherine Fennelly, left the University to assume the position of dean and director of the Minnesota Extension Service at the University of Minnesota.

Reporting to the dean of the college, the professor and department head will provide visionary leadership and effective administration of this multi-disciplinary unit.

Specifically, the professor and department head will:

- Encourage diversity of ideas, people and programs;
- Develop faculty and programmatic excellence in resident education, research and extension;

— Take an active role in college and University affairs and professional organizations;

- Establish and enhance collaborative relationships with universities, state and national organizations and agencies, and business and industry;
- Secure and manage resources on behalf of the department; and

- Continue personal involvement in scholarly activities.

Qualified candidates must have a doctoral degree in any of the following areas: agricultural education, vocational education, extension education, family and consumer science, family studies, or a closely related interdisciplinary field. Demonstrated visionary leadership and team-building philosophy are essential, along with evidence of effective teaching, research and service. Prior administrative experience is desirable.

Candidates should send a letter of application that addresses administrative and leadership philosophy and relevant experience, and a curriculum vitae. The candidate also should have three individuals submit letters of reference to: Dennis C. Scanlon, chair, advisory search committee, Department of Agricultural and Extension Education, 337 Agricultural Administration Building, Box INT, University Park, PA 16802.

Inquiries/nominations may be sent to Scanlon; telephone: (814) 863-7852; fax: (814) 863-7531; e-mail: dennis.scanlon@ags.cas.psu.edu or dscanlon@psu.edu.

Deadline for application is May 15, or until the position is filled. Penn State is an affirmative action/equal opportunity employer. Women and minorities are encouraged to apply.

Hands-on learning

Engineering students Ashley Barnes and Jim Clark use a lathe in The Learning Factory, one of the College of Engineering's many facilities on the University Park campus which will be accessible to spectators during the April 5 open house.

Engineering open house set for April 5

Approximately 2,500 high school students and their families are expected to attend the 1997 College of Engineering Open House on Saturday, April 5, from 9 a.m. to 3:30 p.m. at University Park. The event is open to the public and provides visitors with the opportunity to see demonstrations and working displays throughout the college—including a sailplane design and fabrication project, laser and holographic displays, and tours of the Artificial Heart Lab, the Brazeale Nuclear Reactor and the Aerodynamics Laboratories. All engineering departments will be open to visitors with faculty and students on hand to answer questions and discuss various majors.

One new student-run activity scheduled during the event is "The Nittany Newtonian," a soapbox derby race. Hosted by the Envisioneers, student members of the Leonhard Center for the Enhancement of Engineering Education at Penn State, the race begins at 11:30 a.m. and features cars from six engineering societies. The event will be held on the walkway from Old Main to College Avenue.

Engineering Open House registration and general information will be on the first floor of Kunkle Activities Center, the glassed-in area at the east end of Hammond Building. For additional information, contact Geri Stonebraker at (814) 863-3750.

Private Giving

Major alumni gift to support MBA students

A major gift from two Penn State alumni will be used to support entrepreneurship among MBA students in The Smeal College of Business Administration.

The late John M. Ruffner and his wife, Marilyn J. Whitaker Ruffner, owners and developers of several companies in electronics and manufacturing, created the MBA fellowship fund through a donation of \$164,000 to the University.

Smeal College Dean J. D. Hammond said the gift will provide a significant boost to recruitment efforts that are becoming increasingly competitive.

John and Marilyn Ruffner were originally from western Pennsylvania, he from Jeanette, she from Pittsburgh. John Ruffner, who died in 1995, was a World War II veteran when he arrived at the University. The two met here in 1950 and were married in 1952. Marilyn earned her bachelor's degree in psychology in 1952, John in mineral preparation engineering in 1953.

"John and I decided to make this gift to Penn State in support of entrepreneurship due to our long-term experience in our own private business," said Marilyn Ruffner.

For the first 20 years of his professional career, John Ruffner held positions in sales and marketing, and in acquisitions for major, Boston- and New York-based firms. During this time, he continued his education and earned an MBA degree from the University of New Haven, Conn. A little more than a decade after his graduation, John Ruffner acted on his entrepreneurial impulses and launched his plan to become an independent busi-

nessperson. It wasn't long before his wife joined him on the management team.

Beginning with Delbridge Computing Systems in St. Louis in 1969, the Ruffners leveraged a series of corporate acquisitions that included Medprint Inc., St. Louis; Plasmad Inc., Wallingford, Conn.; Ronor Systems, Wallingford; Berkshire Transformer Co., Kent, Conn.; and Florida Electronics and Transformer Co., Sanford, Fla.

Delbridge, a printer of booklets for payroll tax computation and amortization schedules, later evolved into the holding company for all of the Ruffners' other business interests. Medprint was a printer of medical records systems. Plasmad manufactured hearing protection equipment for use by industry and the Department of Defense. Ronor Systems was a maker of underwater cable systems which were purchased by the Defense Department. Berkshire Transformer produced custom-made transformers, and Florida Electronics built electronic assemblies for industrial and aircraft use, as well as custom-made transformers. The staffs of these companies ranged from 35 employees to as many as 120.

John Ruffner served on the National Campaign Committees of the Campaign for Penn State, the University's first major capital campaign (1984-90). Marilyn Ruffner is active with the chapter of Penn State Alumni Association near her home in Florida. Two of the Ruffners' three children, John and Cynthia, earned their bachelor's degree from The Smeal College. Daughter Sandra completed her studies at the University of Washington.

Endowment fund nearly doubles in only five years

The total market value of Penn State's pooled endowment fund nearly doubled over the past five years, growing from \$217.7 million in 1991 to \$423 million as of Dec. 31, 1996. A report presented to the Board of Trustees March 21 by the treasurer's office credits the growth to new gifts and reinvested earnings.

Endowments provide a source of income that Penn State can depend on to meet some of its most critical academic needs. The annualized investment return of 11.1 percent for the fund over the past five years exceeded the long-term average of about 10 percent and represented a real return, after inflation, of 7.8 percent.

"To further of Penn State's strategic asset allocation goals, we are continuing to broaden diversification by increasing the proportion of the fund deployed internationally," said Gary C. Schultz, senior vice president for finance and business/treasurer. "We also are increasing our investments in 'alternative equities,' such as real estate, venture and private investments, and energy programs—which have increased to 12.5 percent of the endowment from 9.7 percent a year ago."

The University's endowment fund is a pooled investment of gifts. The University holds endowed gifts in perpetuity, investing them and spending only a portion of the total return for each endowment's designated purpose. The remaining return is added to the principal to protect it from inflation.

Check it out

As clocks move forward one hour Sunday, April 6, to mark Daylight-Saving Time, visitors to Pennsylvania College of Technology's Annual Open House will move forward and catch a glimpse of the future of work. The event runs from noon to 4:30 p.m. and offers an array of opportunities to see the latest in technology and education. Free to the public, the Open House regularly attracts about 15,000 visitors to the college's main campus in Williamsport, the Kathryn Wenzel Lumsley Aviation Center at the Williamsport Regional Airport in Montoursville, and the Herman T. Schneebell Earth Science Center near Allenwood. Penn College's North Campus in Weistown will be open as well, hosting its annual Hobby Day and Career Expo. For more information, call Penn College at (717) 326-3761, or the Office of Admissions at (800) 367-9222.

Faculty/Staff Alerts

Junior Education Day is May 10

The Third Annual Minerals and Materials Junior Education Day will be held on Saturday, May 10, in Steidle Building on the University Park campus. Registration for the event is \$2 per student and the day's activities are open to all grade-school children.

Minerals and Materials Junior Education Day introduces children to both the wonders of the mineral kingdom and the miracles of modern man-made materials. Grade-schoolers attending the education day will travel from station to station within the Penn State Mineral Museum. At each station, they'll be taught facts about minerals, rocks, fossils or man-made materials. Free samples of minerals and fossils will be given out and students will be shown how to begin a rock collection.

To register, contact one of the following: in Centre County, Frank Kowalczyk (814) 238-8874; in Blair County and points south, Craig and Karen Brandt (814) 695-6552; in Lock Haven and points north, Bob Carney (717) 893-2068 (day) or 726-7071 (evening).

Summer Intensive Language Institute accepting applications

Applications are currently being accepted for the Summer Intensive Language Institute which runs from June 9 to Aug. 1. These credit courses include the study of French, German, Italian, Japanese, Latin, Russian and Spanish and are conducted by the

departments of classics and ancient Mediterranean studies, comparative literature, French, German, Italian, Slavic and Spanish in the College of the Liberal Arts. With the exception of Latin, these programs are designed for individuals who want to develop oral proficiency in a foreign or second language.

For more information, call (800) PSU-TODAY or visit their Web site at <http://www.cde.psu.edu/C&I/IntensiveLanguage/>.

Bone marrow transplant support group formed at Hershey

A new Bone Marrow Transplant Support Group is being formed at The Milton S. Hershey Medical Center to meet the needs of patients, donors, their families and friends.

The medical center launched its new bone marrow transplantation program in October 1996, offering an alternative to patients who previously had to travel to Pittsburgh, Philadelphia or Baltimore for bone marrow transplantation.

Meetings will be held on the first Thursday of each month.

For more information contact Marion Markowicz at (717) 531-5433.

Office relocation

The Office of the Senior Associate Vice President for Finance and Business has relocated to 208 Old Main from its former location of 304 Old Main. The staff

relocating are William H. McKinnon, Arleen Bilger, Connie Bjalme, Vincent Carter, Peg Conrad, Robert Finley, Eugene Flynn, Janeen Grasser, Susan Otto and Cathy Shannon. Telephone numbers remain the same.

Videoconferencing room equipment upgraded; another room set up

The videoconferencing facility in room 120 University Support Building 2 at University Park has been upgraded with the latest group-system videoconferencing technology.

The upgrade includes a PictureTel Concorde 4500 system which delivers a high-performance videoconferencing service for conducting meetings and for use in applications such as telemedicine, distance learning, interviews and motion-intensive applications. In addition to many advanced features, the system also was upgraded to operate at dial-up speeds up to 384Kb, which provide even better video transmission.

Videoconferencing equipment also has been installed in room 105 University Support Building 2. The PictureTel system 4000 unit in this room also features the same dial-up speeds.

Both videoconferencing rooms are managed by the Office of Telecommunications and are available to faculty and staff. The rooms may be scheduled by calling (814) 863-8906. For more information, visit the Office of Telecommunications' Web site at <http://www.oltc.psu.edu/services/conference.html>, or contact an analyst at (814) 865-1940.

Appointments

New manager appointed for Emergency Medical Services

J. David Jones has been appointed Emergency Medical Services manager for University Health Services. Jones is responsible for the oversight of development of policies and procedures for EMS operations to include University Ambulance Service and Penn State special events.

Before joining University Health Services, Jones was station manager at Wilkins-Churchill Rescue One, where he managed the overall operation of ambulance and advanced life-support service to the municipalities of Wilkins Township and Churchill Borough.

Jones graduated with high distinction from Penn State in 1980 with a bachelor's degree in health and physical education. He also is a certified instructor in basic trauma, advanced cardiac and pediatric advanced life support and an Emergency Medical Technician instructor.

J. DAVID JONES

Lehigh Valley welcomes community relations coordinator

Denise Miller Rader of Allentown was recently appointed as community relations coordinator at Penn State Lehigh Valley. Her responsibilities include media relations, development and alumni affairs.

Rader, a six-year veteran of the Pennsylvania Department of Transportation's public relations office in Allentown, had coordinated the department's highway safety program in a six-county region and acted as a liaison for local and state police, the media and the community.

A 1989 cum laude graduate of Allentown University with a bachelor's degree in communications media, Rader also completed a summer communications internship at Lehigh Valley Hospital in 1989.

DENISE MILLER RADER

Altoona names new director of University Relations

Shari Robbins Routh has been named director of University Relations at Penn State Altoona. In this position she will be responsible for organizing and conducting a program of public information through the news media and providing effective public relations regarding the achievements, plans and prospects of Penn State Altoona. In this capacity, she will support the development and fund-raising efforts of the campus with appropriate publications and special events.

Before joining the Penn State Altoona staff, Routh worked as an attorney at the law firm of Evey, Routh, Black, Dorezas & Magee. She is graduate of the University of Virginia School of Law, where she received a juris doctor degree, and Lehigh University, where she received a bachelor of arts degree in government and was honored as a member of Phi Beta Kappa.

Routh has devoted much of her time to the community, serving as a board member of the Rotary Club of Altoona-Sunrise, and as the solicitor for the Altoona Symphony Orchestra.

SHARI ROBBINS ROUTH

BOOK SHELF

It has been nearly 30 years since a comprehensive book examining the complex field of turbomachinery has been released. To fill this void, **Budugur Lakshminarayana**, Evan Pugh professor of aerospace engineering, authored the book *Fluid Dynamics and Heat Transfer of Turbomachinery*. This 832-page volume is the first of its kind to shed light on modern advances in the field.

Published by John Wiley Publishers, Lakshminarayana's book gives a unified treatment of the basic principles and aspects of fluid dynamics, providing a "detailed, step-by-step presentation of the analytical and computational models involved." A systematic approach, undertaken with more than 300 illustrations, is used in developing the knowledge base, drawn from more than 900 references. The author drew on his more than 30 years of teaching experience and his experience in research and consulting in the field.

Jack Selzer, associate professor of English, is the author of *Kenneth Burke in Greenwich Village: Conversing with the Moderns, 1915-1931*, published by the University of Wisconsin Press.

In the book, Selzer shows how Kenneth Burke, who has been hailed as the most significant theorist of rhetoric since Cicero, contributed to the modernist conversation in Greenwich Village. Selzer draws on an array of letters between Burke and his modernist friends and on the memoirs of his associates to create a portrait of Burke, who as an associate editor of *Others* magazine saw T.S. Eliot's "The Wasteland" into print for the first time. Burke also published editorial services for Thomas Mann, e.e. cummings, Ezra Pound, and many other writers of note.

Selzer also is editor of *Understanding Scientific Prose and Conversations: Reading for Writing*.

Adam J. Sorkin, professor of English, Delaware County campus, published *The Sky Behind the Forest*, a selection of 60 poems by the contemporary Romanian poet Liliana Ursu. The book was translated in a triple collaboration with both Ursu and American poet Tess Gallagher. Ursu served as Fulbright lecturer in the Department of Slavic and East European Languages at the University Park campus during the 1992-93 academic year. The 96-page volume has an introduction by poet Brenda Hillman, as well as translator's notes by Gallagher and Sorkin. *The Sky Behind the Forest*, Sorkin's fifth book of Romanian translations since 1992, was published in Newcastle upon Tyne by Bloodaxe Books, the U.K.'s most active publisher of contemporary poetry.

Humanities Librarian **Lynne M. Stuart** and former documents Librarian **Dena Holiman Hutto**, now a documents/social science librarian at Reed College in Portland, Ore., have co-edited *The Changing Face of Reference* (Jai Press Inc., 1996). This book seeks to identify and describe the causes and effects of

changes that have forced librarians to re-examine reference service. Its contributors see these changes as opportunities to create new ways of providing assistance and instruction, to reach out to new groups of library users and to embrace new technologies. Contributors to this monograph recognize that because librarians are moving from a collection-based to a service-based orientation, they are in a unique position to redefine the role and function of libraries in the larger information environment.

Penn State librarians contributing chapters to this book include **Sally Kalin**, acting assistant dean of Collections and Reference Services and Information and Access Services; **Catherine Lee**, head librarian at Penn State DuBois campus; and **Carol Ann Wright**, general reference librarian.

Blend globalization, change and opportunity with leadership and learning and you get competitive advantage. That's the conclusion of **Albert A. Viciere**, Smeal College associate dean for executive education, and **Robert M. Fulmer**, College of William & Mary, in their new book, *Crafting Competitiveness: Developing Leaders in the Shadow Pyramid*.

The authors describe how benchmark companies are addressing the challenge of crafting competitive advantage through investment in strategic leadership development. Through models, frameworks, assessments and examples, Viciere and Fulmer provide an outline for designing leadership development processes that the co-authors believe can make a significant difference for organizations in the global marketplace. The co-authors attempt to answer a wide range of questions by profiling the strategic context for leadership development, showing organizations how to design world-class leadership development initiatives, assess development methodologies, select effective providers and assess the impact of leadership development programs.

Crafting Competitiveness: Developing Leaders in the Shadow Pyramid was first released in the United Kingdom by Capstone Publishers and will be published in North America this fall by Harvard Business School Press. Script Publishing, the Netherlands, will issue a Dutch version.

Stanley Weintraub, Evan Pugh professor of arts and humanities, is the author of a new biography published in London by John Murray titled *Albert: Unworn King*.

Weintraub's biography of Albert, the husband of Queen Victoria, reveals the extent to which Albert actively interfered in the affairs of government of his adopted country. As an unwelcome foreigner, Albert succeeded in achieving dominance over his willful wife, refusing to play an ornamental role, and in the process transformed the British monarchy. The book will be published in the United States in early June by Free Press. Weintraub published *Queen Victoria's biography* in 1987.

The ARTS

AT PENN STATE

On display

This oil on canvas by American artist Jerome Witkin, titled *Jeff Davies*, is part of the Palmer Museum of Art's permanent collection. The work is a gift of the American Academy and Institute of Arts and Letters, Hassam and Speicher Purchase Fund. It can be viewed in the museum's Pincus Gallery of Contemporary Art.

Pianist to present recital

Pianist **David Buechner** will present a free Yamaha Concert Artist recital at 8 p.m. Friday, April 4, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

Buechner has been described as one of America's most exciting and innovative pianists. He is a graduate of the Juilliard School and the Manhattan School of Music. In his 20s, Buechner won major prizes at most of the world's prestigious piano competitions. He is a member of the faculties of New York University and the Manhattan School of Music, where he lectures in piano literature in addition to his teaching of piano and chamber music. He plays the Yamaha piano exclusively.

Piano and trumpet duo

Courtney L. Mundy, pianist, and Matthew Alercia, trumpet, will present a free dual recital at 2 p.m. Saturday, April 5, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

Odyssey Through Literature

On the April 6 episode of *Odyssey Through Literature*, **Elizabeth Maxwell**, independent scholar and widow of international publisher **Robert Maxwell**, speaks about the world denied by the denial of the Holocaust.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 on WFSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://mickey.la.psu.edu/complit/odyssey/odyssey.htm>

Composers' concert set

The School of Music's Composers Concert will be held at 8 p.m. Sunday, April 6, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

The concert, which takes place every semester, presents new works by students of Penn State composition teachers **Paul Barsom** and **Bruce Trinkle**.

The concert is free to the public.

"Schubertiade" to honor composer

Pianist **Stephen Herbert Smith**, professor of music, and colleagues from the School of Music will present an evening of Franz Schubert's lieder and chamber music at 8 p.m. Monday, April 7, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

This "Schubertiade," as such evenings were called in the composer's lifetime, joins other concerts both locally and worldwide in honoring Schubert for the bicentennial of his birth in 1797. The evening will include the voices and the playing of a number of faculty members.

The concert is free to the public.

"Exotic Illusions"

"Exotic Illusions: Art, Romance and the Marketplace," premiering nationally when it opens on Tuesday, April 8, at the Palmer Museum of Art on the University Park campus, is an exhibition that challenges traditional definitions of "exotic," "primitive" and "authentic" as they relate to non-Western art and artifacts by exploring the role of consumers in the creation and distribution of such objects.

Conceived by The Heard Museum in Phoenix, "Exotic Illusions" was organized by the Smithsonian Institution Traveling Exhibition Service. "Exotic Illusions" will be on view until June 15.

Peter Welsh, curator of the exhibition and professor of anthropology at Arizona State University, will present a lecture on "Museums and the Culture of Commodities" on Thursday, April 24, at 7:30 p.m. in the Palmer Lipson Auditorium at the Palmer Museum of Art.

Scholars exhibit

The exhibition "School of Visual Arts University Scholars Program Exhibition" will be on display from Wednesday, April 9, to Wednesday, April 16, in the Zoller Gallery in the Visual Arts Building on the University Park campus.

The exhibition will showcase the work of four University Scholars in the School of Visual Arts. An opening reception will be held on Wednesday, April 9, from 7 to 9 p.m. in the Zoller Gallery.

Opera for lunch

Voice Students from the Penn State Opera Theatre will perform at the Bach's Lunch concert at 12:10 p.m. Thursday, April 10, in the Helen Eakin Eisenhower Chapel on the University Park campus. The free 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

The Penn State Opera Theatre is directed by **Susan Boardman**, associate professor of music. The students will perform excerpts from professor **Bruce Trinkle**'s new opera, *Eve's Odds*. The libretto was written by **Jason Charnesky**, a doctoral candidate and teaching assistant in the Department of English.

Audience members may to take their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

One-man show

Dani Maseng will perform a one-man show, "Wasting Time with Harry Davidowitz," at 8 p.m. Thursday, April 17, in Kern Auditorium on the University Park campus. Written and arranged by this Israeli-born performer, the show takes the audience through Maseng's personal voyage, from Shabbat dinners with his grandparents, to a beatnik camp in Eilat, to 14 years with a Zen teacher and back to Judaism. The performance is sponsored by the Penn State Hill Foundation. For information, call (814) 863-3816.

ICE RHYTHMS

The Ice Pavilion will present "ICE RHYTHMS," an ice show directed by **Dena Yeagley** at 7:30 p.m. Friday, April 25, and Saturday, April 26, in the Greenberg Sports Complex on the University Park campus. The program will include solos by visiting national and international figure skating competitors, featuring **Michael Weiss**, current U.S. Nationals Senior Men's Silver Medalist and World Team member, representing the Washington Figure Skating Club. ICE RHYTHMS also will feature the junior pairs team of **Carissa Guild** and **Andrew Muldoon**, 1996 U.S. National Competitors, members of the 1997 World Junior Team representing The Philadelphia Skating Club and Humane Society, and the University of Delaware Figure Skating Club. Also included will be solos and group numbers by resident professionals and skaters from student and public programs.

Advance general admission tickets are \$5.50 for students/youth, and \$7.50 for adults. Advance tickets can be purchased at the Penn State Ice Pavilion main counter. Tickets purchased April 25 and 26 will be \$7 and \$9. Tickets are available by mail by calling (814) 865-4102.

Multi-media exhibit

The multi-media exhibit "The Otherside of the River" is on display in the Gallery Lounge at the Penn State Harrisburg campus through May 9. The original art works of five faculty members, **Kathy T. Hettinga**, **Catherine Porter Prescott**, **Donald John Forsythe**, **Christine A. Forsythe** and **Stephen Fieser**, all from Messiah College's art department, are featured.

University Awards Ceremony 1997

INTERCOM SPECIAL SECTION

These awards will be presented at the University Awards Ceremony beginning at 1:30 p.m. Sunday, April 6, at The Penn State Scanticon on the University Park Campus

April 3, 1997

Volume 4, Number 1

Atherton Award for Excellence in Teaching bestowed on four

Four University faculty members will receive the 1997 George W. Atherton Award for Excellence in Teaching. They are: John M. Cimbala, associate professor of mechanical engineering, University Park campus; Ellen Andrews Knott, associate professor of English, Abington College; Barry Kur, associate professor of theatre arts, University Park campus; and Lisa Williams Walton, assistant professor of business logistics, University Park campus.

The award, named after Penn State's seventh president, was established in 1989 as a continuation of the AMOCO Foundation Award. It honors excellence in teaching at the undergraduate level.

The award, named after Penn State's seventh president, was established in 1989 as a continuation of the AMOCO Foundation Award. It honors excellence in teaching at the undergraduate level.

Cimbala is recognized as a consistently outstanding teacher, with two teaching awards from the College of Engineering. He has developed and improved several undergraduate and graduate courses,

including the undergraduate fluid mechanics laboratory course, and has single-handedly built up the undergraduate fluid mechanics laboratory into one of the world's finest and most sophisticated.

To make the subjects he teaches come alive for the students, Cimbala provides World Wide Web pages for every course he teaches and also uses simple desk-top demonstrations that vividly illustrate fluid mechanics principles. "I have a very simple philosophy of teaching," Cimbala said. "I always teach from the perspective of the student. In every course, I ask myself the question, 'If I were a student sitting in this class, what would be the best way of presenting this material so that I would learn most effectively?'"

JOHN M. CIMBALA

ELLEN ANDREWS KNOTT

BARRY KUR

LISA WILLIAMS WALTON

Knott, who has also won a teaching award from the College of the Liberal Arts, has been described as the epitome of the scholarly teacher. She has translated her ongoing research in rhetorical theory and practice not only into two composition textbooks and a reader for developing writers, but also into her everyday classroom activities. Whether she is teaching the basics of expository writing, advanced composition, American literature, or English language analysis, she uses collaborative learning techniques to make sure her students are learning.

"Teaching," said Knott, "means organizing and presenting knowledge in ways that the students in the classroom can understand. It means bringing about change within the students. Teaching is hard, frustrating work, because change is never easy. Yet, when a breakthrough occurs, the student's joy of accomplishment is contagious, and the whole endeavor becomes enormously satisfying."

Kur, a nationally known teacher of voice and speech, has been described as knowledgeable,

confident, dedicated and effective. The voice and speech coach for all University Resident Theatre Company productions, Kur is the creator and director of the University Park Ensemble — an all-undergraduate troupe of actors who use the stage to instruct students and the public about campus life, AIDS, date rape, substance abuse and other issues relevant to their lives.

Kur says the ensemble's focus on interactive improvisation as well as scripted material enables students to move others toward positive action. "This alternative to lecturing has been risky and exhilarating," Kur said. "As it relates to a teaching philosophy, it has strengthened my belief that real learning begins when students are given the opportunity to give voice to their opinions."

Walton has won teaching and advising awards from The Smeal College of Business Administration and the University's Outstanding Woman Faculty Member Award. Over the years, Walton has experimented with a variety of teaching methods, including one that combines lecture, discussion and collaborative learning. She helped develop a one-of-a-kind logistics course that enables students to tour European companies and learn how they handle logistics — the movement of information and material from the supplier through the manufacturing process to final customer delivery. Her students have praised the quality of her performance and her extraordinary efforts in the classroom.

"Teaching is an activity aimed at the achievement of learning," Walton said, "practiced in such a passionate and enthusiastic manner as to instill within students the desire not only to learn but to actively participate in their learning. To be an effective teacher, one must love and be enthusiastic about teaching, explain course relevance to students, develop innovative curricula, use diverse teaching styles, promote active student learning and care about students and their development of knowledge and character."

The following writers from the Department of Public Information contributed to this special section:

Kim Bierly, Paul Blum, Vicki Fong, Barbara Hale, Alan Janesch, Andrea Messer and Karen Wagner.

DeJong earns International Achievement Award

The International Achievement Award was established to recognize faculty and staff members who have contributed significantly to the international mission of the University through their research and teaching.

Gordon DeJong, distinguished professor of sociology and director of the graduate program in demography, has won the 1997 W. LaMar Kopp International Achievement Award. The award recognizes faculty and staff members who have contributed significantly to Penn State's international mission.

A Penn State faculty member for 33 years, DeJong and his research in demography have been a magnet for both domestic and international students. In 1987, he founded the graduate program in demography with six participating departments. The program now enrolls 55 students, 21 of whom are from developing countries. It is one of the largest graduate training programs in demography in the U.S. and is unique in its interdisciplinary and in offering both M.S. and Ph.D. degrees.

DeJong and his colleagues have received five successive Hewlett Foundation training and research grants in international demography which have provided tuition, stipend and dissertation research support for 56 international graduate students. The foundation also has provided support for short-term

GORDON DEJONG

residencies by returning Third World demography program alumni, an effort Hewlett has used as an example for other universities.

Over his career, DeJong has conducted research in Peru, England, Holland, Israel, the Philippines, Thailand and Romania. These projects have resulted in a book and nearly two dozen professional articles co-authored with Third World scholars. In the past 10 years, his training program grants and research program have supported on-campus visits of approximately 40 international researchers.

DeJong has been a senior fellow at the U.S. State Department's East-West Center in Hawaii, as well as a visiting faculty member at the Netherlands Graduate School in Demography.

He served a term as editor of *Demography*, the official journal of the Population Association of America.

He was previously honored with the Penn State Provost's Award for excellence in collaborative teaching and the Distinction in the Social Sciences Award. He also received distinguished alumni awards from Central College, Iowa, and the University of Kentucky.

Kirker, Turns cited for distinguished teaching

The 1997 winners of the Milton S. Eisenhower Award for Distinguished Teaching are **Constance Kirker**, assistant professor of integrative arts, and **Stephen R. Turns**, professor of mechanical engineering.

Kirker consistently earns outstanding ratings from her students at the Penn State Delaware County campus and has made profound contributions to her campus in internationalizing its curriculum and bringing multicultural perspectives to undergraduate studies.

She is responsible for developing two well-subscribed independent learning courses in Japanese and Chinese art history in addition to a cultures semester program with a core of six thematically-linked courses that have attracted Fulbright scholars from Hong Kong and Latin America.

"Teaching, for me, is like a box of 64 brand new crayons. There is no limit to what you can do with all that spectacular potential, just as there is no limit to what you may accomplish with all the varied faces in the classroom and the simply breathtaking beauty of all the world's art as your subject matter," Kirker said. Her guiding principle in developing the curriculum for 14 courses in the arts and diversity is to bring her excitement of the subject matter to her students.

Turns' contributions to the teaching mission of his department also have been many, with more than 15 years leading class discussions in Penn State's mechanical engineering department. He is the author of a recently published undergraduate textbook, *An Introduction to Combustion: Concepts and Applications*, that has received outstanding reviews and has been adopted by more than 25 schools in its first year of publication. Turns also has been instrumental in the development of experimental laboratories and as a role model to both undergraduate and graduate faculty.

According to Turns, his teaching approach is grounded in two fundamental beliefs: that the instructor's attitude toward his or her students is key to fostering a productive learning environment and that showing a genuine love and enthusiasm of the subject matter motivates the students to learn. Turns said providing various contexts for the subject matter is also important — applying engineering principles to real-world experiences.

In addition to learning the names of all of his students, even with enrollments up to 100, Turns provides his students with plenty of feedback, often answering questions and inquires with a hand-written note.

The Milton S. Eisenhower Award for Distinguished Teaching recognizes outstanding efforts among Penn State's tenured faculty, employed full-time for at least five years, with undergraduate teaching as a major portion of their duties. Milton S. Eisenhower was president of Penn State from 1950 to 1956.

CONSTANCE KIRKER

STEPHEN R. TURNS

Gallagher lauded for administrative excellence

James D. Gallagher, campus executive officer at Penn State Worthington Scranton campus, has been named the winner of the award for administrative excellence.

The Administrative Excellence Award is given annually to Penn State staff members whose performance methods and achievements exemplify administrative excellence.

Gallagher joined Penn State as a graduate teaching assistant in 1959 and became a full-time instructor the following year at Penn State Erie, The Behrend College. In 1963, he transferred to University Park where he rose to the rank of associate dean in charge of health, physical education and recreation programs at the campuses. Since 1979 he has served as the campus executive officer for Worthington Scranton.

During his tenure, Gallagher has been credited with providing leadership and direction to all spheres of campus operations. In excess of \$2 million in donations has been raised and the number of scholarships has increased from 30 to more than 100. Campus enrollments also reached an all-time high of 1,425 for the current academic year.

A visionary who embraces change, Gallagher was supportive of the Plan for the Commonwealth. His enthusiasm for developing four-year programs caught on quickly and several are well under way. Nursing, occupational therapy and human development and family studies are three recent additions to the campus curriculum.

Gallagher has been active in a number of community activities. He currently serves on the board of trustees for the community medical center, as well as a private industry council for job training partnership.

At all levels of the institution, those that have come in contact with Gallagher admire his knack for team building.

One colleague sums it up this way: "He involves the campus community in all phases of planning and consistently makes judicious decisions based on our input."

JAMES D. GALLAGHER

Morrow and Bartlett garner honors for advising

The 1997 Excellence in Advising Awards will be presented to Linda Morrow and A.L. "Bart" Bartlett. The award acknowledges excellence in advising, academic and career guidance and assistance to students in decision making and goal setting.

An academic adviser at the Health and Human Development Undergraduate Advising Center since 1987, Morrow's primary focus has been on "pre-major" advising for students in the College of Health and Human Development who want to major in nutrition or biobehavioral health. She is adviser to countless students who come in contact with her at a potential turning point in their academic careers, including high school seniors, first-year students, sophomores who haven't declared a major, prospective transfer students and graduates of other programs considering a career change.

In her role as career mentor and nutrition instructor, Morrow teaches two, one-credit courses that prepare students to apply for dietetic internships and explore career opportunities in nutrition. She also serves as the faculty adviser for the Phi

LINDA MORROW

A.L. "BART" BARTLETT

Upsilon Omicron and Kappa Omicron Nu honor societies. Kappa Omicron Nu recently presented her with its Adviser Award of Excellence in addition to honoring Penn State for best chapter.

"An academic adviser is, above all, an educator; I try to teach the strategies that will help a student reach his or her academic goals," Morrow said.

Bartlett, or "Bart" as his students and colleagues call him, has been a Penn State faculty member in Hotel, Restaurant and Institutional Management (HRA&IM) for 15 years. From the beginning, student advising has been an important part of his job. Bartlett spends 15 to 20 hours a week guiding students along their academic and career paths.

For 14 years Bartlett has been the faculty adviser to the Penn State Hotel and Restaurant Society, which is the largest of the student organizations in HRA&IM. He served as adviser to the National Society of Minorities in Hospitality and is a member of the Lesbian Gay Bisexual Support Network. Drawing from his business expertise in human resources, Bartlett's class discussions on diversity in the workplace have led many students to seek his advice outside of class.

Bartlett also offers an annual workshop on resume preparation and interviewing for hospitality jobs.

"I try to be approachable and open to students," he said. "I like to think that they also find me easy to talk to."

Equal Opportunity Award goes to multicultural center counselor

Elisha Nixon, counselor at the Multicultural Resource Center, is the 1997 recipient of Penn State's Equal Opportunity Award.

The Equal Opportunity Award recognizes a University faculty or staff member who promotes the concept of equal opportunity through affirmative action and/or contributes to enhancing the educational environment of the University through improving cross-cultural understanding.

Nixon has been honored for her professional and personal advocacy efforts on behalf of diversity. The Multicultural Resource Center serves more than 3,000 students a year and is dedicated to providing academic and personal counseling to students of color at Penn State. In addition to her regular duties, she has constantly developed and implemented new initiatives such as the MRC student advisory board, the center's participation in Parents Weekend and "Conversations With Faculty."

Her efforts also extended throughout the entire University with the development of a Diversity Health Fair and Unity Days, an annual program started in 1995 to build coalitions through education, awareness and cultural sensitivity. The Unity Days program includes collaborative activities, speakers and films, as well as a "PAWS

ELISHA NIXON

across Penn State" ceremony at the University Park campus.

Nixon is co-founder of the African American Community Organization, formed to support area African American children through educational and social activities. In 1993, she created a Saturday afternoon tutoring program for State College children, titled "Together We Can," with Penn State students as tutors.

The parent of three children, she has pursued a master's degree and is now seeking a doctorate in health education. But she still has found time to plan and participate in special recognition services each year for graduating African American students and their families. She also helped start a support group for African American women faculty and staff members at the University.

McKay Donkin Award presented to mechanical engineering's Heinsohn

The McKay Donkin Award will be presented to Robert Jennings Heinsohn, professor of mechanical engineering.

The award was established in 1969 in honor of the late McKay Donkin who served as vice president for finance and treasurer of the University from 1957 to 1968. It is presented to the full-time member of the faculty or staff or the retiree who has contributed most to the economic, physical, mental or social welfare of the faculty at Penn State.

Heinsohn received his bachelor's degree in mechanical engineering from Rensselaer Polytechnic Institute, Troy, N.Y., in 1954; his master's degree in mechanical engineering from the Massachusetts Institute of Technology in 1955 and his doctorate from Michigan State University in 1963.

He joined the Penn State faculty in 1963 as an assistant professor and in 1966 was promoted to associate professor, a title he held until 1977 when he

ROBERT JENNINGS HEINSOHN

was name professor. For the past 10 years Heinsohn has devoted one-third of his time to serve his department as the graduate adviser and also as the undergraduate program coordinator. He has chaired many departmental committees and also was the department's acting head from January 1994 to January 1995.

He also served in leadership positions at the college level, having chaired its Science, Technology and Society program and was the chairman of the college's Economic Opportunity Program and adviser to the Development Year Program.

Heinsohn has served in the Faculty Senate for more than 20 years. His fellow senators in the College of Engineering elected him as chairman of the Caucus of Engineering Senators and as their representative on Senate Council from 1991 to 1994, at which point he was elected by his fellow senators to serve as Senate secretary.

University Awards Ceremony 1997

These awards will be presented at the University Awards Ceremony on Sunday, April 6, at The Penn State Scanticon on the University Park campus.

Student awards will be presented at 1:30 p.m.; faculty and staff will receive their awards beginning at 4 p.m.

Five earn Faculty Scholar Medals for achievements

Five Penn State professors will receive 1996-97 Faculty Scholar Medals for Outstanding Achievement.

They are: **Robert N. Proctor**, professor of the history of science, for the Arts and Humanities Medal; **Tarasankar DebRoy**, professor of materials science and engineering, for the Engineering Medal; **Joanna Floros**, professor of cellular and molecular physiology and pediatrics, for the Life and Health Sciences Medal; **Jayanth R. Banavar**, professor of physics, for the Physical Sciences Medal, and **Linda M. Burton**, professor of human development and family studies and professor of sociology, for the Social and Behavioral Sciences Medal.

Established in 1980, the award recognizes scholarly or creative excellence represented by a single contribution or a series of contributions around a coherent theme. A committee of faculty peers reviews nominations and selects candidates.

Proctor's study of the intersection between science and public policy has won him international recognition. His three books, *Racial Hygiene: Medicine Under the Nazis*, *Value-Free Science? Purity and Power in Modern Knowledge and Cancer Wars*, and *How Politics Shapes What We Know and Don't Know About Cancer*, have had considerable impact on public thought and policy.

He received his B.S. in biology from Indiana University in 1976 and an M.S. and Ph.D. in the history of science from Harvard University in 1977 and 1984 respectively. He was a visiting scholar at the Hamburger Institut für Sozialforschung in 1995 and J.B. and Maurice C. Shapiro Senior Scholar-in-Residence, U.S. Holocaust Memorial Museum, Washington, D.C., in 1994.

Proctor was an instructor and teaching fellow in the departments of biology, history of science and Afro-American studies at Harvard University from 1976 to 1984 during which time he was also a Fulbright Scholar at the Free University of Berlin. In 1986 he became a faculty member and chair of the program in science, technology, and power, Eugene Lang College, New School for Social Research, N.Y. He came to Penn State in 1990 as an associate professor in the department of history and in 1993 he became professor.

DebRoy will receive his award for a series of interconnected works which, taken as a whole, provide a quantitative basis for understanding fusion welding processes and a scientific standard for other researchers. His unique approach to solving complex welding problems based on physical and mathematical modeling is thorough and creative.

He received his B.E. in metallurgical engineering from the Regional Engineering College, Durgapur, India, in 1969 and his Ph.D. in 1974

The Faculty Scholar Medals for Outstanding Achievement recognize scholarly or creative excellence represented by a single contribution or a series of contributions around a coherent theme.

from the Indian Institute of Science, Bangalore.

He received the Adams Memorial Membership Award for outstanding teaching from the American Welding Society in 1992, the Wilson Research Award from the College of Earth and Mineral Sciences in 1993, and the American Welding Society's McKay Helm Award for best technical paper on welding of steels in 1994. He is a Fellow of the American Society for Metals.

He came to Penn State in 1980 as an assistant professor, was named associate professor in 1984 and professor in 1989.

Floros is an international leader in the study of lung surfactant proteins. She has pioneered the use of molecular biology and molecular genetics tools in the understanding of the regulation of surfactant protein genes, lung development and the genetic basis of neonatal respiratory distress syndrome (RDS).

She received her B.A. in biology from Northeastern University in 1974 and her Ph.D. in pathology from Temple University School of Medicine in 1980. In 1996 she received a merit award from the National Institutes of Health, and in 1988, she received a Genentech/American Lung Association Career Investigator Award. In 1996 she was profiled in *Who's Who in the American Thracic Society*.

She began her career as a research fellow in biological chemistry in 1980 at Harvard Medical School and by 1988, rose to the level of associate professor of pediatrics. She joined Penn State's Milton S. Hershey College of Medicine in 1991 as professor of cellular and molecular physiology and became professor of cellular and molecular physiology and pediatrics in 1996.

Banavar has solved a set of fundamental, long-standing problems involving fluid motions at the molecular scale and in the continuum limit using computer simulation techniques. His work has opened the pathway to understanding fluid properties at short-length scales, and highlighted how state-of-the-art computer technology can solve fundamental scientific problems.

He received his B.Sc. and M.Sc. in physics from Bangalore University, India, in 1972 and 1974 respectively. He received his M.S. and Ph.D. in physics from the University of Pittsburgh in 1975 and 1978 respectively. He is a Fellow of the American Physical Society.

He began his career as a research associate at the University of Chicago in 1978. In 1981 he became a member of the technical staff at Bell Laboratories and in 1983 a member of the professional staff at Schlumberger-Doll Research. He joined Penn State in 1988 as associate professor of physics and materials research and became professor in 1991.

Burton's studies of African American families have contributed insights and significantly impacted the field. She is one of the premiere family sociologists in the U.S.

She received a B.S. in gerontology, and an M.A. and Ph.D. in sociology from the University of Southern California in 1978, 1982 and 1985 respectively. In 1996 she received an American Family Therapy Academy Award for Innovative Contributions to Family Research and a "Products of Compton" Award from the City of Compton, Calif., and Compton Coalition for Progress. In 1987 she was named a Brookdale National Fellow and in 1988 a Fellow at the Center for Advanced Study at Stanford University.

Burton was an instructor in the University of Southern California from 1981 to 1984 and a demographic researcher for the Seismic Safety Commission in Los Angeles from 1982 to 1983. In 1984 she joined the Penn State faculty as assistant professor of human development and family studies and, in 1990, became associate professor of human development and family studies and a senior research associate in the Population Issues Research Center. In 1993 she became professor of human development and family studies and sociology.

Zelis recognized as mentor to fellow faculty members

Robert Zelis, professor of medicine and cellular and molecular physiology at The Milton S. Eshelby Medical Center, has been chosen to receive the 1997 Howard B. Palmer Faculty Mentoring Award.

The Palmer Faculty Mentoring Award recognizes faculty members who most effectively promote the medical and professional development of junior faculty.

Dr. Zelis, director of cardiology research at the medical center, came to Penn State in 1974 as professor of medicine and physiology and chief of the Division of Cardiology. His research areas are circulatory physiology, congestive heart failure and teaching techniques. Dr. Zelis' professional achievements include at least 330 publications, service on the National Institutes of Health Experimental Cardiovascular Sciences Study Section and the National Grant Review Committee of the American Heart Association.

Past president of the American

ROBERT ZELIS

Federation for Clinical Research, Dr. Zelis has been elected to the Association of American Physicians and selected for inclusion in *Who's Who in America*, *International Who's Who in Medicine*, *American Men and Women in Science* and *Who's Who in the World*.

A colleague and former student noted, "His ability to simplify and integrate complex

concepts rather than having students memorize facts has served as a teaching model for me over the years. I have received a number of teaching awards for my Introduction to Medicine course by using his philosophy. Dr. Zelis has been the ultimate mentor. Most importantly, he has remained a trusted colleague and dear friend."

The Palmer Faculty Mentoring Award is named for Howard B. Palmer, senior associate dean of the Graduate School of the University from 1985 until his retirement in 1991.

Staff Excellence Award recognizes Russoniello's long-term leadership

Maria J. Russoniello, director of University Relations at Penn State Worthington, Scranton campus, is the 1997 recipient of the University's Staff Excellence Award.

The Staff Excellence Award is given to a member of the University staff who has demonstrated and practiced the philosophy of continuous quality improvement, team spirit and managerial excellence, and provided leadership in establishing a quality service orientation in the performance of assigned duties.

Under Russoniello's leadership over the past 10 years, the campus has initiated a model Alumni Mentor Program for Campus Scholars, an active Lion Ambassador program and numerous outreach programs involving alumni and students. Her work with the campus alumni society has resulted in significant growth in membership and the addition of chapters in neighboring counties. This year, the alumni soci-

MARIA J. RUSSONIELLO

ety donated \$30,000 toward the establishment of a campus occupational therapy lab, as well as supporting many other academic and student activities.

Russoniello also helped to nearly triple the number of campus-based endowed scholarships to 19. In addition, she has been instrumental in increasing annual pri-

vate support.

She also has been honored for her community work, having served as chair of the board of directors for Leadership Lackawanna. She is vice chair of the Easter Seal Society of Northeastern Counties, and on the board of the Greater Scranton Chamber of Commerce and other groups. She has involved many Penn State students in a number of community projects and charitable services, such as serving food in local soup kitchens or educating elementary students about people with disabilities.

Avery's diverse duties earn her inaugural Support Staff Award

Juliet A. Avery, staff assistant to the director of academic affairs at the Penn State Worthington-Scranton campus, is the first recipient of the University's new Support Staff Award.

A Penn State employee since 1973, Avery has held her current position for 13 years. In addition to her regular duties, she maintains 10 priority budgets and handles all related paperwork, while hiring, training and supervising all wage payroll personnel and work-study students in the academic affairs offices at the campus.

Avery has long taken an active role in campus functions, chairing the campus Diversity Committee (the first non-faculty member to do so), serving on various committees such as the Focus Group on Advising and the Focus Group on Staff Review and Development Plan. Even with such a busy schedule, she found time to earn an associate and B.S. degree in rehabilitation services education. In the past 10 years she

JULIET A. AVERY

has participated in more than 20 certificate programs aimed at self-improvement, time management and career track seminars.

Past president of the Scranton Business and Professional Women's Club, she also chaired the Inter-mentship Media Loan Program for the Pennsylvania State Educational Office Professionals. She currently is a board member

for the Friends of the Library and chairman of professional development for the Northeast Pennsylvania Counselors Association.

Since 1982, she has received nine awards for professional excellence, including the Scranton Business and Professional Women's Club 1989 Woman of the Year and the 1993 Penn State Outstanding Office Professional Award.

Avery has been a volunteer worker with the American Cancer Society, American Red Cross, Pennsylvania Junior Academy of Science and Scranton State School for the Deaf. She also sings in the choir for St. Patrick's Church.

Nelson recognized with new President's Award for Excellence

Murry Nelson, professor of education and American studies and coordinator of graduate education, curriculum and instruction, will receive the first-ever President's Award for Excellence in Academic Integration this year.

The award was developed to recognize excellence in the integration of teaching, research and service.

President, Graham B. Spanier's primary goal is for Penn State to be the leading university in the nation in the integration of teaching, research and service.

During his 22 years as a member of the College of Education faculty, Nelson has consistently demonstrated excellence by weaving into his teaching the threads of his research as well as his professional and personal experiences. Nelson's research has focused on social studies, education, citizenship and society. His profes-

MURRY NELSON

sional/personal experiences have included serving local schools by switching places with a local fourth-grade teacher, serving on the school board and taking part in a local citizens education group.

"I have always viewed the University and its environs as a community, and my role in the community was to help make it a better place to live and

work," Nelson said. "Thus, my teaching is focused on enabling my students to provide the same kind of service as teachers/citizens in their own communities. My teaching of social studies education courses and of American studies courses are designed with the same goal in mind — that is, how have others improved their schools, their communities and the United States, and how can we work, individually and collectively, to do so?"

Malovhr honored with Barash Award for disarming suspect in autumn shooting

Brendon D. Malovhr, the Penn State undergraduate student credited with disarming the suspected assailant in a Sept. 17, 1996 shooting at University Park, is the 1997 recipient of the Barash Award for Human Service.

The family of the late Sy Barash created the annual award in 1975. It recognizes a full-time member of the Penn State faculty, staff or student body who has contributed most, apart from assigned duties, to human causes, public service activities and organizations for the welfare of fellow humans.

Malovhr, an undergraduate stu-

BRENDON D. MALOVHR

dent in aerospace engineering and a University Scholar, was among 14 people honored in November by the Penn State Board of Trustees for acts of heroism and exemplary service during the September sniper attack on the HUB lawn when one student was killed and another wounded.

Malovhr was returning to his dorm from class at the time of the mid-morning shooting. His act of bravery is credited with saving the lives of others who would have been walking on the HUB lawn paths a few minutes later.

Hall overcomes obstacles to excel as student

Joseph D. Hall, a retired U.S. Air Force non-commissioned officer who graduated from Penn State in December 1996 with a bachelor's degree in history and a 3.9 grade-point average, will receive the University's Outstanding Adult Student Award this year.

Hall, who plans to continue his studies and work toward a master's degree in history at Penn State, is an exemplary student who loves his studies and thrives on research projects. After a successful career in the military, he is now succeeding as a student, despite the concurrent challenges of raising a family and making an 80-mile round-trip commute to campus.

Hall has "a sharp intellect, an appreciation for learning, and a

JOSEPH D. HALL

drive to absorb as much as possible," said one of his professors. As an undergraduate in a graduate-level seminar, the professor said, Hall was one of the more active participants, "confidently adding information and points of interest or arguing an issue with students of a more advanced academic standing. He expresses himself clearly and

he writes well."

Hall feels that his hard work and success have had a positive influence on his high-school-age stepdaughter, who will begin her studies at Penn State this fall. Hall also believes his example has inspired other veterans, "who initially considered returning to school impossible," to enroll in college.

Ten to receive Graduate Assistant Awards

Ten students will receive Graduate Assistant Awards for Outstanding Teaching during the student awards reception.

The award, jointly sponsored by the Graduate School and the Office of the Vice Provost and Dean for Undergraduate Education, recognizes graduate students for superior teaching in the areas of physical science and engineering, life sciences, social and behavioral sciences and the arts and humanities.

The selection committee judges nominees on several criteria including effectiveness of their presenta-

tions, use of clear and fair evaluation procedures, accessibility to their students and sensitivity to individual differences in the classroom.

The 1997 winners are: James Anthony, mathematics; Brett D. Guenther, electrical engineering; Elisabeth A. Hale, ecology; Heather Hayton, comparative literature; Eric D. Johnson, mathematics; Paula Maccini, special education; Kelly Marsh, English; Jennifer M. Ritter, curriculum and instruction; Bruce Skaggs, business administration; and John J. Wall, psychology.

Ewing earns Graduate Faculty Teaching Award

Andrew G. Ewing, professor of chemistry, is the 1997 winner of Penn State's Graduate Faculty Teaching Award.

The award recognizes tenured faculty members who have excelled both in teaching at the graduate level and in supervising thesis work of graduate students.

A specialist in analytical chemistry and neurochemistry, Ewing helped develop Penn State's current course structure for analytical chemistry graduate students shortly after joining the faculty in 1984. From 1990 to 1995 he was his department's assistant head for graduate education and instituted new procedures that doubled the annual number of applications from domestic students. Currently, he is co-director of the neuroscience option in the new Integrative Bioscience Graduate Degree Program.

Ewing fosters his students' communications skills through a pro-

ANDREW G. EWING

gram of monthly "marathon" meetings in his home, weekly topic meetings on campus and "brainstorming" mini-meetings when and where the situation warrants.

The meetings combined with his personal interaction and attention to each student make for a highly productive research group that depends on collective brainstorming and interaction while encouraging independence.

Ewing also has been honored with the National Science Foundation Presidential Young Investigator Award, an Alfred P. Sloan Fellowship, the Dreyfus Teacher-Scholar Award, the Swedish Medical Council Visiting Scientist Fellowship and the Penn State Faculty Scholar Medal in Physical Sciences and Engineering.

He is a cum laude graduate of St. Lawrence University and earned his doctorate at Indiana University, Bloomington.

Harvey is slated to receive Alumni Teaching Fellow Award

Paul Harvey Jr., associate professor of history and classics and ancient Mediterranean studies at the University Park campus, will receive the University's Alumni Teaching Fellow Award.

Established in 1985 to honor distinguished teaching and to encourage teaching excellence, the award was first presented in 1986 by the Alumni Association, the Undergraduate Student Government and the Graduate Student Government.

Harvey is described as a superb teacher of ancient history and a valued mentor by undergraduate students, graduate students and faculty colleagues alike. His colleagues, in particular, praise Harvey for his encyclopedic knowledge and his ability to link ancient texts and issues to problems of

PAUL HARVEY JR.

modern society — for instance, using the economic and social impact of disbanding the Roman army in the 2nd century B.C.E. to illuminate similar problems created in modern times when war ends or armies shrink.

"I don't know that I have a formal teaching philosophy," Harvey said, "but there are certain

principles I attempt to maintain and certain practices I attempt to follow in my teaching. These include maintaining rigorous academic standards in every class while engaging students in a friendly informal fashion that encourages discussion and questions. In my experience, neither a false camaraderie nor an authoritarian stance is conducive to an effective learning environment, whatever the size of the class."

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Thursday, April 3
 School of Music, 8 p.m., Recital Hall. Faculty Recital presents James Lyon, violin.

Friday, April 4
 Kern Graduate Commons, noon, Kern Lobby. Concert titled "K Jazz."

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "A Thousand and One Nights." For tickets, phone (814) 863-0255.

University Resident Theatre Company, 8 p.m., Pavilion Theatre. "The Lion in Winter" by James Goldman, directed by Christine Wilson, through April 12. For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. David Buechner, "Yamaha Concert Artist."

Saturday, April 5

■ Palmer Museum of Art, 11:30 a.m., Christoffers Lobby. Gallery Talk presents Katherine Benitz on "Italian Baroque Painting at the Palmer Museum."

School of Music, 2 p.m., Recital Hall. Student Recital presents Matt Alercia, trumpet, and Courtney Mundy, piano.

School of Music, 5 p.m., Recital Hall. Student Recital presents Kris Laird, tuba/euphonium.

School of Music, 8 p.m., Recital Hall. Student Recital presents Susan Bachman, trumpet.

Sunday, April 6

United Soul Ensemble, 5 p.m., Eisenhower Auditorium. "United With Praise."

School of Music, 8 p.m., Recital Hall. "Composer's Concert."

Monday, April 7

■ School of Music, 8 p.m., Recital Hall. Faculty chamber music concert, "Schubertian."

Tuesday, April 8

School of Music, 8 p.m., Recital Hall. Jazz II & III concert.

Wednesday, April 9

School of Music, 8 p.m., 122 Music II. Student Recital presents Melissa Harris, flute.

Thursday, April 10

School of Music, 8 p.m., Recital Hall. Mallet Ensemble with Dan Armstrong, director.

Friday, April 11

Kern Graduate Commons, noon, Kern Lobby. Concert titled "Bellamy's Trio."

Palmer Museum of Art, 2 p.m., Gallery Talk presents Robin Seymour on "The Stieglitz Circle."

School of Music, 8 p.m., Recital Hall. Student Recital presents Shawna Gluck, piano.

Saturday, April 12

Palmer Museum of Art, 11:30 a.m., Christoffers Lobby.

Gallery Talk presents Catherine Cilemi on "American Watercolors at the Palmer Museum."

School of Music, 2 p.m., 110 Music I. Children's Opera with Susan Boardman, director.

School of Music, 3 p.m., Recital Hall. Student Recital presents Erik Kirby, trombone.

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Cleo LaIne and The John Dankworth Group."

SEMINARS

Thursday, April 3
 Landscape Architecture, 8 p.m., Colonial Room. The Nittany Lion Inn. Carol Johnson on "Variety in Landscape Architecture."

Friday, April 4

Physics, 2:30 p.m., SS Osmond Laboratory. Tania Slawicki on "Shear-Induced Structures in Aqueous Micellar Surfactant Solutions."

Biology, 2:30 p.m., 8 Mueller Laboratory. Richard Amasino on "Regulation of Flowering and Senescence in Arabidopsis."

Accounting, 3:30 to 5 p.m., 333 Beam Business Administration. Ken S. Cavalluzzo on "Competition and Cost Allocation Changes in Government Agencies: Evidence on the Federal Reserve."

Physics, 4 p.m., SS Osmond Laboratory. Tania Slawicki on "Doing Small Angle Neutron Scattering at NIST: Working in a Scientific Milling Pot."

Philosophy, 4 p.m., The Nittany Lion Inn. Drucilla Cornell on "Freedom for Women?"

Waynick Lecture Series, 8 p.m., 112 Walker. Charles L. Hostler on "Fifty-Five Years of Progress in Meteorology and a Look at the Future."

At the Palmer

Male and Female Chi Wara Headdresses from the Bamana people of Mali, Africa, and other pieces from the Wood Collection of the Heard Museum will be on display at the Palmer Museum of Art on the University Park Campus beginning April 8. The pieces are part of the "Exotic Illusions: Art, Romance and the Marketplace" exhibit, which will be on display through June 15.

Monday, April 7

■ Penn State Catholic Faculty and Staff Fellowship, noon to 1 p.m., 212 Eisenhower Chapel. J. Porter on "The Saints of Naples."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Fred Charles on "Field Plot Comparison of Runoff and Soil Loss Effects for Four Tillage Treatments."

and Brian Leib on "Efficacy and Soil Distribution of Pesticide Applied via Drip Irrigation in a Vegetable Plasticiculture System."

Physics, 3:30 p.m., 339 Davey Laboratory. Farid Abraham on "Cracking a Tough Nut With a Big Computer: Studying Materials Failure Using Millions of Atoms."

■ Australia-New Zealand Studies Center and the Department of Political Science, 3:45 p.m., 102 Weaver. James Thompson on "Civil Rights and Constitutionalism: Contrasting Australian and American Experiences."

Biochemistry and Molecular Biology, 4 p.m., 110 Wartik Laboratory. Ralph S. Wolfe on "My Kind of Biology - Challenges of the Hunt."

Tuesday, April 8

■ Russian and East European Studies, 2:30 to 3:30 p.m., 124 Sparks. Frédérique Longuet-Marx on "The Political and Social Situation in the Northern Caucasus (Chechnya) Today."

■ Geoscience, 4 p.m., 112 Walker. Richard Peltier on "Dynamics of the Ice Age Earth."

Wednesday, April 9

Center for Women Studies, noon to 1 p.m., CWS Resource Room, 120 Boucke. Yvonne Raso and Shelley Hopkins on "Take Back The Night March."

Gerontology Center, 12:15 to 1:15 p.m., The Living Center, 110 Henderson. William J. Evans on "The Effects of Exercise and Aging on Body Composition and Functional Capacity."

Engineering Science and Mechanics, 3:35 p.m., 212 Hammond. Bradley A. Lerch on "Silicon Carbide/Titanium Composites."

Thursday, April 10

Gravity Center, 11:30 a.m., 339 Davey Laboratory. Charles Torne on "Quantum Fields at Any Time."

Ceramic Engineering and Sciences, 3 to 4 p.m., C213 Coal Utilization Laboratory. Linda Jones on "The Performance and Applications of Carbon: A Structural Perspective."

Physics, 3:30 p.m., 101 Osmond Laboratory. Farid Abraham on "Structure and Dynamics of Polymerized Tethered Membranes."

English, 7:30 p.m., 305 HUB. Carole Maso will read from her work.

Palmer Museum of Art, 7:30 p.m., Lipcon Auditorium. Jan Muhlet on "American Masters of the Watercolor."

Friday, April 11

The Institute for Policy Research and Evaluation, the Center for Health Policy Research and the Department of Health Policy and Administration, 1 to 2:30 p.m., The Living Center, Henderson. Cynthia Massie on "Long-Term Care: A Policy of Fragmentation."

CONFERENCES

Thursday, April 3

"Powder Metallurgy of Iron and Steel," The Nittany Lion Inn, through April 4.

Friday, April 4

"Communication in the Middle Ages," The Nittany Lion Inn, through April 5.

Pennsylvania Awareness Leadership Conference, The Penn State Scenic, through April 6.

Saturday, April 5

Communications, 9 a.m. to 4:30 p.m., Thomas Building. Sally Jackson on "Teaching and Learning with Technology Symposium."

Monday, April 7

"Enhancing Learning Through Cooperative Offering," The Penn State Scenic, through April 8.

Tuesday, April 8

Visible Emissions Training, The Penn State Scenic, through April 9.

Hewlett-Packard 5890 Maintenance, The Penn State Scenic, through April 9.

Wednesday, April 9

"Chart Your Course," The Penn State Scenic, through April 10.

Thursday, April 10

Pennsylvania Juvenile Correction Education Conference, The Penn State Scenic, through April 11.

Friday, April 11

Cocoa Research Conference, The Nittany Lion Inn, through April 12.

International Symposium on Confessionary Science, The Nittany Lion Inn, through April 12.

"Children's Literature Matters," The Penn State Scenic, through April 12.

Saturday, April 12

Zoning Law and Administration, The Penn State Scenic.

EXHIBITS

HUB Art Alley Panels

Oil and print exhibit by Amy Jane Whitney and Darren R. Gier, through May 4.

HUB Browning Gallery

"Photographs of Australia" by Richard Woldendorp, through April 27.

HUB Formal Gallery

Mixed media works by Howard Brooks, through May 4.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Kern Exhibition Area

Photographic work of David Driscoll, through April 6.

North Halls

Paintings by Jodi Ruffner, through April 30.

Palmer Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 15.

"Exotic Illusions: Art, Romance and the Marketplace," through June 15.

Zoller Gallery

School of Visual Arts, "MFA Thesis Exhibitions," drawing/painting by Thomas Birker, through April 15.

■ Reflects an international perspective.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://cac.psu.edu/calendar/>

Leaves of Absence

Leaves of absence are granted for purposes of intensive study or research that will increase the quality of the individual's future contribution to the University. The following leaves of absence have been approved:

College of Agricultural Sciences

Marc D. Abrams, associate professor of forest ecology, to conduct research and lecture in the Hokkaido Japan Overseas Guest Researcher's Invitation Program.

Thomas H. Bruening, associate professor of agricultural and extension education, to serve as a visiting scholar and develop curricula materials to teach Chinese agricultural educators new methods of instruction at the Food and Agricultural Organization in Rome.

Harry A. Carey, professor of agricultural and extension education, to study cultural differences in educational methodology and to lecture to faculty on improving their ability to teach effectively at the University of Zimbabwe.

Nancy E. Crago, extension agent in Allegheny County, to complete course work and research for a doctoral degree in agricultural and extension education at Penn State.

James W. Dunn, professor of agricultural economics, to study the effects of different agricultural policies when trade restrictions are reduced, Queens University of Belfast in Northern Ireland.

Stephen A. Ford, associate professor of agricultural economics, to develop new methods of teaching agribusiness management and to acquire additional research skills to apply to the economics of livestock-forage systems, Texas A&M University.

Martha R. Gregory, associate extension agent in Lebanon County, to pursue graduate study in training and development at Penn State Harrisburg.

Karen S. Hack, extension agent (Franklin County), to complete course work for a master's degree in training and development at Penn State Harrisburg.

Jayson K. Harper, associate professor of agricultural economics, to study the economic evaluation of alternative pest management options at the University of Queensland in Brisbane, Australia.

Leif Jensen, associate professor of rural sociology, to study poverty and children's labor force participation through the quantitative analysis of data from Chile, Peru and Mexico, at the University of Bergen in Bergen, Norway.

Mary H. Keihl, associate extension agent (Susquehanna County), to complete course work for a master's degree in interdepartmental human resources and family sciences at the University of Nebraska-Lincoln.

Nick T. Place, county extension director (Armstrong and Indiana counties), to complete course work for a doctoral degree in agricultural education at Penn State.

Robert C. Pollock, county extension director (Armstrong and Indiana counties), to complete course work for a master's degree in adult education.

Jeanine R. Richlin, associate extension agent (Sullivan County), to complete course work for a master's degree in interdepartmental human resources and family sciences at the University of Nebraska-Lincoln.

Carole L. Toubakar, associate extension agent (Beaver and Butler counties), to complete course work for a master's degree in interdepartmental human resources and family sciences at the University of Nebraska-Lincoln.

College of Arts and Architecture

Albert A. Anderson Jr., associate professor of art education, to conduct research and prepare a book manuscript on the history of American craft education.

Kim Cook, associate professor of music, to record a recital of cell literature performed at Carnegie Hall and to study 20th-century literature with cellist Janos Starker at Penn State and Indiana University.

George Dickie, professor of landscape architecture, to study and record compositional design aspects of key urban spaces in Florence, Frascati, Rome and Siena, Italy.

Kelleann Foster, associate professor of landscape architecture, to conduct post-development evaluation of the Visual Interactive Code and to participate in teaching and research opportunities at the Royal Melbourne Institute of Technology and the University of Adelaide in Australia.

Daniel R. Jones, professor of landscape architecture, to develop a set of principles and a catalog of example applications for the integration of human activity and wild and scenic rivers.

Loukas N. Kalisperis, associate professor of architecture, to conduct research for a book on a method of teaching architectural design that integrates computers into the conceptualization phase of the making of architecture at the National Technical University of Athens.

James T. Kalsbrek, associate professor of architecture, to conduct research and complete a book on mnemonic design and its application to the understanding of architectural theory, history and design at the Warburg Institute in London and in Rome.

Robert E. Leonard, professor of theatre arts, to establish mutually beneficial relationships with several notable professional playwright organizations.

Romolo Martemucci, associate professor of architecture, to conduct research for a book on the cartography of the Early Renaissance in Italy.

Dale E. Monson, associate professor of music, to write a book on a major work by Johann Adolf Hasse, Venice, Italy.

Christopher P. Staley, associate professor of art, to develop a new body of ceramic and photographic art work at the Clay Studio in Philadelphia.

Keith P. Thompson, professor of music education, to study exemplary practices in the teaching of middle and junior high school general music.

The Smeal College of Business Administration

Peter B. Everett, associate professor of marketing, to study how cities are marketed in Seattle.

Marvin E. Goldberg, the Irving and Irene Bard professor of marketing, to conduct cross-cultural research on children's and adolescents' role in the Asian marketplace, University of Science and Technology in Hong Kong.

Scott A. Snell, associate professor of business administration, to study strategic human resource management within the United States and abroad in Australia and New Zealand.

Eric W. Stein, associate professor of management science and information systems at Penn State Great Valley, to study the design, development and marketing of new software by small to mid-sized companies at the Prague University of Economics, Budapest University for Economic Sciences and Manchester Business School.

James B. Thomas, associate professor of management, to develop a theory of strategic learning of how managers learn; to identify barriers to strategic-focused learning; and to develop prescriptions for the learning aspects of strategic management at IBM in Chicago.

Commonwealth Educational System

Alfred A. Actor, professor of physics at Berks-Lehigh Valley College, to study quantum field theory at the University of Heidelberg in Germany and the University of Capetown in South Africa.

Barbara Cantalupo, associate professor of English at Berks-Lehigh Valley College, to expand two formerly published essays to book-length chapters for a study of "paradoxical insignificance" in the writings of Hawthorne, Melville and Poe.

Margaret R. Christian, associate professor of English at Berks-Lehigh Valley College, to write chapters for a book-length study of 15th- and 16th-century English sermons.

Ivko M. Dimitric, associate professor of mathematics at the Fayette campus, to study finite-type submanifolds and methods of calibration at Michigan State University and the University of Pennsylvania.

Marin M. Goldberg, associate librarian at the Beaver campus, to study the historical foundations of the Carnegie Libraries of Pittsburgh at the Heinz Historical Center in Pittsburgh and the Carnegie Archives in New York.

Wendy N. Greenberg, associate professor of French at Berks-Lehigh Valley College, to study the autobiographical writings of the soldier-writer at the Biblioteca Nacional de Mexico.

Charles R. Hackenberg, associate professor of English at Penn State Altoona, to complete research and begin writing a literary novel.

Karen L. Hill, associate professor of kinesiology at the Delaware County campus, to complete three monographs for publication, each examining a different theoretical approach to sport psychology.

Marilyn D. Maltese, associate professor of speech communication at the Worthington-Scranton campus, to complete work on a book dealing with the teaching of sign language in elementary education in the United Kingdom.

James E. May, associate professor of English at the Duflois campus, to prepare critical editions of Tobias Smollett's multi-volume works on the history of England.

Paul A. Orlov, associate professor of English at the Delaware County campus, to study connections between Rebecca Harding Davis' 1961 brief novel *Life in the Iron Mills* and Eugene O'Neill's 1922 play *The Hair*; and to complete critical studies of several works of American fiction writers Fitzgerald, James, Melville and Wharton, for a book-length manuscript.

Leaves

Continued from page 16

Commonwealth Educational System (cont'd.)

Lois Rubin, associate professor of English at the New Kensington campus, to study coming of age novels (Bildungsroman) of Jewish-American women.

Margaret L. Signorella, professor of psychology and women's studies at the McKeesport campus, to conduct a meta-analysis of children's gender-related preferences.

Suzanne Stutman, professor of English, American studies and women's studies at Penn State Abington, to edit and write an introduction for an unpublished manuscript by Thomas Wolfe, "A Passage to England," at Harvard University, Chapel Hill, N.C., and Philadelphia.

Girija Subramanian, associate professor of chemistry at the Hazleton campus, to conduct collaborative research on supra molecular nonlinear optical materials at the University of Strasbourg in France.

William S. Trencher, professor of physics at the Mont Alto campus, to conduct collaborative research with an international team of scientists on elementary particle physics at the German Electron-Synchrotron Laboratory in Hamburg, Germany.

Harold J. Webster, associate professor of biology at the DuBois campus, to develop a computerized database on the mosses of Pennsylvania at the Missouri Botanical Garden in St. Louis and various sites in Pennsylvania.

Stephen M. Zemyan, professor of mathematics at the Mont Alto campus, to study the omitted arc of a support point for the class S and to complete a textbook on an introduction to the classical theory of integral equations at Lehigh University.

College of Earth and Mineral Sciences

Christopher J. Bise, Centennial Professor of mining engineering, to study curricular and instructional issues related to occupational health and safety at Johns Hopkins University.

David J. Green, professor of ceramic science and engineering, to study distance education techniques used for materials engineering; aid in revision of a course on fracture; and consult on research programs concerning mechanical behavior of ceramics at Open University in the United Kingdom.

John R. Hellmann, associate professor of ceramic science and engineering, to develop oxide fiber reinforced oxide composites for gas turbine combustors in collaboration with researchers at the German Aerospace Research Establishment in Köln, Germany.

College of Education

Glendon W. Blume, professor-in-charge of mathematics education and associate professor of education, to study the implementations of technology-intensive secondary school mathematics curricula.

Daniel D. Hade, associate professor of education, to study the changes in children's book publishing since 1969.

James K. McAfee, associate professor of special education, to study police officers' reactions to crimes involving individuals with mental retardation and to develop a training curriculum designed to improve police officers' responses to individuals with mental retardation at Edith Cowan University in western Australia.

Madhu S. Prakash, professor-in-charge of educational theory and policy and associate professor of education, to study indigenous knowledge systems in India and Mexico.

James L. Ratcliff, director and senior scientist, the Center for the Study of Higher Education and professor of education, to study curriculum design and development in higher education, the use of technology in university teaching and the role of policy formulation in the governance of higher education.

John Salvia, professor of special education, to study the literature on educational reform and the potential impact on special education of various proposals to reform education curricula and teaching methods.

David W. Saxe, associate professor of education, to conduct collaborative research on educational issues at the Hudson Institute and also in Washington, D.C.

Thomas D. Yawkey, professor of education, to document the origins and development of a 15-year national-level cultural and language minority project and to develop a new area of expertise in distance education for English-as-a-foreign-language in third world early childhood and family education teacher programs.

College of Engineering

David A. Anderson, professor of civil engineering, to conduct collaborative research on asphalt cement for highway construction in Lyon, France.

James K. Breakall, professor of electrical engineering, to study antenna and electromagnetics at the National Astronomy and Ionosphere Center in Arecibo, Puerto Rico; Cornell University; the Center for Remote Sensing in McLean, Va.; and Bangalore and Calcutta, India.

Lance R. Collins, associate professor of chemical engineering, to conduct collaborative research in experimental work related to combustion in Orleans, France, and to conduct collaborative research in computational fluid mechanics at Los Alamos National Laboratory.

George S. Dulikravich, associate professor of aerospace engineering, to conduct collaborative research on the mathematical formulation of inverse design and optimization problems at the Institute for Fluid Mechanics in Goettingen, Germany.

Randall M. German, Brush Chair Professor in materials, to study micromechanical modeling of sintering and the control of materials processing conditions for net shape fabrication of precise engineering materials and structures at the University of California, San Diego.

Alireza Haghighat, associate professor of nuclear engineering, to conduct collaborative research on calculations on an experimental facility at the Belgium Nuclear Research Center.

Iam-Choon Khoo, professor of electrical engineering, to conduct collaborative research on theoretical and experimental studies of liquid crystals and nonlinear optical phenomena at the University of Ancona, Italy, and the National Research Council in Ottawa.

Budugur Lakshminarayana, Evan Pugh professor of aerospace engineering, to conduct collaborative research on transonic turbomachinery at Kyushu University in Japan.

Byung-Lip Lee, associate professor of engineering science and mechanics, to study new hybrid composite materials at Wright-Patterson Air Force Base in Ohio, and the Natick Research, Development and Engineering Center in Natick, Mass.

Lyle N. Long, associate professor of aerospace engineering, to study and teach high-performance computing at the University of Edinburgh.

Michael M. Micci, associate professor of aerospace engineering, to apply molecular dynamics modeling to supercritical fluid phenomena in combustion chambers at Edwards Air Force Base in California and to write a textbook on electric propulsion.

Robert M. Owens, professor of computer science and engineering, to study computer vision, image processing and parallel architecture at the University of Pavia, Italy.

Jonathan Phillips, professor of chemical engineering, to conduct collaborative research in catalysis at Ben-Gurion University of the Negev in Israel.

Robert J. Santoro, professor of mechanical engineering, to study gas turbine engine and rocket combustion engineering at Princeton University.

John M. Tarbell, professor of chemical engineering, to conduct collaborative research on the principles and methods of modern molecular biology at the Harvard Medical School and Massachusetts General Hospital.

H. Randolph Thomas, professor of civil engineering, to study labor productivity at the University of Zagreb in Croatia.

Ralph L. Webb, professor of mechanical engineering, to conduct collaborative research on condensation coefficients for heat transfer at the National Institute for Standards and Technology in Gaithersburg, Md.

Greville K. Yull, professor of architectural engineering, to study computer modeling of air flow and pollutant transport within large buildings at the Building Research Establishment in Watford, England, and to study the simulation of energy transport in buildings at the University of Strathclyde in Glasgow, Scotland.

Penn State Erie, The Behrend College

David T. Dorian, associate professor of accounting, to serve in a "faculty in residence" program at Monahan and Monahan, certified public accountants, in Erie, Pa.

Faisal K. Fadul, associate professor of electrical engineering, to study signal recognition and supervision and pulse-to-tone conversion.

Robert E. Farrell, associate professor of engineering, to complete a doctoral degree in plastics engineering.

John K. Gamble, professor of political science and international law, to study new information technologies and international law at the University of New Brunswick in Canada.

Kathryn Willis Wolfe, associate professor of French, to complete the third and final volume of writings on unpublished letters written between 1650 and 1654 by Christophe Dupuy in Rome with his brothers, Jacques and Pierre, in Paris.

Chester I. Wolford, professor of business and Economics, to compile Japanese business short stories for a book project and to gather information for a new course on Japanese leadership.

Penn State Harrisburg

Omid Ansari, associate professor of engineering, to write a textbook and a laboratory manual on control system analysis and design.

Robert J. Bresler, professor of public policy, to complete a book on the impact of cultural issues upon the politics of post-1945 America and the consequent tension that arose between the dominant and adversary culture.

Krishna S. Dhir, professor of business administration, to study the intellectual capital created through technology transfer in organizations.

Richard M. Fox, professor of psychology, to develop strategies for ensuring the long-term maintenance of the successful effects of behavior change programs.

Leaves

Continued from page 17

Penn State Harrisburg

Barry Kanpol, associate professor of secondary foundations, to complete a manuscript on the ethics of critical pedagogy.

Ching-Chung Kuo, associate professor of operations management, to study the international dimension of operations management.

Glen A. Mazis, associate professor of humanities and philosophy, to complete two book-length manuscripts and conduct research on a third book project, all dealing with the philosophical bases of postmodernism.

James F. Rooney, professor of sociology, to write a book analyzing the controlling social institutions for alcohol use in Spain and contrast alcohol use in Spain with the United States.

College of Health and Human Development

Cheryl A. Dellasega, associate professor of nursing, to study long-term medication use in Swedish elderly in Linköping, Sweden.

Michael J. Rovine, associate professor of human development, to complete a book on statistical solutions of problems related to developmental processes and longitudinal data at the University of Amsterdam and the University of Manitoba.

College of the Liberal Arts

Michael R. Baye, professor of economics, to conduct collaborative research on the reform of institutions that govern the patent process, the tort system, and lobbying activities at the Tinbergen Institute in The Netherlands, Purdue University and in Washington, D.C.

Michael B. Berkman, associate professor of political science, to develop an institutionally based theory of how states respond to the newly emerging federalism.

Thomas J. Bernard, professor of criminal justice and sociology, to study recent theory and research on men and masculinity, particularly within sociology and psychology, and develop a theory that relates masculinity to crime within the context of American society.

Karen L. Bierman, professor of psychology, to complete writing journal articles on the findings from data collected from a five-year project that assesses strategies for preventing children's conduct disorders.

Patricia Draper, professor of anthropology and human development, to study and write on the Khoisan hunting and gathering peoples of southern Africa at the University of Edinburgh.

Arthur E. Goldschmidt Jr., professor of Middle East history, to study the biographical dictionary of Egypt since 1750 in Cairo, London and Paris.

Thomas A. Gresik, associate professor of economics, to study the tax regulations of the United States and other developed countries in order to develop an accurate model of how countries compete for foreign direct investment via their tax codes at the World Bank and the U.S. Treasury in Washington, D.C.

Kathryn Hume, distinguished professor of English, to study and write a book that will examine control-oriented theory and apply it to a group of writers who explain the human condition in these terms.

Robert D. Hume, Edwin Erle Sparks professor of English, to do archival research on the finances of theatre and operas in London during the 18th century.

J. Philip Jenkins, professor of religious studies and history, to study and write on the political and social impact of the Cold War on the state of Pennsylvania, c. 1945-56.

Christopher L. Johnstone, associate professor of speech communication, to complete a book on classical rhetorical theory.

Kang Liu, associate professor of comparative literature and Chinese, to write a book-length study comparing the cultural upheavals that took place both in China and the West in the 1960s, Beijing University.

Leon F. Lyday, professor of Spanish, to edit two books and write essays on Columbian literature and culture and Latin American theater.

Melvin M. Mark, professor of psychology, to write a book and review a paper on the application of realist philosophy to social science research methods, at Georgia State University.

Benedicte M. C. Monicet, associate professor of French and women's studies, to conduct research for a book on rare and unavailable books by 19th-century French women authors of children's literature at the Bibliothèque Nationale in Paris.

On-cho Ng, associate professor of history, to complete archival research and begin writing a book on lay Buddhism and Confucian culture in 18th-century China.

Robert N. Proctor, professor of the history of science, to conduct research for a book joining two previous topics, an analysis of the Nazi war against cancer.

James M. Rambeau, associate professor of English and American studies, to conduct research with a focus on the public memory of the Civil War.

Anne C. Rose, associate professor of history and religious studies, to write a historical monograph on the religious lives of interfaith families in the 19th century.

David Shapiro, associate professor of economics and women's studies, to complete work on a book dealing with women's education, employment, fertility and household economic and demographic behavior in Kinshasa, Zaire; at the University of Kinshasa; and the New Economic School in Moscow.

Alan M. Sica, professor of sociology, to explore for book features of current social and cultural theory which benefit or detract from contemporary social research.

Robert M. Stern, distinguished professor of psychology, to study the similarities and differences in the psychophysiology of nausea when caused by different factors such as motion sickness, cancer chemotherapy and diabetes at the University of Rochester, Heinrich Heine University, University of Aachen and the Athens Naval and Veterans Hospital.

Allan I. Stoekl, professor of French and comparative literature, to study and write a book of critical essays on capital punishment in literature.

Marylee C. Taylor, associate professor of sociology, to compile data sets that will explore attitudes about race, immigration and multiculturalism, and to begin a new edition of a classic work of social psychology at the University of California, Santa Cruz.

College of Medicine

John F. Cardella, chief of cardiovascular/interventional radiology and professor of radiology, to serve as a physician reviewer of Food and Drug Administration approval requests and to gain familiarity with the organization, reporting channels, ultimate responsibility for decisions and inner workings of committees at the FDA in Washington, D.C.

David W. Knutson, professor of medicine, to conduct collaborative research on epidemiology and health systems and outcomes research by developing cost-effective mechanisms for treating hypertension at the Lehigh Valley Hospital and the Department of Veterans Affairs Medical Center in Lebanon, Pa.

Susan E. Lederer, associate professor of humanities, to research and write a social and cultural history of blood donation and transfusion in 20th-century America at the Urban Archives, Temple University, Philadelphia, and the State Library in Harrisburg.

Cara-Lynne Schengrund, professor of biochemistry and molecular biology, to study computer modeling of protein-carbohydrate interactions and of procedures for the synthesis of novel carbohydrates at the National Institutes of Health in Bethesda, Md.

Robert C. Vannucci, professor of pediatrics, to prepare a competitive renewal program project research proposal to be submitted to the National Institute of Child Health and Human Development and to develop an expertise in analytical procedures.

Eberly College of Science

David L. Allara, professor of materials science and professor of chemistry, to study advanced concepts and devices for chemical and biosensing at the Swedish National Center for Biomaterials at Linköping University and the University of Uppsala in Sweden.

George E. Andrews, Evan Pugh professor of mathematics, to study exactly solved models in statistical mechanics at Melbourne University in Australia.

Jean E. Brenchley, professor of microbiology and biotechnology, to develop methods for studying proteolytic enzymes and to establish future research projects at North Carolina State University.

Robin Ciardullo, associate professor of astronomy and astrophysics, to use the Hobby-Eberly Telescope to launch a program on galaxy dynamics at the University of Texas and Kitt Peak National Observatory in Tucson, Ariz.

Gregory K. Farber, associate professor of biochemistry, to conduct a sequence analysis of families of proteins at the Fred Hutchinson Cancer Research Center in Seattle.

Gary L. Mullen, professor of mathematics, to study polynomials over finite fields and their applications to information science at Macquarie University in Sydney, Australia.

Susan A. Murphy, associate professor of statistics, to develop two areas of statistical theory, transformation models and methodology for prevention research, at Harvard University and the Free University in Amsterdam.

Calyampudi R. Rao, professor and holder of the Eberly Chair in statistics, to conduct collaborative research on theoretical statistics at the Indian Institute of Management and Indian Statistical Institute in Calcutta.

Ming Ting, professor of biochemistry and molecular biology, to study how cells which use oxygen radicals to break down aromatic polymers are themselves protected from the deleterious consequences, National Institutes of Health in Bethesda, Md.

Boris Tsypen, professor of mathematics, to work on several research projects in noncommutative differential geometry and related topics at the University of Copenhagen and the University of Strasbourg.

William C. Waterhouse, professor of mathematics, to prepare an English translation of the French, German and Latin writings of Carl Friedrich Gauss on number theory and algebra.

The University Libraries

Diane Zabel, social science reference librarian, to research and co-author a reference book on workplace flexibility.

Pennsylvania's wine industry is full of potential

By ESTON MARTZ

College of Agricultural Sciences

Research under way in the College of Agricultural Sciences suggests that Pennsylvania's vineyards and wineries will expand in the next five years.

The state has supported a small wine industry since the early 1970s, when the Pennsylvania Farm Winery Bill allowed for the establishment of wineries, which currently have a production limit of 200,000 gallons annually. The law also permits the operation of retail sales locations and direct sales to businesses and individuals.

"The state's vineyard and winery industry is vibrant and growing," said Stephen Smith, associate professor of agricultural economics. "In the 1980s, an average of 2.3 vineyards and 1.1 wineries were started per year. In the 1990s, the average was 2.7 vineyards and 1.5 wineries started per year. It's still a small industry, but it's becoming very well established and is carving out an important niche in the state's agricultural economy."

Smith, Jayson Harper, associate professor of agricultural economics,

Stephen Smith, associate professor of agricultural economics, left, and Joe Carrol of Mount Nittany Winery examine some white wine.

Photo: Greg Grieco

and Barbara Goulart, associate professor of horticulture, surveyed Pennsylvania vineyard and winery owners about production costs and business characteristics, markets and marketing problems, and the future of the wine industry in Pennsylvania.

"Wineries are very optimistic, with 79 percent of the respondents expecting to increase production in the next five years," Smith said. "Seventy-eight percent of the wine mak-

ers also expect on-premise retail sales to increase. Between 52 percent and 62 percent expect sales to increase through the Pennsylvania Liquor Control Board, retail expansion of premises, direct sales to hotels and restaurants, and food expositions."

Respondents also were asked about Pennsylvania's winery laws. "More than 64 percent of respondents agreed or strongly agreed that the law should be changed to allow wine sales in grocery stores,

with only 26 percent disagreeing," Harper said. "About 80 percent also agreed or strongly agreed on instituting a 1-cent per bottle tax on all wine sold within Pennsylvania to support wine research, extension and promotional programs."

Pennsylvania ranks fourth nationally in total grape production, behind California, Washington and New York. Most of the state's acreage is in Concord grapes for juice, not wine grapes.

Team shows "smart" vibration absorber possible

A Penn State university team has shown that it is possible to build a lightweight, "smart" vibration absorber that could track the changing frequencies of noise and vibration and continuously re-tune itself to control them.

Such a device could quiet industrial machinery and consumer products, such as cars and home appliances. Applications in planes, helicopters, satellites and space platforms promise increased safety as well as enhanced performance and comfort.

Christopher L. Davis, doctoral candidate; George A. Lesiute, associate professor of aerospace engineering; and Jeffrey Dosch of the AVC Instrumentation Division of PCB Piezotronics Inc., Depew, N.Y., conducted the study.

The AVC Division of PCB Piezotronics Inc., with assistance from Penn State's Center for Acoustics and Vibration (CAV) and NASA support, has developed an absorber based on a thin disk of piezoelectric ceramic, or piezoceramic. The disk acts as part of a "spring" that, when placed between the vibrating structure and a dense mass, can counter with a force that cancels the structural motion.

Gary H. Koopmann, professor of mechanical engineering and CAV director, participated in the device's development.

Experiments show the natural frequency of the piezoceramic absorber could be predictably shifted by more than 5 percent, enough to accommodate typical variations in aircraft engine speeds during cruise.

Scientist heats up research on produce package humidity

By JOHN WALL

College of Agricultural Sciences

When it comes to improving the quality and shelf life of packaged fresh mushrooms, it's not the heat, it's the humidity, said a food scientist in the College of Agricultural Sciences.

The shelf life of the common button mushroom is limited to three to five days on a store shelf, said Ramaswamy Anantheshwaran, associate professor of food science. Typically, mushrooms are packaged in containers covered by plastic film with air holes.

Anantheshwaran has completed research on two mushroom packaging methods. One project focused on

modifying the oxygen concentration within individual wrapped packages, and the other sought ways to maintain the humidity within single wrapped packages.

Anantheshwaran's idea to control oxygen content within mushroom packages evolved from research on controlled atmosphere storage, in which precisely controlled gases are used to keep produce from ripening or spoiling.

"Controlled atmosphere storage has been in use since the 1930s," Anantheshwaran said. "If we can maintain the atmosphere inside the package within a certain range of factors, we can improve the quality of mushrooms and other produce."

In the laboratory, Anantheshwaran

found that controlling oxygen within a package worked well. Unfortunately, the package had to be modified at a relatively constant temperature, a factor that cannot be guaranteed on the mushrooms' trip to market.

Anantheshwaran then turned to humidity. "When mushrooms are harvested, more than 90 percent of their weight is water," he said. "Mushrooms also don't have a skin like other types of produce, and give off much more water vapor."

This vapor can collect within the package and cause discoloration and growth of bacteria. Humidity within produce packaging is a common problem that can affect the appearance and safety of the food product. Anantheshwaran said that excess

water causes button mushrooms to brown or yellow and also fosters the growth of harmful microorganisms.

Anantheshwaran is currently testing several commercial available moisture adsorbents to regulate moisture within food packaging. Adsorption occurs when thin layers of molecules adhere to the surface of solids or liquids, much like odors are adsorbed by baking soda.

According to Anantheshwaran, the modified humidity packaging improved the maturity of the mushrooms, effectively increasing the shelf life for the product. Anantheshwaran is currently looking into a package design that would incorporate moisture adsorbents into the structure of the package.

ATHLETICS

A regular column provided by Intercollegiate Athletics

Coaches vs. Cancer golf outing is May 23

Nittany Lion basketball Coach **Jerry Dunn** will be host for the first "Tee Off on Cancer" golf outing, with proceeds being donated to the Coaches vs. Cancer program. The event is Friday, May 23, at the Penn State Blue Course and is sponsored by the Penn State Men's Basketball Club.

Joining Dunn will be past and present Penn State basketball and football players. The scramble tournament is a qualifying event for the American Cancer Society's Golf Championship. Qualifiers will be eligible to play in the state playoffs at the Hershey Country Club in September, with the winner of that tournament advancing to the national championship.

For more information, please contact **Tere Rill** of the American Cancer Society at (814) 238-8908.

Student-athletes make the grade

Four Penn State student-athletes have been selected to the 1996-97 GTE Fall/Winter Academic All-District At-Large Teams. The quartet includes: **Sebastian Gouveneur**, soccer, 3.66 GPA in chemical engineering; **Joe Roemer**, gymnastics, 3.77 in finance; **Kim McGreevy**, women's track and cross country, 3.75 in accounting; and **Karen Van Tassel**, swimming, 3.88 in pre-medicine.

New golf pro

Doug Wert, a 1980 graduate of Mississippi State, has been named head golf professional at Penn State. A Class "A" member of the Professional Golf Association of America, Wert has served as the head professional at TPC Southwind in Memphis, Tenn., for the past three years. His resume also includes experience as assistant pro at TPC Sawgrass in Point Verde, Fla.; TPC Eagle Tree in Coral Springs, Fla., and at Kingwood, Texas; Country Club. During Wert's tenure at Southwind, the club was recognized in 1995 as the "Most Improved TPC Facility."

For the latest information on Penn State sports, be sure to visit the official Intercollegiate Athletics site on the Web: <http://www.psu.edu> (click on Sports).

For the Record

The topic of tonight's Bracken Lecture by **Carol R. Johnson** is "Variety in Landscape Architecture." A headline on page 11 of the March 27 *Intercom* listed an incorrect topic.

She's flying

Sue Challis, master's student in kinesiology, works out on the trampoline in Recreation Building on the University Park campus. The trampolining champion is from Great Britain and will be representing her country in Australia at the upcoming World Cup Games.

Partings

Russell C. Brignano, associate professor of English at Penn State Beaver campus, from Sept. 1, 1975, to Jan. 1.

Harold E. Cheatham, department head for counselor education, counseling psychology and rehabilitation services, and professor emeritus of education, College of Education, from Sept. 1, 1982, to Feb. 1.

Can V. Dang, environmental health worker at The Hershey Medical Center, from Nov. 21, 1977, to Jan. 17.

David L. Dunbar, extension agent, College of Agricultural Sciences, from Dec. 17, 1973, to Dec. 31, 1996.

Teresa Hubler, food preparer B, Housing and Food Services, from April 17, 1983, to Jan. 2.

Jon David Johnson, receiving clerk at The Hershey Medical Center, from April 23, 1979, to Feb. 1.

Sarah E. Lighty, animal caretaker Cat The Hershey Medical Center, from June 2, 1980, to Dec. 21, 1996.

Shu-Yen Liu, senior research assistant, agronomy, College of Agricultural Sciences, from Aug. 16, 1976, to Jan. 1.

Eva I. Orndorf, janitorial worker, Office of Physical Plant, from Oct. 25, 1981, to Jan. 3.

William S. Pierce, Evan Pugh professor emeritus of surgery at The Hershey Medical Center, from June 1, 1970, to Feb. 8.

Spanier to testify on federal government's technology initiative

President **Graham B. Spanier** is scheduled to testify before the U.S. House Science Committee April 9 on the federal government's information technology initiative.

Spanier is chairman of the Commission on Information Technology of the National Association of State Universities and Land Grant Colleges.

Penn State leads a group of about 100 universities developing "Internet II" — a new, faster Internet. Spanier said Friday he wasn't sure what questions legislators would ask.

Permit No. 1

University in top 10 nationwide for doctoral degrees awarded

Penn State was ranked No. 1 in Pennsylvania and ninth among American universities in the number of doctoral degrees awarded in 1995 by the National Research Council in a survey of earned doctorates released recently.

Penn State awarded 585 doctorates in 1995, up from 528 in 1994 when the University ranked 13th nationally.

According to the NRC survey, engineering students earned the most doctorates, 160, at Penn State in 1995, followed by students in education, 109, and the biosciences, 66.

Rodney A. Erickson, dean of the Graduate School and vice president for research, noted that the rankings come at a time when Gov. Tom Ridge has declared this week as Graduate and Professional Student Appreciation Week.

"It's an appropriate time to recognize not only the record numbers who have been graduated from Penn State in recent years, but also the important contributions they make to the University," Erickson said. "Doctoral and master's candidates are productive partners in both the research and teaching activities at Penn State."

Graduate students often teach or lead recitation sections of undergraduate courses under the guidance of faculty members. A

Practical applications

Doctoral candidate Christopher L. Davis was part of a team that recently showed that it is possible to build a lightweight "smart" vibration absorber that could track the changing frequencies of noise and vibration and continuously re-tune itself to control them. Such a device could quiet industrial machinery and consumer products. Applications in planes, satellites and space platforms promise increased safety and enhanced performance.

Photo: Greg Grieco

dozen doctoral and master's candidates were honored for outstanding teaching at the annual University awards program April 6. The winners represented all of the areas of learning at the University and had been singled out by their students as well as their professors.

All doctoral students are required to complete a dissertation that advances knowledge in their field of study and which involves research on real, often practical, solutions to problems. Recent doctoral dissertations have included the development

of a statistical test for cancer risk; a study of low-intensity exercise training for older adults; a probe of the regulation of organized crime in New York state; a survey of the images of the U.S. in the French press; and an award-winning study of termite risk assessment, to name only a small sampling.

Penn State currently offers 98 programs of study and research leading to the doctoral degree. The biggest share of doctoral students outside the University Park campus are registered in the College of Medicine in Hershey.

Undergraduates to exhibit their research

Why do battered women tend to stay with their abusers as long as they do? How may we determine the possibility of life on other planets? How can the auto industry protect your investment from the ravages of winter road salts?

This is but a sampling of the record 87 undergraduate research exhibits which will be on display in the HUB Ballroom on the University Park campus during the Sixth Annual Undergraduate Research Fair, April 14-15. Sixteen students are expected to share a total of \$2,500 in cash prizes, with the overall winner of the Gerard A. Hauser Prize taking home \$500. Winners will be announced at 5 p.m. Tuesday, April 15, during closing ceremonies led by Carol V. Gay, professor of cell biology and poultry science.

Sponsored by the University Scholars Student Advisory Committee and the Undergraduate Student Government Academic Assembly and funded jointly by the Scholars Program and the Office of Undergraduate Education, the fair continues to attract increasing numbers of students. A number of students who have entered also will display their research at the National Conference on Undergraduate Research at the University of Texas at Austin, April 24-26.

Expo to showcase innovations in learning

By KAREN I. WAGNER
Public Information

Enter the classrooms of the future. Students are advising community planners on waste management practices and balancing the federal budget online. The classrooms themselves bear a striking resemblance to a regional planning commission meeting and a computer lab.

Whether consulting for local government and attending township meetings or playing computer simulation games in the lab, like "Uncle Sam's Budget Buster," these students are gaining real-world experience that transcends the traditional classroom.

To submit a question for this column, please send e-mail to the address listed below. Submissions must include a contact name and telephone number so that we can verify the source. Requests for anonymity will be honored. The following is a two-part question.

Q. How much paper does all of Penn State, including branch campuses, use in a year?

— *Wondering at University Park*

A. Given the overall size and geographic dispersion of Penn State, precise consumption figures for all paper types and grades are difficult, and in some instances, impossible to obtain. Within several product categories, however, statistics are available. For example, the University consumes approximately 150 million sheets or 30,000 cartons of copier paper annually. Penn State consumes approximately 10,000 cases of paper towels and 7,500 cases of toilet tissue or 360,000 rolls per year. Figures for the multitude of printing grades and weights are difficult to obtain since many publications are obtained from outside suppliers.

Q. Couldn't the colleges, if they combined their consumer power, obtain a cheaper price (relative to virgin paper) on recycled paper?

Combined purchasing power, or the principle of economies of scale, is and has been the basic tenet behind Penn State's General Stores and Document Services operations. By combining many small orders into one large order, the University community benefits through improved prices and better control of product quality and distribution. Without this pooling of requirements, the University would most certainly pay higher prices for all goods and services. No better example of this principle in practice exists, than in the current pricing of copier paper through General Stores. Through the pooling of requirements and commitment of the University's Copy Center Services, the price difference between non-recycled and recycled copier paper has been reduced to just 5 percent or \$1 per carton. Through effective negotiations by Purchasing Services, recycled copier paper has become affordable to the University community where the market had previously dictated a 20 percent premium.

In another application of the principle of economies of scale, Document Services currently uses recycled printing papers, index stock and document bond for all standard applications while Copy Center Services has established a recycled copier paper as standard issue. Additionally, all of the paper towels and toilet tissue are of recycled content paper.

Manager
Purchasing Services*

Classroom

Continued from page 1

"I think that what students get out of these experiences is the realization that knowledge is not certain," said Spiro Stefanou, professor of agricultural economics. "They develop an appreciation for the challenge of decision making, where there are no right or wrong answers."

Penn State quality initiatives have focused on projects like these — innovations in the classroom that are designed to provide students with the kind of decision and project management skills that will prepare them for the working world of problem solving. And they are just two of the many quality initiatives sponsored by the Schreyer Institute for Innovation in Learning that will be on display at Penn State's Quality Expo '97. The Expo will be held from 11 a.m. to 3 p.m. Thursday, April 17, in the Nittany Lion Ballroom. The event is open to the public.

The Schreyer team was interested in promoting different approaches to learning and assessing the impact at Penn State. As part of that goal, Stefanou engaged his students in a semester-long project for the Centre Regional Planning Commission. When students enrolled in his economic valuation of natural resources class, they never imagined they'd wind up as consultants to the commission's Spring Creek Watershed Committee. The watershed extends from the greater State College area to Milesburg, serving 15 municipalities.

The local planning commission contacted Stefanou during the spring of 1995 when it was interested in finding an intern to research the community's attitude toward alternative waste management strategies. The students surveyed nine municipalities in the Centre Region — a random sample of more than 300 households. The questions were designed to gauge the community's willingness to pay for various wastewater and trash disposal methods — methods that could eventually impact on the watershed.

"This was for real — a volatile issue involving growth in the Centre region," Stefanou said.

Stefanou served as facilitator for the project, pointing students in the right direction, but the students were the consultants and project managers. They developed their own learning agenda, determining for themselves what they needed to know in order to solve the problem. The commission's project was compatible with the course's emphasis on problem-based learning.

"People move to this area because they enjoy the environment, but this was the first time anyone asked residents how much they were willing to pay for it," Stefanou said. "Analyzing the problem forced the students to make judgments. There were lots of potential solutions to address this problem."

Students developed a survey and analyzed community response with help from the Schreyer Institute. The culmination of their project was a formal presentation of their results to the planning commission earlier this month.

Jeremy Castle, senior in environmental and renewable resource management, presented the class findings. Castle was nervous. For him, the project and final presentation represented the pinnacle of his senior year.

"It's been an incredible opportunity. We actually got to do something, instead of just sitting there listening to lectures. In fact interviews I can talk about the project, and I can show them a survey that I actually designed and analyzed," Castle said.

Meanwhile, students enrolled in Charles Kennedy's course on American national governments were engaged in a unique learning experience of their own. Kennedy's goal was to support Penn

Hands-on learning

Photo: Greg Grieco

State York students in developing a deeper understanding of the political process and the inner workings of our national government.

Kennedy provided his students with some unique resources to encourage active learning, including a computer simulation that put them in the role of campaign manager. The "Doonesbury Election Game" featured more than 60 possible characters, both cartoon and those based on real-life political figures dating back to 1960. Armed with biographies, summaries and demographic data, the student's objective was to manage their candidate's campaign and win the presidential election.

"The last time we played, Dick Nixon won the election, running against Bill Clinton," said Kennedy. Students have the choice of selecting presidential and vice presidential candidates from all three parties. Some of their more creative pairings have included Ross Perot with Norman Schwarzkopf. Kennedy believes students learn best when they are having fun.

They also got to try their hand at balancing the federal budget by manipulating actual numbers from the Congressional Budget Office. In case you're wondering, more than half of Kennedy's students were able to balance the budget within five years.

Students become so impassioned in debate and negotiation with one another, they tend to forget that Kennedy is in the room. Like Stefanou, Kennedy agrees that collaborative learning experiences force students to make tough decisions.

"After all," Kennedy said, "that's what life is all about."

In addition to Stefanou and Kennedy's projects, the Schreyer booth at Penn State's Quality Expo '97 will feature the classroom innovations of four other faculty members in the College of Agricultural Sciences, the Eberly College of Science, the College of Engineering and the College of the Liberal Arts.

HUB/Robeson project forum set for April 17

There will be an open forum on the planned HUB/Robeson Center complex from 12:30 to 1:30 p.m. Thursday, April 17, in the HUB Gallery Lounge on the University Park campus.

A current status report and planning timelines will be presented. Members of the HUB/Robeson Center Building Design Committee and a representative from the architectural firm Williams Trebilcock Whitehead will be available to discuss the project and answer questions.

The Penn State Board of Trustees recently approved the final plans for a single complex that jointly will expand the Hetzel Union Building and house the new Paul Robeson Cultural Center at University Park.

Designed by Williams Trebilcock Whitehead Architects of Pittsburgh, the HUB/Robeson project will add 91,000 square feet to the HUB's existing 154,000 square feet. The construction will expand and renovate portions of the HUB and add a new Paul Robeson Cultural Center.

Stework is slated to begin in May with building construction starting in July. Completion is targeted for the beginning of fall semester 1999.

For more information, call (814) 865-7661.

Harrisburg expansion project architect picked

The Harrisburg firm of Murray Associates has been named architect for the \$1-million expansion of the Penn State Harrisburg Science and Technology Building.

The 6,000-square-foot addition to the building constructed in 1982 is aimed at enhancing Penn State Harrisburg's undergraduate and graduate environmental engineering programs. Construction is expected to begin in October with completion in the summer of 1988. The addition will include a pilot lab, an air quality laboratory, two research labs, faculty offices and a seminar room.

Corporate and private support for the project has been enthusiastic with a \$300,000 Whitaker Foundation pledge leading the way. The AMP Foundation has pledged \$50,000 and other corporate sponsors, including GPU Energy, have committed another \$50,000 to the effort.

Murray Associates, the oldest architectural firm in Harrisburg, has an extensive list of academic projects in the region including: the Lebanon Campus of Harrisburg Area Community College, an addition to the Technical Center at Hershey Foods Corp., the Franklin Science Center at Shippensburg University and the Kline Science Building at Messiah College.

On the spot

Graduate student Scott Kletke, left, is the subject of a surprise interview by CBS affiliate WTAJ-10 news anchorman David Price. Price and his television camera crew joined with The Smear College of Business Administration to teach MBA candidates how to manage media moments. One of the goals of the seminar, held at The Nittany Lion Inn April 2, was to teach students how to deal with unexpected media coverage of their business and make the most of live, on-air questions. Attendees also learned about the structure and goals of the news media, how to manage difficult media situations, how to develop positive media relations and practical tips for planning and executing a news conference.

News in Brief

Health promotion

To Go or Not To Go To The Doctor Is it a lingering cold, or is it pneumonia? Sometimes it's difficult to know when to go to the doctor, and when to stay home and follow a self-care approach. In this session, learn about resources that can help you make informed decisions about providing

the best health care for you and your family. Self-care manuals will be available for purchase. Meets Friday, April 18 from noon-1 p.m. in 110 Henderson Building (The Living Center). Cost: None.

To register, contact Jan Hawbaker at (814) 865-3085 or JQH3@PSU.EDU.

Book Shelf

Steven Heine, associate professor of religious studies, has edited a book of essays by the prominent Japanese scholar of Buddhist studies, Masao Abe, formerly of the University of Chicago. The volume, *Zen and Comparative Studies*, is the second part of a two-part sequel to Abe's award-winning *Buddhism and Western Thought*. It deals with a critical comparison of Zen Buddhism and western philosophy, psychology and theology. The first sequel, *Buddhism and Interfaith Dialogue*, also edited by Heine, appeared last year. All three volumes are published by the University of Hawaii Press.

Marshall W. Raffel, professor emeritus of health policy and administration in the College of Health and Human Development, is editor of the book *Health Care and Reform in Industrialized*

Countries. Published by the Penn State Press, the volume examines the health-care systems of Canada, Denmark, France, Germany, Japan, the Netherlands, New Zealand, Sweden, the United Kingdom and the United States.

The book's essayists are all resident health care experts who address the ways in which their countries influence, and are influenced by, the health-care systems of other countries studied. They also examine their common problems—including the increasing pressure to serve aging populations while maintaining economic balance.

Brent Wilson, professor of art education and head of the Department of Art Education in the College of Arts and Architecture's School of Visual Arts, has had his book *The Quiet Evolution: Changing the Face of Art Education*, published by the Getty Found-

Toastmasters to meet

Happy Valley Toastmasters, a group designed to help people better articulate in a group setting, will meet at noon Tuesday, April 22, in 310 Shields Building on the University Park campus. For information, call David Panko at (814) 237-2822.

ation Institute for the Arts. Written for education reformers, policy makers, educators and scholars, the book is geared for those with a serious interest in systemic school reform.

Wilson's book reports on a seven-year study of the development of a comprehensive approach to arts education, known as discipline-based art education, pioneered by six regional institutes. The approach combines four basic disciplines—art making, art history, art criticism and aesthetics—into a holistic learning experience.

Wilson provides a history of the evolution of art education practice and theory at the institutes, a change effort that has affected thousands of teachers in hundreds of school districts. Included are anecdotal accounts of how each professional development institute built a coherent, comprehensive approach to art education.

LECTURES

Anthropologist to give spring lecture for WISE

Patricia Wright, executive director of the Institute for the Conservation of Tropical Environments, MacArthur Fellow and professor of anthropology at the State University of New York, Stony Brook, will give the spring WISE Institute lecture, titled "Biodiversity Conservation in Madagascar: A Case Study, Ranomafana National Park," at 7 p.m. Thursday, April 17, in 101 ASI Building.

In addition, Wright will give a lecture at 4 p.m. Friday, April 18, in 107 Carpenter Building, titled "The Impact of Predation Risk on the Behavior of *Propithecus Diademata* Edwards in the

PATRICIA WRIGHT

Rain Forest of Madagascar," and will be the keynote speaker for the seventh annual Challenges and Achievements Conference on Saturday, April 19, at The Nittany Lion Inn.

Wright has been active in research and conservation in Madagascar since 1985. Her visit is co-sponsored by the Women in the Sciences and Engineering (WISE) Institute; the Science, Technology and Society Program; the Department of Anthropology; and the Equal Opportunity Planning Committee.

For more information, contact the WISE Institute at (814) 865-3342 or e-mail WISE@psu.edu.

Encouraging your child to eat well is subject of talk

Mealtime can be a battleground for parents and children. Parents worry that children don't eat the right foods, eat too much or too little, or are just plain finicky eaters. Nationally recognized nutritionist and registered dietitian Elynn Satter will offer practical tips for parents, day care providers and others interested in understanding and improving children's nutrition in a free, public lecture at 7 p.m. Tuesday, April 15. Her presentation, sponsored by the College of Health and Human Development, is titled "Feeding with Love and Good Sense," and will be held at The Penn State Scanticon. For reservations, call Peggy Hoover at (814) 863-2212.

Satter's talk will cover common problems in feeding children, as well as looking at parental behaviors that positively or negatively influence the way children eat.

Satter's visit coincides with a major satellite teleconference for the Women, Infant and Children (WIC) Program, presented by the College of Health and Human Development and Continuing and Distance Education. Satter will join faculty from the department of nutrition and human development and family studies, and the College of Agricultural Sciences' Department of Food Science for the teleconference to be held Thursday, April 16.

Jane Goodall visits April 16

Jane Goodall, famed anthropologist and founder of the Gombe Stream Research Centre for the study of chimpanzees, will deliver a multimedia presentation at 8 p.m. Wednesday, April 16, at Eisenhower Auditorium on the University Park campus.

Goodall has lectured throughout the world on her discoveries and the plight of chimpanzees and all animals. She began her observations of chimpanzee behavior in Tanzania, Africa,

in 1960. Today, Goodall's Gombe Stream Research Centre conducts year-round observations of the descendants of her original study group.

Goodall's presentation is co-sponsored by the Department of Anthropology and the Center for Human Studies. Tickets are free and will be available in 225 HUB. For more information, contact Carol German in the Office of Student Activities at (814) 863-3786.

Australian-born author to present two seminars

Desmond O'Grady, an Australian-born author and journalist living in Italy, will present seminars on April 14 and 15 at University Park. The first is a comparative literature seminar titled "Bouras' Greece, O'Grady's Italy: The Experience of Two Expatriate Australian Writers" on Monday, April 14, in 101 Kern Building. A brown-bag luncheon will begin at 12:15 p.m.; the presentation and discussion will begin at 12:40 p.m. The second is a lecture titled "Italians in 19th century Australia" at 7:30 p.m. Tuesday, April 15, in the Rare Books Room of Pattee Library.

The presentations, which are open to the public, are co-sponsored by the Australia-New Zealand Studies Center, the Department of Comparative Literature, the Department of English, the Institute for the Arts and Humanistic Studies and the Dorothy Foehr Huch Chair for Special Collections, Pattee Library. For more information, contact Patricia Corbett at e-mail: pac9@psu.edu or phone: (814) 863-1603.

Talk centers on Amish response to changing world

Stephen M. Smith, associate professor of agricultural economics and director of the Center for Economic and Community Development, will give a talk on "The Amish Response to a Changing World" at 5 p.m. Tuesday, April 15, in the International Lounge, 222 Boucke Building on the University Park campus. His talk is sponsored by the Central Pennsylvania Chapter of the Fulbright Association.

For more information, contact the Fulbright Office at (814) 865-6192.

Lecture focus to be journalism ethics

Steve Weinberg, author, editor, media critic and part-time instructor for the University of Missouri's School of Journalism, will deliver the 1997 Dr. N.N. Oweida Lecture in Journalism Ethics on Tuesday, April 15. Weinberg's lecture, titled "The Shame and Success of Investigative Reporting: Unethical and Ethical Conduct," will be presented at 4:30 p.m. in the Carnegie Cinema on the University Park campus. The lecture is free to the public.

The Dr. N.N. Oweida Lecture in Journalism Ethics is supported by an endowment from Margaret L. Oweida in memory of her late husband, Dr. N.N. Oweida, a surgeon from New Kensington, Pa.

Changes in food distribution system examined April 16

Donald F. Dufek, retired senior vice president for The Kroger Co., will present the 1996 M.E. John Memorial Lecture from 2 to 4 p.m. Wednesday, April 16, at 215 Armsby Building on the University Park campus.

Dufek has recently completed leading a food marketing institute national task force on efficient consumer response. His lecture, "Efficient Consumer Response: The Value Added System for the U.S. Food System in the 21st Century" examines how this task force's results are bringing about a change in the national food distribution system by changing product flows, information flows and cash flows. Under this system all members of the food system — manufacturers, brokers, wholesalers, chains and independents — have joined in new alliances.

Learn about "New Planets Beyond the Solar System"

On Wednesday, April 16, visiting astronomer Laurence Marschall will present a public talk about "New Planets Beyond the Solar System" at Penn State DuBois. He will tell how new discoveries and techniques have led astronomers to discover these new planets. How astronomers did it; what the new worlds are like; how many more remain to be discovered; and what implications there might be for life elsewhere in the universe are topics that will be covered in this illustrated lecture geared to star lovers of all ages. Marschall is a professor of physics at Gettysburg College.

"New Planets Beyond the Solar System" will begin at 7:30 p.m. Wednesday, April 16, in the Hiller Auditorium at the DuBois campus. The presentation is free to the public. For more information, call Brian Weiner, program chair, at (814) 375-4740 or John Farr, co-chair, at (814) 375-4737. Marschall's visit is sponsored by the Harlow Shapley Visiting Lectureship program of the American Astronomical Society.

Find out why powders don't flow at April 17 lecture

The Pennsylvania State University Chapter of Sigma Xi, The Scientific Research Society presents a luncheon lecture titled "Powders — Why Won't They Flow?" at noon Thursday, April 17, at The Living Center, 110 North Henderson Building on the University Park campus.

Virendra M. Puri, research thrust leader at the Particulate Materials Center and professor of agricultural engineering, will discuss how powders embody some characteristics of solids, liquids and gases, yet behave differently. He will explain the differences and associated consequences of these characteristics, as well as the need to quantify the flowability of powders. In addition, he will share state-of-the-art techniques in flow property measurement, including research being conducted at Penn State.

For more information, call Pat Gong today or Tuesday after 3:30 p.m. at (814) 237-0671.

More Lectures

Chemistry professor to speak about field's early "giants"

The 1997 Nelson W. Taylor Lecture Series will be presented at University Park on April 23 and 24 by Sir John Meurig Thomas, professor of chemistry and former director of the Royal Institution of Great Britain and Master of Peterhouse, the earliest college of Cambridge University, UK.

He will give a talk for the general public on two of the "giants" of early 19th century science, Sir Humphry Davy, pioneer of electrochemistry and inventor of the Davy safety lamp, and Michael Faraday, who was first to produce an electric current from a magnetic field and invented the first electric motor and dynamo. Both men carried out their work at the institution in London that was directed by Thomas from 1886 to 1991. The lecture will be titled "Davy and Faraday: A Tale of Contrasting Geniuses" and

JOHN MEURIG THOMAS

will be held at 1:30 p.m. in 112 Kern Building, Wednesday, April 23. A reception following the lecture will be held in the Earth and Mineral Sciences Museum in Steidle Building.

On Thursday, April 24, Thomas will give a second lecture, on "Designed Solid Catalysts," at 1:30 p.m. in 112 Kern Building.

Thomas was knighted in 1991 in recognition of his work in chemistry and particularly his efforts to popularize science.

The Taylor Distinguished Lecture Series is sponsored by the Department of Materials Science and Engineering of the College of Earth and Mineral Sciences. The series was established in 1965 to honor the memory of Nelson W. Taylor, head of the Department of Ceramics from 1933 to 1943, and continues to be supported by a legacy from his widow, Miriam Taylor.

Workshop looks at learning beyond the classroom walls

The overwhelming lesson students learn in school is that wisdom is contained in books. The College of Agricultural Sciences is focusing on what is beyond the written word by hosting a two-day workshop titled "The Community as Classroom: Local Knowledge, Natural Resources and Ecology," April 18-19 on the University Park campus.

Sponsored by the College of Agricultural Sciences, the Interinstitutional Consortium on Indigenous Knowledge and Penn State's Society for International Development, the conference is intended for elementary and secondary school teachers, Cooperative Extension agents, youth leaders, students and community leaders. Participants will learn how local knowledge and scientific knowledge can be used to make decisions about natural resource use and the environment.

The conference begins at 2 p.m. Friday, April 18, with a tour of the Pasto Agricultural Museum at the Russell Larson Agricultural

Research Center at Rock Springs. The remainder of the conference will take place at the University Park campus in the Agricultural Sciences and Industries Building, beginning with registration at 5:30 p.m. in the lobby.

At 6 p.m. in Room 101, William Coperthwaite, a lecturer from Machiasport, Maine, will deliver the keynote address, "Helping Youth Learn the Value of Different Ways of Knowing."

Coperthwaite is an expert on yurts, native homes built out of natural materials by the Mongols of Central Asia. The structures are an example of how indigenous cultures use material within their environments to create useful products for their everyday lives.

A \$50 registration fee includes materials, parking, food and field trip transportation. Continuing education units and academic credit are available. For more information, or to request registration materials, call (814) 865-8301.

Nonlinear phenomena topic of April 17 lecture

Ali Hasan Nayfeh, an international authority in the field of nonlinear dynamics and vibrations, is the Thursday, April 17, speaker in the Department of Mechanical Engineering Distinguished Lecture Series. Nayfeh's lecture, "Can the Engineer Ignore Nonlinear Phenomena?" will be presented at 4 p.m. in 125 Reber Building.

Nayfeh is the University Distinguished Professor of Engineering at Virginia Polytechnic Institute and State University. He will discuss potential nonlinear phenomena which design engineers must be able to recognize, understand and respond to appropriately.

Former ambassador to visit University Park

Edward Joseph Perkins, former ambassador of the United States to Australia, South Africa and Liberia, and former U.S. representative to the United Nations Security Council, will be at Penn State April 17 and 18 to meet with students, faculty and administrators and to give a public lecture on "The Emerging Role of the Asia-Pacific Region in Global Affairs: Responses from and Cooperation between the United States and Australia" at 7 p.m. Thursday, April 17, in the HUB Assembly Room on the University Park campus.

The Dorrance Distinguished Lecture is sponsored by the Australia-New Zealand Studies Center, the Office of International Programs and the Equal Opportunity Planning Committee.

Perkins also will give a brown-bag lunch talk on "American Diplomacy and Politics in Sub-Saharan Africa" at noon Thursday, April 17, in the conference room in the Paul Robeson Cultural Center, and an International Council colloquium on "Positioning Universities for their International Role: A Career Diplomat's Perspective," at 10 a.m. Friday, April 18, in the International Lounge, 222 Boucke Building. All events are open to the public.

Perkins, who retired as ambassador to Australia last year, is currently the William J. Crowe Chair professor and interim executive director of the International Programs Center at the University of Oklahoma.

For more information, contact Michael Laubscher at (814) 865-7681.

Lecture tied to "Exotic Illusions" exhibition

Peter Welsh, curator of the exhibition "Exotic Illusions: Art, Romance and the Marketplace," and professor of anthropology at Arizona State University, will present a lecture on "Museums and the Culture of Commodities" on Thursday, April 24, at 7:30 p.m. in the Palmer Lipson Auditorium at the Palmer Museum of Art on the University Park campus.

The exhibition, on display at the Palmer Museum, challenges traditional definitions of "exotic," "primitive" and "authentic" as they relate to non-Western art and artifacts by exploring the role of consumers in the creation and distribution of such objects.

Conceived by The Heard Museum in Phoenix, "Exotic Illusions" was organized by the Smithsonian Institution Traveling Exhibition Service. "Exotic Illusions" will be on view until June 15.

Explore the role of Vitamin A in immunity

A. Catharine Ross, Dorothy Foehr Huck chair and professor of nutrition, will present the Evan G. and Helen G. Pattishall Lecture of the College of Health and Human Development at 4 p.m. Thursday, April 24, in 209 Henderson Building South at University Park.

Her topic will be "Vitamin A and Immunity: Implications for the Young and the Old." The lecture is open to the public, and a reception will follow in the Henderson Living Center.

Ross received the college's 1996 Pattishall Outstanding Research Award which honors a senior health and human development faculty member who has made outstanding research contributions to the field across a major portion of his or her career. She is recognized for her creative and probing investigations dealing with vitamin A (and related retinoids) and health. In addition to providing fundamental knowledge about the basic mechanism by which homeostasis of retinoids is maintained in mammals, she has contributed significantly to the understanding of how dietary retinoids influence resistance to infections.

Ross joined the Penn State faculty in 1994 from the Medical College of Pennsylvania, where she was professor of biochemistry and pediatrics. Ross has served on several NIH panels, as a consultant to World Health Organization, and recently was elected treasurer of the American Society of Nutrition Sciences.

The ARTS

AT PENN STATE

On stage

The sounds of zils, tambourines and iron fans will fill the air when the Penn State International Dance Ensemble presents its 19th annual Spring Concert at 2 and 7:30 p.m. Saturday, April 12, in the White Building Dance Theatre on the University Park campus. The dance, music and song of world cultures will be featured. A reception and dance will follow the evening performance, which is open to the public. Tickets are \$7 for general admission, \$5 for students and senior citizens, and are available from ensemble members, by calling (814) 863-3467 and at the door before each performance. The ensemble is directed by Elizabeth Hanley, assistant professor of kinesiology in the College of Health and Human Development.

Vanities at Altoona

Jack Heifner's *Vanities* is a sharp, poignant comedy that chronicles the friendships of Joanne, Kathy and Mary, three young Texas women who come of age in the turbulent '60s.

Directed by Nona Gerard, *Vanities* will be presented in the theatre of the Community Arts Center at Penn State Altoona today through April 12 and April 15 to 19. All shows are at 8 p.m. Tickets are \$5 general admission, \$3 with a Penn State ID, and are available at the Penn State Altoona Bookstore and at the door. Call (814) 949-5120 for ticket information.

Free spring concert

The Penn State Mallet Ensemble, under the direction of Dan C. Armstrong, professor of music, will perform its annual spring concert at 8 tonight in the School of Music Recital Hall on the University Park campus.

"The Rice of Strangers"

"There was manure on the floor and hair from the horse's tail stuck on the ceiling walls. Because stalls have no ceilings, you could hear babies crying, family arguments and the sick coughing throughout the night."

These words from "The Rice of

Strangers," which will be performed at the Studio Theatre of Penn State Erie, The Behrend College, are taken from the real-life testimony of Japanese Americans interned in concentration camps on American soil during World War II. "The Rice of Strangers" will be performed April 10, 11, 12 and 13 at 8 p.m.

Although the performances are free, reservations should be made by calling the Penn State-Behrend Studio Theatre at (814) 898-6016.

Opera for children

The Penn State Children's Opera will present two free operas, *A Minkat Lullaby* and *The Frog Who Became A Prince*, by Edward Barnes, at 2 p.m. Saturday, April 12, and Sunday, April 13, at the School of Music Recital Hall on the University Park campus.

Performances are free to the public.

Clarinetist to give recital

Tom West will perform a free clarinet recital at 2 p.m. Sunday, April 13, in the School of Music Recital Hall on the University Park campus. A reception will follow the recital.

West will be accompanied by Diane Gould-Toulson on the piano. West is a student of Smith Toulson, professor of music.

Odyssey Through Literature

Religion and its infinite interpretations are the topic of discussion on the April 13 episode of *Odyssey Through Literature*. Leonard Rubinstein and Robert Neville, dean of the School of Theology at Boston University, face such ambiguous questions as, "Is God a person or an entity?" and "Is religion nothing more than a commonly held collection of intellectual metaphors?"

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 on WPSU 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania.

Organ recital set

Shannon M. Love will perform her senior organ recital at 8 p.m. Sunday, April 13, in the School of Music Recital Hall on the University Park campus.

Love, a music education major, is a private student of June Miller, associate professor of music. The concert is free to the public.

The Big Push at Berks

The Big Push, a small "big band," will give a free performance at 7:30 p.m. Wednesday, April 16, in the Perkins Student Center Theatre at Penn State Berks campus.

The Big Push presents its unique interpretation of where the big band movement is going, incorporating the modern rhythmic influences of hip hop dance music.

Bach's Lunch

The Penn State Mallet Ensemble will perform at the Bach's Lunch concert at 12:10 p.m. Thursday, April 17, in the Helen Eakin Eisenhower Chapel on the University Park campus. The 20-minute free concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

Audience members may take bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Spring dance concert

The Penn State Dance Program will present its annual spring concert, "Choreographer's Showcase," at 8 p.m. Thursday, April 17, and Friday, April 19, at 2:30 p.m. Saturday, April 19, in the White Hall Dance Theatre in the White Building on the University Park campus. The performance will feature Orchestris Dance Company and will range in styles from jazz to modern, from lyrical to dramatic. The concert also will feature choreography by Patricia Heigel-Tanner, assistant professor in the Department of Kinesiology and dance program coordinator; and Vicki McQuaide, instructor in the Department of Kinesiology; as well as student-choreographed works.

Admission is \$5 for students and \$6 for the general public.

"Opera at the Pavilion"

The Penn State Opera Theatre will present "Opera at the Pavilion" at 8 p.m. Friday, April 18, and Saturday, April 19, in the Pavilion Theatre on the University Park campus. The one-act operas to be performed are Franz Josef Haydn's *La Cenerentola* and the world premiere of *Joe's Odds*, composed by Bruce Trinkle, associate professor of music, with libretto by J. Jason Charnesky.

The production is directed by Susan Boardman, associate professor of music. Patrick Lawrence will accompany *La Cenerentola*, while *Joe's Odds* features a chamber orchestra composed of 20 students from the School of Music conducted by Gregory Woodbridge.

Tickets are \$4.50 and are available through the Arts Ticket Center at Eisenhower Auditorium; by phone at (814) 863-0255; or at the Pavilion Theatre the evenings of the performance.

Concert at DuBois

Singer and songwriter Karen Goldberg will give a free performance at Penn State DuBois at 7:30 p.m. Tuesday, April 22, in Hiller Auditorium.

Goldberg also will be a part of the Earth Day celebrations being held in the School Plaza on campus from noon to 4 p.m. Wednesday, April 23.

For more information, call Missy Duttry, student life coordinator, at (814) 375-4766.

Annual Palmer gala

The Friends of the Palmer Museum of Art will hold their annual black-tie fund-raiser, a Venetian masked ball, beginning at 6:30 p.m. Saturday, April 26, at The Penn State Lancaster.

Proceeds benefit the Palmer Museum of Art. Reservations are due by April 18. For more information or to make reservations, call (814) 865-7672.

Children's literature

The Patten Library Rare Books Room's current exhibit, "German Children's Literature in English Translation," runs through July 18.

A large part of the University Libraries' Allison-Shelley Collection is a great number of German children's stories and fairy tales that have been translated into English. The Allison-Shelley Collection also houses noteworthy original illustrations for some of the fairy tales.

"Race Records"

An exhibit titled "Race Records" that highlights contributions of African American musicians is now on display in the African American Studies Room of Pattee Library on the University Park campus and will run through July. This showcase explores the history of sound recordings made by African American artists in the early days of the recording industry, the industry's exploitation of those artists and the lasting legacy of that music itself, early blues and jazz.

THE TWELFTH ANNUAL

Alisa N. Strauss, a graduate student in the Department of Anthropology in the College of the Liberal Arts had her research, "Late Archaic band territoriality in central Pennsylvania," on display at the Twelfth Annual Graduate Research Exhibition, held March 21-22 on the University Park campus.

The 12th Annual Graduate Research Exhibition, held in the Hetzel Union Building on the University Park campus March 21 and 22, featured the work of 172 graduate students in 143 poster exhibits and nine performances.

Research topics ran the gamut from how light makes vines climb to how to build miniature ultrasonic motors. Rain drops, the Blue Band, rodeo and extra-solar planets were among the projects displayed and explained by graduate students from 56 graduate programs. The new Performance Option included presentation of arias from Donizetti and Verdi, piano works by Liszt and Scriabin, and dramatic renditions of the lives of Edith Wharton and Emily Dickinson.

Prizes totaling \$10,000 were awarded to 42 performances or posters in six categories: Arts and Humanities; Engineering; Health and Life Sciences; Performance Option; Physical Sciences; and Social and Behavioral Sciences.

Some 73 faculty and 46 graduate student judges graded the poster exhibits in three areas: content (50 percent of the total score), display (30 percent) and oral presentation (20 percent). The analogous areas for the Performance Option were artistry, technique and suitability.

The Graduate Research Exhibition was established in 1986 to celebrate research as an essential and exciting part of graduate education at Penn State. The dual goals of this University-wide exhibition are to highlight the importance of research and creative activities to graduate education and to emphasize the importance of communicating research and scholarship to the general public. The addition of the Performance Option this year extended the opportunity to participate in the exhibition to those graduate students whose research and scholarship cannot be presented as a poster.

"The Graduate Research Exhibition showcases the wide variety of research opportunities available to Penn State graduate students," **Rodney Erickson**, dean of the Graduate School, said. "It fosters communication across disciplines and introduces the wider community to the significance of our \$348-million-per-year research program."

The 12th Annual Graduate Research Exhibition was sponsored by the Graduate School and organized by the Graduate Council Committee on Research, whose members are: **Christine Clark-Evans**, associate professor of French and Women's Studies; **Charles L. Croskey**, professor of electrical engineering; **Derek Elsworth**, associate professor of mining engineering; **James Fairbank**, graduate student in business administration; **Ladislav Semali**, assistant professor of education; **Susan Vanucci**, associate professor of pediatrics; and **Frederick Williams**, associate professor of biology.

GRADUATE RESEARCH EXHIBITION

March 21-22, 1997
University Park

Winners of the 12th Annual Exhibition

WINNING EXHIBITORS BY AREA OF ENTRY

ARTS and HUMANITIES

First: **Ihab M.K. Elzeyadi**

Exhibit title: "Designing for Visual Comfort in the Non-Orthogonal Office Space: The Physical, Psychological and Social Effects of Tilted Windows on Employees' Perceived Comfort in the Indoor Work Environment"

Department: Architecture (College of Arts and Architecture)

Adviser: **Sidney Cohn**

Second: **Heather Richardson Hayton**

Exhibit title: "Making Love Work: The Social Function of Desire in the Middle Ages"

Department: Comparative Literature (College of the Liberal Arts)

Adviser: **Robert R. Edwards**

Honorable Mention: **Don-John Dugas**

Exhibit title: "Marketing the Bard: Jacob Tonsen's 1709 Edition of the Works of Mr. William Shakespeare"

Department: English (College of the Liberal Arts)

Adviser: **Robert D. Hume**

Honorable Mention: **Paola Gemme**

Exhibit title: "Domesticating Foreign Struggles: Narratives of the Italian Risorgimento and American National Identity, 1820-1870"

Department: English (College of the Liberal Arts)

Adviser: **Susan K. Harris**

Honorable Mention: **Deborah J. Santiago**

Exhibit title: "An Investigation of Vocalization as an Instrumental Rehearsal Technique"

Department: School of Music (College of Arts and Architecture)

Adviser: **Keith Thompson**

ENGINEERING

First: **Oguz Uzul, Todd Klaput**

Exhibit title: "Preliminary Study of Active Flow Control Around an Isolated Airfoil"

Department: Aerospace Engineering (College of Engineering)

Adviser: **Cengiz Camci**

Second: **Edgard Carvalho, Colleen Merritt**

Exhibit title: "The Elicitation of Plant Root Cultures of the Production of Chemicals"

Department: Chemical Engineering (College of Engineering)

Adviser: **Wayne Curtis**

Second: **Xian Liu**

Exhibit title: "Submicron X74 Dielectric Materials"

Department: Materials (Intercollege)

Adviser: **C.A. Randall**

Lily M. Wang from the Department of Acoustics in the College of Engineering exchanges information on her project, "Characterizing the Radiated Sound Field Around a Violin Source Using Planar Nearfield Acoustic Holography," with a few of the hundreds of visitors to the event.

Second: **Chungyung Wu, Gary Neal**

Exhibit title: "Global Workpiece Positioning System"

Department: Mechanical Engineering (College of Engineering)

Advisers: **Martin W. Trethewey, Edward C. DeMeter**

Third: **Roderick S. Thomas**

Exhibit title: "Development of a Programmable, Multiple Supplement Cattle Feeder for Pasture Use"

Department: Agricultural and Biological Engineering (College of Agricultural Sciences)

Adviser: **Dennis R. Buckmaster**

Third: **Lily M. Wang**

Exhibit title: "Characterizing the Radiated Sound Field around a Violin Source Using Planar Nearfield Acoustic Holography"

Department: Acoustics (Intercollege)

Adviser: **Courtney Burroughs**

Honorable Mention: **Sajid Alavi**

Exhibit title: "A Dynamic Microbial Growth Model for Packaged Milk"

Department: Agricultural and Biological Engineering (College of Agricultural Sciences)

Adviser: **V.M. Puri**

Honorable Mention: **Manjmath Chatterjee, Gregory Simon**

Exhibit title: "Automatic SPICE Netlist Generation from Schematic Diagrams using Feedforward Neural Networks"

Department: Electrical Engineering (College of Engineering)

Adviser: **N.K. Bose**

Honorable Mention: **Tom Owino**

Exhibit title: "Time Domain Reflectometry for Water Content Measurement in Greenhouse Growing Mediums"

Department: Agricultural and Biological Engineering (College of Agricultural Sciences)

Adviser: **James Hamlett**

HEALTH and LIFE SCIENCES

First: **Kimberly A. Shafer-Weaver**

Exhibit title: "Phenotypic characterization of IL2 stimulated lymphoid cells that exhibit novel antibacterial activity"

Department: Veterinary Science (College of Agricultural Sciences)

Adviser: **Lorraine Sordillo**

Second: **Jennifer Dawn Puffett**

Exhibit title: "Ozone Induction of the Death Program"

Department: Plant Physiology (Intercollege)

Adviser: **Eva Pell**

Second: **Jorge M. Vivanco**

Exhibit title: "Mirabilis expansa, a promising crop from the Andes of Peru"

Department: Plant Pathology (College of Agricultural Sciences)

Adviser: **Hector Flores**

Winners

continued from page 2

HEALTH and LIFE SCIENCES (continued)

Second: Christina Wells

Exhibit title: "Fine Root Turnover in Apple: Implications for Fruit Tree Physiology and Management"

Department: Plant Physiology (Intercollege)
Adviser: David Eissenstat

Third: Zucai Suo

Exhibit title: "How HIV-1 reverse transcriptase reads through RNA secondary structures"

Department: Chemistry (Eberly College of Science)
Adviser: Kenneth A. Johnson

Third: Istvan A. Urcuyo

Exhibit title: "Vestimentiferan Growth in the Hydrothermal Vent System of the Juan de Fuca Ridge"

Department: Biology (Eberly College of Science)
Adviser: Charles Fisher

Third: Michael P. Woods

Exhibit title: "Elucidating the Gal3p-Gal80p-Gal14p Transcription Activation Switch"

Department: Biochemistry and Molecular Biology (College of Medicine)
Adviser: James E. Hopper

Honorable Mention: Derek Lindbergh Kalp

Exhibit title: "The Effect of the Exterior Environment on the Level of Engagement of Alzheimer's Disease Residents in the Interior Spaces of an Alzheimer's Care Facility"

Department: Landscape Architecture (College of Arts and Architecture)
Adviser: Sidney Cohn

Honorable Mention: Gina Pighetti

Department: Veterinary Science (College of Agricultural Sciences)

Exhibit title: "Dietary vitamin E and selenium deficiency impairs iron internalization by immune cells"

Adviser: Lorraine Sordillo

Honorable Mention: Chunlei Su

Exhibit title: "Isolation of Virulence Genes Expressed in *Staphylococcus aureus* by Subtractive Hybridization"

Department: Veterinary Science (College of Agricultural Sciences)
Adviser: Lorraine Sordillo

Honorable Mention: Lisa M. Tarantino

Exhibit title: "Mapping Genes for Alcohol-Related Traits in Mice"

Department: Genetics (Intercollege)
Adviser: Gerald E. McClearn

James Wall, left, explains the research on "Community Costs of Technical Skills Deficits: a Pennsylvania Case Study" that he is working on with Holly Tucker and Cynthia Pellach in the Department of Adult Education, Instructional Systems and Vocational and Industrial Education in the College of Education.

PERFORMANCE OPTION

First: Svetlana Brandt

Exhibit title: "8 Preludes from 24 Piano Preludes Op. 11 by Alexander Scriabin (1872 - 1915)"

Department: School of Music (College of Arts and Architecture)
Adviser: Donald Hopkins

First: Anthony Irons

Exhibit title: "An adaptation of The Farmer and the Snake by Uncle Remus"

Department: Theatre Arts (College of Arts and Architecture)
Adviser: Charles Dumas, Jane Ridley

Honorable Mention: Seong-Ae-Lim

Exhibit title: "Liszt's Hungarian Rhapsody No. 8 in f-sharp minor"

Department: School of Music (College of Arts and Architecture)
Adviser: Steven Smith

Honorable Mention: Heather Renee Landry

Exhibit title: "The Belle of Amherst"

Department: Theatre Arts (College of Arts and Architecture)
Adviser: Jane Ridley

PHYSICAL SCIENCES

First: Darren M. Williams

Exhibit title: "Habitable Moons around Extrasolar Giant Planets"

Department: Astronomy and Astrophysics (Eberly College of Science)
Adviser: James F. Kasting

Second: Lora L. Burns

Exhibit title: "A comparison of the folding mechanism of three B-sheet proteins with similar structures"

Department: Biochemistry and Molecular Biology (College of Medicine)
Adviser: Ira J. Ropson

Third: Tim Dunbar

Exhibit title: "Molecular Wires and Self-Assembled Monolayers"

Department: Chemistry (Eberly College of Science)
Adviser: Dave Allara

Honorable Mention: James Kushmerick

Exhibit title: "Adsorption Dynamics of Benzene on Ni(110) at 4K"

Department: Chemistry (Eberly College of Science)
Adviser: Paul S. Weiss

SOCIAL and BEHAVIORAL SCIENCES

First: Myeong-Ho Sohn

Exhibit title: "Does Practice Make Perfect? Well ... not exactly"

Department: Psychology (College of the Liberal Arts)
Adviser: Richard A. Carlson

Second: Alisa N. Strauss

Exhibit title: "Late Archaic Band Territoriality in Central Pennsylvania"

Department: Anthropology (College of the Liberal Arts)
Adviser: James Hatch

Second: James Wall, Holly Tucker, Cynthia Pellach

Exhibit title: "Community Costs of Technical Skills Deficits: A Pennsylvania Case Study"

Department: Adult Education, Instructional Systems and Vocational and Industrial Education (College of Education)
Adviser: David Passmore

See "Winners" on page 4

Chao Zhang, above left, demonstrates his "Thermoacoustic refrigerator design and study" research to an interested observer. Zhang is studying in the Department of Physics in the Eberly College of Science, and was one of 172 graduate students whose work was represented in 143 poster exhibits, left, and nine performances at the 12th Annual Graduate Research Exhibition, held in the Hetzel Union Building on the University Park campus March 21 and 22.

Keynote Lecture

Preparing for a new reality

Michael J. Zigmund, professor of neuroscience, psychiatry and education at the University of Pittsburgh, opened the 1997 Graduate Research Exhibition with a discussion on professional skills and responsible conduct in graduate education.

In his address, "Preparing to Survive in the Next Millennium," Zigmund spoke of the changing face of the academic job market as the 20th century comes to a close, and of the need to change graduate education in order to prepare students for this new reality.

He stressed the importance of better mentoring by faculty, most of whom faced a much different outlook during their own training. Today's faculty, Zigmund said, need to recognize that only one in four of their graduate students will likely find a "traditional" tenure-track job in a research university. Most will migrate into other areas, including industry, consulting or less research-oriented educational settings. Faculty need to do more to recognize the validity of these non-traditional options.

Zigmund also called on graduate students to take a more active role in getting the training they need, and to do more long-term career planning. American universities, Zigmund said, need to match the excellent training they offer in academic and laboratory skills with a new focus on "survival skills," including written and oral communication, finding and maintaining a job, obtaining outside funding, supervising staff and students, teaching and being responsible ethical professionals. He applauded the increase in formal programs aimed at teaching these skills.

Zigmund received his Ph.D. at the University of Chicago in 1968. His research focuses on the neurobiology of synaptic transmission in the brain, as well as on such neurological and psychiatric disorders as Parkinson's disease, posttraumatic stress disorder, depression and schizophrenia. His lecture was sponsored by the Graduate School.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, April 11

■ The 19th Annual Penn State Slavic Folk Festival, 10 a.m. to 10 p.m., Ballroom, Hetzel Union Building.
Kern Graduate Commons, noon, Kern Lobby. Concert titled "Belamya Trio."

Palmer Museum of Art, 2 p.m. Gallery Talk presents Robin Seymour on "The Steigitz Circle."
School of Music, 8 p.m., Recital Hall. Student Recital presents Shawna Gluck, piano.
University Student Theatre Company, 8 p.m., Pavilion Theatre. "The Lion in Winter" through April 12. For tickets, phone (814) 863-0255.

Saturday, April 12

■ The 19th Annual Penn State Slavic Folk Festival, 10 a.m. to 10 p.m., Ballroom, Hetzel Union Building.
Palmer Museum of Art, 11:30 a.m., Christophers Lobby. Gallery Talk presents Catherine Clerici on "American Watercolors at the Palmer Museum."

■ School of Music, 2 p.m., 110 Music I. Children's Opera.
School of Music, 3 p.m., Recital Hall. Student Recital presents Erik Kirby, trombone.
Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Cleo Laine and The John Dankworth Group." For tickets, phone (814) 863-0255.

Sunday, April 13

■ The 19th Annual Penn State Slavic Folk Festival, 12:30 to 6 p.m., Ballroom, Hetzel Union Building.
School of Music, 2 p.m., Recital Hall. Student Recital presents Tom West, clarinet.
■ School of Music, 2 p.m., 110 Music I. Children's Opera.
School of Music, 8 p.m., Recital Hall. Student Recital presents Shannon Love, organ.
School of Music, 8 p.m., 122 Music II. Graduate Recital presents Jason Plosch, trumpet.

Tuesday, April 15

■ Nittany Valley Symphony, 8 p.m., Eisenhower Auditorium.
Opera, Spanish Passions. For tickets, phone (814) 863-0255.

Wednesday, April 16

■ Palmer Museum of Art, 2 p.m. Katherine Benz on "Italian Baroque Painting at the Palmer Museum."
School of Music, 8 p.m., Recital Hall. Percussion Ensemble.

Thursday, April 17

Center for Quality and Planning and the University Council on Continuous Quality Improvement, 11 a.m. to 3 p.m., The Nittany Lion Inn. "Quality Expo."
School of Music, 8 p.m., Recital Hall. Student Recital presents Sarah Renzi, piano.

Friday, April 18

Kern Graduate Commons, noon, Kern Lobby. Concert titled "Hot Mamas."
Center for the Performing Arts, Eisenhower Auditorium, 8 p.m. "To Kill a Mockingbird." For tickets, phone (814) 863-0255.
School of Music, 8 p.m., Recital Hall. Student Recital presents Meredith Malone, vocal jazz.
School of Music, 8 p.m., Pavilion Theatre. Opera, eve's odds, through April 19. For tickets, phone (814) 865-0431.
School of Music, 8 p.m., 122 Music II. Graduate lecture/recital with Rolando Fregoli, violin. For tickets, phone (814) 865-0431.

Saturday, April 19

Palmer Museum of Art, 11 a.m., Christophers Lobby. Storyteller Jan Kinney presents tales for the entire family.
School of Music, 7 p.m., Recital Hall. Student Recital presents Julie Lybarger, horn.
Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Syracuse Symphony Orchestra." For tickets, phone (814) 863-0255.
World Wrestling Federation, 8 p.m., The Bryce Jordan Center. For tickets, phone (814) 865-5555.

SEMINARS

Friday, April 11

The Institute for Policy Research and Evaluation, the Center for Health Policy Research and the Department of Health Policy and Administration, 1 to 2:30 p.m., The Living Center, Henderson. Cynthia Massie on "Long-Term Care: A Policy of Fragmentation."

Monday, April 14

Continuing and Distance Education and the College of Education's Adult Education Program, 11:45 a.m. to 1 p.m.,

On display

The Pattee Library Rare Books Room's current exhibit, "German Children's Literature in English Translation," includes original illustrations for some of the fairy tales. The exhibit runs through July 18.

502 Keller. Wesley E. Donahue and John E. Park on "Management Development Program from an Adult Education Perspective."

■ Australia-New Zealand Studies Center, 12:15 p.m., 101 Kern. Desmond O'Grady on "Bouras Estate, O'Grady's Italy: The Experience of Two Expatriate Australian Writers."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. K.G. Karthikeyan on "Adsorption and Co-Precipitation of Copper with the Hydrous Oxides of Iron and Aluminum and Vince LaCross on "Fatigue of Deck-to-Deck Dowel Connections in Hardwood Glulam Bridges."

Gravity Center, 2 p.m., 335 Davey Laboratory. Pedro Marroñetti on "Close Neutron Star Binaries."

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. Luigi Martinelli on "Numerical Simulation of Viscous Flow for Aerodynamic Analysis and Design."

Tuesday, April 15

Veterinary Science, 9 to 10 a.m., 221 Henning. Stephen Sundin on "Science and Uncertainty in Regulatory Decision Making."

Nutrition, 4 p.m., S-209 Henderson. Richard Schulz on "Why is Vitamin E Such an Effective Antioxidant?"

Geoscience, 4 p.m., 112 Walker. Julie Cole on a subject TBA.
■ Biology, Ecology and the Marine Science Society, 4 p.m., 8 Mueller Laboratory. Kim Juniper on "Between a Rock and a Hot Place — Faunal Community Dynamics and Hydrothermal Chimney Growth at the Juan de Fuca Seafloor Observatory."

Journalism, 4:30 p.m., Carnegie Cinema. Steve Weinberg on "The Shame and Success of Investigative Reporting: Unethical and Ethical Conduct."

The Central Pennsylvania Chapter of The Fulbright Association, 5 to 6:30 p.m., International Lounge, 222 Boucke. Stephen M. Smith on "The Amish Response to a Changing World."

Office of Volunteer Programs and Services, 7 p.m., 112 Kern. Tara Hollan on "Literacy in America."

Health and Human Development, 7 p.m., Penn State Scenic Center. Elynn Satter on "Feeding with Love and Good Sense."

■ Australia-New Zealand Studies Center, 7:30 p.m., Rare Books Room. Pattee Library. Desmond O'Grady on "Italians in 19th Century Australia."

Wednesday, April 16

Faculty Staff Club and the Penn State Bookstore, 11:30 a.m., The Nittany Lion Inn. Bryce Jordan on "Maintaining and Improving Public Trust: A Challenge for Our Universities." Tickets available at 110 Hetzel Union Building.
Population Research Institute, 11:45 a.m., 406 Oswald Tower. Clarence Weinberg on "Biological Issues in Population Research."

Business, 2 to 4 p.m., 215 Ambsy. Donald F. Dufek on "Economic Consumer Response."
Engineering Science and Mechanics, 3:35 p.m., 215 Hammond. Russell F. Messier on "Sculptured Thin Films."
Center for Women Students, 8 p.m., Schwab Auditorium. Jane Goodall to speak. Tickets are available at 225 Hetzel Union Building.

Thursday, April 17

Sigma Xi, The Scientific Research Society, noon, The Living Center, 110 North Henderson. Virendra M. Puri on "Powders — Why Won't They Flow?"

Food Science, 4 p.m., 117 Borland Laboratory. Hassan Gourama on "Biocatal of Mold Growth and Mycotoxin Production."

Mechanical Engineering, 4 p.m., 125 Reber. Ali Hasan Nayfeh on "Can the Engineer Ignore Nonlinear Phenomena?"

English, 5 p.m., 301 Hetzel Union Building. Cynthia Hogue will read from her poems.

■ Australia-New Zealand Studies Center, the Office of International Programs and the Equal Opportunity Planning Committee, 7 p.m., Assembly Room, Hetzel Union Building. Edward Joseph Perkins on "The Emerging Role of the Asia-Pacific Region in Global Affairs: Responses from and Cooperation between the United States and Australia."

Friday, April 18

■ Australia-New Zealand Studies Center, the Office of International Programs and the Equal Opportunity Planning Committee, noon conference room, Paul Robeson Cultural Center. Edward Joseph Perkins on "African Diplomacy and Politics in Sub-Saharan Africa."

■ Australia-New Zealand Studies Center, the Office of International Programs and the Equal Opportunity Planning Committee, 10 a.m., International Lounge, 222 Boucke. Edward Joseph Perkins on "Positioning Universities for their International Role: A Career Diplomat's Perspective."

Physics, 3 p.m., S5 Osmond Laboratory. Alan Sokal on "What the Social Text Affair Does and Does Not Prove."

EXHIBITS

HUB Art Alley Panels

Oil and print exhibit by Amy Jane Whitney and Darren R. Gier, through May 4.

HUB Browsing Gallery

■ "Photographs of Australia" by Richard Woldendorp, through April 27.

HUB Formal Gallery

Mixed media works by Howard Brooks, through May 4.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

North Halls

Paintings by Jodi Ruffner, through April 30.

Palmer Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolorists," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 15.

"Exotic Illustrations: Art, Romance and the Marketplace," through June 15.

Zoller Gallery

School of Visual Arts, "MFA Thesis Exhibitions," ceramics by Danielle Mortier and Rebecca Wostrel, April 19 through 28.

■ Reflects an international perspective

CQI

CONTINUOUS
QUALITY
IMPROVEMENT

Corning Asahi at Expo

Teams are a key to improving performance, but many organizations fail to realize the full potential of teams. At the Quality Expo on April 17 from 12:45 - 1:30 p.m. in the Nittany Lion Inn Fireside Lounge, a Quality Circle on "Maintaining Momentum in a Quality Organization" will be introduced by David Wormley, dean of the College of Engineering, and will feature Steve Groves, Corning Asahi vice president, Dave Butt, associate professor in The Smeal College of Business Administration, and Fred Loomis, director of administration in Continuing and Distance Education. These presenters will provide a corporate model for high-performing work systems and explore practical ways that teams can be most effective in a variety of organizational settings.

Advising via the Web

Thanks to the work of the members of the Comprehensive Academic Advising and Information System team, students can access a Web site to receive a summary of their academic history, predict their semester GPA, request a copy of a degree audit, view their transcripts, receive information about a federal loan, access information about curriculum and policies and receive career assistance. The system is available at <http://caais.psu.edu/>. Project team members are: Ross Brode, Gary Hile, Jim Kelly, Anne Kepler, Mike Leonard, Jim Levin, Steve Littell, Scott Smith and Sue Winick. Technical team members are Anne Myske-Memoli, Daryl Hoffman and Judy Evock. Project sponsors are John Cahir and John Romano. Collaboration design team members are Ken Blythe, Gene Melander, James Wager and Eric White.

"Take Note"

John Brighton, executive vice president and provost, will talk about the Quality Expo on "Take Note" with Host Patricia at 5:45 p.m. Friday, April 11, on WPXS-TV.

For more information about Continuous Quality Improvement, contact Louise Sandmyre, executive director of the Center for Quality and Planning at (814) 863-8721, or e-mail les10@psu.edu. The center's Web site is <http://www.psu.edu/president/cqi>.

View from down under

Students in Craig Brown's Scuba class wait their turn to dive to the bottom of the pool at the McCoy Natatorium on the University Park campus. The photograph was taken through one of the pool's viewing portals.

Faculty/Staff Alerts

Seats available

Tickets are still available for those who want to attend a talk by former Penn State President Bryce Jordan at The Nittany Lion Ballroom on Wednesday, April 16 as part of the Penn State Forum lecture series.

Jordan will discuss "Maintaining and Improving Public Trust: A Challenge for Our Universities." Lunch will begin at 11:30 a.m. and the talk will begin at noon. Tickets are \$10 and include lunch. Reservations can be made by calling the Faculty Staff Club at (814) 865-7590.

Upcoming courses

The following professional development programs are being offered by the Human Resource Development Center. To register for free programs, please call (814) 865-8216. Registration for programs with fees requires a completed registration form located on page 63 of the HRDC course catalog.

■ **Motivating and Empowering Employees for Success**
Meets April 16 from 8:30-11:45 a.m. in 118 Agricultural Science and Industries Building. Cost: \$35.

■ **Coaching for Exceptional Performance**
Meets April 16 from 1:15-4:45 p.m. in 319 Rider Building. Cost: \$35.

■ **Managing Your Boss**
This program provides participants with strategies and skills to effectively manage reporting relationships and work dynamics with their boss. Meets April 17 from 1:15-4:30 p.m. in 319 Rider Building. Cost: \$35.

■ **Applying Mediation Skills to Conflicts at Work and Home**

This program introduces mediation techniques to participants who deal with disagreements between co-workers in the workplace, or who are interested in learning new skills for resolving conflicts in personal relationships. Meets April 18 from 9 a.m. to 4 p.m. in 319 Rider Building. Cost: \$55.

■ **Maximizing Your Memory Power**
Meets April 21 and 23 from 1:30-4:30 p.m. in 118 Agricultural Science and Industries Building. Cost: \$55.

■ **Continuous Achievement: How to Increase Effectiveness at Work**
Meets Monday and Friday, April 12 and 25, from 8:30 a.m. to noon in 319 Rider Building. Cost: \$55.

■ Leading the Transformation

This program will help you plan strategies for change in your organization. Meets April 23 from 2-4 p.m. in 319 Rider Building. Cost: \$25.

■ The "Sound" of Leadership

This program helps participants refine voice qualities to create positive perceptions and develop interpersonal power. Meets April 23, 30 and May 7 from 8:30-11:30 a.m. in 319 Rider Building. Cost: \$65.

Commencement accommodation advice

Parents and families unable to find hotel/motel accommodations in the State College/Centre County area for commencement weekend, May 16-17 at the University Park campus, can rent a residence hall room on the campus. The compressed commencement schedule this year has placed a greater demand on rooms for guests, especially on Friday, May 16.

Visitors can reserve residence hall rooms beginning April 30 by calling the following toll free number: (800) 778-8006. Details and payment arrangements will be explained. To check on availability for either hotel/motel rooms or bed and breakfast in Centre County call (800) 358-5466. Families also may find accommodations in nearby communities.

Job postings

The staff vacancy listing that is printed and distributed from the employment office is available on the Web. To print the file the user must have Adobe Acrobat installed on their machine. This document also assumes that the user is using a Web browser and is connected to the Internet or the Penn State backbone. Each Wednesday the file will be updated with the current week's postings. To get the link connect to <http://www.ohr.psu.edu/home.htm>. The link is titled "All Staff Vacancies for work area postings."

Survey results online

The IBM Master Teacher Team, a consortium of award-winning faculty from the College of Engineering and The Smeal College of Business Administration, posted results of a survey of about 1,000 undergraduates in those colleges on opinions of the 10 best teaching practices employed by various instructors. "Professors Review Best Teaching Practices" correlates the data with college, gender, semester standing and GPA and is available at <http://www.csm.psu.edu/practices.html>.

Awards

Assistant math professor is named Sloan Research Fellow

The Alfred P. Sloan Foundation has selected **Dmitri Burago**, assistant professor of mathematics, as an Alfred P. Sloan Research Fellow. The foundation awards 100 fellowships annually to faculty in the United States and Canada who are in the early stages of their research careers and who have exceptional promise to contribute to the advancement of knowledge in physics, chemistry, computer science, mathematics, neuroscience or economics.

Burago's research involves differential and Riemannian geometry. His studies of periodic curved n-dimensional spaces, like those obtained by mass distributions in general relativity, are proving applicable to many other problems.

Burago received his diploma of mathematician, summa cum laude, in 1986 and his candidate of physical and mathematical sciences in 1992 from the St. Petersburg State University in Russia. He

DMITRI BURAGO

became an assistant professor in the Department of Mathematics and Mechanics at St. Petersburg State University in 1990. He moved to the University of Pennsylvania as a postdoctoral lecturer in the David Rittenhouse Laboratory in 1994 and then joined Penn State as an assistant professor in 1995. Burago received a Faculty Scholar Medal for Outstanding Achievement in 1996.

Began in 1955, the Sloan Fellowship Program is one of the oldest fellowship programs in the nation. Sloan Fellows receive unrestricted grants of \$35,000 for a two-year period, with which they are free to pursue whatever lines of research inquiry are of most interest to them. According to the foundation, this flexibility often is of great value to young scientists who are at a pivotal stage in establishing independent research projects.

Assistant professor of English honored with an award for distinguished service

John C. Tamplin, assistant professor of English at Penn State Shenango, received the Distinguished Service Award from the Eastern Community College Social Science Association.

JOHN C. TAMPLIN

The award recognized Tamplin for his work in founding the organization's journal and serving as its editor-in-chief for the past 12 years. The *ECSSA Journal*, now international in its scope, publishes scholarly and pedagogical articles dealing with the social sciences.

The award also recognized Tamplin for the papers he has presented at past annual conferences, as well as for his publications. In addition, the plaque notes that during Tamplin's 20-year membership in the organization, he has been elected to three terms on its executive board.

At its most recent meeting, Tamplin was re-elected to a fourth term on the executive board and re-appointed to a 13th term as journal editor.

Metallurgy professor honored for contributions to field

Kwadwo Osseo-Asare, professor of metallurgy and chair of the Metals Science and Engineering Program in the Department of Materials Science and Engineering, was awarded the James Douglas Gold Medal from the American Institute of Metallurgical Engineers for his "contributions to the fundamental understanding of interfacial phenomena in leaching, solvent extraction and particle synthesis." The James Douglas Gold Medal award was established by the institute in 1922 "to recognize distinguished achievement in nonferrous metallurgy, including both the

beneficiation of ores and the alloying and utilization of nonferrous metals."

Osseo-Asare obtained B.S., M.S. and Ph.D. degrees from the University of California, Berkeley. His Ph.D. research covered thermodynamic modeling and adsorption phenomena in aqueous processing.

Before joining Penn State in 1976, he worked as a research metallurgist and project leader on nickel and cobalt extraction and refining at Amax Extractive Research Laboratories in Golden, Colo.

Professor earns Solid State Science, Technology Award

Karl E. Spear, professor of ceramic science, has received the Solid State Science and Technology Award, a major award presented by the Electrochemical Society to honor an individual who has made distinguished contributions to the field.

Spear has been a member of the Penn State faculty since 1970. He has served as chair of the Ceramic Science and Engineering Program and is an active member of the interdisciplinary graduate program in materials.

He was associated with the Materials Research Laboratory from 1970 to 1987 and is the author of 145 technical

papers and three patents, primarily on the application of high temperature chemistry and thermodynamics in understanding the behavior of complex materials. Working with **James Leitnaker** of Oak Ridge National Laboratory, he modeled the complex chemistry of dynamically reacting nuclear fuels operating at high temperatures, and gained two patents for safer, longer-life fast-breeder reactor fuels.

Spear is an elected Fellow of the American Ceramic Society and the Electrochemical Society and is currently chair of the ECS High Temperature Materials Division.

Professor awarded for his research accomplishments

Alcoa professor of the solid state **Robert E. Newham** was presented with the 1996 David Turnbull Lecture Award from the Materials Research Society.

The award is given each year to one professor, selected from a national field of candidates, in honor of the person's accomplishments as a researcher and communicator. Newham was presented the

ROBERT E. NEWHAM

award "for pioneering the field of ceramic composites for electronic and optical applications, and in recognition of a distinguished career of guiding students, lecturing and writing."

During the past year Newham also was the Plenary Lecturer for the International Union of Crystallography and a member of

the National Academy of Science MEMS committee.

Penn State Erie receives \$1.1 million donation

Kay Logan, an Erie resident and long-time philanthropist of the arts and education, has given Penn State Erie, The Behrend College, \$1.1 million to fund the purchase, renovation and furnishing of the former Mack estate at the northeastern entrance to the campus on Station Road. In March, the Board of Trustees approved naming the building Logan House.

University officials, in collaboration with Kay Logan, have designed a program for use of the 19th-century Georgian colonial home which they believe will make it a "place of the heart, kindling shared experiences and lasting friendships." Logan House will be the setting for lectures, poetry and literary readings, discussions and music performances.

Students will be invited to attend dinner followed by class with their professors as a significant component of the program at Logan House. Training in etiquette, important in business and professional settings, will be held at the beginning of each evening. In addition, Logan House will be available for activities sponsored by student and faculty organizations. Penn State Erie's Office of Development and University Relations is housed on the second floor.

"The growth — not just in numbers, but in excellence — of the Penn State-Behrend campus dictated the necessity for the purchase of the house," Logan said. "There can now be a suitable setting for the development of innovative, non-traditional programs that provide an even more complete education."

Logan's support of the project is a tribute to her late husband, **Harry A. Logan Jr.**, former chairman of the board and president of United Oil Refining Co. in Warren, Pa. The Logan family is known for its enthusiasm, creativity and philanthropic support of the arts and education. Mrs. Logan is the founder of Music at Noon. The Logan Wintergarden Series, the popular luncheon series now in its seventh season at Penn State-Behrend.

Cultural center in the making

The former Mack estate at the northeastern entrance to Penn State Erie, The Behrend College, will be renamed Logan House in honor of Kay Logan, who is donating \$1.1 million for the home's purchase and renovation. Logan House will be the setting for lectures, poetry and literary readings, discussions and music performances.

The 6,700-plus square-foot structure, completed in 1928, features 20 rooms, three fireplaces and verandas, balconies, terraces and patios. It was originally built by E. H. Mack, founder of the Boston Store and the Erie Endowment, which later became the Erie Community Foundation. The home's formal rooms, including the Helen Temple Logan Parlor, named for Logan's mother-in-law; the Marian Logan Wendell Dining Room, named for Logan's sister-in-law; and the Harry A. Logan Jr. Club Dining

Room, named for her husband, have been professionally decorated by Charles Ambrose. Hand-carved moldings, hardwood floors and French doors throughout the home have been refinished and enhanced with period furnishings including wall coverings, artwork and oriental carpets. Susan Hale Kemenyfi, internationally-recognized artist and lecturer, has designed the gardens.

The Logan House will be officially dedicated in a ceremony planned for July 17.

Eberly College names two Alumni Fellows

Charles M. Tatum and **T. Ming Chu** have been named Alumni Fellows of the Eberly College of Science. Tatum is vice president and Global Business Unit director for plastics additives at the Rohm and Haas Co. Chu is director of cancer research and chair of the Department of Diagnostic Immunology Research and Biochemistry at Roswell Park Cancer Institute and professor of experimental pathology at the State University of New York at Buffalo. The award is the most prestigious honor given by the Penn State Alumni Association.

Tatum is a resident of North Wales, Pa. He earned a bachelor of science degree in organic chemistry, graduating cum laude in 1969 at Amherst College, and a doctoral degree in chemistry with an award for excellence in 1976 from Penn State.

He began his career at Rohm and Haas in 1979 as a senior scientist in agricultural chemicals research. In 1989, he was named research director for the company and was elected a vice president a year later. He has been head of the Plastics Additives Division since 1993 and became a member of the

CHARLES M. TATUM

Chairman's Committee in 1995.

T. MING CHU

Chu, a resident of Buffalo, N.Y., earned his master's degree at North Carolina State University in 1965 and his doctoral degree in biochemistry at Penn State in 1967. He started his career as a postdoctoral fellow at the Medical Foundation of Buffalo and Buffalo General Hospital in 1967, then became a staff

scientist at Roswell Park Cancer Institute in 1970. Since 1977, he has been director of cancer research and chairman of the Diagnostic Immunology Research and Biochemistry Department at Roswell Park and a professor of experimental pathology at the State University of New York at Buffalo.

Chu discovered prostate-specific antigen (PSA) and developed the widely acclaimed prostate-cancer-detection test, which was approved by the Food and Drug Administration in 1986 and now is in wide clinical use. This achievement has been heralded as one of the most important developments in urological oncology in the last 50 years.

He has received the Distinguished Alumni Award from Penn State and North Carolina State University.

The Alumni Fellow Award, presented by the Penn State Alumni Association, is administered in cooperation with the academic units. The Board of Trustees has designated the title of Alumni Fellow as permanent and lifelong.

Harold Harpster, associate professor of animal science, left, and graduate student Randy Swope feed formula to a calf at the Dairy Breeding Research Center on the University Park campus. Although the formula is past its expiration date for humans, their research has shown that it still has nutritional value for the livestock.

Photo: Greg Grieco

Outdated infant, geriatric formula can be fed to calves, swine

By ESTON MARTZ
College of Agricultural Sciences

Like milk, baby formula has an expiration date beyond which it is unfit for human consumption. Manufacturers, who must discard millions of pounds of outdated formula annually, have been searching for better options.

Research in the College of Agricultural Sciences shows that one promising alternative to putting formula in landfills is to use it for animal feed, an option that would save livestock producers money and cut manufacturers' disposal costs.

"Formula has great potential as animal feed because it's made of nutritious ingredients that maintain their quality well beyond the expiration date for human consumption," said Randy Swope, graduate student in animal science.

Swope and Harold Harpster, associate professor of animal science, have been looking at various food processing by-products for cattle feed. "Feeding food industry by-products to animals typically results in a win-win situation," Swope said. "The manu-

facturer cuts disposal costs, and the producer gets a source of nutrients that costs less than conventional feeds."

After comparing the nutrient content of infant and geriatric formulas with the nutritional needs of different animals, Swope and Harpster determined that geriatric formula might be good for swine, while infant formula would work for calves.

The researchers randomly assigned 30 calves at the Dairy Breeding Research Center to one of three liquid diets. Ten calves received a control diet of commercial milk replacer, while the other two groups received infant formula supplemented with either soy or whey protein concentrate. For six weeks, calves were fed the experimental diets. Then all of the calves were weaned and fed the same dry diet for four weeks to see if the experimental diets had any lingering effects.

The results show that outdated infant formula, when supplemented with a high-quality protein source such as whey, can be used safely in calf-rearing systems with substantial savings in feed costs.

Swope and Harpster also collaborated with Ken Kephart, associate professor of animal science, to study the effect of geriatric formula on swine performance. They fed 152 pigs either a conventional corn and soybean-meal diet or one that included geriatric formula and supplemental dry feed.

Pigs fed the geriatric formula grew faster during the first half of the experiment and weighed more at 84 days. "Growth rates evened out over the entire experiment, so slaughter weights were similar for both groups," Swope said. "However, pigs fed the geriatric formula consumed 65 percent less dry feed than those in the control group."

At slaughter, pigs fed the geriatric formula had less fat, more muscle and a higher percentage of lean cuts, so they were worth about \$3.50 more per pig on a commercial grading program.

The research has given producers a new source of inexpensive feed. "The cost savings from using waste formula already are very good, and they will look even better if grain and feed costs rise," said Harpster,

Research

Roundup

Four awarded grant to study family relations, hormones

Four researchers have been awarded a William T. Grant Foundation grant of \$253,318 to explore relations among testosterone, cortisol, children's family relations and behavioral development.

"Testosterone and cortisol are two hormones which hold promise to shed light on linkages between biology, behavior and environments within the context of the family," said Alan Booth, principal investigator for the study. "Up until now, the influence of testosterone and cortisol on family relations and subsequent child development has been little studied."

Booth's colleagues in this project are Susan M. McHale and Ann C. Crouter, both professors of human development and family studies, and Douglas A. Granger, assistant professor of biobehavioral health and human development.

The William T. Grant Foundation was established to support research in any medical or social-behavioral scientific discipline on the development of school-age children and adolescents.

Research shows aging affects brain function

New research in rats shows that aging affects the ability of the brain to process neurological information.

The research provides clues that may eventually help doctors to better understand and treat aging patients, a field of increasing interest as the population bulge known as baby boomers near retirement age.

The neurotransmitter serotonin plays an important role in learning, memory, cognition, sleep regulation and the experience of pain, anxiety and depression, said pharmacologist Joan M. Lakoski, associate professor at The Hershey Medical Center and co-author of the study. Serotonin-enhancing drugs such as Prozac are now commonly used to treat depression, a condition marked by low levels of certain neurotransmitters.

The study indicates that the ability to recover the serotonin function of a key part of the brain appears to decline with age, according to this female rodent model of aging.

"With this research we've identified a specific change in a brain area which has a critical role in learning and memory," she said.

Soap-box derby

Envisioneers debut "Nittany Newtonian"

The Envisioneers, student members of the Leonhard Center for the Enhancement of Engineering, were hosts for "The Nittany Newtonian," a soap-box derby race held on the walkway from Old Main to College Avenue on the University Park campus Saturday, April 5. The race was part of the 1997 College of Engineering Open House.

Students representing six engineering societies built and raced their cars. Students from The Institute of Industrial Engineers, at right, put some finishing touches on their vehicle near the starting line before their turn to race. The institute's car finished in first place.

Second place in the race went to the American Nuclear Society, top, with University Scholar Ai Moni, a third semester student majoring in nuclear engineering and music, driving.

Partings

Allen Cain Jr., maintenance worker, general A at Penn State Shenango campus, from Oct. 5, 1972, to Feb. 19, 1973, to Jan. 1.

Carol A. Christen, extension agent, College of Agricultural Sciences, from Jan. 18, 1982, to March 1.

Virginia E. Feters, press operator, offset duplicator single, Business Services, from Sept. 23, 1966, to March 28.

Bernadine L. Hahn, staff assistant VIII, Business Services, from June 16, 1972, to March 31.

Gillian D. Ratray, assistant professor of kinesiology, College of Health and Human Development, from Sept. 1, 1973, to Jan. 1.

John F. Fearick, janitorial worker, Office of Physical Plant, from Nov. 2, 1981, to Jan. 3.

Vesta B. Rimmey, staff assistant V, Business Services, from April 1, 1983, to Jan. 1.

Betty M. Rininger, staff assistant VII, College of Health and Human Development, from Aug. 8, 1983, to Jan. 1.

Herbert A. Rogers, maintenance worker, general A at Penn State Worthington Scranton campus, from April 4, 1983, to Jan. 4.

Dean S. Rossman, farm supervisor, College of Agricultural Sciences, from July 1, 1972, to Jan. 1.

Blair J. Smith, associate professor of agricultural economics, College of Agricultural Sciences, from July 1, 1974, to Dec. 31, 1996.

Regina S. Steeber, staff assistant VI at Penn State Hazleton campus, from April 17, 1975, to Feb. 28.

Donna S. Stout, staff assistant IV, College of Agricultural Sciences, from Feb. 3, 1975, to Feb. 1.

Christine L. Templeton, coordinator of college relations, College of Communications, from Nov. 1, 1977, to Feb. 1.

Nancy J. Treat, assistant professor of human development and women's studies at Penn State Fayette campus, from Sept. 1, 1977, to Jan. 1.

Helen B. Warren, associate director, Summer Session, Office of the President, from Nov. 29, 1977, to Feb. 1.

Intercom schedule

The *Intercom* publishing schedule for the remainder of the semester and the summer, including deadlines, is as follows:

Issue	Deadline*
April 17	April 9
April 24	April 16
May 1	April 23
May 15	May 7
May 29	May 21
June 12	June 4
June 26	June 18
July 10	July 1
July 24	July 16
Aug. 7	July 30

*All copy is due by noon on the deadline day.

Spanier testifies before Congress on merits of Internet 2 Project

By LISA M. ROSELLINI
Public Information

WASHINGTON — Despite the incredible advances in technology, there are still things that faculty and students at research universities across the country "can't do because of the limitations of a crowded Internet," according to President Graham B. Spanier, who recently urged Congress to support funding for "the next stage" of the Internet.

During his April 9 Congressional testimony on the Internet 2 Project being spearheaded by Penn State, Spanier explained the significance of the project to members of the House Subcommittee on Basic Research. Internet 2, now backed by more than 100 higher education institutions, organizations and private industries, is a new superfast computer network that U.S. universities are planning to

On the Hill

President Graham B. Spanier explained the value of a second, faster Internet to members of Congress on April 9. Penn State is one of approximately 100 universities involved in the project.

University's presence on Capitol Hill continues to increase

By LISA M. ROSELLINI
Public Information

WASHINGTON — In the last two weeks, and in weeks to come, Penn State's presence on Capitol Hill has increased dramatically as administrators take their turn at providing media interviews and expert testimony to Congress on matters that cut to the heart of higher education.

Appearing on CNN at 7:30 a.m. on April 9 to talk about admissions and then moving on to give at 8:30 a.m. keynote speech on technology to a nonprofit consortium of higher

education institutions, President Graham B. Spanier was primed on his 10:30 a.m. same-day interview on CNBC discussing the proposed Internet 2 project. Moving to the forefront on a variety of issues, Spanier is gaining recognition as a national spokesman for higher education. Determined to position Penn State as a leader in technology, research and education, Spanier said it's important that not only Penn State administrators speak out on issues that affect the institution, but that higher education as a whole raise its collective voice and be heard by lawmakers. By his 2

p.m. testimony that day before the House Subcommittee on Basic Research, Spanier — looking a little weary — was well prepared for any questions fired at him by legislators.

"It's critical that we not only continue to be part of the process, but that we increase our presence and direct some of that process," Spanier said after the hearing. "The issues that are being discussed in Washington and in Harrisburg are obviously issues that greatly affect our ability to fulfill our most basic missions."

Spanier testified on the Internet 2

See "Presence" on page 3

Two to receive honorary degrees

A renowned artist and Penn State alumnus and a former University administrator, now head of a national private grantmaking foundation, will be awarded honorary degrees during May commencement ceremonies at Penn State.

John Thomas Biggers, a celebrated muralist who has painted realistic scenes from rural black life and other well-known works over the last five decades, will receive the honorary doctor of fine arts degree as part of the May 17 commencement activities in the College of Arts and Architecture. William C. Richardson, president and chief executive officer of the W.K. Kellogg Foundation and former executive vice president and provost of Penn State, will receive an honorary doctorate of humane letters on May 18 at The Hershey Medical Center.

See "Degrees" on page 2

Ridge to be at Pattee expansion groundbreaking

When the University Libraries breaks ground for construction of the new Paterno Library on Friday, April 25, Gov. Tom Ridge will be there with his hard hat on.

Ridge will leave his shovel at home, however. Instead, he'll join President Graham B. Spanier and Joe Paterno, football coach and co-chair of The Campaign for the Library, atop a bulldozer to move the first load of dirt.

Jesse Arnette, president of the Board of Trustees; Gloriana St. Clair, acting dean of University Libraries; and Sue Paterno, co-chair of The Campaign for the Library with her husband, Joe, also will be present for the 4 p.m. on-site dedication at Pattee Library launching the two-year project

See "Pattee" on page 2

Degrees

Continued from page 1

Honorary degrees may be awarded to those who are eminent scholars, performers, artists and practitioners in academic fields, or individuals who have made particularly distinguished contributions to society in areas such as public service, business or government. This year's recipients, only the fourth and fifth to be named by the University, were nominated by a 15-member committee.

Biggers, named a Distinguished Alumnus in 1972 — the highest honor bestowed by the University Board of Trustees — has been called one of America's "most significant African American artists." He earned his bachelor's, master's and doctorate degrees in art education from Penn State in the late '40s and early '50s, before going on to become one of the nation's leading African-American artists.

Biggers followed his early mentor, Viktor Lowenfeld, to Penn State when Lowenfeld became a Penn State professor in 1946. As an undergraduate, Biggers met the muralist Henry Varnum Poor, the artist working on the Land Grant Frescoes in Old Main, and was inspired to paint murals. After his graduation in 1948, Biggers joined the faculty of then Texas State University for Negroes in Houston, now Texas Southern University, and established the college's art department which, since its founding, has won acclaim for training prominent art educators. In 1952-53, Biggers completed a mural for the Blue Triangle YWCA in Houston, "The Contribution of Negro Women in American Life and Education," the preliminary studies for which had been completed in the studio of Jules Heller, the later founding

WILLIAM K. RICHARDSON

JOHN THOMAS BIGGERS

dean of the College of Arts and Architecture at Penn State.

Though Biggers has many historical ties to Penn State, the two murals, "Night of the Poor" and "Day of the Harvest," which hang in Burrows Building on the University Park campus, are perhaps his most familiar works to most Penn Staters. Biggers' other work on campus is "Sharecropper Mural" at the Paul Robeson Cultural Center.

In 1967, Biggers was named a distinguished professor at Texas Southern University. He retired in 1983 to devote most of his time to his art. In 1990, Biggers received the honorary degree, doctor of humane letters, from Hampton University. In 1995, a major retrospective exhibition organized by the Museum of Fine Arts in Houston and Hampton University toured the United States. He has received national recognition as a teacher and has been hon-

ored as a distinguished African American artist. Biggers, the author and collaborator on many books, has lectured at Penn State, the University of Maryland, Howard, Brown, Texas A&M and other universities.

Richardson, former president of The Johns Hopkins University in Baltimore from 1990 to 1995 and a professor of health policy and management there, joined the Kellogg Foundation in 1995. The Kellogg Foundation, located in Battle Creek, Mich., was established in 1930 "to help people help themselves through the practical application of knowledge and resources." As a private grantmaking foundation, it provides seed money to organizations and institutions that have identified problems and have designed constructive action programs aimed at solutions. Over the last six decades, the foundation has provided more than \$2.93 billion in charitable distributions.

From 1984 to 1990, Richardson was executive vice president and provost of Penn State. He also held the position of professor in the Department of Family and Community Medicine in Penn State's College of Medicine at The Hershey Medical Center. From 1981 to 1984, he was dean of the Graduate School and vice provost for research at the University of Washington in Seattle.

Richardson has been active with numerous foundations, private institutions and public and private sectors. He is a member of the Institute of Medicine, of the National Academy of Sciences, and is a fellow of the American Public Health Association. He serves on the boards of directors of the Kellogg Company; CSX Corporation; the Mercantile Bankshares Corporation and the Mercantile-Safe Deposit and Trust Company. In addition, he serves on the external advisory committee of the Fred Hutchinson Cancer Research Center.

Born in Passaic, N.J., Richardson graduated from Trinity College, Hartford, Conn., with a bachelor's degree in history. He went on to earn a master's degree in business administration from the University of Chicago, Center for Health Administration Studies, Graduate School of Business, in 1964, and a doctorate from the University of Chicago, Graduate School of Business in 1971.

Pattee

Continued from page 1

that will greatly increase the size of University Park's main library. The project also includes renovation of existing space.

When completed, the new Pattee and Paterno libraries will include subject libraries with specialized holdings in life sciences, humanities, social sciences, business and education; a new library for special collections and state-of-the-art information retrieval and telecommunications technologies. The existing East Pattee will be renovated to provide office and work spaces, periodical collections, reference areas and workstations.

The ground and first floors of the Paterno Library at Pattee will house special collections and key operations; the second and third floors will support a social

sciences library and a business library. The fourth floor will have an expanded life sciences library and the fifth floor will include an education library and administrative offices.

After completion of the new library, renovation will occur in some sections of West and Central Pattee where the humanities and arts collections will be housed. The existing map room will become a traditional reading room and West Pattee will include the reserve collection and the extended-hours reading room.

The project is being funded by \$11.7 million raised in The Campaign for the Library and \$14.8 million in state money.

For more information and updates on the project, check out the construction Web site at <http://www.libraries.psu.edu/pubinfo/construction/>.

Penn Staters

Two faculty members have been awarded Fulbright grants this summer. They are:

Ronald L. Filippelli, associate dean for administration, planning and personnel in the College of the Liberal Arts, has been granted an administrative Fulbright to Japan. This is a group program designed to give participants familiarity with higher education, society and culture in Japan.

Dennis K. Davis, professor in the College of Communications, has been granted a Fulbright to attend a seminar on German media and communication science. This group seminar examines the political, economic and social institutions of Germany, including the five new states in Eastern Germany, in light of their recent history and current development.

The University Continuing Education Association awarded **Laura Doughty**, coordinator of alumni and community relations at Penn State Great Valley, and **Jill Eidenberg**, publications specialist, a silver award for fier design in the 1997 Division of Marketing and Promotion awards. The two-color fier was designed for the Martin Luther King Jr. Celebration week activities organized by Great Valley's continuing education department.

Arundo Donax, an orchestral composition for clarinet by **Burt Fenner**, professor emeritus of music, is featured on a new compact disc, "Richard Stoltzman: Alchemy" from MMC Recordings, 1997. Richard Stoltzman, considered the "pre-eminent clarinetist of our time," performs Fenner's work with the Warsaw National Philharmonic, with George Manahan conducting.

B. Lakshminarayana, Evan Pugh professor of aerospace engineering and director of the Center for Gas Turbines and Power, was the invited keynote speaker at the VI Latin American Turbomachinery Congress and Exhibition in Mexico City. His address was titled "Recent Developments on Gas Turbines for Power Generation and Advances in Turbomachinery."

Suzanne Mohney, assistant professor of materials science and engineering, has received the 1997 Young Leader Award of The Minerals, Metals & Materials Society (TMS), representing the society's Electronic, Magnetic and Photonic Materials Division. The Young Leader Award honors outstanding young professionals who are active in the materials field and have leadership potential. Mohney was selected as one of 10 young leaders.

Spanier

Continued from page 1

create. It is expected to be 10 times faster than the current Internet and will link universities, colleges and national laboratories, allowing faster transfer of data and providing the ability for researchers to work simultaneously on projects. The hearing was the last in a series being held to examine the National Science Foundation's proposed 1998 budget.

In his talk, Spanier dispelled the fear that Internet 2 was only an effort on the part of the most prestigious institutions to create their own private network. He also reassured representatives that the Internet 2 Project was "entirely compatible and complementary" with President Clinton's Next Generation Internet (NGI) initiative — a three-year, \$300 million effort which calls for the development of Internet 2 and experimentation with the next generation of networking technologies. The NGI goal is to increase the speed of the current Internet 100-fold.

"Our goals are to rapidly deploy our success to the benefit of others in the educational community and beyond — K-12, libraries and institutions... who can't afford to take these first steps," Spanier said. "At Penn State, our work with Internet 2 involves the commitment of a significant amount of time and millions of dollars of our own resources. Investments on the same scale are being made by scores of universities around the country."

Presence

Continued from page 1

Project on behalf of the National Association of State Universities and Land-Grant Colleges (NASULGC) and other higher education associations. He is chair of NASULGC's Commission on Information Technology.

On May 7, Spanier will again travel to Washington to act as "emcee" for a Department of Defense event where approximately 25 universities — including Penn State — will set up demonstrations of Department of Defense basic research being conducted on campuses across the nation. While Spanier introduces various Congressional speakers such as Strom Thurmond and Rick Santorum, Penn State will show off the research it has conducted at both the Rotocraft Center for Excellence and the Institute for High Performance Computing Applications. The basic research being performed at the Rotocraft Center is aimed at lessening the noise produced by aircraft, solving structural vibration problems and improving safety. The Institute for High Performance Computing Applications concentrates its efforts on bringing together faculty and students in the use of parallel computers to solve industry problems.

On that same day, Rodney Erickson, dean of the Graduate School and vice president for research, and Anthony Wagner, director of Legislative Affairs, also will be in Washington visiting members of Congress and providing background information on the

The answer man

President Graham B. Spanier fields questions from members of Congress on the merits of Internet 2.

Photo: Greg Grieco

The academic community has committed \$50 million per year for the next five years to Internet 2. The \$100 million requested by the Clinton administration for NGI, is an important part of the total funding picture for Internet 2, according to Spanier. Spanier estimated that approximately \$30 million of that amount would actually go to universities working on Internet 2.

"We need this initial support from the government. Once we are able to show commercial entities that this is feasible, they will offer their support," Spanier said. "This is a modest request compared to what 100 universities have said they will put in for this project."

The president also explained that the government funding was a "modest investment" when compared with the pay back in terms of what the pro-

ject can accomplish first for researchers, and later for the general public and industry.

Rep. Mike Doyle from Pennsylvania asked if the "one-time" investment from the government was sufficient or would the project require continued funding. Spanier said the evolution of Internet 2 would probably follow the path of the original Internet with commercial investments coming in even more rapidly at the very beginning. Currently, seven companies — including Ameritech, IBM, MCI and Sun Microsystems — have signed up to provide support for Internet 2.

"We see this as a continuing cycle of government, university and private investment," Spanier responded. Spanier said an announcement of "substantial corporate support" is expected in the near future.

Gil Knecht, a Congressman

Taking mental notes

Rep. Gil Knecht of Minnesota listens intently to Spanier's testimony. Spanier explained to him and other members of Congress how the Internet 2 Project is compatible and complementary with President Clinton's Next Generation Internet initiative.

Photo: Greg Grieco

from Minnesota, asked about the cooperation between agencies and how the project fit with NGI.

"Internet 2 can fit into the larger picture of NGI," Spanier said. "The Internet 2 goal of a 10-fold increase fits in well with the NGI goal to increase the Internet's capacity 100-fold. I see the Internet 2 as a subset of NGI — completely compatible. It will be part of the normal evolution of the Internet, not a stand-alone enterprise."

"As we achieve the goals of each step in the process, it will allow the nation, universities and industry as a whole to move ahead and advance," he said.

After hearing testimony, the subcommittee reports back to the House Science Committee. A vote on the funding issue will not happen until late this summer.

Looking for answers

Rep. Mike Doyle of Allegheny County, a Penn State alum, was one of several legislators to ask Spanier about Internet 2.

Photo: Greg Grieco

projects, Erickson recently testified (April 10) before a subcommittee of the Senate Committee on Armed Services about the need for continued federal funding for research. In his testimony Erickson stressed the importance of Department of Defense funding for basic and applied research and for educating the next generation of scientists and engineers.

"Research is the seed for the entire science and technology development process, and it directly affects the crop of applied technologies that we harvest," he said.

In 1996, Penn State's total research activity amounted to about \$350 million, according to Erickson. Penn State ranked second in the nation in both

Department of Defense-sponsored funding industry-sponsored funding.

"Penn State faculty are conducting more than 200 Department of Defense-supported research projects — a portfolio valued at \$100 million," Erickson told members of Congress.

Erickson made the case that while industry is funding some projects, it has come to rely almost exclusively on the public sector for the long-term basic research underlying the development of both defense systems and commercial products — a strong reason for continued governmental support.

Spanier's testimony on April 9 on the Internet 2 Project (see above story), was coupled with testimony from officials of other universities on various federally funded initiatives overseen by the National Science Foundation, an independent federal agency which promotes and advances scientific progress in the United States. Neal Lane, director of the NSF, and Richard Zane, chairman of the National Science Board, also spoke on the NSF's budget request for fiscal year 1998. The NSF provides approximately 25 percent of basic research funding at universities and more than 50 percent of the federal funding for basic research in certain fields of science.

"There is agreement in the higher education community that we should be playing a lead role in advancing our collective agenda in areas such as intellectual property issues, telecommunications infrastructure, research and information technology," Spanier said. "By doing this we can come to a consensus on the most critical issues facing higher education."

LECTURES

Priestley chemistry lectures to be given April 23 to 25

Alexander Pines, professor of chemistry at the University of California at Berkeley and faculty senior scientist at the Lawrence Berkeley National Laboratory, will present the 1997 Joseph Priestley Lectures from April 23 to 25 at the University Park campus. The three-lecture series, "Magnetic Moments," is sponsored by the Eberly College of Science and by a grant from Exxon Research and Development Laboratories.

The lectures, which are open to the public, include: "NMR/MRI: All Lit Up" at 8 p.m. Wednesday, April 23, in 102 Thomas Building; "Magic and Other Angles" at 4 p.m. Thursday, April 24, in 5-5 Osmond Laboratory; and "Gauge Kinematics of Spins and Cats" at 12:15 p.m. Friday, April 25, in 5-5 Osmond Laboratory.

Pines, whose main research inter-

ALEXANDER PINES

ests include nuclear magnetic resonance (NMR) theory and experiment, has developed techniques that are widely used in chemistry and materials science.

Pines received his doctoral degree in 1968 in chemical physics at the Massachusetts Institute of Technology and then joined the faculty at the University of California at Berkeley in 1972. He is faculty senior scientist at the Lawrence Berkeley National Laboratory and professor of chemistry at the University of California, where he holds the President's Chair in Undergraduate Education.

The Priestley Lectures are named in honor of Joseph Priestley, the 18th century English chemist who discovered oxygen and eventually settled in central Pennsylvania. These lectures were established by the late Professor Wheeler P. Davey in 1926.

Talk to focus on women, biodiversity, biotechnology

The Science, Technology, and Society Program will host play for a visit by physicist and social activist Vandana Shiva to the University Park campus. A public lecture, "Women, Biodiversity and Biotechnology," will be held at 7 p.m. Monday, April 21, in 101 ASI Building.

Shiva was a scientific researcher at the Indian Institute of Management in Bangalore. She is the science and environment adviser of the Third World Network and the Asia Pacific People's Network (APPEN), associate editor of the *Ecologist* and a board member of a number of other national and international bodies. In 1993 she was awarded the Right Livelihood Award, also known as the alternative Nobel Prize. For the past 10 years, Shiva has been a

spokesperson for socially responsible science, particularly in the area of plant resource use and preservation and respect for indigenous agricultural knowledge. She is a critic of agricultural biotechnology and advocate for the preservation of farmers' rights and conservation of biodiversity. Shiva is currently the director for the Research Foundation for Science, Technology and Natural Resource Policy in New Delhi, India, and has authored several books.

Shiva's visit also is being supported by the College of Agricultural Sciences, The Penn State Sigma Xi Chapter, Women Studies Program and the WISE Institute. For more information contact Hector E. Flores, director, STS Program, at (814) 865-3043.

ing and predicting the chemistry of the processing, fabrication, behavior and properties of high temperature gaseous and condensed materials.

For more information, call (800) 778-8632, or visit the Web at: <http://www.cda.psu.edu/C&I/HTMC-IX/>

Green Design Conference set for April 20

The Fourth Penn State Green Design Conference will be held from 9 a.m. to 2 p.m. Sunday, April 20, at The Nittany Lion Inn on the University Park campus. All students, faculty, staff and environmentalists interested in sustainable and unique design concepts for buildings, industry and Penn State are invited to attend.

As part of the five-hour event, there will be speakers, interactive presentations and a poster session on pollution prevention. The keynote address will be given at noon by William Coperthwaite, social designer and president of the Yurt Foundation. He will discuss "Designing with a Conscience."

For more information on the conference, sponsored by The Leonard Center, the Center for Sustainability, CE477 and the Pennsylvania Space Grant Consortium, call Geraldine Russell at (814) 863-7688.

Lecture examines genetic diversity in tomatoes

Charles M. Rick Jr., will present "Chasing the Wild Tomato: Collecting, Maintaining and Utilizing Germplasm" at 12:45 p.m. Monday, April 21, in 101 Agriculture, Sciences and Industry Building on the University Park campus.

Rick examines the depletion of genetic diversity within traditionally cultivated tomatoes and how breeders are increasingly relying on exotic sources—particularly related wild species—for desired traits.

This lecture is sponsored by the research/training programs in plant stress and in root biology, the Science, Technology and Society Program, The Life Sciences Consortium and various departments. For more information, call Janice Kennedy at (814) 865-3155.

Attorneys may earn credit at videoconference

Pennsylvania attorneys who practice family law can earn CLE credits at the "Family Law Update Interactive Videoconference," on Saturday, April 26. The daylong seminar is a joint offering of Penn State and the Dickinson School of Law.

The seminar, which will cover equitable distribution, alimony, support, custody and ethics issues in family litigation, has been approved by the Pennsylvania Continuing Legal Education Board for five hours of substantive law, practice and procedure credit and one hour of ethics credit. The seminar will be presented at the following locations: Penn State Erie, The Behrend College; New Kensington campus; University Park; Penn State Harrisburg; Worthington Scranton campus; and Penn State Great Valley. The use of interactive video technology will enable participants at these different sites to interact with one another and the presenters.

For information about program content, contact Karen Brutz by phone at (717) 240-5272 or by e-mail at kbrutz@dsd.edu. For information about registration, contact Jean McGrath at (814) 863-8306.

Talk examines impediments to economic development

Rural communities must play a role in providing firms with a technically skilled workforce, according to Penn State expert David Passmore.

Passmore, a professor of education and senior scientist in the Center for Trade, Technology and Economic Growth at the University Park campus, will focus on how a technical skills deficit can impede economic development during a free noon presentation April 30 at the Penn State Downtown Center in Harrisburg.

He will explain how a technical skills deficit in a workforce in a rural Pennsylvania community can have a devastating effect on economic development and can impede competition for attracting new business.

For more information on the Penn State Downtown Center lecture, call (717) 783-0433.

Series projects future of health and disease in state

Dr. Toni Miles, director of the Center for Special Populations and Health, will speak as part of the lecture series, Prognosis for the Decade—The Future of Health and Disease in Pennsylvania, on "Projections on the Health Care Needs of Pennsylvania's Minority Population" from 8 to 9 a.m. Tuesday, May 5.

Dr. Julian Biebuyck, associate dean for academic affairs, professor and chair of anesthesia at The Hershey Medical Center, will continue this lecture series, sponsored by The Hershey Medical Center, as he speaks on "Health Care Providers: Will the Demand Equal the Supply?" from 8 to 9 a.m. Monday, June 2.

These lectures are designed to inform members of the state Legislature, state government agencies and those involved in health care policy about projections on health and disease throughout Pennsylvania in the near future.

Both lectures will take place in the Penn State Downtown Center in Harrisburg. To register, call the center at (717) 783-0433.

International conference on chemistry to be May 19-23

The ninth international conference on High Temperature Materials Chemistry (HTMC IX) will be held May 19-23, at the Penn State Conference Center Hotel, at University Park. The conference will include invited lectures and contributed papers on topics related to understand-

More Lectures

Executive to present Shoemaker Lecture

One of Pennsylvania's leading executives, **John T. Ryan III**, will visit University Park on Friday, April 25, to present the sixth annual G. Albert Shoemaker Lecture in Mineral Engineering.

He will speak at 4 p.m. on "Business in the '90s: A Contrarian View" in 22 Deike Building. Refreshments will be served at 3:30 p.m.

Ryan is chairman and chief executive officer of Mine Safety Appliances Co., manufacturer of equipment and systems for worker and plant protection, with products ranging from filtered respirators to detection devices for toxic substances. The company was founded in Pittsburgh by two Penn State alumni in 1914.

JOHN T. RYAN III

Ryan is a member of the Council on Foreign Relations, a director of the Regional Industrial Development Corporation of Southwestern Pennsylvania and a member of the executive committee of the Allegheny Conference on Community Development. He

is a graduate of Notre Dame and holds an M.B.A. from Harvard University.

This lecture series was established in 1992 to honor the memory of G. Albert Shoemaker, a distinguished alumnus of Penn State, former Penn State trustee and president of the Board of Trustees from 1970 to 1972. The series is administered by the Department of Mineral Engineering.

Award recipient to talk on growth through teamwork

Karl P. Kimmerring, vice president of manufacturing-steel at the Timken Co. in Canton, Ohio, will present a lecture in conjunction with receiving the David Ford McFarland Award presented annually to a Penn State graduate who has achieved distinction in the field of metallurgy, from the Penn State Chapter of ASM International.

Kimmerring's technical presentation on "Profitable Growth Through Teamwork and Technology" will begin at 11 a.m. Saturday, April 26, in 112 Walker Building on the University Park campus. He will be honored that same day at a banquet.

As vice president of manufacturing-steel, Kimmerring is responsible for all of Timken's steel manufacturing operations supporting four steel making facilities, 3,000 employees, and annual steel sales of \$1 billion. He received his B.S. degree in metallurgy from Penn State in 1979 and began his career with Timken's Harrison Avenue melt shop. While carrying out his

metallurgical and managerial responsibilities there, he attended Kent State in pursuit of his MBA, which he received in 1982. After receiving his J.D. in corporate law from the University of Akron in 1987, he was promoted from general supervisor of melt shop operations to assistant superintendent of labor relations.

In 1989 he was transferred to Labrobe Steel (a subsidiary of Timken) as superintendent of labor relations and became business manager for tool and die steels, and then general manager of primary operations and engineering.

In 1995 he was promoted to president of Canadian Timken, Ltd., and in 1996 returned to Canton to assume his current position.

The McFarland Award is named in honor of David Ford McFarland who joined the Penn State faculty in 1920 as head of the Department of Metallurgy, a position he held until his retirement in 1945.

Ethics in university research and education workshop set

A workshop on Ethics in University Research and Education will be held from 9 a.m. to 1 p.m. Monday, April 28, at the Nittany Lion Inn on the University Park campus. Up to three representatives from each graduate program, including at least one graduate student, are expected to attend.

The purpose of the workshop is to raise awareness of the importance of responsible conduct in research and education. The workshop will serve as a forum for identifying issues and for developing strategies for advancing ethics in research and education at Penn State.

Rodney Erickson, vice president for research and dean of the Graduate

School, will open the workshop, followed by the keynote address, "Research Integrity: National Issues, Local Challenges," by C. K. Gunsalus, associate provost at the University of Illinois at Urbana-Champaign.

The workshop will conclude with a luncheon, during which the use of case study scenarios will be discussed by **Joan Lakoski** of the College of Medicine at The Hershey Medical Center.

The Workshop on Ethics in University Research and Education is organized by the Graduate Council Committee on Research and the Graduate School. For more information, contact **Mary Hosband**, 114 Kern Building.

Learn about the transition to menopause May 10

A workshop titled "Menopause: Making the Transition" will be presented at the Penn State Conference Center Hotel at University Park on May 10, from 8:45 a.m. to 12:45 p.m.

This one-day workshop is a continuing and distance education service of the College of Health and Human Development and is supported by the Dr. Thomas M. Nardozzo Community Service Endowment.

The following topics will be addressed:

- Keynote presentation: "Perspective on Menopause — Body Image," **Phyllis Kernoff Mansfield**, professor of women's studies and health education, Penn State;
- "Hormone Replacement Therapy — Is It Right for You?" **Dr. Karen Bascom**, Internal Medicine Associates;
- "Mind Over Menopause," **Judy Zarit**, clinical psychologist; and
- "Healthy Transition — Your Body — Nutrition and Fitness," **Kristine Clark**, director of sports nutrition, Penn State.

The \$69 registration fee includes instruction, handouts and a food and beverage break.

Health America (HMO) members note: partial reimbursement is available for this program. To register, call (800) PSU-TODAY.

Business lectures tackle world's stock markets

As the world's stock markets are increasingly intertwined, the opportunities for U.S. investment in foreign corporations are increasing. But, while foreign stocks may sound glamorous, there are a number of risks which need to be understood by an investor in America.

The next installment in the "Current Issues in Business" lecture series, sponsored by the Penn State Harrisburg School of Business Administration, will feature a look at international investing with assistant professor of professional accountancy **Robert Larson**.

Larson, chair of the Professional Accountancy Program at Penn State Harrisburg and a certified public accountant, will offer his advice at a noon presentation May 13 at the Penn State Harrisburg Eastgate Center, 1010 N. Seventh St. in Harrisburg. A question-and-answer period will follow.

For information or a reservation, contact the Penn State Harrisburg Eastgate Center at (717) 772-3590.

Challenges and Achievements conference is April 19

A free conference, "Challenges and Achievements VII" for women faculty, students and staff in the sciences and engineering, will be held at the Nittany Lion Inn from 9 a.m. to 1 p.m. Saturday, April 19. While the conference is geared toward women, men also are welcome.

Patricia Wright, director of the Institute for the Conservation of Tropical Environments of the State University of New York, Stony Brook, will talk about her life in science at her 9 a.m. keynote address.

Challenges and Achievements is a series of annual "how-to" workshops to increase the preparation of women for work or study in non-traditional fields.

All workshops will be held in Keller Building near the Nittany Lion Inn. To register, e-mail the WISE Institute at wise@psu.edu or call (814) 865-3342 for more information.

The ARTS

AT PENN STATE

Practice makes perfect

Bruce Trinkley, associate professor of music, conducts a rehearsal for his opera, *eve's odds*, which will be performed as part of the Penn State Opera Theatre's presentation of "Opera at the Pavilion." The opera will be performed at 8 p.m. Friday, April 18, and Saturday, April 19, in the Pavilion Theatre on the University Park campus. Tickets are \$4.50 and are available through the Arts Ticket Center at Eisenhower Auditorium, by phone at (814) 865-0255 or at the door.

Photo: Greg Grieco

"Damn Yankees"

The Penn State Thespians will present the hit Broadway musical "Damn Yankees" at 8 p.m. on April 18 and at 2 and 8 p.m. on April 19 in Schwab Auditorium on the University Park campus.

Tickets are \$7 for the general public and free to students with ID. Tickets may be purchased at the Eisenhower Auditorium or the Thespians box office, across from the HUB desk. For information, call (814) 865-9461.

Jazz group at Hazleton

The latest in the 1996-97 series of cultural events at the Penn State Hazleton campus will take place on Friday, April 18, with a free performance by the jazz ensemble *The Big Push* at 8:30 p.m. in the Commons Building.

Puppet show

At 1 p.m. Saturday, April 19, Penn State Mont Alto theatre arts students will present three free puppet shows for local children at the Alexander Hamilton Memorial Free Library, Waynesboro. The first show highlights good nutrition and the second, titled "The Ball Game," discusses the difficulties of being accepted. The third is called "Don't Talk to Strangers."

Odyssey Through Literature

On the April 20 episode of *Odyssey Through Literature*, host **Leonard Rubinstein** discusses the 1960s with **Archie Loss**, professor of English at Penn State Erie, The Behrend College.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WPSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania.

Pennsylvania Quintet

The Pennsylvania Quintet, Penn State's resident wind chamber music ensemble, will present a free recital at 3 p.m. Saturday, April 19, at the Faith United Church of Christ, 300 E. College Ave. in State College. The program will include works from the quintet's new music project by **Tom Benjamin**, **Steve Cohen** and **William Albright**.

The members of the quintet, all faculty members in the School of Music, are: **Eleanor Duncan Armstrong**, associate professor of music, flute; **Tim Hertz**, assistant professor of music, oboe; **Smith Toulson**, professor of music, clarinet; **Lisa O. Bontrager**, associate professor of music, horn; and **Daryl Durran**, associate professor of music, bassoon.

Essence of Joy

Essence of Joy will present a spring concert, "Total Praise," at 4 p.m. Sunday, April 20, in the School of Music Recital Hall on the University Park campus. The program will include spirituals, traditional and contemporary gospel.

Anthony T. Leach, assistant professor of music, is the conductor.

Tickets are \$4 for non-students, \$2 for students, and may be purchased in advance through the School of Music office at (814) 865-0431 or at the concert. For more information, call Leach at (814) 865-6521.

Lecture and recital

Jason Byrnes, a graduate assistant in tuba/euphonium in the School of Music, will present his master's lecture-recital on **Alec Wilder's** compositions for tuba and horn at 6 p.m. Monday, April 21, in 122 Music Building II on the University Park campus.

The event is free to the public.

Orchestra concert

Two University orchestras, the Penn State Philharmonic Orchestra and the Penn State Chamber Orchestra, will present the final performances of their seasons in concert under the direction of **Pu-Qi Jiang**, associate professor of music, at 8 p.m. Monday, April 21, in Eisenhower Auditorium on the University Park campus. Guest conductor is **Fouad Fakhouri**, a master of music student in conducting.

Tickets are \$4 for non-students, \$2 for students and are available in advance at the Arts Ticket Center, (814) 863-0255, and on the evening of the performance.

Jazz Ensemble

Centre Dimension Jazz Ensemble, under the director of **Dan Yoder**, professor of music, will present a concert of *Big Band Jazz* at 8 p.m. Tuesday, April 22, in the School of Music Recital Hall on the University Park campus.

There will be a \$3 admission at the door.

Elijah on stage

One of opera's greatest superstars is coming to State College April 23. **Sherill Milnes**, for years a leading baritone with New York's Metropolitan Opera, will perform the title role in **Felix Mendelssohn's** oratorio *Elijah* with the State College Choral Society, in the final concert of their 1996-97 season. The performance begins at 8 p.m. at Eisenhower Auditorium on the University Park campus.

Also performing as soloists in *Elijah* will be soprano **Kate McGraw**, mezzo soprano **Jan Wilson** and tenor **Richard Kennedy**, a School of Music faculty member.

Tickets are \$20 and may be purchased in advance at the Eisenhower box office the night of the concert. All tickets are general admission. For more information, call the box office at (814) 863-0255.

BRYCE JORDAN CENTER

Manilow to visit

Adult contemporary artist **Barry Manilow** will appear at 8 p.m. Friday, July 18, at The Bryce Jordan Center on the University Park campus. Tickets are priced at \$39.50 and \$29 for reserved seating and can be purchased at the Bryce Jordan Ticket Center, Eisenhower Auditorium South Box Office, selected Uni-Mart ticket outlets, Commonwealth Campus ticket outlets or by calling (814) 865-5555 or (800) 863-3336.

Fresh on the heels of his highly-acclaimed A&E network special and his 26th Top-40 record, Manilow's all-new concert will feature his greatest hits from the past 20 years and the latest hits from his new album, "Summer Of '78."

Manilow is planning an interactive show, where the audience will choose from a catalog of 29 Manilow albums. Select audience members will use interactive electronic devices to choose individual songs.

Upcoming events

■ **April 19:** World Wrestling Federation, 8 p.m.

Tickets: \$18, \$15, \$11 for reserved seating, on sale now.

■ **April 28:** Steven Curtis Chapman, with audio adrenaline and Carolyn Arends, 7:30 p.m. Tickets: \$20, \$24.50, on sale now. Group discounts are available.

■ **May 3, 4:** The Royal Hanford Circus, 2 and 7 p.m. both days.

Tickets: \$13 and \$11 for adults; \$11 and \$9 for children 12 and under, on sale now. Group rates are available.

■ **May 6:** No Doubt, with CIV and The Vandals, 7:30 p.m.

Tickets: \$21.50 for reserved seating and general floor admission, on sale now.

■ **May 16, 17:** Commencement

Times: Friday, 3 and 8 p.m.; Saturday, 9 a.m., noon, 3 and 6:30 p.m. For more information call (814) 863-8500 or (814) 863-6357.

■ **June 12-14:** Preview '98 regional track show

Times: Thursday, 5-8 p.m.; Friday, 10 a.m. to 7 p.m.; Saturday, 10 a.m. to 7 p.m.

For booth information call (814) 863-1570

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu/>.

Faculty/Staff Survey

A follow-up

No matter where their academic interests lie, the faculty, staff, and students of our University community learn through the methods of careful observation, critical analysis, and collegial discussion. We can learn about ourselves and our workplace environment in much the same way. Like our academic endeavors, this knowledge is critical to the future. The Faculty/Staff Survey provides important input and encouragement for this process of learning and improvement at Penn State.

The pages that follow contain selected examples of how work units throughout the University have used the survey data as a starting point for constructive change. These best practices do not represent a comprehensive list but are responsive to some of the most common concerns expressed by staff and faculty in virtually all areas of Penn State. Many of these initiatives might be easily adapted to other work units, and I encourage you to consider their application.

There are other future improvements outlined in many unit strategic plans, and as these initiatives get underway, we will see the impact of this institutional learning process continue to grow. Our goal is to make Penn State a better place for faculty, staff, and students to work by humanizing the University. It is by putting people first that Penn State's tremendous potential will be best fulfilled.

I am grateful to everyone who has contributed to this important effort and I deeply appreciate the progress we are making with your help in humanizing Penn State.

Graham B. Spanier
President

Throughout the University, both academic and support units are addressing the findings of the Faculty/Staff Survey. The efforts outlined in this and two earlier Intercom inserts represent a sampling of the creative initiatives that have been developed to improve communication, respect, and professional development at Penn State.

Over time, follow-up surveys will provide feedback so units can evaluate the effectiveness of their programs and incorporate those that have proven successful into their daily activities.

Penn State's goal is to provide an environment that will nurture a highly motivated, professional workforce with continuously updated knowledge and skills that will help the University meet the challenges of the new century.

Dr. Billie S. Willits, Assistant Vice President for Human Resources

"Let's Talk" meetings held for Housing and Food Services Units

Because a need for better communication and increased respect were areas highlighted by Housing and Food Service staff who completed the Faculty/Staff Survey, the division has developed a multi-faceted response to its workers' concerns.

"To obtain more detailed information, we held thirty 'Let's Talk' meetings for all employees in all work units," explains Carolyn Fisher, director of human resources. "Participants were free to discuss issues as a group, with two or more 'buddies', or one-on-one."

Supervisors and managers were briefed after each meeting, and, whenever possible, employees' needs were quickly met. Some problems were job-specific. Housing staff who take out trash, for example, asked for raingear to keep them dry in bad weather, and rain ponchos were ordered and distributed.

Some concerns were more general. When wage-payroll employees, in particular, reported that they often felt a lack of respect for their efforts, training sessions were arranged for supervisors to reemphasize the value of the contributions made by students and part-time employees.

Another response to the Survey's findings was the installation of suggestion boxes in each Housing and Food Services work unit. Suggestions and questions are being examined monthly, and answers are posted on employee bulletin boards.

Consistent with the emphasis being put on making certain that employees feel their work is valued, Human Resources has developed a poster program that recognizes "Positively Outstanding Employees." Featured individuals may have provided a special service to customers, or helped with worker recruitment. Pollock Dining Commons' Deb Hall saw her name on a poster when she celebrated sixteen years of perfect attendance on the job.

As part of its Goal Statement, Housing and Food Services is pledged to develop its human resources by "providing optimum personal satisfaction and professional growth." That

means offering on-going training opportunities to all employees, according to Carolyn Fisher.

New management hires began with a four-day orientation program, and then take part in the annual spring training sessions required for all managers. Technical service employees take two days each fall to brush up their skills.

Everyone is invited to an annual program featuring a well known author or motivational speaker. Last year, for example, participants heard Claire Raines, author of *Twenty Something*, and Karen Tracey, senior management development specialist from Wendy's International.

"It was a really upbeat presentation," recalls Debby Watson, an assistant manager in Johnston Commons, East Halls. "You could feel the energy in the room."

One of the recent highlights of food service training was a two-week presentation conducted by executive master chefs from the Culinary Institute of America for more than 50

Modeling new raingear for Housing and Food Services are: Top Row, left to right, Mary Ann Miller, Shelley Houser, Sherri Lamenti, Dolores Durbin, Linda Lutz, Ken Kelligher and Sandy Livingston. Bottom Row, left to right, Linda Jordan, Tina Woomer, Linda Meyers, and Sally Hilgar

cooks from both University Park and the CES campuses. An enthusiastic participant, Cathy Dobson, dining commons food preparer, describes the program:

"They talked to us about everything—ordering supplies, garnishing presentations, handling knives, cleaning up tables. It made me stop and realize how many people are involved in getting the food we cook to the table. We have to work together as a team because if one person is not productive, the entire operation suffers."

"Diversity is important to teamwork. Teamwork brings people who are different together, and the outcome is richer, of higher quality, and more creative, because each team member brings different perspectives to the table."

Steve Hayes, Senior Employment Specialist and Recruiting Coordinator

Calling themselves, "Morale Movers", the team that produced the College of Communications CQI report included: Top Row, left to right, Amy Hensal, Beth Haupt, and Leslie Hutchins. Bottom Row, left to right, Corinna Bressler, Simon Tarr, Sharon Symanovich, Angie Bolton, and Monica Spence.

Communications College "Morale Movers" address staff concerns

Calling themselves "Morale Movers," ten staff members in the College of Communications met as a CQI team over a two-and-a-half month period to address issues raised by the Faculty/Staff Survey.

Dean Terri Brooks began the process last summer by hosting a series of small luncheon meetings where each staff member in the College was able to voice his or her concerns about the work environment and to suggest how situations might be improved.

"Discussions at these luncheons produced several hundred comments," says Sharon Symanovich, human resources representative for the College and team leader. "I grouped them together under six major headings, and then staff were invited to choose which of the categories should be dealt with first."

"Improving Morale" was the category selected, and a team of ten volunteers began analyzing the comments and considering recommendations for solutions.

Team members were Angie Bolton, Corinna Bressler, Beth Haupt, Amy Hensal, Leslie Hutchins, Lisa Richtschel, Joseph Selden, Monica Spence, Sharon Symanovich, and Simon Tarr. The Morale Movers considered six issues: job responsibilities, teamwork, workplace environment, communications, facilities/equipment, and faculty-staff relationships. Members not only came up with recommendations for action, but facilities whenever possible, they undertook prompt corrective measures.

One such action has resulted in a comprehensive listing of "Staff to Call" in the College of Communications. "Already in print, it is designed to guide both faculty and staff to individuals who can help them in the performance of their work. Listed alphabetically by job description are everyone from the Course Room Scheduler and the Safety Officer to the World Wide Web Administrator and the holder of the College's master key."

In another action, the Morale Movers are preparing a handbook for newcomers, which will include the "Staff to Call" listing, and is a direct response to concerns about a lack of orientation procedures for new College staff. The team has also proposed the establishment of a "buddy system" to help introduce new staff to office procedures.

A third issue flagged for action by the Morale Movers relates to the distribution of furniture to staff when a rearrangement of offices takes place. If there happen to be any leftover desks, file cabinets, or chairs, and there is more than one claimant for a piece, who should get it?

Under the policy recommended by the team, anyone needing a particular piece of furniture can register in a central log, and requests will be honored on a first-come, first-served basis with no regard given to staff or faculty status. Deans, however, would still retain the right to override furniture distribution decisions.

Commenting on the Morale Movers' report, Dean Brooks says:

"The CQI staff team gave the College a blueprint of not only areas we can improve, but also useful steps for improving them — from sweeping faculty-staff relationships to the daily basics that affect our quality of life."

"I'm very proud of the quality and thoroughness of their CQI report."

"I believe Penn State is only in the beginning stages of learning how to capitalize on diversity in teams. But as we stretch and grow, our efforts to increase diversity will help make us a better and stronger institution."

Staff assistants from Berks, Allentown share information as merger date nears

"The Faculty/Staff Survey results actually mirrored those from an earlier internal human resources survey we conducted at Berks," says James P. Sterganos, director of business and community services at the Campus.

"One major finding was a request for more human contact and less reliance on communication by data and statistics," Mr. Sterganos points out.

Other concerns included developing programs to make new employees welcome on the campus, finding ways to update and distribute information about benefits, and ensuring that adequate information on job responsibilities was made available.

Faculty and staff expressed a keen interest in professional development, with staff asking for appropriate training in computer software. Faculty has wanted more pertinent information on how positions were filled and factors influencing the length of time required to fill them.

"Our response," Mr. Sterganos continues, "was to set up a human resources committee with representatives from all campus groups. Their responsibility was to review the results of both surveys and come back with specific recommendations that they had prioritized."

"This committee met weekly for three months, and as a result of their recommendations, we plan to appoint a part-time human resources representative to the campus who will come from developing programs for new and existing employees to preparing regular updates about any changes in benefits."

"As Berks and Allentown approach the July 1 date when they will merge to form the Berks Lehigh Valley

College, clarification of job responsibilities will also be important to both units."

Staff assistants from both campuses are already working to share information about their "best practices," according to Tina Gosh, staff assistant in finance at Berks.

Mrs. Gosh served for two years as co-chair, with Carol Myers, of a group of Berks staff assistants who meet every other month. Current chairs are Marilyn Wojcick and Sandy Schmale.

"We discuss any issue that concerns our members," Mrs. Gosh reports, "and of course right now we are focusing on the merger. Our Campus CEO, Dr. Frederick H. Gudge, meets with us at least once a year to inform us about future plans for Berks, and he provided us with information about the merger."

"We also sponsor twice-yearly professional development workshops for staff assistants, basing the contents on input from our members. We've discussed such issues as customer service, while at another session a campus police officer spoke to us about safety in the office and how to react in various kinds of emergencies."

"Groups such as the staff assistants make a significant contribution to the creation of a more open and responsive campus climate," Mr. Sterganos adds. "Both survey instruments reflect a desire for just such an atmosphere, and our administration is pledged to address the human resources concerns they have brought forward."

Merged units create opportunities for training, information sharing

When Graduate School administrators found that a sizable proportion of their staff had reported in the Survey that the University was not as good a place to work as it had been three years ago, they took it as a call to action.

Rodney Erickson, dean of the Graduate School and vice president for research, points out that this result can be explained, in part, by the necessity, given the University's financial constraints, of staff and budgetary reductions in the Graduate School. These have been accompanied, in turn, by workload increases and new staff responsibilities.

"Our staff also expressed concern," he says, "about receiving the training they needed to become more productive and to face the challenges of new electronic technologies that are an integral component of changes in Graduate School procedures and systems."

To deal with these staff development issues, the Graduate School has incorporated a commitment to improved communication, enhanced training opportunities, and a focus on teamwork into its strategic planning.

The Office of Human Resources has assisted the planning and presentation of a day-long retreat during which administrative staff considered such topics as managing change, working more productively, and communication, followed by a general staff workshop on managing change.

Group training for staff in the use of upgraded software was provided by the Center for Academic Computing, and individual staff members have been sent to advanced systems analysis and software training sessions.

"The Graduate School will continue to provide increased access to training," Dean Erickson emphasizes.

Communication with staff has been enhanced through the increasing use of team approaches to work assignments, process analysis, and policy implementations.

Open general staff meetings have been added to the regular staff meetings that include all office directors and senior staff, and staff are now more involved in decisions concerning policies and procedures at all levels.

"Our Graduate Enrollment Services staff now holds monthly meetings, and that's been a big help to morale," Jodi Slover, an administrative assistant, says.

"Our unit was created by the merger of Graduate Admissions, Graduate Programs, Data Processing, and the Thesis Office. Someone who had worked in Admissions wouldn't be familiar with procedures in the Programs office, and a lot of cross-training has been necessary. We get together to share that information."

Having regular meetings gives everyone a chance for input into decisions.

Because Dean Erickson believes that effective communication will be essential to the successful implementation of the strategic directions proposed for the Graduate School, he, along with unit leaders, will hold informal discussion groups with staff.

"The Faculty/Staff Survey helped to focus attention on the need to empower staff to participate more in the decision-making process," Dean Erickson points out. "It called our attention to the need not only to make investments in technology but also to provide training so we can make the best use of available resources. And, finally, it has brought us to a position where we now value every high quality benefit of teamwork and continuous quality improvement."

Special Senate Committee studies teaching development, evaluation

Eighty percent of Penn State's faculty indicated in their Survey responses that they believed "excellence in teaching and instruction" should be rewarded more.

Their concerns were given voice on the floor of the University Faculty Senate when that body discussed the issue as part of a spring faculty survey that was based on a report of the Special Senate Committee on Faculty Teaching Development and Evaluation.

Three committees have been considering the effectiveness of teaching at Penn State, according to Terry Engelder, professor of geosciences, and chair of the Special Senate Committee.

The other two bodies are a subcommittee of the Administrative Council on Undergraduate Education and the Committee of Department Heads.

"Our particular charge from the Senate," Dr. Engelder explains, "was to 'recommend a comprehensive approach to the promotion of excellent teaching and its evaluation at Penn State.'"

"We viewed this as a three-stage process. First, we used previously established models for effective learning as a guide for seeking ways to help teachers develop to their fullest potential. Second, we developed procedures to measure whether Penn State teachers are reaching that potential. The third step was to recommend ways to reward individuals who have succeeded."

The topics of teacher development, teaching evaluation, and rewards structure were assigned to three subcommittees. The subcommittee on teacher development, according to Dr. Engelder, considered how to encourage and support unit and department level activities, such as establishing mentoring programs, incorporating technology into the classroom, establishing guidelines for teacher improvement, and using portfolios to clarify objectives and stimulate self-analysis.

Faculty would respond favorably to a climate offering regular, structured opportunities to talk with one another about teaching, Dr. Engelder believes.

"We hope our report will help create a culture change at Penn State," he says, "where teaching is viewed as a scholarly activity on a par with research and is commensurably rewarded."

Staff input essential in C&DE planning

For Continuing and Distance Education, issues of communication, respect, and teamwork cut across the entire organization.

"We're concerned not only with the relationships between administrators and their staff but also with relations among peers at each of these levels," says Dr. Frederick D. Loomis, C&DE's director of administration. "That's because we regularly interact with so many other segments of the University. One day's workload may involve us in contact with everyone from college administrators and professors to Housing and Food Services staff."

With the results of the Survey in hand, C&DE unit heads met in a half-day retreat to analyze the data. Their goal was to identify key issues for organization-wide action and enhancement and to develop guidelines for further use of the Survey within their units.

"We wanted to examine the congruence between our espoused values as an organization and the issues raised by the Survey," Dr. Loomis explains. "After articulating strategies to close the gaps that appeared, we integrated these proposals for action into C&DE's strategic planning process."

"Our leadership felt that the Survey was especially valuable to the assessment process because everyone in C&DE had the opportunity to respond to the questions. We have always believed in encouraging as much staff participation as possible."

Last fall, each C&DE unit held a half-day workshop that incorporated discussions of the Survey data, along with other specific organizational issues. The latter were developed from an internal survey C&DE had conducted to pinpoint organizational strengths and weaknesses, opportunities for future development, and also possible future stumbling blocks.

Workshop discussions focused on specific issues for each unit.

"We have a variety of distinct working environments," Dr. Loomis points out. "Issues of importance to staff in Education in Mitchell Building may be quite different from the concerns of Conferences and Institutes personnel based at the Conference Center."

After review by C&DE's Vice President and Dean, Dr. James H. Ryan, measurable action plans were incorporated into each unit's strategic plan. Throughout the planning process, staff were kept fully informed and asked to provide feedback.

"As Penn State faces increasing financial challenges at the same time that our customers' expectations are increasing, it is essential that we focus on developing our human resources. The area of Finance and Business is committed to building this concept into our strategic planning."

Gary C. Schultz, Senior Vice President Finance and Business and Treasurer

Eberly College to create staff innovation award

Listening to Biology Department head William Jeffrey talk about his research are: Back Row, left to right, Diane Lyons, Debra Puri, Paula Farwell, and Debbie Snyder. Front Row, left to right, Heather Welke, Jodi Ripka, Bronnie McLaughlin, Heidi Port, and Traci Futory.

Following up on some of the ideas that were presented, the dean's office instituted a monthly meeting for all its supervisors to discuss good supervisory practices. A "social committee" was appointed to plan periodic gatherings, and communications have been enhanced with a periodic on-line newsletter.

The distribution of an updated organization chart with backup materials provides staff with a better understanding of the functions of each of the office's principal components.

The College has had a Staff Advisory Committee in place since 1991, and in addition to presenting annual awards based on service to the College, the eight-member group is currently preparing criteria for a Staff Innovation Award, the first one to be presented at the end of Spring Semester.

Staff input was sought during the recent search for a new head of the Department of Biology. The ten-member staff assistants met as a group and spent a half hour with each candidate who was interviewed.

"Our staff meets at least once a month to keep each other informed of what we're doing," says Debra A. Patt, a staff assistant.

"Our new department head, William Jeffrey, joined us at a recent meeting and gave a very interesting presentation, using terms that we could all understand, about the research his lab is doing.

"We really felt that was extremely useful to us, and we are hoping to ask other faculty members to attend our meetings and describe their research."

When dean's office staff in the Eberly College of Science held a half-day retreat to discuss findings from the Faculty/Staff Survey, three themes predominated—how to improve internal communication, how to bolster teamwork and cohesiveness, and how to improve staff supervision while ensuring equitable and respectful treatment of all staff members.

"The retreat had an overall positive and open atmosphere, and it resulted in a number of useful suggestions," Dean Gregory L. Geoffrey reports.

"The retreat had an overall positive and open atmosphere, and it resulted in a number of useful suggestions," Dean Gregory L. Geoffrey reports.

Education standing committee will keep focus on issues raised by Survey in play

How can a college sustain a positive and supportive environment for its faculty and staff?

The creation of a standing Climate Committee has been one response from a number of colleges and administrative units. Among these in the College of Education, and an important assignment for its Climate Committee is to continue discussions of the issues raised by the Faculty/Staff Survey.

The Survey's findings were thoroughly debated at a Fall Semester College retreat attended by administrators, faculty, staff, and student representatives. Of most concern were three attitude items:

- Departmental and intra-departmental communication and collaboration
- Level of input and feedback from supervisory personnel to their staffs, and
- Lack of technological resources to work more efficiently

Department heads were asked to discuss these working-degree issues, as well as those directly affecting their own operations with their faculty and staff.

In addition, four volunteer focus groups were formed for further discussion of the Survey's results. Each group represented a particular college constituency, including staff supervisors, non-supervisory staff, and two groups composed of faculty members and department heads. Confidentiality for each group was ensured by the use of a professional facilitator from the Office of Human Resources.

Focus group suggestions for implementing change were presented to College Dean Rodney Reed and will be followed-up by the Climate Committee, which has also been charged to develop or adopt a survey instrument that can be used for periodic assessment of the College climate.

"Within the College of Education," Dean Reed says, "we seek to create a supportive and nurturing environment in which faculty, staff, and students are respected and valued, in which a sense of belonging and responsibility is realized, and in which excellence in performance is sustained."

"Ensuring that the climate within the College accomplishes these aims is one of our highest priorities."

To make certain that internal and external communications systems are effective, Toni Duchi, assistant to the dean for public relations, completed a communications audit and conducted a readership survey for existing College publications.

"We have a monthly internal publication called *Ecol Points*," she explains, "and it goes to everyone in the College. When I asked the readership to answer a questionnaire I'd included in the publication, there were almost fifty replies."

"*Ecol Points* had originally been circulated in printed form, but last fall we decided to put it on the Web only. What our readers told us was that they just forgot to look for it there and that they wanted the printed version back. They also wanted us to include more human interest stories. We intend to follow through on both those suggestions."

Communication, professional development enhanced by Penn State-Behrend

Five goals have been selected for special attention by the leadership at Penn State Erie, The Behrend College, in response to the concerns of Survey respondents at this campus. Issues to be highlighted include:

- Departments need the tools and equipment to do high quality work.
- Faculty and staff require an appropriate level of professional development to do high quality work.
- Faculty and staff need to have an understanding of who their clients are and how to provide better customer service.
- Communication needs to be good between faculty and staff and the administration.
- Interdepartmental cooperation is necessary for College-wide consensus building.

"The College's response has incorporated a combination of activities," according to John M. Lilley, provost and dean. "We've had several retreats and held a College-wide meeting, put in place a professional development plan, and begun several initiatives targeting enhancement of communications."

"As a result of an academic unit head retreat we held last fall, units were asked to outline the resources they felt would be necessary to deliver current and future academic programs. We are also establishing additional technology classrooms and providing faculty training in the use of technology."

A professional development plan for Penn State-Behrend staff has been set in motion with the goals of improving customer service and its delivery, bolstering supervisors' management and leadership skills, and providing an appropriate level of professional development opportunities for staff.

In the area of communications, the College has initiated biannual staff meetings and created a College-wide Listserv to enable simultaneous communications to all faculty and staff.

Mary Anne Geary, an administrative assistant in the Plastics Technology Deployment Center, agrees about the need for timely information.

"I'm grateful to the Provost and his staff for including the minutes of the Provost's Advisory Council meetings in the College's newsletter," she says. "This summation of information is very helpful in keeping our department up-to-date with what's happening on campus."

Many of the goals and actions that were identified as the result of the Survey have been incorporated into Behrend's current five-year strategic plan, according to Dr. Lilley. In addition, a Provost's Advisory Council meeting will be held in May, and the Office of Human Resources is planning a three-hour meeting/time management professional development workshop as part of the full-day program.

Information a vital resource for Finance and Business

Staff, money, and material—historically, these have been the resource requirements of any enterprise.

"But now we have to add a fourth—information—because we are in the information age, and Penn State has dedicated a large portion of its resources to information technology," says Gary C. Schultz, senior vice president for Finance and Business and Treasurer.

"Finance and Business is a large organization," Mr. Schultz continues. "Among our units are Auxiliary Services, Business Services, the Corporate Controller's Office, Financial Management, Budget and Resource Analysis, Human Resources, Physical Plant, and Safety and Environmental Services."

"Analysis of the Faculty/Staff Survey's results revealed that we had very little information dissemination across our various units, although each unit had generated a form of official communication for itself."

To address this issue, Finance and Business asked each unit manager to designate a member for a team that would develop an information dissemination action plan. With David E. Stomer, assistant vice president for safety and environmental services, serving as strategy manager, the team prepared action plans that have been incorporated into the division's five-year strategic planning.

Members of the team were Joan Coble, administrative assistant to the senior vice president for Finance and Business; Liz Gibson-Reed, customer service coordinator, Business Services; Timanite Illar, publications specialist, Auxiliary Services; Ken Korbick, classification specialist, Human Resources; Al Matyaszovsk, recycling former, Physical Plant; Deb McCafferty, publications manager, Auxiliary Services; Paul Ruskin, customer services, Physical Plant; and Roseann Seminski, assistant controller/bursar.

"The team made a number of concrete proposals," Mr. Stomer reports. "One of the first steps is considered was the appointment of a Finance and Business Communication Coordinator. After gathering information from each unit, this individual would have to decide on the best way to communicate it—whether through Intercom, E-mail, bulletin boards, flyers, or some other medium. The coordinator would also create a directory for each unit, with the names of those responsible for different operations, along with a description of the unit's functions."

Still another suggestion from the team was the establishment of a cross-unit touring program, so units could get to know each other's responsibilities.

"To keep tabs on the progress made in improving communications across units, input would be sought not only from managers and supervisors but also from an employee-wide pool," Mr. Schultz emphasizes, adding:

"One of the major strategies we will implement is the encouragement of new communication practices on the part of managers. The Survey showed us that we need to do a better job of providing timely and accurate top-down information to our employees."

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, April 18

Kern Graduate Commons, noon, Kern Lobby. Concert titled "Hot Mamas."

Center for the Performing Arts, Eisenhower Auditorium, 8 p.m., "To Kill a Mockingbird." For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Student recital, Meredith Malone, vocal jazz.

School of Music, 8 p.m., Pavilion Theatre. Opera, *ev'e's odds* with Susan Boardman, director, through April 19. For tickets, phone (814) 865-0431.

School of Music, 8 p.m., 122 Music II. Graduate lecture/recital, Roland Freilag, violin. For tickets, phone (814) 865-0431.

Saturday, April 19

Palmer Museum of Art, 11 a.m., Christoffers Lobby. Storyteller Jan Kinney, tales for the family.

School of Music, 7 p.m., Recital Hall. Student recital, Julie Lybarger, horn.

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Syracuse Symphony Orchestra." For tickets, phone (814) 865-0255.

Sunday, April 20

School of Music, 2 p.m., Recital Hall. Women's Choral with Robert Drafil, director.

School of Music, 4 p.m., Recital Hall. "Essence of Jew with Anthony Leach, director. For tickets, phone (814) 865-0431.

School of Music, 8 p.m., Recital Hall. "New Music Ensemble." For tickets, phone (814) 865-0431.

Monday, April 21

School of Music, 8 p.m., Eisenhower Auditorium. "Philharmonic Orchestra" with Pu-Qi Jiang, conductor.

Tuesday, April 22

School of Music, 8 p.m., Recital Hall. "Centre Dimensions" with Dan Yoder, director. For tickets, phone (814) 865-0431.

Wednesday, April 23

Center for Women Studies, noon to 1 p.m., Resource Room, 120 Boucke. Film/discussion titled "The Penn State Clothesline Project."

School of Music, 8 p.m., Recital Hall. Student recital, Carrie Swatsworth, flute.

Thursday, April 24

Palmer Museum of Art, 7:30 p.m., Palmer Lipson Auditorium. Peter Welsh on "Museums and the Culture of Commodities."

School of Music, 8 p.m., Eisenhower Auditorium. Symphonic Band with Dennis Glocke, conductor. For tickets, phone (814) 865-0255.

School of Music, 8 p.m., 122 Music II. Graduate lecture/recital, Brian Watson, saxophone.

Friday, April 25

■ Kern Graduate Commons, noon, Kern Lobby. Concert, "Galla & Dan."

Ice Pavilion, 7:30 p.m., Greenberg Sports Complex. "ICE RHYTHMS," directed by Deana Yeager, through April 26.

University Student Theatre Company, 8 p.m., The Playhouse. "Daisy Pulls It Off" directed by Helen Marfall. Also April 26, 29, 30 and May 1-3. For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Student Choir/Chamber Singers with Doug Miller, director.

Saturday, April 26

Palmer Museum of Art, 2 p.m., Gallery talk, Robin Seymour on "The Sieglitz Circle."

School of Music, 8 p.m., Recital Hall. "Glee Club Blue and White Concert," Bruce

On stage

The Singing Lions will present "A Celebration" at 2 p.m. Sunday, April 27, in Eisenhower Auditorium on the University Park campus. Tickets are \$4 for general admission, \$3 for students, and are available at the door or by calling (814) 865-0255.

Trinkley, director. For tickets, phone (814) 865-0431.

School of Music, 8 p.m., 122 Music II. Student recital, Lisa Cerami, piano.

Sunday, April 27

School of Music, 2 p.m., Eisenhower Auditorium. "Singing Lions." Peter Kibler, director. For tickets phone (814) 865-0431.

School of Music, 2 p.m., Recital Hall. "Oriana Singers," Lynn Drafil, director.

School of Music, 4 p.m., Recital Hall. "University Choir," Anthony Leach, director.

School of Music, 8 p.m., Recital Hall. Student recital, Kyle Glaser and Sue Kearney on the saxophone.

School of Music, 8 p.m., 122 Music II. Graduate lecture/recital, Jeanne Nagurny, voice.

SEMINARS

Friday, April 18

■ Edward Joseph Perkins on "Positioning Universities for their International Role: A Career Diplomat's Perspective," 10 a.m., International Lounge, 222 Boucke.

David Vaughan on "The Design and Synthesis of Microporous Solids," 11 a.m., 250 Materials Research Laboratory.

■ Edward Joseph Perkins on "American Diplomacy and Politics in Sub-Saharan Africa," noon, conference room, Paul Robeson Cultural Center.

Alan Sokal on "What the Social Text Affair Does and Does Not Prove," 3 p.m., 117 Osmond Laboratory.

Monday, April 21

■ Kevin Frick on "HMOs and Medical Care Technology: Global Responsibility for Assuring Cost-Effectiveness and Local Coverage Decisions," 9:30 to 11 a.m., Living Center, Henderson Building.

Nathan Anderson on "Blending Ground Beef Using NIR Spectroscopy" and Ali Bulent Koc on "Evaluation of an Automated Irrigation System for Frost Protection of Apple Budds," 12:20 p.m., 239 Agricultural Engineering.

Charles M. Rick Jr. on "Chasing the Wild

Tomato: Collecting, Maintaining and Utilizing Germplasm," 12:45 p.m., 101 Agricultural, Sciences and Industry Building.

Jeff Nucciarone and Yusuf Ozyonuk on "High Performance Fortran: Status and Future," 3:35 to 4:25 p.m., 215 Hammond.

Vandana Shiva on "Women, Biodiversity and Biotechnology," 7 p.m., 101 ASI.

Tuesday, April 22

L. Ivanits on "Social Teachings of Pope John Paul II," Penn State Catholic Faculty and Staff Fellowship, noon to 1 p.m., 212 Eisenhower Chapel.

■ Mike Arthur on "Cool Tropics, Warm Poles: Late Maestrichian Paleoclimate from an Ocean Perspective," 4 p.m., 112 Walker.

Eileen Kennedy on "Evaluation of the Nutrition Safety Net: Implications of Pending Federal Legislation," 4 p.m., S-209 Henderson

Wednesday, April 23

■ A roundtable discussion on "Nationalism in Post-Communist Societies (Bulgaria, Kazakhstan, Poland, Russia, Ukraine and Romania)," noon to 1:30 p.m., 102 Weaver.

Richard Browne on "Issues in the Evolution of Managed Health Care and Long-Term Care," 12:15 to 1:15 p.m., Living Center, 110 Henderson.

John Meurig Thomas on "Davy and Faraday: A Tale of Contrasting Geniuses," 1:30 p.m., 112 Kern.

Barbara Shaw on "Electron Beam Physical Vapor Deposition Facilities," 3:35 p.m., 215 Hammond.

Alexander Pines on "NMRRMI: All Lit Up," 8 p.m., 102 Thomas.

Thursday, April 24

John Meurig Thomas on "Designed Solid Catalysts," 1:30 p.m., 112 Kern.

Marc Kastner on "The Single Electron Transistor and Other Artificial Atoms," 3:30 p.m., 101 Osmond Laboratory.

Alexander Pines on "Magic and Other Angles," 4 p.m., S-5 Osmond Laboratory.

A. Catharine Ross on "Vitamin A and Immunity: Implications for the Young and the

Old," 4 p.m., 209 Henderson Building South.

Friday, April 25

Alexander Pines on "Gauge Kinematics of Spins and Gains," 12:15 p.m., S-5 Osmond Laboratory.

Megan Henry on "Impact Theory for Rydberg Atom Transition Lineshapes," 2:30 p.m., S-5 Osmond Laboratory.

Ila Dichev on "Is the Risk of Bankruptcy a Systemic Risk?" 3:30 to 5 p.m., 333 Beam Business Administration.

Saturday, April 26

Karl Kimmerling on "Profitable Growth Through Teamwork and Technology," 11 a.m., 112 Walker.

John T. Ryan III on "Business in the '90s: A Contrarian View," 4 p.m., 22 Deike.

CONFERENCES

Friday, April 18

"The Community as Classroom: Local Knowledge, Natural Resources and Ecology," 2 p.m., Pasco Agricultural Museum.

Through April 19.

Dental Seminar, The Penn State Scanlon, Logistics Transportation Symposium, The Penn State Scanlon.

Sunday, April 20

The Fourth Penn State Green Design Conference, 9 a.m. to 2 p.m., The Nittany Lion Inn.

Monday, April 21

"Erasing the Shadows: Helping the Depressed and Anxious Child" and "Identifying and Managing ADD/ADHD (and Its Close Relatives) and Improving a Child's Self-Esteem," Penn State Scanlon, through April 22.

Wednesday, April 23

Educational Secretaries Conference, The Penn State Scanlon, through April 25.

Friday, April 25

"Creating Positive Outcomes for Elderly," The Penn State Scanlon.

EXHIBITS

HUB Art Print Exhibits

Oil and ink paintings by Amy Jane Whitney and Darren R. Grier, through May 4.

HUB Browsing Gallery

■ "Photographs of Australia" by Richard Woldendorp, through April 27.

HUB Formal Gallery

Mixed media works by Howard Brooks, through May 4.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Kern Exhibition Area

Sketches titled "Shalom," through May 22.

North Halls

Paintings by Judy Ruffner, through April 30.

Palmer Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 8.

"Exotic Illusions: Art, Romance and the Marketplace," through June 15.

Zoiler Gallery

School of Visual Arts, "Mafia Thesis Exhibitions," ceramics by Danielle Mortier and Rebecca Westroel, through April 28.

■ Reflects an international perspective.

For a full listing of University Park activities, including sporting events, go to the Web at <http://www.spc.psu.edu/calendar/>

Arts

continued from page 6

Bach's Lunch

The Penn State Flute Ensemble, directed by **Eleanor Duncan Armstrong**, associate professor of music, and **Jeanne Proven**, graduate teaching assistant in flute, will perform at the Bach's Lunch concert at 12:10 p.m. Thursday, April 24, in the Helen Eakin Eisenhower Chapel on the University Park campus.

The free 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

"Daisy Pulls It Off"

The Penn State University Resident Theatre Company will present Denise Deegan's comedy, "Daisy Pulls It Off," opening Friday, April 25, and running through Saturday, May 3, in the Playhouse Theatre on the University Park campus. "Daisy Pulls It Off" is directed by **Helen Manfull**, professor emerita of the School of Theatre Arts.

For tickets call the Arts Ticket Center at (814) 863-0255.

Singing Lions

The Singing Lions will present "A Celebration," an 80-minute concert featuring a variety of American popular music at 2 p.m. Sunday, April 27, in Eisenhower Auditorium on the University Park campus. The group also will be featured at the Fred Waring Choral Festival in Tyrone on May 3.

Tickets to the University Park performance are \$4 for general admission, \$3 for students, and will be available in advance at the Arts Ticket Center at (814) 863-0255 or at the door on the day of the performance.

Country music concert

New Country vocalist **Martina McBride** will perform at The Community Arts Center in Williamsport at 7:30 p.m. Thursday, May 29.

In 1992, McBride released her debut album, "The Time Has Come." Her other albums are "The Way That I Am" and "Wild Angels."

Tickets are \$18.50, \$23.50 and \$28.50, and go on sale at 10 a.m. Monday, April 28, at the arts center. For more information, call (717) 326-2424 or (800) 432-9382.

Cast change

Veteran actress **Cherry Jones** will replace **Dianne Wiest** in the spring tour of Shaw's "Don Juan In Hell," which is slated to play at the Community Arts Center in Williamsport at 7:30 p.m. Wednesday, May 7.

Ed Asner, **Rene Auberjonois** and **Harris Yulin** continue in the cast, as announced. Tickets are \$15.50, \$18.50 and \$22, and are on sale now. For more information call (717) 326-2424 or (800) 432-9382.

Air products photo

President **Graham B. Spanier**, second from left, Air Products University Relations Director **James Brockington** and Air Products Chairman **H.A. Wagner** celebrated the signing of an expanded research alliance during a luncheon with 200 Penn State alumni at Air Products' headquarters in Trovato, Pa., on April 11. The partnership with Air Products is one of eight master research agreements Penn State has undertaken recently with major corporations. These agreements enable the corporations to undertake collaborative research efforts with the university without the need to renegotiate terms each time, saving administrative time and money for both the University and the corporate partner.

Promotions

Staff

Melisa P. Dixon, senior purchasing agent in Business Services.

Edward J. Donovan, director of continuing education II in Continuing and Distance Education.

Susan E. Eisenhauer, staff assistant VI in College of Agricultural Sciences.

Sherry D. Ellenberger, staff assistant VI in Business Services.

Larry G. Erol, purchasing agent in Business Services.

Cynthia F. Fail, coordinator, residence life programs in Student Affairs.

Diana H. Feltenberger, staff assistant VI in College of Engineering.

Carol J. Fittery, finance and accounting assistant at The Hershey Medical Center.

Mary C. Fleming, director, cooperative education program in the Eberly College of Science.

Linda M. Gelmett, staff assistant VI at Penn State DuBois campus.

Jeanne A. Getz, staff assistant VI in College of Engineering.

Barbara J. Green, staff assistant VI at The Hershey Medical Center.

Robert H. Guisanie, staff services specialist II in College of Agricultural Sciences.

Donald C. Hampton, cinematographer/videographer II in Continuing and Distance Education.

Robert L. Hibbert, network coordinator in College of Engineering.

Thomas B. Houck, senior purchasing agent in Business Services.

John B. Kalbach, lead research programmer in Computer and Information Systems-Center for Academic Computing.

Rod N. Khayat, senior systems programmer in Computer and Information Systems-Center for Academic Computing.

Bonnie H. Leet, Children's Miracle Network assistant in Division of Development and Alumni Relations at The Hershey Medical Center.

Susan E. Lingenfelter, laboratory supervisor in Research and Graduate School.

Mary J. Lutz, staff assistant VI in College of the Liberal Arts.

Corintha J. McCall, staff assistant VI in Business Services.

Carl R. Meachum, orthotist at The Hershey Medical Center.

Jennifer L. Nauss, staff assistant VI at The Hershey Medical Center.

Wendy L. Neidig, LPN at The Hershey Medical Center.

Susan J. Newell, business analyst III at The Hershey Medical Center.

Paul G. Olivetti, director of development in Division of Development and Alumni Relations.

Kathleen M. O'Toole, producer/director in Continuing and Distance Education.

Janet L. Page, staff assistant VI in Business Services.

Curt L. Parker, cinematographer/videographer II in Continuing and Distance Education.

Connie J. Peters, staff assistant VI in College of Engineering.

Catherine A. Poe, counselor at Penn State McKeesport campus.

Pamela J. Reifinger, business system coordinator at The Hershey Medical Center.

Chrystal A. Rotz, assistant to director, University Relations at Penn State Mont Alto campus.

Bonnie J. Sager, staff assistant VI in Business Services.

Kim L. Sager, staff assistant VI at The Hershey Medical Center.

Tina Shawley, staff assistant V in College of Health and Human Development.

Eric M. Snyder, technical analyst II at The Hershey Medical Center.

Carol M. Spotts, staff assistant VI in College of the Liberal Arts.

Kendra G. Spring, staff assistant V in Business Services.

Kevin M. Stahl, senior purchasing agent in Business Services.

Pamela J. Stauffer, administrative assistant II in College of Engineering.

Craig R. Story, research programmer in College of Agricultural Sciences.

Donna L. Swartz, staff assistant V in Business Services.

Patricia A. Thomas, staff assistant IV in The Smeal College of Business Administration.

Tonia C. Tibbens, staff assistant VI in Business Services.

Stephanie M. Uhler, coordinator, professional fees at The Hershey Medical Center.

Faculty/Staff Alerts

Radio call-in show

The role of the arts at Penn State and American colleges and universities in general is the topic of the next edition of "To the Best of My Knowledge," President **Graham B. Spanier's** monthly call-in radio program on WPSU-FM (90.1, 91.5 & 106.7), airing at 7 tonight.

The university's role as conservator and curator of the arts has never been easy. Artists, art educators, arts administrators and the general public are invited to join in this discussion. Listeners can reach Spanier and his guest, **Dan Carter**, director of the School of Theatre Arts, by calling (800) 543-8242 during the one-hour program. Internet users worldwide will be able to link to sound and pictures from the program at www.psu.edu/ur/tech/tech.html, and they will be able to submit questions and comments via e-mail to response@psu.edu.

Hosted by **Patty Satalia**, "To the Best of My Knowledge" is a series designed to explore topics of concern to higher education and to allow listeners a chance to communicate directly with Penn State's president. Air dates for the series for the remainder of the year include: May 8, June 10, July 15, Aug. 13, Sept. 8, Oct. 16, Nov. 13 and Dec. 18.

Upcoming HRDC courses

Call the Human Resource Development Center at (814) 865-8216 to register for the following programs:

■ Work Teams in Today's Organization

Get answers to questions like: Why teams? How can teams benefit an organization? April 28, from 1-4:30 p.m., 319 Rider Building. Cost: \$35.

■ Going with the Flow of Change

April 29, 1:30-3:30 p.m., 319 Rider Building. Cost: \$25.

■ From Angry to Amiable: Calming Upset Customers

April 29, 8:30-11:45 a.m., 118 Agricultural Sciences and Industries Building. Cost: \$35.

■ NEGAHOLICS: How to Handle Negativity in the Workplace

April 30 and May 2, 1:30 - 4:30 p.m., 118 Agricultural Sciences and Industries Building. Cost: \$65.

■ The Communication Tool Kit for Teams

May 1, 9:30-11:30 a.m., 319 Rider Building. Cost: \$35.

■ Conversational German for Practical Situations

May 2-June 20, from noon to 1 p.m., 319 Rider Building. Cost: \$55.

Health Promotion Program

Yoga Series — summer sessions

Four seven-week sessions are offered; each meets from noon-1 p.m. Cost is \$35 per session, reimbursable to HMO participants taking the series for the first time. To register, contact **Jan Hawbaker** at (814) 865-3085 or jah3@psu.edu.

Section 1: Tuesdays, June 3-July 15, 110 Hendersson Building (Living Center)

Section 2: Tuesdays, July 22-Sept. 2, 110 Hendersson Building (Living Center)

Section 3: Wednesdays, June 11-July 23, 133-F Johnston Commons

Section 4: Wednesdays, July 30-Sept. 10, 133-F Johnston Commons

New senior interest guide available

The Gerontology Center in the College of Health and Human Development has issued a new edition of its *Senior Citizens' Interest Guide to Campus Life*, complete with campus map, which briefly outlines some of the University Park campus programs and services of special interest to senior adults. With information on parking, transportation, and special assistance, its goal is to encourage seniors to explore and actively participate in campus life.

The guide was developed by Nancy and Glenn Gamble of State College who are volunteers in the Outreach Program of the Gerontology Center which works to promote a University/community partnership on senior issues. For more information, contact Susan Keller at (814) 865-1710.

How is Penn State funded?

The Office of University Relations has published a new booklet, *How Penn State is Funded*, that describes the various sources of income that make up the University's total operating budget of nearly \$1.7 billion. The booklet also summarizes Penn State's financial relationship with the Commonwealth, explains how endowments work and includes comparative data from other institutions. Copies are available by directing e-mail to als5@psu.edu or calling (814) 863-4512. They also may be picked up in 301 Old Main.

Engineering database added

Penn State students, faculty, and staff now have access to the world's most comprehensive interdisciplinary engineering database through the World Wide Web. CompendexWeb, the Web-based version of the Compendex database, covers engineering literature such as journal articles and conference papers from 1970 to the present. More than 220,000 abstracts are added each year.

Located at URL <http://cpweb.ei.org>, the system logs visitors on automatically if they are connecting from an on-campus computer or via a Penn State access account. Compendex Web will replace the EIP database and the Compendex CD-ROMs as the University Libraries' primary database access to the engineering literature.

Search guides are available on the Electronic

Reserves System (<http://reserve.libraries.psu.edu/>) and in the Engineering Library.

Web site allows mapping capabilities

The University Libraries' Maps and Data Center has created an interactive Web site that allows users to map out statistics by counties in Pennsylvania.

Users have two options when working the information, located at <http://busmap.psu.edu/cbp/>. They can choose County Business Patterns that presents business statistics by Standard Industrial Classification within Pennsylvania's counties. When creating a map on this site, users follow screens that help them to choose from the thousands of datafiles. There also are 17 variables which describe various attributes of the industries. Users can also access USA County Data that offers more than 3,000 variables including agriculture, crime, elections, income and vital statistics. Both datasets allow users to choose color and mapping options that will help make a unique map.

One of only a few Web sites to offer interactive mapping, County Business Patterns provides data covering most of the divisions of the economy (i.e., agricultural services, mining, construction, manufacturing, transportation, public utilities, wholesale trade, retail trade, finance, insurance, real estate, and services).

Awards

Alcohol abuse prevention efforts recognized

Five Penn State groups and three individuals were honored for their contributions to the prevention of alcohol, tobacco and other drug abuses.

Honored for their innovation, enthusiasm and leadership beyond the expectations of their position or organization are the following:

■ **The Arnold Air Society** for its assistance with the "Slay the Dragon" program, a Jeopardy-style alcohol and drug awareness game for junior high and high school students.

■ **The College of Communications** for its work with the Office of Health Promotion and Education, University Health Services and the Pennsylvania Liquor Control Board to disseminate education about alcohol issues to hundreds of students in the college. Projects such as public service announcements, videos, campaigns and research on the impact of advertising and youth were implemented.

■ **Moderation Management Program** at Penn State Erie, The Behrend College, for its three-tiered approach to dealing with minor alcohol offenses, more serious offenses and repeat alcohol offenders.

■ **The Resident Assistants of Atherton Hall** on the University Park campus for creating and implementing an alcohol-free program, "Puttin' on the Ritz." The program provided alcohol education and entertainment.

■ **Student Peer Athlete Network, SPAN**, for its members' commitment to serving as positive role models for elementary-aged children. Member activities include reading books to kindergarten children, talking about being a "Champion for Life" and speaking to MADD groups and at Boy Scout dinners.

■ **Natalie J. Croll**, assistant director of the office of Health Promotion and Education, for

her efforts toward drug and alcohol abuse prevention. She has enhanced the Alcohol Intervention Program, advised LIFE House and worked on alcohol and sexual assault issues for orientation. She is currently working with Greek leadership to help address alcohol issues.

■ **Kenneth P. Miller**, associate dean of student affairs at Penn State Behrend, for his leadership and support in establishing a LIFE House for substance-free living and the new dormitory management approach to alcohol and other drug abuse.

■ **B. Alan Snider**, professor of agriculture and extension education and assistant director, for his work to reduce tobacco usage among Pennsylvania's youth. He has recruited and developed youth tobacco control coalitions, provided educational workshops for county agents and local adults and organized tobacco control conferences.

Scholarly publications produced by Penn State Press earn awards

Several scholarly books published by the Penn State Press have garnered awards. They include:

■ *The New Miners of Windber: The Struggles of New Immigrants for Unionization, 1890s to 1930s* by Mildred Allen Beik, which received the International Labor History Association Book of the Year Award for her pathbreaking study and analysis chronicling the long and complicated labor struggle of the Windber miners;

■ *The Painted Photograph, 1839-1914* by **Heinz K. Henisch**, professor emeritus and **Bridget Henisch**, which received the Rudolph and Hertha Benjamin Book Award of the American Photographic Historical Society for its "contributions to the understanding of the history of photography;"

■ *Poetic Madness and the Romantic Imagination* by Frederick Burwick, which earned the American Conference on Romanticism Book Prize;

■ *The Abolition of Feudalism: Peasants, Lords and Legislators in the French Revolution* by John Markoff, which won the Pinkney Prize of the Society for French Historical Studies;

■ *A Civil Tongue: Justice, Dialogue and the Politics of Pluralism*, by Mark Kingwell, received the Spitz Prize of the Conference for the Study of Political thought for the best book in democratic and/or liberal theory; and

Maps librarian is honored for Web access analysis

Maps Librarian **Melissa Lamont** has been honored with the 1997 Readex/GODORT/ALA Catharine J. Reynolds Award, sponsored by the Government Documents Round Table of the American Library Association.

Lamont's winning research proposal described an analysis of World Wide Web access to state and local government information.

The proposed project would assess the climate for the distribution of state and local government information on the Web with Pennsylvania as a case study. Lamont's research will include an analysis of the costs, equitability of access and the general inclination of governments to use the Internet.

Recommendations for libraries concerning partnerships and resource sharing, as well as an analysis of the primary trends for Web accessible government information will result from the study.

25-year Awards

GEORGE FELDER III

BARBARA J. HART

WILLIAM T. HUGHES

HAROLD J. MOWERY JR.

RICHARD T. OBERMYER

JOHANNA M. RIPPER

Observing 25 years of service are, from left, George Felder III, director of the fabrication section of artificial organs, Department of Surgery, at The Hershey Medical Center; Barbara J. Hart, director, Learning Center, McKeesport campus; William T. Hughes, program coordinator, senior division of Undergraduate Studies at Penn State Mont Alto; Harold J. Mowery Jr., carpenter A in the Office of Physical Plant; Richard T. Obermyer, professor of physics at the Penn State McKeesport campus; and Johanna M. Ripper, staff nurse, Nursing/OPS S, The Hershey Medical Center. Also celebrating from the Penn State Fayette campus, but who have no photo available, are August H. Simonsen, campus executive officer; Doris Wright-Coldren, acting coordinator of the Division of Undergraduate Studies and University Scholars adviser; Kent A. Crossland, maintenance foreman; and Gerald K. Rigger, maintenance mechanic B.

Penn State/Minnesota partnership developing older driver options

By BARBARA HALE
Public Information

Researchers at Penn State and the University of Minnesota have joined forces to design new measures to prolong the safe driving time of older Americans and increase mobility options for aging citizens in rural environments.

Eddie C. Crow, program manager at the Applied Research Laboratory, is directing the new effort, known as the Partnership for Safety, Unrestricted Mobility and Access (PSUMA). Martin T. Pietrucha, professor of civil engineering and research associate at the University's Pennsylvania Transportation Institute, is Penn State coordinator and Dennis Foderberg, director, ITS Institute, Center for Transportation Studies, is Minnesota coordinator.

"Pennsylvania and Minnesota are similar demographically," Crow said. "For example, Pennsylvania ranks No. 1 in the number of older citizens living in small towns and rural locations and Minnesota is among the top five states. Rural living translates into a sole dependency on cars since other options, like public transit, often don't exist."

"While our new program is designed primarily for older drivers in Pennsylvania and Minnesota, the results of these studies will be applicable to aging Americans throughout the U.S.," he said.

Foderberg added, "The need for such an initiative is great and can only grow."

A new program that grew out of the research partnership between Penn State and the University of Minnesota is designed to prolong the safe driving time of older Americans.

Photo: Greg Gresco

EDDIE C. CROW

The loss of driving privileges is one of the biggest stressors in life. Meanwhile, it's been predicted that the over-65 population will double by 2020. The issues surrounding older drivers affect nearly everyone, but they're most severe in rural areas."

Three projects within the program are currently under way and expected to

MARTIN T. PIETRUCHA

yield initial results in about nine to 12 months. These include:

- Cognitive Retraining — Gerontology researchers at Penn State are identifying critical mental capabilities for safe driving which diminish as a result of normal aging but can be regenerated with specialty training. The training both restores the abilities

of failing drivers and maintains the performance of able ones.

- Mobility Planning and Alternative Mobility Options — Partners from Penn State and Minnesota are developing ways for older citizens to determine proactively and plan for future mobility needs and the means to get around in order to maintain an active and high-quality lifestyle.

- Alternative Mobility Planning — Transportation researchers will examine mobility alternatives that maximize efficiency through optimized carpooling or ride-sharing and by linking non-drivers with traditional volunteer and formalized volunteer programs. Coordination of mobility services with a transportation broker is also foreseen to be an effective way of increasing the use of current services.

Hershey offers light-activated cancer medicine

This year, 12,000 people will be diagnosed with esophageal cancer, a deadly disease that severely limits a person's ability to eat and drink. The Hershey Medical Center, in conjunction with Sanofi Winthrop Inc., has announced the availability of Photofrin (porfimer sodium) for Injection, a unique light-activated drug for photodynamic therapy to help those with advanced esophageal cancer.

Photofrin is the first light-activated drug approved in the United States for the palliative treatment of patients with completely obstructing esophageal cancer, or of patients with partially obstructing esophageal cancer who, in the opinion of their physician, cannot be satisfactorily treated with standard thermal laser therapy.

"We are excited about being able to offer this new minimally invasive treatment option to patients," said Dr. Mukul Khandewal, assistant professor of medicine at the medical center. Khandewal works in collaboration with Dr. Thomas S. McGarrity, associate professor of medicine. "This new procedure can be conducted on an outpatient basis or otherwise requires only a short hospital stay," Khandewal said.

Esophageal cancer can block the normal ingestion of liquids and solid nutrition and, at times, may prevent the patient from swallowing saliva. The condition can require extensive and costly surgical intervention, IV nutritional therapy and lengthy hospitalization.

In a pivotal clinical trial, 94 percent of patients with complete esophageal blockage who received Photofrin showed objective tumor response, and 76 percent obtained some improvement in swallowing.

For more information on this light-activated therapy, call The Hershey Medical Center at (717) 531-4874.

Athletes need both fat and carbohydrates for well-balanced diet, study shows

One of an athlete's favorite beliefs — fat is bad food, carbohydrates are good — needs to be re-examined in the light of facts, according to the Penn State Sports Medicine Newsletter.

"A lot of athletes have the idea that fat is a poor nutrient and feel almost superior if they survive on a fat-free diet," said Kristine L. Clark, a member of the newsletter's editorial board. "In reality, fat is an

essential nutrient. If you don't eat some fat, there is a good possibility that total calories will be inadequate. Just as many athletes over-consume carbohydrates, they under-consume fats," said Clark, coordinator of the sports nutrition program for the University's varsity athletes.

Athletes are told continually that 55 percent to 60 percent of their calo-

ries should come from carbohydrates, meaning starchy carbohydrates such as bread and cereals. However, they fail to realize that carbohydrates also occur in fruits, vegetables and dairy products, and thus they consume more starches than they should.

"Athletes also put too much stock in dietary supplements while at the same time overlooking the nutritional value of red meat," Clark said.

Furthermore, athletes make the mistake of not consuming enough fluids. In addition, they need to remember to eat a balanced meal about four hours before competition and a pre-game snack one hour before.

Finally, athletes should take in carbohydrate-rich foods within two hours after intense exercise, Clark said.

ATHLETICS

A regular column provided by Intercollegiate Athletics

Sign of spring

The annual Blue-White football game will be held at 2 p.m. Saturday, April 26, at Beaver Stadium. Admission is free and the scrimmage will be preceded by an autograph session at 12:15 p.m.

National champions

The Penn State fencing team won its third straight National Championship and its fifth in the past eight years at the NCAA Championships held recently in Colorado Springs, Colo. Only two other schools in NCAA history have won three consecutive fencing titles — Columbia-Barnard and Wayne State.

Tops in the classroom

The Lady Lion swimming team posted the top grade-point-average in the nation among NCAA Division I programs, according to a survey released by the College Swimming Coaches Association of America. Coach Bob Krimmel's team had a composite GPA of 3.34 to edge out Duquesne in second place. The women swimmers also had the top GPA among Penn State athletic teams during the 1995-96 academic year. A total of nine Penn State teams had a GPA of 3.0 or higher during the past academic year.

All-America honors

Senior Joe Roemer recently became the first Nittany Lion gymnast to earn GTE Academic All-America honors. Roemer was named to the men's fall/winter at-large second team as selected by the College Sports Information Directors of America. A 3.77 student in finance, Roemer also is one of 12 finalists for the Nissen Award, presented annually to the nation's top male collegiate gymnast.

Honored

NCAA and Big Ten Conference heavyweight wrestling champion Kerry McCoy, who finished his season with a spotless 41-0 record, was selected as the winner of the 1997 Dan Hodge Trophy, which is wrestling's equivalent of college football's Heisman Trophy. McCoy won 131 of his last 132 matches and dominated one of the nation's toughest weight classes to finish his career with a 150-18 record.

For the latest information on Penn State Sports, be sure to visit the official Intercollegiate Athletics Web site at <http://www.psu.edu> (Click on sports).

It's an art

Talking on the telephone is second nature for many college students. But, for a select group of Penn Staters, it has literally become their "calling." Three, in particular, have made their mark at Penn State hitting career highs as part-time telephone fund-raisers for the University. Students Marleen Frick, Michael Cipriani and Tonya Cummings, over the course of their part-time calling careers, have raised more than \$100,000 for academic programs at the Lion Line headquarters. Lion Line, within the division of University Development, hires students as part-time callers to raise funds. Since 1983, only nine students have accomplished what these three have achieved.

Hershey's Life Lion helicopter turns 10

The Center for Emergency Medical Services at The Hershey Medical Center will celebrate the 10th anniversary of its Trauma Services and Life Lion aeromedical programs from 11 a.m. to 4 p.m. Saturday, April 26. The center invites the entire community to come out and help honor the accomplishments and the history of Trauma Services and Life Lion.

Tours of both will be available, with the public able to sit in the seat of the helicopter that has assisted in saving thousands of lives, see the state-of-the-art Trauma Center and get a realistic impression of the daily activities that emergency medical staff perform.

Various displays will tell the history

of the Trauma Center and of Life Lion. Free hot dogs, hamburgers, potato chips, birthday cake, soda and more will be available on the front lawn of the medical center.

Other activities include face painting, a Teddy Bear Clinic and appearances by the Zombo Clowns, the crash test dummies and the Nittany Lion.

In 1986, The Hershey Medical Center received its trauma accreditation and Life Lion was launched. The first patient airlifted survived a myocardial infarction on Dec. 12, 1986.

The Hershey Medical Center received its accreditation as a Level I Regional Resource Trauma Center in 1987 with additional qualifications in pediatrics in 1993. A specially-trained

multi-disciplinary trauma team composed of surgeons, emergency physicians, nurses, anesthesiologists, radiologists and many others are available 24 hours a day for immediate response if the patients' injuries require additional support.

Serving 17 central and south central Pennsylvania counties and more than 2.3 million people, Life Lion provides aeromedical transportation for critically ill and injured patients to tertiary care or trauma centers throughout the region. Available 24 hours a day, the Life Lion critical care teams provide an intensive care environment during transport. For more information on the celebration, call The Hershey Medical Center at (717) 531-8606.

Jordan returns to speak on winning back the public trust

By LISA M. ROSELLINI
Public Information

Universities are in a state of crisis, brought on by growing public mistrust, according to former Penn State President Bryce Jordan, who said one way to win back public confidence is through extensive outreach efforts and a reinvention of the land-grant tradition.

Jordan, who spoke on April 16 as part of the Penn State Forum lecture series on the University Park campus, said the "crisis of public confidence" is not new, but is growing—and stronger voices are joining the clamor of public discontent and the call for accountability.

"These opinions deserve careful attention," Jordan said, acknowledging that some of the public perceptions are based on inaccuracies. "They have sensed the public dissatisfaction and are playing to that attitude."

Quoting from books by both Newt Gingrich, speaker of the U.S. House, and Dick Armey, House majority leader, Jordan pointed out that both men seem to think higher education is "out of control" and its "faculty are out of touch." Gingrich and Armey criticize universities for being poorly managed, expensive, defined by snobbery and run for the benefit of faculty.

"Not only have these two politicians with personal agendas spoken to the public's dissatisfaction," he told the record crowd of 320 listeners, "but voices within the academy have also begun to speak with concern about it."

Couple pledges \$5 million gift to University

Penn State alumni Edward R. and Helen Skade Hintz have pledged \$5 million to the University, part of which is designated to help build a new alumni center and part is for graduate fellowships, international studies and other academic priorities.

Ed Hintz, a New York investment manager and Penn State trustee, was recently named chair of the University's forthcoming capital campaign. Helen Hintz will serve as vice chair for the College of Health and Human Development's segment of the campaign.

The alumni center is planned as an addition to University House on the University Park campus and will be financed entirely by private funds.

"The center is a facility that we have long needed, given the steady growth in alumni activities," President Graham B. Spanier said. "Although we have

Funding allotted for 34 projects to enhance undergraduate education

Thirty-four projects expected to enhance undergraduate education at Penn State through innovative methods have received the support of the Fund for Excellence in Learning and Teaching (FELT) administered by the IDP/Center for Excellence in Learning and Teaching. The average support for these FELT projects is \$3,400, but the actual funding ranges from \$1,500 to \$10,000 for individual projects.

Selected from a field of 114 program proposals submitted this past year by faculty from across the University in a wide range of disciplines, these 34 teaching and learning projects incorporate a combination of methods to increase educational objectives. A mix of good practices, such as student-faculty contact, communicating high expectations, active learn-

Visiting scholars contribute international perspective to communi-

The Penn State community has more than one way to broaden its international perspective.

While hundreds of students and faculty study and conduct research abroad each semester, increasingly, those at home are also getting an international education — from visiting scholars on campus.

"About 750 international scholars from 58 countries a year visit, teach and do research at Penn State under the J-1 Visiting Scholar Program," Billie Willits, assistant vice president for human resources, said.

"Our visitors are typically very generous with their time, sharing experiences, expertise and information about their cultures with graduate and undergraduate students. As a group, they add tremendously to our diversity, energy and resources."

Helping to make these visits possible is the primary job of the Foreign National Employment Services Program in the Office of Human Resources. Staff help faculty hosts and scholars with exchanges, documentation and visas. They also work with departments on strategies to accomplish the exchange and ensure compliance with immigration and labor laws.

"This year, we have started a database on our visiting scholars for those interested in tapping into this tremendous pool of global talent," said Rosalie Bloom-Brooks, manager of the Foreign National Employment Service. "We now can generate information on who is here and in what areas of research or expertise. Scholars can find out who has recently come from their home country or is here in their discipline. Penn State campus groups, student and community organizations can identify appropriate international speakers for their occasion."

International visiting scholars come to Penn State throughout the year. While many are at the University Park campus, about 5 percent have headquarters at Penn State Harrisburg, Penn State Erie or another campus. The J-1 Visiting Scholar visa, which is granted through an exchange program under the umbrella of the United States Information Agency, allows scholars to stay for a few months to a maximum of three years for research, teaching and other scholarly activities.

These scholars not only add to the academic resources of the University, they also add substantially to the University's financial health. Many bring with them salaries or research support from their home institutions, sponsoring countries or institutes. While the combined salaries of visiting faculty on J-1 visas in 1995 (the latest year full data is available) came to \$10 million, nearly half, or \$4.5 million, was paid by non-Penn State sources.

Additionally, Penn State participates in national programs, such as hosting participants in the teaching and research Fulbright programs and the Hubert Humphrey program for mid-level government officials in developing countries. Some international scholars come for shorter periods of time on other special programs for artists, business executives and North American Free Trade Agreement projects, for workshops and conferences or through individual exchanges with departments and faculty. Another 200 international academics each year are at Penn State for extended periods of time.

"Both the University and the scholars gain understanding and international exchange," said Bloom-Brooks. "The University gains the services of the world's best at an incredible value — and even more of a value when we consider the nearly \$600,000 that scholars spend of their own personal funds to live here — and Penn State becomes more of a global resource with each visiting scholar who returns home."

Generous donors

The \$5 million gift from Edward R. and Helen Sade Hintz will go toward building an alumni center, planned as an addition to University House (right) on the University Park campus. The money will also go toward graduate fellowships, international studies and other academic priorities.

Photos: Greg Grieco

Gift

Continued from page 1

the largest dues-paying alumni association in the world — more than 140,000 members — we're one of the few major universities that has no dedicated alumni center."

The center will serve as a gathering point for returning alumni and offer information about the University's academic achievements, campus tours and special events. It will contain meeting rooms, a hall of honor recognizing outstanding alumni and space for alumni association staff. The structure's estimated cost is approximately \$7 million. Architectural design will begin later this year and construction could begin as early as 1998.

Ed Hintz graduated from Penn State in 1959 with a bachelor's degree in finance. After receiving an MBA from Harvard in 1963 and working as an analyst/portfolio manager for a number of years, he founded the investment firm of Hintz, Holman and Hecksher Inc. in 1975. He has been a Penn State trustee since 1994. Last fall President Spanier named him to head the University's next capital campaign. The campaign's dollar goal has not been set.

Funding

Continued from page 1

ing, collaboration across disciplines and the use of information technology, were submitted during the proposal process.

Some examples of funded projects include:

■ "A Collaborative Approach to Teaching Philosophy of Science," proposed by Weaver Santolucito, philosophy, and Ike Shibley, chemistry, both from Penn State Berks. This project will help students attain a more holistic view of philosophical and ethical problems relating to science and its practices by demonstrating that philosophers help further scientific knowledge, just as scientists contribute to moral thinking.

■ "The Use of Computer Analysis in the Teaching of Applied Music," proposed by Mark Lusk, associate professor of music, Roger Martin, materials, Tad Rollow, acoustics, and Herbert McKinstrey, associate professor of solid state technology, all at University Park. This project will involve designing a computer environment that would include real-time analy-

Hintz also was a vice chair of The Campaign for Penn State, which raised \$352 million for academic programs from 1984 to 1990, and chaired the National Development Council, the University's top fund-raising advisory body from 1993 to 1996.

Helen Hintz, a 1960 graduate in consumer services, is coordinator of career development for the department of nutrition, food and hotel management at New York University, where she received her master's degree in 1987. She is an adviser to Penn State's College of Health and Human Development on advancement issues, including communications, fund raising and alumni relations.

In addition, Ed Hintz led the campaign that raised \$22 million in gifts to help build Penn State's Bryce Jordan Center, and the couple served on the committee that raised more than \$12 million for the new Paterno Library. Their previous philanthropy to the University has included gifts to support faculty and students in the College of Health and Human Development, the School of Music and at the Penn State Berks campus.

sis of audio wave forms and will greatly enhance the instrumental teacher's ability to communicate aspects of sound qualities such as pitch and amplitude and the student's ability to comprehend that knowledge and make necessary modifications.

In addition to the 34 proposals funded, 17 proposals were forwarded to Educational Technology Services for consideration in phase II of its Faculty Technology Initiative. Projects not funded by ETS will be eligible to receive FELT money. Diane Emerson, director of IDP/Center for Excellence in Learning and Teaching, said a list of abstracts from funded proposals should be available early this summer to further discussion and planning for enhancing undergraduate education.

A complete list of supported proposals may be obtained from IDP/Center for Excellence in Learning and Teaching, 401 Grange Building, telephone: (814) 863-2599; or can be viewed on the Web beginning on June 1 at http://www.psu.edu/idp_celt

Couple commits \$2 million to Penn State Erie

Edward P. "Ted" Junker III, former vice chairman of PNC Bank Corp., and his wife, Barbara Frederick Junker, have endowed the Penn State Erie, The Behrend College's athletic program with a \$2 million dollar gift.

The pacesetter gift, announced in conjunction with Penn State's upcoming capital campaign, will be used to endow Penn State-Behrend's athletics program. Ted Junker, a trustee of the University, was recently named chair of the capital campaign for Penn State Erie.

"We think there's no single engine that drives economic development more than higher education," Junker said in a recent joint interview with his wife. "Athletics is part of a well-rounded campus life, and we chose this opportunity to enhance the program now and for the future."

Barbara Junker said she and her husband believe athletics help develop character, discipline, and self-esteem. The Junkers, who met as students at Penn State, both participated in athletics at the college

level. Barbara Junker received her degree in and taught physical education, and also coached basketball. She is well known for her commitment to public education, and is currently serving a 16-month appointment on the Fairview School Board.

The Junkers have a long history of involvement with Penn State. Both are alumni and hold lifetime membership in the Penn State Alumni Association. Members of the Mount Nittany Society, they endowed the Edward P. and Barbara F. Junker Scholarship at Penn State-Behrend in 1987.

Although the Junkers attended Penn State's University Park campus, as did their three daughters and their three sons-in-law, they are very committed to Penn State-Behrend. Ted Junker is a 1960 graduate of Penn State and a 1969 graduate of the Stonier Graduate School of Banking at Rutgers University. He joined Marine Bank — predecessor to PNC Bank, Northwest PA — as an assistant vice president in 1964 and rose through the ranks to become chief executive officer in 1983. In 1985

he was elected chairman of PNC Bank, Northwest PA, and vice chairman of PNC Bank Corp. He served as president of the Pennsylvania Bankers Association in 1988-89.

He is a member of the board and former chairman of the board of the Council of Fellows at Penn State-Behrend. In 1984 he received the Philip Mitchell Alumni Service Award; three years later, he was awarded the lifelong designation, alumni fellow, by both Penn State-Behrend and the College of Health and Human Development.

Junker, who is currently serving his second term as vice president of Penn State's Board of Trustees, was first elected to the board in 1986.

Penn State's capital campaign will aim primarily to raise private funds for scholarships, graduate fellowships, faculty endowments and a variety of academic programs. The dollar goal for the campaign will be announced at a later date, according to President Graham B. Spanier.

Jordan

Continued from page 1

report on the future of state and land-grant universities released on April 2, the members of the commission — 25 current and former university presidents, including Penn State's President Graham B. Spanier — concluded that public higher education is facing a number of challenges, among them an eroding public trust. The commission, through its report "Returning To Our Roots," is pressing for public universities to change and stressing a need for them to reaffirm their missions.

When the report was released, Gordon Gee, commission chair and president of The Ohio State University, said "Our greatest concern is that universities will become irrelevant in the public mind."

During his talk, Jordan echoed these sentiments and said the crisis of public mistrust has brought on an "opportunity" for land-grant institutions like Penn State and Ohio State to be at the forefront of the battle to regain public confidence. Because the land-grant tradition of public service and outreach is already well-established in the agricultural colleges of these institutions, it would not be a quantum leap to envision an updated, enhanced and broadened public service mission that permeates the entire university. Building on an already solid foundation of service found in the agricultural colleges, institutions should move to increase the amount of outreach conducted across the entire spectrum, according to Jordan.

"We need to find new, diverse paths to become increasingly useful," Jordan said. "I envision the suffusion of the entire public university with the land-grant tradition to better serve the public and our communities."

But before Penn State or any other institution can embark on a path to strengthen its service mission and integrate it into all corners of the uni-

Full house

Former President Bryce Jordan spoke to a gathering of roughly 320 people — the largest group ever to attend a Penn State Forum.

Photo: Greg Grieco

Before Penn State or any other institution can change, some "internal conflicts" need to be resolved — mainly the debate over tenure and finding the appropriate balance between research, teaching and service.

versity, Jordan said some "internal conflicts" need to be resolved — mainly the debate over tenure and finding the appropriate balance between research, teaching and service.

"Our standards for faculty appointment, promotion and tenure will most certainly have to be revised," he said. "We are all aware of the sharp division in faculty attitude (on this topic) — if there are to be new and different standards for the awarding of merit promotions and pay

increase for the delivery of outreach services to the public, then the support of the university's entire faculty, including those not primarily involved in outreach, must be sought."

James Moeser, chancellor of the University of Nebraska and former dean of Penn State's College of Arts and Architecture, said any university's greatest enemy to this type of change will be the "hardened walls that separate department from department, college from college, and campus from campus."

In an interview about the topic of Jordan's talk, Moeser said universities must resist the tendency to allow individual units to continue "owning" specific segments of knowledge.

"We don't have enough time to reorganize the entire university, and even if we did, the answer doesn't lie in replacing old walls with new ones," Moeser said. "Rather, we must find ways to turn walls into permeable membranes."

Jordan also touched on the subject of interdisciplinary efforts, stressing

the need for collaboration in helping to solve society's most complex problems. He was quick to point out that interdisciplinary efforts are difficult to achieve and sustain. No change will happen at Penn State without the wholehearted support from faculty, administrators and the Board of Trustees, Jordan said.

"What I am suggesting is the reorientation, perhaps even a massive one, of the mission of the American land-grant university," Jordan said. "It is easy to enunciate this view — much easier than implementing it."

To accomplish such a vast goal, Jordan said university leaders must begin by building a consensus among all who have a stake in higher education — including external audiences. In addition, those within the university setting must be flexible and open to change.

"Despite the changes going on all around them, universities continue largely to cling to their traditional ways," Jordan said. "Achieving even a portion of what I believe is needed (in outreach), is a formidable task."

LECTURES

Sloan Foundation head to give talk on May 9

Ralph E. Gomory, president of the Alfred P. Sloan Foundation, will present "New Opportunities for Learning Outside the Classroom" at the Penn State Forum from 11:30 a.m. to 1 p.m. on May 9 at The Nittany Lion Inn on the University Park campus. The Penn State Forum is a speaker series sponsored by the Faculty Staff Club and the Penn State Bookstore.

RALPH E. GOMORY

more than 40 experiments in four years. The foundation looks for programs that explore the use of technology to enhance education.

Tickets are \$10 and include lunch. Reservations can be made by contacting the Penn State Faculty Staff Club office in 110 HUB. Departments may reserve 10-person tables; tickets will also be on sale at the door. Lunch begins at 11:30 a.m. followed by the speech at noon. For more information call (814) 865-7590.

Gomory will talk about what we know — and don't know — about the new electronic era in education and training, as well as the human and institutional barriers to change that universities face.

Under the leadership of Gomory, the Sloan Foundation has invested in

Rebuilding families is topic of author's May 15 lecture

Mary Pipher, author of the best-seller *Reviving Ophelia: Saving the Selves of Adolescent Girls*, will speak and answer questions on her latest book, *The Shelter of Each Other: Rebuilding Our Families* at the Penn State Conference Center Hotel at 8 p.m. May 15. Admission, which is open to the public, is \$15 (\$10 for full-time students).

Pipher is a clinical psychologist in private practice, as well as an associate professor in the psychology department and visiting professor in the clinical psychology training program at the University of Nebraska. She also wrote *Hunger Pains: The American Woman's Tragic Quest for Thinness*.

For those interested in a more in-depth presentation, Pipher will lead a daylong workshop for counselors, educators, social workers and spiritual leaders on strengthening families on May 16 at the conference center hotel. Pipher's appearance is a continuing and distance education service of the College of the Liberal Arts.

For more information about the lecture or the workshop, contact Lori Benson at (814) 863-5120 or by e-mail at ConferenceInfo@cds.psu.edu.

To register for the workshop, call (800) 778-8632 or visit the Web at <http://www.cds.psu.edu/C61/EachOther/>.

Learn about health benefits of humor at May 22 speech

Karyn Buxman, nurse, humorist, author and radio personality, is the scheduled keynote speaker for the 16th Annual Women's Day on Campus program to be held on Thursday, May 22, at the Penn State Fayette campus.

Buxman combines her skills as a health professional and a humorist to bring a message that will not soon be forgotten. She presents to thousands of business and health professionals from coast-to-coast and abroad how to put humor into their personal and professional lives.

A member of the National Speakers Association, the International Society of Humor Studies and the American Association of Therapeutic Humor (AATH), as well as editor of *Therapeutic Humor*, the national newsletter for AATH, Buxman's achievements include "Nurse of the Year" by the Missouri Nurses' Association, "Young Business Woman" by a Missouri chapter of Business and Professional Women and several others.

For more information, phone Barbara Solesky at (412) 430-4153 or Harriet Galida at (412) 430-4140.

On tour

Richard J. Courtney, professor and chair of the Department of Microbiology and Immunology, (right) talks with Eric J. Barron, director of the Earth System Science Center and professor of geosciences (left) during a recent tour of the College of Medicine. The tour is part of an effort organized by the president's office to help deans and administrators become more familiar with various aspects of Penn State. This tour is similar to the annual statewide tour for faculty members conducted by President Graham B. Spanier. Next stop for deans and administrators is Delaware County and Worthington Scranton campuses on April 25, New Kensington on April 30 and Penn College on May 1.

Faculty Senate committee to produce report on undergraduate education

After a year of taking a hard look at undergraduate education at Penn State, the University Faculty Senate's Special Committee on General Education is about to shoulder its summer writing assignment: putting its recommendations into a final report that will be submitted to the Faculty Senate in the fall.

Robert Pangborn, chair of the committee and associate dean of undergraduate studies in the College of Engineering, said the committee found that the current undergraduate curriculum serves Penn State students well in many ways. "However, we did find opportunities to make some improvements and better serve our students. I think that we're going to be able to create a proposal that the faculty will support, and that has high potential for successful implementation."

The committee has agreed on many issues, including:

- the University-wide use of first-year seminars, with built-in flexibility for the different colleges;
- the integration of key competencies (writing, speaking, quantitative skills, information retrieval, problem-solving, teamwork, intercultural and

international competency) into general education courses;

- a restructured health sciences requirement;
- more opportunities for placing out of courses;
- a process for continuous assessment;
- a refinement of the cultural diversity dimension; and
- incorporating second languages as a general education option.

Since the end of last year, the committee has been receiving input on a working document that spelled out principles and draft recommendations for Penn State's general education program (*Intercom*, Sept. 19, 1996). Using feedback from faculty, students and alumni, committee members have made substantial revisions to the basic plan.

The committee's work toward a final report is fairly far along, but committee members continue to encourage and accept input. The committee plans to work through the summer on crafting its final proposal and bring it to the Senate for consideration early in the fall semester.

Spring Commencement ceremony schedule set

Penn State will hold 1997 Spring Commencement ceremonies at all 23 campus locations the weekend of May 16 for 839 associate, 5,405 baccalaureate and 1,320 graduate degree students — a total of 7,564 graduates systemwide, including 108 medical students.

At the University Park campus, 38 students will graduate with associate degrees, 4,758 with baccalaureate degrees, 890 with master's degrees and 207 with doctorates, for a total of 5,893 graduates. Each college at University Park will hold its own ceremonies.

Friday, May 16:

■ 3 p.m.: The ROTC Commissioning Ceremony in Schwab Auditorium. ROTC faculty representative will be Col. Robert D. Phillips, USAF, professor of aerospace studies; Capt. Grant G. Ziebell, USN, professor of naval science; Lt. Col. William E. Haner, USA, professor of military science.

■ 4:30 p.m.: University Scholars Medals Ceremony for graduating seniors in Eisenhower Auditorium. **James Rambeau**, director of the University Scholars Program, will speak.

■ 5 p.m.: Graduate School Ceremonies in Eisenhower Auditorium. **Jules B. LaPidus**, president of the Council of Graduate Schools, will speak. LaPidus was appointed associate dean for research in The Ohio State University's graduate school in 1972, and two years later became the school's dean and vice provost for research.

■ 8 p.m.: The College of Education in Eisenhower Auditorium. **John L. Braxton**, judge of the Commonwealth of Pennsylvania, will speak. Braxton earned his bachelor's degree from Penn State in 1966. He graduated from the Howard University School of Law in 1971 with a juris doctorate degree;

in 1981, he was appointed to the Common Pleas bench by Gov. Thornburgh. Judge Braxton is an adjunct professor in the School of Business and Management at Temple University and has taught in the master's program in criminal justice at St. Joseph's University.

■ 8 p.m.: The College of the Liberal Arts in The Bryce Jordan Center. **James Balog**, retired chairman of Lambert Brussels Capital Corp. and 1838 Investment Advisers, will speak. Balog received his bachelor's degree from Penn State in 1950 in premedicine.

Saturday, May 17:

■ 9 a.m.: The Eberly College of Science in The Bryce Jordan Center. **James Balog**, retired chairman of Lambert Brussels Capital Corp. and 1838 Investment Advisers, will speak. Balog received his bachelor's degree from Penn State in 1950 in premedicine.

■ 9 a.m.: The College of Agricultural Sciences in Eisenhower Auditorium. **Joseph E. Kunsman Jr.**, director of academic programs, agriculture and natural resources at the National Association of State Universities and Land-Grant Colleges, will speak. Kunsman graduated from Penn State with a bachelor's degree in dairy science. He earned his master's and doctoral degrees from the University of Maryland.

■ Noon: The College of Health and Human Development in The Bryce Jordan Center. **Mark A. McCamish**, medical director for Abbott Laboratories, will speak. McCamish has degrees in exercise physiology, ergonomics, human nutrition and medicine. He holds an academic appointment as a clinical associate professor in the Department of Internal Medicine at The Ohio State University and maintains a clinical practice.

■ Noon: The College of Arts and Architecture in Eisenhower Auditorium. **Joseph Riley**, mayor of

Charleston, S.C., will speak. Riley is credited with spurring the revival of Charleston, despite \$2 billion in damage from Hurricane Hugo and the closing of the Navy base that was the city's largest employer.

■ 3 p.m.: The College of Engineering in The Bryce Jordan Center. **Bennett Levin** will speak. Levin earned bachelor's degrees from Penn State in liberal arts ('61) and industrial engineering ('65). His national consulting practice, Consulting Mechanical and Electrical Engineers, is based in Philadelphia.

■ 3 p.m.: The College of Communications in Eisenhower Auditorium. **Elizabeth Fetter**, president of Pacific Bell's Industry Markets Group, will speak. Fetter is a 1980 graduate of Penn State. She earned her master's degree with honors in industrial administration and public policy from Carnegie Mellon University.

■ 6:30 p.m.: The Smeal College of Business Administration in The Bryce Jordan Center. **Kurt Landgraf**, chief financial officer of DuPont, will speak. Landgraf earned a bachelor's degree in economics and business administration from Wagner College. He earned three master's degrees: one in economics from Penn State; a second in administration from Rutgers University; and a third in sociology from Western Michigan University. Landgraf graduated from the Harvard Business School advanced management program in 1992. He is co-chair of the board of the DuPont Merck Pharmaceutical Co.

■ 6:30 p.m.: The College of Earth and Mineral Sciences in Eisenhower Auditorium. **John A. Dutton**, Penn State's dean of Earth and Mineral Sciences, will speak. Dutton has served as dean of the college since 1986.

University Park construction update

Photos: Greg Gneco

Change is in the air

Gov. Tom Ridge will be at Pattee Library on the University Park campus on April 25 to participate in the official groundbreaking ceremony. Preliminary sitework already has begun for the addition of the Paterno Library, as seen in the photo at the right. According to the construction Web site, interior work may begin sooner than expected, with the contractor nearly ready to build interior walls to cover the glass window-wall that will be removed in East Pattee and to cover the windows along the north wall of the LLAS Terminal Room (C102). The first and fourth floors in East Pattee and room C102 will likely be the first areas to receive work. For updated information, check the Web at <http://www.libraries.psu.edu/pubinfo/construction/>.

In addition, work will soon begin on the Hetzel Union Building, above. Renovations to the HUB will add 95,000 square feet to the building's existing 154,000 square feet. The new Paul Robeson Cultural Center will be integrated into the complex. The groundbreaking ceremony for that project will be May 2.

The ARTS

AT PENN STATE

He writes the songs

Barry Manilow will play at The Bryce Jordan Center on the University Park campus July 18. Tickets are on sale now at \$39.50 and \$29 for reserved seating.

End-of-year performance

The Penn State Concert Choir and Chamber Singers will present their final performance of the season at 8 p.m. Friday, April 25, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus. The ensembles, under the direction of **D. Douglas Miller**, professor of music, will sing a varied repertoire.

A special feature of Friday's concert will be the inclusion of performances by five different small vocal ensembles from within the 44-member Concert Choir.

Tickets are \$4.50 for the general public; \$2.50 for students, and may be purchased at the School of Music Office, Monday through Friday, from 8 a.m. to 5 p.m., or at the door on the evening of the performance.

Blue and White concert

The Penn State Glee Club will present the annual Blue and White Concert at 8 p.m. Saturday, April 26, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

In addition to sea chanteys, drinking songs and American folk songs, the concert also will feature the Hi-Lo's, Penn State's oldest a cappella singing group.

Tickets are \$4 for the general public; \$2 for students and children, and will be available at the door.

Oriana Singers concert

The Oriana Singers will present their spring concert at 2 p.m. Sunday, April 27, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

The 65-voice choir, conducted by **Lynn Drafall**, assistant professor of music education, will begin the concert with the music of Schubert and Brahms. The second half of the program will feature music based on children's literature.

Tickets are \$4 for adults; \$2 for students, and will be available only at the door before the performance.

University Choir concert

The Penn State University Choir will present a spring concert at 4 p.m. Sunday, April 27, in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

The theme *Sing and Celebrate* will feature settings of early American hymns, sacred and secular works of Johannes Brahms and selections by African-American composers.

Sine Nomine, the chamber ensemble from University Choir, will per-

form several arrangements of popular songs and folk music. **Anthony T. Leach**, assistant professor of music, is conductor of the University Choir.

Tickets are \$4 for non-students; \$2 for students, and may be purchased in advance through the School of Music Office at (814) 865-0431, or at the concert. For more information, please call Leach at (814) 865-6521.

Odyssey Through Literature

On the April 27 episode of *Odyssey Through Literature*, fiction writer **Charlotte Holmes** reads and discusses her latest work, *Gifts and Other Stories*, with host **Leonard Rubinstein**. She chose the story *Gifts* to title her collection, she explains, because gifts are a recurring theme throughout all of her stories.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 on WPSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://mickey.la.psu.edu/complit/odyssey/odyssey.htm>.

Bach's Lunch

The Penn State Double Reed Ensemble, directed by **Timothy Hertz**, assistant professor of music and oboe instructor, will perform at the free **Bach's Lunch** concert at 12:10 p.m. Thursday, May 1, in the Helen Eakin Eisenhower Chapel on the University Park campus. The 20-minute concert is part of the **Bach's Lunch** series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

The Double Reed Ensemble is a newly-formed group of 10 undergraduate music and non-music majors.

Audience members may take bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Penn State Concert Band

The Penn State Concert Band will present its 21st annual spring concert on Thursday, May 1, at 8 p.m. in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus.

The band is conducted by **O. Richard Bundy**, director of the Penn State Blue Band and associate professor of music education in the School of Music. **Stacey Phillips**, a music education doctoral candidate in the School of Music, will assist. Director of Concert Band at Penn State is **Dennis Gloske**.

The concert is free to the public.

Passover exhibit

The Kern Graduate Building flat and tall cases feature a special exhibit "The Passover Haggadah — a Jewish Cultural Phenomenon," through May 18.

BRYCE JORDAN CENTER

Upcoming events

■ **April 19:** World Wrestling Federation, 8 p.m.

Tickets: \$18, \$15, \$11 for reserved seating, on sale now.

■ **April 28:** Steven Curtis Chapman, with audio adrenaline and Carolyn Arends, 7:30 p.m. Tickets: \$20, \$24.50. Group discounts are available.

■ **May 3, 4:** The Royal Hanford Circus, 2 and 7 p.m. both days. Tickets: \$13 and \$11 for adults; \$11 and \$9 for children 12 and under. Group rates are available.

■ **May 6:** No Doubt, with CIV and The Vandals, 7:30 p.m. Tickets: \$21.50 for reserved seating and general floor admission

■ **May 16, 17:** Commencement Times: Friday, 3 and 8 p.m.; Saturday, 9 a.m., noon, 3 and 6:30 p.m.

For more information call (814) 863-8500 or (814) 863-6357.

■ **June 12-14:** Preview '98 regional trade show Times: Thursday, 5-8 p.m.; Friday, 10 a.m. to 7 p.m.; Saturday, 10 a.m. to 7 p.m.

For booth information call (814) 863-1570

■ **July 18:** Barry Manilow Tickets: \$39.50 and \$29 for reserved seating, on sale now.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc-psu.edu>.

The exhibit, which commemorates the exodus of the Hebrew nation from slavery in Egypt, is from the personal collection of **Richard Goldstein**. The collection was amassed from around the world and in addition to Hebrew, is written in several other languages including Greek, Russian and Swedish.

The Kern Exhibition Area is on the first floor of the Kern Graduate Building on the University Park campus. Hours are 8 a.m. to 11 p.m., Monday through Friday; 10 a.m. to 11 p.m. Saturday; and noon to 11 p.m. Sunday.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Saturday, April 26

Robin Seymour on "The Stieglitz Circle," 2 p.m., Palmer Museum of Art.
"Glee Club Blue and White Concert," Bruce Trinkley, director, 8 p.m., Recital Hall. For tickets, phone (814) 865-0431.
Lisa Cerami, student recital, piano, 8 p.m., 122 Music II.

Sunday, April 27

"Singing Lions," Peter Kiefer, director, 2 p.m., Eisenhower Auditorium. For tickets phone (814) 865-0431.
"Oriana Singers," Lynn Drafall, director, 2 p.m., Recital Hall.
"University Choir," Anthony Leach, director, 4 p.m., Recital Hall (814) 865-0431.

Kyle Glaser and Sue Kearney, student recital, saxophone, 8 p.m., Recital Hall.
Jeanne Nagurny, graduate lecture/recital, voice, 8 p.m., 122 Music II.
Charlotte Holmes, fiction writer, "Odyssey Through Literature," 6:30 p.m., WPSU, 9:15 P.M.

Monday, April 28

Steven Curtis Chapman with special guests audio adrenaline and Carolyn Arends, 7:30 p.m., The Bryce Jordan Center.
Ivan Hodge, student recital, violin, 8 p.m., Recital Hall.

Tuesday, April 29

Denise Deegan's "Dolls Pulls It Off," Helen Mantel, director, 8 p.m., The Playhouse, through May 3. For tickets, phone (814) 865-0255.

Wednesday, April 30

"Singin' in the Rain," 8 p.m., Eisenhower Auditorium. For tickets, phone (814) 865-0255.
Symphonic Wind Ensemble, Dennis Glocke, conductor, 8 p.m., Recital Hall. For information, phone (814) 865-0431.

Thursday, May 1

Bach's Lurch, The Penn State Double Reed Ensemble, 12:10 p.m., Eisenhower Chapel.
Concert Band, O. Richard Bundy, conductor, 8 p.m., and Collieen.

Friday, May 2

Scott Davis and Colleen Cochran, student recital, clarinet, 8 p.m., Recital Hall.

Saturday, May 3

Catherine Ciferri on "American Watercolors at

Coming soon

Singer Steven Curtis Chapman will be joined by audio adrenaline and Carolyn Arends at 7:30 p.m. Monday, April 28, at The Bryce Jordan Center on the University Park campus. Tickets are \$20 and \$24.50.

the Palmer Museum," 11:30 a.m., Christofers Lobby, Palmer Museum of Art.
The Royal Hanneford Circus, 2 and 7 p.m., The Bryce Jordan Center, through May 4.
Celia Toth, graduate recital, piano, 8 p.m., Recital Hall.

Sunday, May 4

Chamber Music Recital, 7 p.m., 122 Music Building II.

SEMINARS

Friday, April 25

Alexander Pines on "Gauge Kinematics of Spins and Cats," 12:15 p.m., S-5 Osmond Laboratory.

Megan Henry on "Impact Theory for Rydberg Atom Transient Line Shapes," 2:30 p.m., S-5 Osmond Laboratory.
Illa Dichev on "Is the Risk of Bankruptcy a Systematic Risk?" 3:30 to 5 p.m., 333 Beam Business Administration.

Saturday, April 26

Karl Kimmerling on "Profitable Growth Through Teamwork and Technology," 11

a.m., 112 Walker.

John T. Ryan III on "Business in the '90s: A Contrarian View," 4 p.m., 22 Deike.

Monday, April 28

Ranee Bryniski on "Keebler Quantization of Phase Space with Elementary Symmetry," 2 p.m., 339 Davy Laboratory.
Diptman Sen on "Density Matrix Renormalization Group for Antiferromagnetic Spin Chains," 3:30 p.m., 339 Davy Laboratory.
Gita Talmadge on "The Effects of Magnetic Fields on Electrically Conducting Fluids: An Introduction for Terrestrial Applications," 3:35 to 4:25 p.m., 215 Hammond.

Tuesday, April 29

Gerard Bond on "Millennial-Scale Climate Variability During the Holocene. Last Glaciation and Last Interlaciation in the Subpolar North Atlantic — Ice Sheet Versus Ocean — Atmosphere Forcing," 4 p.m., 112 Walker.

Mary Carrington on "Genetic Resistance to HIV-1," 4 p.m., 8 Mueller Laboratory.

Harry Dawson on "The Effects of Vitamin A and Aging on Immunity," 4 p.m., S-209 Henderson.

Wednesday, April 30

Gary L. Gray on "Nonlinear Spacecraft Attitude Dynamics," 3:35 p.m., 215 Hammond.
Kristen Robinson on "The Effect of Educational Attainment on Mortality Rates and Cause of Death Structures," 12:15 to 1:15 p.m., The Living Center, 110 Henderson.

Thursday, May 1

Paul Chaikin on "Hard Spheres in Space: Colloidal Crystals in Microgravity," 3:30 p.m., 101 Osmond Laboratory.

Friday, May 2

Amartya Bhattacharya on a subject to be announced, 3:30 p.m., 339 Davy Laboratory.

CONFERENCES

Monday, April 28

"Ethics in University Research and Education," 9 a.m. to 1 p.m., The Nittany Lion Inn.

Better Process Control School, Nittany Lion Inn, through May 1.
Advanced Police Experience Development,

The Penn State Scanton, through May 9.

Short Course in Powder Characterization, The Nittany Lion Inn, through May 1.
Advanced Capillary Gas Chromatography, The Penn State Scanton, through May 2.

EXHIBITS

HUB Art Alley Panels

Oil and print exhibit by Amy Jane Whitney and Darren R. Grier, through May 4.

HUB Browning Gallery

"Photographs of Australia" by Richard Wolkstein, through April 27.

HUB Formal Gallery

Mixed media works by Howard Brooks, through May 4.

HUB Sculpture Corner

"American Gothic Revisited" by Richey, through May 21.

Kern Exhibition Area

Sketches titled "Shalom," through May 22.

Kern Tall and Flat Cases

"The Passover Hagaddah" — A Jewish Cultural Phenomenon, through May 18.

North Halls

Paintings by Jodi Ruffner, through April 30.

Palmer Museum of Art

"Capturing the Light: A Selection of 19th-Century American Watercolors," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 8.

"Exotic Illusions: Art, Romance and the Marketplace," through June 15.

Zoller Gallery

"MFA Theses Exhibitions," ceramics by Danielle Morlier and Rebecca Wostrel, through April 28.

"MFA Theses Exhibitions," drawings/paintings by Carol Peebles and Greg Stadler, May 1-10.

■ Reflects an international perspective.

APRIL 25 - MAY 4

Working together at Berks to aid people with disabilities

Students at Penn State Berks campus are doing more than just hitting the books these days. They're joining forces to create a keyless entry to an apartment controlled by someone with a disability; designing an alarm to tell someone with impaired mental capabilities when food has been on the stove too long; and adapting a small electric car for a 4-year-old boy with cerebral palsy who has no function of his feet and very little function of his arms.

These are some of the projects that engineering technology, engineering and occupational therapy assistant classes have been working on. They will present their projects at 7 p.m. Thursday, May 1, in the Perkins Student Center Theatre at Berks campus. The presentation is free.

Henry Ansell, assistant professor of engineering, and Kelly Hennessey, lecturer in education, have coordinated this joint effort. Some of Hennessey's occupational therapy assistant students designed and constructed therapeutic devices which they will use in their field. Ansell asked his second-year engineering students to design and construct devices in collaboration with Hennessey's students.

The senior engineering technology students worked on three term projects with input from a Reading Rehabilitation Hospital therapist, an Office of Vocational Rehabilitation counselor and the parents of the 4-year-old boy with cerebral palsy.

Real-life applications

Penn State Berks campus students Gary Lefever, left, Russ Kuhns, Ron Weachock and team captain Bruce Smith work on an electric car for a 4-year-old boy with cerebral palsy.

PennDOT gives University funds for airport

The runway at the University Park Airport will receive a much-needed facelift, courtesy of a grant from the Pennsylvania Department of Transportation. Pennsylvania Deputy Secretary of Transportation Liz Voras recently presented a check for \$8,000 to airport manager Robert Dannaker as part of PennDOT's continuing commitment to upgrade Penn State's airport facilities. The money will fund new pavement painting equipment and contracted work to seal runway cracks.

"Over the past several years, PennDOT has contributed more than \$2.65 million to the University Park Airport for capital improvements and maintenance," said Robert Finley, assistant to the vice president for business and operations who oversees airport issues. "This grant will help us get maximum life out of our facilities."

PennDOT provides about 5 percent of all funding for the University Park airport. Traffic over the past 10 years has increased steadily at about 6.5 percent to 7 percent a year, making regular pavement maintenance a high priority.

Here's an example

Increased traffic has taken its toll on the University Park Airport runway. Robert Dannaker, airport manager, points out some surface cracks that will be sealed using money from a Pennsylvania Department of Transportation grant.

Applications sought for Department of Pathology chair

Applications are invited for the position of chairperson, Department of Pathology, College of Medicine.

Candidates should be nationally recognized scholars in pathology with an outstanding record of research and teaching, a proven record of collaboration with other medical specialists, leadership in appropriate professional organizations and productive administrative experience in an academic health center.

The successful candidate will be expected to provide imaginative direction for current and future pro-

grams to advance the missions of the College of Medicine and the Penn State Geisinger Health System, while promoting the national stature of the department.

Applications should be sent to: Office of the Senior Vice President for Health Affairs and Dean, The College of Medicine, The Milton S. Hershey Medical Center, P.O. Box 850, Hershey, Pa. 17033.

Penn State is an affirmative action, equal opportunity employer.

Professional Women announces new officers

New officers for 1997-98 have been named for the grass-roots group Professional Women at Penn State. They are Jean Brooks, chair; Anne Stokes, treasurer; Jean Barczak, chair-elect; and Linda Spangler, treasurer-elect. Professional Women at Penn State is coordinated by University women and encourages participants to develop and maintain a communications network. It also serves as a resource for other Penn State women.

Brooks came to Penn State in 1984, as a wage payroll clerical staff in the compliance office; eventually she advanced through various full-time positions to her current post as office manager for the Student Services Center in the College of Health and Human Development.

In 1995, she was recognized with an award for her extraordinary contribution to the productivity of the Sponsored Programs Office. Her position as chair of the organization begins this June.

Stokes came to Penn State in 1989 from Arlington, Texas, where she was a proposal specialist with Imaginering Systems Corp. and attended the University of Texas at Arlington. She began as a part time secretary for the Center for East Asian Studies. She accepted a full-time position in the Department of Chemistry in January 1990. She moved to the Department of Human Development and Family Studies in October 1993 where she serves as an accounting assistant.

Barczak has lived in State College since 1973. She was a typelist for J.C. Penney and owned two businesses before coming to Penn State. She started part time in women's studies in 1989. She accepted a full-time position in development for the Commonwealth Campuses. In 1990, she returned to women's studies as the only full-time staff until 1994. She was elected to a three-year term with Professional Women in 1996 and chair-elect in January 1997.

Spangler began her career at Penn State as a receptionist in the political science department in 1982 and in 1983 was promoted to the undergraduate secretary position. She was promoted to the graduate secretary position in Economics in 1984 and stayed in that position until 1991, when she was promoted to administrative assistant.

In 1996, she received the College of the Liberal Arts Outstanding Staff Award.

The group, which welcomes attendance by both females and males in all job and student classifications, is currently accepting applications for leadership positions on its coordinating council. Applications must be submitted by May 20. For more information, or to receive a brochure and application form, please contact Anne Stover, 303 Delke, University Park, (814) 865-6393.

Penn State's largest college seeking dean

A search committee has been appointed to identify candidates for the position of dean of the Commonwealth College. John G. Bruhn, provost and dean of Penn State Harrisburg, is committee chair.

The dean of the Commonwealth College serves as principal academic leader and chief executive officer of the college and reports directly to the executive vice president and provost of the University. The dean is responsible for planning, budgeting, implementation, fund-raising and for the quality of teaching and research in the Commonwealth College.

The Commonwealth College, which is the University's largest college, consists of 12 campuses: Beaver, Delaware County, DuBois, Fayette, Hazleton, McKeesport, Mont Alto, New Kensington, Shenango, Wilkes-Barre, Worthington, Scranton and York. The Commonwealth College provides instruction and research opportunities, primarily at the undergraduate level. The college had a total credit enrollment of 14,050 students for the Fall Semester 1996. A full-time equivalent faculty and staff of 1,300 people serve the college, supported by a budget of approximately \$60 million.

The position of dean requires an individual who can lead effectively and manage a large and complex college that is geographically distributed. Candidates are expected to have significant academic achievement, preferably with credentials appropriate for a tenured appointment at the rank of professor. The candidate should have a thorough familiarity with the philosophy and responsibilities of a large, research-oriented, land-grant institution. Prior experience in academic administration with responsibility for personnel, programs and/or resources is required. Salary will be commensurate with experience and qualifications.

Nominations, applications and inquiries should be submitted to Bruhn, chair of the Search Committee for Dean of the Commonwealth College, The Pennsylvania State University, 201 Old Main, Box PSI, University Park, Pa. 16802. The search committee will review applications and nominations beginning June 1, and will continue to receive them until the position is filled. In addition to a paper copy, the search committee would be pleased to receive your applications or nominations that include a full vita on a Word or WordPerfect formatted diskette, or by e-mail sent to PSUSEarch@psu.edu. You can find more information on the Commonwealth College on the World Wide Web at <http://www.ces.psu.edu/>

Checking the specs

Students in James Kalsbeek's Architecture 132 class review designs for their semester projects. The students are building wood benches, gazebos and other structures and displaying them around the University Park campus. Although the class concentrates on design and not construction, the projects give the students a chance to see the entire architectural process, from design to prefabrication, construction and finally demolition.

Photo: Greg Grieco

Mysterious wooden sculptures are returning to University Park

Structurally stunning, often odd in form, they're popping up overnight, at places around the University Park campus in the final weeks of spring semester. Often lingering until the Central Pennsylvania Festival of the Arts in July, the structures of wood at times sprawled as large pavilions, but in some years were smaller. Looking unfinished and fleeting, the structures will disappear as quickly as they came, leaving only a memory of surprise.

People familiar with the campus know the wooden structures crop up each spring — benches, gazebos, elaborate huts — but do you know why? The forms are designed and built by freshman students as part of their design studio taught by a team of teachers from the Department of Architecture: Howard Lawrence, assistant professor of architecture; Doug Hoffmann, graduate assistant; Mike Jentrud, instructor in architecture; and James Kalsbeek, associate professor of architecture and coordinator for the class.

"The class is foremost a design class, not a construction class, although construction is part of it," Kalsbeek said. "This is the first opportunity for students to design something and have it realized in the 'real world.' The thrill of building something real that you've designed is important and gratifying because, as young architects, that may be a long time coming."

The "campus stations," as Kalsbeek refers to the project, began six years ago as an attempt to get first-year students to cooperate in designing and building structures. The result so

Just a sample

This is a scale model of one of the wooden structures that will soon grace the University Park campus.

that architecture has always had a tradition of enlightened patronage. Students invest their own money in the materials for the projects, and Kalsbeek sees the purchase offers as possible reimbursement.

Sure to spring up in the next few weeks across campus, inquiries on purchasing the structures can be made to Kalsbeek at jk3@emil.psu.edu. As for what to expect, know only that they are suddenly appearing to challenge and arouse, to offer a place to sit and to provide an image for us to consider.

interested people and motivated the students that Kalsbeek sought to repeat the exercise. After four consecutive years, Kalsbeek senses a tradition beginning, and people now expect the curious, unusual pieces to appear each spring.

For the first two years, only three or four structures were built by teams of 10 to 15 students. The structures, employed as pavilions, were built on site, too cumbersome to move easily and prone to the difficulties of large group dynamics. In the last two years, the approach changed to smaller groups and more structures. The structures must be prefabricated for easy construction and easy relocation. Finally, the teams are now three or four students strong with everyone participating equally in aspects of design, prefabrication, construction and demolition.

"The projects have really generated a lot of interest," Kalsbeek said. "In past years, people from the campus and community have purchased them and relocated them as garden structures in their backyards."

Offers are made on the structures every year, and Kalsbeek, smiling, said that architecture has always had a tradition of enlightened patronage. Students invest their own money in the materials for the projects, and Kalsbeek sees the purchase offers as possible reimbursement.

CQI

CONTINUOUS
QUALITY
IMPROVEMENT

Focus on core processes

"Identifying Core Processes," a CQI panel discussion, will be held from 3:30 to 5 p.m. Thursday, May 1, in 106 Mitchell Building. It will focus on how, through the identification of core processes, you can better focus your time, energy and resources for improvement. Panelists are: Linda Angell, assistant professor of operations management, The Smeal College of Business Administration; William Anderson Jr., assistant vice president for physical plant; Steve Kreiser, coordinator, Management Engineering Services, Office of Human Resources; and moderator, Barbara Sherlock, CQI Specialist, HRDC and Center for Quality and Planning. Panelists will share experiences about critical tasks in the improvement process. Topics include:

- Key questions to ask in identification and analysis of core processes; and

- The relationship between core processes and strategic planning.

Anyone interested in attending this free event, contact HRDC at (814) 865-8216 and ask to register for CQI 056.

A quality "thank you"

A giant "thank you" is extended to members of the Quality Expo '97 planning team who spent countless hours working to make this year's Expo a huge success: Ann Alters, Jean Barrett, Larry Burton, David Dimmick, Alan Friedrich, Judy Hewes, Linda Klimczyk, Clare Kristofco, Fred Loomis, Monica Nachman, Sue Oram, Mike Poorman, Barbara Sherlock, Larry Spence, Karen Wagner, Ellen Walker and Betzy Wilson. Members will be honored at a luncheon with Provost John A. Brighton on April 24.

For more information about Continuous Quality Improvement, please contact Louise Sandmeyer, executive director of the Center for Quality and Planning, at (814) 863-8721, LEST@PSU.EDU or see the center's Web site at <http://www.psu.edu/president/cqi>.

Breazeale Nuclear Reactor gains new research equipment

"Hey, where did all the water go?" This is a question the Breazeale Nuclear Reactor's interim director, **Warren F. Witzig**, is asked frequently these days. The water that had filled the reactor pool has been transferred to a large storage tank on the south side of the reactor building. Actually, only half of the pool has been drained. The other half contains water which is separated from the drained portion of the pool by a large gate. The pool covers the core of the reactor, which is about 30 inches high and 30 inches wide at its greatest width.

The pool has been drained to install several pieces of research equipment to enhance the ability of the reactor to serve the educational and research needs of the University community. Restoration of full-scale operation is expected about May 1.

At the same time a major installation has taken place in the hot cells, a well-shielded small room with remote manipulators, to determine the stress-corrosion characteristics of irradiated metals for the U.S. Navy. These tests are unique as they are done at high temperature and pressure in special autoclaves.

The Breazeale reactor, designated a Nuclear Historic Landmark, is the oldest, continuously operating university

Upgrade in progress

The Breazeale Nuclear Reactor on the University Park campus, above, is undergoing some renovations to its reactor pool, right. The reactor is located on Hastings Road between University and Bigler roads.

Photos: Greg Grieco

research reactor in the United States. Every year between 20 and 30 University departments, including engineering, biology, anthropology, geosciences and food science, use the reactor for research and education purposes. For example, geoscientists who want to determine the trace elements in minerals would turn to the Breazeale facility to perform nuclear activation analysis.

Faculty/Staff Alerts

Upcoming HRDC courses

Call the Human Resource Development Center at (814) 865-8216 to register for the following programs:

■ Designing and Delivering Oral Presentations

Learn the principals, skills and practice for creating powerful oral presentations from concepts to delivery. May 5, 8:30 a.m.-4:30 p.m., 319 Rider Building. Cost: \$65.

■ Conversational Spanish for Practical Situations

May 6, noon to 1 p.m., 504 Agricultural Science and Industries Building. Cost: \$65.

■ Creativity Unleashed: The Ultimate Tool

May 6, 1:30-4:30 p.m., 118 Agricultural Science and Industries Building. Cost: \$40.

■ Personal Goal Setting and Achievement

May 8, 9 a.m.-4 p.m., 319 Rider Building. Cost: \$55.

■ Maximizing Your Effectiveness in Times of Rapid Change

May 9, 1:30-4:30 p.m., 319 Rider Building. Cost: \$35.

Funding for projects on aging/elderly available

New and established researchers in aging are encouraged to apply to the Gerontology Center's Faculty Development Projects Program, which sponsors small, pilot studies or other research activities on adult development and aging. Projects can be funded up to \$4,000. May 15 is the deadline for submitting a proposal for funding in the following fiscal year.

The program supports developmental phases of faculty research projects to encourage faculty to submit proposals for external funding—for both basic and applied research activities.

Proposal reviews will be made by an interdisciplinary panel from the center's University-wide advisory board. For more information on this funding program, contact **Mark Hayward**, assistant director for social sciences, Gerontology Center, at (814) 865-1710.

Backbone service interruptions

The Office of Telecommunications has announced that backbone connectivity to University Park buildings that connect via the Pattee hub will be interrupted due to work required for the Pattee Library expansion.

The tentative schedule is below. On each given day, the following buildings will lose data backbone computing services. Backbone connectivity provides a path to other computers and printers at Penn State for accessing services from OAS and other host computers, as well as electronic mail and the Internet. Connectivity to Burrows, Pattee and Oswald will not be affected.

Although all attempts will be made to keep the outage to a minimum, please plan on the outages lasting from 8 a.m. to 5 p.m.

■ Tuesday, May 20: BAB 1, Carpenter, Cedar, Faculty Club, Keller, Kern, Moore, Nittany Lion Inn, Rackley, Recreation Building

■ Wednesday, May 21: Waring Hall

■ Thursday, May 22: Chambers

■ Friday, May 23: Arts, Eisenhower Chapel, Forum, Music.

Student Fulbright deadline

Applications for student Fulbright awards for 1997 are due by Sept. 10. Anyone interested in applying should contact **Mary Gage** in 312 Willard Building on the University Park campus, at (814) 863-8199 as soon as possible for application materials.

Disposal and purchase of University-owned equipment

Salvage and Surplus Operations reminds all faculty and staff members that, according to University Policy PC-10, the Salvage and Surplus Division is responsible for the collection and disposal of all University-owned equipment, supplies and/or materials that are obsolete, surplus or scrap. Departments must dispose of all such unwanted items only through Salvage and Surplus. Salvage will make

arrangements to pick up surplus items free-of-charge once the proper paperwork is provided.

The Salvage and Surplus store is open each Monday through Friday from 9 a.m. to 3 p.m. Selected equipment, fleet vehicles and surplus materials are available for sale to the general public. All items are priced by Salvage and Surplus and are sold on a first-come, "as is" basis. All sales are final and are handled on a cash or credit card basis. Vehicles must be paid for with cash or a certified check.

There also is a limited amount of storage space available for rent to University departments. For complete details and availability information, please call (814) 865-4371 during regular business hours, Monday through Friday.

New name

Two years ago, the readers of *LifeLine*, the faculty/staff health promotion newsletter, were asked to vote on a name for the programs sponsored by the faculty/staff health promotion division in the Office of Human Resources. Health Matters was chosen, and was subsequently used as the name of the division's main programming brochure. Now, the faculty/staff health promotion division has officially made the change to also have the division be recognized by the name Health Matters.

You can still find the Health Matters staff at Box 3 Rider Building, (814) 865-3085.

Job postings

The Staff Vacancy listing that is printed and distributed from the employment office is available on the Web. To print the file the user must have Adobe Acrobat installed on their machine. This document also assumes that the user is using a Web browser and is connected to the Internet or the Penn State backbone. Each Wednesday the file will be updated with the current week's postings. To get the file connect to <http://www.ohr.psu.edu/emplment/home.htm>. The link is titled "All PSU Vacancies for work area postings."

New clues to causes of morning sickness unveiled

By ANDREA ELYSE MESSER
Public Information

The same hormone that makes home pregnancy kits change color is significantly associated with and may be the cause of the nausea and vomiting of morning sickness, according to researchers.

"Higher human chorionic gonadotropin (hCG) levels are associated with an increased risk of experiencing pregnancy-related sickness during the first trimester of pregnancy," Kathleen A. O'Connor, a National Institute of Aging post-doctoral trainee at Penn State's Population Research Institute and research associate in anthropology, said.

Estrogen and progesterone do not appear to contribute significantly to pregnancy-related sickness," she said.

The hormone hCG reaches a peak, drops and levels off during the first trimester of pregnancy. This hormone is produced during pregnancy and serves to maintain necessary levels of progesterone for pregnancy until the placenta is developed enough to take over this duty.

Previous experiments have suggested hCG or, less strongly, estrogen and progesterone as the cause of at least first trimester pregnancy-related sickness, but many studies only looked at hormone levels once or twice during the pregnancy and don't control for the actual date during pregnancy when the sample was taken. The Penn State researchers are looking at data collected in

Kathleen A. O'Connor, a post-doctoral trainee at the Population Research Institute and anthropology research associate, is taking a closer look at specific hormones and their relationship to morning sickness.

Photo: Greg Grieco

Bangladesh from about 200 women who supplied twice weekly urine samples and answered questionnaires for from one to nine months.

"These preliminary findings are from 15 women who supplied samples for up to nine months," O'Connor said.

The researchers, who include O'Connor; Darryl Holman, post-doctoral fellow at the Population Research Institute; James Wood, professor of anthropology; and Ellie Brindle and Sue Barsom, anthropology graduate students, have looked at 779 samples so far.

Not all women experience pregnancy-related sickness, and not all preg-

nancy-related sickness is confined to the first trimester.

In the United States, the idea that morning sickness is a good thing, because it means the pregnancy is going well is widespread. However, not experiencing morning sickness does not foretell a miscarriage. Some women can have three perfectly normal pregnancies, yet experience nausea and vomiting during only one.

"What we have found in the Bangladesh data, however, is a link between pregnancy-related sickness and age," O'Connor said. "As women get older they tend to experience less pregnancy-related sickness. What also holds true is that many women over age 35

have a higher risk of fetal loss."

While many have made the connection between the absence of morning sickness and increased risk of fetal loss, O'Connor notes that those studies did not control for the age of the women.

The real connection is between the increased age of women and fetal loss and the increased age of women and a decrease in pregnancy-related sickness, not between pregnancy-related sickness and fetal loss.

Ultimately the researchers will look at how hormones, especially hCG, change with maternal age.

Their "Our study shows that a balance of nutrients is needed, based on the goals of training and nutrition."

The Penn State study involved 12 men in an exercise routine that included bench presses and jump squats. The study showed a positive correlation between dietary fat and both pre-exercise and post-exercise, resting testosterone levels.

Timely turf tips

Lawn care do-it-yourselfers can save some serious money by following a few tips from a turf specialist in the College of Agricultural Sciences.

"Dollar for dollar, fertilization does more to revitalize thin, weedy lawns than any other single management practice," said Peter Landschoot, associate professor of turfgrass science. "With more user-friendly products on the market, lawn fertilization has never been easier — provided you follow a few basic steps."

Landschoot said those steps are:

- Take a soil test to find out how much fertilizer and lime is needed. Kits are available for \$5 at Penn State Cooperative Extension offices throughout the state.

- Buy fertilizer on the basis of its quality, not the size of the bag or the price. Value depends on the amount and source of nutrients in the bag. Your soil test report will provide information on which fertilizer is best for your lawn.

- Spread the fertilizer with either a rotary or a drop spreader. Rotary spreaders are more practical for larger lawns, while drop spreaders are only suitable for small to medium-sized lawns.

- Fertilize lawns in mid-spring (late April or early May), late summer (around Labor Day) and late fall (around Thanksgiving). Never apply fertilizer during hot, dry weather in mid-summer. This can damage turf and make it more susceptible to summer diseases.

Avoiding moss

Landschoot also has tips to control moss on your lawn:

- Test the soil for nutrient content and pH. Soil test kits are available from your county cooperative extension office for a nominal fee. The test report will indicate how much fertilizer and lime to apply and when to apply them.

- If shade or moisture limit good turf growth, steps can be taken to correct the situation. Remove some trees or tree branches to increase sunlight and air circulation, or plant grasses that are adapted to shaded or moist areas.

- Attempt to eliminate moss with chemicals only after the limiting factors for good turf growth have been corrected.

- Remember, it took a long time for moss to take over your lawn, it will also take a long time to control it.

Diet imbalances can reduce testosterone and muscle strength

Imbalances in the diet can reduce levels of testosterone, a hormone necessary to increase the size and strength of muscles, a University study showed.

"Some people recommend high-carbohydrate, low-fat diets," said Jeff Volek, a University researcher. "While this diet has some advantages, high-carbohydrate intake at the expense of other nutrients such as fat may cause a drop in testosterone. The same is

true if there is too much protein in the diet and too few carbohydrates."

The effects of overtraining, combined with a low-fat diet, can compound the problem of low-testosterone concentrations, according to the *Sports Medicine Newsletter*.

"The public has come to believe that the lower the fat, the better in all circumstances," said William J. Kraemer, a member of the newsletter's editorial board and one of the study

News in Brief

Paid volunteers needed

Female volunteers (21-35 years old) are needed to participate in an ongoing study at the Laboratory for the Study of Human Ingestive Behavior in Henderson Building. The study involves reporting to the lab for 10 sessions between May and November. In each session, participants will be given all meals for three consecutive days. Each test meal will consist of a variety of commercially available foods. Volunteers must be normal weight, non-smoking, non-dieting, not pregnant and not using hormonal contraceptives. Volunteers must be eligible to use the health services provided at Ritenour Building. If interested, please call (814) 863-8482 between 9 a.m. and 1 p.m. and ask for Chris. Volunteers will be paid \$300 for completion of the study.

The principal investigator on this study is **B.J. Rolls**, professor of nutrition, biobehavioral health and behavioral sciences.

Reception to celebrate program

The Department of Human Development and Family Studies will hold a reception from 4:30 to 5:30 p.m. Monday, April 28, in S101 Henderson (the Living Center) to celebrate the first full year of the Penn

State-Friedrich Schiller University of Jena faculty and student exchange program and to meet current exchange students from Jena who are completing their stay at Penn State.

Six months free aerobic training

The Center for Sports Medicine is recruiting women with no prior weight training experience aged 18-32 for a training study to begin August 1997. Benefits include: extensive medical and fitness testing as well as nutritional and fitness consultation. Call (814) 865-7107. The principal investigator on this study is **William Kraemer**, professor of applied physiology.

Penn Staters

Elizabeth Hanley, assistant professor of kinesiology, was an invited guest of the 1997 British Olympic Academy at Loughborough University to conduct a Greek dance workshop.

Jeanne Krochalis, associate professor of English at the New Kensington campus, presented a paper on medieval English historical tablets on display in churches at a conference on *The Culture of the Book in the Middle Ages and Renaissance*, at the University of Western Ontario, Canada.

For the Record

In a story on page 10 of the April 10 issue of *Intercom*, the residence of philanthropist Kay Logan was incorrect. Kay Logan resides in Alexandria, Va.

Setting up

Kristina Birdsall, an undergraduate student in human development and family studies, puts the finishing touches on her presentation of "When Fathers Help Working Mothers" for the Undergraduate Research Fair. The fair, which showcased 87 undergraduate research projects, was held at University Park campus April 14-15. A number of students who participated in the fair also will display their research at the National Conference on Undergraduate Research at the University of Texas at Austin today through April 26.

Photo: Greg Grieco

Intercom readership survey is in the mail

To help gauge how well the *Intercom*, the faculty/staff newspaper of Penn State, is meeting its goals to educate and inform the University community, we are conducting a survey of our readers. This week, the survey is being sent through campus mail to 2,500 readers who were randomly selected from our mailing list. Readers selected should receive the survey by April 28. The short, two-sided questionnaire should take less than 10 min-

utes to complete and an addressed, return envelope is included for your convenience.

Every week during the academic year, more than 22,000 *Intercoms* are printed and mailed to employees, legislators, friends and retirees of Penn State. This survey is just one of the many steps being taken this year to improve communication efforts at the University. The results of this survey

could be used to reshape the way news is delivered.

If you are one of the 2,500 selected to participate in this survey, please be sure to fill out and return your survey. The staff of *Intercom* values your opinions and comments about our publication.

Anyone with questions about the survey may contact **Lisa M. Rosellini**, editor, at (814) 865-7517 or by e-mail at lmr8@psu.edu.

Robeson Cultural Center celebrates 25 years

Center flourishes as place where all feel welcome

For 25 years, the Paul Robeson Cultural Center has made an indelible mark on the University Park campus. What began as a USO building on an Army base in Lebanon, Pa., was transferred piece-by-piece in 1948 to its present site on Shortridge Road. It became the Temporary Union Building until the present Hetzel Union Building opened in 1955.

In 1972, the building, by then known as Walnut Building, officially became the Black Cultural Center and after major renovations was renamed the Paul Robeson Cultural Center in 1984 for Paul Robeson (1898-1976), singer, actor and civil rights activist.

Despite being scheduled for demolition several times, the building has become a powerful cultural core for two generations of minority students and a place where the whole Penn State community participates in and celebrates the accomplishments of nationally recognized artists, writers and politicians such as *Roots* author Alex Haley; politician Jesse Jackson; writer and poet Nikki Giovanni; musician Gil Scott-Heron and the musical group Earth, Wind & Fire. Today the center hosts more than 500 events a year.

The center will begin another metamorphosis on Friday, May 2, when it celebrates both its 25 years of service at its current location and the groundbreaking for a new center (see story on page 2) as part of the HUB/Robeson expansion and renovations.

Quite time

The Paul Robeson Cultural Center (in the background) has served as the cultural core for two generations of Penn State students. The center is celebrating 25 years of existence this year.

Photo: Greg Grieco

"When the project is completed in 1999, we will have a 21st-century building," Lawrence Young, director of the center, said.

The new Robeson Center will have 12,000 square feet of flexible space in three stories, advanced audio-video capabilities in its meeting rooms and a 425-seat auditorium — a far cry from the current facility, which in recent years has been bursting at the seams. For Young, the groundbreaking for the new center makes a strong statement about its permanence and the impor-

Penn Stater named to 1998 shuttle mission

By LISA M. ROSELLINI
Public Information

As a boy, James Pawelczyk's two most prized possessions were his insect collection and a tattered newspaper clipping of astronaut Alan Shepard's 1961 fling into space — the first American to enter that elusive realm. The way Pawelczyk sees it, being selected to fly on a shuttle mission must have been his destiny.

Pawelczyk, assistant professor of applied physiology and kinesiology in the College of Health and Human Development, has been named by NASA as one of two payload specialists who will fly aboard the Space Shuttle Columbia. He will be the first Penn State faculty member in space.

See "Shuttle" on page 10

University scientist discovers new planet

Scientists from several different institutions — including Penn State — have discovered a giant, Jupiter-like planet orbiting a star in the constellation Northern Crown. The newly discovered planet offers additional evidence for how such systems form, and bolsters the idea that other worlds like our own may be widespread throughout the galaxy.

Scott Horner, a research associate in astronomy and astrophysics, is part of the team of scientists that announced its finding on April 24. The discovery, actually made in late February, is based on observations at the Smithsonian's Fred Lawrence Whipple Observatory on Mount Hopkins, Ariz.

Using a special instrument called the Advanced Fiber Optic Echelle spectro-

Inside

Correction

The news story in last week's *Intercom* on page 5 about commencement exercises refers only to University Park ceremonies. For information on commencement ceremonies at other Penn State locations, please contact the individual campuses. Also in the same story, the location of the Graduate School commencement activities was incorrect. The correct location is The Bryce Jordan Center.

Paterno Library

Last Friday marked the beginning of a nearly two-year construction project for the Paterno Library on the University Park campus. The \$26.5 million expansion to Pattee Library is being funded in part with \$11.7 million in private donations, including \$250,000 from Joe and Sue Paterno. For details, see page 10.

Robeson

continued from page 1

tance of its goals to the University.

When Penn State President Eric A. Walker established a special commission to examine the relationships among various segments of the University community in 1969, a subcommittee in the black community and others made recommendations to establish a cultural center, which the new president, John W. Oswald, endorsed. The cultural center was to promote African American and other cultures and to encourage intercultural exchange. It was to help alleviate cultural shock for blacks and other minorities coming to Penn State; provide a forum for students, faculty and staff of all ethnic groups; and provide cultural support for blacks and other minorities through the exposure of contributions and achievements of minorities.

On May 21, 1971, the Black Cultural Center became a reality. Warren Coleman was asked to serve as acting director until a permanent replacement could be found. After much negotiation, the Walnut Building on Shortridge Road was selected as the center's home. During the spring of 1973 discussions began about changing the name in honor of an African American who had made significant achievements in education, the arts and civil rights. Paul Robeson was chosen, but because of the controversy surrounding Robeson as a civil rights activist, the University did not officially adopt the name for the center until 1984.

A 1974 expansion and 1986 remodeling of the exterior helped sustain the Robeson Center through a quarter-century of growth. Robeson events such as the "Caribbean Experience" and "Touch of Africa" celebrations, guest speakers and art exhibits spanned the multicultural heritage that define a thriving and diverse University community. With the number of annual events and visitors increasing every year and the changing demographics of the student body, which increased the demand for multicultural events and resources, the center rapidly outgrew its space. Besides space limitations, the physical condition of the aging building was also cause for concern.

During the winter of 1989, Young and his staff unlocked the door one morning and were greeted by the sight of several waterfalls streaming through a leaky roof. "We couldn't find enough buckets!" Young recalls.

The 1999 completion of the new HUB/Robeson Center will change all that. Its expansive floor space and enhanced media capabilities will better support the needs of its student groups, exhibitors and guest speakers.

Young looks forward to occupying the new facility, but recalls that the real lifeblood of the bustling center, throughout its history, has been the students.

"We have been fortunate to have a number of talented and enthusiastic students working with us and for us," he said. "Although they have gone on to make careers for themselves, they still stay in touch."

Students in the Class of 2000 will enjoy a new Robeson Center that bears little resemblance to the physical space it occupied 25 years ago. What Young is sure they will recognize is the opening and welcoming spirit of the center — one that will be a second home to all Penn Staters, young and the old.

Place in the sun

Students Rob Keller and Amy Vorgy study on the HUB lawn, which will be the site of a groundbreaking ceremony on May 2.

Photo: Greg Grieco

HUB/Robeson groundbreaking on May 2 will kick off two-year construction expansion and renovation project

The University will launch a two-year construction project for the HUB/Robeson Complex, which will renovate and expand the Hetzel Union Building (HUB) and house the new Paul Robeson Cultural Center at University Park. A groundbreaking ceremony will be held at 2 p.m., Friday, May 2, on the HUB lawn. Scheduled speakers include President Graham B. Spanier; Jesse Annette, chairman of the Board of Trustees; M. Nathan Nair, student trustee; and William Asbury, vice president for student affairs.

Designed by Williams Trebilcock Whitehead Architects of Pittsburgh, the HUB/Robeson complex will add 91,000 square feet to the existing 154,000 square feet composing the HUB and add the new Robeson Cultural Center. A linear addition will run from the west end of the HUB to the middle of the south wall of the Penn State Bookstore, preserving nearly all of the HUB lawn area. The new Robeson Center will be part of the complex but bear a distinctive oval-shaped identity.

The existing HUB will be renovated to become an integrated part of the whole complex, connected by a new four-story atrium space with skylights.

Among the many changes are a new Pollock Road entrance, a new auditorium, additional meeting rooms and student offices, renovated and expanded HUB Eateries dining areas, dedicated quiet study lounges, information and computer services, improved access for users with disabilities, art gallery space and an expanded ballroom.

The public is invited to the May 2 event, which will be a representation of the joining of the HUB and the Robeson Cultural Center. Speakers will be laying inscribed bricks representing the HUB and the Robeson Cultural Center, and the bricks will be placed in the new complex when it is completed. Also invited to the ceremony are student leaders, donors and staff members of the offices affiliated with the HUB and Robeson Cultural Center such as Student Life, Student Union, Housing and Food Services, ID card office and the Penn State Bookstore.

Built in 1955, the HUB is the main student union at the University Park campus, serving more than 50,000 students, faculty, staff and visitors. Approximately 25,000 people are estimated to use the building each day, and nearly 7,000 events are scheduled each year in the facility.

The Robeson Cultural Center sponsored 561 events in

What's in store

Starting later this month, workers are expected to begin the first phase of the construction project for the new Hetzel Robeson Complex. Site work for the relocation of utility lines will begin approximately May 26.

However, all services and operations in the HUB and at the Paul Robeson Cultural Center will continue as usual with just a few changes. Most of the HUB rooms such as the Ballroom and Fishbowl will still be available this year and in early 1998 for events, except for the Main Lounge and the Reading Room.

The construction management firm and contractors for the construction project will be selected soon.

More serious shifts in HUB operations are expected to happen sometime early to mid-1998 when the new addition is well under construction.

When site work begins in late May, the upper sidewalk nearest the lawn side of the HUB building will be closed, as well as the lawn ground-level entrance nearest the Billiards Room. A site fence will be set up around the construction area surrounding the sidewalk and slightly touching the lawn. But the HUB lawn outside the construction area will still be available for scheduled events as appropriate.

In early summer, construction and information updates will be posted on various bulletin boards and at the information desks at the HUB and Robeson Center, and at the expansion site on the Web at <http://www.psu.edu/HUB/Expansion/>. A newsletter will communicate regular updates to employees of the HUB and Robeson Center offices, and continual updates will be provided to the entire University community and the surrounding community.

1995, attracting 24,000 participants. The center is located in a World War II building that was moved to the campus in the early 1950s and designated as a temporary student union building.

The total construction budget is a little more than \$26.8 million. The project will be financed with funds generated by a portion of University Park student activity fees, private support, Housing and Food Services and University funds.

Planet

continued from page 1

graph, the scientists detected extremely small variations in the motion of a star—Rho Coronae Borealis. Rho Coronae Borealis is visible to the naked eye in the Northern Hemisphere from February through September and is located approximately 50 light-years from Earth. The star Rho Coronae Borealis is believed to be about 10 billion years old—twice as old as the Sun.

The irregularities in the star's velocity are thought to be caused by the presence of an orbiting companion. After carefully monitoring the star and its speed, the team of scientists concluded that the new-found planet orbits the star in 40 days. These variations also led the team to conclude that the planet must be slightly more massive than the planet Jupiter.

The short orbital period means the planet is closer to its star than Mercury is to the sun. This also implies its temperature would be more than 500 degrees Fahrenheit—much too hot for liquid water to exist, and hence not a likely place for life to form. According to the researchers, the circular nature of the orbit suggests that the planet was formed like the

Scott Horner, part of a team of researchers that found a new planet, shows models of the star and its companion planet.

Photo: Greg Grieco

planets in our solar system, through the slow coalescence of dust and gas from the rotating disk that is thought to surround all newborn stars. A more egg-shaped orbit would suggest that the companion object was not a planet but a failed star.

The other scientists are from the Smithsonian Institution's Astrophysical Observatory (SAO) in Cambridge, Mass., and the National Center for Atmospheric Research (NCAR) in Boulder, Colo. The scientific team includes Sylvain Korzenik, Martin Krockenberger, Peter Nissenon, and Robert Noyes of SAO; Harvard University graduate student Saurabh Jha; Timothy Brown and Edward Kennelly of NCAR; and Horner.

A scientific paper describing the discovery has been accepted for publication in the *Astrophysical Journal Letters*.

"This discovery helps show that giant planets like Jupiter may be reasonably common around ordinary stars," Robert Noyes of SAO said. "It is exciting to think that there may be many smaller planets much more like the Earth in orbit around these stars, as in our own solar system."

Timothy Brown of NCAR said that all of the giant planets found so far orbit Sun-like stars.

This is the second "planet" discovery for a Penn State scientist. In 1994, Alexander Wolszczan, distinguished professor of astronomy and astrophysics, confirmed the presence of the first known planets outside our solar system.

■ University Faculty Senate

Senate imposes University-wide language requirements

By ALAN JANESECH
Public Information

Attention, high school classes of 2001 and beyond: If you want to go to Penn State, no matter what major you choose, you'll need to take at least two years of foreign language study in high school.

The University Faculty Senate voted to impose the new requirement after lengthy debate at its final meeting of the current academic year. Currently, foreign language study in high school is required only for B.A. degrees in the Eberly College of Science, the College of the Liberal Arts, and the College of Arts and Architecture.

The change will affect only students who graduate from high school in May 2001 or in subsequent years. For students who don't meet the requirement, but who otherwise would have been offered admission to Penn State, the Senate offered an alternate route. They can still be admitted, but with a "deficiency in a foreign/second language" that they must remove within two years, or before graduation, whichever comes first.

Twice during the meeting, University President Graham B. Spanier spoke in favor of the new requirement. Spanier has visited 30 high schools over the past 18 months and reported that there is strong support in the

high schools for a foreign language requirement.

In the increasingly international markets that Pennsylvania-based and other U.S. firms now operate in, Spanier said that proficiency in foreign language will give the edge to students. Spanier said he has heard this repeatedly from the CEOs of the firms he has visited.

Debate on the requirement centered on the differing impact that the requirement would have on Penn State locations across the state. The Senate Committee on Admissions, Records, Scheduling and Student Aid, which developed the new requirement, noted that the percentage of first-year students in 1995 who did not meet the requirement ranged from a low of 2 percent to a high of a little more than 10 percent at some locations.

But James W. Robinson, vice chair of the committee, said the committee discussed the differential impact of the requirement and decided to address it by allowing the admission of students with a deficiency in language study rather than imposing a strict admissions requirement and completely excluding those who haven't met it.

The committee developed the language requirement after meeting with Spanier in August 1996 and subsequently seeking comment from administrators at Commonwealth

campuses and other Penn State locations. In the summer of 1996, Spanier had asked the committee to add a foreign language requirement.

Spanier also addressed the Senate on a differential tuition plan, which is now being developed and may be considered by the University Board of Trustees at its upcoming meeting in July. Even though it costs more to educate upper-division students or students in certain majors, Spanier said, "we're still pretending it costs the same" to educate all students.

If the level of state support was much higher and tuition could be kept quite low, a single tuition rate would be easier to justify, Spanier said. "But we've reached a point where tuition levels are very high and probably unfair to some." Any phase-in of a differential tuition rate would be planned and implemented carefully to have the least negative impact on students, he said.

Many other Big Ten schools already have tuition differentials, as well as other schools Penn State competes with for students, Spanier said.

In other business, the Senate:

- Delegated to the faculty of the Dickinson School of Law the responsibility for the approval and content of courses taken by law students in the law curriculum. Penn State's merger with the law school, approved in January by the Board of Trustees, will begin its three-year phase-in on July 1.

- Discussed a recommendation to change the bylaws to rescind the delegation of authority over curriculum to Penn State Harrisburg, in light of the changing responsibilities and relationships being brought about by the implementation of the new Commonwealth College structure. The recommendation will come up for a final vote at a future Senate meeting.

- Changed its admission policy to allow the use of appropriate, academically relevant information, such as improvement in academic performance, extracurricular activities and work experience, in making admissions. The previous policy suggested that the only criteria used were high school performance and standardized test results.

- Discussed but did not vote on rule changes related to intercollegiate athletics, designed to take into account the implementation of the new Commonwealth College structure. The proposal was withdrawn and will be brought back to the Senate at a later meeting.

At the meeting's conclusion, outgoing Senate Chair R. Scott Kretschmar turned over the gavel to incoming Chair Louis F. Geschwindner.

The Senate will next meet on Sept. 8, at 1:30 p.m. in Room 112 Kerm Building on the University Park campus.

LECTURES

Interdisciplinary research seminar set for June 22-28

The lives and works of African American writers, poets, dramatists, filmmakers, activists, artists, musicians and steelworkers are among the topics that will be covered by an interdisciplinary research seminar June 22-28 at University Park.

The seminar, "African American Traditions," is being presented by Penn State's Institute for the Arts and Humanistic Studies, in collaboration with many other University offices.

One of the aims of this seminar is to find ways of translating advanced research in the arts and humanities so that it goes beyond boundaries of academic discourse and has an impact on everyday lives, values and aspirations. In addition to the presentation of scholarly papers and discussions, the seminar also will include a staged reading of "Brother's Keeper," a new play by Charles Dumas, associate professor of theatre arts at Penn State; a screening of two films with African American themes; and a performance by jazz scholar and saxophonist Barry Kernfeld and area musicians.

Nutrition and fitness topic of Harrisburg lecture

"Nutrition and Fitness for Healthy Aging" is the topic of a noon lecture on Thursday, May 8, at the Penn State Harrisburg Downtown Center.

William J. Evans, director of the Noll Physiological Research Center at University Park, will address the inactivity and poor dietary practices that are the second leading cause of preventable death in the United States. Evans will show how even small amounts of exercise practiced on a regular basis can have long-lasting effects. A question-and-answer period will follow the talk.

To register for this free presentation or for more information, call the center at (717) 783-0433.

Learn about air-bag sensor technology May 13

Joel A. Kubby from the Wilson Center for Research, Xerox Corp., will discuss micro-electro-mechanical systems (MEMS)—now found in air-bag crash sensors—in a talk set for 1:30 p.m. Tuesday, May 13, in 189 Materials Research Laboratory on the University Park campus.

In his talk, Kubby will review the promises and challenges in using this technology and will discuss Penn State's research and development program aimed at applying this technology within Xerox.

Kubby received his B.S. from the University of California at Berkeley in 1980 and his Ph.D. in applied physics from Cornell University in 1985. From 1985 to 1987, he worked at Bell Labs in New Jersey in the area of scanning tunneling microscopy. In 1987, he joined Xerox.

Family structure-school attendance link to be explored

Susan De Vos, associate scientist with the Center for Demography and Ecology at the University of Wisconsin-Madison, will present a seminar titled "Living Arrangements and School Attendance Among Children 13 to 16 in Latin America." This seminar examines the relationship between school attendance and various family structures in 10 Latin American countries. The variation in this relationship across countries is intriguing and may relate to the differences in the meaning of consensual unions across parts of Latin America.

The seminar, sponsored by the Population Research Institute, will be held at 11:45 a.m. Tuesday, May 13, in 406 Oswald Tower on the University Park campus. The public is invited to attend. Please contact Laura Zimmerman at (814) 865-0486 or lzimmer@pop.psu.edu for additional information.

The seminar is focused on an interdisciplinary exchange of new and emerging work in the arts and humanities and its topics are organized along three broad outlines: the social thought on race and culture of W.E.B. DuBois and other African Americans in public life; the linkages of African and African American cultures; and African American art.

Individual topics include W.E.B. DuBois on race and culture; "double consciousness" in African American literature; African American leadership and progressive politics; West African griots (musicians/entertainers) and the African American tradition; African metaphors in African American art; and the struggles of African American steelworkers.

The seminar will be held at the Penn State Conference Center and Hotel.

For more information, contact Sue Reighard at the institute, (814) 865-0495 or via e-mail at iahs@psu.edu.

Making repairs

Although winter keeps trying to make a comeback in much of the state, spring is officially here. And with spring comes the inevitable outdoor maintenance. Chris Varger, left, and Tom Martin spent time recently repairing wind damage on the roof of the Mushroom Research Center on the University Park Campus. They and their co-workers at all University locations will be busy in the coming weeks working hard to put back together what the winter weather has attempted to take apart.

Photo: Greg Grieco

Proposals sought for international collaboration

Penn State faculty and staff interested in collaborating with their colleagues at Penn State's key partner institutions in South Africa are invited to submit proposals for seed funding. Eligible partner institutions are the University of the Western Cape, the University of Cape Town, and the University of the Witwatersrand. Three awards ranging from \$8,000 to \$13,000 each are anticipated.

This funding is being made available to encourage faculty and staff to build on existing relationships by developing integrated projects combining two or more of the following components: curricular initiatives, human resource development, research collaboration and capacity building. Methods to achieve proposal objectives may include, but are not limited to, short-term academic

exchanges and distance education initiatives.

Projects should be conceived so that the seed grant will be used to leverage external funding for a larger project with long-term sustainability entailing lasting benefits and/or positive institutional change at the participating universities. Participant support will be closely linked to the project objectives, which should strive to provide for a multiplier effect. Inclusion of Penn State faculty who have not had any international education experience at Penn State is encouraged.

Proposal deadline is Sept. 15, with a project implementation start date of January 1998. To request applications, please call Pam Gudeman at International Partnerships and Academic Linkages at (814) 865-0414.

Goal of local Holmes Partnership is to reform the education of educators

Last fall, the College of Education, the Bellefonte Area and the State College Area school districts jointly applied to be a Holmes Local Partnership, a reconfigured continuation of the national Holmes Group.

The mission of the local partnership is "to improve the quality of prospective educators, practicing educators and the schools in which they serve, through the development of programs and models that serve local needs and contribute to the understanding of educator development and school reform."

The three partners will continue to develop activities, which extend

back to the early 1990s and more recently have been pursued under Pennsylvania Goals 2000 funding. Pennsylvania Goals 2000 is a program set up by Gov. Tom Ridge that sets certain standards for education in the state to reach by the year 2000.

The partnership seeks to simultaneously and collaboratively reform the education of educators and schools based upon research and best practice.

To date, 75 partnerships of universities and schools and national organizations have become members of the Holmes Partnership in its first year. The Web site for the Holmes Partnership is <http://www.udel.edu/holmes/>

University-wide search under way for associate dean

Penn State is seeking internal candidates for the position of associate dean for International Programs in the College of Agricultural Sciences. The candidate will be expected to develop dynamic, multidimensional international programs. The position is a half-time appointment with the remaining time devoted to teaching, research and/or extension responsibilities in one of the 12 academic units in the college. The associate dean is a member of the administrative team of the college and works cooperatively with the associate deans for research, extension and resident education. The associate dean for International Programs reports to the dean of the college.

The associate dean for International Programs will provide aggressive leadership and administer the college's international programs in research, teaching and extension. She/he will serve as spokesperson for

the international programs of the college.

Specific responsibilities include: (1) providing aggressive leadership for the development, planning, coordination and management of international programs in cooperation with faculty, staff and administrators; (2) evaluating and communicating opportunities for international programs and assisting in their development, and maintaining liaison with appropriate federal and international agencies such as USAID, USAID, FAKO/JUN, World Bank, regional development banks and private foundations; (3) stimulating internationalization of the curriculum; (4) encouraging and assisting faculty and staff in securing external funding for international programs and developing international contacts and linkages;

(5) providing leadership in efforts to enhance the visibility of international

programs of the college and to recognize and reward faculty and staff involvement in international activities; (6) representing the college on appropriate committees and to international programs in other colleges of the University, to the University Office of International Programs and the International Council, and serving on the board of directors of the Midwest Universities Consortium for International Activities (MUCIA); (7) supervising the Peace Corps recruitment program and providing liaison with the regional Peace Corps office; and (8) assisting with hosting of international visitors.

Candidates must have an earned doctorate in a field of study commonly associated with a college of agricultural sciences and hold a tenured academic position in her/his discipline, experience with international programs in agriculture, demonstrated leadership and administrative and

management skills. The ability to work with people and communicate ideas effectively is critical. A commitment to the research, resident education and extension education missions of a land-grant university is essential, as is a demonstrated commitment to international programs.

Please send application (letter of application and curriculum vitae), nominations and inquiries to the following address: **Charles W. Pitts**, chair, Search Committee for Associate Dean for International Programs, Penn State, 201 Agricultural Administration Building, Box INT, University Park, Pa. 16802. Applications and nominations will be reviewed beginning June 2, and will be accepted until the position is filled.

Penn State is an affirmative action/equal opportunity employer. Women and minorities are encouraged to apply.

Students gain exposure to high-tech, digital darkroom

By **GABRIEL J. WELSCH**
College of Arts and Architecture

In a black room in Mitchell Building on the University Park campus lights flash, computer screens zip and drives click and hum. A thrum of activity centers at two points: large-format digital video cameras at each end of the room. Enthusiasm seems to overpower what could easily be viewed as daunting technological instruments.

Stepping over cords and ducking under light booms, typing at the keyboards, they could be agents at a command central for an organization, a high-tech surveillance team from a conspiracy movie. But they're not. They're students in a digital photography class, capturing images on this virtual answer to film—a class made possible by the philanthropy of photographic giants Calumet Photographic Inc., Megavision Inc. and the Eastman Kodak Co.

Gerald Lang, professor of art, School of Visual Arts, has initiated a collaboration with a host of players to develop Penn State's new state-of-the-art digital imaging studio. Over the course of a year, Lang penned letters, made calls and traveled researching options and cultivating the relationships that eventually led to this digital imaging studio.

"I saw a student need," Lang said about his motivations to develop such a studio. "With the advent of digital imaging in the industry and the commercial world, our students needed this in order to be competitive in the marketplace. Penn State had nothing even remotely close, so I started looking for a way to bring the technology in and make it available to students."

Many of Lang's students also

understood the need for digital imagery at Penn State. In fact, one of Lang's graduate students, **Roberta Moore**, was instrumental in finding space. Moore approached officials in University Photo/Graphics to see if it could provide a home for Lang's digital equipment and the students.

"It was a wonderful opportunity: a partnership between an academic division and a service unit rooted in a discipline both groups love—photography," said **Jackie Rosenfeld**, director of marketing communications in University Photo/Graphics. "To have Jerry Lang on site, with his students and state-of-the-art equipment, was seen by University Photo/Graphics folks as a once-in-a-professional-lifetime opportunity to learn about new directions in their field."

The opportunities now available through the digital photography studio are most apparent when contrasting traditional operational details. Time is an important factor in the new imaging studio. Each photograph taken is stored instantly, encoded as data and held in computer memory, so each photo is a "keeper" to be edited, replicated or adjusted as needed. In the studio, the image just taken is immediately available for evaluation on the computer screen. There is no need to make test photos that will need to be taken again. No film needs to be processed, no negatives printed, no darkroom or chemicals required. The time difference between making the photograph on film and seeing the image in print or transparency can be substantial. Because the digital imaging process eliminates that time factor, the development and refinement of photographic ideas can happen very quickly. Critical response to the images can hap-

The future is here

Students in Gerald Lang's digital photography class use state-of-the-art digital imaging equipment to capture and edit their photographs.

Photo: Greg Grieco

pen at the same time the photographic idea is evolving. In teaching, research and the commercial world the implications are far-reaching.

Excited about the potential of the state-of-the-art, up-to-the-minute digital photography studio, Lang said, "The unique aspect of this photography class is that everyone is simultaneously in the studio. Photography is usually perceived as a very solitary art, one person out there with a camera or alone in the darkroom. Here, there's a collaboration on every photograph. It's the most social photography class I've ever taught."

As Lang's own work is renowned for its concern with antique processes, it seems odd that an expert antiquarian is working with digital photogra-

phy. Although this technology is perhaps 80 years removed from his previous work, Lang said his interest arises from similar curiosity.

"I'm interested in digital imaging in the same way I'm interested in antique processes: what it's about, how is it different, how does it work, what is the creative process and how that creative process is influenced by the technology."

For now, Lang is working with curriculum he developed while on sabbatical last year, but his plans foresee outreach and service potential in areas of workshops, conferences, continuing education opportunities and collaborative educational ventures with the companies who made this new program possible.

Appointments

Hazleton names public information and communications manager

David Donati has joined the Penn State Hazleton campus as its new public information and communications manager. In this position, reporting to the director of development and university relations, he will be responsible for public information, coordination of publications, advertising and promotion, and the University editor function at the campus. He also will work collaboratively with campuses in northeast Pennsylvania to coordinate advertising and promotion, and certain publications.

Donati had been an assistant to the vice president of marketing and business development at First Federal Savings, and at the same time, was in charge of public relations activities for the CAN DO industrial development organization. Other professional activities include work with 4M Broadcasting of Hazleton, where he was an assistant to the news director and a disc jockey.

Donati, a resident of Hazleton, is a graduate of Kings College where he majored in mass communications and English.

Center for Quality and Planning has new research, assessment director

Michael J. Dooris has been named director of planning research and assessment in the Center for Quality and Planning. In this position he will work closely with the executive vice president and provost to identify opportunities to better support University-level decision making through institutional research.

He also will support the planning and quality improvement objectives of the center, in both administrative and academic areas. The position will rely heavily on collaboration with the leadership of colleges, the University Faculty Senate and other administrative offices and units across the University.

Dooris has a bachelor's degree in economics from Penn State, an MBA from the University of Rhode Island and a Ph.D. in higher education from Penn State. He has worked as a statistician with the U.S. Census Bureau and a consultant with Andersen Consulting. Since 1981, he has held several positions in planning and budgeting at Penn State and, since 1995, Dooris has been in the Office of the Vice Provost and Dean for Undergraduate Education, as director of academic assessment.

He is an active member of Penn State's graduate faculty in higher education and has published 20 chapters and articles, mostly dealing with higher education organizational issues. He has won both the outstanding graduate student paper award and the outstanding article award of the Society for College and University Planning.

Retiring Inquirer vice president to become professional-in-residence

Gene Foreman, deputy editor and vice president of *The Inquirer* newspaper in Philadelphia, has been named the College of Communication's first distinguished professional-in-residence. Foreman, who will retire in July 1998 after 25 years at *The Inquirer*, will join the faculty in August 1998. He will teach editing and organize programs for training professionals.

Foreman has been writing and editing newspapers for 40 years. After college graduation and ser-

vise in the Army, he joined the *Arkansas Gazette* in April 1957. In 1962, he moved to *The New York Times* as a copy editor, but when the *Times* suspended publication in a printers' strike that lasted four months, he returned to Arkansas and went into newspaper management. In 1971, he returned to New York as executive news editor of *Newsday*.

Foreman was hired as managing editor/news at *The Inquirer* in 1973. He was appointed a company vice president in 1985, and his title was changed to executive editor in 1990, and to deputy editor in 1991.

Foreman was elected to the board of directors of the Associated Press Managing Editors three times and was APME's president in 1990. He has been a juror three times for the Pulitzer Prize competition.

He is a graduate of Arkansas State College, where he received a bachelor of arts degree in 1956 with a major in journalism.

New Raymond N. Shibley professor of mathematics named

Anatole Katok, professor of mathematics, has been named the new Raymond N. Shibley professor of mathematics.

The professorship, which is awarded to a different faculty member every five years, was established in 1986 by Raymond N. Shibley, then a partner in the Washington, D.C., law firm of Leboeuf, Leiby and MacRae. Katok is the third holder of the chair.

Katok's research covers a broad variety of subjects in the theory of dynamical systems, which serves as the mathematical foundation for the fields of nonlinear dynamics and the theory of chaos. He said he intends to use the bulk of the funds provided by the Shibley professorship to support the newly established Center for Dynamical Systems at Penn State.

Katok earned his diploma degree in mathematics in 1965 and his candidate degree in mathematics in 1968 at the Moscow State University in the former U.S.S.R. He worked in the Central Economics-Mathematics Institute of the U.S.S.R. Academy of Science in Moscow from 1968 until his emigration to the United States in 1978, when he accepted the position of professor of mathematics and special chair in analysis at the University of Maryland. In 1984 he became professor of mathematics at the California Institute of Technology, then joined Penn State as professor of mathematics in 1990.

He has authored or coauthored more than 80 papers and three books. He has been actively involved in the leadership of two premier national institutions in mathematics: The Mathematical Sciences Research Institute at the University of California at Berkeley and the Institute for Mathematics and Its Applications at the University of Minnesota.

Leonhard Center welcomes new director

Thomas A. Litzinger, professor of mechanical engineering, has been named the new director of Penn State's Leonhard Center for the Enhancement of Engineering Education.

The Leonhard Center, based in the College of Engineering, aims to develop new and better ways to teach engineering by bringing together imaginative, talented engineering students, faculty, industrial partners and practicing engineers to implement

improvements in engineering education. It was established in 1990 through an endowment gift from William E. Leonhard, retired chairman, president and chief executive officer of the Parson Corp., and a 1936 Penn State electrical engineering graduate.

Litzinger is widely respected for his teaching and research and accomplishments as director of ECSEL at Penn State. Under his leadership, ECSEL's joint efforts with departments include: the revision of the freshman engineering course and its adaptation to all campuses, the sail plane curriculum in aerospace engineering, vertical integration of case studies in chemical engineering, the integration of design into introductory circuits courses in electrical and computer engineering and a national faculty development workshop at Penn State.

He has taught undergraduate and graduate courses. In recognition of the quality of his teaching he has received the Penn State Engineering Society's (PSES) Premier and Outstanding Teaching awards.

Litzinger's research involves chemical aspects of combustion related to internal combustion engines, gas turbines and rockets. He was a recipient of an NSF Presidential Young Investigator Award and a PSES Outstanding Research Award. He earned his B.S. in nuclear engineering from Penn State, and his M.S. and Ph.D. in mechanical engineering from RPI and Princeton University, respectively. He became a Penn State mechanical engineering faculty member in 1985, and was promoted to full professor in 1995. His appointment as the director of The Leonhard Center is effective July 1.

Regional development director joins Development and Alumni Relations

Paul Olivett has been named regional director of development for the Florida region in the Division of Development and Alumni Relations.

In his new position, he will be responsible for planning and implementing fund-raising programs in the state as part of the University's forthcoming capital campaign, and will report to **Clay Edwards**, director of the Office of Regional and University programs. His activities will include helping to identify prospective donors and recruiting and training capital campaign volunteers.

Olivett joined Penn State in 1995 as an associate director in the Office of Planned Giving and Endowments. While there, he worked with benefactors to the University to facilitate planned and major gifts. Before that, he spent two years with the Lancaster County chapter of the American Red Cross as the chapter's development officer.

He earned his bachelor's degree in English from Franklin and Marshall College in 1990 and is currently a master's degree candidate in Penn State's higher education program.

Quality Expo '97

Information provided by the Center for Quality and Planning

May 1, 1997

Quality Expo enjoys largest showing ever

With the largest showing of teams in its history, Quality Expo '97 celebrated its fifth anniversary on April 17 at the Nittany Lion Inn with exhibits from 67 Continuous Quality Improvement teams, panel discussions about classroom innovation and maintaining momentum in a quality organization, and a teambuilding workshop. Visitors during the 11 a.m. to 3 p.m. exhibition heard about team achievements across Penn State at University Park and Commonwealth Campuses.

In welcoming visitors to Quality Expo '97, President Graham B. Spanier noted the success of CQI at Penn State because "at its heart is the process of learning. We may have borrowed this approach from industry," Spanier said, "but it is really very much at home in the university setting. With its careful observation and critical analysis and its focus on progress and improvement, CQI mirrors the methods and mission to which Penn State is dedicated."

The Quality Expo featured exhibits of the work and achievements of approximately 480 team members. The Nittany Lion Inn ballroom, festively dressed in the Quality Expo's signature teal and mauve balloons, featured colorful booths, computer presentations and slide shows, and handouts detailing the processes identified, studied, and improved through the use of quality principles. In the Alumni Fireside Lounge, Quality Circle programs informed and entertained Quality Expo visitors. In the Atrium, the Penn State Bookstore displayed a large selection of the latest quality improvement books.

Five years ago, the University's Continuous Quality Improvement Center held its first expo in the Hetzel Union Building Ballroom to highlight the work of 23 Penn State teams, composed primarily of University staff members. Since that time, the Quality Expo has grown to encompass the efforts of teams of students, faculty members and staff, and has featured the successes of interdisciplinary and cross-unit teams.

"When first held, the CQI Fair focused on our success in decreasing 'wait states,' the time a student spends while waiting in line in a particular University office. We highlighted achievements made in streamlining processes," said Executive Vice President and Provost John Brighton. "Now, we also celebrate the progress made in the University's core processes. We have advanced from 'wait states' to the process of learning in the classroom."

Penn State's progress results from commitment of a cross-section of University participants. "What is particularly gratifying about Quality Expo '97 is the involvement of all segments of the Penn State community," said Louise Sandmeyer, executive director of the Center for Quality and Planning. "The quality achievements featured at the Quality Expo reflect the efforts of faculty, students and staff at all levels, and involve initiatives at University Park and the Commonwealth Campuses and The Hershey Medical Center."

Again this year, the Quality Expo attracted visitors from industry and other colleges and universities that have embarked on the quality journey. Industry visitors included representatives from Penn State corporate partners — including IBM and DuPont — and Corning Asahi. Visitors from other colleges and universities included exhibitors from the State University of New York at Binghamton and Rutgers University, and representatives from the University of Pittsburgh, the Pennsylvania State System of Higher Education, Syracuse, Tennessee, Villanova and the University of Puerto Rico. Cynthia Pullen, training coordinator in the Rutgers Quality and Communication Improvement (QCI) Office, traveled to University Park to view the broad support for quality initiatives at Penn State. "The efforts at Rutgers have thus far focused on staff teams and excellence in service," she said, "and we, too, have seen tremendous positive changes."

The Hershey Medical Center CQI team member Debbie Graby summed up her involvement in CQI activities: "Everyone working together — that's what it takes to solve problems."

OVERHEARD

Quotes from visitors and team members at Quality Expo '97

"CQI is helping to make this an exemplary University by making Penn State more aware of itself and more responsive to the needs and concerns of those we serve."

Graham B. Spanier

"The Quality Expo clearly reflects the enthusiasm and broad-based support CQI has at Penn State."

Ron Loewen,
University of Tennessee

"The team gives us several opinions and ideas. Then we determine the best ideas. Once we put into place our changes, we continue looking for ways to improve."

Lyn Harmon
Undergraduate Admissions
Office Transcript Teams

"The Quality Expo provides a unique opportunity to share our experiences, and to learn all we can from those team experiences."

Fred Loomis
Quality Circle Program:
Maintaining Momentum in
a Quality Organization

"The greatest aspect of the team was working with many different people from other backgrounds: the multicultural and multidisciplinary nature of the team."

LaTrelle Jackson
CAPS Clinical Services
Improvement Team

Six University units were honored for their five-year participation in the Quality Expo. Executive Vice President and Provost John Brighton, left, presents a recognition gift to Enrollment Management and Administration representatives (from left) Anna Oriswold, Joy Dietz and Jim Wager. Other units exhibiting in each year of the Quality Expo include: University Libraries, Finance and Business, Continuing and Distance Education, The Smell College of Business Administration and the Office of Student Affairs.

Photo: Dave Shelley

Team supports alcohol intervention

Penn State quality teams have improved more than the University's business and teaching processes. They also are supporting and enhancing the overall campus environment.

On Feb. 1, 1996, the Office of Judicial Affairs and University Health Services put two teams in place to address an area of particular concern: student alcohol abuse. Donald Suit, director of the Office of Conduct and Standards, and Dr. Margaret Spear, director of University Health Services, saw advantage in bringing their departments together to ensure easy access to educational programs that would raise awareness and effectively curb the cycle of abuse.

Two Alcohol Intervention Program (AIP) teams were formed, each given an objective. The first team was charged with the responsibility of improving communications between all areas and improving the existing process. The second team was responsible for formulating a third level of treatment, aimed at intervention for first-time offenders.

Team deliberations resulted in a more streamlined process and clearly defined job roles and responsibilities. Communication between Judicial Affairs, University Health Services and the students improved dramatically. Paper flow is kept to a minimum and referred students are now contacted by phone, within hours instead of days or weeks. The second team succeeded in creating a new level of treatment that incorporates intervention strategies. First-time offenders are referred to peer-to-peer sessions designed to educate and address alcohol-related problems before they result in arrest or injury.

According to Suit, taking a more personal approach in working with referred students and adopting a team approach to problem solving has paid off. Spear agrees, noting that incorporating the level one program for early intervention has succeeded in identifying and assisting at-risk students, but also effectively doubled the AIP case load.

"The newly-streamlined process has made it possible for the staff to take on a tremendous volume of work, supporting prevention through education, without it being too overwhelming," Spear said.

AIP Team No. 1: Communication: Team Leader/Facilitator Doris Gnanowsky and members Jennifer Shea, Linda Poria, Natalie Croll, Peggy Ackerman, Randy Shine and Stephanie Barone.

AIP Team No. 2: Intervention: Team Leaders Bill Huston and Natalie Croll and members Barbara Copland, David Goodman, Karen Feldbaum, Kelly Byers, Robin Sterba, Tracy Fisk and Wendy Williams.

Sponsors for both teams: Donald Suit, Margaret Spear.

The Schreyer Institute for Innovation in Learning: Student Quality Initiative

In Political Science 300H: Honors Seminar in Critical Reasoning, students to teamwork used quality tools and principles to gauge learning. The result, they say, is a greater understanding of quality tools and students' grades.

"The main advantage in our class was getting to work in teams. The course was built around teamwork," student Melodie Stowasser said. Quality Team, composed of a team member from each of the teams of the class and a former class member, tracked learning and teaching peers to help the class "work smarter." The team used quality tools to focus during the course. "Surveys were conducted every week. We measure how much students learned, how much time they spent on course work, the material was and how teams worked together," said teammate Laura. "We worked on teams in classes before, but this was different. Even the team worked equally," Stowasser said. The teamwork paid off. Stowasser agrees. They credit their team activity for increases in the grade and decreases in grade variance. "More students got A's," Stowasser said.

Future classes will use a computer program Norton developed. The "planet" program is a game set in the future. "You progress through the using quality principles learned in the course," he said. "The game for further increase students' learning."

Larry Spence, director of the Schreyer Institute for Innovation in Learning, an associate professor of political science, taught the course. Student teams also include Joshua Horenstein and Sarah Grey.

George Breon, director of CQI in The Smell College of Business Administration, and engineering faculty member Jaya Chandra, talk with Tod Stenger about the ISAT ship with Colleges and Universities exhibit.

The Hershey Medical Center Outpatient Practice Sites Waiting Team

Surveys identified the area most patients wanted to see improved at Medical Center: decrease waiting time. An Outpatient Practice Sites Waiting Team, under the leadership of Rebecca Densmore, was formed to address this issue. The focus, said CQI team member Don Smith, was that patients waited at the medical center for their scheduled appointment time the care provider enters the examination room.

Through flow charting, the team identified the "wait states": check waiting room and the examination room. The team developed recommendations to decrease the wait time. Hershey revised physician scheduling, increased staff, added provider clinic sessions, installed an examination room and is studying in-depth "wait states."

The team included representatives from administration, the physician and clerical staff and medical assistants. "Everyone came together to solve the waiting time issue," Smith said. Team member Debbieepleased with her team involvement. "I was pleasantly surprised that participated. The experience taught me to be more open-minded," she said.

This is the third year The Hershey Medical Center has participated in the Quality Expo, this year, 13 teams exhibited. Outpatient Practice Sites Waiting Team members also included Deborah Davis, facilitator; Alan Adelman, Cheryl Heckman, Gregory Bracale, Janice Mills, Mary Dewey, Vicki Nice.

At the Quality and Manufacturing Management (QMM) exhibit, students of the joint Smc College of Business Administration and College of Engineering master's degree program discuss improvements. QMM students in the Quality and Manufacturing Management 551 course exhibiting at the Quality Expo '97 were, from left, Hector Ramos, Jihoon Kim, Iris Rivera and Hector Rodriguez.

University Libraries: Preservation Bindery Team

The "old way" involved seven steps that included as many as four people to complete one step. The "new way" pared the process by four steps, decreased the number of staff needed to complete vital steps and saved processing time of three minutes, eight seconds per book.

The University Libraries Preservation Bindery Team used Continuous Quality Improvement principles to study the process by which books are logged before being sent to the bindery to be scanned and bound. "Through CQI, we revised the workflow," team member Kathy Gibboney said. Previously, the process turnaround time was four to six weeks. "Now we're completing the process in less time and with fewer people handling the books." The streamlined process benefits students and faculty in another way: the less time it takes for the team's handling of a book, the less time the book is away from the stacks and out of circulation, she said.

In a world of online information, the preservation of books remains a priority for the Libraries, Gibboney said. "The Libraries will profit by making people aware of how valuable it is to preserve books for all time," Gibboney said.

The Libraries have participated in all five years of the Quality Expo. This year, the Libraries featured four teams. Preservation Bindery Team members also included Andy Bigans, Carol Hugar, Carol Krusch, Diane Kurtz, Jane Hosterman and Susan Breon.

Office of Physical Plant: Measure Space Team

Their problem statement was clear: "Cost and effort are wasted measuring occupied space in new or remodeled major facilities." The five-member Office of Physical Plant Measure Space Team, sponsored by Deb Howard, interim director for operations, and headed by Jim Lettiere, acting director of facilities resources and planning, found that a number of University units were measuring the same campus space for different reasons. Team member Bob Yearick, for example, needs accurate and up-to-date measurements of space to perform his job: determining and allocating janitorial services for University facilities. Those services are assigned, in part, based on the size of the room and its use.

"Our department maintains the inventory information," Lettiere said. "All other departments now can access the data through a space inventory database that includes the size of the space in square footage, the name of the facilities coordinator for the space, the use of the space (example: classroom or office), and who the space is assigned to."

"The CQI process has saved me a lot of time and has saved the University money," Yearick said. "By having accurate, up-to-date measurements, I can allocate appropriate janitorial crews and resources based on the area."

OPP's quality initiatives derive from the unit's strategic goals. Currently, nine teams are under way in OPP. Seven exhibited at Quality Expo '97 and 10 more are just getting started, said Doug Donovan, energy conservation engineer.

The Measure Space Team also included Kathy Poissant, facilitator, and team members Susan Yothers, Scott Hard and Dick Tennent.

Quality Circle Program: Maintaining Momentum in a Quality Organization

Once a quality program is up and running and measuring successes, the organization can't afford to become complacent. Maintaining momentum takes the continuing concerted efforts of everyone in the organization, three presenters stressed in a Quality Expo '97 Quality Circle Program.

Stephen Groves, division vice president and director of Manufacturing Operations, Corning Asahi Video Products Co., detailed the State College plant's near shutdown in 1991. A series of activities turned the plant around, including meetings with customers unhappy with Corning Asahi products. "To reach the goal of a high performance work system — that synergy among workers — you want to get work processes under control. Hire, train and certify the best people to do the work," he said. Management, he added, provides the focus for plant resources and continuing employee efforts.

Dave Butt, associate professor and coordinator, MBA Communications, identified characteristics of effective teams and provided practical suggestions for team-building. Attention to team development and members' growth are vital. "Prepare people to do it right. How? Training, coaching, opportunity and amnesty — the ability to 'fail forward,'" he said.

Fred Loomis, director of administration and information management systems in Continuing and Distance Education, identified three types of teams: teams that recommend things, teams that do things and teams that manage things. "All three are critical to building and sustaining momentum," he said. Working together ensures quality within the organization.

David Wormley, dean of engineering and chair of the University Council on CQI, introduced the "Maintaining Momentum" session. Two additional quality circle programs were held during Quality Expo '97: *Innovation in the Classroom* with William Engelbret, associate professor in Business Administration (Altoona); Kathleen Mastrian, assistant professor in Nursing (Shenango); **Dee McGonigle**, associate professor in Nursing (New Kensington); and **Gregory Ziegler**, associate professor in Food Sciences (University Park), introduced by University Provost **John Brighton**; and *Team Building with Shaver's Creek Environmental Center* with program directors **Cooper Potter** and **Lynne Hudson**, and introduced by Patricia Buck, associate dean of Continuing and Distance Education.

The ARTS AT PENN STATE

Film Festival May 3

The popular CAN Film Festival, an annual public showcase of the best work from students in the College of Communications' film/video program, will be held at 7 p.m. Saturday, May 3, in Eisenhower Auditorium.

CAN is a fully student-run festival of student work, and students have a major role in deciding what will be shown. The format of the event is a non-judged screening of the best student work from the past academic year. The showing will run approximately three hours and include a brief intermission. Tickets for assigned seating are free to students with photo identification and \$5 for the general public. Tickets may be purchased in person at any Center for the Performing Arts box office or by calling (814) 863-0255.

Odyssey Through Literature

On the May 4 episode of Odyssey Through Literature George Boornstein of the University of Michigan speaks with host Leonard Rubinstein about his discovery and publication of 38 early poems of the Irish poet W. B. Yeats.

On the May 11 episode, John Fyler, chair of the English Department at Tufts University, discusses the plight of the poet as historian — or as panderer. Fyler discusses his article "Fabrications of Pandarus," which analyzes the Chaucer tale "Troilus and Cressida."

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 on WPSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://mickley.la.psu.edu/compil/odyssey/odyssey.htm>.

Storyteller at the Palmer May 10

Jan Kinney, storyteller for the entire family, will appear at 11 a.m. Saturday, May 10, at the Palmer Museum of Art on the University Park campus. The event is free to the public. For more information, contact the museum office at (814) 865-7672.

UNIVERSITY PARK CALENDAR

Field trip

Doug Steingwalt, an employee at the Shaver's Creek Environmental Center, displays a Golden Eagle to students from Lock Haven State University. The center, which houses a variety of birds of prey, snakes and other animals and features nature trails, is open to the public. The center will hold a spring wildflower walk on the grounds on Sunday, May 4. The fee is \$3 for members, \$4 for nonmembers and \$2.50 for children under 12. To register for this event, or for a schedule of other activities, call the center at (814) 863-2000.

SPECIAL EVENTS

Friday, May 2

Scott Davis and Colleen Cochran, student recital, clarinet, 8 p.m., Recital Hall.

Saturday, May 3

Catherine Clifton on "American Watercolors at the Palmer Museum," 11:30 a.m., Christoffers Lobby, Palmer Museum of Art.

The Royal Hanneford Circus, 2 and 7 p.m., The Bryce Jordan Center, through May 4.

Celia Tice, graduate recital, piano, 8 p.m., Recital Hall.

Sunday, May 4

Chamber Music Recital, 7 p.m., 122 Music Building II.

Tuesday, May 6

University of Michigan Symphonic Band, 8 p.m., Eisenhower Auditorium. For tickets, phone (814) 863-0255.

Saturday, May 10

Storyteller Jan Kinney tells tales for the entire family, 11 a.m., Christoffers Lobby, Palmer Museum of Art.

SEMINARS

Friday, May 2

Amartya Bhattacharyya on "Exploring Job Market Opportunities in Consulting," 3:30 p.m., 339 Davey Laboratory.

Tuesday, May 6

Jim Zachos on "Climate Instability at the Eocene/Oligocene and Oligocene/Miocene Boundaries? A New High Resolution Perspective."

4:40 Doubt with special guests CIV and The Vandals, 7:30 p.m., The Bryce Jordan Center.

Wednesday, May 7

S.K. Sinha on "Phase Transitions at Liquid Surfaces," 4 p.m., 339 Davey Laboratory.

Friday, May 9

Ralph E. Gomory on "New Opportunities for Learning Outside the Classroom," 11:30 a.m. to 1 p.m., The Nittany Lion Inn. For tickets, phone (814) 865-7590.

Tuesday, May 13

Susan De Vos on "Living Arrangements and School Attendance Among Children 13 to 16 in Latin America," 11:45 a.m., 406 Oswald Tower.

Joel A. Kubby on "Micro-Electro-Mechanical Systems," 1:30 p.m., 189 Materials Research Laboratory.

Thursday, May 15

Mary Pipher on her latest book, *The Shelter of Each Other: Rebuilding Our Families*, 8 p.m., Penn State Conference Center Hotel. To register, phone (800) PSU-TODAY.

CONFERENCES

Saturday, May 10

"Menopause: Making the Transition," 8:45 a.m. to 12:45 p.m., Penn State Conference Center Hotel. To register, phone (800) PSU-TODAY.

Thursday, May 15

"The Role of Freshman Seminars in Promoting Student Retention and Success," 101

Agricultural Sciences and Industries Building. To register, phone (814) 865-7522.

EXHIBITS

HUB Browning Gallery

"A Love of Nature" by Marlee Erwin, May 6 through June 8.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Kern Exhibition Area

Sketches titled "Shalom," through May 22.

Kern Tall and Flat Cases

"The Passover Haggadah — A Jewish Cultural Phenomenon," through May 18.

Palmer Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 8.

"Exotic Illusions: Art, Romance and the Marketplace," through June 15.

Zoller Gallery

"MFA Thesis Exhibitions," drawings/paintings by Carol Peebles and Greg Stahler, through May 10.

■ Reflects an international perspective.

Faculty/Staff Alerts

Thanksgiving calendar change

To help students travel safely and in timely fashion over this year's Thanksgiving holiday—without skipping classes—Penn State is changing its official University Park calendar for November 1997.

Under the change, classes at University Park will end at 12:05 p.m. Wednesday, Nov. 26—the normal ending time of fourth-period classes. Other locations may adopt the change, as appropriate.

All morning classes on the Wednesday before Thanksgiving will remain scheduled as before. Instructors whose classes would have met after 12:05 p.m. Wednesday are expected to provide opportunities to make up the class time missed because of the early closing. If needed, the Registrar's Office will work with faculty and departments on rescheduling.

The University will monitor how the schedule change works this year and the results of its assessment will be used to guide Thanksgiving holiday scheduling in future years.

Library hours

The University Libraries announce extended hours during the final exam period, May 2-11. The hours are as follows:

- **Friday, May 2:** 7:45 a.m. to 9 p.m., and certain areas from 9 p.m. to midnight*
- **Saturday, May 3:** 8 a.m. to 9 p.m., and certain areas from 9 p.m. to midnight*
- **Sunday, May 4:** 9 a.m. to midnight, and certain areas until 2 a.m.**
- **Monday, May 5 - Thursday, May 8:** 7:45 a.m. to midnight, and certain areas from midnight to 2 a.m.**
- **Friday, May 9:** 7:45 a.m. to 9 p.m., and certain areas from 9 p.m. to midnight*
- **Saturday, May 10:** 8 a.m. to 5 p.m.
- **Sunday, May 11:** CLOSED

*Includes Reserve Reading Room and East Pattee floors 1-4 only;

**Includes Reserve Reading Room, West Pattee floors 1-2, and East Pattee floors 1-4. (During extended hours these areas are open for studying and in-house use of materials.)

- **Music Listening Room:** Regular hours
- **Pollock Library:** Continue 24-hour service during the final exam period until closing at 5 p.m. Saturday, May 10. It will remain closed Sunday, May 11.
- **All University Park campus branch libraries:** Regular operating hours through Friday, May 9. They will close at 5 p.m. Saturday, May 10, and will remain closed Sunday, May 11.

In addition, University Libraries at University Park will observe a revised schedule during Intercession May 12-11.

For more information on hours of library service, call (814) 865-3063, type HELP HOURS when using the Library Information Access System (LIAS), or visit the Libraries' home page at <http://www.libraries.psu.edu/> and click on Library Info.

ARL Open House

The Applied Research Laboratory (ARL) is hosting a free Open House from 4 to 8 p.m. Wednesday, May 7, at the Applied Sciences Building to give the public an opportunity to see state-of-the-art Russian technologies that may soon be spun off to American industries.

The Open House is part of a series of technical workshops and meetings on turbomachinery, thermal power and welding technology being held at the Applied Research Laboratory May 6-9. The formal workshops and meetings are open to registered participants only and will feature 15 Russian engineers

and their peers from U.S. industry and academia who will demonstrate and discuss state-of-the-art technologies from both countries.

For additional information, contact **Edmond D. Pope**, ARL foreign science and technology, at (814) 865-2921 or e-mail edp2@psu.edu.

Directory assistance holiday hours

The Penn State Information and Directory Assistance Office will be operating on the following hours for the Memorial Day holiday:

Monday, May 26—8:30 a.m. to 4:30 p.m. The office will resume normal hours of operation (7:30 a.m. to 11 p.m.) on Tuesday, May 27.

Office professionals to be recognized

Penn State Educational Office Professionals will hold their Spring Recognition Reception at 5 p.m. Wednesday, May 14, in Room 118 of the Agricultural Science and Industries Building on the University Park campus. The featured speaker is **Laura Frye**, manager of human resources and administrative services for the College of Engineering. The topic is "Get Involved." Also featured will be the Outstanding Office Personnel Awards and installation of officers.

For reservations or information please contact **Arnell Stover**, 1800 PSU, office or (814) 865-6393. Penn State Educational Office Professionals is a professional organization whose membership consists of faculty, staff and technical service personnel. PSEOP is dedicated to promoting professional development among Penn State's office employees. For more information, contact membership coordinator **Sandy McClain** (sm4@omnibus.ce.psu.edu or (814) 865-5403).

Dial-up changes

The Office of Telecommunications, in conjunction with the Center for Academic Computing, will be upgrading the dial-up capabilities in place at 13 campuses to provide faster, more reliable modem dial-up to Internet access services. These upgrades will allow for faster access speeds and decrease the possibility of getting a busy tone upon dial-up. Seven campuses will receive new digital dial-up capability in the form of units supporting dial-up over ISDN lines. Six campuses will upgrade the speed and speed of their modem pools.

The seven locations involved in the ISDN upgrade are: Altoona, Abington, Delaware, Erie, Great Valley, Harrisburg, and York. The six campuses receiving additional higher speed modems are: Allentown, DuBois, Fayette, New Kensington, Schuylkill and Shenango.

Between now and the end of spring semester, the ISDN units will be installed at the seven campuses listed above. This change should be completely transparent to those campuses where the ISDN equipment will be installed on the same phone line as the current modem pool. However, at Abington, Erie, Harrisburg, Great Valley and York, the telephone number for dial-up service at those locations will change effective May 16. Until then, you should continue using the old modem number.

A list of campus modem numbers is provided on the Web at <http://cac.psu.edu/internet/dialup.html>

New travel service Web site

A significant collection of travel-related information and tools is available at Penn State's Travel Services site. Some of the features include:

- A listing of Penn State contract travel agencies along with a travel profiler function that allows travelers to forward their travel preferences electronically to selected agencies;

- A listing of Penn State contracted hotels/motels with links that in many cases allow travelers to check room availability;

- Links to Penn State's travel policies, forms and per diem rates.

- World times;

- Currency converters;

- Weather information and airport delays; and more.

This is the most comprehensive travel Web site in the Big 10. The Travel Services site can be found at <http://gurus.psu.edu/central/travel/>.

Expedite your first-class letter

There are two ways to save one to four days in delivery time on your 1-ounce to 2-ounce first-class letter:

- 1) Do not use staples or paper clips in the letter;
- 2) Type the address on your letter with a monospaced font such as Courier 10, Prestige Elite or Letter Gothic.

For more information on how to expedite your mail, please call **Gregg J. Asciano** at (814) 863-8153.

Geographic data on the Web

A wealth of digital data on the geography of Pennsylvania is now available on the Web, thanks to Pennsylvania Spatial Data Access (PASDA), a joint project of Penn State and the Pennsylvania Department of Environmental Protection.

Users can search for maps on the geology of Pennsylvania, networks of streams and roads within a specific county, and where recreational parks exist throughout the Commonwealth. The Web address is <http://www.pasda.psu.edu>. For those without Internet access, the system is available for use at the Penn State Libraries.

Penn State's Environmental Resources Research Institute has the lead responsibility for project management; the University Libraries' Maps Room is the point of contact for PASDA users and metadata preparation; and the Deasy GeoGraphics Laboratory, a unit of the Department of Geography, is contributing Web interface design and development of data search and delivery capabilities.

Leaving for the summer?

Whether you are off to the city or a dig on the plains, you can stay in touch with Penn State all summer through Newswire. If you have access to e-mail, you can receive daily news releases from the Department of Public Information as soon as they are prepared on issues such as the budget, new programs, upcoming events, major new appointments and faculty research. Most releases are also posted the same day on the University Relations home page at <http://www.psu.edu/ur/>.

Penn State Newswire has an easy-to-read text format with a list of stories at the top allowing readers to decide immediately what they want to read. Anyone connected to a modem can subscribe by sending an e-mail message to pat@psu.edu with your name and return e-mail address. You may unsubscribe at any time. For more information, contact **Bill Mahon** or **Christy Rambeau** at (814)-865-8157.

Tickets available

Tickets are available for the May 9 Penn State Forum presentation by **Ralph Gomory**, president of the Alfred P. Sloan Foundation, on "New Opportunities for Learning Outside the Classroom" at the Nittany Lion Inn. Lunch begins at 11:30 a.m. followed by the speech at noon. Tickets are \$10 and include lunch. Reservations can be made by calling (814) 865-7590, or stop by the Faculty Staff Club office in 110 HUB.

Awards

Discover Magazine honors two innovations

A prototype microwave rocket engine invented by **Michael M. Micci**, associate professor of aerospace engineering, and the largest optical telescope in the continental United States, invented by **Lawrence W. Ramsey** and **Daniel W. Weedman**, professors of astronomy and astrophysics, are among 35 innovations being honored by *Discover* magazine.

The two Penn State inventions are among four awards in the Aviation and Aerospace category of the 1997 *Discover* Magazine Awards for Technological Innovation. Nearly 4,000 innovators from around the world were invited to participate in the awards competition.

Micci's invention, the Microwave Arcjet Thruster, will be on display at *Discover* magazine's interactive showcase at Innovations, a pavilion in Walt Disney World's Epcot Center. Ramsey's and Weedman's invention, the William P. Hobby-Robert E. Eberly Telescope, will be commissioned in late 1997 at the McDonald Observatory in a remote area of western Texas known for having the darkest skies in North America. Both inventions will be featured in the July issue of *Discover* magazine, which hits the newsstands in mid-June.

Micci and his team developed the innovative rocket propulsion system using parts from an ordinary 1000W kitchen microwave oven. It shows promise as a cheaper, safer thruster for positioning and maneuvering satellites in space. The invention has the

Honored

Michael M. Micci, associate professor of aerospace engineering, won a *Discover* Magazine award for his prototype microwave rocket.

potential to affect technology that uses satellite communications, reducing rates on long-distance telephone calls, television satellite broadcasts and direct television. His commercial partner in the Microwave Arcjet Thruster project is Research Support Instruments Inc., of Lanham, Md. (Micci's invention was featured on the Sept. 26, 1996, Research page of *Intercom*.)

Ramsey and Weedman invented the concept for the Hobby-Eberly telescope in 1983 at Penn State. Its innovative design resulted in construction costs approximately 20 percent less than those of other telescopes in its class. A number of features allow the 24-ton primary mirror to remain stationary while observing an object, eliminating the

need for a highly complex mirror-support system. The mirror, which is 36-feet across and one of the largest of any optical telescope in the world, is made up of 91 identical pieces that were mass produced — another cost-saving aspect of the design. The telescope was built by a partnership involving The University of Texas at Austin, Penn State, Stanford University and the German universities of Göttingen and Munich.

Ramsey and **Thomas Sebring**, project manager for the Hobby-Eberly Telescope, are named as recipients of the *Discover* award. (Ramsey's and Weedman's inventions were featured

Cited

The Hobby-Eberly Telescope, the largest optical telescope in the United States, was invented by **Lawrence W. Ramsey** and **Daniel W. Weedman**. It won an innovation award from *Discover* Magazine.

in the April 21, 1994, and Jan. 15, 1997, issues of *Intercom*.)

According to the Walt Disney Co., which publishes *Discover*, the awards "recognize breakthrough technologies and honor the men and women whose creative genius improves the quality of everyday life."

Photo: Howard Nuornberger

Daughters at work

Gary Peterson, manager of agricultural short courses, brought his daughter Pamela, center, to work with him on the University Park campus during the fifth annual "Take Our Daughters to Work Day" Thursday, April 24. It was there that Pamela Peterson had the opportunity to work on assembling a lawn mower-type small engine with Julie Masser, right, a freshman engineering student and apprentice peer instructor in the Women in Engineering Program. Peterson was one of about a dozen daughters to participate in Women in Engineering Program activities set up by Andrea Joyce, a junior mechanical engineering student and program intern and instructor.

Roughly 255 people participated in "Take Our Daughters to Work Day" activities at University Park, giving girls a first-hand look at what occurs in the workplace and exposing them to the wide range of options open to them. The Women in Engineering Program project was one of 50 "career sites" at University Park to open its facilities and resources for the occasion.

"Take Our Daughters to Work Day" is a national event sponsored by the Ms. Foundation. At the University, the event is sponsored by the Commission for Women.

Pattee Library expansion has officially begun

Host of dignitaries attends groundbreaking ceremony for Paterno Library

When the time came for the beginning of the Paterno Library groundbreaking ceremony April 25, the fine drizzle stopped, the clouds parted and the sun shone brightly on Joe and Sue Paterno, state and University officials and a crowd of 200 or so donors and onlookers on the mall below Pattee Library.

"It's a great day, but it's more than that," Paterno said. "It's the start of making Pattee one of the top 10 libraries."

With its capabilities for housing traditional library materials as well as state-of-the-art information technology, Paterno said the library addition will be a "symbol to the world that Penn State will attain its great destiny. We are determined that Penn State will provide not the 11th best education in the state, nor the sixth best education in the Big Ten, but the very best education to all who want it."

Sue Paterno—who first met Joe in Pattee Library—said that the library is more than bricks and mortar. "The library is the heart and soul of the University," she said. "It opens the doors to learning." When the project is complete and the dust subsides, she said, the new library will be "a gracious lady to welcome all to the pursuit of learning."

The Paternos were the headliners at the groundbreaking ceremony, which also included Gov. Tom Ridge; other state and local officials and legislators; President Graham B. Spanier; Board of Trustees President Jesse Arnette; Gloria St. Clair, interim dean of the University Libraries; and other campaign supporters.

The \$26.5 million Paterno Library project will nearly double the size of Pattee Library and renovate existing space. The five-story expansion, set for completion in fall 1999, will add 110,000 square feet of floor space to the 130,000 square feet in Pattee's west, central and east wings.

The project is being funded by \$14.8 million from the state and \$11.7 million raised by The Campaign for the Library, co-chaired by the Paternos, who included in their efforts a personal contribution of \$250,000.

When complete, the Pattee and Paterno libraries will include subject libraries with specialized holdings in life sciences, humanities,

Dedicating their namesake

Joe and Sue Paterno were at the heart of the fund-raising drive for the Pattee Library expansion, and the addition is being named for the couple. Their efforts as co-chairs of the committee, plus their personal donation of \$250,000, helped the project become a reality.

Photo: Greg Grieco

social sciences, business and education, a new library for special collections and the latest in information retrieval and telecommunications technologies.

Ridge said that just as plants need the nurturing touch of the gardener, libraries need the nurturing touch of patrons. "That's where Joe and Sue Paterno stepped in," he said. "For decades, the Paternos have been an important part of the Penn State family. From the gridiron to the classroom, the name Paterno is synonymous with the excellence the world expects from the Nittany Lions, wherever they may be."

Spanier, calling the Paterno Library a significant addition to the campus, the Penn State system, and the entire state, thanked the campaign participants for supporting the expansion and sharing the library's benefits with others. "It is truly a facility for all of the Commonwealth," he said.

Following the ceremony, the Paternos, Ridge, Spanier, Arnette and St. Clair walked to the construction site near the east wing of Pattee, clambered aboard a piece of heavy equipment, and expertly picked up and dumped several scoops of earth.

Envisioning the future

State Sen. Robert C. Jubelirer (R-30), left, Gov. Tom Ridge and President Graham B. Spanier talk about changes in store for Pattee Library.

Shuttle

continued from page 1

and is one of only a handful of university-based researchers to ever fly on a shuttle mission.

"It's still one of those 'pinch me' kind of things," Pawelczyk said during a telephone interview from his office at the Lyndon B. Johnson Space Center in Houston. "I don't think the reality of it has set in, but it is such a pleasure to be able to represent the University in this way and it's such an incredible opportunity for research."

Thirty-six-year-old Pawelczyk and Jay C. Buckley from Dartmouth Medical School were named by NASA on April 28 from a pool of four potential researchers who will board the 16-day Neurolab mission. The two men will fly with five career astronauts to make up the seven-member crew on the shuttle scheduled to launch on April 2, 1998.

Load specialists are responsible for conducting experiments on behalf of about two dozen researchers divided among eight teams. The specialists oversee all of the experiments on the flight, performing the necessary "hands-on work and making decisions" for the

Earthbound investigators.

The Neurolab mission, a joint venture of six space agencies and seven U.S. research agencies, will focus on neuroscience research and will include 26 projects—including one on which Pawelczyk is a co-investigator—from a variety of institutions and organizations. It is one of several shuttle flights dedicated to life science research.

Pawelczyk, who has been involved in NASA-related research for a number of years, has spent the past year training at the space center and learning intimate details about each of the experiments that will be on his space flight. He has been involved with space flight "a series of mini sabbaticals" traveling to various laboratories to gain in-depth knowledge about the projects.

Pawelczyk's own experiment that will be on board the flight involves studying the change in blood pressure that occurs with space flight. About two-thirds of the individual returns from space experience an inability to stand or an unsteadiness for several hours. His research will look at the changes in vascular resistance and the release of norepinephrine—the predominant hormone involved in the constriction of

blood vessels—in the microgravity environment of space.

"There is such a variety of experiments going on this flight," he said. "As an investigator, it is a tremendous opportunity to do field research in probably the most unique environment that anyone could ask for. As a payload specialist, it's an extraordinary opportunity to work with outstanding researchers from nine different countries and absorb all their wealth of knowledge and experience and techniques that I hope to transfer to my own research on the ground. This has been a dream of mine for years."

Pawelczyk said when he was first told of his appointment to the mission, he thought that immediately surfaced in his mind was "Aaaaah. Finally!"

"I've been training for a year and it's nice to have this milestone of progress so we can continue into the next segment of our training," he said. "Over the next year, I will learn more about the shuttle operation—things like what goes on before a launch or what happens when the main engines are cut off."

But Pawelczyk said the best response to his being named to the space crew actually came from his six-year-old daughter who told her dad to "make

sure he took good pictures of all the planets for her."

Pawelczyk has already started physical training for his mission. He will begin experiencing microgravity this week by being a passenger on an aircraft that will perform dozens of parabolic maneuvers. In January, he went through water-survival training.

But as for the danger of entering space, Pawelczyk said there is no danger.

"I think it's important for people to discriminate between risk and danger," he said. "We all assume risk in life. You have some knowledge about those risks and you decide it's a tolerable risk. Things become dangerous when you don't know the risks and you don't plan contingencies. I'm comfortable with this risk."

The Penn State faculty member said that the most important lesson his recent NASA stint has reaffirmed for him is the need to be a "renaissance researcher."

"It's so important to try to gain a diversity of skills, a diversity of knowledge," he said. "I think that by being open to things and curious, that's how you gain those serendipitous findings that have become so important in research."

Early menopause and stress may be related

By ANDREA ELYSE MESSER
Public Information

Women in developing countries who reach menopause early may be experiencing the same condition as anorexics and runners, rather than the natural progression of aging, according to a researcher.

"Rural women in developing countries tend to experience menopause about eight years earlier than in developed countries," Darryl Holman, postdoctoral fellow in Penn State's Population Research Institute, said. "On average, American women experience menopause at about 51 years old, while rural Bangladeshi women, for example, are about 43 years old at menopause."

Holman proposes two possible explanations. Rural women in developing countries naturally enter menopause earlier, or the apparent earlier age of menopause is a stress-related shutdown of the ovarian cycling. He notes that urban women in developing countries tend to have a later age of menopause.

"By the time women in developing countries reach their early 40s, they have had repeated pregnancies, breast-fed for most of their adult lives and have a relatively high disease load," Holman said.

"These women have very low body mass, and their amenorrhea — absence of menstruation — may be due to the same things that affect runners and anorexics."

Menopause naturally occurs when a woman's ovaries have no follicles left that can develop to release fertile eggs. Because women have a set number of follicles that begin to undergo atresia — degeneration and reabsorption — in the fetus, when all the follicles are used up, they enter menopause.

Holman does not think that rural women in developing countries are born with fewer follicles, which would account for an earlier menopause. Rather, he thinks that these women are undergoing a variety of stresses that combined, stop the normal cycle of hormones. Runners and anorexics frequently experience amenorrhea due to a combination of low body weight and stress.

"Menopause is characterized biochemically by high levels of two hormones, luteinizing hormone (LH) and follicle stimulating hormone (FSH) and low levels of estrogen," Holman said. "Amenorrhea is characterized by low levels of LH and FSH but may have normal levels of estrogen."

Holman notes that improved nutrition, better medical care and fewer pregnancies will all occur as these countries develop, and the age at menopause will increase approaching that of the United States.

"One consideration of this phenomenon is that women will need to practice birth control later in their lives," Holman said.

Darryl Holman, postdoctoral fellow in the Population Research Institute, has found that the earlier onset of menopause in women in developing countries may not be due to the natural progression of aging.

Part of the collection

This illustration is among the Latin American works that will be preserved using the \$59,000 grant from the National Endowment for the Humanities.

University Libraries receive NEH grant to preserve Sanchez Literature Collection

The University Libraries, one of nine participating CIC libraries, will receive a \$59,000 grant to preserve a portion of the Luis Albert Sanchez (Latin American) Literature Collection. The grant is part of a National Endowment for the Humanities (NEH) grant to the Committee on Institutional Cooperation (CIC).

Luis Albert Sanchez (1900-1994), one of Peru's most respected intellectuals and politicians, was educated at the National University of San Marcos in Lima and earned his degree in literature and law. He later pursued a doctorate in history and philosophy and letters at the University of Lima and a second doctorate at the University of Chile. A scholar and statesman with wide-ranging interests, Sanchez was among the intellectual elite of Latin

America for many decades.

And, most significantly for literary scholarship, he collected a very large library representing the Latin American literature of his generation. The holdings of the Sanchez collection are particularly strong in Chile, Mexico, Peru and the Spanish-speaking Caribbean countries.

A team of librarians headed by University Libraries preservation Librarian Sue Kellerman, selected 600 volumes representing 570 titles from the collection for microfilming.

"Many of the works are now in deteriorating condition, and a number of them are in urgent need of preservation filming," Kellerman said. "Preserving these important Latin American works represents a major service to the 20th-century Latin Ameri-

can literary scholarship and research worldwide."

During this two-year national project, the nine libraries will preserve some 8,743 volumes on microfilm and an additional 699 original volumes will receive conservation treatment.

Together the materials preserved through this project represent carefully selected and broadly based records of the essential ideas and expressions across a range of subject areas (including American fiction, German literature, African literature, and international history).

Information about the Sanchez collection preserved in microfilm will be distributed and made available through the University Libraries' online catalog and national bibliographic utilities.

Nice digs

Graduate student in soils Emily Majcher is showing other students in her Soils 101 class how to do soil profile descriptions. The class meets in the fields near the University Salvage and Surplus warehouse. Classes end May 2.

News in Brief

Red Cross seeks focus group members

The American Red Cross is currently searching for University employees interested in being part of a new Blood Services Focus Group, to share ideas for further development of faculty/staff participation in the campus blood program. Individuals who have received blood and are willing to describe their experience with others also are sought. If interested in helping, please contact **Connie Schroeder**, American Red Cross blood services campus coordinator, at (814) 237-2713.

Upcoming HRDC courses

Call the Human Resource Development Center at (814) 865-8216 to register for the following programs:

■ Avoiding Burnout: Balancing Your Life at Home and Your Career

May 13, 8:30-11:30 a.m., 319 Rider Building. Cost: \$35.

■ Marketing Communications for Beginners

Learn marketing terms and definitions, campaign strategies and tactics and marketing tools to enable you to develop an effective marketing communications plan. May 15, 1:30-4:30 p.m., 319 Rider Building. Cost: \$35.

■ Movin' On: Developing Yourself for a New Position

May 15 and 22, 11:30 a.m.-1:30 p.m., 319 Rider Building. Cost: \$35.

■ Proofomatics

Reduce errors in the manuscripts you produce with a series of scanning techniques which will improve your proofreading skills. May 15, 8:30-10:30 a.m., 319 Rider Building. Cost: \$120.

Touting research

Strom Thurmond, the Republican congressman from South Carolina, talks about the importance of investing in research at all levels. University President Graham B. Spanier, who emceed the three-hour event on Capitol Hill, listens while waiting his turn to speak.

Photo: Greg Gresco

Spanier urges Congress to keep supporting funding for research

By **BILL MAHON**
Public Information

President **Graham B. Spanier** was back before Congress this month to emcee a demonstration of defense research taking place at universities across the country.

In April, Spanier testified before the House Subcommittee on Basic Research about Penn State's efforts to spearhead the Internet 2 effort among approximately 100 universities. In his most recent visit on May 7, members of the House and Senate—as well as officials from the Pentagon—attended a three-hour interactive demonstration in the Cannon

Caucus Room on Capitol Hill. The event, sponsored by the American Association of Universities, showcased research projects at approximately 30 major U.S. universities.

In addition to Spanier, other Penn State representatives participated, including several faculty, a graduate student and **Rodney Erickson**, vice president for research and dean of the Graduate School. "Our nation needs to maintain its investment in fundamental research, even though the payoffs may not be known today," Spanier told the group. "When we see how important technologies like the Internet, Stealth, night vision and the Global

State budget gives 3 percent boost

Editor's note: Although the state's general budget was approved and signed on May 6 (the swiftest passage of the state budget in 35 years), at press time, the governor had not yet signed the Non-preferred Appropriations Budget, which is where Penn State's funding resides. Gov. Ridge was expected to sign before today's publication date.

By **LISA M. ROSELLINI**
Public Information

When the final numbers came in on the state's 1997-98 budget, higher education in Pennsylvania had received a 3 percent boost—or \$32.8 million—over 1996-97 figures, an appropriation Penn State's president calls a "major improvement."

The 1997-98 state budget, approved last week, earmarks about \$290 million for Penn State including an additional \$2.8 million increase tacked on by the Legislature.

"Although this is less than our requested amount of \$305 million, it is certainly a major improvement over last year," President **Graham B. Spanier** said. "The numbers we see here are substantially better

Road Scholars II

Faculty take to highway to learn about University's impact

Editor's note: *Intercom's* associate editor climbed aboard a bus this year with about 70 faculty members in tour to get a first-hand view of the popular Road Scholars tour. In order to make press time, this story was filed from the road early Monday afternoon, May 12.

By ANNEMARIE MOUNTZ
 Public Information

It's 7:15 a.m. Most faculty are getting ready to start the day. But roughly 70 sleepy-eyed people are gathering around tables for breakfast at the Penn State Conference Center Hotel, ready to embark upon an adventure that will likely alter their perceptions of the University. Despite the early hour, there is a buzz of anticipation in the air, as the group prepares to begin the second annual Road Scholars tour.

Penn State touches a great majority of Pennsylvanians in many ways, and for the second year in a row recently hired faculty have the opportunity to learn for themselves just how far the University's teaching, research and outreach extend, while at the same time learning more about each other.

Looking around the crowded room, it is easy for President **Graham B. Spanier** to see that Road Scholars II is as popular as the original tour, which took place a year ago.

"I organized the tour last year after my own statewide tour to all the campuses," Spanier said. "It's important that faculty be acquainted with the Commonwealth campuses and with the various regions served by the University. The best way to do this is for them to see the impact the University has on the state first-hand. I received so many positive comments after last year's tour, I decided to make it an annual event."

Last year's trip concentrated on the eastern portion of the state. This year, participants are touring western Pennsylvania, with stops scheduled at Fayette, Beaver and Altoona campuses and various sites in Imber, Ohio, Pittsburgh and Worthington.

Faculty members wasted no time getting to know others on the buses. Everyone seemed anxious to learn as much as they could about their fellow faculty members.

The first stop was Singing Brook Farm in Imber, owned by Board of Trustees member **Obbie Snider**. Snider's high-tech farm is dedicated to production of Holstein dairy cattle for selective breeding, and has benefited greatly from research done at Penn State.

"It's really nice to be able to step back and see the big picture," **Ike Shibley**, assistant professor of chemistry, said. "I get so involved in the day-to-day routine, I sometimes don't think about how exciting it is to be a part of Penn State. Seeing the impact of faculty research gives me a sense of pride in both Pennsylvania and Penn State. I had inklings of how

Early departure

Mary Lou Lebo, field resource instructor, waited Monday along with about 70 new faculty to a bus bound for western Pennsylvania as part of the Road Scholars II tour.

Photo: Greg Gineco

involved the University was in the state, but never realized just how big a push there was to incorporate the University into the state. I think that's part of the reason Penn State has such a good reputation in Pennsylvania."

It's difficult to venture to any part of the state or in any discipline that has not been touched by Penn State. Take, for example, Fallingwater, the tour's second stop. The architectural masterpiece created by Frank Lloyd Wright is currently undergoing extensive renovation by L.D. Astorino and Associates of Pittsburgh. Architect **Louis D. Astorino** is a 1969 graduate of Penn State with a bachelor of arts degree in architecture. In 1989, the company president received the College of Arts and Architecture Alumni Achievement Award. In 1991 he was named an Alumni Fellow.

"The fact that a distinguished alumnus is in charge of the renovations of this famous architectural landmark speaks well of Penn State," **Mary Lou Lebo**, field resource instructor, said. "Penn State is top of the line as far as universities go. A Penn State education opens many doors both in Pennsylvania and beyond."

The tour also was scheduled to take faculty to

some of the University's western Pennsylvania locations. At Penn State Fayette, **August Simonsen**, campus executive officer, planned to talk about the campus' nursing degree program and health care in the community; and at Penn State Beaver, tour participants were to learn more about the campus' interaction with the surrounding community through the Cooperative Extension Office in Allegheny County. The office has worked closely with youth in the region.

Connie Flanagan, associate professor of agricultural extension education, is involved in research in adolescent development and has worked a bit with the office.

"Extension has to do with more than agricultural products. A huge part of it is educating the youth and helping them learn to make decisions," she said. "Education improves the quality of life, and outreach education enables communities to see and use their own resources."

Flanagan stressed that outreach is more than agriculture. "I hope faculty across all disciplines see their roles in outreach," she said.

Next on the agenda was a tour of the H.J. Heinz Co. manufacturing complex in Pittsburgh. Heinz, a global provider of processed food products and nutritional services with operating companies worldwide, started as a small company, delivering its products in horse-drawn wagons to grocers in and around Pittsburgh.

Faculty also were to be given the opportunity to interact with alumni and Board of Trustees members over lunch during a Pittsburgh riverboat tour on a Gateway Clipper vessel.

From there, the tour was scheduled to move on to Creekside Mushrooms in Worthington, another business that has benefited from Penn State research and outreach. **Roger Czaploole**, the general partner of this mushroom farm, is a Penn State alumnus, and his father, daughter and son also are Penn States. The farm, which ships more than a half million pounds of mushrooms per week and produces spawn for mushroom facilities around the world, regularly uses information from the University's Cooperative Extension Office in Armstrong County.

Near the end of the tour, participants were to visit Penn State Altoona, one of the locations that recently was made a four-year college.

Overall, tourgoers hoped to use this opportunity to be able to see a broader view of the University.

"This tour is a good way to see Penn State at work throughout the state," **Dr. Michael Flanagan**, assistant professor of family and community medicine, said. Flanagan, who has been with the University just shy of a year, graduated from the University of Maryland.

"I'm not too familiar with Pennsylvania, so this is a good way to see the state as well."

Budget

continued from page 1

than they have been in the past and they will help us address some critical needs. The governor proposed a 2 percent increase and the Legislature followed through with an additional 1 percent increase across the board."

"We'll have to work to make sure that the additional 1 percent increase from the Legislature ... becomes a long-term funding commitment."

— Richard DiEugenio
Governmental Affairs

tuition. The Board of Trustees will set tuition rates at its July meeting.

In addition to the more than \$1 billion allocated for the four state-related universities and the State System of Higher Education, the budget also earmarks \$161.9 million for community colleges, including \$5 million targeted for the purchase of instructional equipment.

Public and private colleges and universities may tap into about \$6 million in equipment grants. In addition, the state's fiscal blueprint lays out a \$16.3

million increase to the Pennsylvania Higher Education Assistance Agency (PHEAA), which will provide more financial assistance to students. For Penn State, there is also additional funding found in various line items throughout the 218-page budget, such as money designated for Regional Cancer Institutes and Poison Control Centers—which will go to The Hershey Medical Center; and the Ben Franklin Partnership program, in which Penn State is a major participant.

Agricultural extension will receive \$22.5 million, a 3.3 percent increase over last year, and agricultural research gained 3.5 percent for a funding level of almost \$21 million.

"We'll have to work to make sure that the additional 1 percent increase from the Legislature that was added for the coming year becomes a long-term funding commitment," Richard DiEugenio, special assistant to the president for Governmental Affairs, said. "Right now, that additional 1 percent added by the Legislature is not built into our base."

DiEugenio said he was pleased at the strong bipartisan consensus in both the House and the Senate on the need to increase funding for higher education.

In all areas, the 1997-98 state fiscal plan adds about \$615 million in spending—a 3.7 percent increase over 1996-97 levels—and cuts taxes >by \$165 million. The new budget also calls for reserving \$179 million into the state's Rainy Day Fund, a savings vehicle for the Commonwealth. Before the budget was settled, Pennsylvania's coffers held \$524 million in surplus funds.

Bookshelf

Thomas W. Benson, the Edwin Erle Sparks professor of rhetoric in the Department of Speech Communication, is editor of the book *Rhetoric and Political Culture in 19th-Century America* published by Michigan State University Press as part of its series in rhetoric and public affairs, edited by Martin Medhurst of Texas A&M University.

The book offers a series of rhetorical analyses of major 19th-century political texts, including Daniel Webster's eulogy of Jefferson and Adams; Frederick Douglass's "What to the Slave is the Fourth of July?"; the intertextual appropriations of the Declaration of Independence in William Lloyd Garrison's 1833 Declaration of Sentiments of the American Anti-Slavery Society and the 1848 Declaration of Sentiments of the Seneca Falls Woman's Rights Convention; and the use of Lincoln by Henry Grady, Frederick Douglass and Jane Addams. Associate professor of speech communication **Stephen H. Browne** contributed one of the chapters on Daniel Webster.

Robert MacDonald, who managed the Penn State-Behrend Bookstore for 25 years, has co-authored a book, *Home Port Erie: Voices of Silent Images*. The book, drawn from MacDonald's collection of photos, clippings, artifacts and stories, brings to life photos of boat builders, dock laborers, shipwrecks, captains and crews. **David Frew** is co-author.

Projects

continued from page 1

Intercom went to press.)

In March, Gov. Tom Ridge announced that Penn State would receive \$40 million a year for five years for Department of General Services construction projects at several Penn State campuses.

This commitment replaces a scattered approach in which Penn State never knew when construction funds for any particular project would be released from the state. Knowing that the funds will be available on a regular schedule gives the University a tremendous opportunity to replace, renovate and build new facilities according to a logical plan.

Knowing what to expect from Harrisburg also allows the University to engage in long-term planning and to combine the state funds with internal University funds, funds raised through philanthropy and funds from self-supporting operations for the maximum benefit.

The state-funded capital budget process can take years. Once projects are submitted they must be approved by the House and Senate before going to the governor's office, and once approved, actual funding can be delayed for years, according to state budget priorities. Currently, Penn State has about \$380 million worth of approved capital projects.

The five-year schedule for Penn State's state-funded new buildings, major renovations and upgrades to utility systems include classroom

buildings, research centers, telecommunications facilities and libraries. Some of these projects will also be paid in part by University funds. In addition, Penn State will begin a number of construction projects that will be funded entirely by University or private resources. In a year-by-year summary, projects include:

- 1997-98: Two new buildings on West Campus selected for the colleges of Engineering and Earth and Mineral Sciences, a general purpose classroom addition to the Thomas Building and renovations to Weaver and Patterson buildings at University Park; a multi-purpose facility at Penn State Behrend and heating system work at Penn State Harrisburg. Penn State-funded projects include residence hall facilities at Penn State Berks and Penn State Behrend, several Intercollegiate Athletic Facilities, the HUB/Robeson Center and a new child care facility at University Park.

- 1998-99: Design work for a science/chemistry building, utility work for the West Campus and telecommunications at University Park and the library at Penn State Harrisburg. Penn State-funded projects include graduate student housing at Penn State Harrisburg, residence hall construction at Penn State Berks, and family health center facilities at The Hershey Medical Center.

- 1999-2000: Phase one construction of the science/chemistry building and a library depositary at Uni-

Slated for work

Weaver Building on the University Park campus is scheduled for renovations in 1997-98 as part of a new five-year capital improvement plan.

LECTURES

Conference to explore applications of "Best Practices in Diversity"

Without substantial changes in employee relations, American industry, labor and even higher education face a bumpy ride as the shift to a multicultural work environment accelerates over the next 20 years.

Anticipating change, Penn State, the Big Ten Universities, CEOs of major corporations and organized labor are coming together at Penn State this fall to share philosophies, strategies and new initiatives at The Best Practices in Diversity Conference: Exploring Practical Applications for the 21st Century, Sept. 18-20.

In the past several years, some private corporations and academic institutions have made noticeable progress in harnessing the values of diversity in their recruiting strategies, improving the work climate and incorporating diversity into the fabric of their organizational structure. Others, because of the nature of their product or services or the history of their institutions have only just begun to look ahead," said **Thomas Poole**, acting deputy vice provost for educational equity and one of the conference organizers at Penn State. "Formally integrating diversity into the strategic planning process has become imperative for academic, corporate and labor organizations alike."

Taking this charge seriously, conference planners have scheduled three national leaders in workplace issues to speak: **R. Roosevelt Thomas Jr.**, founder and president of the American Institute for Managing Diversity and author of three books on diversity in the workplace, will give the keynote address; **Deval L. Patrick**, former assistant attorney general for civil rights at the U.S. Department of Justice, will give the major address on hiring, retention and promotion practices, which will be followed by a panel discussion of practices that work and those that don't; and **Herbert Z. Wong**, an industrial and organizational psychologist and a consultant on multicultural leadership strategies, will give an address on diversity training and programming initiatives, also followed by a panel discussion.

Other sessions will focus on practical strategies for achieving ethnic and racial diversity; gender; disability issues; international and cross-cultural matters; gay, lesbian and bisexual topics; and age. A special session is also scheduled on industry expectations of college graduates.

Registration for the three-day conference is now open. Top management and front-line practitioners in industry, labor and education are expected to attend. The conference, a continuing and distance education service of Penn State's Commission on Racial and Ethnic Diversity and the College of Education in collaboration with the Committee on Institutional Cooperation, will be held at the Penn State Conference Center Hotel at University Park.

For more information and to register, visit the Best Practices in Diversity Web site at <http://www.cde.psu.edu/C&R/BestPracticesinDiversity/>.

You can also contact **Charles Clark** about program content at (814) 949-5065 or **Roberta Moore** for registration at (814) 863-5120 or send your questions by e-mail to ConferenceInfo@cde.psu.edu.

DEVAL L. PATRICK

HERBERT Z. WONG

Colombianist Congress to be at University Park

Penn State will be host for the 10th Congress of the Colombianists Association July 30 to Aug. 3. Gathering scholars from across the globe, the congress invites researchers to share their findings and celebrate South American culture. **Leon Lyday**, head of the Department of Spanish, Italian and Portuguese, is current president of the Colombianists Association.

The Colombian ambassador to the United States, **Juan Carlos Esguerra**, will be the keynote speaker. Esguerra, who holds a master's degree in law from Cornell University, has been a professor of constitutional and administrative law in Colombia. He was a member of the National Assembly that enacted the 1991 Colombian constitution.

The 1997 congress will also feature Colombian storytelling and cinema and a tribute to **Manuel Zapata**, author on Colombia's African roots. Zapata's works, which have been translated into several languages, trace the slave trade in South America.

Musical productions will include the opening cantata "Santa Rosalia," by **Bruce Trinkle**, associate professor of music. The cantata was inspired by a painting by the same name by **Fernando Botero** that is owned by the Palmer Museum.

For more information about the congress, visit the Web at <http://www.cde.psu.edu/C&R/ColombianistsSymposium/>; or contact **Carmen R. Millan De Benavides** at (814) 865-0035; e-mail: dbm110@psu.edu.

Supply, demand of health care providers is focus of June 2 lecture

"Health Care Providers: Will the Demand Equal the Supply?" is the next lecture in the Prognosis for the Decade series sponsored by The Milton S. Hershhey Medical Center at the Penn State Downtown Center in Harrisburg.

Dr. Julian Biebuyck, associate dean for academic affairs and professor and chair of anesthesia at Hershhey, will discuss the forecast for health care providers on Monday, June 2, from 8 to 9 a.m. This lecture series is designed to inform members of the state Legislature, state government agencies and those involved in health care policy about projections on health and disease throughout Pennsylvania in the near future.

All sessions are free to the public, but registration is necessary. Call the center at (717) 785-0433.

Penn Staters

Paul Barsom, instructor of music, has been named the winner of the second bi-annual Allen E. Ostrander Trombone Composition Prize for his work "The Children of Jericho."

The award is given to the composer of a new work for trombone choir which makes a significant contribution to the literature. In addition to a cash award, "The Children of Jericho" will be published by Lyceum Press and performed by the Ithaca College Trombone Troupe.

Stan Diamond, manager of Audio-Visual Services, has been elected as a member-at-large to the Board of Directors for the Consortium of College and University Media Centers (CCUMC) and will serve from July 1 to June 30, 1999.

Hector Flores, professor of plant pathology and biotechnology and director of the Science, Technology and Society Program, and **Manfred Kroger**, professor of food science, presented a three-day National Chautauqua Short Course at the University of Puerto Rico in Mayaguez. The topics included "An Overview of STS and Teaching STS," "Food Technology and Issues in Biotech-Biodiversity," The Chautauqua/Faculty Development Program is supported by the National Science Foundation.

Penn State Hazleton physics Professor **David E. Miller** has been awarded a Fulbright grant to conduct research at the University of Warlaw, Poland, from April through July.

Miller is one of 1,600 U.S. grantees who will travel abroad for the 1996-97 academic year under the Fulbright Program, which is administered by the J. William Fulbright Foreign Scholarship Board and United States Information Agency.

Aldo Morales, associate professor of engineering at the Penn State DuBois campus, was recently honored by the Institute of Electrical and Electronic Engineers (IEEE) with the Best Paper Award at the International Asia Pacific Conference on Circuits and Systems in Seoul, Korea. Morales worked with **Sung-Jea Ko** of Korea University and doctoral students **Kyung-Hoon Lee** and **Byung-Tae Choi**, also of Korea University, on a joint paper titled "Basis Matrix Representation of Morphological Filters with N-Dimensional Structuring Elements." The findings could help create clearer pictures on computer screens.

Conference Center Hotel officially joins the fold

By ANNEMARIE MOUNTZ
Public Information

It's official. After a year of transition and planning, Penn State Hospitality Services, a division of auxiliary services, is now operating the Conference Center Hotel — formerly the Scanticon — at the Research Park. Signs at the hotel now display the new name. Conference center employees are wearing new name badges and telephones are answered using the new moniker.

Other changes will become evident more gradually.

"Perhaps the most important change is in the organizational structure," James W. Purdum, general manager of Hospitality Services at Penn State, said. "Where we once had completely separate structures at the Nittany Lion Inn and Scanticon, we now have a central management team under Hospitality Services for both facilities."

Purdum, who was general manager of the Nittany Lion Inn, is now responsible for both of the University's hotel facilities under the direction of Tom Gibson, assistant vice president of auxiliary services. Sam Glasgow, who had been general manager of Scanticon, has joined the Penn State team as associate general manager of the unit.

"We now have central sales offices," Purdum said. "There's a sin-

Creativity in action

Now that the Penn State Conference Center Hotel is part of Hospitality Services, it too may receive an edible masterpiece created by Heather Holland, assistant pastry chef.

Photo: Greg Grieco

gle director of human resources in Mike Conti and a single director of sales and marketing in Fran Levin. Each facility will provide an on-site catering sales professional. Heather Mader at the inn and Delyn Heisey at the hotel are both available for social and "walk-in" business. Judy Moyer is director of conference services for both locations and Jim Burkett, the director of property opera-

tions, oversees the physical plant, housekeeping and all components of facilities management for both the Nittany Lion Inn and the Conference Center Hotel. We also now have Jeff Kranch as the director of business services for the whole operation."

This centralized management team will be able to concentrate on meeting the customers' needs and book the guest, seminar or banquet room that

best fits each client's requirements.

"We are one unit with two locations," Purdum said. "Each location has its own flavor and its own strong points. We can now take full advantage of that in serving our guests."

While there are changes, many things will remain the same.

"Our focus remains on taking care of the guests," Purdum said.

All contracts, room reservations and seminars are managed with the former Penn State Scanticon will be honored by the Penn State Conference Center Hotel. In fact, many of the same people who were involved in making those commitments will still be there, working for Hospitality Services.

"A lot of people liked the food at Scanticon. That won't change, because Ken Stout, former chef at Scanticon, has joined Penn State Hospitality Services."

The Penn State Conference Center Hotel is the largest center of its kind in American higher education. Its merger with the Nittany Lion Inn under Penn State Hospitality Services provides the most comprehensive range of conference services available on any university campus in the country. The two facilities provide a total of 387 guest rooms, 75,000 square feet of meeting space, state-of-the-art educational technology and four restaurants.

Sloan Foundation president pushing for higher education to adopt large-scale use of distance learning techniques

By LISA M. ROSELLINI
Public Information

Urging audience members to break their "barriers of habit" and move toward using technology as a "cheaper, faster, more convenient way" to deliver education, the president of the Alfred P. Sloan Foundation said it's time for higher education to make the leap.

Ralph E. Gomory, speaking May 9 before the largest crowd to date for any of the six talks in the Penn State

Forum lecture series, said education is at the beginning of a significant transformation and the only way colleges and universities can make the transition is by moving from small scale experiments of distance learning to widespread use. The Sloan Foundation is a philanthropic non-profit institution that last year alone authorized \$53 million in grants to organizations and institutions for projects in areas covering technology, science, education and select national issues.

Gomory said the recent advances and the development of asynchronous learning networks (ALNs) have shown that people can learn through online courses and distance technology with roughly the same results as traditional classroom learning. In

Need more?

For the latest information on asynchronous learning networks (ALNs), go to the Web at <http://www.aln.org/>.

addition, these virtual classrooms have the potential to reach more people, offer more choices and provide more specialized courses taught by world renowned leaders in a particular field.

"ALNs give new meaning to the concept of lifelong learning," Gomory said. "It gives people access to new knowledge and makes learning available to anyone who wants to learn — anytime, anywhere. The greatest barrier is habit — of both the individual and the institution."

Gomory explained that both faculty and students fear the unknown. Instructors unfamiliar with the technology may not know how to prepare a course using the World Wide Web, e-mail or CD-ROM. Because of their lack of experience with the medium, many are not sure of what the content of such a course should include or how it should be conducted. On the other side of the desk sit students who are not sure of expectations or how to use the material provided. Gomory said the only way to overcome this unfamiliarity is through large-scale use.

"ALNs are going to strongly effect the structure and activities of higher education," Gomory said. "Faculty no longer have to be bound by the limita-

tions of being in class with students at the same time."

Gomory noted that despite the fact that higher education helped create much of the new technology, it has not been quick to embrace these high-tech methods. One online offering from Penn State through an on-demand ALN is a graduate acoustics certification that will be offered nationally in 1998. This five-course series is delivered via CD-ROMs especially created for the acoustics program, Web postings, Internet conferencing, books and e-mail. Penn State had already cut its teeth earlier using a Sloan Foundation grant that allowed the University to set up an ALN to deliver a tutoring system for engineers studying for their professional engineering certification.

"The electronic revolution that is now widely part of other industries has only at this point meant better typed essays in academia," Gomory joked.

However, Gomory said the Sloan Foundation is receiving more proposals for ALNs and has received one request for funding a virtual university.

Although there are many unanswered questions regarding online courses and the virtual university concept — like issues of access, how people will learn in the new environment, how courses should be taught, the need for human interaction, appropriate use of graphics, the right size class and economic aspects — one thing is clear: the revolution is now and ALNs are a powerful tool for higher education.

Awards

Associate professor named Guggenheim Fellow for 1997

Paul S. Weiss, associate professor of chemistry, has been selected as a Guggenheim Fellow by the John Simon Guggenheim Memorial Foundation.

According to the foundation, Guggenheim Fellows are selected on the basis of their unusually distinguished achievements and their exceptional promise for future accomplishments. Weiss was among 164 scientists, scholars and artists selected to receive the award in 1997 out of 2,876 candidates.

Weiss is known as an international leader in the fields of analytical and physical chemistry, surface chemistry and physics, and materials science. He set up a scanning tunneling microscopy (STM) laboratory at Penn State that he has used to produce "both scientifically interesting and technologically important conclusions to research questions that, in some cases, have remained unanswered for decades." Steven Weinreb, professor and head of the Department of Chemistry, said.

"The first microscope Weiss built for his laboratory is likely the finest STM in the world," Weinreb said. Weiss is using this instrument to understand surface chemistry and bonding of single molecules, surface motion and interactions on surfaces. Another microscope in his lab that Weiss invented, a tunable alternating current STM, is one of the few instruments in the world capable of recording chem-

PAUL S. WEISS

ically-specific atomic-resolution images and spectra on surfaces. Weiss is applying this new tool to a broad range of issues in chemistry, biology, physics, metrology and materials science.

The Guggenheim Fellowship will help to support Weiss's research on single biological molecules and biomolecular complexes. As a visiting scientist at the University of Washington this year, he and his collaborators in the Department of Molecular Biotechnology there have been developing a new set of tools for handling, manipulating and probing these molecules and complexes.

Weiss received bachelor's and master's degrees in chemistry from the Massachusetts Institute of Technology and a doctoral degree in physical chemistry from the University of California at Berkeley. He was a postdoctoral member of the technical staff of AT&T Bell Research Laboratories from 1986 to 1988 and a visiting scientist at the IBM Almaden Research Center from 1988 to 1989 before joining the Penn State faculty in 1989. He has received many awards and honors, including the National Science Foundation Presidential Young Investigator Award from 1991 through 1996, the B.F. Goodrich Collegiate Inventors Awards in 1994 and the Alfred P. Sloan Foundation Fellowship from 1995 to 1997.

Instructor honored with student appreciation award

Nichola Gultold, speech communications instructor at Penn State Lehigh Valley, was presented with the 1996-1997 Student Appreciation and Recognition Award.

The award is presented annually to a staff or faculty member chosen by the students for outstanding contributions on campus.

Gultold, a lecturer of speech communication at the campus since 1990, is a 1984 graduate of King's College and a 1988 graduate of Bloomsburg University, where she earned her master's degree in speech communication. Currently, she is pursuing a Ph.D. in speech communication at Penn State. Feminine political rhetoric is the focus of her research.

Gettysburg alumna wins Mitchell Award

L.J. Ruth of Gettysburg, a staunch supporter of Penn State and the College of the Liberal Arts, received the 1997 Philip Philip Mitchell Alumni Service Award.

The award, which is given each year to an alumnus, alumna or friend who has contributed significantly to Penn State by volunteering his or her time, talents and/or resources to the University, was established in 1980 by Elizabeth and Philip P. Mitchell. It consists of a certificate, a plaque prominently displayed in the Alumni Lounge with the name of each year's recipient and a cash gift from the Mitchells to the University for a purpose designated by the recipient.

A 1953 graduate of liberal arts, Ruth served as president of the Liberal Arts Alumni Society Board from 1979 to 1985, was a member of the college Alumni Council and received a Liberal Arts Service to Society Award for her community and alumni contributions. She served on the indoor sports complex fund committee and was one of the early champions of private fundraising for the University.

In recent years, she has contributed to special Alumni Board projects in the college, such as Career Day, and is currently a member of the Alumni Volunteer Admissions Program, inviting prospective students and families to her home and visiting schools. She is a member of the Nittany Lion Club and the Adams County Penn State Club.

In the community, Ruth has served on numerous committees and as president of the local chapter of the Pennsylvania Federation of Women's Clubs.

Institute director elected to National Academy of Sciences

Masatoshi Nei, Evan Pugh professor of biology and director of the Institute of Molecular Evolutionary Genetics, has been elected to the National Academy of Sciences. Membership in the National Academy of Sciences is considered one of the highest honors that can be accorded a U.S. scientist or engineer. Members of the National Academy assist the nation by addressing matters of importance in science and problems in which the insights of science are of central significance. Nei was selected in recognition of his distinguished and continuing achievements in original research.

Nei is the founding director of the Institute of Molecular Evolutionary Genetics, an interdisciplinary organization that fosters research on the evolution of genes and organisms. He is a world leader in evolutionary biology and has helped shape the way in which the field of molecular population genetics and evolution has developed. One of Nei's most valuable research contributions has been the development of a series of mathematical and statistical tools for the analysis and interpretation of genetic variation revealed by various molecular techniques. Nei's statistical method of genetic distance theory has been applied to the study of human

MASATOSHI NEI

ence in 1993.

Nei joined the Penn State faculty in 1990 as distinguished professor of biology and director of the institute. In 1994 he was named Evan Pugh professor of biology. Before joining Penn State, Nei held the position of professor of population genetics at the University of Texas at Houston from 1972 to

population diversity, human evolution and the evolution of immune system genes.

Nei was honored with the Kihara Prize of the Genetics Society of Japan and was elected a Fellow of the American Academy of Arts and Sciences in 1990. He was elected Fellow of the American Association for the Advancement of Science

in 1990. He earned a bachelor's degree in genetics from the Miyazaki University in Japan in 1953, a master's degree in genetics in 1955 and a doctoral degree in quantitative genetics in 1959, both from from Kyoto University in Japan.

According to the National Academy of Sciences, the total number of its current active members is 1,773. In addition to Nei, other members of the National Academy of Sciences at Penn State include Paul T. Baker, Evan Pugh professor emeritus of anthropology, elected in 1980; Stephen J. Benkovic, Evan Pugh professor of chemistry and holder of the Eberly Family Chair in chemistry, elected in 1985; Nina V. Fedoroff, the Verne M. Willaman professor of life sciences, director of the Life Sciences Consortium, and director of the Biotechnology Institute, elected in 1990; Calyampudi Radhakrishna Rao, holder of the Eberly Family Chair in statistics and director of the Center for Multivariate Analysis, elected in 1995; William T. Sanders, Evan Pugh professor of anthropology, elected in 1985; Robert K. Selander, holder of the Eberly Family Chair in biology, elected in 1982; and Philip S. Skell, Evan Pugh professor emeritus of chemistry, elected in 1977.

Defense funding

continued from page 1

Positioning System have been to our military and our nation, we must appreciate the wise leadership that invested in basic research 20, 30 and even 40 years ago to bring that technology about."

Investment in basic and applied research throughout the Department of Defense is now at its lowest level since 1980, and Army, Navy and Air Force investment in basic and applied research is at its lowest in more than 35 years, Spanier said. The president said that during recessions and when last-minute spending reductions are made, it's research accounts that are generally targeted for additional cuts.

"This is unfortunate because our nation may find itself ill-prepared in future conflicts. We need to remember that when the Defense Department invests in good science, it also invests in the graduate students who are being trained and who will become the next generation of faculty, defense laboratory and military scientists, and employees at defense industries."

Spanier noted that defense funding is key to many academic disciplines. The Department of Defense accounts for 60 percent of federal funding for electrical engineering, 55 percent for computer sciences, 41 percent for metallurgy and materials engineering, and 33 percent for oceanography, he said.

Spanier introduced Secretary of the Navy John Dalton, who echoed some of his points.

"Basic research is a long-term program," Dalton said. "The end products are some-

times difficult to predict, and oftentimes the research leads to applications far from those originally envisioned... Congress and the Department of Defense must ensure an environment where basic research can flourish."

The Navy funds research at every one of the 62 AAU institutions. According to Dalton, nearly 60 percent of the Navy and Marine Corps' basic research is conducted by AAU members. Anita K. Jones, director of the Department of Defense research and engineering, described American universities as "one of the jewels of this nation."

"The base from which many of the new ideas, the far-reaching ideas, come is our university research community," Jones said. "I believe one of the strengths of the nation is the Department of Defense basic research program."

This is the third year the AAU, a group of 62 of the nation's leading research universities, sponsored this exhibit. The program, "Basic Research in the National Defense," was co-sponsored with a number of lawmakers, including Sens. Rick Santorum (R-PA) and Strom Thurmond (R-S.C.), and Reps. John P. Murtha (D-PA) and Curt Weldon (R-PA).

There were 24 members of Congress in attendance at the demonstration, including these Pennsylvania lawmakers: Ron Klink (Jeanette, 4th, D); John Peterson (Pleasantville, 5th, R); Tim Holden (St. Clair, 6th, D); Curt Weldon (Upper Darby, 7th, R); Paul Kanjorski (Wilkes-Barre, 11th, D); John Murtha (Johnstown, 12th, D); Mike Doyle (Penn Hills, 18th, D); and Phil English (Erie, 21st, D).

Research in action

Graduate student Anal Grant (right) can be seen on this laptop computer screen, as she discusses her work with a passby at the recent Department of Defense exhibit in Washington, D.C. The camera was mounted on the computer and allowed for a "live" view of the proceedings.

Photo: Greg Gienio

■ Demonstrations from Penn State

Areas of Penn State research included in the May 7 demonstration before Congress were:

■ ThermoAcoustic refrigeration technology

TA refrigerators have flown on the Space Shuttle and were demonstrated on a U.S. Navy warship. A new technology which uses high-amplitude standing sound waves in inert gases to produce cooling, it is environmentally safe. Penn State researchers have used TA refrigeration technology to cool radar equipment aboard a Navy destroyer. The University is currently seeking partners to apply TA technology to commercial coolers such as home refrigerators and air conditioners. Graduate students valued the research and the technology for the ThermoAcoustic Lab headed by Steven Garrett, the United Technologies Corp. professor of acoustics.

■ Rotorcraft Center of Excellence.

The Rotorcraft Center is performing research in aerodynamics, materials, sensors and noise and vibration control for helicopter-type vehicles. This center receives Army and NASA funding and has numerous interactions with industry. Among the issues researchers are examining is the difficulty involved in landing helicopters on U.S. Navy ships, where pilots face high winds, large waves and small landing areas. Lyle Long, associate professor of engineering and co-director of the Rotorcraft Center, demonstrated research taking place at the center.

■ Institute for High Performance Computing

Brings together faculty and students in the use of massively parallel computers, algorithms and software. High performance computer applications can simulate jet engine noise, ocean currents, pharmaceutical design and other complex applications that may require a trillion operations per second. Lyle Long, who also serves as the director of the Institute for High Performance Computing, demonstrated some of its research along with Kevin Moroney, director of graduate education and research computing.

■ Propulsion Engineering Research Center

The current emphasis on environmentally benign, energy-efficient propulsion and power generation systems has placed increased demands on Department of Defense Technology. Penn State has taken an innovative approach to bring sound fundamental engineering combustion science, advanced laser-based diagnostics, and state of the art high speed computational predictive methods to address these issues. Such approaches are leading to low-cost, highly-reliable rocket systems, advanced high-performance gas turbine engines and new approaches for direct control of combustion under practical conditions. Robert J. Santoro, director of the center, demonstrated its work and answered questions.

Research highlights

"Penn State conducts more research than any other college or university in Pennsylvania and we are one of the largest research universities in the nation," according to President Graham B. Spanier. "Taking part in a demonstration like this before Congress provides us the opportunity to showcase some of the work of our talented faculty and highlight the many contributions we are making to the defense of the nation."

Penn State's total research activity in fiscal year 1996 was approximately \$350 million. Among research universities, Penn State ranked in the top 10 in research expenditures nationally and No. 1 in research among all Pennsylvania colleges and universities.

Penn State ranks second in the nation in Department of Defense-sponsored research and also ranks second in industry-sponsored research.

Penn State faculty are currently involved in more than 200 defense research projects, valued at \$100 million. Much of the research is funded by the Navy. Defense-sponsored research involves both basic and applied research.

Since 1945 Penn State has been home to the Applied Research Laboratory, funded by the Navy to advance its technology base through basic and applied research.

Among the specific research projects Penn State displayed was technology that *Discover* magazine recently announced will be featured in its July issue on innovations. A prototype microwave rocket engine invented by Michael M. Miced, associate professor of aerospace engineering, Miced and his team developed the Microwave Arc-jet Thruster, an innovative rocket propulsion system that uses parts from an ordinary kitchen microwave oven. It shows promise as a cheaper, safer thruster for maneuvering satellites and spacecraft. Spacecraft could have longer lifetimes and require smaller, and less expensive, booster rockets.

The ARTS

AT PENN STATE

International Museum Day May 18

The Palmer Museum of Art will join museums around the world in acknowledging International Museum Day on Sunday, May 18.

International Museum Day is an annual event sponsored by the International Council of Museums, the world-wide organization for the museum community. The purpose of the celebration is to remind governments and the general public that museums are an important means of education, cultural exchange and development of mutual understanding, cooperation and peace among people.

The permanent collection of the Palmer Museum includes 35 centuries of painting, sculpture, ceramics and works on paper from North America, including Mexico and the United States; Europe; Asia; Africa; and South America. A selection of these works are continuously on display in seven of the museum's galleries.

Two special exhibitions will be open that day. Focusing on works made in Africa, Oceania and the Americas, "Exotic Illusions: Art, Romance and the Marketplace" examines the different contexts in which art and artifacts are made and used. "Capturing The Light: A Selection of 20th-Century American Watercolors" includes works by many masters of the medium.

Odyssey Through Literature

On the May 18 episode of *Odyssey Through Literature*, English Professor **Bruce Weigl** reads from and discusses his 1996 collection of poetry, *Sweet Lorain*, and its origins both in youth and in war.

Weigl explains that he thinks of himself as "essentially formed by a boyhood in a town (Lorain, Ohio) of workers and immigrants and by a young manhood in the jagged, muddled and bloody war of Vietnam."

On the May 26 episode, host **Leonard Rubinstein** discusses the traditions and history of Ukrainian blind bards, or kobzars, with **Natalie Kononenko** and **Pavlo Suprun**.

Suprun starts by singing a song about Chernobyl filled with powerful imagery. The song describes the escaping radiation as a dragon, as the ancient enemy that burned the countryside. The bards often compare ancient events to more recent events, explains Kononenko, Suprun's translator and a professor of Slavic languages and literatures at the University of Virginia.

The kobzars also traditionally sing of sad events, which is why the Chernobyl disaster can be integrated into the bardic culture, Kononenko said.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WFSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://mickley.la.psu.edu/complit/odyssey/odyssey.htm>.

On display

"Santa Fe Canal" is one of a variety of watercolor paintings by Marlee Erwin featured in the Hetzel Union Browsing Gallery on the University Park campus. The exhibit will be on display through June 8.

Special exhibit in HUB

The HUB's Browsing Gallery features the watercolor paintings of **Marlee Erwin** through June 8. The exhibit, "A Love of Nature," features translucent, fragile blossoms that are depicted with a cool, clear light, which unifies the surface.

An accredited member of the Pennsylvania Watercolor Society and the Art Alliance of Central Pennsylvania, Erwin has exhibited in the Festival of the Arts "Images" exhibit, as well as presented a solo exhibit at Penn State.

The HUB's Browsing Gallery is on the first floor of the Hetzel Union Building, University Park. Hours are noon to 8 p.m., Tuesday through Thursday; noon to 4 p.m., Friday and Saturday; closed Sunday and Monday.

BRYCE JORDAN CENTER

Vince Gill to perform

One of country music's hottest touring performers, **Vince Gill**, and newcomer **Bryan White** will appear at The Bryce Jordan Center at 7:30 p.m. Friday, June 20. Tickets are \$24.75 and \$19.75 for reserved seating and are on sale now.

Gill's double-barreled talent as a guitarist and singer has placed him at the forefront of contemporary country music. Once the former lead singer of Pure Prairie League, Gill has successfully recorded six albums as a solo artist, with each album selling more than a million copies. He also has won eight Grammys and 15 Country Music Association Awards.

White was named 1996 Country Music Association's Top New Male Vocalist and Best New Touring Artist.

Styx, Benatar to rock the house

The rock group **Styx** and rock vocalist **Pat Benatar** will appear at The Bryce Jordan Center at 8 p.m. Thursday, July 3. Tickets are priced at \$29.50, \$24.50 and \$19.50 for reserved seating.

Styx was the first group in rock to achieve four consecutive triple-platinum albums: "Grand Illusion," "Pieces Of Eight," "Cometstone" and "Paradise Theater."

Hailing from Chicago, Styx features **Dennis DeYoung** (vocals, keyboards), **Tommy Shaw** (lead guitar, vocals), **James "Ty" Young** (guitar) and **Chuck Panozza** (bass).

Benatar was originally trained as an opera singer but decided to apply her considerable lung power to rock. Her tough, no-nonsense persona helped make her one of the most popular female performers in the 1980s. She has collected four Grammy Awards for Best Rock Vocal Performance by a Female with her "Crimes Of Passion," "Fire And Ice," "Shadows Of The Night" and "Love Is A Battlefield" albums.

Benatar is releasing all new material on June 3 on her new album, "Innamorata."

Upcoming events

■ **May 16, 17:** Penn State Commencement

Times: Friday, 3 and 8 p.m.; Saturday, 9 a.m., noon, 3 and 6:30 p.m. For more information call (814) 863-8500 or (814) 863-6357.

■ **June 12-14:** Preview '98 regional trade show
Times: Thursday, 5-8 p.m.; Friday, 10 a.m. to 7 p.m.; Saturday, 10 a.m. to 7 p.m. For both information call (814) 863-1570.

■ **July 4:** The Great American Fireworks Festival. Details to be announced.

■ **July 18:** Barry Manilow

Tickets: \$39.50 and \$29 for reserved seating, on sale now.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu>.

UNIVERSITY PARK CALENDAR

Popular stop

Dorothy Gambel of Scranton, photographed her children, Missy and Danny, at the Nittany Lion Shrine on the University Park campus during a recent visit. The site will undoubtedly be crowded this weekend, as families visit the shrine to get pictures of graduates in their caps and gowns with the Nittany Lion after graduation. Commencement ceremonies will be held for undergraduate and graduate students on the University Park campus May 16 and 17.

SPECIAL EVENTS

Sunday, May 18

■ International Museum Day, Palmer Museum of Art.

CONFERENCES

Sunday, May 18

PA Junior Academy of Science, residence halls, through May 20.

Monday, May 19

The ninth international conference on "High Temperature Materials Chemistry," Penn State Conference Center Hotel, through May 23.

"Injection Molding of Metals and Ceramics," The Nittany Lion Inn, through May 21.

The 51st Annual Tax Conference, Penn State Conference Center Hotel, through May 21.

"Summer Institute in Longitudinal Methods," Penn State Conference Center Hotel, through May 21.

POSIT, Penn State Conference Center Hotel, through May 23.

"Hewlett-Packard ChemStation Operation," Penn State Conference Center Hotel, through May 23.

PAMFES Conference, The Nittany Lion Inn, through May 20.

Wednesday, May 21

Forensic Entomology Conference, Headhouse I, through May 23.

Thursday, May 22

Twelfth Annual Plant Physiology Symposium, Penn State Conference Center Hotel, through May 24.

Friday, May 23

Penn State Teacher Education Site Liaison, Penn State Conference Center Hotel.

Wednesday, May 28

"Responding to Sexual Mispractice by Clergy," Penn State Conference Center Hotel.

"Transforming Classrooms through Technology," Penn State Conference Center Hotel, through May 30.

ICDE Preconferences, Penn State Conference Center Hotel, through June 1.

Thursday, May 29

Traditional Alumni Reunion '97, The Nittany Lion Inn and residence halls, through May 31.

Friday, May 30

American Regions Math League, residence halls, through May 31.

EXHIBITS

HUB Browsing Gallery

"A Love of Nature" by Marlee Erwin, through June 8.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Kern Exhibition Area

Sketches titled "Shalom," through May 22.

Kern Tail and Flat Cases

■ "The Passover Hagadah — A Jewish Cultural Phenomenon," through May 18.

Penn State Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolors," through May 18.

"Recent Gifts and Acquisitions: Works on Paper," through June 8.

"Exotic Illusions: Art, Romance and the Marketplace," through June 15.

■ Reflects an international perspective.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://casu.edu/calendar/>

Shenango receives \$1.5 million bequest

Penn State Shenango received \$1.5 million from the estate of William F. "Bill" McDowell, a longtime resident of Sharon, who died Aug. 28, 1996. The bequest is the largest gift in the history of the campus.

McDowell graduated from Penn State in 1936 with a degree in journalism. As a student, he was a columnist and news editor for the *Collegian*. After graduation he had a successful career of 22 years with The Sharon Herald Co. as a reporter and city editor. In 1959, McDowell moved to Pittsburgh to join the Columbia Gas System, where he was the editor for their magazine, *News & Views*, as well as information coordinator until his retirement in 1973.

McDowell realized that higher education was critical to the success of the individual and the Sharon region. Over the years, he became very

involved with Penn State Shenango as an associate member on the Campus Advisory Board. In 1986, McDowell established a \$200,000 unitrust for the campus. He continued to make generous contributions to Penn State throughout his life. In 1988, he established the A.W. Dude McDowell Memorial Scholarship in memory of his uncle, the former co-publisher and chairman of the board of The Sharon Herald Co.

This scholarship/internship was established to give talented Penn State journalism students financial help as well as an opportunity to continue their careers in the newspaper profession. He continued to fund his endowed scholarship over the years and it is now worth more than \$100,000. The endowment has generated nine scholarships over the last nine years.

Associate dean sought

Nominations and applications are sought for the position of associate dean for operations and planning in the Graduate School. This is a 12-month position (one-half to two-thirds time commitment) and is available July 1 or Aug. 1. The search is being conducted internally. The associate dean is the operations officer for many aspects of the management of Graduate School activities and reports to the dean of the Graduate School.

The Graduate School provides leadership and coordination for graduate education at Penn State, serving more than 10,300 students and 2,200 graduate faculty. The Graduate School currently awards graduate degrees in 140 fields at the University Park colleges, Behrend College, Capital College, the Great Valley Graduate Center and the College of Medicine in Hershey.

Responsibilities for the position include participation in ongoing strategic planning activities and plan implementation; budgetary responsibility for Graduate School operations, including intercollege graduate degree programs; participation in and provision of guidance for selected Graduate Council committees and subcommittees; supervision of Graduate School staff; preparation of special reports

and analyses of graduate education issues; and representation of the Graduate School on various committees and organizations internal and external to Penn State, including the Graduate School Alumni Society.

Qualifications for the position include: tenured professional appointment and membership in the graduate faculty, with significant teaching, research and service accomplishments; demonstrated leadership and interpersonal skills; commitment to high-quality disciplinary and interdisciplinary graduate programs; understanding of the major issues and trends affecting graduate education; ability to promote cooperation in a multi-campus environment; and an understanding of and support for the University's multiple missions and its commitment to diversity.

The search committee will begin to review applications and nominations on May 27 and continue to receive them until a candidate is selected. Women and minority faculty members are encouraged to apply. Letters of application, accompanied by a curriculum vitae and nominations may be submitted to: Caroline D. Ekkhardt, chair, Associate Dean Search Committee, 114 Kern Graduate Building, University Park, Pa. 16802.

Scholarship created in memory of assistant professor

Penn State Harrisburg and its School of Humanities are creating a scholarship in memory of Suren Lalvani, assistant professor of humanities and communications. Lalvani, who had been a member of the Harrisburg faculty since 1990, died unexpectedly at his home on May 3. He was 42.

Lalvani's first book, *Photography,*

Vision, and the Production of Modern Bodies, was published by the State University of New York Press. At the time of his death, he was completing work on a second book.

Contributions to the scholarship may be made to Penn State in the name of the fund and sent to the PSH Development Office.

Appointments

University Libraries to welcome new dean effective Sept. 1

Nancy Eaton, Dean of Library Services at Iowa State University of Science and Technology in Ames, Iowa, has been named dean of the University Libraries at Penn State, effective Sept. 1. Formal approval will be taken up by the Board of Trustees at its May 16 meeting.

As dean, Eaton will be the chief administrator and academic officer of the University Libraries with primary responsibilities for budget and planning, information technologies, faculty and staff leadership, fund raising and collection development for libraries at all Penn State locations. She will hold the academic title of librarian.

At Iowa State, Eaton has been responsible for the administration of the university library system since 1986.

She is a member of the board of trustees of the Online Computer Library Center and the Association of Research Libraries; the editorial board of the *Journal of Library Administration*; and the University Computing and Networking Committee. She has written several articles and book chapters.

A graduate of Stanford University, she received her master of library science degree from the University of Texas at Austin where she also did post-master's degree work under a U.S. Department of Education fellowship.

Before becoming dean of library services at Iowa State in 1989, she was director of libraries and then director of libraries and media services at the University of Vermont from 1982 to 1989. She held the rank of library professor.

Eaton also was technical services administrator for the Atlanta Public Library from 1976 to 1982; automation librarian for the State University of New York at Stony Brook from 1974 to 1976; and assistant to the university librarian at the University of Texas at Austin from 1972 to 1974 after beginning her career at Texas as a catalog librarian in 1968.

Development assistant joins Berks-Lehigh Valley College

Meggan Hannigan has joined Penn State as development assistant. She will assist in the planning and implementation of fund-raising programs for Penn State Berks-Lehigh Valley College, and she will be working from Berks campus. Formerly employed by Eastern Seal Society of Berks and Schuylkill Counties, Hannigan has previous fund-raising experience. She earned a bachelor's degree in psychology from Alvernia College.

Agricultural Sciences gains director of alumni relations

Jillian Hills Stevenson, public information officer and assistant to the dean of publications for University Libraries, has been named director of alumni relations in the College of Agricultural Sciences.

Stevenson will manage all alumni programs and activities for the college, including the College of

Agricultural Sciences Alumni Society, and will act as a liaison between the college and the Penn State Alumni Association. She will plan all college alumni programs and special events and will plan and coordinate the selection process for such awards as Alumni Fellows, Distinguished Alumni and Internship Awards.

In addition, Stevenson will be responsible for alumni-related news for University and Alumni Association publications. She also will produce all College of Agricultural Sciences Alumni Society publications.

From 1990 to 1997, Stevenson served University Libraries, where she directed a program of marketing communications including publications, press releases and videos. She also managed and maintained the Libraries' World Wide Web site.

Before joining Penn State, Stevenson worked as assistant director of field service for NAFSA: The Association for International Educators in Washington, D.C., from 1988 to 1990.

Stevenson earned a B.A. in speech communications from Penn State in 1984. She also earned a certificate in marketing from Penn State in 1993.

In 1994, she received a Rotary Group Study Exchange Award to travel to Brazil, for an intensive six-week professional exchange program.

As a volunteer, Stevenson has done extensive work with the Central Pennsylvania Festival of the Arts.

Associate professor is named Smeal senior associate dean

James B. Thomas has been named senior associate dean of The Smeal College of Business Administration.

An associate professor of management, Thomas will succeed Peter D. Bennett, who will step down after nearly eight years of service. A professor of marketing, he will return to the faculty on July 1.

Thomas has been a member of The Smeal College faculty since 1987 and is a recognized expert in strategic decision making, organizational theory and decision support systems. He is a noted teacher at the undergraduate and graduate levels, as well as in the Penn State Executive Programs. Highly active in his research, Thomas' most recent paper dealt with strategic change in the academic world.

A Penn State alumnus, Thomas earned a bachelor of arts degree in pre-law in 1974. He went on to earn a master of science in government from Florida State University in 1979 and a doctorate in strate-

gic management from the University of Texas at Austin in 1988. Before becoming an assistant professor of management at Penn State 10 years ago, he taught at both Texas and Florida State.

Thomas also has been director of special projects with the Texas Secretary of State's Office, director of management systems with the Florida Department of State and a legislative analyst for the Florida State Legislature.

His scholarly articles have appeared in such publications as the *Administrative Science Quarterly* and the *Academy of Management Journal*. Thomas also is the author or co-author of case studies, book chapters and proceedings. He has made numerous presentations here and abroad before the Academy of Management, the Institute for Operations Research and the Management Sciences, and other organizations. He has won grants for studies of top management teams, the effect of national culture on strategy, and strategic alignment of business and information technologies, and has been a consultant for such major firms as IBM and Citibank.

Smeal executive programs appoints new associate dean

Virginia M. Tucker will be the new associate dean for executive education in The Smeal College of Business Administration effective July 1.

Tucker succeeds

Albert A. Viceré, who led executive programs for the past nine years. Viceré will continue with the college as managing director of the Institute for the Study of Organizational Effectiveness and as a member of the faculty.

Tucker, also an associate professor of business administration, has been with executive programs for 15 years. She joined the staff as program manager in 1982, was named assistant director two years later, associate director in 1987 and director three years after that. In that position, she was directly responsible for public and custom programming.

Earlier in her career, Tucker was director of financial aid at South Hills Business School, State College, and a market analyst and process engineer with Corning Glass. She holds a bachelor's degree in mathematics from the State University of New York-Oneonta, and M.B.A. and Ph.D. degrees from Penn State. Her doctoral work was in business logistics, with a minor in operations management.

Tucker has chaired or helped coordinate major international conferences in executive education, including the watershed 1991 Conference of the University Consortium for Executive Education in Fontainebleau, France, and the 1996 UNICON annual meeting at University Park.

She is the co-author and editor of proceedings, journal articles and reports dealing with critical issues in executive and organizational development. She has been a consultant with numerous Fortune 500 companies and has made presentations and taught overseas and across the United States.

Summer Sessions has much to offer this year

A new LEAP into the academic experience and a wide variety of films, lectures and concerts — and the Central Pennsylvania Festival of the Arts — highlight Summer Sessions this year at University Park.

Among the special offerings are the first of a series of African-American Traditions Seminars, sponsored by the Institute for Arts and Humanistic Studies; the Orion Freshman Wilderness Orientation Program, developed by Shaver's Creek Environmental Center and the Penn State Outing Club, and a free series of "Comic Operas for the Movies" — *Albert Herring* by Benjamin Britten on Wednesday, June 25; *Falstaff* by Verdi on Wednesday, July 9; and *Il Barbiere di Siviglia* by Rossini on Wednesday, July 23. Each opera will be introduced by a faculty member in the School of Music.

Also featured will be the Summer Science Seminars, presented by faculty in the sciences every Thursday at the Nittany Lion Inn, and an Australian Film Festival to be held Wednesday and Thursday, July 16-17, in 112 Kern Building.

Penn State's LEAP (Learning Edge Academic Program), which had some 96 students last year, is expanding to accommodate up to 500 students this summer. Through the program, students can start their Penn State education in a comprehensive learning community, taking two integrated courses in different subjects, tied together with common topics or assignments. Mentors will be on hand to assist the students, and computing and library workshops will be offered.

"In a change in admissions policy, freshmen no longer as before will be required to attend summer as a condition for fall admission," Lewis Jillings, acting director of Summer Sessions, said. "As a result, we have developed a number of new programs — highlighted by LEAP — to attract freshmen during the summer."

"The LEAP Program, which will be one of the

largest learning community programs in the country, built around seven combinations of courses, is designed to help students not only survive, but thrive. By developing these freshmen activities, we are trying to ensure that Summer Sessions is seen as a fully equivalent part of the academic year."

In addition, Summer Sessions this year is supporting a Summer Institute for High School Teachers of Astronomy; a number of minority programs; and a pre-college program for high school juniors and seniors. Also being offered are dance aerobics, ice skating and ice cream socials in the weekly "Diversions" series, along with the popular Music at Noon series every Tuesday at the Fisher Plaza.

A Calendar of Events with discount coupons for ice skating and ice cream "Diversions" events may be obtained at the Summer Session office in Spruce Cottage on campus.

Other Summer Sessions highlights: Pennsylvania Centre Stage is offering four plays — "You're a Good Man, Charlie Brown," "The Mousetrap," "Misalliance" and "A Chorus Line" — in the Playhouse and Pavilion theatres, and Music at Penns Woods will offer eight chamber and orchestra performances. The annual Central Pennsylvania Festival of the Arts is scheduled for July 9-13.

In addition to the Australian Film Festival, the Graduate Student Association Film Series will present six family films at Fisher Plaza; Explazaganza 1997, also at Fisher Plaza, will feature six films in an Audrey Hepburn Festival, and the HUB will present seven films on the HUB lawn.

"Penn State is a national leader in summer sessions," Jillings said. "Our 12,000 students last year made Penn State the program, along with UCLA, one of the biggest in the country."

For more information on classes and special events, contact the Office of Summer Sessions at (814) 863-4174.

SUMMER SESSIONS EVENTS

Friday, June 6

Pennsylvania Centre Stage, "You're a Good Man, Charlie Brown," Pavilion Theatre, through June 21.

Wednesday, June 11

Summer Session eight-week classes begin.

Pennsylvania Centre Stage, "The Mousetrap," Playhouse Theatre, through June 28.

Thursday, June 12

Music at Noon: Fisher Plaza, Tim and Elise Duo contemporary music.

Ice Skating "Diversions," 8-11 p.m., Penn State Ice Rink, \$11 with coupon, \$2.25 without, includes skates.

Friday, June 13

Ice Cream "Diversions," Union Fusion Jazz Band, 7 to 8 p.m., Creamery patio. Creamery ice cream 85 cents with coupon, \$1.35 without.

Monday, June 16

Dance Aerobics "Diversions," 8 to 10 p.m., White Building Gymnasium.

Tuesday, June 17

Music at Noon: Fisher Plaza, Jazz Showcase.

GSA Film Series Explazaganza, 9 p.m. Fisher Plaza, "Roman Holiday."

Wednesday, June 18

HUB Lawn Films, dusk, "Four Weddings and a Funeral."

Thursday, June 19

Music at Noon: Fisher Plaza, Mick and the Mystics.

Ice Skating "Diversions," 8-11 p.m., Penn State Ice Rink. Summer Science Seminars: Paul Bablitz, biochemistry and molecular biology, 3:30 p.m., Nittany Lion Inn.

Friday, June 20

Ice Cream "Diversions," Tarnished Dixieland music, 7 to 8 p.m., Creamery patio.

Saturday, June 21

Music at Penn's Woods Orchestra Performance, 7:30 p.m. Eisenhower Auditorium.

GSA Family Films, 8:30 p.m. Fisher Plaza, "Babe."

Sunday, June 22

Music at Penn's Woods, 3 p.m., Music Building Recital Hall.

News in Brief

Subjects sought

Volunteers are sought for a research project involving the measurement of cardiovascular responses associated with cold packs applied to the forehead. Participants must be between 18 and 40 years old, without history of high blood pressure. Participation will take about two hours per day for three days. Participants will receive \$40 plus a gift. The principal investigator on this project is Karen S. Quigley, assistant professor of psychology. For more information, contact Suzanne E. Weinstein at (814) 863-6018.

Obituaries

Charles H. Bush Jr., maintenance foreman, Penn State Schuylkill, from Feb. 22, 1967, until his retirement June 1, 1990; died April 10 at the age of 69.

Ernest H. Coleiman, physician, University Health Services, from Sept. 21, 1959, until his retirement July 1, 1970; died April 26. He was 91.

Adelaide R. Deibler, white print operator, Applied Research Laboratory, from May 1, 1949, until his retirement Aug. 1, 1971; died April 22 at the age of 85.

Delmer P. Duvall, supervisor of motion picture services, Division of Instructional Services, from Oct. 1, 1946, until his retirement Jan. 1, 1968; died April 13. He was 91.

Center works to improve quality in food industry

Did you ever wonder how much fat is really in that fast food hamburger? Researchers at Penn State's new Center for Food Manufacturing (CFM) have, and they're focusing on questions like this to improve food manufacturing processes and in turn, make food less expensive and of better quality.

By bringing state-of-the-art manufacturing technologies to the food industry, researchers at CFM are developing innovative applications of near infrared reflectance (NIR) spectroscopy. Using this technology, the fat content of beef can be determined precisely and efficiently as it comes out of a meat grinder. The center's focus is matched with two of the University's strongest colleges — Agricultural Sciences and Engineering. **Paul Walker**, professor of agricultural and biological engineering, serves as the center's director.

Focusing on productivity, competitiveness and safety in food manufacturing, the center's goal is to better educate students and train industry professionals about issues facing today's food manufacturing industry. In this vein, a main objective is to effectively transfer of technology from research labs to industry.

The center's roster includes top graduate students and 35 faculty from five colleges at Penn State. In addition to representatives from the colleges of Agricultural Sciences and Engineering, there are experts from The Smell College of Business Administration, the College of Health and Human Development and the Eberly College of Science participating. Walker is assisted by three associate directors: **Richard A. Wysk**, Leonard Chair in engineering and professor of industrial engineering; **Greg Ziegler**, associate professor of food science; and **Joe Rose**, the Paul Morrow professor in manufacturing and design in the College of Engineering.

The center is supported by funding from the colleges of Agricultural Sciences and Engineering, and a Ben Franklin Technology Center grant from the Commonwealth of Pennsylvania. Directors of the CFM are currently seeking funding from the National Science Foundation to establish an Engineering Research Center at Penn State in 1998. If awarded, the CFM will expand its operation to serve a larger portion of the U.S. food industry.

Groundbreaking ceremony launches HUB-Robeson construction project

President Graham B. Spanier addressed a large crowd at the May 2 groundbreaking ceremony that launched a two-year construction project for the HUB-Robeson Complex on the University Park campus, above. At right, Nikitira Bailey, past president of the Black Caucus, added a brick to the cornerstone plaque during the ceremony.

The planned project will renovate and expand the Hetzel Union Building and house the new Paul Robeson Cultural Center. The complex will add 91,000 square feet to the existing 154,000 square feet composing the HUB and add the new Robeson Cultural Center. Changes to the HUB include a new entrance on Pollock Road, a new auditorium, more meeting rooms and student offices, renovated and expanded HUB Eateries dining areas, study lounges, improved access for users with disabilities, art gallery space and an expanded ballroom.

Work on the first phase of the project is slated to begin approximately May 26. In early summer, construction and information updates will be posted on various bulletin boards, at the HUB and Robeson Center information desks and on the Web at <http://www.psu.edu/HUB/Expansion/>.

Photos: Greg Grieco

Take note

It's time to update phone book information

The Department of University Publications is updating the general information and University department listings of the student and faculty/staff telephone books. The deadline for submitting changes to the department listings is July 11.

Faculty and staff in all University locations are asked to help make the updating as efficient as possible by photocopying the pages that pertain to their areas, marking changes and sending updates to the Department of University Publications, Directories, Suite A, University Support Building I, University Park Campus, by July 11. If no update is received by then, it will be assumed that no changes are necessary for your area.

The department listings on pages 23 through 87 in the Faculty/Staff Directory are identical to those in the Student Directory. Please submit only one update of material if it is between pages 23 and 87

in the faculty/staff book and that update will be used for both books.

If changes to your area are extensive, please type them on a separate sheet and attach it to the photocopy of your present listing.

Changes for individual listings in the Faculty/Staff Directory for full-time employees should be handled through your human resources representative. The IBIS function UADR (update address information) is the only method of correcting or changing an employee's address or telephone information that will ensure that the information will appear correctly in the Faculty/Staff Directory. All human resources representatives have been given access to the UADR function. Do not send corrections for individual listings to the Department of University Publications.

If you are a part-time employee who works in

an area connected with the University but are not on the full-time payroll, or are a faculty member emeritus, and you want to be listed in the 1997-98 Faculty/Staff Directory, please submit a Department of University Publications Telephone Directory Information Form by July 15 to Publications at the above address. The human resources representative who works with your area can help you get a form or you can get one from Publications by calling (814) 863-1870. Please remember that you must submit a form each year if you want to be listed in the coming year's Faculty/Staff Directory.

If you have any questions about sending your area's departmental update or about the use of the telephone information form, call Publications at (814) 863-1870. If you have questions about your individual listing, call your human resources representative.

Systems Architecture plays vital, yet silent role

By ANNEMARIE MOUNTZ
Public Information

When a new operating system is installed on a desktop computer, the installer must make sure installation goes smoothly and all software is compatible with the new system. If something goes wrong, the user could lose time, important documents or data.

The potential problems associated with such an installation are multiplied dramatically when a new operating system is installed on the University's administrative mainframe computer, which is where several very large databases are stored. One tiny "bug" could send units University-wide grinding to a halt.

For this reason, **Brian France**, lead systems programmer, and his colleagues in Systems Architecture in the Office of Administrative Systems have worked since last fall — sometimes around the clock — preparing for the upgrade of MVS, the mainframe operating system. Their hard work paid off. Things couldn't have run more smoothly when the new MVS was installed on the University's mainframe on Feb. 25.

"The main problem with the operating system is that if it doesn't work, nothing works," said **Mike Belinc**, manager of Systems Architecture. "If the operating system doesn't come up, none of the systems like Roscoe or the databases, IBIS, ADIS and ISIS, can work. It's a very critical piece of software and so it has to be flawless when you first put it into production."

The upgrade was needed because the new version of the operating system includes support for the Distributed Computing Environment, or DCE.

"People want to have access to their data and do their own manipulations from their own desktop computers. This new architecture has allowed us to distribute more of the workload out to the user community so they can have more control of their data," Belinc said. "The biggest problem doing this kind of distributed data is having security on that data, and that's where DCE fits in — it's the security side of the software that will eventually give us security from within this office outward to the rest of the University."

This upgrade was more involved than most, because the University jumped from version 3 of MVS to version 5 and upgrading two levels increased the amount of up-front work that needed to be done. Employees in Systems Architecture spent the better part of the last two years preparing for the upgrade.

"In several cases we had to upgrade other vendors' software and put new releases in to make them compatible with the new operating system," Belinc said. "That causes delays because it may take a day to upgrade a software package, or it may take up to three or four months."

The project involved virtually all of Systems Architecture, including the database administration and communications groups. Once everyone had all of the other software upgraded and in place, France began doing what needed to be done to the new operating system itself.

"We get a generic system from IBM. Theoretically it runs the day you install it," France said. "But every organization's MVS system is tailored to its own needs. I had to spend time setting our parameters on the system, so it would run the way we want it to."

France spent months poring over a dozen boxes

Computers ready for new millennium

The millennium is coming! The millennium is coming! Quick, hold onto your computer it's going to be a bumpy ride into the future. Or is it?

Some say that on the first day — nay, during the first second — of the year 2000, when 1999 rolls over into the millennium, ATM machines will not know who we are, the dead will be registered as alive, clocks will be wrong and the world will descend into chaos — all because computers worldwide will think we are back in the year 1900. Even articles in *Newsweek* have predicted that every routine computer transaction that relies on a date could go haywire, sending computers around the world crashing.

It seems that a long time ago when programming language was being prepared, in an effort to save space, the codes were written to read only the last two digits of any given year. As the millennium draws nearer, doomsayers are beginning to predict a massive computer meltdown.

However, according to some at Penn State, this is not the case. Most large companies, government agencies, colleges, universities and businesses already have begun to implement solutions to the problem. Many already have finished updating their software for programs needed to place orders and store information for the year 2000.

At Penn State, the University began solving the millennium dilemma years ago because, among other things, students who will graduate in the year 2000 are being admitted.

"We decided to upgrade our systems over a long period of time, and therefore are not facing large, one-time dollar costs," **Robert Crothers**, deputy director of the Office of Administrative Systems (OAS), said. "We also are fortunate because many of our software products have been purchased with maintenance contracts, which specify

that vendors are responsible for fixing the problem."

The state of Pennsylvania has allotted \$10 million in its 1997-98 budget to help state agencies deal with the turn of the century. For Penn State, however, the hype over the year 2000 computer problem may be just that — hype.

But, reprogramming to the new date conventions is not an easy task — it's been both time-consuming and costly. When the Penn State team began working on the problem, it developed a program to check the dates in the student data system in nearly 5,000 separate programs that were first installed between 1963 and 1985. After

1985, most computer programs were written to allow for a four-digit date, so the current computer programs used for the business operations of the University are relatively new and most were designed with the millennium in mind. The others were easily converted.

Crothers has a chart detailing the current status of Penn State's progress on upgrading University software for the year 2000, which he and his staff designed in 1995. They have only a small portion of it left to fill in.

"Do we expect trouble?" Crothers asked. "While it's easy to test an individual problem one at a time, it's not likely that we will be able to test all 5,000. We may have a program that passes information on to another program that has a glitch, but since we are being very methodical, we will be able to correct such individual problems when they happen."

It's clear that the millennium bug is the least of our worries. If the planet is paralyzed at the turn of the century, it's safe to say that a couple of numeric characters representing the year 2000 won't be the cause — at least not at Penn State.

of manuals, writing or modifying programs that give users choices at certain points and, of course, testing everything. While he was able to do much of the testing during the daytime, some had to be done when nobody else was on the system. To do this, France and others had to be in the office at 5 a.m. on many days, and also found themselves working Sunday nights.

"The bad thing is that this isn't all we work on," France said. "We're all trying to keep our other projects going at the same time as we were doing this. This was a major group effort."

Mike Kauffman, systems engineer II in the Office of Administrative Systems, had to juggle his staff to keep those other projects going.

"We're constantly reappraising top priorities to try to accommodate those changes that must be accomplished by a certain date. The work we did to prepare for the MVS upgrade slowed down a lot of the other things we wanted to get into. It impacted

on other hardware installations we've wanted to do and some of the other software is not as current as we'd like to keep it. Everything always has an impact. We just try to balance things the best we can."

The MVS upgrade has been online for a little over two months now, and things have worked smoothly. While not everything was put onto the new system at that time, the last of the software has now been moved and the old system is now offline.

On the whole the project was a major success. One key indicator of this is that most of the rest of the University has no idea that anything happened.

"The best thing that can happen for us is that nothing goes wrong and nobody notices," Belinc said. "If something fails in the operating system, then nothing else will work and you'd notice it. When everything's operating smoothly, it's all quiet down here in the basement of Shields."

Faculty/Staff Alerts

All Shenango numbers changed

Penn State Shenango campus telephone numbers changed on May 14 when the campus underwent a switch to a new telephone system. For a short time the old numbers will have a recording identifying the new numbers, but should you have a problem, please call Carol Swartz at (412) 983-2817.

New hours

The Penn State Parking Office new summer business hours are in effect now through Aug. 22. The office will be open Monday through Friday from 8 a.m. to 5 p.m. For more information, call (814) 865-1436.

Summer workshops

Education Technology Services (ETS) of the Center for Academic Computing will hold summer workshops designed for faculty and teaching assistants. Beginning this month, ETS offers week-long seminars in teaching and learning with technology. The seminars will be repeated in June and in July.

The seminars are designed so that information from an introductory course such as "Creating Multimedia Resources" taught at the beginning of the week can be applied in a new context like "Extending Web Development Skills" or "Bringing Your Presentation Skills to the Classroom" later in the week.

The summer seminars will be held during the following weeks: Monday-Friday, May 19-23; Monday-Friday, June 16-20; and Monday-Friday, July 21-25.

To register, please contact Jean Cowher at jac@psu.edu or (814) 863-4356. You also may register via the World Wide Web. From the Penn State home page (<http://www.psu.edu/>), choose Computing, then choose Seminars, look for Summer Seminars, then choose Register.

Please contact Karen Peters at knp138@psu.edu or at (814) 863-7763 with any questions related to the summer workshops. A general description of the seminars and other resources can be found from the ETS home page at <http://ets.cae.psu.edu/>.

Upcoming HRDC courses

Call the Human Resource Development Center at (814) 865-8216 to register for the following programs:

■ **Designing Visuals for your Presentation** — COM 016

May 19, 8:30-11:30 a.m., 319 Rider Building, Cost: \$35.

■ **Designing and Developing Customer Satisfaction Surveys** — CUS 010

Learn to use various survey methods, types of questions and rating scales to gauge customer satisfaction. May 20, 1:15-4:30 p.m., 319 Rider Building, Cost: \$35.

■ **Becoming an Adult Learner in Higher Education** — PER 015

Thinking of returning to school? Get the motivation to get you started. May 21, 9 a.m. to noon, 319 Rider Building, Cost: \$35.

■ **Communication Media: Matching Media With Messages** — COM 050

Develop the tools and techniques to make effective use of the information superhighway. May 22, 2-4 p.m., 319 Rider Building, Cost: \$25.

■ **Planning and Implementing Strategies for Organizational Change** — LDR 057

Learn how to maximize the benefits and minimize the risks. May 23, 1:30-4:30 p.m., 319 Rider Building, Cost: \$35.

■ **Surfing for Gold: Using Electronic Sources to Identify Research Funding Opportunities** PRO 080

June 5, 9 a.m.-noon, 319 Rider Building, Cost: \$35.

■ **Developing Winning Research Proposals** PRO 014

June 12, 9 a.m. to 4 p.m., 319 Rider Building, Cost: \$75.

■ **Developing Winning Research Proposals II** PRO 026

June 19, 8:30 a.m. to noon, 319 Rider Building, Cost: \$50.

■ **Program/Project Management** PRO 032

Manage complex technical projects and explore the requirements, risks and constraints imposed by various contract documents; June 26, 9 a.m. - 4 p.m., 319 Rider Building, Cost: \$70.

Intercom survey

Readers who were randomly selected to participate in the Intercom Reader-Survey are being asked to return their questionnaires as soon as possible. The staff of Intercom values your opinion and comments about this publication, and the information you provide may help shape the way news is delivered.

To date, approximately 750 surveys of the 2,500 sent out through campus mail have been completed. Anyone with questions about the survey may call Lisa Rosellini, editor, at (814) 865-7517 or e-mail her at lmr@psu.edu.

Loan period extended

All full-time Penn State employees can now check out books from the University Libraries for an entire semester. Previously, staff members were able to keep materials for only four weeks. When borrowing books, employees must show a current faculty/staff ID and maintain a current address on file with the Libraries. All loaned materials can be recalled at any time.

For more information on the lending policy, read the University Libraries' Lending Code available at public service areas in the Libraries.

Taking note

For the second year in a row, staff assistants in the Commonwealth Educational System will participate in a two-day convocation to hone personal and professional skills and provide recognition for the work they do. Participants in last year's event (shown above) networked and learned how to survive in a changing organization, among other things. This year, the CES Staff Assistants Convocation, scheduled for May 21-22 at the Nittany Lion Inn on the University Park campus, will show its 250 participants how to manage and organize electronic files, design newsletters, increase communication and avoid burnout. Participants will also be involved in a "CES town meeting" with Robert Dunham, senior vice president and dean of CES. For more information about this ongoing seminar, contact Linda Higginson by e-mail at lh1@psu.edu.

Web access to LIAS

The University Libraries are replacing old terminals and installing Windows-based computer workstations that will allow patrons access to LIAS On the Web. Over the next few months, 225 personal computers will replace the current LIAS terminals at all Penn State library locations, including the Commonwealth College.

LIAS On the Web provides graphical access to The CAT, the Libraries' online catalog; subject databases; and Web resources. It also features easy access to the Big Ten Libraries' online catalogs through the Virtual Electronic Library and a new "Tell Me" option where a patron can specify the type of material and subject desired (for example, journals/history), and LIAS makes suggestions about resources that match the request. Multiple simultaneous searching sessions are possible, as well as the continuation of existing features such as e-mailing and downloading citations and full-text articles from databases.

All Libraries locations are expected to have most all public workstations in place by the end of summer.

Remote users can still reach LIAS through a direct Telnet session to: liasp.spsu.edu. To reach LIAS On the Web, go to <http://liasp.spsu.edu/>.

Pattee changes

The handicapped entrance and parking spaces behind Central Pattee Library off Curtin Road on the Uni-

versity Park campus have been closed due to construction on the Pattee Library addition and Pattee renovation. This area also includes the underpass walkway from Curtin Road to the front of Pattee. A new handicapped entrance has been created at the front of East Pattee and an existing handicapped entrance is located at the front of Pattee's west wing. Handicapped parking spaces have been created adjacent to West Pattee along Fraser Road and near the Mueller Building by East Pattee.

In addition, the drive-up book drop behind Central Pattee has been closed. Additional book drops have been installed at the Pattee Library loading dock along Curtin Road and outside of West Pattee along Fraser Road. Other book drop locations include: West Pattee, ground floor entrance; East Pattee, ground floor entrance; Physical Sciences Library, 230 Davey Lab; Mathematics Library, 109 McAllister Building; Earth and Mineral Sciences Library, 105 Deike Building; Engineering Library, 325 Hammond Building; and Pollock Library.

For more information and updates on the building project, visit the construction Web site at <http://www.libraries.psu.edu/pubinfo/construction/>. Send your questions and comments to mac@pubinfo.psu.edu. For information concerning handicapped services, call the Library Services for People with Disabilities at (814) 865-0284.

Engineers develop fabrication method for safer flywheels

By BARBARA HALE
Public Information

University engineers have developed a practical, easy method for making safer versions of the spinning cylinders or disks known as flywheels that could make them more likely candidates to power cars, stabilize household electrical current — even run space satellites.

Christopher W. Gabrys, a consultant who earned a Ph.D. at Penn State in 1996, and his adviser, Charles E. Bakis, associate professor of engineering science and mechanics, said their new method "should theoretically allow fail-safe or limited failure flywheels to be constructed."

The new technique reduces the possibility of catastrophic failure of the flywheels by changing the area where the flywheel can be expected to fail and by limiting the amount of the rotor that will fly off if the wheel is spun too fast.

Bakis said that composite flywheel rotors are usually made from high-strength, lightweight, carbon, glass or synthetic fibers formed into a continuous filament that is wound around a spindle or mandrel, like thread on a spool. The filaments are impregnated with epoxy to "glue" them together and hold them in a rigid disk or cylinder shape.

In the new approach, a rubberlike material is substituted for the epoxy. The filament passes through a special solution "bath" that soaks it thoroughly with the rubber-like material. The elastomer-impregnated filament then solidifies in a matter of minutes after being wound on the mandrel.

"The result is a flywheel in which we predict failure will result in only the outer edge fibers peeling from the wheel," Bakis said. "The breakdown process also is self-arresting since the inner material is operating at lower stress levels due to the unique properties of the matrix flywheel. This is in contrast with rigid epoxy matrix wheels which usually fail explosively — all at once."

The two researchers said that the use of elastomers in composite flywheels is not a new idea and it had been theorized and reported in technical literature previously. However, Gabrys and Bakis are the first to develop a simple, practical way to make very thick disks and cylinders using elastomer-impregnated filaments.

Limited-failure flywheels have

Charles Bakis demonstrates how a free-turning flywheel will create enough energy to power the 100-watt light bulb to his right.

Photo: Greg Grieco

the potential to be safe, low cost, non polluting, replacements for chemical batteries in a host of applications, Bakis said. High-performance composite flywheels are capable of storing or providing 20 to 40 times more power per kilogram than batteries. Their power comes from the fact that, once set rotating, a flywheel tends to keep rotating unless its kinetic energy is deliberately drawn off or friction slows it down.

Heavy, low-tech, metal flywheels have been used for years on auto crankshafts to assist gasoline engines between piston strokes. Currently, GM, Ford, Mercedes Benz and Mitsubishi are all known to be developing flywheel/electric hybrid auto

propulsion systems incorporating the new high performance composite rotors.

Less well known are some of the other possible flywheel applications. "Power companies often keep a small plant in reserve which they fire up twice a day for peak needs. Flywheels could be a less costly or dangerous alternative that would enable the companies to run their plants at full use around the clock," Bakis said. "On satellites, flywheels could not only replace batteries but could even be used as momentum wheels to orient the spacecraft."

All of these applications depend, at least in part, on developing safer rotors.

Population Research Institute part of \$2.5 million research project

The Penn State Population Research Institute, the Institute for Survey Research at Temple University and the University of Puerto Rico have joined forces for an unparalleled \$2.5 million research project to investigate poor maternal and infant health among both mainland U.S. and island Puerto Ricans.

The Puerto Rican Maternal and Infant Health Project is funded by the Centers for Disease Control, the Maternal and Child Health Bureau of the Health Resources and Services Administration and the National Institute of Child Health and Human Development, a division of the National Institutes of Health. This project involves an in-depth survey of more than 3,000 Puerto Rican mothers in Puerto Rico, New York City, New Jersey, Connecticut, Massachusetts, Pennsylvania and Florida. No other nationally representative surveys have focused on the health of Puerto Rican mothers and their babies.

"The inclusion of Puerto Rico in this study, plus the collection of migration histories, make it possible for the first time to compare infant health outcomes for women in the various locations who are nonmigrants, one-time migrants, return migrants and repeat migrants," said Nancy S. Landale, associate professor of sociology and project director. "By its extension beyond the New York metropolitan area, this study is the first to represent Puerto Ricans living in various areas of the United States."

Puerto Rican children are notably disadvantaged, relative to non-Hispanic white children, in infant health outcomes.

"An understanding of the processes contributing to these unfavorable health outcomes is critical if we are to formulate effective policies to improve the well-being of Puerto Rican mothers and their babies," Landale said. "Given the growing volume of migration to the United States from Latin America and the Caribbean, we need to know more about the effects of the migration process on family patterns, health behaviors and maternal and infant health outcomes among Hispanic groups."

ATHLETICS

A regular column provided by Intercollegiate Athletics

Hall of Famer

Former Penn State quarterback **Todd Blackledge**, who led the Nittany Lions to their first National Championship in 1982, was chosen for induction into the GTE Academic All-America Hall of Fame.

Coach on committee

Women's basketball Coach **Rene Portland** has been named as an NCAA representative to the USA Basketball Women's Select Committee. As a committee member, Portland will help in identifying and selecting coaching staffs and players for USA Basketball's women's teams in major international competitions.

Coach of the Year

Mark Pavlik, coach of the men's volleyball team, was named EIVA Coach of the Year for leading the team to an overall record of 29-1. The team was ranked No. 2 in the nation for much of the regular season, captured its seventh straight Eastern Intercollegiate Volleyball Association championship and finished third in the NCAA Final Four tournament in Columbus.

Academic excellence

Coach **Bob Krimmel's** swimming team ranked No. 1 among 57 Division 1 women's programs saluted by the College Swimming Coaches Association of America for academic excellence. The Lady Lions had a cumulative grade-point average of 3.34 for all swimmers and divers on the eligibility list, which earned a "superior" citation. The men's program won a "commendable" rating with its cumulative GPA of 2.81.

Sports Illustrated ranking

Penn State's athletic program was No. 8 in a *Sports Illustrated* ranking of the top 50 athletic schools. The magazine surveyed the country's 305 institutions of higher education which play Division I basketball and assigned point totals to criteria it surveyed including number of intramural sports, the number of varsity sports, percentage of students who participate in athletics or intramural sports, on-campus athletic facilities, graduation rates and a host of other criteria. The University currently has 29 varsity sports, 16 intramural sports and 57 recreation and sport clubs.

For the latest information on Penn State Sports, be sure to visit the official Intercollegiate Athletics site on the Web at <http://www.psu.edu> (click on sports).

New carpet

Sporing Valley Turf of Lancaster recently installed new turf for the women's rugby club playing field on the University Park campus. The team won the 1997 national championship match on the field the weekend of May 3-4.

Photo: Greg Gresco

Five earn national Goldwater Scholarships

Four Penn State students at University Park and one at Penn State Erie, Behrend College, have been named recipients of the national Barry M. Goldwater Scholarships for academic excellence. Approximately 250 Goldwater Scholarships worth \$7,000 each are awarded annually.

The scholarship, established in 1986 to honor Sen. Barry M. Goldwater, covers the cost of tuition, fees, books and room and board for the last year or years of undergraduate study in mathematics, the natural sciences and engineering.

—**David Dudzinski** of Dupont is a sophomore majoring in chemistry and biochemistry and molecular biology. His essay was "From Primary to Ter-

tiary Structure: The Protein Folding Problem." Dudzinski plans to pursue both M.D. and Ph.D. degrees and a career in pharmacology.

—**Janet Geoffroy** of State College is a sophomore majoring in astronomy and astrophysics and physics. Her essay was "An Improved Method for Finding Galaxies at High Redshift." Geoffroy plans to continue graduate study with a focus on galaxies and cosmology.

—**Alan Hall** of Erie is a junior majoring in electrical engineering at Penn State Erie. His essay was "Possible Ideas for Noise Reduction in Quantum Computing Systems." Hall plans to pursue graduate study in electrical engineering or physics and

hopes to obtain his professional engineer license.

—**David Kaczorowski** of Bethel Park is a junior majoring in biochemistry and molecular biology. His essay was "Study of Genetic Regulation to Combat Disease." Kaczorowski plans to pursue a career in biochemical or biomedical research with an emphasis on gene therapy technology.

—**Adria Liszka** of State College is a sophomore majoring in engineering science. Her essay was "Neonatal Oxygenation: Early Results of Research Development." Liszka plans to earn a Ph.D. in bioengineering with the ultimate goal of designing computerized systems for hospitals.

University officials detail \$476 million in capital construction projects

Editor's note: In the May 15 issue of Intercom, as we were going to press, an outline of the proposed projects which are part of the University's five-year capital construction plan was given. A more detailed listing of the projects follows.

By LISA M. ROSELLINI
Public Information

Beginning this summer and on into the year 2001, the sound of earth moving and the buzz of power equipment will be audible at Penn State locations across the state as a result of a recently unveiled five-

year, \$476 million construction plan.

In an effort to meet Penn State's most pressing academic needs, University officials on May 14 mapped out a long-range construction plan that is expected to have a profound impact on educational programs at a number of campuses. A plan of this nature was not possible in past years because of the unpredictable disbursement of funding from the state. But in March, the governor announced the release of \$200 million in badly needed capital construction funds over the next five years.

See "Projects" on page 2

New budget strategies considered

The University is adopting new internal budget strategies that link income more directly with program costs and may expand its differential tuition program to better reflect differences in program costs.

"Even with the good news about the state appropriation for 1997-98, (a 3 percent boost in funding) our appropriation over the last six years in total has lagged behind inflation," said Gary Schultz, senior vice president for finance and business/treasurer.

"At the same time, our costs continue to rise and funding for grants for education and research is increasingly competitive. We are concerned about keeping a Penn State education affordable to families of average means, and we do not want these fiscal challenges to limit academic quality or the educational experiences of Penn State students."

See "Strategies" on page 3

Interim budget approved

The Board of Trustees on May 16 approved an interim maintenance and operating budget for the fiscal year beginning July 1.

The interim budget was approved for the period beginning July 1 at the level of the adjusted 1996-97 total operating budget of \$1,698,653,000 for all divisions, including The Milton S. Hershey Medical Center and all auxiliary enterprises.

"The University has adopted an interim budget so that the University has an approved fiscal operating plan from July 1 until the new 1997-98 budget is approved at the July Board of Trustees meeting," said Gary Schultz, senior vice president for finance and business/treasurer.

The board took no action on changes in tuition, salaries and wages, employee benefits or other necessary expense increases.

The University's final 1997-98 total operating budget will be submitted for approval at the July 11 Board of Trustees meeting, which will be held at the Berks Campus.

Projects

Continued from page 1

Funded by the state's commitment and \$276 million in University money, the multi-million dollar improvements range from a \$14.7 million New Research Center at University Park, to more than \$11.4 million in infrastructure upgrades for telecommunication needs over the next five years, to a 165-unit complex to house students and their families at Penn State Harrisburg.

In total for fiscal year 1997-98, more than \$130 million will be spent on construction projects, the largest capital construction initiative in the University's history; in fiscal year 1998-99, about \$82 million will be spent on capital improvements, followed by an estimated \$118.4 million in building upgrades and construction into the millennium; and in the year 2000 to 2001, nearly \$47 million in construction and renovations are planned.

The news of the five-year plan has been greeted with enthusiasm. In the Eberly College of Science, several laboratories are being renovated and a new chemistry building, expected to cost nearly \$60 million by the time it's completed, is slated to go up in the year 2000 on the University Park campus. The design of the chemistry building will be paid for with \$8.75 million in state funds, while the estimated \$24.6 million construction costs related to phase I of the project will be funded with \$19.6 million from the state and \$5 million from University coffers. In addition, in the year 2001, Chandler Laboratory at University Park, currently used by the chemistry department, will be renovated through a \$10.2 million project and used by the College of the Liberal Arts.

"The new chemistry building is sorely needed. We have a general infrastructure problem that exists with

many of our buildings which are heavily used," Norman Fred, associate dean in the Eberly College of Science, said. "We have been lacking a state-of-the-art chemistry building that would allow our students to truly experience research on the scale that they should be experiencing here at a major research university like Penn State and we want to make sure we are well-positioned to meet the needs of future students."

Freed explained that not only are the labs used by those students majoring in the sciences — a number that has continued to climb, mostly because of increased interest in health professions — but also by students in nearly every major.

"While roughly three-quarters of our students majoring in the life sciences have extremely lab-intensive programs, we also provide service instruction at the undergraduate level. About 75 percent of student credit hours that we provide are actually offered to students outside of our college," Freed said referring to the University's general education requirements. "We are primarily a service college in our instruction at the undergraduate level and chemistry is the most heavily impacted department."

Also benefiting from renovations over the five-year period will be Sackett and the Engineering Buildings, Burrows Building and Berland Laboratory on the University Park campus. Renovations to Weaver and Patterson buildings have already begun. A new forestry building at a cost of \$12 million is scheduled for the year 2002, replacing Ferguson Building which will receive a facelift at a later date and be used for other purposes.

At Penn State Harrisburg, a new \$17.3 million library will grace the grounds sometime in fiscal year 1998-99. The projected 115,000-square-foot facility has already been designed. Also at Harrisburg, a study is under way to replace outdated housing units that during the 1950s were used as an Air Force base. More than \$16 million has been designated for this project.

"We anticipate that the new library can serve nearly 1.5 million potential users and will enable our students, faculty and staff to perform research and scholarly activities at a much higher level," said James South, associate vice provost at Penn State Harrisburg. "But despite these large monetary projects, we are equally happy with the

HIGHLIGHTS OF THE 5-YEAR CAPITAL CONSTRUCTION PLAN

Project	Funding	Construction dates
HUB/Robeson Cultural Center Complex (University Park)	\$23.3 million	1997-98
New Research Center (University Park)	\$14.7 million	1997-98
Football Training Facility (University Park)	\$13.8 million	1997-98
Multi-purpose facility (Behrend)	\$8.3 million	1997-98
New Child Care Facility (University Park)	\$2.3 million	1997-98
Library at Penn State Harrisburg, Capital College	\$14.4 million	1998-99
Student Housing (Penn State Harrisburg)	\$16.5 million	1998-99
Residence Hall-Phase I (Berks)	\$6 million	1997-98
Residence Hall-Phase II (Berks)	\$6.2 million	1998-99
Chemistry Building (design/Phase I) (University Park)	\$33.6 million	1998-99
Graduate Student Housing (University Park)	\$25 million	1999-2000
Classroom building (Altoona)	\$4.9 million	1999-2000
Library and Classroom (York)	\$11.9 million	2000-2001

Coming soon

This is an artist's conception of the New Research Center at University Park. The facility is expected to cost \$14.7 million, and will be constructed in 1997-98.

funding we also received for two smaller projects that will greatly improve our infrastructure." South was referring to the \$1.1 million heating system project and the \$3.5 million electrical distribution project that will upgrade aging systems at the campus.

In the year 2000-01, Penn State York is also slated to build a library and general classroom building. Nearly \$12 million has been earmarked for that project, which will replace the existing library facility built in the 1970s to serve about 400 students — a far cry from York's 2,100 enrollment figure. In addition, the general classroom building to be constructed will contain a 650-seat auditorium and technological capabilities.

Donald Goffnat, campus executive officer at Penn State York, said the classroom building and library will help the commuter campus fulfill its obligation to the community, which deeded 33 acres to the campus for \$1 on the condition that some improvement to the grounds be made that benefited the York region. To date, the campus has created a park, and installed tennis courts and

a soccer field.

At Penn State Berks, phase one and two of a residence hall project and the expansion of the dining facility have garnered a total of \$13.2 million; the third phase of a residence hall construction project at Penn State Erie will receive \$6.4 million, while a \$25 million graduate student housing project at University Park is on the books for 1999.

Most of the projects in the five-year plan have already been approved by the Board of Trustees, some are even ready to go to bid for construction, such as the Leonhard Building and new research center at University Park and the nearly \$23.3 million HUB/Robeson project.

President Graham B. Spanier stressed that despite the large number of projects funded by the capital plan, there are still construction projects awaiting funding. So far, the state Legislature has approved \$363 million worth of capital building projects, but funds for those projects have not been released. The Legislature is currently reviewing Penn State's capital budget request of \$98 million.

PENN STATE'S FIVE-YEAR CAPITAL PLAN (in millions)

Fiscal year	State funding	University funding	TOTAL
1997-98	\$40.6	\$89.4	\$130
1998-99	\$41.9	\$40.3	\$82.2
1999-2000	\$40	\$78.4	\$118.4
2000-2001	\$41.7	\$5	\$46.7
2001-2002	\$39.9	\$11	\$50.9
	\$204.1	\$224.1	\$428.2
Additional development (funded by Penn State)	\$48		\$48
TOTAL CONSTRUCTION PLAN			\$476

From the Trustees Docket

Arnelle earns national trustee association award

President of Penn State's Board of Trustees, **H. Jesse Arnelle**, attorney and senior partner of Arnelle, Hastie, McGee, Willis and Greene of San Francisco, has received the 1997 Distinguished Service Award in Trusteeship from the Association of Governing Boards of Universities and Colleges.

The award, which is granted each year to one trustee from a public institution and one from a private institution, is sponsored by TIAA-CREF to recognize the service and accomplishments of volunteer leaders. Arnelle received a certificate and a \$10,000 unrestricted grant to Penn State in his name at the association's National Conference on Trusteeship in San Diego in April.

"It is with deep respect and admiration that I nominate H. Jesse Arnelle for the award," wrote University President **Graham B. Spanier**. "Jesse is a true servant and leader. He, in my judgment, has set a standard of excellence and leadership for Penn State's board by making difficult decisions in which honesty, collegiality and integrity were his hallmarks."

Accepting the award, Arnelle said, "What I cherish most about receiving this Distinguished Service Award in Trusteeship is the aspect of service. I am a firm believer in service—service to your family, community and business endeavors, and perhaps more important, service to your fellow man. I

H. JESSE ARNELLE

believe that service is my privilege. We are the stewards of institutions across the nation and our collective goal is to provide the thousands of young men and women in our care with the opportunity to enrich their minds, broaden their horizons and help them realize their dreams."

Arnelle was first elected to the Penn State Board of Trustees by the alumni in 1969 and has been reelected for eight successive three-year terms. He was elected chairman in 1996, becoming the first African American to serve in that post.

Early in his tenure, Arnelle was instrumental in developing the committee structure that makes Penn State's board participatory and active, a structure that has been cited as a model for public institutions. He is co-founder of the Renaissance Fund, which has provided more than \$2 million in schol-

arships for more than 1,500 of the brightest and neediest students.

A champion of diversity, affirmative action and civil rights causes, Arnelle has met often with students and faculty and staff over issues of racial climate and supported programs and funding that brought about increases in minority student enrollment in the 1980s. He was a leader in both the divestment of University funds in South Africa in 1987 and reinvestment after the change in leadership in 1994.

More recently, Arnelle helped bring about a redesign of the 22-campus system and was instrumental in the merger between Penn State and the Dickinson School of Law and the merger of the Geisinger Foundation and Penn State's Hershey Medical Center's clinical enterprises to form the Penn State Geisinger Health System, both of which take effect July 1.

A 1955 graduate of Penn State in political science, Arnelle was both an All-American in basketball and All-American honorable mention in football. He graduated from The Dickinson School of Law in 1962 and recently received an honorary doctorate of law from Dickinson. He served in the Peace Corps in Turkey, India and Washington D.C. and was later admitted to practice before the U.S. Supreme Court and the Pennsylvania and California Supreme Courts.

Architects named for University's athletic facilities projects

As part of the five-year capital spending program announced on May 13, the University is moving ahead with the development of several construction projects for intercollegiate athletics this year that will be paid for with University funds and private gifts.

In order to ensure that these projects are completed in a time frame consistent with athletic needs, the Board of Trustees on May 16 approved the appointment of architects who will design and oversee the projects.

"Intercollegiate Athletics recently completed a master plan to identify deficiencies in their competition facilities and identified three areas of need—the indoor track, the Louis E. Lasch Football Building and the locker facilities for other sports," said **Gary Schultz**, senior vice president for finance and business/treasurer.

The existing indoor track, in the Greenberg Indoor Sports Complex fieldhouse, does not meet the standard for NCAA tournament competition and the structure would require a substantial investment to stabilize it and correct an existing liability caused by sliding snow.

The new facility to be located near the outdoor track on Porter Road will have at least a 220-meter track with spectator seating and amenities. It also will have support spaces such as locker rooms, a training room, a weight training room and storage and will serve both the new indoor and the existing outdoor tracks.

The existing fieldhouse of the Greenberg Indoor Sports Complex will be demolished to make way for the new Louis E. Lasch Football Building to be located adjacent to the outdoor practice fields and close to Holuba Hall. The building will include locker facilities, equipment room, coaches' offices, a training and rehab area, meeting rooms, academic support areas, a team lounge, video rooms and storage. Additional parking will be provided at both the north and south sides of the new facility.

Part of the remaining Greenberg Indoor Sports Complex will be renovated with the new construction

Changes coming

The fieldhouse of the Greenberg Indoor Sports Complex on the University Park campus is going to be torn down to make way for the new Louis E. Lasch Football Building, which will be adjacent to the outdoor practice fields and close to Holuba Hall.

Photo: Greg Gienio

tion and a new public entrance for visitors will be located on the south side of the building.

The existing Lasch Building, formerly called East Area Locker Room, will be renovated to provide a multi-sport activity building and include locker rooms, a weight training room, training and rehab rooms, academic support areas, equipment storage and an athlete's lounge for several women's and men's sports.

This renovation will not only meet the needs of several sports, it will aid in meeting gender equity issues required by Title IX.

The board approved the appointment of Hoffman-Popovich of Boalsburg and NBBJ of Columbus, Ohio, to design and oversee construction for the indoor track, and L.D. Astorino from Pittsburgh and HOK from Kansas City, Mo., to design and oversee construction of the new and renovated football training facilities.

The board also approved the appointment of Susan Maxman Architects of Philadelphia to design and oversee construction of two residence halls at the Berks Campus, which also are part of the 1997-98 Capital plan and will be constructed with University funds.

From the Trustees Docket

Penn State-Dickinson merger is progressing on schedule

Penn State's merger with The Dickinson School of Law is on track and expected to begin as scheduled on July 1. On that date, the law school will officially be known as The Dickinson School of Law of the Pennsylvania State University, its employees will be on Penn State's payroll and the transition period in the governance of the law school will begin.

John Brighton, executive vice president and provost, told the Board of Trustees May 16 that the University has identified at least 36 different functional areas for integration with Dickinson and that a high-speed communications link between the two institutions will be installed in early June.

"Dickinson will then have full data capacity to integrate with Penn State's administrative computer systems," Brighton said. "We believe that by next year, the registration, billing, student aid and admissions systems will be up and running at Dickinson."

On Jan. 17, nearly 30 years after the possibility of an alliance was first considered, Penn State's Board of Trustees voted unanimously to approve a merger with the 163-year old law school. The law school's board had previously approved the merger, and so the vote of Penn State's trustees was the final action needed.

During a three-year transition period that begins July 1, Dickinson's board of trustees will be augmented by the addition of **H. Jesse Arnette**, president of Penn State's board, and two senior Penn State administrators. During the first stage of the merger, this augmented board will oversee Dickinson's operations. After the merger is complete, it will become an advisory board.

Brighton said that **Peter Glenn**, dean of the law school, is a "tremendous leader," and that Penn State is delighted with the intensity of the cooperative efforts between Penn State and Dickinson.

Brighton also updated the board on other on-

Name change coming

When the merger between The Dickinson School of Law and Penn State becomes official on July 1, the law school will be known as The Dickinson School of Law of the Pennsylvania State University.

going University activities, including those of the University Planning Council, the Center for Quality Improvement, the Schreyer Institute for Innovation in Learning, the Leonhard Center for the Enhancement of Engineering Education, the IDP Center for Excellence in Learning and Teaching and the University Faculty Senate's Special Committee on General Education. He also reviewed issues related to faculty promotion and tenure.

Trustees approve property purchases for 'protection zones' at University Park airport

The Board of Trustees on May 16 approved the Federal Aviation Administration's (FAA) plan to purchase five properties near the University Park Airport. The purchases are funded principally by the FAA.

The plan creates the necessary "runway protection zones" around the airport and also helps protect its close neighbors in line with the runway from excessive noise and other annoyances associated with arriving and departing planes.

The board also approved a lease that will allow the construction of a large aircraft hangar and office space for an aviation business relocating to the airport. It will include an aircraft charter service, a corporate jet aircraft refurbishing service, a jet aircraft maintenance service and a flight school.

Robert C. Finley, assistant to the associate senior vice president for business and finance, told the board that the University's purpose in purchasing the properties is twofold. The first is to ensure sufficient unobstructed airspace exists around the airport for approaches and takeoffs by aircraft, and the second is to ensure that compatible land uses — such as light industrial development — are closest to the airport.

"The airport wants to be the best good neighbor it can be," Finley said. "With these properties becoming available, we have an opportunity to do this right, and that's what we're going to do."

The property purchases are in accordance with the airport's master plan, which includes a main runway extension project begun last fall. The extension project is part of a long-range improvement plan designed to meet the existing and growing demand for air service to and from central Pennsylvania.

The airport serves as a gateway for Penn State and other major employers in the region. With nearly 200,000 passengers a year, it is the seventh busiest airport out of 16 scheduled service airports in the Commonwealth.

Consistent with FAA requirements, all purchase prices have been approved by the FAA. The project is funded 90 percent by the FAA, 5 percent by the Pennsylvania Department of Transportation and 5 percent from the passenger facilities charge that airline passengers pay when they buy an airline ticket.

The airport's \$18 million runway extension project includes the lengthening of the runway from its current 5,000 feet to an ultimate length of 6,700 feet, as well as other supporting infrastructure improvements.

The airport hosts 54,000 takeoffs and landings a year. Three airlines using the airport have nearly 40 regularly scheduled daily flights to and from Philadelphia, Pittsburgh, Washington, D.C., and Detroit.

In addition to serving area businesses and travelers, the airport is home to many aviation-related services. It is used by various law enforcement agencies, emergency medical services and air freight carriers. It also will be home to the Pennsylvania Air National Guard 12th Air Traffic Control Flight sometime in late 1998.

The airport tenants and visitors to the University Park Airport generate significant economic benefits on an annual basis, providing approximately 139 jobs and \$12 million in payroll. Also, a recent report estimated the impact of direct spending and secondary visitor-related spending at \$68 million.

Four new trustees are elected to board

Alumni and delegates of agricultural and industrial societies elected four new members and re-elected three incumbents to serve on the Board of Trustees in elections held May 15 at the University Park campus. All will serve a three-year term beginning July 1.

Joining the board as new members elected by the alumni are **David R. Jones**, 1954 graduate, assistant managing editor of *The New York Times*, and **Anne Riley**, 1964 and 1975 graduate, teacher at State College Area High School.

Re-elected to the board by the alumni is **Ben Novak**, 1965 graduate, senior partner and founder in the law firm of Novak, Stover & Furst, State College, and a trustee since 1988. **Marian U. Copper-smith**, also an alumni trustee incumbent, chose not to seek re-election.

Joining the board as a new member elected by the agricultural society delegates is **Carl T. Shaffer**, vice president of the Pennsylvania Farm Bureau board of directors.

Re-elected by the agricultural societies' delegates is **Obie Snider**, 1950 graduate, owner of Singing Brook Farms, Bedford, and a trustee since 1979.

Joining the board as a new member elected by the industrial societies' delegates is **Ira M. Lubert**, 1973 graduate, managing director of Technology Leaders L.P., Wayne.

Re-elected by the industrial society delegates is **Edward R. Hintz**, 1959 graduate, president of Hintz, Holman and Hecksher, Inc., of New York City and a trustee since 1994.

From the Trustees Docket

Panel combats alcohol, tobacco and drug abuse

Maureen Gaffney, chair of the Commission for the Prevention of Alcohol, Tobacco and Other Drug Abuse, told the Board of Trustees on May 16 that collaboration will play an important role in further reducing student substance abuse and called for University leadership to use its influence in addressing the problem.

Gaffney, campus health services and counseling director at Penn State Hazleton, and fellow commission members Susan Kennedy, associate director of University Health Services, and Judith Vicary, associate professor of biobehavioral health, reviewed the commission's 1996-97 activities for the trustees.

"Collaboration and leadership across the University will help us formulate initiatives that foster an academic and work environment that values healthy lifestyle choices," said Gaffney.

In his State of the University Address this year, President Graham B. Spanier identified alcohol-related behaviors among the most serious problems facing higher education.

The commission is an interdisciplinary advisory group that consists of faculty, staff, student and community representatives from all campus locations. Its goals are to increase the commitment from University leaders; decrease the number of stu-

Testifying

President Graham B. Spanier testified recently at a Pennsylvania Liquor Control Board hearing at the Penn State Conference Center Hotel. The PLCB's board of senators questioned Spanier about alcohol use at Penn State and what the town and the University are doing to monitor underage drinking.

Photo: Greg Grieco

dents experiencing problems related to alcohol, tobacco and other drug use; decrease student use of these substances and increase faculty, staff, student, alumni and community involvement.

This winter, the commission sent a Core Alcohol and Drug Survey to all faculty and staff at all campus locations and a series of regional meetings and presentations were

held throughout the Commonwealth Educational System.

The commission collaborated with various departments and organizations both on campus and off to coordinate the communication and implementation of intervention efforts. A few commission members also joined the Greek Task Force, which is developing new alcohol policies for the Greek community.

Among its current projects is a freshman seminar on life skills and making healthy choices to be presented during Freshman Testing, Counseling and Advising Programs this summer. Other prevention programs include late-night activities at the HUB, a University Health Services Web site, anti-alcohol abuse messages on University scoreboards at Beaver Stadium and The Bryce Jordan Center, and cooperation between the commission, the State College Tavern Owners and Downtown State College associations.

University efforts already are paying off. The percentage of undergraduates who binge on alcohol dropped at Penn State this year, according to a Penn State Pulse survey administered by the Student Affairs Office in February. The survey found that 43 percent of men and 46 percent of women had binged on alcohol, as opposed to 51 percent of men and 54 percent of women surveyed last year.

The University's efforts also are being recognized nationally. Gaffney reported the commission's three-year strategic plan has been identified as one of the best practices in alcohol abuse prevention and will be published as part of a 1997 national resource book, *Promising Practices: Campus Alcohol Strategies*.

Technology transforms traditional classrooms and learning

Faculty and students are moving beyond their traditional classroom roles and exploring active and collaborative approaches to learning in classrooms without walls.

On May 16, John Harwood, director of Education Technology Services, gave the Board of Trustees an overview of how faculty and students are using information technology to strengthen teaching and learning.

Drawing on the University's computing resources and the World Wide Web, initiatives such as "Project Vision" at six Commonwealth Campuses are joining faculty, staff and information resources from across the globe to create effective communities of teachers and students.

Project Vision students at Penn State Altoona, Berks, Delaware County, McKeesport, York and Mont Alto communicate with one another by laptop computers. Faculty report having better and more interaction with their residential and distance Project Vision students and say that technology has enabled them to change the focus of their classes from lectures to learning.

At University Park, Paul Sokol's Physics 201 class meets not in a lecture hall, but a computer lab where students working in groups of three use computer simulations to learn the principles of inertia and motion — learning physics by doing physics.

Faculty are transforming themselves from lecturers

"Technology has already had significant impact on both graduate and undergraduate education, changing the way students and faculty interact with each other and with the course material."

John Harwood, director
Education Technology Services

bound in physical space to mentors encouraging student collaboration in cyberspace. Students play a more active role in seeking information and evaluating possible solutions instead of memorizing facts and figures.

"Technology is the great enabler, but behind the technology lies the vision and the will to change," Harwood said. "Technology has already had significant impact on both graduate and undergraduate education, changing the way students and faculty interact with each other and with the course material."

A few examples:

■ An estimated 98 percent of Penn State students use e-mail. While faculty still hold office hours, technology has significantly extended their availability to students.

■ About 5,000 students participated in news or bulletin board discussion groups on course topics while another 2,000 students in the Commonwealth Educational System are using computer conferencing to exchange ideas from a distance.

■ Faculty at all Penn State locations are enriching their courses with Web images, sound, movie clips, data and simulations. Alistair Fraser, professor of meteorology, uses the Web to teach numerical models for predicting climate change; Lyle Long, associate professor of aeronautical engineering, uses it to demonstrate concepts of flight; and Mary Ann Lyman-Hager, director of instructional technology, uses it to teach French.

According to a November 1996 survey by the Office of Student Affairs, 54 percent of student respondents said the use of computers in Penn State classes should be increased — 85 percent thought that computing would either be very important or extremely important to their post-graduate careers.

Harwood predicted that within five years students will take entire courses electronically, with most dimensional courses including a significant electronic residence: electronic textbooks. Web tutoring, Web display of student projects.

In a virtual future where classrooms don't necessarily have walls, Penn State and other members of the Big Ten Consortium for Institutional Cooperation will likely exchange students and courses.

From the Trustee Docket

Undergraduate and graduate programs see some changes

On May 16, the Board of Trustees took the following action on graduate and undergraduate programs. For more detail or an explanation of these changes, please visit the *Intercom* Online at <http://www.psu.edu/ur/INTERCOM/Home.html>.

■ Undergraduate Programs:

College of Agricultural Sciences

Agricultural business major: Addition of new options: food option and horticulture option. The options will be available at both the University Park and Berks campuses. For the food science option, 36 credits are required; for the horticulture option, 33 credits are required.

College of Earth and Mineral Sciences

Major in materials science and engineering: There will be a change in the name from "option in polymer science" to "option in polymer science and engineering." Students will have a choice of two "study tracks." The first will emphasize the traditional science and engineering part of the subject. The second study track will emphasize polymer engineering and related technologies. Although the hands-on experience is not offered at the University Park campus, students will obtain this experience through an agreement with the Pennsylvania College of Technology.

College of Engineering

Major in architectural engineering: Changes in options available. The environmental option will be dropped; and new options known as a lighting/electrical option and a mechanical option will be offered. Both options will require 42 credits.

Strategies

Continued from page 1

The Budget Strategies Committee of the University Planning Council, which was established in 1995 to strengthen Penn State's planning and budget process and guide its academic mission, has been studying Penn State data and data from other Big Ten universities to develop new budget strategies in light of the fiscal challenges projected for the next five years.

"Cost centers as the basis of budgeting and differential tuition are two strategies that show promise," Schultz said.

In academic cost centers, a direct relationship is established between available funds and income generated. The Milton S. Hershey Medical Center and the Pennsylvania College of Technology already operate as separate cost centers and the Commonwealth Educational System has been operating on a modified cost center basis since 1984.

The University Planning Council has endorsed and the president has approved the idea of associating income more directly with academic program activity as practiced in the CES approach. "Cost centers will begin to operate in the 1997-98 fiscal year for the following locations: University Park, Commonwealth College, Erie, Harrisburg, Schuylkill, Abington, Altoona, Berks/Lehigh Valley and Great Valley," Schultz said.

A group working on differential tuition has been looking at further differentiating the University's tuition structure, considering additional course fees for more costly programs and examining differential tuition policies used by peer institutions.

Penn State currently has different tuition rates for University Park and CES locations, undergraduate

College of Health and Human Development

Major in human development and family studies: Changes in options available. The name of the "adult development and aging" option will change to the "adult development and aging services option;" the child and youth services option will change to "children, youth and family services option;" the family services option will be dropped.

■ Graduate Programs:

College of Health and Human Development: There is a change in the master of science degree program in nursing.

The National Organization of Nurse Practitioner Faculty established new guidelines and program standards for nurse practitioner education. To meet the new national guidelines, the School of Nursing reorganized and renumbered the family nurse practitioner support and specialty courses to clarify that the contact and experiences in this track are different from the neonatal nurse practitioner track. In addition, there is a change from six tracks in the programs to four tracks.

College of Engineering: New program offered to earn master of engineering degree in architectural engineering.

Penn State Harrisburg, Capital College: Will offer a master of science degree program in computer science.

College of Medicine: Proposed establishment of the Department of Health Evaluation Sciences.

and graduate programs and resident and non-resident students. It also has tuition surcharges for upper division and graduate students in specific areas such as engineering and related programs.

Providing background on instructional costs, John A. Brighton, executive vice president and provost, explained to the board how costs vary by student level and academic program.

"In higher education, instructional costs are measured on a per-student basis and are determined by who teaches the classes, how many students they teach and what subjects they are teaching. A small section of advanced students taught by a senior professor in a laboratory or clinical setting is more expensive than a lower division lecture taught by a junior faculty member in a large classroom," Brighton said.

At all Penn State locations, the average class size decreases from lower division to upper division and graduate courses. Instructional costs also vary by program relating to such factors as accreditation standards, the need for expensive laboratory equipment and supervision requirements for clinical experiences.

"We believe that students at a public, land-grant university such as Penn State should have the opportunity to explore different majors. As such, we want to minimize any tuition differentials that may affect student's academic choices," said Brighton. "At the same time, we recognize that there are differences in instructional costs and have concluded that Penn State should further differentiate its tuition rate schedule."

The Board of Trustees will consider a recommendation on differential tuition to be implemented over several years at its next meeting, July 13.

Promotions

Staff

Elaine D. Holland, staff assistant VII at The Hershey Medical Center.

Harold J. Horton, manager, Instructional Technology Services in Continuing and Distance Education.

H. C. Hosterman, assistant director for budget in Office of Budget and Resource Analysis.

Kathryn E. Kensinger, staff assistant VII in College of Health and Human Development.

Susan M. Kunkle, assistant coordinator, research funds in Research and Graduate School.

Doris J. Lineweaver, administrative assistant I at The Hershey Medical Center.

Joy L. Lose, staff assistant VIII in College of Health and Human Development.

Lisa A. McCully, projects specialist at The Hershey Medical Center.

Marc E. McMullin, assistant director, Alumni Relations in College of the Liberal Arts.

Gail D. Miller, staff assistant VI in Business Services.

Patricia M. Moore, staff assistant VI at Penn State Erie, Behrend College.

Glenda I. Newfield, staff assistant V in Business Services.

Susan Nyman, staff assistant VI in College of Agricultural Sciences.

Sara L. Peterson, human resources aide II in College of Earth and Mineral Sciences.

Pamela M. Pettit, staff assistant VI at The Hershey Medical Center.

Melissa A. Price, staff assistant VI in College of the Liberal Arts.

Shelley E. Readel, proposal and grant aide at Penn State Erie, Behrend College.

Diane L. Resides, assistant director in Student Affairs.

Sandra L. Robbins, admissions counselor II at Penn State Harrisburg, Capital College.

Jolene K. Sawyer, coordinator, echocardiography laboratory at The Hershey Medical Center.

Wanda G. Scalfie, staff assistant V in Office of Human Resources.

Raymond F. Scheetz, research support assistant at The Hershey Medical Center.

Cynthia S. Seagrath, assistant extension agent in College of Agricultural Sciences.

Eric L. Umberhook, senior system programmer in Computer and Information Systems-Center for Academic Computing.

Karen L. Wagner, science and research information officer in University Relations.

William R. Wallace, cinematographer/videoographer II in Continuing and Distance Education.

Stacey W. Wance, engineering aide in Applied Research Laboratory.

Matthew W. Weber, assistant director, Medical Center Billing Services at The Hershey Medical Center.

Kimberly S. Winick, information technology associate in Computer and Information Systems-Center for Academic Computing.

Technical Service

Diana D. Behney, environmental health worker-group leader at The Hershey Medical Center.

Larry J. Johns, maintenance worker-general in Housing and Food Services.

Matthew A. Smith, mechanic A at Penn State Erie, Behrend College.

LECTURES

Gov. Ridge to speak at ICDE world conference

Pennsylvania Gov. **Tom Ridge** will welcome educators and professionals from around the world to the 18th World Conference of the International Council for Open and Distance Education (ICDE) hosted by Penn State from June 2 to 6.

All conference plenary sessions will be held at The Bryce Jordan Center, with concurrent sessions at the Penn State Conference Center Hotel and the Nittany Lion Inn.

The governor will speak at 9:15 a.m. Monday, June 2, during opening ceremonies for the conference "The New Learning Environment: A Global Perspective." Five featured speakers and more than 700 educators and professionals from 60 nations will present their research and participate in discussions throughout the conference.

President **Graham B. Spanier** also will take part. He will discuss "Partnerships and the Evolution of the World Campus" on June 5.

In addition to Ridge and Spanier, conference participants include:

— **Nicholas Negroponte**, founder and head of the Media Lab-

oratory at Massachusetts Institute of Technology and author of *Being Digital*, who will discuss "The Changing Technological Environment" on June 2.

— **Barry Munitz**, chancellor of the California State University, who will speak on "The New Educational Paradigm" on June 3.

— **Maris O'Rourke**, acting head of the Education Sector of the World Bank, who will talk about "Technology, Education and Sustainable Development" on June 4.

— **Edith Cresson**, member of the European Commission, will address "Opportunities for International Cooperation" on June 5.

A technology exhibition coordinated by Applied Business Telecommunications also will be presented in conjunction with the conference.

For more information about the conference, visit the Web site at <http://www.cde.psu.edu/ICDE/brochure>; or contact **Anne Stevens** at (814) 865-2143.

"Landscapes of Mystery" conference set for June 20-22

Oscar nominee **Donald Westlake**, who has been called the "champion of crime horror," is coming to Penn State's "Landscapes of Mystery" conference, June 20-22, on the University Park campus. The conference is geared toward mystery readers, writers and aspiring writers.

Westlake has written dozens of novels, stories and screenplays, including *The Grifters*, which was nominated for an Academy Award for Best Screenplay in 1991. He is president of the Mystery Writers of America, which in 1993 named him Grand Master, its highest honor. More than 50 million copies of Westlake's books are in print worldwide. Some appear under his pseudonyms — **Richard Stark**, **Jucker**, **Go**, **Timothy J. Culver** and **Curt Clark**.

At Penn State, the prolific author will participate in readings and discussions, including a panel discussion titled "Murderously Funny." He also will sign copies of his books, including *The Ax*, a novel about the deadly consequences of corporate downsizing, to be published in June.

Also on the agenda:

— "The 10 Greatest Serial Murder Stories Ever Written," presented by **Philip Jenkins**, history professor and author of numerous popular culture studies;

— "Real Life Arson Investigation," with **Shelly Reuben**, a mystery writer and arson investigator;

— "The Scene of the Crime — Regional Mystery Fiction," with **George Demko**, a geography professor at Dartmouth College and Alumni Fellow of the College of Earth and Mineral Sciences;

— "Convincing the Reader to Buy Your Book," with **Kate Stite**, editor-in-chief of the *Armchair Detective*, the premiere journal for mystery readers and scholars; literary agent **Stuart Krichewsky**; and mystery reviewer **Molly Weston**.

— "Collecting First Editions," with **Dale Carter**, California State University professor of Spanish and founder of Latin Blood Books, and **Jeannette Bragger**, a Penn State professor of French and a first-edition mystery collector.

For registration information, call (800) PSU-TODAY.

Business lecture series continues

Carolyn R. Dexter, professor of management, is the featured presenter at the next installment of the Current Issues in Business lecture series sponsored by the Penn State Harrisburg School of Business Administration.

Dexter's noon presentation June 10 at the Penn State Harrisburg Eastgate Center will focus on "The Role of

Social Ties in Corporate Competitive Strategy."

In her talk, Dexter will focus on the characteristics of an effective corporate strategy and the process by which a competitive strategy is formulated and maintained.

The presentation at the Eastgate Center, 101 N. Seventh St., Harrisburg, is free. To register, call (717) 772-3590.

Postsecondary education conference set for June 9-11

A conference to build an agenda between the United States and Australia designed to involve postsecondary education in economic development is slated for June 9-11 on the University Park campus.

The "Conference on Strengthening Postsecondary Education's Contribution to Economic Development" will provide an opportunity for the exchange of ideas and collaboration between educa-

tional professionals and key stakeholders in the process of economic development at the state and national levels.

Sponsored by the Australia-New Zealand Studies Center and the Center for the Study of Higher Education, along with a number of Australian and American institutions, the event will feature high-level Australian and North American university

administrators, as well as experts in technology transfer, university-private sector collaboration, employer-labor relationships, and learning-work linkages.

The conference fee is \$280. To register, call (800) 778-8632. For more information, contact **Pat Corbett** at (814) 863-1603 or by e-mail at pac9@psu.edu.

News in Brief

Health Matters Programs

To register for these programs, contact **Jan Hawbaker** at (814) 865-3085 or jgh3@psu.edu.

Weight Watchers AT WORK

Section one will meet from noon to 1 p.m. Tuesdays, June 10-Aug. 12 in 101 Electrical Engineering East Building (with the following exceptions: the June 17 session will meet in 132 EEE and the July 8 session will meet in 201 EE West). Section two will meet Wednesdays, June 11-Aug. 13 in the Paul Robeson Cultural Center auditorium. Cost: \$115 (lifetime members, \$105). Members of the HealthAmerica

HMO may be reimbursed.

Yoga Series

Three seven-week sessions are still open; each meets from noon-1 p.m. Cost is \$35 per session, reimbursable to HMO participants taking the series for the first time.

Section SU2: Tuesdays, July 22-Sept. 2, 110 (Living Center) Henderson Building

Section SU3: Wednesdays, June 11-July 23, 133F Johnston Commons

Section SU4: Wednesdays, July 30-Sept. 10, 133F Johnston Commons

Traffic alert

University Drive will be closed from Nimitz Avenue (first cross street south of Atherton Street) to South Atherton Street until about Aug. 22. People needing to access Atherton Street (Business Route 322) from campus should use Atherton on the west, Allen or Pugh streets to the south and the bypass (US 322) to the east.

During this time, University Drive will be reconstructed. State College Borough has made special provisions for anyone who lives on University Drive to reach their residence.

Faculty/Staff Alerts

National Cancer Survivors Day

Hershey will join with more than 650 communities throughout the United States on Sunday, June 1, in celebration of life as part of the 10th annual National Cancer Survivors Day, the world's largest cancer survivor event.

The Central Pennsylvania Oncology Group and the Penn State University Cancer Center at The Hershey Medical Center will host the local survivors day event on the front lawn of the medical center from 1 to 4 p.m.

For more information, contact The Central Pennsylvania Oncology Group at (717) 531-8341.

Shaver's Creek activities

Shaver's Creek Environmental Center has several activities planned in June:

■ On Saturday, June 7, join Shaver's Creek's Insect Walk from 1 to 3 p.m. Admission is \$4 for nonmembers and \$3 for members.

■ On Sunday, June 8, from 2 to 3:30 p.m., children ages 8 and above can discover interesting ideas to occupy their active bodies and minds with the New Games program. Admission is \$5 for nonmembers and \$4 for members. Children ages 8 to 12 are admitted for \$2.50.

■ On Saturday, June 14, from 10 a.m. to 1 p.m., Local artist **Denise Wagner** will lead participants on a multimedia tour of the life and habits of the bobcat. Admission is \$2.50 for nonmembers, free for members.

■ Take a walk with classic nature writers on Saturday, June 21, from 1 to 3 p.m. to learn the fundamentals of nature writing. Admission is \$6 for nonmembers and \$5 for members.

Preregister for each of these programs by calling Shaver's Creek Environmental Center at (814) 863-2000 or (814) 667-3424.

Town/gown relations focus of president's radio call-in program

The relationship between Penn State and surrounding communities is the topic of the next edition of "To the Best of My Knowledge," President **Graham B. Spanier's** monthly call-in program on WPSU-FM (90.1, 91.5 and 106.7), airing at 7 p.m. Tuesday, June 10.

Despite the fact that Penn State contributes greatly to the Centre Region's quality of life and economic expansion, many are demanding that the University do more. Listeners with opinions about Penn State's proper role in the community are invited to join Spanier and his guests, **Bill Welch**, mayor of State College, and local businessman and University trustee **Marian Coppersmith Fredman**, by calling (800) 543-8242 during the hour-long program.

Internet users will be able to link to sound and pictures from the program at www.psu.edu/ur/tech/tech.html; and they will be able to submit questions and comments via e-mail to response@psu.edu.

Hosted by **Patty Satalia**, "To the Best of My Knowledge" is a series designed to explore topics of concern to higher education and to allow listeners a chance to communicate directly with Penn State's president.

Library schedule

University Libraries at University Park will operate on summer session hours, June 11 through Aug. 9. All libraries will be closed on Friday, July 4.

For information on hours of library service, call (814) 865-3063, type **HELP HOURS** when using the Library Information Access System (LIAS) or visit the Libraries' World Wide Web home page at <http://www.libraries.psu.edu/>.

Upcoming HRDC courses

To register for these or other Human Resource Development Center programs, complete the registration form found in the back of the Spring/Summer HRDC catalog, and fax to (814) 865-3522.

■ **Negotiate for Win-Win Outcomes, COM 011**
 Learn the techniques for planning and conducting effective negotiations. June 13 and 20, 8:15 a.m. to noon, 319 Rider Building. Cost: \$55.

■ **From Frazzled to Focused: Positive and Productive Telephone Skills, COM 045**
 June 18 and 25, 1:30-4:30 p.m., 319 Rider Building. Cost: \$55.

■ **Designing Effective Computer-Based Presentations, COM 009**
 June 18, 10 a.m. to noon, 141 Computer Building. Cost: \$35.

■ **Managing and Organizing Your Electronic Files, PRO 002**

Improve your Windows-based filing systems and enhance your information management skills. June 23, 10 a.m. to noon, 116 Wagner Building. Cost: \$35.

■ **Program/Project Management, PRO 032**
 Manage complex technical projects and explore the requirements, risks and constraints imposed by various contract documents. June 26, 9 a.m. to 4 p.m., 319 Rider Building. Cost: \$70.

■ **Adapting Work Processes to Manage Change, LDR 058**

June 27, 1:30-3:30 p.m., 319 Rider Building. Cost: \$25.

■ **Successful Cross-Cultural Communications II, COM 025**

June 27, 8:30 a.m. to noon, 319 Rider Building. Cost: \$35.

How'd we do?

The Office of Human Resources has once again set up an easy-to-respond-to electronic survey that will assess the annual Staff Review and Development Plan in which employees recently participated. The survey is expected to point out the program's strengths and determine what steps might be taken to modify or improve the process for the future.

In an effort to reduce survey costs and to make it easier for participants to respond, an electronic format is being used. The assessment form is available on the Office of Human Resources' World Wide Web page at [URL www.ohr.psu.edu](http://www.ohr.psu.edu). From the OHR home page, click "Documents." Under the "Staff Review and Development Survey" heading click "Staff Review and Development Survey." The format allows the survey to be electronically returned and if accessed and responded to through the Web site, the response will be anonymous. Instructions for completing and returning the form are provided.

If some faculty and staff members are uncomfortable responding electronically, the survey may be printed and mailed to the Office of Human Resources, Box 6, Rider Building, University Park. Faculty and staff members who do not have access to the Web survey format, may obtain a copy of the survey through Human Resources representatives and directors of Business Services. Responses should be returned to OHR by the end of June.

You deserve your own copy

Are you receiving too many *Intercoms* or do you have to wait your turn to read the latest Penn State happenings? If you fall into one of these two scenarios, please contact your building's mailroom to have your office's distribution numbers changed.

If the distribution needs to be changed for the entire building, please ask the mailroom personnel to contact **Chris Koleno** of the *Intercom* by phone at (814) 865-7517 or e-mail at cfk3@psu.edu.

Construction Web site

With construction of the new Paterno Library addition to Pattee Library moving into high gear, it is now more important than ever to be aware of the day-to-day activities at the library.

To help you stay informed, the University Libraries have created the Paterno Library Web site at <http://www.libraries.psu.edu/pubinfo/construction/>. The site includes an overview of the project, including an artist's rendering of the completed building; a construction timetable indicating the schedule of work to be done through fall of 1999; and phase drawings showing which areas of the library will be under construction at different times throughout the project. The site is updated frequently. Also included are photos of the construction site, a list of frequently asked questions and "Ask MACC," which provides Web surfers the opportunity to e-mail questions and comments.

LIAS services expand

When working on a research project, you have ever wondered what particular library books you have checked out and if any of them are overdue? Now with the newest version of the Library Information Access System (LIAS), users can find out this and more through four new patron commands. Patrons can issue these commands from any LIAS terminal; up until now they have had to ask someone at a public service desk for this information. The new commands are:

■ **Patron summary (PS)** briefly summarizes circulation information for your user ID.

■ **Patron inquiry (PI)** provides itemized circulation information for your user ID.

■ **Patron overdue (PO)** provides itemized information about overdue items currently charged out on your user ID.

■ **Patron fee (PF)** provides itemized information for each item on which you have incurred a fee that is still outstanding.

For general information about these and all other patron commands, type: **help patron**. For security, when you are done using LIAS, you should press [ENTER] twice to clear your circulation inquiries.

New Web site

The Office of Human Resources' Work/Life Programs has a new Web site that provides information on a multitude of issues including child care, elder care and statewide community links for areas surrounding all Penn State locations.

The site, which will be continually updated, is located at <http://www.ohr.psu.edu/worklife/default.htm>. If there are any important Web sites for your community not listed at this site, e-mail the URL to caf333@psu.edu with a brief description.

Bird's eye view

Work has begun on the new Sami Tennis Facility, being built on the former site of the chicken coops on Bigler Road at University Park. This photo was taken from the diving platform of the outdoor pool, located next to the construction site.

Pennsylvania Transportation Institute earns \$1.2 million contract to work with PennDOT

The Pennsylvania Transportation Institute (PTI) on the University Park campus has won a four-year \$1.2 million contract to enter into a new partnership with the Pennsylvania Department of Transportation.

The agreement is a continuation of an existing multi-year, multi-million dollar partnership between PennDOT and the Mid-Atlantic Universities Transportation Center (MAUTC) at Penn State.

MAUTC is one of 14 centers in the nationwide effort initiated in 1987 by the U.S. Department of Transportation to address transportation-related issues and problems. Penn State serves as the lead university in the five-member MAUTC consortium, which also includes the University of Pennsylvania,

the University of Virginia, Virginia Polytechnic Institute and State University and West Virginia University.

According to James H. Miller, associate professor of business logistics, PTI research associate and MAUTC director, a key feature of the new partnership is that it will involve the current MAUTC universities as well as other colleges and universities in Pennsylvania, including Bucknell University, Lafayette College and Lincoln University.

"The main goal of this partnership is to give PennDOT access to the academic expertise and facilities available at Penn State and other Pennsylvania colleges and universities," Miller said. "These combined resources will help PennDOT as it addresses many of the pressing technical, economic and policy

issues that are an integral part of building and operating the Commonwealth's complex transportation system."

The original PennDOT/MAUTC partnership, initiated in 1993, has resulted in more than 39 research and technology transfer projects covering areas such as roadway design and safety, transportation planning, traffic safety and human factors analysis, environmental technical assistance, and transportation education and training. Miller said the new partnership will enable PennDOT and college- and university-affiliated faculty, staff and students to participate in an even broader range of research, education and technology transfer activities throughout Pennsylvania and the mid-Atlantic region.

End of fiscal year ordering reminder

University departments are reminded to use the following guidelines when placing end-of-year orders with the Microcomputer Order Center (MOC):

- University Park: GREQ orders must be received by the MOC by noon Friday, June 27, to ensure delivery and billing of in-stock items.
- Commonwealth locations — GREQ orders for in-stock items must be received by the MOC by end of business on Wednesday, June 25.
- Out-of-stock software and peripherals: average lead times are 2-4 weeks.
- Out-of-stock printers and systems: average lead times are 2-8 weeks.
- No GREQ can be billed in 96/97 and delivered after June 30. There are no exceptions.

■ If you want any backorders from your GREQ to remain in the queue for 97/98 you MUST type 'y' in the GREQ field "Authorize requisition to carry over to the new fiscal year." IBIS defaults this field to 'n'.

■ On July 1 all backorders not authorized to carry over to 97/98 will automatically be canceled by IBIS.

■ When calling for delivery information please have your IBIS document number ready. Also, please check to make sure the document has been processed by your entire approval path. The MOC does not see your order until it has reached our electronic desk.

Updated Web page

For the very latest in product and pricing information, visit the MOC Web page at <http://moc.cac.psu.edu>. The page has recently been updated to include a more comprehensive product information and additional price lists.

Information service has answers for seniors

A new service from the Penn State Gerontology Center in the College of Health and Human Development offers information of special interest to Central Pennsylvania's senior citizens and others interested in issues related to aging.

The new telephone service provides information on practical topics as diverse as reverse mortgages and sleep disorders among the elderly and can put seniors in touch with local support groups. The hotline is operated by volunteers in the center's Senior Volunteer Outreach Program who answer calls and provide referrals from 10 a.m. to 2 p.m. Tuesdays and Thursdays at (814) 863-4517. At other times, callers can leave a voice mail message and volunteers will gather information and respond.

The outreach center volunteers have developed a database on aging information to support the hotline. The data-

base includes both local and national information, including a directory of toll-free numbers for more than 190 health topics and 100 health-related support groups. The hotline also provides information about Penn State events and activities for senior citizens. All calls are confidential.

The program recently coordinated the publication of *A Senior Citizen's Guide to Campus Life*, designed to promote accessibility to campus life for seniors. The guide contains information about parking, transportation and special assistance on the University Park campus, as well as education, cultural and recreational activities. To receive a copy of the guide, call the hotline number.

Anyone interested in volunteering to answer the hotline on weekdays can call Susan Keller, assistant director for community outreach, at (814) 863-7903.

ARTS & ENTERTAINMENT

AT PENN STATE

On display

Susquehanna, Pennsylvania, a lithograph by W.W. Denslow, is part of the exhibit "Our Town: A Selection of Town Views from the Pennsylvania Prints," which will be on display at the Palmer Museum of Art on the University Park campus June 3 through Sept. 28.

Odyssey Through Literature

The roles of women in literature of different cultures will be the focus of this summer's series programs from the Odyssey Through Literature archives.

Host S. Leonard Rubinstein and his guests will discuss aspects of women's lives from medieval to modern times, from Western Europe to Africa and the Far East. Shows about medieval literature range from Iceland to France and Spain, with such guest as Carol Clover of the University of California at Berkeley and Ann Kettle of the University of St. Andrews in Scotland. Shows about Asian women include feminist scholar Daiyan Yue of the University of Beijing and Vietnamese poet **Nha Tang Moss**. The season is rounded out with a discussion of modern Mexican playwright **Sabina Berman** and the prose of East German women before the opening of the Wall.

The program "Mammywater," recorded in 1984, will begin the season on June 1. **Flora Nwapa**, the first woman writer of Nigeria, explains that she uses her writing to support Nigerian women who are breaking free of tradition.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WPSU, 91.5 FM from University Park and 106.7 FM in Altoona, and on WPSB, 90.1 in north-

ern Pennsylvania. A complete listing of the Odyssey archive, as well as the current schedule, can be found on the World Wide Web at <http://mickel.la.psu.edu/complit/odyssey/odyssey.htm>.

MetaStages

MetaStages, an outreach program of the College of Arts and Architecture's School of Theatre Arts, announces summer drama camps for children to be held at the Pavilion Theatre in late July and August. Young people receive training from professionals in acting, voice, movement, mime and production workshops as they rehearse and perform plays from various cultures. Camps culminate with an afternoon of performances.

The one-week camps meet from 10 a.m. to 4 p.m. daily, and are grouped by age from 9 to 18 years.

Camp dates are: July 28-Aug. 1; Aug. 4-8; Aug. 11-15 and Aug. 18-22.

Class size is small and strictly limited. For further information about the drama camps, or programs during the year for kindergarten through grade 12, contact **Joann Leonard**, MetaStages director, at (814) 867-8390.

Palmer exhibits

"Our Town: A Selection of Town Views from the Pennsylvania Prints" opens Tuesday, June 3, at the Palmer Museum of Art on the University Park campus and continues through Sept. 28. The exhibition

includes images from a collection of nearly 330 prints of Pennsylvania's places, prominent citizens and historic events. The Palmer Museum acquired the collection in 1986 from **John O'Connor** and **Ralph Yeager**, the owners of the Tavern Restaurant in State College. The engravings, aquatints, woodcuts and lithographs that make up the collection span nearly 150 years and depict all geographic regions of the state.

A second exhibition of Pennsylvania prints, "Making History: Historical Narratives in the Pennsylvania Prints," also will be on view at the Palmer Museum of Art from Tuesday, June 17, to Aug. 31. This exhibition explores the significant use of historical narratives in Pennsylvania prints and the important role historical events played in bolstering civic pride.

Center for the Performing Arts

The Center for the Performing Arts has announced its 1997-98 season, which includes 37 shows in 10 subscription series, with a wide range of offerings for any taste. To receive a free brochure, phone the Arts Ticket Center at (814) 863-0255. The newly announced season follows:

■ The season opens with "The Tale of Teeka" on Sept. 18. Presented by the Montreal-based company Les deux mondes, it is the simple story of a boy and his pet goose.

■ Saturday, Sept. 20, the ensemble Pomerium reviews the golden age of a capella singing.

■ Ballet Folklorico de Mexico, a company of 65 dancers and musicians, performs Sept. 23 at 8 p.m.

■ "Les Enfants Terribles" will be held at 8 p.m. Thursday, Sept. 25.

■ Jose Limon Dance Company performs at 8 p.m. Saturday, Oct. 4.

■ "An Ire-Ish Tale," Wood and Strings Puppet Theatre, 1 and 3 p.m., Sunday, Oct. 5.

■ "Carousel," 8 p.m. Thursday and Friday, Oct. 9 and 10.

■ The Stuttgart Philharmonic, one of Germany's most celebrated orchestras, performs Thursday, Oct. 16.

■ Moscow Conservatory Ensemble, 8 p.m. Saturday, Oct. 25.

■ "Sister Annies's Country Western Nunsense Jamboree" starring **Vicki Lawrence**, 8 p.m. Wednesday and Thursday, Oct. 29 and 30.

■ Paquito D'Rivera and the United Nations Orchestra, 8 p.m. Saturday, Nov. 1.

■ The Nettle Brothers, 8 p.m. Tuesday, Nov. 4.

■ Sydney Dance Company, 8 p.m. Thursday, Nov. 13.

■ Ondekoza, 8 p.m. Saturday, Nov. 15.

■ The Jazz Messengers, 8 p.m. Wednesday, Nov. 19.

■ "The Nutcracker," The Louisville Ballet, 8 p.m. Friday and 1 p.m. Saturday, Dec. 5 and 6.

■ "West Side Story," 8 p.m. Thurs-

BRYCE JORDAN CENTER

Trade show coming

The Bryce Jordan Center will be the site of "Preview '98," the second annual regional trade show, June 12-14. Tickets are \$3.50 for adults, with children 12 and under admitted free.

The show will feature more than 100 businesses from a wide variety of industries and will include demonstrations and exhibits of emerging technology and cutting-edge services.

For booth information, call (814) 863-1570.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu/>.

day and Friday, Jan. 15 and 16.

■ Hesperus, 8 p.m. Saturday, Jan. 17.

■ Harolyn Blackwell, soprano, 8 p.m. Saturday, Jan. 24.

■ "Sleeping Beauty," St. Petersburg Ice Ballet, 8 p.m. Sunday, Feb. 1.

■ "Peet Gynt," National Theatre of the Deaf, 8 p.m. Friday, Feb. 6.

■ Mingus Big Band, 8 p.m. Saturday, Feb. 7.

■ Street Sounds, 8 p.m. Saturday, Feb. 14.

■ "Damn Yankees," 8 p.m. Thursday and Friday, Feb. 19 and 20.

■ Metropolitan Opera National Council Winners, 8 p.m. Saturday, Feb. 21.

■ River City Brass Band, 8 p.m. Friday, Feb. 27.

■ Shakespeare's "Julius Caesar," 8 p.m. Saturday, Feb. 28.

■ "Aristophanes' "The Birds," 8 p.m. Monday, March 2.

■ American Indian Dance Theatre, 8 p.m. Thursday, March 5.

■ Cirque Ingeux, 8 p.m. Thursday, March 19.

■ Russian National Orchestra, 8 p.m. Saturday, March 21.

■ Lincoln Center Jazz Orchestra featuring Wynton Marsalis, 8 p.m. Wednesday, March 25.

■ American Repertory Ballet, 8 p.m. Friday, March 27.

■ "Where the Wild Things Are," American Repertory Ballet, 8 p.m. Saturday, March 28.

■ Hampton String Quartet, 8 p.m. Saturday, April 4.

■ "Daughter of the Regiment," New York City Opera National Company, 8 p.m. Monday, April 13.

■ Riders in the Sky, 1 and 3 p.m. Sunday, April 19; and

■ "The Goodbye Girl," 8 p.m. Thursday and Friday, April 30 and May 1.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Sunday, June 1

Odyssey Through Literature, 6:30 p.m., WPSU, 91.5 FM.

Wednesday, June 4

Pennsylvania Centre Stage, "You're a Good Man, Charlie Brown," 7:30 p.m., Pavilion Theatre, through June 21. For tickets, phone (814) 863-0255.

Wednesday, June 11

Summer Session eight-week classes begin.

Pennsylvania Centre Stage, "The Mousetrap," 8 p.m.

The Playhouse, through June 28. For tickets, phone (814) 863-0255.

Thursday, June 12

Music at Noon: Fisher Plaza, Tim and Elise Duo contemporary music.

Ice Skating "Diversions," 8 to 11 p.m., ice rink, \$1 with coupon, \$2.25 without, includes skates.

SEMINARS

Friday, May 30

Raoul Bino on "Cell Cycle Events During Seed Germination and its Consequences for Seedling Quality," 11 a.m., 105 Wartik.

CONFERENCES

Friday, May 30

American Regions Math League, residence halls and The Nittany Lion Inn, through May 31.

Monday, June 2

■ The 18th World Conference of the International Council for Open and Distance Education, through June 6.

Sunday, June 8

Specialty Mushroom Workshop, The Nittany Lion Inn, through June 9.

Monday, June 9

Mushroom Short Course, The Nittany Lion Inn, through June 11.

"Conference on Strengthening Postsecondary Education's Contribution to Economic Development," through June 11.

Wednesday, June 11

PA Rural Health/AHEC, The Nittany Lion Inn, through June 13.

EXHIBITS

HUB Art Alley Cases

Ceramic exhibit by Matthew Van Hom.

HUB Art Alley Panels

■ Asia-Southwest China exhibit featuring watercolor scrolls, through June 22.

HUB Browning Gallery

"A Love of Nature" by Marlee Erwin, through June 8.

HUB Hall Cases

Exhibition by the craft center summer instructors, through June 22.

Kern Panels

Photos by the State College Slide Club, through June 22.

Kern Tall Cases

Sculpture by Howard Lawrence, through June 22.

Palmer Museum of Art

"Recent Gifts and Acquisitions: Works on Paper," through June 8.

"Exotic Illusions: Art, Romance and the Marketplace," through June 15.

"Our Town: A Selection of Town Views from the Pennsylvania Trips," June 3 through September 28.

Zoller Gallery

Crafts National 31, June 1 through July 20.

■ Reflects an international perspective.

For a full listing of University Park activities, including sporting events, go to the Web at <http://cac.psu.edu/calendar/>

Annual ritual

Students Matt Cameron, left, and Audie Prey recently joined Kathy Shumac, garden manager, to plant new flowers for the test beds and vegetable gardens on the University Park campus. Many of the seeds are tested here first before being introduced to the public by the major seed producers.

Photo: Greg Grieco

University's academic, administrative computer systems now under one roof

The University broke with tradition last weekend.

While most University employees enjoyed a long Memorial Day weekend, some at University Park were working nearly around the clock to consolidate the academic and administrative computing centers under one roof with a single management team and a single operations staff. The two centers have traditionally been apart, with the academic unit housed in the Computer Building and the administrative unit in the basement of Shields Building. But at noon on Friday, May 23, all databases running on the administrative mainframe were shut down and backed up. Early on Saturday, May 24, the mainframe computer components were unplugged, packed up and moved from Shields Building to the Computer Building. The administrative computing system has been housed in Shields Building since it was moved from Old Main roughly 30 years ago.

This consolidation, will enable both the Center for Academic Computing (CAC) and the Office of

Administrative Systems (OAS) to automate many processes that were previously done manually. It also will produce an annual savings of \$380,000, which is being applied to the 3 percent goal for University-wide budget reduction.

The consolidation also provides other benefits:

■ Because both CAC and OAS prepared for consolidation by purchasing smaller, faster, higher-capacity computer components, the OAS system is now housed in a 300-square-foot space, instead of the 3,000-square-foot room it occupied in Shields Building. Once the newly available space is refurbished, OAS staff now housed in University Support Building II will join their co-workers in Shields Building.

■ Data storage has increased by 60 percent and computing power has increased by 15 percent.

■ Communication speeds to the administrative computers are being doubled, and within the next 18 months will be tripled.

Hershey earns continued program accreditation

The animal research program at The Hershey Medical Center was awarded continued full accreditation by the Association for Assessment and Accreditation of Laboratory Care International, in recognition of continuing responsible and humane treatment of laboratory animals. The medical center has participated in the voluntary accreditation program since December 1968.

The association is a private, nonprofit organization that promotes the humane treatment of animals in science and has accredited more than 600 institutions around the world. To earn accreditation, a research program undergoes a rigorous evaluation and must demonstrate continuously that it goes beyond the minimum requirements for the care and use of laboratory animals.

Baldridge Award for Education

Next week the U.S. House and Senate will conduct hearings on the appropriation of funds for the 1998 Malcolm Baldridge National Quality Award Program. They will consider a request to expand the Baldridge government/private industry partnership to education and health care. These hearings will be critical to the future of the Baldridge program and to the appropriated funds for the government's part of an expanded public/private partnership.

Quality Cup Award

Belmont University in Nashville, Tenn., is the education winner of the 1997 Rochester Institute of Technology/USA Today Quality Cup Competition. The competition recognizes teams who make significant contributions to the improvement of quality in their organizations.

In most universities, the segmented structure of university administration requires students to obtain a multitude of validations and signatures and make many trips across campus to complete even the most simple transaction. At Belmont, a team of individuals who deal directly with students in the areas of admissions, student affairs, financial aid and student accounts came up with a streamlined concept: a single storefront where a student could go to accomplish a variety of administrative tasks that previously had to be completed by bouncing back and forth between different offices across campus. That concept is now known as Belmont Central, a "one-stop shopping" office for business that students transact with the school.

Belmont's entry was one of nearly 300 received for this year's judging. Second place in the education division went to The Ohio State University.

For more information about Continuous Quality Improvement, contact Louise Sandmeyer, executive director of the Center for Quality and Planning, at (814) 863-8721, ls@psu.edu or see the center's Web site at <http://www.psu.edu/president/cqi>.

liberal arts departments merge

Gerhard F. Strasser, professor of German and comparative literature, has been appointed head of the newly established Department of Germanic and Slavic Languages. The department brings together faculty formerly in the departments of German and Slavic and East European languages.

The departmental restructuring is a result of the College of the Liberal Arts' five-year strategic planning process. The new unit was developed in response to predicted enrollment trends in foreign language study and to provide more cost-effective administrative and technology support for faculty and students in the unit.

"A basic principle of this restructuring is to improve the quality of the activities performed by the units involved and to allow them to benefit from efficiencies of scale in such administrative functions as course scheduling, job searches, curriculum planning and financial operations," said Susan Welch, dean of the college. "The larger faculty base of the combined units will permit all of the normal activities of the departments to be carried out more effectively and with some reduction of administrative costs."

None of the existing programs of the departments will be changed as a result of this merger. The existing graduate programs of the former Department of German will

continue, as will the joint M.A. program in Russian and comparative literature. No faculty or staff will be discharged as a result of this reorganization and all faculty tenure processes currently in place will continue. The new department will be located in Burrows Building on the University Park campus, which will become largely devoted to language and literature offices. The merger is effective July 1, following its recent approval by the University's Faculty Senate and the Board of Trustees.

Strasser, a member of the German and comparative literature departments since 1979, specializes in European literature of the Renaissance and Baroque periods, on the history of ideas in the 16th and 17th centuries, and in language pedagogy. He is the author of *Lingua Universalis: Kryptologie und Theorie der Universalien* (1986) and *17. Jahrhundert* (1988) and co-editor of *Johann Joachim Becher* (1635-1682) (1993).

In addition to contributions to books and scholarly articles, he has co-authored and co-edited numerous language textbooks and book reviews.

Before coming to Penn State, Strasser was on the faculty of Northwestern University. He received his doctorate in comparative literature from Brown University in 1974 and his undergraduate and master's degrees from Ludwig-Maximilians-Universität, Munich, Germany.

Applications sought for department head

The College of Agricultural Sciences is conducting a national search for the position of professor and head of the Department of Agricultural and Biological Engineering. The professor and head serves as departmental administrative officer and program leader and reports jointly to the dean of the College of Agricultural Sciences and the dean of the College of Engineering.

Duties include: leadership for the department in all three land-grant missions; administrative responsibility for personnel, financial matters and physical facilities; and leadership

and coordination of relations with producers, business, industry, government and the public. Candidates must possess a Ph.D. in agricultural and biological engineering or a closely related engineering discipline and have exceptional leadership and administrative abilities. Eligibility for tenured rank of full professor is required.

Additional information about the department can be found by visiting the Web at <http://engr.psu.edu/casdc.psu.edu/>.

Applicants should submit a statement outlining their qualifications and a complete resume documenting

teaching, research, extension, administrative and leadership experience. The name, address, phone, fax number and e-mail address for each of five references also should be submitted. Nominations of suitable candidates are invited. Send information to: Dennis J. Murphy, chair, Advisory Search Committee, The Pennsylvania State University, 221F Agricultural Engineering Building, University Park, Pa. 16802; phone: (814) 865-7157.

Applications will be accepted until Aug. 22, or until a suitable applicant has been identified.

Keystone 21 partnership seeks proposals

Keystone 21, a partnership between Cheyney University, Penn State's College of Agricultural Sciences and Commonwealth Educational System, and the Rodale Institute, is seeking project proposals and has established a public e-mail discussion list for people interested in the future of Pennsylvania's food system.

Keystone 21, one of 14 W.K. Kellogg Foundation projects across the nation that collectively form the Food Systems Professions Education Initiative, aims to meet challenges created by the rapid changes occurring in the food system.

Project organizers plan to fund proposals to develop and implement educational programs to prepare food system professionals for the 21st century. The group is looking for creative initiatives that emphasize collaboration. It is particularly interested in proposals that involve collaboration with one or more of the Keystone 21 partners and other organizations or institutions with an interest in food system issues.

Two types of competitive grants are available: a 12-month, nonrenewable mini-initiatives grant of \$7,500; and collaborative agreements, which have a maximum funding level of \$30,000 per year, not to exceed \$75,000 for three

years. The deadline for mini-initiative proposals is June 15, and the deadline for collaborative agreements is Aug. 15. Funding for mini-initiatives will begin on April 1. Funding for collaborative agreements will begin on Nov. 1.

For more information about the grants, write to Keystone 21 — The Pennsylvania Food System Professions Education Project, 130 Agricultural Administration Building, University Park, Pa. 16802; call (814) 865-0114; fax (814) 863-7277; or send e-mail to PAFSPE@psu.edu.

World Wide Web users can learn more from the project's Internet site: <http://www.cas.psu.edu/docs/CASPROF/keystone21/keystone21.htm>.

Participants in the new Keystone 21 e-mail list can informally discuss proposal ideas, food systems issues, collaboration opportunities and other concerns related to the project.

To subscribe to the listserv, send an e-mail message to keystone21@lists.cas.psu.edu. In the subject line of the address, type "Subscribe." Leave the body of the message blank. Within a few hours, you should receive a message confirming your subscription to the Keystone 21 discussion list.

■ Road Scholars Tour

On Monday, May 12, roughly 70 recently hired faculty members boarded a pair of buses with President **Graham B. Spanier** for a two-day tour of western Pennsylvania.

Stops were made to the Fayette, Beaver and Altoona campuses, as well as to Singing Brook Farm in Imbler, owned by Board of Trustee member **Obie Snyder**; Fallingwater, the national landmark designed by Frank Lloyd Wright; H.J. Heinz Food Co. in Pittsburgh; and Creekside Mushrooms Ltd. in Worthington. The group also enjoyed lunch with alumni and friends of the University on a riverboat tour of Pittsburgh.

The goal of the trip was to see first-hand the impact the University has statewide. Tour-goers received the added benefit of getting to know one another better as well.

To see more photos from the trip, visit the Web at <http://www.psu.edu/ur/INTERCOM/home.html>.

At the end of the visit to Creekside Mushrooms, the Road Scholars were given T-shirts — provided they donned them for a group picture in front of the tour bus. Roger Claypoole, general partner of this underground farm, is a Penn State alumus.

There are roughly 400 registered Holsteins at Board of Trustee member **Obie Snider's** Singing Brook Farm. Snider uses the technology of super ovulation and in vitro fertilization at his farm, which is dedicated to production of Holstein dairy cattle for selective breeding. He benefited from research conducted by John Almquist, professor emeritus of dairy physiology, who was a leader in the technology. One of the Sniders' 10 grandchildren, right, holds a young calf while a faculty member pets it. All of the Snider grandchildren have experience working on the farm.

President **Graham B. Spanier**, second from left, and other Road Scholars watch as two Creekside Mushroom workers weigh and arrange each tray of fresh-picked mushrooms.

Faculty took advantage of a lull in the busy schedule and got to know one another better on the deck of the *River Belle* during a riverboat tour of Pittsburgh. Unlike the first day of the tour, skies were clear and the sun was shining for the cruise.

Greg Grieco*

Theresa A. Balog, **Elouise Ross Eberly** professor of nursing and assistant professor of nursing/coordinator of nursing programs at Fayette Campus, explains the uses of a life-sized dummy and other items in the nursing clinical lab.

Everyone had to don hair nets, hats and protective glasses for the tour through the **H.J. Heinz Food Co.** manufacturing plant. Tour-goers had the opportunity to see chicken noodle soup and two kinds of baby food cooked, packaged and labeled.

Appointments

Shenango appoints head librarian

The Penn State Shenango campus of the Commonwealth College has hired **Becky Albitz** as its new head librarian.

A graduate of State College Area High School, Albitz received a bachelor of arts degree in film and English from the University of Rochester in Rochester, N.Y., a master's degree in film from Penn State and a master's degree in library science from the University of Pittsburgh.

Before coming to Penn State Shenango, Albitz was the media services librarian at the University of Iowa and, most recently, the performing arts and media librarian at New York University in New York City.

BECKY ALBITZ

Interim dean becomes associate vice president for outreach

Theodore R. Alter, interim dean in the College of Agricultural Sciences and professor of agricultural economics, has been named associate vice president for outreach, director of cooperative extension and associate dean in the college, effective July 1.

After earned a B.A. degree in economics with distinction from the University of Rochester. He received both his M.S. and Ph.D. in resource economics and policy from Michigan State University, where he also was a National Defense Education Act fellow. He joined the Penn State faculty as an assistant professor of agricultural economics in 1976. From 1989 to 1994, he served as regional director of the Southeast Region for Penn State Cooperative Extension, providing administrative and program leadership for the nine-county region. He was appointed head of the department of agricultural economics and rural sociology in March 1994 and interim dean in July 1996. Alter received the American Agricultural Economics Association distinguished extension program award in 1985.

Alter's new position was created as part of an overall effort to enhance cooperative extension and

THEODORE R. ALTER

engage the entire University in a broadened outreach effort. Cooperative extension, with offices in each of Pennsylvania's 67 counties, transfers research-based information to Pennsylvania's citizens through non-formal educational programs designed to meet locally identified needs. Alter will have responsibility for cooperative extension's program planning; budget, facilities and human resource management; as well as government, industry and constituent relations. He will report to both the dean of the College of Agricultural Sciences and to the vice president for outreach and cooperative extension, **James Ryan**. Robert Steele is the incoming dean for the college.

Wilkes-Barre welcomes new CEO

Mary E. Hines, dean of instruction and curriculum development at Dundalk Community College in Maryland, has been named campus executive officer of Penn State Wilkes-Barre, effective July 1.

Dean of instruction and curriculum development at Dundalk since 1994, Hines has had responsibility for the college credit and non-credit instructional programs and academic services including policy development and implementation; faculty recruitment, development, and evaluation; facilities, budgeting and schedules; strategic planning and outcomes assessment; and accreditation.

She is a member of the president's staff, the Faculty Council and other policy committees for the college. Chair of the instructional technology task force, she manages the college distance learning initiatives, chairs the Tri-College system Task Force on Academic Programs, represents the instructional divisions on the Tri-College system committees and is a member of many state and county educational committees.

From 1984 to 1994 Hines was associate dean of instruction at Catonsville Community College, where she had college-wide administrative responsibility for faculty, staff, budget, facilities, advising, planning and evaluating all aspects of liberal education and learning services, and served as division chair of the humanities division of the college from 1980 to 1984. She also held the rank of professor of philosophy, serving as department chair from 1979 to 1984, and was an adjunct professor of philosophy at a number of Maryland colleges and universities.

Among her recent honors, she received an Outstanding Academic Leadership Award in 1996, the Adjunct Faculty Teaching Award from the College of Notre Dame of Maryland in 1995 and the Yokohama

MARY E. HINES

Academy Award for Partnership in 1994. She is a frequent speaker and has published on issues in higher education, ethics and the role of community colleges.

Hines graduated with a B.A. in philosophy from St. Francis College, N.Y., and received her master's degree and doctorate in philosophy from Catholic University of America in Washington, D.C.

Alumni Association executive director to start in position June 1

Diane K. Ryan has been named executive director of the Penn State Alumni Association, effective June 1. She will report to the vice president for development and alumni relations, and work closely with the association's president, executive board and Alumni Council in administering the association's services and programs.

As executive director, Ryan will provide leadership for the Alumni Association, which has a membership of 140,000 and is the largest dues-paying organization of its kind in the nation. She will direct the alumni services and programs at Penn State, and lead a staff of 47 people.

Ryan has led the external relations team of the Alumni Association for the past seven years. As assistant executive director for special programs from 1990 to 1995, she initiated the association's reorganization of its former "club" system into a comprehensive network of chapters, college and campus societies and alumni interest groups. From 1985 to 1996, she held the position of associate director of alumni programs, and for the past year also served as interim director of alumni programs.

Ryan's career at Penn State, however, reaches back to 1980 when she was appointed assistant to the dean of student affairs at Penn State Wilkes-Barre. In this position, she was responsible for overseeing and developing student activities, clubs, organizations and cultural programs. From 1981-90, she held the position of director for the Center for Individual Development and coordinator of advising and counseling at Penn State Wilkes-Barre. She administered the Division of Undergraduate Studies academic enrollment program, and designed and implemented the first advising-counseling center in the Commonwealth Educational System, which provided integrated services for day and evening students, as well as alumni.

Ryan holds a B.S. in elementary education from Shippensburg University, an M.Ed. in counselor education from West Chester University and a secondary counselor certification from Penn State.

DIANE K. RYAN

BookShelf

Just published by Oxford University Press is a monograph, *Physical Adsorption: Forces and Phenomena*, co-authored by **L. W. Bruch** of the University of Wisconsin, **Milton W. Cole** of Penn State's physics department, and **Eugene Zarembka** of Queen's University in Ontario. The theme of this book lies in the interdisciplinary field of chemical physics. Its principal topics are the force between atoms and surfaces and the nature of a monolayer film. Interest in this subject is largely due to the fact that such films are

realizations of a two-dimensional world, which theoretical physicists and chemists contemplate. This world is even richer than our conventional three-dimensional world, according to the authors, because there is a broader range of phases and transitions between them than is found in three dimensions.

Gary W. Gallagher, professor of American history, is the editor of *The Wilderness Campaign*, recently published by the University of North Car-

olina Press. *The Wilderness Campaign* describes the bloody, largely indecisive Civil War battle fought between generals Robert E. Lee and Ulysses S. Grant on May 5-6, 1864 in the vast scrub forest south of the Rapidan and Rappahannock Rivers in Virginia.

The contributors bring modern scholarship and fresh insight to bear on the issues and leaders of the Wilderness Campaign. The eight essays explore the campaign's background. Other essays evaluate the per-

formances of individual leaders such as Union cavalry Gen. Philip Sheridan and Confederate corps commanders Richard S. Ewell and A.P. Hill. Two of the most celebrated incidents — the "Lee to the Rear" episode and Gen. James Longstreet's flanking attack — are reconstructed in detail.

Callaghan's cave is also the author of *Stephen Dodson Ramsaur: Lee's Gallant General and Fighting for the Confederacy: The Personal Recollections of General Edward Porter Alexander*.

Penn Staters

Collins O. Airhihenbwa, associate professor and head of the Department of Health Education in the College of Health and Human Development, has been selected as the 1998 Scholar of the American Association for Health Education. This is the highest honor given by the association and recognizes an individual whose years of scholarly contributions have significantly influenced the profession of health education. Airhihenbwa is the first Penn State professor to be honored with the award established in 1977.

David L. Allara, professor of materials science and chemistry, has been named a Fellow of the American Association for the Advancement of Science (AAAS). He was among 283 scientists to receive the distinction this year. The association selects as Fellows members whose efforts on behalf of the advancement of science or its applications are scientifically or socially distinguished. Founded in 1848, the AAAS is the world's largest federation of scientists and has more than 144,000 members. The association publishes the journal *Science*.

Allara is a materials chemist whose research includes surface chemistry and analytical spectroscopy. He is being honored for his innovative studies of the properties and preparation of novel solid interfaces that can be used in electrochemical, electronic and optical devices.

Sohail Anwar, assistant professor of engineering at Penn State Altoona, will serve as an invited professor of electrical engineering at Université d'Artois Institut Universitaire Technologie (IUT), Bethune, France. Sohail will participate in lecture and lab activities in the areas of power electronics and industrial control systems.

Penn State will be featured in the 1997-98 *Hon Roll for Character-Building Colleges* guidebook published by the John Templeton Foundation for its strong commitment to character-building programs offered by Student Affairs, under the direction of **William W. Asbury**. More than 65,000 copies of the guidebook will be distributed to public libraries, high school guidance counselors and interested parents and students across the country.

S. Ashok, professor of engineering science and mechanics, presented a paper at the International Conference on Ion Beam Modification of Materials in Albuquerque, N.M. The paper, "Defect Generation in Hydrogen Plasma Exposed Silicon Under Thermal Anneal," was written by Ashok, A. Tannable, a visiting scientist from NEC Corp. in Japan, D. Theodore, a member of the technical staff at Motorola Semiconductors, and D. Z. Chi, a Penn State graduate student in engineering science and mechanics.

Ashok also presented a paper titled "Investigation of Indium Tin Oxide-Silicon Interfaces: Ion Damage, Hydrogen Passivation, and Low Temperature Anneal" at the Second International Symposium on Control of Semiconductor Interfaces in Kasuizawa, Japan. Engineering graduate student **K. Kuwano**, now an alumnus of Penn State, was a contributing author to the paper.

Judith Bond, professor and chair of the Department of Biochemistry and Molecular Biology at The Milton S. Eshelby Medical Center, is one of nine people recently selected to serve on the Advisory Council of the National Institute of Diabetes and Digestive and Kidney Diseases — a component of the National Institutes of Health. The National Institute of Dia-

betes and Digestive and Kidney Diseases is a major federal provider of U.S. biomedical research.

David Dunbar, retired extension agent in Lehigh County, received the Pennsylvania Dairyman's Association Extension Award.

E. Emory Ensore, professor of industrial engineering, was recently appointed to a two-year term as vice president of academic affairs for the Institute of Industrial Engineers (IIE). Elected nationally by members of the IIE, Ensore will serve as a voting member of the institute's Professional Enhancement Board. He also will serve as liaison among the many committees and councils of the IIE. Ensore is a member of the IIE's Education Policy Board and serves as one of three industrial engineers on the Engineering Accreditation Commission.

Nina V. Fedoroff, professor of biology, director of the Life Sciences Consortium, director of the Penn State Biotechnology Institute and the Verne M. Williams Chair in Life Sciences, received the 1997 John P. McGovern Science and Society Medal and delivered the McGovern keynote address at the annual meeting of Sigma Xi, the honorary scientific research society.

Murat Gunaydin, professor of physics, presented an invited talk titled "Seven Sphere and the Exceptional Nonlinear Superconformal Algebras" at the 30th International Symposium Ahrensburg on the Theory of Elementary Particles in Buckow, Germany.

Joyce A. Haney, manager, Purchasing Services, has earned the status of certified purchasing manager (C.P.M.) from the National Association of Purchasing Management. Individuals earning this designation demonstrate their professional capabilities by passing four rigorous examinations, pursuing formal and continuing education and working and contributing to the profession.

S.I. Hayek, distinguished professor of engineering science and mechanics, has been named the general chairman of the 133rd National Conference of the Acoustical Society of America to be held in June at Penn State. Ninety different sessions are planned for the conference, which will include more than 800 paper presentations.

James Kerlin, deputy senior director of the Center for Academic Computing, served as a panel chair for the National Science Foundation Undergraduate Education Instrumentation and Laboratory Improvement Program Review Board.

Sridhar Komarneni, professor of clay mineralogy in the Department of Agronomy and Materials Research Laboratory, gave an invited talk on "Enhanced Reaction Kinetics under Microwave-Hydrothermal Conditions" at the Second International Conference on Solvothermal Reactions in Takamatsu, Japan. While in Japan, he gave three invited talks on "Morphology Control of Calcium Carbonate and Phosphate" and "Second Generation Sol-Gel Processing" at Shiraishi Calcite Co. in Osaka and on "Novel Microwave-Hydrothermal Processing of Ceramic and Metal Powders" at Kochi University, Kochi.

Theodor Krauthammer, professor of civil engineering, and **Paul J. Tikalsky**, associate professor of civil engineering, were named Fellows of the

American Concrete Institute for "outstanding contributions to the production or use of concrete materials, products and structures in the areas of education, research development, design construction or management." The rank, now held by more than 560 members, was established by the institute in 1973.

William Mahon III, director of the Office of Public Information, has received the Don Hake Award from the College and University Public Relations Association of Pennsylvania for his long-term service and outstanding contributions to the organization and the field of public relations.

Richard Nichols, professor of theatre arts, has been selected as one of 20 to participate in the 1997 Korean Culture and Society Institute sponsored by the East-West Center at the University of Hawaii and The Korean Foundation. Participants will spend two weeks at the center studying with Korean specialists, followed by two weeks of travel within Korea. The institute prepares faculty who are not specialists in Korean studies to better present Korea to students in multicultural courses.

Kyle Peck, associate professor of instructional systems in the College of Education, has been appointed manager of the Professional Development Project for Link-to-Learn. Link-to-Learn is Pennsylvania Gov. Tom Ridge's three-year, \$121 million initiative to help schools acquire and upgrade computers; provide technology training for teachers; and build a Pennsylvania Education Network (PEN), a system of community-based learning networks that will connect classrooms, school districts and communities to each other and the world.

Karl Stoeckel, professor emeritus of exercise science, was recently honored by the Phi Eta Sigma National Honor Society at its national convention for his long-standing and distinguished service to the organization. Since 1977, Stoeckel served as adviser to the Penn State chapter. In that time, more than 6,000 students have been initiated and a \$60,000 endowed scholarship fund was established.

Bernhard R. Tittmann, Schell professor of engineering science and mechanics, presented an invited paper at the International IEEE Ultrasonic Symposium titled "Elastic Properties of Ceramic Thin Structures." At the symposium, he also served as the United States chair during a conference between U.S. and Japanese representatives called "Ultrasonics 1998."

David B. Van Dommelen, professor emeritus of art education and fiber arts, is having a one-man exhibition of wall hangings at the Gvat Chaim Kibbutz in Israel. While this is his first exhibition in Israel, he has shown his work in Iceland, Colombia, and at other international galleries.

Timothy Weyandt, director of occupational medicine at University Health Services, is among 35 physicians nationwide selected for the 1997 Class of Fellows by the American College of Occupational and Environmental Medicine, an international organization of more than 7,000 physicians who promote the health and safety of people in the workplace and environment through preventive medicine, clinical practice, research and education.

Awards

Two named honorary alumni

The Alumni Council of the Penn State Alumni Association voted to name two outstanding contributors to the University — **Laurie M. Gunter** and **James I. Tarmen** — as honorary alumni.

Gunter, professor emeritus of nursing and human development and former head of the Department of Nursing, retired from Penn State in 1987 after 16 years of service.

As head of the department from 1971 to 1975, she oversaw a number of major changes to nursing at Penn State, including the move from Allegheny Hospital in Pittsburgh to University Park and The Hershey Medical Center; an enrollment increase from approximately 100 to 800 students; substantial changes to the undergraduate curriculum; the establishment of a graduate degree program; and an extended degree program for registered nurses, the University's first.

She also served as interim department head from 1984 to 1985 and was professor-in-charge of the graduate program for many years.

A graduate of Meharry Medical College School of Nursing, the Tennessee Agricultural and Industrial University, with a B.S. in home economics, and Fisk University with a master's degree in education, she was one of the first black women to receive a Ph.D. in human development from the University of Chicago, in 1959.

LAURIE M. GUNTER

JAMES I. TARMEN

Much of her research has focused on nursing care for the elderly.

Tarmen, athletic director emeritus, is known to Penn State fans nationwide. He retired in 1993 after 35 years of service, including 11 as director of athletics. He is credited for playing a major role in merging Penn State athletic programs into the Big Ten Conference and his colleagues credit him with being one of the University's most creative and committed executives. He also has been selected for induction into the National Association of Collegiate Directors of Athletics Hall of Fame.

A 1952 graduate of Gettysburg College and a native of York, he was on staff of the *Harrisburg Patriot News* for a year and was assistant public information director and sports information director at Princeton University before joining Penn State in 1958.

Tarmen was named to the College Sports Information Directors Hall of Fame in 1970. He has been a member of the National Football Foundation and Football Hall of Fame Honors Court, and the National Collegiate Athletic Association Post Season Bowl and Special Events Committee, to name a few.

In 1990, Tarmen received an honorary membership in Penn State's Golden Key Society in recognition of his commitment to academics and athletics.

He is a resident of State College and a trustee emeritus of Gettysburg College.

Her outstanding dedication, model work ethic and strong degree of self-motivation have made her invaluable to OAS and to Penn State. Her job knowledge and application knowledge are outstanding and because of her understanding Penn State will have no problem converting systems in the year 2000 where the work is already at 98.5 percent completion."

Decker, a University employee since 1973, received a certificate, a wall plaque, gift certificate, a laptop computer and a luncheon in her honor. A permanent plaque listing the previous honorees is on display in the lobby of 31 Shields Building on the University Park Campus.

Behrend presents awards at annual spring convocation

Penn State Erie, Behrend College, honored more than 200 students and faculty members at its 36th annual Honors and Awards Convocation held as the academic year came to a close.

Among the awards given to faculty at the convocation the Best Student Organization Adviser Award, shared by Susan Daley, staff psychologist, and Chris Rizzo, director of student activities. Daley also received the Benjamin A. Lane Outstanding Service Award, which recognizes outstanding service and dedication to the college as exemplified by Benjamin A. Lane, associate professor of English emeritus.

Other faculty honorees included:

Eric Corty, assistant professor of psychology, who received the 1997 Penn State-Behrend Council of Fellows Excellence in Teaching Award; Jeffrey Pinto, the Samuel A. and Elizabeth B. Breene Fellow in management, who was awarded the 1997 Penn State-Behrend Council of Fellows Faculty Research Award; and Richard Englund, assistant professor of engineering, who received the Guy W. Wilson Award for Excellence in Academic Advising.

In all, more than 70 major academic honors were awarded to recognize leadership and achievement in both the classroom and in student life.

WEP receives national award

The Women in Engineering Program (WEP) was the recipient of the 1997 Women in Engineering Program Advocates Network (WEPAN) Award. The award recognizes Women in Engineering Programs that have made significant and demonstrated improvements to an established program and its overall climate, and that have provided professional guidance to women in engineering.

WEP programs reach women throughout the college and range from peer-led math study groups to co-educational hands-on project courses taught by peer instructors. For undergraduates, WEP initiated an orientation-to-engineering for entering female students in 1996, offered a range of hands-on workshops and established an e-mail mentoring program with alumnae. The organization also organized student work days for Habitat for Humanity and BuildPEN, an effort to hardwire all local public schools for Internet access.

At the graduate level, WEP developed a comprehensive program for students including month-

ly career development seminars led by women faculty for graduate women, a graduate/faculty networking directory and a WEP graduate steering committee.

"Women with the talent, skills and drive to become successful engineers are one of our most important national resources," Barbara Bogue, director of WEP, said. "WEPAN's leadership in this area, especially in the dissemination of statistical research and organizational information, has been a critical resource in the development of our program at Penn State. This recognition is very much appreciated."

WEPAN is a national non-profit organization that was founded in 1990. Its mission is to effect a positive change in the engineering infrastructure in which the academic, social and professional climate becomes equally conducive to females and males pursuing careers in engineering. The organization strives to make the engineering workforce diverse and multicultural. WEPAN has a membership of more than 500, including 258 corporate or institutional members.

Associate professor wins Jordan Award

Winston A. Richards, associate professor of mathematics and statistics, is the 1997 Penn State Harrisburg James A. Jordan Award winner.

The Jordan Award, presented annually by the Penn State Harrisburg Student Government Association, honors a faculty member "who best exemplifies dedication and achievement in teaching."

Nominations for the award are made by the student body during the Student Government Association spring elections. A committee of senior students interviews the finalists and selects the winner.

Richards, who teaches in the School of Science, Engineering and Technology, has been a member of the faculty since 1970.

Caldwell Service Award recipient named

Susan Decker, systems planning specialist III in the Office of Administrative Systems (OAS), is the sixth recipient of the Thomas R. Caldwell Service Award for Excellence.

The award honors Tom Caldwell, a senior systems analyst for 15 years in Management Services, now OAS, who died in a house fire April 10, 1991.

All OAS employees are eligible for the award. Nominees are judged on dedication to their job, interpersonal relations and outstanding job knowledge.

On the selection of Decker for the honor, Kenneth C. Blythe, OAS director, said, "Sue is a dedicated and extremely knowledgeable employee;

Awards

Associate professor cited for academic advising excellence

James Hilton, associate professor of agricultural engineering, has received the 1997 College of Agricultural Sciences Alumni Society Excellence in Academic Advising Award. Hilton coordinates the agricultural systems management (ASM) program and advises between 40 and 50 undergraduate students each year. He also advises the ASM Club and is serving a second term as adviser to the Agricultural Student Council. Hilton was nominated for the advising award by students in the ASM Club, with supporting letters from faculty, administrators, students and graduates.

One nominator wrote: "Throughout my undergraduate career, his door has always been open whenever I had a question, whether about sched-

JAMES HILTON

ules or something else pertaining to college life. He makes a large university seem a lot smaller by adding his personal touch."

Hilton, who earned his bachelor's and master's degrees in agricultural education from Penn State, joined the college faculty in 1978. He earned a Ph.D. in agricultural education from Iowa State University in 1979.

In 1992, Hilton was among 12 college faculty members to receive the Provost's Award for Collaborative Instruction and Curricular Innovation for outstanding collabor-

ative teaching. In 1993, students in the Department of Agricultural and Biological Engineering recognized his contributions with the Alpha Epsilon Outstanding Faculty Award.

Penn College marketing projects bring home gold, bronze and merit awards

Pennsylvania College of Technology's marketing efforts have earned a gold, two bronze and two merit awards in the 12th Annual Admissions Advertising Awards sponsored by *Admissions Marketing Report Publications*, the national newspaper of Admissions Marketing. Penn College competed among colleges and universities with 2,000 to 4,999 students.

—"Penn College & You," the college's 60-minute interview/call-in program, won a gold award in the television advertising/series category. Seen locally on Susquehanna Communications Channel 2 and in about 2 million homes in Pennsylvania, New York and California, the show is hosted and produced by **Tom Speicher**, broadcast media specialist in the College Information and Community Relations Office, and directed by **Michael Strunk** of Susquehanna Communications.

—A bronze award was earned in the television advertising/single spot category for the college television commercial category "Degrees that Work."

Devised by Speicher, the commercial used footage photographed by **Bruce Huffman**, producer/videographer and **James T. Gugin**, video engineer/editor in the college's Media Center, and was edited by Strunk.

—Two publications produced by the College Information and Community Relations Office received honors. Capturing a bronze in the catalog category was the 1996-97 Catalog, produced in cooperation with academic affairs and the Registrar's Office. In the newsletter category, the college's quarterly magazine, *One College Avenue*, captured a merit award. The effort is directed by **Elaine J. Lambert**.

—An additional merit award was earned in the video viewpoint category by the college's marketing video, "Degrees of Excellence: Degrees that Work." Produced by the college's Media Center, headed by **Frederick T. Gilmour**, director of instructional technology and media services, the marketing video featured footage photographed by Huffman and Gugin.

Lehigh Valley library assistant lauded

Kathleen J. Romig, library assistant at the Library Learning Resource Center of Penn State Lehigh Valley, has received the 1997 University Libraries Award.

Romig was chosen for the award by her colleagues on the faculty and staff of the Libraries in recognition of her commitment to a service-oriented philosophy, a consistently professional attitude, service as a mentor to student employees and involvement in the campuswide information system.

Romig joined Penn State and the University Libraries in August 1986 as a library clerk. Two months later, she was promoted to her present posi-

tion as library assistant where she supervises various campus library processes and activities in areas such as circulation, acquisitions, serials processing, library reserves and interlibrary loan. Romig also provides reference assistance, coordinates campus audiovisual services and assists in the design and maintenance of Penn State Lehigh Valley's World Wide Web site. Prior to her Penn State career, she worked at Dun and Bradstreet Corp. in Allentown.

Professionally, Romig serves as a member of the Council on Library/Media Technicians Inc. (COLT). She received her bachelor of science in education (magna cum laude) from Kutztown University.

Several honored for support of diversity

The Multicultural Resource Center has recognized a number of students, faculty and staff of color and a student organization for their accomplishments and contributions to students of color and for their support of diversity efforts at Penn State.

Those honored include:

■ **MANRA**, the National Student Chapter of the national society for Minorities in Agriculture, Natural Resources and Related Sciences received the Student Organization Award for the organization or group which most significantly promoted multiculturalism and supported students of color at the University.

■ **Nikita Bailey**, president of the Black Caucus, received the Leadership Award, which goes to the student who has provided outstanding leadership in student government, social services, media or other activities at Penn State.

■ **Carla Grundy**, programming co-chair of the Penn State chapter of the National Association for the Advancement of Colored People, received the Inspiring Student Leader Award, which goes to a student who keeps a low-profile and toils behind the scenes to make certain that student programs are successful.

■ **Mark Allen**, a McNair Scholar, and **Jane Fueyo**, a University Scholar, received Academic Scholarship Awards, which go to students who have completed or are working on a significant research project and who have at least a cumulative grade point average of 3.0 or better.

■ **Charles Dumas**, assistant professor in the School of Theatre Arts, **Cur Marshall**, student aid adviser, and **Samuel Richards**, lecturer in sociology, have received Faculty/Staff Diversity Recognition Awards, which recognize faculty and staff who have consistently promoted multiculturalism and demonstrated concern for and sensitivity to the needs of students of color.

Dumas, a director, playwright and teacher, has established new courses in African American drama and film and a theatre workshop in diverse cultures, which are especially noted for their historical and social content. He designed a show for *Ebony* and *Ivory* week, writes and directs theatrical productions for the Paul Robeson Cultural Center and serves on the University's Martin Luther King Jr. Planning Committee. For two years he developed and directed the central event of that celebration. The African American Graduate Student Association chose him the Outstanding Professor of the Year.

Marshall is well known to many students who for one reason or another have found themselves in financial difficulty with the risk of having to leave school. He has been especially creative in helping many find the resources to stay at Penn State. His colleagues know him as a resource for all students and he has helped many attain their maximum level of student aid. He has a reputation as an innovator, a professional and a tireless advocate for students.

Richards' 100-level course, "Race and Ethnic Relations," and his 400-level course, "Inequality in America," are well known among students of color for their emphasis on class discussion and the attention given to all students' comments to promote mutual understanding. His students respect him as bold and honest, especially in discussion on the African American and Native American experiences in America. He also encourages students to form out-of-class discussion groups on class-related and other topics.

Awards

Liberal Arts recognizes faculty achievements

The College of the Liberal Arts has recognized faculty for excellence in teaching, advising and research. The awards are sponsored by the Liberal Arts Alumni Society.

Those receiving recognition and their awards are **Baruch Halpern**, chair in Jewish studies and director of the Jewish Studies Program, the Class of 1933 Distinction in the Humanities Award; **William J. Harris**, associate professor of English, and **Bruce Weigl**, professor of English, Outstanding Teaching Award; **Gerald M. Moser**, professor emeritus of Spanish and Portuguese, Emeritus Distinction Award; **David A. Rosenbaum**, professor of psychology, Distinction in the Social Sciences Award; **James F. Smith**, professor of English and American studies, Penn State Abington, Outstanding Adviser Award; and **Lorena Waselinko**, lecturer in English, and **Rosemary L. Gido**, senior lecturer in crime, law and justice, Outstanding Teaching Award for Non-Tenure Line Faculty.

Halpern, who also is professor of ancient history, Mediterranean studies and religious studies and a Fellow of the Institute for the Arts and Humanistic Studies, is the author of three books and co-author of one book, all concerned with the historicity of the Hebrew Bible. He also has edited or co-edited four books on the Bible, law and society in Israel and the ancient Mediterranean world. He has contributed many book chapters to edited volumes and entries for the Anchor Bible Dictionary and the Oxford Companion to the Bible. He is a director of the Penn State-Tel Aviv University archaeological excavation at Megiddo. His recent work has been concerned with the connections between historical texts of the Bible and insights from recent archaeological work in Israel.

Harris, a member of the English faculty since 1992, teaches courses in 20th century American literature, 19th and 20th century black American literature and poetry writing. His philosophy of teaching literature is based on leading students to see and understand the world from points of view different from their own, and to place literature within its historical and cultural context. A widely published poet, Harris is the author or editor of four books and co-editor of a forthcoming anthology of the African American literary tradition.

Weigl joined the English department in 1986, directed the Creative Writing Program and since 1990 has directed the MFA program in creative writing. Author or editor of 12 books of poetry and essays, Weigl has been recognized with numerous awards and prizes, including the Pushcart Prize in 1980 and 1993 and the Best American Poetry Award in 1994. students to write honestly about themselves and their lives, and by emphasizing writing as a creative process of discovery, he leads each student to develop a more insightful and expressive voice in their writing.

Moser, who retired in 1978 after 29 years as a member of the faculty, continues to be active in his field, publishing literary studies and presenting papers at conferences in the U.S. and abroad. The significance of his contributions to the field of Luso-Brazilian literary studies has been recognized by a special award from the Portuguese government. He also continues to sponsor Bate Pago, a club for students and faculty interested in Portuguese.

Rosenbaum's research is concerned with the cognitive psychology of human motor control and perceptual-motor integration. His experimental and theoretical contributions to this field are related to how individuals choose among possible movements to accomplish specific actions; how movement action skills are learned and remembered; how actions such as reaching are adapted to the environment in which they are performed; and how individuals adapt to constraints (for example obstacles or joints stiffened as a consequence of aging) on their motor actions. He holds a Research Scientist Development Award from the National Institutes of Mental Health. His book, *Human Motor Control*, is a standard text and reference work in his field. He is the author of more than 70 scholarly articles, book chapters and other publications, and co-author or co-editor of three additional books.

Smith, a member of the faculty since 1971, is

Abington's chief adviser for associate and baccalaureate degree students in Liberal Arts. In addition to his regular teaching and extensive advising responsibilities, he has been instrumental in the success of the campus's American studies degree program, established two years ago. He began a newsletter for American Studies students to foster unity among the majors and inform them of activities and internship and job opportunities. Smith received the Penn State Ogontz Advising Award in 1975.

Waselinko teaches a variable number of courses for the English department each year, including the required freshman writing courses and technical writing, but she specializes in teaching business writing. She has served as a mentor to new teaching assistants and assists in the department's internship program. She has developed and taught a course for graduate students in chemistry on the writing of manuscripts for professional journals.

Gido, a senior lecturer in the Crime, Law and Justice Program in the Department of Sociology, has taught courses in both sociology and administration of justice at Penn State since 1992. Gido has been a Fellow of the Schreyer Institute for Innovation in Learning and in 1996 created a collaborative learning experience for the 300 students enrolled in Administration of Justice 111. By dividing the class into 37 teams of six to 10 members, and using graduate teaching assistants and undergraduate coaches/tutors, she provides a small-class learning environment and research experience within a large class context.

New data shows how humus handles pollution

By BARBARA HALE
Public Information

A new analytic approach pioneered by University of Maryland researchers is helping to pile up evidence about why and how composting's product, humus, can control pollution.

Jean-Marc Bollag, director of the Center for Bioremediation and Detoxification (CBD) and the project leader said, "Forty percent to 50 percent of chemicals applied to the soil, including pesticides and other potentially harmful compounds, stay in the soil." They remain there bound to humus, the brown or black organic portion of soil formed from the partial decomposition of vegetable or animal matter.

This binding, which is a natural process, can be considered beneficial since bound chemicals are unavailable to be taken up by plants or to leach into groundwater. However, until now, data on the nature of the bonds and the ultimate stability of the bound chemicals has been limited.

Over the last six years, Bollag and his research team have pioneered the use of carbon-13 nuclear magnetic resonance spectroscopy (C-13 NMR) to characterize these bonds. Their work has shown C-13 NMR to be a valuable new tool in the soil biochemist's arsenal.

Jang-Eok Kim, who

Jean-Marc Bollag led a project that shows how a product of composting can control pollution.

Photo: Greg Grieco

participated as a visiting professor in the Penn State project, described the coupling of the herbicide Bentazon with humic constituents. Kim is a member of the Department of Agri-

cultural Chemistry, Kyungpook National University Taegu, Korea.

Kim said that usually only molecules that have particular chemical groupings on their molecules,

either an oxygen/hydrogen grouping called a hydroxyl, or nitrogen/hydrogen grouping called an amino group, react and bind to humus. Bentazon has neither.

Yet, in the presence of catechol, a humic derivative, and the enzyme laccase, Bentazon binds and is completely transformed within 30 minutes. The transformation products were identified with C-13 NMR spectroscopy.

"Our group has carried out numerous studies to try to determine whether the detoxification effect of humus can be enhanced through stimulation of the binding process. We have found that certain enzymes and nonbiological catalysts do enhance the process. Of course, some contaminants are not good candidates for treatment with enzymes but we have found that they still can be detoxified indirectly by increasing the content of reactive chemicals in the soil," Bollag said.

"Fortunately, amending soil with additional organic matter to enhance detoxification is becoming more common as companies offer humus preparations possessing detoxifying capabilities."

Other members of the research team include Jerzy Dec, research associate, and A. Schaffer, Ciba-Geigy Ltd., Basel, Switzerland.

About 750,000 pages of journal literature have been converted from paper into an electronic database that resides at the University of Michigan. Sponsored by a grant from the Mellon Foundation, JSTOR began as a pilot project in 1994 to help the scholarly community take advantage of advances in information technologies.

For more information on the JSTOR Project, see <http://www.jstor.org>.

Research Roundup

University
one of six
partners in
regional
tree fruit
cooperative

Five land-grant universities and a federal agency have signed a unique agreement to form a regional partnership to better serve the tree fruit industry in Pennsylvania, Maryland, Virginia, West Virginia and New Jersey.

"Stimulated by a need to cooperate across state lines, this group is six equal partners working together for the benefit of the industry," said Charles Krueger, associate dean for research in the College of Agricultural Sciences. "This is a coordinated effort that spans research, extension and student education."

The agreement is one of several initiatives outlined in a 1995 Mid-Atlantic Strategic Plan developed by members of the tree fruit industry and representatives from universities and agricultural agencies.

The participating organizations are Penn State, the University of Maryland, Cook College-Rutgers University, Virginia Polytechnic Institute and State University, West Virginia University and the Appalachian Fruit Research Station of the USDA Agricultural Research Service in Barndale, W.Va. Each has three representatives on the working group.

Perceptions of animal agriculture studied

How do young people learn about agriculture, and where do they get the information? It is based on science or is it from self-serving organizations? To find the answers, researchers are studying public perceptions of farm animal production methods.

"The information children receive will influence their opinions for the rest of their lives," said Lowell L. Wilson, professor of animal science. "To make sure children have a balanced view of the use of animals, we need to determine what they know and how they get their information."

Students and their teachers are being surveyed about animal agriculture: animal agriculture products, food safety, animal well-being, how animal agriculture affects the environment and what farmers do to protect the environment for future generations.

Preliminary results indicate teachers are students' primary source of information about agriculture. "This emphasizes the need to determine what teachers know about animal agriculture and where they obtain their information," Wilson said.

Journal Storage Project makes use of digital technologies

University Libraries have begun addressing new digital technologies and collections as a charter participant in the Journal Storage Project (JSTOR). Through this venture, library patrons will now be able to access past issues of scholarly journals in electronic format through the World Wide Web at <http://www.libraries.psu.edu/pubinfo/collect.html>.

The first phase of JSTOR will allow participating members to offer access to a minimum of 100

journals in areas such as ecology, economics, history, mathematics, philosophy, political science and sociology. Users are able to view and print articles using standard PC equipment at any time and from any networked location. Issues of the journals are never "out;" they are always available, and in good condition. In addition, powerful searching capabilities allow users to limit their searches based on the information being sought.

Honored

Jim Tarman, a member of the athletic staff for 35 years prior to his 1993 retirement, was selected for induction into the National Association of Collegiate Directors of Athletics Hall of Fame.

Going pro

Seven football players are headed to the NFL.

Kim Herring and **Wally Richardson** were selected by the Baltimore Ravens in the third and seventh rounds respectively. Kicker **Brett Conway** went to the Green Bay Packers in round three. Ex-Lions signed as free agents included **Brandon Noble** by the San Francisco 49ers, **Brian Miller** by the New Orleans Saints, **Mark Tate** by the New England Patriots, and **Gerald Filardi** by the Pittsburgh Steelers.

Going pro II

Former Lady Lion point guard **Tina Nicholson** was selected in the third round by the Cleveland Rockers of the Women's NBA basketball league. Nicholson, who ranks 10th among NCAA All-time leaders in assists, was drafted 20th overall in the WNBA inaugural draft. Nicholson was a student assistant for the Lady Lions last season.

Academic honors

Third baseman **Jen McIntyre** was named to the GTE Academic All-District team. A .304 hitter during the past season, McIntyre has a 3.32 GPA in kinesiology. Baseball player **Carl Albrecht** and **Jared Sadlowski** also won All-District academic honors. Albrecht batted .356 with a school record 64 hits. He has a 3.38 average in secondary education. Sadlowski, a 3.77 student in management, hit .337 with team highs of 12 home runs and 16 doubles.

Gift dedicated

Finance and international business student **James Neid** took advantage of nice weather recently to read at Foundry Park on the University Park campus. The one-acre park, a gift of the class of 1995, was officially dedicated on May 12. Located behind University House and Hammond Building, the park sits on the site of the original 1911 Foundry Building where students were trained in metallurgy and industrial, mechanical and electrical engineering. The building was removed in 1989. A centerpiece of the park is a reconditioned crucible once used by the University for melting iron. In addition to 27 pear trees, benches and flowers, there also is a time capsule buried at the site to be opened in 2096, the 200th anniversary of the College of Engineering. The park was funded with \$106,390 in gifts from 2,547 members of the 1995 graduating class.

Private Giving

Firm's \$200,000 gift to endow scholarship

The AVX/Kyocera Foundation has awarded the Department of Materials Science and Engineering \$200,000 to endow the AVX/Kyocera Foundation Scholarship in Materials Science and Engineering. AVX Corp. will provide funds for recruiting undergraduate students into the materials science and engineering field and supporting those already enrolled in the department's programs.

As a leading manufacturer of passive electronic components, AVX Corp. recognizes that Penn State is an important source of potential employees and research data — several

Penn State graduates are employed by AVX in key positions at their Myrtle Beach, S.C., facilities. The funding of this scholarship will help ensure that future students are able to pursue studies in materials science and engineering.

Eligibility for the scholarship will be based on superior academic achievement or promise of achievement and/or financial need. The scholarships will be awarded for one academic year, and may be renewed for subsequent years if the recipient continues to meet the eligibility requirements.

Alumni pledge \$4 million to help students and Libraries

University alumni William L. and Josephine Berry Weiss have committed \$4 million to the University to expand student financial aid programs in engineering and the liberal arts, and to help the University Libraries.

William Weiss, chairman emeritus of Chicago-based Ameritech, recently accepted a volunteer position as a vice chair of leadership gifts for Penn State's forthcoming capital campaign.

"The University has played a very important role in our lives. In fact, Jo and I first met while we were students there, and we want others to experience the benefits of Penn State as we did," he said. "In addition, we hope that our commitment will inspire others to get involved as the campaign begins to take shape, and help Penn

University's 'World Campus' is moving forward

By LISA M. ROSELLINI
Public Information

For decades, Penn State has been a leader in providing distance education and is now planning to swing its doors wide open to the global community with the establishment of a "World Campus"—so far, the ultimate concept in distance learning.

From his first months at Penn State, President Graham B. Spanier has alluded to what in other circles has become known as the "virtual university"—an educational institution with no walls, where learning is accomplished via the Internet or other new technologies. The "World Campus" envisioned by University leaders will be designed as a distinctive outreach campus of the University and will offer a broad spectrum of educational activities.

According to an April 29 report by an 18-member

study team looking into the "World Campus" concept, Penn State is preparing to offer as many as 30 academic programs through a variety of delivery methods. By the year 2002, more than 300 courses could be offered online or on CD-ROM, in combination with some traditional methods such as video and audio cassettes and textbooks. For students, particularly those who are place-bound, the World Campus offers increased accessibility for obtaining an education and will increase active, "hands-on" learning. Nontraditional students, like workers who must upgrade skills, would find the World Campus a welcome solution.

For Penn State, the World Campus paves the way for new international perspectives and partnerships that will enhance the learning enterprise and will help the University meet the explicit needs of learners. It also addresses demands from a changing student body.

"The global growth in population, combined with the information revolution, has created a demand for education and training that is outpacing the ability of traditional institutions to respond," James Ryan, vice president for outreach and cooperative extension, said. "The solution is not to build more physical campuses, but to create a new approach to education that effectively uses technology."

In a recent talk before hundreds of distance educators at the 18th International Council for Distance Education World Conference, Spanier said that the growth in knowledge also has fueled an overwhelming need for lifelong education in order for people to keep current and remain competitive.

Spanier said that by some estimates, "workers will need to spend at least 20 percent of their time engaged in learning, every day."

See "World Campus" on page 2

ON TARGET: THE NEW PENN STATE

As July 1 nears, campuses across the state are preparing for changes brought on by the reorganization of the University. Under the reorganization, some campuses will merge, while others will become four-year colleges. For a closer look at what some Penn State locations are doing, turn to page 4. These stories are part of an ongoing series planned for the *Intercom*, that will continue through the fall.

Q: Why doesn't the University offer an alternative to the maintenance drug prescription plan? An example would be a mail-in plan where no fee, or a small fee, would be charged. The plan requiring us to get our maintenance prescriptions at Ritener is unsatisfactory for several reasons: the hours are not convenient, they are closed on weekends, they do not carry all medications, and they require a 48-hour waiting period to fill a new or existing prescription. The latter item is most inconvenient when a doctor prescribes medication which he/she would like a patient to begin taking immediately.

— Maria
University Park

A: The Penn State Maintenance Prescription Drug Plan is offered as an alternative to the prescription drug coverage provided under the major medical provisions of both HealthPass PPO and the Hospital/Surgical/Major Medical Plan (Plan A). HealthAmerica HMO participants also may elect either the Maintenance Prescription Drug Plan or the 50/50 drug plan offered by HealthAmerica.

Prescription drug coverage represents a significant portion of the overall cost of the health care plans offered by Penn State. Consequently, the Employee Benefits Division is committed to exploring and implementing programs that can provide quality service that is affordable to both employees and the University. Evaluation of the Maintenance Prescription Drug Plan by mail-order drug providers concluded that they could not offer the same plan without an increase in cost to both employees and Penn State.

The Ritener Pharmacy is open from 7:30 a.m. to 5 p.m. on Monday, Tuesday, Thursday and Friday. Wednesday hours are 9 a.m. to 5 p.m.; Saturdays, 11 a.m. to 3 p.m. The schedule allows for time before the start of normal University business hours, but most employees use the campus mail system to order and receive their prescriptions. Pharmacy hours are reduced when the student population decreases and, like the rest of the University, is closed on holidays.

While the Maintenance Prescription Drug Plan Provides staff with significant discounts on certain drugs, the program was not designed to cover all drugs it may be prescribed. The primary mission of Ritener is as a student health center. When the Maintenance Prescription Drug Plan was developed, the 48-hour period was established to allow Ritener to attend to the needs of Penn State students while still providing a valuable service to faculty and staff. The staff at Ritener pharmacy is very accommodating in emergency situations and other circumstances where the 48-hour waiting period would cause undue hardship to the patient. It is unlikely that a mail-order prescription program could provide less than a 48-hour turnaround.

Health care delivery systems continue to evolve and as they do, the Employee Benefits Division will continue to assess the systems and their effect on faculty and staff.

— Phil Carlin
Benefits Specialist
Office of Human Resources

Do you read me?

Two participants in Penn State DuBois' Young Astronauts summer course pretend to be members of the command center for a shuttle mission to Mars. The course is one of 30 offered during the summer months as part of the campus "Kids in College" program, now in its 12th year of existence. The program, which runs through Aug. 1, is designed to enrich early learning experiences.

World Campus

continued from page 1

"Others say that just to keep even, we will need the equivalent of a full year of college instruction every seven years," Spanier said. The president said that in the United States alone, that translates into more than 20 million new full-time students each year.

"They would fill 672 residential campuses with an enrollment of 30,000 students each at a cost of \$235 billion to build and \$217 billion each year to operate," he said. "To meet the demand between now and 2010, this would require one campus to open every eight days."

"We can create those institutions, or find new ways of working together to meet these learning needs," he said.

Although the idea of a virtual university may sound like something from a sci-fi movie made in the mid-1980s, many institutions and private educational service companies are inching toward the development of just such a model. One consortium of universities in 13 western states, the Western Governors University, will roll out its first degree — an associate arts degree — in 1998, according to Robert Albrecht, director of academic development for WGU. Highly publicized in recent months, WGU plans to use existing institutions, existing courses and existing faculty in a far-reaching collaborative effort. So far, WGU is only concentrating on serving students in the western part of the United States. Within the corporate world, increasing numbers of corporate virtual universities are rushing to meet the professional education and training needs of employees.

"Penn State is talking about distance education that is comprehensive in scope and commitment," Spanier said. "It is a natural transition for us and it will put us at the forefront of distance learning."

The courses being discussed for inclusion in Penn State's World Campus run the gamut from those that lead to a bachelor's or master's degree, to non-credit courses that would help people upgrade current job skills or be more competitive in the job market. According to a 1995 study by the Social and Economic Sciences Research Center, more than 80 percent of adults age 30-49 reported that they had participated

in work-related training or education in the last three years and were likely to do so in the future.

Some areas identified by the World Campus study team as potential start-up programs include engineering, turfgrass management, anesthesia, child care, chemical dependency, geographic information systems and nutrition. Programs under consideration, according to Ryan, must be in areas where Penn State is already a proven leader and where there is a clear demand for the program.

In addition to looking at potential programs, the study team also has been looking into external funding possibilities from corporations and private organizations that would help support the World Campus concept.

"The World Campus is more than just a mere expansion of distance education programming," Ryan said. "It's an information-rich environment that is highly interactive. It will provide students with a lot of access to faculty and a lot of collaborative opportunities."

Ryan said there also is a heavy focus on evaluation and assessment to ensure the continuous improvement of World Campus programs.

"We foresee dynamic communications between and among students, faculty and international experts," Ryan said. "We have identified programs within markets and there is now energy being spent on organizing department and faculty support, and setting up some teams to develop the courses."

But is the rest of the world really ready for cybereducation?

Gary Miller, associate vice president for distance education and a member of the study team, said a recent Odyssey market research study revealed that 46 percent of households with computers are now online and that those households now spend an average of 9.4 hours a week online — a 59 percent increase over the previous year.

"The information technology revolution has changed education and society," Miller said. "The World Campus will create a total learning environment that responds to the needs and circumstances of the learner. Our history in distance education gives us an edge in this arena and we should take advantage of it."

Weiss gift

continued from page 1

State strengthen its position as one of America's greatest universities."

A substantial portion of the Weisses' gift will be used to establish a graduate fellowship program in the colleges of Engineering and the Liberal Arts. Over the period of the gift, 96 fellowships will be awarded. These students also will participate in a unique interdisciplinary seminar. Additionally, about 40 undergraduates will receive scholarships throughout four years of study. Preference will be given to first-generation college students. The Weisses also have designated part of their gift to support the University Libraries.

Bill Weiss graduated from Penn State in 1951 with a bachelor's degree in industrial engineering. Jo Weiss is a 1950 liberal arts graduate. The Weisses' gift is only the most recent in a series of financial contributions the couple has made to Penn State. The couple is now responsible for gift commitments totaling more than \$7 million in their lifetime.

The Weisses have previously established faculty fellowships in engineering and the liberal arts, the Josephine Berry Weiss Chair in the Humanities and scholarships for financially needy students.

Bill Weiss, a native of Big Run, began his career with Bell Telephone Co. of Pennsylvania in 1951. He rose through that company's management ranks, becoming a vice president in 1973. Three years later, he became vice president of operations for Wisconsin Telephone and served in various executive posts with other components of what would become Ameritech when that firm divested from AT&T in 1984. He served as Ameritech's first chairman and CEO until retiring in 1994. He also has served as a Penn State trustee since 1994 and has received the University's Distinguished Alumnus award—the highest recognition Penn State bestows on its graduates. He has been active in civic and cultural affairs throughout his life.

Jo Weiss, a Lock Haven native, has held leadership positions in many Chicago-area civic and educational groups. She serves as a member of the board of directors of the Chicago Child Care Society, the Women's Board of Northwestern University, the Adler Planetarium board and the president's council of the Museum of Science and Industry. She also serves on Penn State's Libraries Development Advisory Board.

Private Giving

Local firm endows \$100,000 scholarship at Penn State Erie

Snap-Tite Inc., a local manufacturer of fluid power components, has endowed a \$100,000 scholarship at Penn State Erie, Behrend College, to provide recognition and financial assistance to students at the college.

The scholarship will first benefit employees of Snap-Tite Inc. and their families. Consideration will then be given to graduates of Union City High School.

Snap-Tite, which makes quick-dis-

connect couplings, played a major role in the development of Penn State Behrend's School of Engineering and Engineering Technology. George A. Clark, chairman and CEO of the firm, serves on the board of directors of the College's Council of Fellows.

Both George Clark and his son, Gary L. Clark, vice president and chief administrative officer of Snap-Tite, were recently honored by the Board of Trustees for their gift.

JOSEPHINE AND WILLIAM L. WEISS

BOOK SHELF

Charles E. Scott, Edwin Erle Sparks chair in philosophy, is the author of *On the Advantages and Disadvantages Of Ethics and Politics*, published by Indiana University Press. In his work, Scott examines the paradox that our ethical and political ideals may perpetuate the very evils they intend to prevent.

He takes as his point of departure the question of ethics: that values and their pursuit in the West often perpetuate their own worst enemies. At issue are the dangers in the structures and movements of images, values and ways of knowing that are most intimately a part of our lives. Scott examines the thought of Nietzsche, Heidegger, Foucault and Levinas on questions of responsibility, transcendence, tragedy and self-fragmentation.

Scott also is the author of *The Question of Ethics, The Language of Difference and Boundaries in Mind: A Study of Immediate Awareness Based in Psychotherapy*.

Kinderkultur: The Corporate Construction of Childhood, edited by Shirley R. Steinberg and Joe L. Kincheloe, examines the role corporate moguls and the media have played in shaping the experience of childhood today.

The book's authors, including College of Education professors Jeanne Brady, Henry Giroux, Aaron Gresson and Joe Kincheloe, analyze the products and messages corporations target to children in order to make a profit. The book also reviews the impact that TV shows, popular books and video games have had in shaping a new era of childhood.

The authors agree that this "corporate kinder culture" is harmful to children. It produces violence, reinforces gender stereotypes and racism, and speaks to the status quo—ignoring the reality for many children growing up at or below the poverty line. Collectively, the authors encourage parents and teachers to carefully examine media messages, discuss them with their children and students, and become politically active in order to hold corporations accountable for their actions and the negative effects they have on children.

Benedictine Roots in the Development of Deaf Education, written by Marilyn Daniels, associate professor of speech communication at Penn State Worthington-Scranton, examines the educational instruction of the deaf from its Benedictine beginning to present.

The book, published by Greenwood Publishing Group Inc. in Connecticut, traces the historical pedagogical affinity among Pedro Ponce de Leon, credited as being the first teacher of the deaf, and Juan Pablo Bonet, Charles Michael de l'Épée, Thomas Hopkins Gallaudet and Edward Miner Gallaudet. It also provides the historical and philosophical basis for Jewish and Christian beliefs concerning the condition of deafness.

Daniels also is the author of *The Dance in Christianity: A History of Religious Dance through the Ages* (1981).

William Crisman, associate professor of English, comparative literature and German at Penn State Altoona, recently published a book with the support of the Penn State Altoona Advisory Board. His book, *The Crises of "Language and Dead Signs" in Ludwig Tieck's Prose Fiction*, treats the language of romanticism and its relation to modern language theory. The book was published by Camden House, associated with the University of South Carolina. Crisman has published extensively on German and English-language romanticism and has written more than 30 articles.

Though long ignored, children have an undeniable and telling history of their own, argues a Penn State professor in a new book titled *Growing Pains: Children in the Industrial Age, 1850-1890*.

Priscilla Ferguson Clement reveals that children are and have throughout history been actors in their own right. The book, published by Simon & Schuster MacMillan's Twayne Publishers, is the first of its kind published on children from this era—a time in American history when children made up half the U.S. population.

Though today's children share a common culture of MTV, Sesame Street and the same toys bought at the same chain toy stores, their worlds also are remarkably different. *Growing Pains* sheds light on the magnitude of these differences, revealing how critical historical events, such as the Civil War and industrialization, dramatically altered children's lives and set the stage for many of the disparities they face today.

Ferguson Clement, an associate professor of history at the Delaware County campus, has written extensively in books and scholarly articles on children in history, often focusing on women and children in poverty and on welfare.

THE NEW PENN STATE

Capital College offers students more options

Editor's note: The following stories are the first in an ongoing series focusing on the changes Penn State is undergoing as part of its redesign. Throughout the coming year, the Intercom will look into various aspects of the reorganization of the University, which becomes effective July 1.

By KIMBERLEY YARNELL BIERLY
Public Information

Live at home ... get a college degree ... spend less money. That may sound like a dream, but the concept will become reality for students when the redesign of Penn State Harrisburg, Capital College and Penn State Schuylkill, Capital College is completed this fall.

"It will be one college geographically distributed," explained John Bruhn, provost and dean of The Capital College. "The redesign is geared to allow each location to better serve its community. The merger will allow students to continue to live at home while getting a four-year degree, thus costing them less money for their education. It will offer more educational opportunities for that student who makes a conscious choice to stay at home."

"Also, distance education, in which Penn State is already a major player, will begin to fill an even bigger role in the local communities," he added.

The redesign of Penn State, approved on Jan. 14 by the state secretary of education, calls for Penn State Harrisburg to merge on July 1 with Penn State Schuylkill—which is just 55 miles northeast of the Harrisburg campus. With the merger of these two Penn State entities, the Capital College becomes a four-year baccalaureate and graduate college, with a wider regional presence. This merger and the development of select partnerships with other institutions will provide many new opportunities to expand the college's mission in Pennsylvania, regionally, nationally and internationally.

A committee comprised of members from both locations developed a strategic plan with an overall theme of "Building Partnerships in Learning" and established four major goals for the next five years:

- Provide a quality educational environment and experience;
 - Develop high-quality strategic educational linkages to the state, region, nation and world;
 - Plan for and use information technology effectively; and
 - Enhance the college's cultural environment through diversification and attention to quality.
- Driving time between Middle-

Institutional partnerships at core of philosophy

By STEVE HEVNER
Penn State Harrisburg

When John G. Bruhn came to Penn State Harrisburg after many years of academic leadership at the University of Texas at El Paso, he brought with him a "howdy partner" philosophy.

In a time of limited resources and rapidly increasing and aggressive competition, Bruhn's vision for the Capital College quickly became one of linkages and partnerships to strengthen both the institution and the communities it serves.

"For a long time, universities and colleges have been competing among themselves, each attempting to have more and better programs and taking pride in their uniqueness. But times have changed," Bruhn said. "The public, lawmakers and benefactors are asking for greater accountability, elimination of duplicative programs and demanding long-term productivity of tenured faculty."

"In higher education, we are supposed to have a common goal of educating people who are rich in talent and energy and lead us into the next century. But, let's face it, in the past we worked better at being competitors than partners."

"The issue is not to keep asking faculty and staff to continue to do more and more with less and less—certainly quality will suffer at some point—but rather do things we need to do in new, more efficient ways," he said.

The cornerstone of Bruhn's philosophy of quality is linkages among institutions so they can become more effective by working as partners. It didn't take long for him to put this plan into practice. Just three months after he took the reins of the 3,500-student Capital College, Bruhn replaced the key Harrisburg Area Community College articulation agreement—which for years had informally allowed HACC students to transfer credits to Penn State Harrisburg—with a dual enrollment pact. Under the dual enrollment agreement, students are able to choose a Penn State Harrisburg/HACC path as early as their senior year in high school. Immediately successful, the program involved more than 200 HACC students within one year, allowing a seamless transfer from one institution to another.

But the HACC pact was only the beginning of a partnership venture which has now reached as far as Mexico. In quick succession came

Partnerships not new

John Bruhn, provost and dean of The Capital College, has worked to develop partnerships with other institutions—a practice that has helped location-bound students to earn a Penn State degree.

joint programs which offer:

- A Ph.D. in pharmacology from the College of Medicine at Hershey and an MBA from Penn State Harrisburg; and

- A law degree from The Dickinson School of Law and a master's degree in public administration from Penn State Harrisburg.

Next came an agreement which eases the transition into the Penn State Harrisburg MBA and master of science in information systems programs for Elizabethtown College students.

Dual enrollment agreements have been initiated in the past several months with Hagerstown Junior College in Maryland and the nearby Reading Area Community College. Several more such pacts are scheduled for the near future as the college continues to foster and welcome educational partnerships.

The most distant partner for Penn State Harrisburg—Pachuca, Mexico—has very rapidly become one of its most vibrant with a number of cultural and educational opportunities already under way. An outgrowth of the City of Harrisburg's "sister city" arrangement with Pachuca, Penn State Harrisburg has become a major player in the ongoing relationship with a number of educational institutions in the State of Hidalgo, of which Pachuca is a part.

Beginning with a visit from 30

Mexican school children to the Penn State Harrisburg summer "Kids College" last year, the Hidalgo partnership has already reached a faculty exchange stage and will soon include students.

This summer, two faculty members from the Penn State Harrisburg School of Science, Engineering and Technology will spend up to a month on an exchange at a technological university in Hidalgo with two Mexican faculty members slated for a return visit in September.

Other plans include:

- Offering special seminars on public administration with the Hidalgo Institute of Public Administration;
- An agreement with the Public Education System of Hidalgo which will open the way to a variety of cultural and educational activities for both locations;
- Faculty and student exchanges with three Hidalgo universities;
- Internships and individual study opportunities;
- Programs in Hidalgo and Pennsylvania for American teachers of children of Mexican migrant workers; and
- Satellite or interactive video delivery of public administration, business management, engineering and engineering technology, agricultural sciences and other programs between Hidalgo and Pennsylvania.

THE NEW PENN STATE

Options

Continued from page 4

town, where Penn State Harrisburg is located, and Schuylkill Haven is one hour and the merger will affect everything from "academics to grounds care," Bruhn said.

Penn State Harrisburg

Penn State Harrisburg, Capital College, which is located on 218 acres in Middletown, approximately 20 minutes from downtown Harrisburg, currently has an enrollment of 3,500 students in upper division and graduate-level courses offering 25 baccalaureate, 17 master's and two doctoral programs. Continuing Education at Penn State Harrisburg also delivers two associate degree programs. The Penn State Harrisburg commitment to the Commonwealth's capital also features two Harrisburg centers — Eastgate and Downtown — which are locations for classes, non-credit offerings, lectures, forums and other community outreach services.

Founded in 1966, Penn State Harrisburg is the largest University location outside of University Park. In addition to the wide variety of academic programs, the college also offers more than 40 clubs and social organizations, 14 professional and honor societies, lecture series, cultural events and intramural athletic teams.

It is positioned near Harrisburg to serve the economic and cultural infrastructure of the greater Capital region. The combination of its doctoral prepared faculty, the resources of the second largest network of linkages within the University's system and its growing network of linkages with other educational institutions has strengthened the college's mission and its ability to serve a growing and diverse constituency.

Students come from the University's other locations, community and junior colleges and other colleges and universities to attend Penn State Harrisburg. Between 500 and 600 students live on campus, while the others commute from nearby communities.

Students, faculty and staff at Harrisburg are anxiously awaiting the construction of the 115,000-square-foot, \$17.3 million library in 1998-99, Bruhn said. Currently, the library is located in 100,000-square feet of space in Olmstead Building, which also serves as the administration building and main classroom building at Harrisburg. The new library will be able to serve nearly 1.5 million potential users.

In addition, another study is under way to replace outdated housing units that during the 1950s were used as an Air Force base. More than \$16 million has been designated for this project.

Penn State Schuylkill

Penn State Schuylkill is one of the oldest locations in the Penn State system, having continuously served the academic needs of the region since 1934. Academics at Penn State Schuylkill include the first two years of most of the University's four-year majors and several associate degree programs. Typically, at the end of two years, baccalaureate students may choose to complete their degrees at University Park, Penn State Harrisburg, or Penn State Erie, Behrend College.

The campus sits on 70 acres and has eight buildings, including a new library. Enrollment is 1,014 and there are three apartment complexes on campus. An additional unit of student apartments is currently under construction and will bring the number of residential students close to 250, according to Wayne Lammie, campus executive officer. About 20 clubs

Collection growing

The Ciletti Memorial Library at Penn State Schuylkill, which opened in 1994, is in the process of adding to its collection of resource materials as a result of the merger.

and student organizations, including intramural sports are offered for students.

The housing is owned by the Schuylkill campus advisory board which is a separate non-profit corporation. "The land was donated to the University by the county and the apartments are being financed through bonds or tax-exempt bank loans which are guaranteed by the county," Lammie said. "This allows financing at a very low-interest rate and the rental income is used to pay off operating and amortization costs. It doesn't cost the county any money — they are just lending the University their credit. If we had to go out on the market for a loan, we could not have gotten an affordable interest rate."

Why merge?

The merger was an on-going, yearlong effort to integrate two autonomous locations into one, and the faculty senates from each location are working together on the transition to make it as smooth as possible, Lammie explained.

"Everyone is working hard to make sure the first two years at Penn State Schuylkill dovetail into the Penn State Harrisburg program. In addition to the faculty, all the support units have been meeting and planning for the past year," Bruhn said.

"One of our major concerns as we looked at reorganization choices was how to quickly provide the community with baccalaureate programming that has been requested for a very long time," Lammie said. "There is no other comprehensive post-secondary institution in our area. Most of the people in this area are location bound and can't drive an hour to get to an institution comparable to this one."

The merger is not only a partnership between the two campuses but also a merger between the two respective communities, he said, explaining that select four-year programs will be offered at Penn State Schuylkill — but only after the community has voiced a need for them. The redesign is geared to have each respective location better serve its community.

Even though the merger is not in effect for another few weeks, Bruhn said he has already seen teaching and research links between the two locations. In addition to being able to complete their baccalaureate education at or near home, there are other academic benefits for students. For example, Penn State Harrisburg will extend the criminal justice program to Penn State Schuylkill, which will give students the opportunities for internships at the three prisons in the Schuylkill area.

Degrees in criminal justice, education, general business and psychology were some of the key areas identified in a Schuylkill market survey. We have been sensitive to the program needs of the community and the wish to retain the Penn State Schuylkill identity at that location which has a long history within the University. The original campus was in Pottsville and it was later moved to its current site in Schuylkill Haven," Bruhn said.

To the Harrisburg community, the merger will open the door for people to think of the institution as a regional college, which fits with the already established pattern of outreach and partnership.

By July 1, Penn State Schuylkill faculty who are in the tenure track or who have tenure will have choice of keeping their tenure at University Park or transferring it to Penn State Harrisburg.

Bruhn sees this merger as a positive for both locations, but cautions faculty at Penn State Schuylkill not to allow it to stop them from working with colleagues at University Park, while also encouraging them to work with their new colleagues at Penn State Harrisburg.

"The Faculty Senate is the first merger success story," Bruhn said. "The two agreed to merge and have completed a new constitution to be voted on before July 1. The members decided to rotate the Senate presidency between faculty at the two locations. "The Capital College has to respond to changing and growing needs of the region or our competitors will rush in and fill the void. I think this merger answers those needs for the residents of the region," Bruhn said.

College of Medicine honors N.Y. doctor as Alumni Fellow

Dr. Burke A. Cunha, chief of the Infectious Disease Division at Winthrop-University Hospital in Mineola, N.Y., has been named the 1997 Alumni Fellow of the College of Medicine. He will visit the college in September to present a lecture titled "On Work, Wisdom, Passion and Virtue."

Cunha, who received his M.D. degree in 1972 from Penn State, also is hospital epidemiologist and vice chairman of the Department of Medicine at Winthrop-University Hospital. He is a professor of medicine at the State University of New York School of Medicine at Stony Brook, N.Y., and is editor-in-chief of three medical journals. Cunha is one of the few non-Harvard faculty members regularly invited to participate in the Harvard Medical School's Internal Medicine and

BURKE A. CUNHA

Infectious Disease Continuing Medical Education Programs. In addition to directing his own Internal Medicine Board Review course for the past 17 years, he is a frequent participant in board review courses and has been a visiting professor at several medical schools. At Winthrop-University Hospital, he also coordinates the Arts and Humanities Program and the History of Medicine lecture series.

Cunha serves on 25 editorial boards and is a reviewer for 26 medical journals. He has written eight books and more than 50 book chapters.

The Alumni Fellow Award, presented by the Penn State Alumni Association, is administered in cooperation with the academic units. The Board of Trustees has designated the title of Alumni Fellow as permanent and lifelong.

DuBois associate degree program fully accredited

The new Penn State DuBois associate degree program in occupational therapy has been granted full accreditation status by the Accreditation Council of Occupational Therapy Education of the American Occupational Therapy Association (AOTA). The accreditation comes nearly a full year earlier than anticipated. AOTA is the regulatory body of the occupational therapy profession.

The Occupational Therapy Program helps prepare students to enter the health care profession as certified occupational therapy assistants. Working under the direction of a registered occupational therapist, these skilled clinicians help individuals of all ages overcome various physical, mental and emotional challenges so they can live their lives to the

fullest. The program includes classroom, laboratory and field work components.

Twenty students are currently enrolled in the DuBois program's inaugural class. The second class is fully enrolled with 34 students scheduled to begin studies this August.

DuBois initiated the occupational therapy program in 1996 as a complement to the three other associate degree health care programs offered by the campus — human development and family studies, medical laboratory technology and physical therapist assistance. Components of the DuBois Occupational Therapy Program parallel those of successfully established programs at Penn State's Mont Alto and Berks campuses.

Faculty/Staff Alerts

Open meetings

A series of open sessions to keep the University community informed on the progress of the University Park Campus Master Plan process is scheduled, beginning this month.

On June 18 from noon to 1:30 p.m. in 110 Wartik Laboratory and from 7:30 to 9 p.m. the same day in the Patton Township Municipal Building, Johnson, Johnson & Roy, Campus Master Plan consultants, will present conceptual options for the campus-wide opportunities plan.

This session is the first in a series of four public meetings scheduled on the topic. Future meetings will be held Nov. 12, April 22, 1998, and Aug. 26, 1998.

Early deadline

Because of the July 4 holiday, the *Intercom* staff has scheduled an early deadline for the July 10 issue. Instead of the normal Wednesday deadline for copy, Tuesday, July 1 at noon will be the cutoff time for submission of information to appear in the July 10 issue. Anyone interested in submitting information should send it to lmr8@psu.edu. The publication schedule for the remainder of the summer follows: June 26, with a deadline for copy submission of June 18 at noon; July 10, with a deadline of July 1, noon; July 24, with a noon copy deadline of July 16;

Aug. 7, with a deadline of July 30; Aug. 21, with a noon deadline of Aug. 13.

Payroll changes

This month marks the beginning of a new era for payroll with the implementation of new payroll distribution methods and new payroll forms for both the payroll check and the remittance advice forms — which are sent to employees who have direct deposit, itemizing taxes and deductions for each pay period.

The new checks will more closely resemble the new remittance advice forms. However, the new checks will be green and the new remittance advice forms will be blue.

The new form will allow more flexibility in regard to the types of information supplied to the employee. The forms will be printed on a laser printer, which will make them easier to read.

There also are new procedures for paycheck distribution. Checks that were previously available for pickup from the Bursar will now be distributed via interoffice mail. In addition, employees who receive their direct deposit stubs via U.S. mail will now receive them through interoffice mail. These changes will save the Bursar's office roughly \$12,000 per year.

Please report any problems to your financial officer.

CIC program names five Fellows

Five University faculty and staff members have been named Fellows to the Committee on Institutional Cooperation (CIC) Academic Leadership Program. The CIC is the academic consortium of the Big Ten universities plus the University of Chicago. Through this program, the CIC is helping to develop leadership and managerial skills of faculty and staff on CIC campuses who have demonstrated exceptional ability and administrative promise. Those selected because of their past contributions and potential to undertake key leadership responsibilities at Penn State include:

■ **Michael J. Dooris**, director of planning and research assessment, Center for Quality and Planning

■ **Sarah G. Wayman Kalin**, acting assistant dean, University Libraries; and librarian, Division of Collections and Reference Services

■ **R. Scott Kretschmar**, professor of kinesiology and immediate past chair of the University Faculty Senate

■ **Susan B. Shuman**, 1997-98 Administrative Fellow in The Office of the President; and senior research project manager in Continuing and Distance Education

■ **John W. Tippecanoe II**, director, American Indian Leadership Program and professor of education. Robert Secor, vice provost for academic affairs and personnel, continues to serve as the Academic Leadership Program liaison for Penn State.

The 1997-98 Fellows will be participating in three seminars during the academic year. One of those seminars, "The University of the Future: Motivating Change," will be hosted by Penn State on April 16-18, 1998. For more information on the CIC, visit the Web at <http://iowu2.cic.net/cic/>.

Upcoming HRDC courses

To register for these or other Human Resource Development Center programs, complete the registration form found in the back of the Spring/Summer HRDC catalog, and fax to (814) 865-3522.

■ **Productivity Skills for Success in the Work Place of the Future - PRO 094**

Develop skills to help you achieve quality outcomes with maximum efficiency in spite of the potentially disruptive effects of organizational change. June 30, 8:30 - 11:30 a.m., 319 Rider Building. Cost: \$35.

■ **Communicating Under the Pressure of Changing Conditions - PRO 095**

Recognize and resolve confrontation and conflict which occurs due to change in the workplace with effective daily communications. July 11, 9 a.m. to noon, 319 Rider Building. Cost: \$35.

ABC to televise football opener

ABC-TV Sports plans to televise Penn State's 1997 season opening football game against Pittsburgh on Saturday, Sept. 6, as part of its Big Ten Conference television package. The Pitt game will be televised regionally with kickoff set for 3:30 p.m. EDT from Beaver Stadium. Penn State has met Pitt more than any other opponent and the Lions hold a 47-41 series advantage, winning the last four meetings. The schools have not met since 1992.

Orion program orients freshmen to college life

By KAREN WAGNER
Public Information

A few yards away from the glowing warmth of the campfire and roasting marshmallows they will scan the night sky for a glimpse of Orion, one of the most prominent constellations in the northeastern sky and the namesake of Penn State's new freshmen wilderness orientation program.

This August, up to 80 Penn State freshmen will join thousands of new students across the country who are getting their orientation to college life in the outdoors. Sponsored by the Shaver's Creek Environmental Center, Continuing and Distance Education and the Penn State Outing Club, the Orion program helps new students form friendships and develop survival skills that will help them make the transition to college life. Universities across the country, from Ivy League to small private colleges, and a few state universities are implementing freshmen wilderness orientation modeled after programs like Outward Bound.

All Orion trips will begin and end at Penn State's University Park campus. Campers will spend five days and four nights on the trail with a final day and evening at the Penn State Outing Club cabin in the University's experimental forest in the nearby mountains. Although the destinations will vary, each trip will offer incoming freshmen the opportunity to explore wilderness areas surrounding State College.

"They will meet new people and challenge themselves physically and

emotionally by stepping outside their comfort zone, but we also want them to have fun," said Kurt Merrill, program supervisor for the Penn State Outing Club.

Campers are advised to break in their hiking boots and pack their water bottles. The week will include backpacking, a high-ropes course and team-building activities. And there's a bonus. Students who enroll for either the Aug. 10-15 or Aug. 17-22 session will receive two credits toward their general education requirements. The program will be listed as Kinesiology 297. Students will pay tuition on the two-credits in addition to a \$125 program fee for meals, equipment and use of camping gear.

Similar orientation programs are fairly common among other universities and colleges. Some universities, like Princeton, run more than half of all incoming freshmen through their program. Dartmouth, which founded its program 61 years ago, attracts 90 percent of its incoming freshmen class.

Penn State Outing Club offers outdoor adventure

With more than 1,000 members, the Penn State Outing Club is one of the largest student-run organizations on campus. Its mission is to stimulate an appreciation of outdoor activities and an awareness of the need for conservation.

The club offers students the opportunity to develop technical, social and leadership abilities in the out-of-doors.

Some upcoming summer activities include:

■ Basic Rock Climbing Course, July 13 and July 20

■ Clarion River Canoe Trip, July 19-20

■ West Branch Susquehanna Canoe Trip, July 26-27

For more information, visit their Web site at: <http://cac.psu.edu/tsn3/psoc>.

Shaver's Creek offers programs for all ages

The staff at Shaver's Creek Environmental Center offers science and wilderness experiences for outdoor enthusiasts of all ages. The Nature Center features a raptor center for injured hawks, owls and eagles; gardens, hiking and cross-country skiing trails.

For more information about program content and registration, visit their Web site at: <http://www.cdc.psu.edu/ShaversCreek/>

When Lynne Hudson signed on as Penn State's program director at Shaver's Creek, she saw great opportunity in bringing together the efforts and resources of the Outing Club, the Environmental Center and C&DE.

"We united our efforts. The Penn State Outing Club had the camping gear and knew the area's hiking trails. Shaver's Creek had the staff and facilities to train the trip leaders, and C&DE lent its expertise in program planning and implementation," Hudson said.

The group has been meeting since October, laying the logistical groundwork, leaving nothing to chance. Even the menus will have to be planned carefully.

"We can't just call catering — it has

to be hike food," Hudson said.

The constellation Orion contains some of the brightest stars — a guide to the rest of the night sky. Organizers hope that the freshmen wilderness orientation program will similarly serve as a guide to freshmen, striking a new beginning and establishing new friendships and new directions in their academic and professional careers.

The Orion program is open to Penn State freshmen enrolling in summer session or fall semester at all campus locations.

The registration deadline for the Aug. 10 trip is July 1. For more information, contact Suzanne St. Pierre, Conferences and Institutes, at (814) 863-5140.

New camera provides a powerful X-ray view of the universe

X-ray vision beyond Superman's wildest dreams will soon be one step closer to reality with the completion of a powerful X-ray camera for viewing high-energy objects in our galaxy and beyond to the farthest reaches of the universe.

"For the first time, we will be able to view the sky in X-rays almost as clearly as we can view it from the largest optical telescopes and 10 times better than any X-ray images we have had before," said Gordon Garmire, Evan Pugh professor of astronomy and astrophysics.

Garmire is the principal investigator who conceived and designed the camera, which is in its final stage of testing at the Marshall Space Flight Center in Huntsville, Ala. "It has performed flawlessly, exceeding the most optimistic goals originally set for it in 1989 when NASA accepted the proposal for its flight," Garmire said.

The camera was built under Garmire's direction at the Center for Space Research at the Massachusetts Institute of Technology.

The camera, the "AXAF Charge-coupled device Imaging Spectrometer" (ACIS), is one of two cameras sat-

ed for installation on the world's most powerful X-ray-astronomy observatory, NASA's Advanced X-ray Astrophysics Facility. It is scheduled to be launched into space on the space shuttle in late 1998. The ACIS camera will record the energy of each X-ray that it detects from the high-energy objects as a unique amount of charge, convert the charge into a signal and then send the spectral signals to scientists on Earth who will use the information to detect the presence of different elements.

"X-rays are the most useful energy band for studying high-energy phenomena associated with the most energetic objects in the universe," said Mark Bautz, a research scientist at MIT's Center for Space Research and a member of the ACIS development team. Scientists expect that the ACIS camera will reveal new information about the cycle of matter that ultimately made life on Earth possible.

The ACIS camera, when combined with the telescope's X-ray-focusing mirrors, has very high angular resolution, or sharpness of focus, which will allow it to see individual stars for the first time in regions where large numbers of stars are crowded. It also has

high spectral resolution, which will give it the ability to determine the energy of individual X-rays over a wide range of X-ray energies.

"The ACIS camera is amazingly efficient in the way it responds to X-rays," Ricker said. "It records images, photon-by-photon, in 50 X-ray colors simultaneously. In virtually no other part of the electromagnetic spectrum it is possible to do such a thing, and ACIS does so with near perfection."

Among the objects the camera is designed to see are massive black holes — 100 million to a billion times the mass of the sun — which are thought to be the power source at the heart of quasars, the most luminous known objects in the universe. The ACIS camera, because it is able to see very high-energy radiation, may be able to detect the early growth of the seeds of quasars in the early universe. In addition, the ACIS camera will determine the temperature and distribution of hot gas in galaxies and clusters of galaxies — data scientists can use not only to measure their mass but also to estimate the mass of the entire universe.

Because high-energy X-rays also can penetrate through dense clouds

of dust like those that hide in the center of the Milky Way, scientists hope the X-ray camera will be able to see clearly the heart of our own galaxy, which many astronomers suspect harbors a massive black hole. Scientists also plan to study the earliest and latest stages of a star's life and sun-like stars that could reveal what our own sun might eventually do in the later stages of its life. The ACIS camera also will be able to see more "colors" with X-rays — a much broader range of different wavelengths of energy than the human eye can see.

"If we could see in X-rays, we would see a more colorful universe with many unnamed colors that you can't imagine," Garmire said.

The camera will next be shipped to a number of testing centers and then to the observatory in Redondo Beach, Calif., where NASA's Advanced X-ray Astrophysics Facility is located. There it will be assembled, integrated and tested. In the summer of 1998, it is scheduled to be moved to the Kennedy Space Center in Florida, where it will eventually be mounted into the space shuttle in preparation for its launch.

ARTS & ENTERTAINMENT

AT PENN STATE

Batter up

Joe Thompson is Charlie Brown and Stacie Morgan is Lucy in Pennsylvania Centre Stage's production of "You're a Good Man, Charlie Brown." The play runs through June 21 at the Pavilion Theatre on the University Park campus.

Photo: Greg Grieco

Bassoon Quartet

The Penn State Bassoon Quartet will present a free concert of music for bassoon ensemble at 8 p.m. Thursday, June 12, in the Helen Eakin Eisenhower Chapel on the University Park campus. Members of the quartet are Katherine E. Jones, Matthew Schell, Melissa Etling and Daryl Durran, associate professor of music.

Piano festival

A national piano festival dedicated to the interpretational and teaching principles of Tobias Matthay, considered one the 20th century's foremost piano pedagogues, will be held at the School of Music on the University Park campus

June 17-21. The festival will include lectures, recitals, demonstrations, performances and a national competition for young pianists.

Day sessions will be held in Music Building II; evening recitals will take place in the School of Music Recital Hall, Music Building I.

On Friday, June 20, six contestants will compete in the 25th annual national Clara Wells Scholarship Auditions for a \$2,000 first prize and a \$1,500 second prize. The auditions will be held between 1:30 and 5 p.m. in the School of Music Recital Hall.

For a festival brochure and registration information, contact Carl Blake, Institute for the Arts and Humanistic Studies, at (814) 865-0495.

"You're A Good Man, Charlie Brown"

The entertaining family musical "You're a Good Man, Charlie Brown," which opened the Pennsylvania Centre Stage season on June 6 in the Pavilion Theatre on the University Park campus, runs through June 21.

Based on Charles Schulz's beloved "Peanuts" characters, "You're A Good Man, Charlie Brown" plays at 7:30 p.m. June 12-14 and 17-21 in the Pavilion Theatre. Matinees are 2 p.m. Saturday, June 21, and 3 p.m. Sunday, June 15. Prices are \$4.50 for those 15 and under, \$12 for students and \$15 for non-students.

For tickets or more information, contact the Arts Ticket Center at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Penn's Woods festival

With less than a month until opening night of the 12th Annual Penn's Woods Orchestra and Chamber Music Festival, top musicians from around the world are preparing to descend upon the University Park campus to participate in Central Pennsylvania's premier festival orchestra. Led by Pu-Qi Jiang, conductor of the Penn State Philharmonic Orchestra, Music at Penn's Woods unites 65 orchestral musicians — representing more than 50 different musical institutions — for four weeks of intensive rehearsal and performances. The orchestra also features members of the School of Music faculty and local musical artists.

The festival runs from June 21-July 12, with orchestra concerts every Saturday evening and twice weekly free chamber ensemble concerts. All events are held at Eisenhower Auditorium. Tickets for orchestra concerts may be purchased at the Eisenhower Box Office or by calling (814) 865-0255. For more information, call (814) 863-1118.

The festival schedule follows:

- June 21, 7:30 p.m.: Festival Orchestra, Richard Kennedy, tenor
- June 22, 3 p.m.: Chamber Ensemble concert
- June 27, 7:30 p.m.: Chamber Ensemble concert
- June 28, 7:30 p.m.: Festival Orchestra, Mark Lusk, trombone
- June 29, 3 p.m.: Chamber Ensemble concert
- July 5, 7:30 p.m.: Festival Orchestra, Julius Karr-Bertoli, conductor
- July 6, 3 p.m.: Chamber Ensemble concert
- July 11, 7:30 p.m.: Chamber Ensemble concert
- July 12, 7:30 p.m.: Festival Orchestra, Marylene Dosse, piano

"Crafts National 31"

The School of Visual Arts Zoller Gallery and the Central Pennsylvania Festival of the Arts present "Crafts National 31," an annual juried crafts exhibition. "Crafts National 31" continues at the Zoller Gallery on the University Park campus through Sunday, July 20.

Internationally recognized ceramic artist William Daley juried this year's exhibition. Professor Emeritus and the first recipient of the Distin-

BRYCE JORDAN CENTER

Turner to rock the Jordan Center

Rock and Roll legend Tina Turner will appear at The Bryce Jordan Center at 7:30 p.m. Friday, Aug. 8. Tickets are \$38.50, \$27.50 and \$19.50 for reserved seating.

Turner's powerful voice and raw stage intensity brought her rhythm and blues fame in the 1960s. She joined Ike Turner and the Kings of Rhythm and crossed over to a top pop-rock act, and then went solo in the mid 1970s.

Turner was inducted into the Rock and Roll Hall of Fame in 1991.

Upcoming events

■ June 12-14: Preview '98 regional trade show

Thursday, 5-8 p.m.; Friday, 10 a.m. to 7 p.m.; Saturday, 10 a.m. to 7 p.m.

■ June 20: Vince Gill and Bryan White

Tickets: \$24.75 and \$19.75 for reserved seating, on sale now.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu/>.

guished University Professor Award from Philadelphia's University of the Arts, Daley's work has been exhibited in numerous national and international shows and is in the collections of national and international museums.

An opening reception is set for 6 to 7 p.m. Tuesday, July 8, in the gallery. This is part of an evening of receptions designed to open the annual Central Pennsylvania Festival of the Arts.

For more information, call Glenn Speirs, Zoller Gallery coordinator, at (814) 863-3352, or Robin Cort, director of visual arts for the Central Pennsylvania Festival of the Arts, at (814) 237-3682.

Life of Fred Waring

From now until Aug. 19 an exhibit titled "The Life and Times of Fred Waring" will be featured in the Reference Room of the University Archives/Penn State Room and the main lobby in Pattee Library at University Park.

Waring, a nationally known showman, Distinguished Alumnus and former University trustee, bequeathed his entire music library to Penn State when he died in 1984. Included are photographs, recordings and memorabilia from nearly 70 years' career.

The Fred Waring's America Collection is a special collection of the University Libraries housed in the Special Services Building on Fox Hill Road, State College. It is available by appointment. Call (814) 863-2911.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, June 13
 Pennsylvania Centre Stage, "You're a Good Man, Charlie Brown," 7:30 p.m., Pavilion Theatre, through June 21.

 Ice Cream "Divisions": Union Fusion Jazz Band, 7 to 8 p.m., Creamery patio. Creamery ice cream 85 cents with coupon, \$1.35 without.
Monday, June 16
 Dance Aerobics "Divisions," 8 to 10 p.m., White Building gymnasium.
Tuesday, June 17
 Music at Noon: Fisher Plaza, Jazz Showcase.
 GSA Film Series Explazaganza, 9 p.m. Fisher Plaza, "Roman Holiday."
Wednesday, June 18
 HUB Lawn Films, dusk, "Four Weddings and a Funeral."
Thursday, June 19
 Music at Noon: Fisher Plaza, Mick and the Mystics.
 Ice Skating "Divisions," 8 to 11 p.m., Penn State Ice Rink.
Friday, June 20
 Ice Cream "Divisions," Tarnished Six Dixieland music, 7 to 8 p.m., Creamery patio.
Saturday, June 21
 Music at Penn's Woods Orchestra Performance, 7:30 p.m., Eisenhower Auditorium.
 GSA Family Films, 8:30 p.m., Fisher Plaza, "Babe."
Sunday, June 22
 Music at Penn's Woods, 3 p.m., Music Building Recital Hall.
Monday, June 23
 Dance Aerobics "Divisions," 8 to 10 p.m., White Building gymnasium.
Tuesday, June 24
 Music at Noon: Fisher Plaza, K-Jazz Quartet.
 GSA Film Series Explazaganza, 9 p.m. Fisher Plaza, "Funny Face."
Wednesday, June 25
 Six-week session begins.
 Comic Operas for the Movies by Albert Herring, 7:30 p.m., Music Building Recital Hall.
 Summer Opera Film Series, 7:30 p.m., Recital Hall.
 HUB Lawn Films, dusk, "Grumpier Old Men."
Thursday, June 26
 Music at Noon: Fisher Plaza, Simple Gifts.
 Ice Skating "Divisions," 8 to 11 p.m., Penn State Ice Rink.

LECTURES

Thursday, June 19
 Summer Science Seminars, Paul Babitzke on "Regulation of Gene Expression by RNA Structure and RNA-Binding Proteins," 3:30 p.m., The Nittany Lion Inn.
Monday, June 26
 Summer Science Seminars, Mark Handcock and Martina Morris on "Getting the Most Out of Your Data: A Graphical Approach to Measuring Distributional Differences," 3:30 p.m., The Nittany Lion Inn.

CONFERENCES

Monday, June 16
 4-H Ambassadors, Findlay Commons, through June 18.
Tuesday, June 17
 Bug Camp for Teachers, Headhouse 3, through June 19.
Friday, June 20
 Donald Westlake on "Landscapes of Mystery," through June 22. To register, phone (800) PSU-TODAY.
Sunday, June 22
 "African American Traditions," Penn State Conference Center and Hotel, through June 28.
Monday, June 23
 Bug Camp for Kids, Headhouse 3, through June 26.

EXHIBITS

HUB Art Alley Cases
 Ceramic exhibit by Matthew Van Horn.
 HUB Art Alley Panels
 n Asia-Southwest China exhibit featuring watercolor scrolls, through June 22.
 HUB Browsing Gallery and Formal Gallery
 Exhibit by the Central Pennsylvania Festival of the Arts, through July 18.
 HUB Hall Cases
 Exhibition by the craft center summer instructors, through June 22.
 Kern Panels
 Photos by the State College Slide Club, through June 22.
 Kern Tall Cases
 Sculpture by Howard Lawrence, through June 22.
 Palmer Museum of Art
 "Our Town: A Selection of Town Views from the Pennsylvania Prints," through Sept. 28.
 "Making History: Historical Narratives in Pennsylvania Prints," June 17 through Aug. 31.
 Zoller Gallery
 Crafts National 31, through July 20.

■ Reflects an international perspective.

Commonwealth College seeks associate dean

The Commonwealth College is conducting an internal search for the position of associate dean for academic programs, and requests nominations and applications for the position.

The position will report to the dean of the Commonwealth College and, working with faculty and staff of the campuses of the college, be responsible for the academic programs.

The associate dean is expected to provide leadership for market research and environmental scanning to identify the educational needs of the regions served by the college; to work with faculty and external focus groups to develop courses (credit and non-credit) and programs (degree, non-degree and certificate); and to work with campus and college curricular affairs committees for their review and approval.

The associate dean also is expected to coordinate program quality assessment and accreditation reviews, and to work with other colleges and with program advisory groups.

Candidates should have an earned doctorate, substantial experience in market-based academic pro-

gram development and experience in college/university teaching. The position requires an individual with significant leadership skills and the ability to work collaboratively with faculty, staff, administrators and community leaders throughout Pennsylvania.

The Commonwealth College, the University's largest college, is represented at 12 campus locations: Beaver, Delaware County, DuBois, Fayette, Hazleton, McKeesport, Mont Alto, New Kensington, Shenango, Wilkes-Barre, Worthington Scranton and York. The college has a full-time equivalent faculty and staff of 1,300 and a headcount enrollment of 14,050.

Additional information on the Commonwealth College can be found on the Web at <http://www.ces.psu.edu>.

Nominations and applications should be sent to Rachel Miller, Commonwealth College Human Resources, 431 Rider Building, 120 S. Burrows Street, University Park, Pa. 16801 (Fax: 814-865-7145). Application deadline is July 11. The Commonwealth College embraces the University's statement on affirmative action/equal opportunity. Women and minorities are encouraged to apply.

Acting director appointed for University Scholars Program

Cheeryl Achterberg, professor of nutrition, has been appointed acting director of the University Scholars Program, effective July 1. Achterberg replaces **James Rambeau**, associate professor of English and American studies, who is returning to full-time teaching and research after five years of distinguished service.

Achterberg is an award-winning teacher and researcher who has extended her expertise around the world through scholarship, service and outreach. She received, among numerous other such recognitions, Penn State's Milton S. Eisenhower Award for Distinguished Teaching in 1995. The American Dietetic Association named her the Ruth M. Leverson Award winner in Nutrition Education in 1995. She has been principal investigator on numerous competitively funded research projects and has published more than 60 peer-reviewed papers and numerous book chapters and monographs. She has been active in international service with the USAID and the UN's Food and Agriculture Organization, and has served on numerous national and international advisory boards, panels and workshops.

Achterberg has advised and supervised numerous graduate students and honors students and has taught four different honors courses in the College of Health and Human Development. She is a graduate of California Polytechnic State University at San Luis Obispo and earned her Ph.D. at Cornell University. During the 1997-98 year she has served as Fellow in the CIC Academic Leadership Program and as an Administrative Fellow in The Office of the President.

CHEERYL ACHTERBERG

Specialist joins staff of Center for Quality and Planning

Robert Barlock has joined the staff of the Center for Quality and Planning as a planning research and assessment specialist. He will provide analytical support for the unit. He previously worked in the offices of Undergraduate Education, Planning and Analysis, and Administrative Systems.

Barlock has a background in quantitative techniques and decision making and has provided analytical support for numerous administrative offices and academic units of the University, as well as for the University Faculty Senate. Most recently, he participated in analyses in support of assessment initiatives at the University, including the creation of an instructional workload model, a satisfaction survey of recent alumni and a study evaluating the effectiveness of active, collaborative, distance learning techniques.

In addition to new quality, planning and assessment initiatives he will have ongoing responsibility in support of various salary, equity and ongoing assessment studies. Barlock also is chairperson of the Patton Township Planning Commission.

ROBERT BARLOCK

Appointments

Cooperative Extension gains associate director

As part of an overall plan to engage the entire University in a broadened outreach effort, **Diane V. Brown** has been named associate director of cooperative extension and outreach. In this position, she will provide leadership for the day-to-day operation of Penn State Cooperative Extension and will work closely with the director of cooperative extension, **Theodore R. Alter**, to develop effective organizational and administrative processes.

Brown will assist the director in facilitating cooperation and collaboration across the College of Agricultural Sciences and with other colleges and outreach units within the University to develop partnerships and multidisciplinary approaches to solving problems identified through community-based needs assessment and local, state and national priorities.

Brown has a bachelor's degree in home economics education from Bridgewater College in Virginia, a master's degree in family management and community development from the University of Maryland, and a doctorate in adult education from Penn State. She has worked in extension education in four states and has experience in all program areas.

Brown began her career as a home economist in Virginia and held similar positions in Maryland and Iowa before joining Penn State in 1980. As an extension home economist in the Southeast Region for Penn State Cooperative Extension, she led programs in family resource management, energy, equipment and food economics. In 1983, Brown was named family living program leader for counties in southeastern Pennsylvania.

Brown has received key awards in her field. She was named regional director of the West Region for Penn State Cooperative Extension in 1989 and in 1995, was named associate dean in the College of Agricultural Sciences and associate director of Penn State Cooperative Extension.

DIANE V. BROWN

Communications welcomes manager of alumni relations

Kristen L. Kaminski has been named manager of alumni relations and special events for the College of Communications. In her new position, Kaminski will be responsible for administering alumni programs and developing and managing the college's external programs, including lectures, internship fairs and career seminars.

Kaminski brings to the position more than eight years of experience in development and alumni and public relations. Most recently, she served as assistant director of development and public relations for St. Joseph Medical Center in Stamford, Conn. There, she was responsible for fund raising, prospect research and events, including benefits, lecture series and educational seminars. In addition, she researched, developed and implemented a comprehensive marketing plan for the hospital's off-site Family Medicine Center. Before joining St. Joseph's, Kaminski served as a consultant for Greenwich Hospital and as business manager for the New England Center for the Headache.

Kaminski received a B.S. in health policy and administration from Penn State in 1989. As an alumna, she assisted in the re-establishment and served as president of the Southern Connecticut Chapter of the Penn State Alumni Association, which was the recipient of a 1997 Alumni Chapter Service Award. She also served as chair of the chapter's scholarship fund and continues to serve as a member of the Dance Marathon Alumni Interest Group Board of Directors.

In addition to her involvement with the Alumni Association, Kaminski has had several volunteer experiences.

KRISTEN L. KAMINSKI

Assistant professor holds Behrend's first endowed faculty fellowship

Jeffrey K. Pinto, assistant professor of management at Penn State Erie, Behrend College, has been named the Samuel A. and Elizabeth B. Breene Fellowship in Management—the college's first-ever endowed faculty fellowship.

The late Samuel Breene, a lifelong resident of Oil City, graduated from Penn State in 1937 and later served as a trustee of the University. Breene and his wife Betty created the fellowship to enable an outstanding faculty member in management to further his or her contributions in teaching, research and service.

Pinto's initial appointment is for a five-year period. The fellowship will provide support for his research including travel, materials and computer needs.

Pinto received his doctorate in organization theory from the University of Pittsburgh, and has taught at Penn State-Behrend since 1994. His most recent book, *What Made Gertie Gallot? Lessons From Project*

Failures, was written in collaboration with **O.P. Kharbanda**. The volume examines famous projects ranging from the Eurotunnel and the Ford Edsel to the Sydney Opera House and the Xerox Alto personal computer, all of which either failed or created record-breaking cost overruns. Pinto and his co-author used the examples to synthesize relevant management lessons from each case.

Pinto's other recent book, *Power and Politics in Project Management*, focuses on the judicious and appropriate use of power and political behavior in order to manage projects more effectively.

Pinto was recently named by the directors of the Project Management Institute to receive the organization's Distinguished Contribution Award. Pinto received the award in recognition of his efforts as the editor of the *Project Management Journal*; for his sustained service and outstanding contributions to the Project Management Institute; and for promoting professionalism in the field of project management.

JEFFREY K. PINTO

ICDE speaker offers possibilities for the future

By KAREN WAGNER
Public Information

Imagine top-of-the-line computers that cost no more than \$300 and are extremely simple to use—it's part of the digital future for education envisioned by **Nicholas Negroponte**, founder and director of the media laboratory at the Massachusetts Institute of Technology.

Negroponte, international best-selling author, researcher and columnist for *Wired* magazine, joined Gov. **Tom Ridge** and President **Graham B. Spanier** in addressing delegates of the 18th International Council for Distance Education World Conference on June 2 at The Bryce Jordan Center where participants discussed everything from new learning environments to the global future of education.

Negroponte, who also is the first executive director of the Paris-based world center for personal computation and human development, called for a re-examination of the complex software packages and interfaces that result in "PC obesity." One company will design an expensive new chip that adds computing power, while the other company quickly follows with a software package that eats up that memory. Negroponte said simplification and standardization of circuit board components and software would result in more manageable and affordable computers.

"I don't know about you, but if I had to choose between one expensive top-of-the-line computer and 25 lower-end models that perform the same basic functions, I'd choose the 25 computers in the classroom," said Negroponte, whose 281 Foundation was recently established to provide 7- to 12-year-olds in developing nations access to the digital world of computers.

While Negroponte describes himself as an avid proponent of all things digital, he acknowledges that technology has its dark side—those who are left behind—the digital homeless. Many in this group are between the ages of 30 and 45 who don't have time, or are unwilling to take the time, to learn the technology. Interestingly, it is often industry leaders in their 30s and 40s, some whom may be members of the digital homeless, who make the decisions that drive computer hardware and software development.

Young children and teenagers have been among the most enthusiastic computer users, but we often fail to recognize that senior citizens join teens and children in forming the second largest group of users. Ridge, Spanier and Negroponte agreed that in many instances, it will be up to the kids to teach their parents how to use computers.

Americans are in a very privileged position when it comes to computers, with up to 85 percent of its teenagers having access. Negroponte predicted that this would make the U.S. a different kind of com-

Looking ahead

Nicholas Negroponte, founder and director of the media laboratory at the Massachusetts Institute of Technology, made several predictions for the future of computing and the Internet during his talk before the 18th International Council for Distance Education World Conference, held recently at University Park.

Photo: Greg Grieco

petitive field. Developing and European nations have not been as fortunate. In France, for example, fewer than 5 percent of all teenagers have access to computers in the home.

Other Negroponte predictions include:

- More than \$1 trillion in commerce will be conducted over the Web by the year 2000.

- The demographics of the Internet will change drastically as developing nations get connected. English will remain the "air traffic control language" of the Internet, but it won't necessarily form its content. In fact, English content will soon be in the minority.

- Telecommunications economics are about to be turned upside down with the advent of new applications like Internet telephone. These new uses for Internet are already possible, we just haven't figured out how we're going to charge for them.

- The doubling of new Internet users each year won't cause the network to collapse as some have predicted.

- The anticipated millennium doomsday problem, where clocks in computers with two digits will be unable to interpret the year 2000, will be solved, "but at great cost," said Negroponte.

- Copyright law has gone astray. While it was originally intended to protect the author or creator, it now protects the channel of distribution—the publisher. Negroponte predicted that in the future, authors and creators will be able to determine their own economic models for the sale and distribution of their creative works.

Gov. Ridge and Spanier made some predictions of their own about the implications of information technology for the Commonwealth and for Penn State. Gov. Ridge highlighted the success of his Link-to-Learn educational technology initiative. Link-to-Learn is a \$127 million program designed to bring technology into Pennsylvania schools, libraries and communities. Every teacher in Pennsylvania will have access to its resources.

Penn State is laying the groundwork for Link-to-Learn in addition to developing its own vision for a World Campus (see story on page 1). The University will deliver several of its best undergraduate, graduate and certificate programs over the Internet.

For more information on Negroponte's 281 Foundation, visit its Web site at: <http://www.281.org/>. For more information on Link-to-Learn, visit <http://L2L.ed.psu.edu/>

Obituaries

Fred D. Houser, herds manager, College of Agricultural Sciences, from July 1, 1927, until his retirement July 1, 1973; died May 6 at the age of 88.

Suren Lalvani, associate professor of humanities and communications at Penn State Harrisburg, from Aug. 16, 1990, until his death May 3. He was 43.

Howard M. Lane, facility specialist, Office of Physical Plant, from July 24,

1963, until his retirement April 1, 1985; died April 27 at the age of 74.

Warren W. Miller, professor of chemistry, Eberly College of Science, from Feb. 1, 1950, until his retirement April 1, 1977; died April 29. He was 82.

John J. Morrow, assistant director of resident instruction and associate professor of mathematics at Penn State Mont Alto, from Sept. 1, 1959, until

his retirement July 1, 1970; died March 31 at the age of 94.

Mary Ann Nevel, residence hall worker in Housing and Food Services, from Sept. 6, 1974, until her retirement Feb. 1, 1987; died May 2. She was 70.

Paul W. Pierson, head of landscape planning and new construction, Office of Physical Plant, from July 1, 1946,

until his retirement Oct. 1, 1976; died May 3 at the age of 81.

Juanita H. Thurman, statistical clerk, College of Agricultural Sciences, from Jan. 1, 1963, until her retirement Sept. 1, 1979; died May 2. She was 83.

Mari R. Trenkle, academic support programs coordinator, Penn State Erie, Behrend College, from Nov. 29, 1985, until her death April 15. She was 48.

LECTURES

Summer Science Seminars to cover a variety of topics

Spend a summer afternoon learning about the latest research from top scientists in the Eberly College of Science. Sponsored by the Office of Summer Sessions and the College of Science, Summer Science Seminars present new research findings to graduate students, faculty and a general audience interested in science.

The free seminars are held Thursday afternoons in the Nittany Lion Inn at University Park with refreshments at 3:30 p.m. and presentations at 4 p.m.

■ **June 19 in the Penn State Room:** Paul Babbitz, assistant professor of biochemistry and molecular biology, on "Regulation of Gene Expression by RNA Structure and RNA-Binding Proteins."

■ **June 26 in the Fireside Room:** Mark Handcock, associate professor of statistics, and Martina Morris, asso-

ciate professor of sociology and statistics, on "Getting the Most Out of Your Data: A Graphical Approach to Measuring Distributional Differences."

■ **July 3 in the Penn State Room:** Qi Li, assistant professor of physics, on "Science and Technology of Giant and Colossal Magnetoresistance Materials."

■ **July 17 in the Penn State Room:** Richard Ordway, assistant professor of biology, discusses "Nerve Cell Function: Lessons From Tiny Flies."

■ **July 24 in the Penn State Room:** Karl Mueller, assistant professor of chemistry, on "Spinning, Flipping and Connectivity: Solid-State NMR of Complex Solids."

■ **July 31 in the Penn State Room:** Leonid Berlyand, professor of mathematics, talks about "Percolation Theory and Disordered Materials."

Free seminar

Award-winning artist Betye Saar, shown here setting up her "Tangled Roots" exhibit at the Palmer Museum of Art in 1996, will give a lecture on a mixed-media "assemblage" called "Vision of El Cremo," part of the "African American Traditions" seminar to be presented by the Institute for the Arts and Humanistic Studies June 22-28 at University Park. The free seminar also includes a staged reading of a new play by Charles Dumas, associate professor of theatre arts; film screenings; a "mini-performance" by a jazz trio and a follow-up lecture on the roots of jazz; and a reading of works by African American post-modernist poets. For more information, contact Sue Reighard at (814) 865-0495 or e-mail lahs@psu.edu.

Photo: Greg Grieco

Methodology Workshop focus to be structural equations

Nationally renowned experts in structural equation modeling will come to University Park June 30 for the fourth annual Population Research Institute-sponsored Methodology Workshop in 101 Kern.

Kenneth Bollen, Zachary Smith professor of sociology at the University of North Carolina, a leading methodologist in the uses of structural equations, launches the one-day workshop with "An Overview of Structural Equation Models." This session, beginning at 9 a.m., draws on Bollen's book *Structural Equations With Latent Variables*. Bollen, a Fellow of the Statistical Core at the Carolina Population Center at University of North Carolina, is

best known for his cross-national research on democratic political systems and his statistical research on structural equation models.

Two afternoon sessions, from 1:30 to 4:30 p.m., present applications of this modeling approach. **Frederick Lorenz**, professor of sociology and statistics at Iowa State University, will discuss the use of structural equations for growth curve modeling. Much of Lorenz's work focuses on patterns of interactions within families as a key mediating mechanism linking economic conditions to physical, psychological and behavioral outcomes of children and adults.

D. Wayne Osgood, professor of crime, law and justice, and sociology at Penn State, rounds out the workshop with a presentation of additional uses of the method in "Structural Equation Modeling: Some Examples." He is the co-author of *Personality and Peer Influence in Juvenile Corrections*.

Registration for the Structural Equation Modeling Methodology Workshop is free for all Penn State faculty, students and staff. Supplementary reading packets, to be distributed before the workshop, are guaranteed for the first 60 registrants. For registration information, contact **Melanie Heron** at (814) 863-9571 or through e-mail at workshop@pop.psu.edu.

Promotions

Staff

Shelly K. Aina, lead applications programmer/analyst in Office of the Vice Provost for Educational Equity.

Mary Kay Amistadi, research support associate in College of Agricultural Sciences.

Brenda J. Bailey, clinical trials data specialist at The Hershey Medical Center.

Evette E. Bazemore, network coordinator at Penn State Delaware County.

Brian S. Becker, communications support coordinator in Computer and Information Systems-Telecommunications.

Gregory A. Berthold, network coordinator in Computer and Information Systems-Telecommunications.

David E. Beyerle, senior communications engineer in Computer and Information Systems-Telecommunications.

Lisa A. Bitner, staff assistant V in Housing and Food Services.

Diane A. Boldin, staff assistant V in Continuing and Distance Education.

Kelly L. Seesholtz, staff assistant VI at The Hershey Medical Center.

Stephen A. Shala, senior applications programmer/analyst in College of Agricultural Sciences.

Jennifer J. Shultz, customer service coordinator at Penn State Harrisburg, Capital College.

Judy R. Spangler, staff assistant VI in Business Services.

Mary A. Spangler, systems planning specialist III in Computer and Information Systems-Administrative Systems.

William W. Speakman, director of development in Division of Development and Alumni Relations.

Kathy M. Spicer, administration specialist in College of the Liberal Arts.

Ellen M. Springer, staff assistant VI in Business Services.

Vickie A. Stevens, staff assistant V in Continuing and Distance Education.

Rose M. Stewart, staff assistant VI in Applied Research Laboratory.

Barbara A. Struble, assistant to the Bursar in Corporate Controller's Office.

Patricia A. Tarbay, staff assistant VII in Office of Budget and Resource Analysis.

Carol S. Tyler, staff assistant V in Business Services.

Sharon A. Ward, coordinator, research studies at The Hershey Medical Center.

Christine L. Wentzel, medical review coordinator at The Hershey Medical Center.

Meredith K. Williams, coordinator, Student and Corporate Services in The Small College of Business Administration.

Karen A. Wilson, program aide in Continuing and Distance Education.

Stephen J. Wright, director, distance education programs in Continuing and Distance Education.

Technical Service

Jerry L. Jones, press operator, offset duplicator, single in Business Services.

James A. McGovern, storeroom assistant in Housing and Food Services.

Katherine A. Plymmer, residence hall utility worker in Housing and Food Services.

Michael H. Preslovich, maintenance worker-general in Housing and Food Services.

Charles A. Spicer, property protection guard in University Safety.

Russell L. Witherite, maintenance worker-general in Housing and Food Services.

Awards

Several honored in College of Engineering

The College of Engineering has announced the recipients of its 1997 faculty and staff awards. These awards are given annually to honor outstanding teaching, research, advising and service among its faculty and staff. Award recipients were nominated by their respective departments and selected by colleagues and representatives from the Penn State Engineering Society (PSES), an alumni constituent organization and sponsor of the award program.

■ Premier Teaching Award

Recognizes and honors an individual whose contributions to engineering education or to the art of teaching are of exceptional quality. This year's recipient is **Russell R. Barton**, associate professor of industrial and manufacturing engineering. Barton's success as a teacher has always been evident in student evaluations and by the number of students who select him as an adviser. Since joining Penn State in 1991, he has worked to improve the engineering curriculum by incorporating new and innovative courses at the undergraduate and graduate levels.

■ Premier Research Award

Recognizes and honors individuals whose contributions to scientific knowledge through research are exemplary and internationally acclaimed. This year two faculty received this award:

— **Philip J. Morris**, Boeing/AD Welliver professor of aerospace engineering, joined the faculty in 1977. Morris is known internationally for his contributions to the prediction of noise from supersonic jets. His research at Penn State also involves the use of parallel computers for computational aerodynamics.

— **Christopher R. Wronski**, Leonard professor of microelectronic materials and devices, electrical engineering and engineering science and mechanics. His research involves thin photovoltaics and solar cell technology based on hydrogenated amorphous silicon. He has pioneered research on solar cell development and light-induced defect generation. Wronski joined Penn State's faculty in 1987.

■ Advising, Teaching and Research Awards

The PSES Outstanding Advising Award recognizes and honors those serving as academic advisers to engineering students. **Timothy C. Ovaert**, associate professor of mechanical engineering, received this award for his outstanding contributions in this capacity.

■ Outstanding Teaching Awards

The Outstanding Teaching Awards recognize and honor outstanding engineering educators for excellence in teaching and for contributions to the art of teaching.

— **Renata S. Engel**, associate professor of engineering science and mechanics, and of engineering design and graphics; **John S. Lamancusa**, associate professor of mechanical engineering and director of The Learning Factory; and **Mario Sznajder**, assistant professor of electrical engineering, all at University Park; and **Robert Avanzato**, associate professor of engineering at Penn State Abington.

■ Outstanding Research Awards

Recipients are recognized and rewarded for accomplishments in advancing the frontiers of knowledge. These research awards honor individuals who have brought recognition to themselves, the college and Penn State this year's recipients include:

— **Kristin A. Fichtorn**, associate professor of chemical engineering with a joint appointment in the physics department; **William E. Higgins**, associate professor of electrical engineering; and **Joseph L. Rose**, Paul Morrow professor in design and manufacturing, in the Department of Engineering Science and Mechanics.

■ Service and Staff Awards

This award recognizes and honors outstanding service by staff employed in the college. Honored this year is **Glenn K. Young**, administrative assistant in the Department of Electrical Engineering.

Student activities coordinator earns Towns Award for impact on women

Janet Widoff is this year's Penn State Harrisburg Kathryn Towns Award recipient.

Presented by the Women's History Month Committee, the honor recognizes a "Penn State Harrisburg student, graduate, staff or faculty member who has demonstrated a commitment to heightening the awareness of issues and concerns having an impact on women" at the college.

The award is named for Kathryn Towns, longtime Penn State Harrisburg faculty member and now professor emerita.

Widoff serves the campus as coordinator of student activities and manager of the College Life Enrichment Offices. She is the second person presented the award.

JANET WIDOFF

Three cited as outstanding teachers

The College of Arts and Architecture has named three winners of its Outstanding Teaching Award: **Charles Garoian**, associate professor of art education; **Robert Hatten**, associate professor of music; and **Michael Fels**, assistant professor of art. In each case, students and colleagues praised the commitment and enthusiasm of the professors.

An engineering student from one of Garoian's art classes characterized him as "extremely open-minded and willing to stretch his own perception of his class and his teaching, not only with me but with all students."

Hatten's commitment is elucidated

in a letter from a colleague stating, "Music theory is a subject that cannot be taught in large lectures, but rather demands considerable interaction between student and faculty. (Hatten) not only carries a large teaching load, but spends many hours outside of class discussing problems and projects with students."

Finally, to characterize the breadth of Fels' experience and its effect, a colleague wrote, "(Fels) has the rare ability to integrate complex ideas into the very fabric of studio exercises, and the result is an unusually high degree of sophistication in student work."

Adviser lauded as outstanding mentor

Ro Nwranki, adviser in the Office of Student Aid, has received the 1997 Outstanding Mentor Award from the Center for Adult Learner Services.

The award was instituted in 1995 by Alpha Sigma Lambda, the Adult Learners of Penn State, the Graduate Student Association and Penn State University Veterans Organization.

to recognize faculty or staff who are advocates for adult learners and demonstrate such qualities as a positive attitude, sensitivity and approachability.

Faculty and staff from all Penn State locations are eligible for the award and this year, staff from six campuses were nominated.

Mont Alto recognizes two faculty

Two Penn State Mont Alto campus faculty were recently honored. They are:

Gary Webster, associate professor of anthropology, who received the Martha A. Fisher Award for Teaching Excellence. To be eligible for this teaching award, an instructor must teach at least four classes per year and be nominated by a Mont Alto campus student; and

Lauraine Hawkins, assistant professor of biology at Penn State Mont

Alto, who was honored for the second consecutive year with the Student Government Association Award for Excellence in Advising. To be eligible for this advising award, the instructor must teach at least four classes per year and be nominated by a Mont Alto campus student.

Both award nominations require the nominating student to write a two-page essay discussing their reasons for their nomination.

Mont Alto wins two marketing awards

Laura K. Frome recently accepted two national high education marketing awards on behalf of Penn State Mont Alto. Public information and special events coordinator for the campus, Frome coordinated publication of a faculty brochure used in student recruitment and recognized by the National Council for Marketing and Public Relations as well as the *Admissions Marketing Report*.

The brochure won the first place gold Paragon Award from the council and a silver award in the Admissions Marketing Report's annual Advertising Awards competition. Nearly 1,200 entries in 33 different categories were reviewed in the competition.

Frome, a 1994 Penn State graduate, joined Mont Alto's Office of University Relations staff in December 1995.

Partings

Senior student affairs director served for more than 30 years

Melvin Klein, senior director for student affairs at Penn State since 1993 and interim director of the Office of Student Unions since 1996, is retiring this month after more than 30 years at Penn State.

As senior director for student affairs, Klein was responsible for several cross-division functions in the Division of Student Programs, including coordinating and monitoring Continuous Quality Improvement initiatives, coordinating all major renovation projects and coordinating the division's annual strategic planning process.

As interim director of the student unions office, Klein focused intensively on the design planning process for

the expansion of the Hetzel Union Building (HUB) and the construction of the new Paul Robeson Cultural Center on the University Park campus. The HUB/Robeson project, which received final approval from the Board of Trustees in March, will add 95,000 square feet to the HUB's existing 154,000 square feet of floor space.

Between 1972 and 1993, Klein held several positions in the student programs division, including senior director of the division and director of the Office of Union Programs and Operations, the Office of Unions and Student Activities, the Kern Graduate Commons, student activities and religious affairs, and the office of student activities.

He also served as assistant dean of student affairs from July 1967 to August 1972, and in 1966-67 was a graduate assistant at Penn State.

Klein has won several awards and honors, including the Alpha Phi Omega Award for Distinguished Service to Penn State in 1978. He has been named an honorary inductee by the Golden Key National Honor Society, the Order of Omega National Greek Honor Society, and the Phi Eta Sigma National Honor Society.

An avid reader, Klein enjoys listening to popular music, attending theater productions (particularly musicals), gardening, taking part in summer sports and traveling with his family.

Continuing education head served 30 years

Margaret C. Hopfl, director of Continuing Education at Penn State Altoona, has retired after more than 30 years of service to the University. A lifelong student, teacher and advocate for continuing education, to many, she exemplifies the best in continuing and distance education.

Hopfl began her career in Continuing and Distance Education as a staff assistant in 1965. Soon she realized she wanted to move up in her career, but with only a high school diploma, she needed more education. She began taking night classes and eventually earned a bachelor's degree in business education. A year after she graduated, she was named a representative in Continuing Education. She also continued her education, obtaining an M.A. in adult education from Indiana University of Pennsylvania.

MARGARET C. HOPFL

personal activities.

Eventually she moved into the position of director of Continuing Education. Hopfl's career accomplishments include developing lasting programs like the National Railroad Conference, overseeing the creation of the Adult Center and new services for the growing population of adult students, and starting the Women's Leadership Institute in 1995.

She has been married to her husband, John, for 43 years. They have two adult daughters and two grandsons. Her retirement plans include finishing her dissertation for her D.Ed. in adult education, continuing to teach and lead workshops and seminars part time, and spending more time with leisure and

Nurse retires after 26 years with Hershey

Mae Rader, a nurse in the operating room at The Hershey Medical Center, has retired.

In her retirement, she has maintained the fast-paced lifestyle that came along with 26 years of service in the main operating room. Immediately after retiring she took over the kitchen duties at the Senior Citizens Center of Derry Township, joined a Tuesday quilting group and met with other medical center retirees.

She also recently became a blood donor at the medical center.

In March, Rader was selected as Employee of the Month. While working full-time she

MAE RADER

pursued her B.S.N. and obtained her Certified Nursing Operating Room certification.

Retirement also has given Rader more leisure time to spend with her family, including three sons, a daughter, three granddaughters, two 5-year-old English springers and a 6-month-old calico kitten.

Staff assistant retires after serving 32 years

Gloria Wisner McNeal, staff assistant VIII in the School of Music, has retired after 32 years of service. She began her career at Penn State in the College of Education in 1965, then moved to the College of Arts and Architecture in 1972, where she remained until her retirement in March.

McNeal plans to pursue her interests of raising Christmas trees, gardening, making Wednesday trips to Belleville and surfing the Internet.

GLORIA WISNER MCNEAL

Fayette CEO will retire

August H. Simonsen, campus executive officer at Penn State Fayette, has announced his plans to retire. Simonsen plans to retire later this year, but wanted the search for his successor to begin immediately.

Simonsen began his tenure as CEO in July 1992, coming from the McKeesport campus where he was a professor in environmental sciences and the interim campus executive officer. Working with leaders from the Campus Advisory Board, the staff and faculty, he was able to establish an associate degree program in nursing, an associate degree program in human development and family studies, an RN/bachelor of science program and the bachelor of science program in general business.

In Simonsen's five-year tenure as CEO, the campus has built three modern computer laboratories, two technology classrooms, a clinical nursing laboratory and a distance-learning outreach classroom. In addition, the construction of the Biomedical Technology Building is under way.

Several long-term employees retire

Joyce A. Getz, staff assistant VII at Penn State Altoona, Altoona College, from Oct. 1, 1974, to April 1.

Bernadine L. Hahn, staff assistant XVI, Business Services, from June 16, 1972, to April 1.

Betsy A. Hartman, staff assistant VI, Student Affairs, from April 22, 1974, to April 1.

Louis P. Kraus, advanced engineering aide, Applied Research Laboratory, from Jan. 2, 1973, to April 1.

Arthur F. Krieg, professor and chief of clinical lab pathology at The Hershey Medical Center, from July 1, 1968, to Jan. 1.

JoAnn K. Popik, staff assistant VI, College of Agricultural Sciences, from April 3, 1978, to April 1.

Daisy E. Romig, staff assistant VI, Research and Graduate School, from Oct. 8, 1979, to April 1.

Franklin R. Straub, senior patrol officer at The Hershey Medical Center, from March 3, 1980 to April 13.

Mary Tindley, staff assistant VI, Office of the President, from Dec. 3, 1979, to April 12.

Kenneth L. Wood, cutting machine operator, Business Services, from Feb. 1, 1968, to April 26.

Gladys M. Zserai, patient service aide at The Hershey Medical Center, from March 8, 1982, to March 29.

Nature at least as important as nurture in the way we learn

Even in old age, genes still influence the way we learn, study suggests.

A new study of Swedish twins who are 80 years of age or older shows that individual differences in how they acquire and process knowledge relies as much on genetic inheritance patterns as on environmental factors.

The study is the first to look at the genetic influence on many different aspects of cognition in older people, and confirms patterns that have emerged from similar studies in younger and middle-aged people. Because cognitive function plays a crucial role in determining the quality of life for older people, understanding how cognition develops as people age could lead to beneficial interventions that might slow or reverse cognitive decline.

The study was headed by National Advisory Council on Aging member **Gerald E. McClearn**, of the Center for Developmental and Health Genetics and a faculty member in the College of Health and Human Development.

"In the group of Swedes that we studied, even the effects of more than 80 years of environmental influence didn't eliminate the impact of heredity on cognitive ability," McClearn said.

A wide range of environmental variables such as geography, education, socioeconomic status, nutritional habits, occupation, disease and stress exposure might be expected to have substantial influences on cognition.

Over the course of a lifetime, twins exposed to differing environments might be expected to display wide variations in the way they learn. Yet given the cumulative impact of a lifetime of environmental disparities, this study shows that the effects of

Gerald E. McClearn, Evan Pugh professor of health and human development, is studying how people learn. His work with twins who are more than 80 years old is the cover story of the June 6 issue of Science magazine.

Photo: Greg Grieco

environment on cognition are barely equal to the effects that genetic heritability has on cognition.

The research is unique in that it looks, in people age 80 and older, at general (intellectual ability) and specific (spatial, verbal and memory) cognition, and examines in detail each of the three separate areas of specific cognition.

Previous twin studies have shown that general cognitive abilities are among the most heritable behavior traits, with heritable influence increasing from 20 percent in infancy to 60 percent in adulthood. This finding contradicts the commonly held assumption that environmental influence increases throughout the lifespan with a corresponding decrease in genetic influence.

The present study shows that the relative contributions of genetics and environment—about half and half—extends into very advanced age. Investigators in this study were able to use the Swedish Twin Registry, which has tracked 96 per-

cent of all twins in Sweden. The study used 240 sets of these twins born before the start of World War I.

They were an average age of 83 years old. To assess cognitive abilities, twins were tested by licensed nurses using tests for verbal meaning, figure logic, block design and picture memory. Analysis of combined scores of cognitive ability showed that heritability accounted for 55 percent of the individual differences in ability, a result similar to that seen in people who are middle-aged. The heritable impact on specific cognitive abilities, something little studied previously, was somewhat less than 50 percent but still highly significant.

For both general and specific cognitive abilities, identical twins, as would be expected, showed much stronger similarities than did fraternal twins. Additionally living together or sharing the same environment in later life did not account for any significant similarity or dissimilarity of envi-

ronmental impact on cognition.

"It is now becoming possible to identify specific genes which may be responsible for some of the differences in cognitive abilities," McClearn said. For example, certain forms of the ApoE gene have been associated with cognitive decline in older people, particularly in those with Alzheimer's disease.

Co-authors on this study with McClearn were **Frank Ahern**, senior research associate in the College of Health and Human Development; **Boo Johansson** and **Stig Berg**, of the Institute for Gerontology at the University College of Health Sciences in Jonkoping, Sweden; **Nancy L. Pedersen** at the Institute for Environmental Medicine of the Karolinska Institute in Stockholm, Sweden; and **Stephen A. Petril** and **Robert Plomin** of the Social, Genetic and Developmental Psychiatry Research Centre at the Institute of Psychiatry in London, England.

Caffeine not a risk factor for osteoporosis

Caffeine is not a risk factor for bone density and osteoporosis in postmenopausal women, according to a study by researchers in the College of Medicine at The Hershey Medical Center.

Principal investigator **Tom Lloyd**, professor of obstetrics and gynecology, and colleagues measured bone density of both total body and hips in 138 healthy women ages 55-70. All of the women had histories of no or minimal hormone replacement therapy and tobacco usage. Their caffeine intake was measured from their personal diet records and by chemical assessment of the caffeine in each woman's brewed caffeinated beverage. "More than 90 percent of the women's caffeine came from coffee and tea," Lloyd said.

The study, conducted in 1983-95, included similar numbers of low-, moderate- and high-caffeine consumers. Low-caffeine intake was defined as zero to two caffeinated cups of coffee per day, moderate as three to four cups per day and high as five or more cups daily. Within each group, women with low, moderate and high exercise patterns were recruited.

Even adjusting for age and weight, in addition to activity level, Lloyd said, "Caffeine intake was not associated with any bone mineral measurements."

High caffeine consumption has been both proposed and denied as a risk factor for decreased bone density and increased chance of osteoporotic fractures in postmenopausal women. In many of the studies, however, said Lloyd, factors affecting bone loss, like smoking, body weight, physical activity, calcium and vitamin intake and hormone replacement therapy, have not been adequately considered.

Lloyd believes that because the Penn State study specifically recruited healthy, postmenopausal women with known, historic caffeine consumption and because caffeine was measured by chemical analysis, the data are more definitive.

According to Lloyd, some studies have relied solely on self-reporting by women as a measurement of their caffeine intake, e.g. number of cups of coffee they consume currently versus several years ago. Those studies do not consider errors in judgment nor the amount of caffeine in each woman's average cup of coffee.

Lloyd said that other commonly suspected links to bone loss in postmenopausal women are calcium intake and low calcium intake. Bone loss can lead to osteoporosis and bone fractures. Hormone replacement therapy has been proven an effective treatment for bone preservation.

Penn Staters

Duane Duncan, senior extension agent in Cumberland County, was re-elected secretary for the National Association of County Agricultural Agents.

Evelyn Ellis, minority coordinator for the College of Arts and Architecture, was awarded the Andrew V. Kozak Fellowship from the Penn State Chapter of Phi Delta Kappa, a professional education fraternity. The Kozak Fellowship is awarded annually to doctoral students for research toward completing dissertations. With the money from the fellowship, Ellis will complete her dissertation on the effects of race and gender on doctoral studies.

Elizabeth Hanley, assistant professor of kinesiology and director of the Penn State Dance Ensemble, has been invited by the president of the International Olympic Academy to direct the dance workshop for the 37th International Session in Ancient Olympia, Greece. She also will attend the International Olympic Academy Alumni Conference in July as official representative of the U.S.A.

At the recent annual meeting of the Pennsylvania Council of Teachers of Mathematics, M. Kathleen Heid, associate professor of education, was presented with the Outstanding Contribution to Mathematics Education Award. For more than 25 years she has been involved in the research and teaching of mathematics, both at the high school and college levels. She has made more than 140 invited presentations to teachers, mathematicians and researchers in 33 states and in three foreign countries. She has served as principal or co-principal investigator on 17 funded projects and has directed a series of multi-year NSF projects.

Donald W. Leslie, associate dean for undergraduate studies in the College of Arts and Architecture, presented the keynote address, "Shared Professional Responsibility in the International Marketplace," at the Second International Symposium on Asia Pacific Architecture "The Making of Public Places," at the University of Hawaii in Honolulu.

Mary-Ellen Madigan, director of admissions and financial aid for Penn State Erie, Behrend College, has been elected to serve on the board of directors of the Alzheimer's Association.

Gregory L. Morris, associate professor of American literature at Penn State Erie, Behrend College, has been selected to participate in a National Endowment for the Humanities Summer Institute for College and University Faculty. The institute will focus on "The Environmental Imagination: Issues and Problems in American Nature Writing."

Hot slate roof!

Raymond Yoder, a worker with the David Maines & Associates Construction Co., is putting a new slate roof on Weaver Building on the University Park campus. The orange tiles that used to grace the roof were too fragile to salvage. Weaver Building is one of the structures benefiting from the University's five-year, \$476 million capital construction plan.

PENNSTATE INTERCOM

Department of Public Information
312 Old Main, University Park, PA 16802 Phone: (814) 865-7517
Address correction requested

Intercom is published weekly during the academic year and every other week during the summer. It is an internal communications medium published for the faculty and staff of Penn State by the Department of Public Information.

Information for publication may be FAXED to (814) 863-3428, or e-mailed to LMR8@PSU.EDU or AXM219@PSU.EDU.

Lisa M. Rosellini, editor
Annamarie Mountz, associate editor
Chris Koleno, staff assistant/calendar

Find us on the Web at <http://newsw.psu.edu/intercom/Home.html>

Penn State is an affirmative action, equal opportunity university.

This publication is available in alternate format.

Intercom survey respondents answer call for participation

About 1,100 individuals from a random sample pool of 2,500 responded to a recent *Intercom* readership survey. The survey, mailed in late April to readers of this publication, sought information from the University community on how well *Intercom* meets its goals of educating and informing faculty and staff members. The questionnaire was sent to a cross-section of employees at all Penn State locations.

The answers and open-ended comments supplied by the 1,100 who participated are being compiled and will be analyzed later this summer. The information will be used to not only gauge how well the *Intercom* meets reader needs, but also to guide the *Intercom* staff in its news delivery and judgment in the future.

Thanks to all those who participated. A report on our findings will appear in a later issue of *Intercom*.

We're on the Web

The *Intercom* is available online every Thursday during the academic year at URL <http://newsw.psu.edu/intercom/Home.html>. During the summer months, it is available every two weeks, beginning on its Thursday publication date.

The *Intercom*, published by the Department of Public Information, and press releases and information from the Penn State News Bureau can now be searched online. By going to <http://newsw.psu.edu/ur/> and hitting the "Search" button, readers can search *Intercom* issues dating back as far as January 1995. Simply enter a word into the query box. For a more defined search, enter more than one word.

Merger date for Hershey/Geisinger drawing near

By LISA M. ROSELLINI
Public Information

As July 1 draws near, the University is facing a multitude of changes in its structure. On that day, not only will The Dickinson School of Law officially become part of Penn State and the Commonwealth College be launched, but Penn State Geisinger Health System will also be born.

As announced in mid-January, the move to merge the clinical operations of The Hershey Medical Center with Geisinger Health System is being made to provide a more secure base of support for the College of Medicine. In just six days, one of the state's largest not-for-profit health care systems covering 40 counties will be created. Approximately 5,000 Hershey employees will now become employees of a new entity called the Penn State Geisinger Health System — and reporting lines, benefits and

Penn State researcher discovers new promise for asthma sufferers

A new type of dry aerosol mist, designed by a Penn State/MIT-led international team, promises to have asthma sufferers worldwide breathing a little easier. The new aerosols have been shown in tests on rats to deliver medication significantly longer and more efficiently than currently used inhalation aerosols.

"With additional research, the new aerosols can lead to improved treatments for asthma, cystic fibrosis and other lung disorders," David A. Edwards, associate professor of chemical engineering and first author of the team's paper, said. "The new aerosols also possess exciting potential as non-invasive delivery systems for medicines such as insulin to treat diabetes and for interferon, a cancer treatment."

The new aerosols are detailed in the June 20 issue of *Science* magazine. Edwards' co-authors include Robert Langer, who led the MIT group involved in the study.

Beyond 2000

Future look of University Park outlined in public meetings

By LISA M. ROSELLINI
Public Information

Envision looking northeast from Pattee Library out toward the Jordan Center, and seeing one long stretch of green. Or how about shifting the central core of campus east of Shortlidge Road, extending the academic area to University Drive, or restricting cars to the perimeter of campus. Those are just some of the options being pondered as the Campus Master Plan for University Park takes shape.

In two public meetings held June 18 — one on campus, the other off campus — planners from Johnson, Johnson and Roy Inc., an Ann Arbor, Mich., design team, outlined three possible alternatives for how the central part of campus could look in the coming years. The firm was hired to map out a rational pattern of development for University Park that reaches far into the future, but provides flexibility.

Dick Rigerink, planning team leader, said the three alternatives selected are not set in stone, but

Aerosols

About 14.6 million Americans are believed to currently suffer from asthma, a 61 percent jump since the early 1980s, according to the American Lung Association. The number of people who die annually from asthma, a condition in which even minor irritants may set off an immune response that shuts down airways, has climbed to 5,000.

Edwards said that the aerosols now most commonly available often provide only a few hours of relief. The inhalation therapy has to be repeated frequently and this chronic use, particularly in the case of bronchodilators used by asthmatics, can increase the probability of a fatal asthma attack.

Medication delivered by the new aerosols penetrates more efficiently into the lungs and stays there longer, Edwards said. When the new aerosol is approved for human use, patients can expect to use their inhalers less frequently — once every day or two versus several times per day — and to use a lower dose of the medication.

The new aerosols are composed of tiny, nearly invisible particles that are three- to 10-times larger than those used currently but weigh up to 90 percent less. The particles are, in some ways, like a whiffle ball with medication inside. When the whiffle ball-like porous particles are inhaled, the medicine slowly seeps out in the lungs and either acts directly on the lung tissue or enters the blood stream through the lung wall as inhaled oxygen does.

Edwards said the new larger, lighter particles remained longer in the lungs and were tolerated better with less inflammation in tests with rats. Large porous insulin particles, for example, stayed active

On the Web

For more pictures and a sound bite of Dave Edwards discussing the implications of his work, go to the Web at <http://www.gsu.edu/~university/aerosols.html>.

Millions of asthma sufferers who currently use an inhaler several times a day could be in for change.

in the rats' lungs for 96 hours — about 15 times longer than the longest-acting aerosol currently known. Testosterone in porous particles produced higher blood hormone levels for 12 to 24 hours. Other medications, including albuterol, the leading fast-acting asthma reliever, are currently being tested in the new aerosol formulation.

Edwards had the idea for the new porous particles when he was a research associate in Langer's laboratory at MIT. Edwards and Langer began to actively research the concept after Edwards joined the Penn State faculty in 1995. The Langer-led MIT group included Jeffrey Hrkach; Giovanni Caponetti, a visiting graduate student from the University of Parma, Italy; Justin Hanes, now at Johns Hopkins University; and Noah Lotan, Technion, Israel Institute of Technology. Edwards' team at Penn State included Abdelaziz Ben-Jebria, on leave from INSERM in France; Mary Lou Eskew, research associate; Daniel Deaver, professor of reproductive physiology; and graduate student Jeffrey Mintzes.

Significant finding

Dave Edwards, associate professor of chemical engineering, helped discover new aerosols that could improve treatments for asthma, cystic fibrosis and other lung disorders.

Merger

continued from page 1

operations will change.

"We are looking forward to the many new opportunities created by this merger — opportunities that would not have been possible if each system had remained on its own," said Dr. C. McColister Everts, senior vice president for health affairs and dean of the College of Medicine, referring to the latitude the new system will have in integrating services and developing its own standards of care and methods of service. "In this time of great uncertainty in the health care arena, when operating costs continue to rise and staying competitive is vital to survival, if The Hershey Medical Center had remained isolated it would not have had the funding to maintain its academic mission."

"You don't often get the opportunity to look as closely — I mean really scrutinize — an operation, redesign it, streamline it and use the best practices to operate it," Everts explained. "We are actually building a new system, a new culture and a new way of delivering health care. This allows us to better serve our patients, be more competitive in the managed care marketplace and be a secure place of employment."

Analysts predict that by the year 2000, there will be only three to five health systems operating in Pennsylvania, according to Everts. He said Penn State Geisinger Health System plans to be one of the "major players" in the next millennium. The Geisinger Health

Plan, which will become the Penn State Geisinger Health Plan, is already the largest rural HMO in the United States.

Since the announcement of the merger, transition teams have been guiding employees through the difficult and complex task of uniting the clinical enterprises of both entities into what will become a \$1 billion operation with a combined workforce of 11,000 individuals. Despite the fact that both Hershey and Geisinger have a common mission focusing on patient care and research, and similar cultures, the task of consolidating the two operations has been daunting.

"The efforts to communicate all of the changes both externally and internally has been a significant challenge," Deborah Saline, recently appointed vice president of communications, said. "Even after the merger is effective, we will continue to work hard toward providing ongoing, two-way communication. The eight key transition teams set up to help facilitate the changeover and increase the flow of information will remain in place for as long as they are needed."

While one transition team is concentrating on ensuring that the main mission of the new system — patient care — continues without disruption, other teams are looking into merging payroll operations and personnel data systems; creating a common e-mail system; ironing out benefits packages; communicating information; negotiating, purchasing, tracking and storing the millions of dollars in medical and office supplies; and marketing the new system. In addition to the main,

overarching transition teams, smaller, more focused transition coordination subgroups are continually forming to find solutions that will help the new system function more smoothly after July 1.

Numerous meetings on certain issues, particularly human resource concerns, have been held over the last several months to give employees an opportunity to ask questions and comment on pending changes. These meetings will continue over the next several months, as transition teams continue to identify areas of improvement.

Some preliminary activities of the transition teams have uncovered more opportunities for cost reductions. In addition, improvement in services and planning is currently under way for the support of academic computing across the College of Medicine. Although a core of only seven people are actually working full time on the merger, the actual "nitty-gritty" work of merging daily operations and activities is being done by hundreds of people who still have their regular jobs to do, according to Saline.

"There are a lot of people in every area working long nights and weekends to make this happen," Saline said. "The effort to make this happen has really been tremendous."

And the job is far from over.

Although on July 1 the two systems will begin operating as one, employees and leaders of the Penn State Geisinger Health System will continue to examine the operation to determine what works best and what

needs to be improved. July 1, according to Everts, is only the beginning toward "a bold new organization focused upon the delivery of health care, while maintaining a balance of education and research."

"Over the next several years, we will be building," Everts said. "The melding of two separate cultures into one is not an easy task, but necessary for developing new ways of operating."

On the financial end, the Penn State Geisinger Health System will immediately begin taking advantage of the economies of scale, which should continue to save the system dollars. Over the next three years, the combined savings will reflect cost reductions of more than \$100 million.

From the research and education perspective, Everts said the larger patient population will aid both clinical research and basic research, and will also allow medical students and residents exposure to not only a wider variety of patients, but to the evolving health care environment. In addition, the new system is expected to provide plenty of opportunities for community service initiatives.

"July 1 will certainly be a date to remember," Everts said. "The mission of our new organization is to improve the health of the people of the Commonwealth. As a major organization in central Pennsylvania, we will continue to provide the highest quality of care in a cost-effective manner to the citizens in at least 40 counties of the Commonwealth."

Master plan

continued from page 1

rather should help continue public discussion on what the 5,100-acre campus could look like in the decades to come. All of the options presented take into account past and current patterns of growth of both Penn State and the region and the mission of the University. These discussions are just the latest phase in a long process of updating the campus's master plan, which guides the future physical development of University Park. The last major update of the master plan was in 1987.

The alternatives offered by Rigerink's team run the gamut from doubling the green space and realigning roadways to only slight alterations, which would permit demand and need to determine the look of the campus. Rigerink explained that the reason the campus continues to grow making a guiding plan necessary is because of the advances in technology, which require a consistent updating of facilities.

In addition, Penn State is increasingly becoming a draw for tourists and community participation, fueling the need to bring other perspectives into the planning process.

Under Alternative 1, which Rigerink described as "consolidation and infill," little would change from the existing pattern that has developed. Academic buildings would continue to be built in available areas, increasing the density in the academic core. The HUB lawn and the 10-acre Old Main lawn, as well as the wooded plot between Beam Business Administration Building and Business Administration II on Park Avenue known as Hart Woods, would remain "sacred open spaces," while other smaller pockets of green space would be added across campus for a 30 percent increase in green areas.

Driving through campus under Alternative 1 would be easy, perhaps too easy, Rigerink conceded since Shortidge Road would be an easy cut through from College Avenue to Park Avenue. Curtin and Pollock roads would be restricted to pedestrian traffic only.

Alternative 2 would increase green space by 50 percent, creating new areas off Shortidge Road and shifting the academic core of campus east to Bigler Road. Pollock would be closed to vehicles and would become an exclusive east to west pedestrian corridor. Shortidge Road would also be closed to autos, to form the north/south pedestrian link. Under this option, Shortidge and Allen roads would be considered the major entry points, making it more difficult to drive through the core of campus.

The most dramatic option offered, Alternative 3, would double the amount of green space; create a major pedestrian loop by closing Pollock, Bigler and Curtin roads and parts of Burrows Road to traffic; and would make driving through the core of campus impossible. Traffic would be diverted to perimeter loops and the alignment of Porter Road on the outskirts of central campus would shift to accommodate recent concerns about the

Core area of the University Park campus

Need more?

More information on the master plan is available at <http://www.app.psu.edu/utp/upmapapp.htm> on the Web.

The site is not complete and is still under construction. Check in during the coming months.

HIGHLIGHTS OF THE PLANS PRESENTED

◆ ALTERNATIVE 1

- Continue with current patterns, including development of West Campus
- Upgrade and expand existing housing east of Shortidge Road
- Reduce Pollock Fields
- Maintain current parking patterns
- Maintain current "sacred open spaces."

◆ ALTERNATIVE 2

- Shift academic core east to Bigler Road; flip the science block to east of Shortidge Road
- Remove Engineering Buildings A, B, C, D, and E and restructure Hammond with a large open area in the center
- Upgrade and expand existing housing farther east of Shortidge Road
- Move commuter parking east of Porter Road
- Increase green space by 50 percent

◆ ALTERNATIVE 3

- Shift academic zones out to University Drive
- Create a connector mall from Pattee to The Bryce Jordan Center
- Demolish Hammond Building and construct new buildings that allow more open space
- Significantly increase large open spaces (by 100 percent)
- Prohibit traffic from core of campus and create major pedestrian loop using Pollock/Bigler/ Curtin/Burrows

proposed Eastern Inner Loop for the region. The Inner Loop would divert traffic around the University and State College. Current plans have the Inner Loop linking up with University Drive.

Another reason for pushing Porter Road further out, according to Rigerink, is because Alternative 3 calls for a shift in the block of academic buildings, all the way out to University Drive. If University Drive were a link in the Inner Loop, Penn State would be limited in its future ability to expand. In addition, University planners have concerns about University Drive as a connector for the proposed loop, because of potential environmental impacts to the proposed arboretum in the Big Hollow area. Alternative 3 is also the option that envisions a long, stretching pedestrian mall from Pattee to the Jordan Center. On aerial maps, only one wing of Fenske Laboratory stands in the way.

Questions and comments following the on-campus session focused on avoiding the "urban campus" feel, the relocation of certain facilities, parking concerns and the costs associated with each alternative. Rigerink said the plans do not yet have a financial component, since the planners have not gotten into that level of detail.

"These are just alternatives that allow the University to plan for growth. It's an opportunity to dream a bit," Rigerink, whose firm has done more than 140 university master plans, explained. "As you need a site, you may use a site that is mapped on a master plan ... but you may also never use it."

Three more open meetings on the Campus Master Plan are set for November, April 1998 and August 1998. On Nov. 12, the planners will return with revised plans based on the input they are currently soliciting. On April 21-23,

1998, Rigerink said final subcampus plans will be available and by August 1998, the vision for University Park in the 21st century will be mapped out.

LECTURES

Series to feature local civil rights participants

The civil rights movement has gripped America's conscience for most of this century. This ongoing and continual struggle for equality will be addressed during a two-part series in July at the Penn State Downtown Center in Harrisburg by area residents who have personal experience in the movement. Both presentations will be from noon to 1 p.m. at the Downtown Center, 234 N. Third St.

The series on the civil rights movement titled "Will the Circle Be Unbroken?" is designed to complement a public radio series of the same name currently airing on WITF-FM 89.5 on Wednesdays at 6:30 p.m. through Oct. 1. The first installment of the series on July 16 will feature a historical perspective of the movement in America from the early 1900s through the 1970s. The speaker for this discussion will be Ann Lyon, an emeritus faculty member at Harrisburg Area Community College and social activist whose father was responsible for bailing Rosa

Parks out of jail; and the facilitators will be Robert Scott, assistant professor of behavioral sciences at Penn State Harrisburg, who was personally involved in the movement with the Rev. Dr. Martin Luther King, and Mitzi Trosle, program director at WITF-FM. The July 23 session will be highlighted by a panel discussion offering perspectives on the current status of the movement in America.

Speakers include: LeGree Daniels, community leader and governor of the United States Postal Services; Homer Floyd, executive director of the Pennsylvania Human Relations Commission; Lonnie King, leader of the civil rights movement in Atlanta in the early '60s and former president of the NAACP in Atlanta; and Nick Suders, a sophomore at Indiana University of Pennsylvania.

Both presentations are free to the public. Registrations to ensure adequate seating can be made by phoning (717) 783-0433.

teachers in northwestern Pennsylvania.

Teachers participating in the course are expected to develop competence in describing the operation of different sectors of the American economy and in predicting the consequences of economic policy, especially those concerned with current changes in the business environment.

The institute, which has been administered by Duquesne University, is made possible in Erie through a grant from the Erie Community Foundation.

Institute on U.S. economy opens July 7

Americans for the Competitive Enterprise System Inc. (ACES) and Penn State Erie, Behrend College will collaborate to present the Institute on the American Economy on July 7-25.

The institute is open to 40 elementary and secondary school teachers and administrators concerned with economics, social sciences and allied subjects. This three-week course, which will be held in 43 Academic Building on the Erie campus, is designed by the School of Business to promote economic education among

International conference planned

An international conference on "Education and Technology: Asking the Right Questions" will be held Sept. 17-20 at the Penn State Conference Center Hotel at University Park. The focus of this conference (honoring the seminal work of Jacques Ellul and Ivan Illich) is an examination of the key role of educational policy in relation to the expansion of technology and its effect on personal and social life. How has education affected the growth of a technological society, and what are the benefits and costs of that growth? Conversely, in what ways is technology transforming the educational process, and what are the costs and benefits of that transformation? More than 100 papers and discussions will address these issues.

Among the invited presenters will be Neil Postman, New York University; Ivan Illich, University of Bremen and Penn State; Wilhelm H. Vanderburg, University of Toronto; Seyyed Nasr, George Washington University; Langdon Winner, Rensselaer; and Joyce Hanks, University of Scranton.

For program information, contact: Henry C. Johnson Jr., chair of the Conference Steering Committee, at (814) 865-1488 or e-mail hcj20@psu.edu. For registration information, contact Chris Dufour, conference planner, at (814) 865-5110; e-mail: Conferenceinfo@cedu.psu.edu. For a brochure, call (800) PSU-TODAY (778-8632), or visit their Web site at: <http://www.cde.psu.edu/C&I/Education&Technology/>

Rhetoric conference at University Park, July 6-9

More than 100 scholars will gather at University Park for the 15th Penn State Rhetoric and Composition Conference on July 6-9.

The conference, "Rhetorical Bodies: Toward a Material Rhetoric," will provide opportunities for scholars and teachers to develop lines of inquiry and practice.

A continuing and distance education service of the College of the Liberal Arts, the conference will feature a dozen speakers from across the country, including three plenary session speakers.

Celeste Condit, professor of speech communication at the University of Georgia, will speak on "The Need for a Material Rhetoric: Reflections on Genetic Code," at 7:30 p.m. Sunday, July 6.

Katherine Hayles, professor of English at UCLA, will discuss "Prosthetic Rhetoric and the Posthuman Body" at 8:30 a.m. Monday, July 7.

Lester Kagle, professor of English and director of the Division of Rhetoric and Composition at the

University of Texas at Austin, is scheduled to speak on "After the Essay: The Literacy of Color, Sound and Motion," at 10:45 a.m. Tuesday, July 8.

All plenary session speeches are open to the public and will be held in Ballroom C at the Nittany Lion Inn.

"This conference is designed as a working conference and will allow scholars and teachers to talk together about work in progress," Jack Selzer, professor of English and conference co-chair, said.

Selzer said the conference will use technology to disseminate the research. "All the papers are included on the Web site and accessible by password to the participants. The participants can access the site and review the works before attending the conference."

Selzer said that a book representing the best work of the participants will be published following the conference by the University of Wisconsin Press. For more information about the conference call (800) PSU-TODAY.

Free computer training to be offered in July

Education Technology Services of the Center for Academic Computing is offering free computer training seminars during July. Detailed descriptions of the following workshops can be found on the Web at <http://cac.psu.edu/training/>. Scroll down to Summer Seminars and select "July Workshops for Staff and Faculty."

■ Introduction to MS Word 95 (Version 7.0) 02044 — Tuesday, July 8, 11:16 Wagner Building, 1-4 p.m.

■ Understanding Your Computer Files 02052 — Tuesday, July 8, 11:16 Wagner Building, 9 a.m.-noon

■ Introduction to Excel 95 (Version 7.0) 02046 — Thursday, July 10, 11:16 Wagner Building, 9 a.m.-noon

■ A Demonstration of Office 95 Features 02050 — Thursday, July 10, 1:41 Computer Building, 1-3 p.m.

■ Using MS Word to Work More Efficiently: Intermediate Word 95 02045 — Friday, July 11, 11:16 Wagner Building, 1-4 p.m.; prerequisite: experience with Word 7.0.

■ Partners: The World Wide Web and Penn State 01041 — Wednesday, July 16, 14:1 Computer Building, 9-11 a.m.

■ Introduction to Access 95 (Version 7.0) 02047 — Thursday, July 17, 11:16 Wagner Building, 1-4 p.m.

■ Introduction to PowerPoint 95 (Version 7.0) 02048 — Friday, July 18, 11:16 Wagner Building, 9 a.m.-noon

■ Productivity Tips Using MS Office 95 02049 — Monday, July 21, 11:16 Wagner Building, 8-11 a.m.; prerequisite: experience with Word and Excel.

■ Migrating to Windows 95 02051 — Wednesday, July 9, 14:1 Computer Building, 9 a.m.-noon; prerequisite: previous experience with Windows 3.1.

■ Leaving EMC2 for Eudora (Eudora Light Version 1.5.4), Section 1, 02053 — Thursday, July 11, 11:16 Wagner, 9-11 a.m.; Section 2, 02054 — Monday, July 21, 11:16 Wagner, noon-2 p.m.

■ Advanced Eudora Features 02055 — Friday, July 25, 11:16 Wagner, 9-11 a.m.; prerequisites: working knowledge of Eudora.

■ Creating Your Own Web Page, Section 1, 01042 — Monday, July 7, 11:16 Wagner Building, 1-4 p.m.; (Part I); Wednesday, July 21, 11:16 Wagner, 1-4 p.m.; (Part II).

—Section 2, 01043 — Tuesday, July 22, 11:16 Wagner Building, 9 a.m.-noon, (Part I); Thursday, July 24, 11:16 Wagner Building, 9 a.m.-noon, (Part II); prerequisite: PSU Web Space Account.

To register, e-mail Teresa Beck at tab18@psu.edu or call (814) 863-4356. Registration is also available on the Web at the address listed above. Please contact Carl Howlin at cxh25@psu.edu or at (814) 863-5769 with questions.

Central Pennsylvania Festival of the Arts

July 9-13, 1997

Cooperation makes annual festival a success

By ANNEMARIE MOUNTZ
Public Information

Perhaps the most popular event to be held in central Pennsylvania each year is the Central Pennsylvania Festival of the Arts. What started in the mid-1960s as a way to revive the businesses in downtown State College that felt a severe economic pinch when students left town for the summer, has grown into an event that has taken on a life of its own.

"There is a wide mix of people who come back to see friends and visit with family during the arts festival. The University's Freshmen Testing, Counseling and Advising Program has a session during the festival and high school students considering Penn State often visit the campus during the arts festival," said Phil Walz, executive director of the Central Pennsylvania Festival of the Arts. The Penn State Alumni Association also holds its reunions during the arts festival.

This year marks the 31st year of the festival, to be held July 9-13 in State College and on the University Park campus.

In addition to a core festival staff of four, it takes more than 1,500 part-time volunteers to make the festival happen — and many of them are faculty, staff and students at the University.

"That's what's really neat about this festival," said Walz. "The bylaws require 50 percent of the board of directors to come from the University and 50 percent to come from town. That's probably the secret to why this organization has survived and succeeded over the years. There's definitely a Penn State component. Together we're trying to create a unique experience and tradition. Come back, see old friends, have a good time."

That tradition sets this festival apart from other town-gown festivals. "Because of personal relationships and reunions going on, the arts festival has many repeat attendees. I'd say 95 percent of the people who attend this festival have been here at least once before. You don't find that much repeat attendance with most festivals."

The behind-the-scenes work is shared at the coordinator level as well. Seven of the 19 festival coordinators are University employees, volunteering their time and expertise to organize various areas of the festival. Many of the other coordinators also have ties to the University.

"I thought getting involved in the arts festival would be fun to do and it helped me to give something back to the community," said Barbara J.

Artist in action

Aimo Hill of Annapolis, Md., did some painting in his sales booth along Pollock Road on the University Park campus during the early morning hours at last year's festival.

Festival facts

■ PARKING

Parking for the arts festival will be across from Beaver Stadium. Rates are \$5 per day or \$10 for a pass good throughout the festival. Faculty/staff parking permits also will be honored.

■ SHUTTLE INFORMATION

CATA will provide free express shuttle service between the Beaver Stadium parking lot and Schlow Library on Beaver Avenue during the festival.

Wright, administrative assistant in The Smeal College of Business Administration. Wright, who has been with the University for 10 years, has been sales booth co-coordinator for eight of the last nine years.

Wright's duties extend well beyond the week of the festival. "We work with the artists to get designs for the T-shirts and anything else we sell that contains the official arts festival logo," she said.

The University holds exhibitions in conjunction with the festival as well. This year marks the 31st year for Crafts National, a juried exhibition of fine arts held in Zoller Gallery, 101 Visual Arts Building.

Images '97 in the Hetzel Union Building galleries has been a part of the festival since 1989. The exhibit features paintings, drawings, prints, photographs and sculpture created by artists from Pennsylvania and the Mid Atlantic states.

This year, after a 10-year absence, the Palmer Museum of Art will again be part of the festival. The museum will be the site of one of the festival's opening receptions on July 8 and will be host for an exhibition of works from School of Visual Arts faculty.

"We had a great opportunity to get involved in the festival this year, and we grabbed it," Jan Muhler, director of the Palmer Museum, said. "We've

been looking for ways to collaborate, but our primary problem has been scheduling exhibitions."

Muhler said that most scheduling is done years in advance, under strict guidelines.

"If you organize a show you can have more control," Muhler said. "But if you rent a show from an organization or another museum, there are set time slots and you either take it during that period or not at all."

Although the museum was not directly involved in the festival for the last several years, it tries whenever possible to have an exhibit that is appropriate to have on view during the arts festival.

"The museum has a different audience during the summer and it's a great time for us to emphasize to the community that the museum is here for them as well as for the University," Muhler said.

They've done that and more this year. Not only is the museum exhibiting two collections of prints from 19th-century Pennsylvania, but it also will hold a special faculty exhibition developed to coincide with the arts festival.

SVA20 features the works of 20 School of Visual Arts faculty members and represents the first time in 10 years that such an exhibit has appeared at the museum. While the exhibit is not co-sponsored by the arts

Festival goes high-tech

Because the Palmer Museum developed the SVA20 faculty exhibit in a relatively short period of time, there was no opportunity to publish a traditional exhibit catalog.

"We wanted to have a catalog for SVA20, but didn't know how we were going to do one given our time constraints," Jan Muhler, director of the Palmer Museum, said. "We decided to try the Web. Jerrold Maddox, professor of art in the School of Visual Arts, is making it a reality. He may be working on it right up to the last minute, but the museum's first online catalog will be up and running in time for the festival."

Although the site was not online when this issue of *Intercom* went to press, Muhler expects the site address to be <http://www.palmer.psu.edu/sva20>.

You can also visit the festival in cyberspace before you ever set foot in Centre County. To see the official Central Pennsylvania Festival of the Arts home page, go to <http://arts.festival.com/>.

festival, it definitely is the result of a collaboration between the festival and the museum, Muhler said.

"We timed it to open the same night that the other two festival exhibitions open in Zoller Gallery and the HUB. There is a genuine effort to get festival-going up as far as campus," Muhler said. "We're making the effort to not stand alone, but to be a very visible part of the overall event."

That's a difficult job. While the HUB is on Pollock Road, on the main festival route, both Zoller Gallery and the Palmer Museum are on Curtin Road, separated from the rest of the festival. The sites do have an appetizing drawing card, however. They're just up the road from the Creamery.

"We're encouraging people to come to the Palmer Museum and Zoller Gallery, and stop for a Creamery ice cream cone either before or after their visit," Muhler said.

She's working to get the word out that the Palmer Museum is part of the festival through strategic advertising and other methods.

"We're talking with some of the downtown businesses looking for ways to link us, let people know that there are other ways to get to the museum besides walking," Muhler said. "Ride the loop, rest your feet, spend time in the air-conditioned museum, then go get some Creamery ice cream. What more could you ask for?"

RESEARCH PARK UPDATE

Groundbreaking expected by this summer

Six tenants have signed pre-lease agreements for the first building in Phase 2

By BARBARA HALE
Public Information

A multi-tenant, three-story building, owned by PSRP Developers Inc., will be the first to go up in Phase 2 of Penn State's Research Park at University Park.

Six companies have already signed pre-lease agreements for space in the building, according to Arthur A. Heim, head of Penn State's Industrial Research Office and leader of park tenant development. The companies include start-up firms as well as established businesses that complement research and technology development already under way at the University.

Penn State is leasing the land for the building, which is known as 101 Innovation Boulevard, to PSRP Developers and playing a major role in finding tenants. Phase 2 will consist of 101 Innovation Boulevard and two or three additional buildings to be built to single tenants' specifications.

"We expect to break ground for the multi-tenant building by this summer," said William C. Morlok, a PSRP Developers partner.

"Our group will carry out development activities for all of Phase 2, including coordinating, administering and managing the overall construction process."

Morlok is president of Morlok Development Group of Philadelphia. Partners in PSRP Developers also include Ira Lubert, managing director for two high-technology venture capital funds and president of IL Management Inc., and Galen Dreihelb, State College businessman/real estate developer and president of G. Edwards Co.

The companies that have so far signed to occupy the multi-tenant structure include: The Drucker Co.; Lomic Inc.; Manpower Inc. of Altoona; Moulamatrix Inc.; TeleBeam Inc.; and Urish Popeck & Co., LLC/BDO Seidman Alliance. (See related story on this page for a brief description of the firms).

Construction is expected to take nine months to a year. All of the buildings in Phase 2 will be clustered to the east of the Penn State Conference Center Hotel and the other Phase 1 buildings on Innovation Boulevard.

Phase 1, now fully occupied,

About the tenants of 101 Innovation Boulevard

■ The Drucker Co.

The Drucker Co. has pre-leased space in the multi-tenant building for its marketing, accounting and R&D groups. These groups are currently in the Centre County Chamber of Business and Industry small business incubator at the Research Park.

Drucker, which moved to Centre County from Sunrise, Fla., makes centrifuges for laboratories, clinics, doctor's offices and hospitals. The company has a manufacturing unit in Philipsburg, which it hopes eventually to expand from the current eight employees to 25 when it completely moves all of its manufacturing units to the Moshannon Valley Enterprise Center.

■ Lomic Inc.

Lomic Inc. is currently in the Chamber of Business and Industry of Centre County small business incubator in the Technology Center at the Research Park.

The company will be moving all of its operations into the new multi-tenant building. Lomic develops state-of-the-art measurement software for the natural gas industry, including meter manufacturers, gas pipelines and producers. Lomic Inc. was started by Michael Adewumi, Penn State professor of petroleum and natural gas engineering.

■ Manpower Inc. of Altoona

Manpower Inc. of Altoona, ranked by its parent company as one of its fastest growing franchises, will locate a technical services office in the new multi-tenant building. The franchise, which has offices in DuBois, Johnstown and Williamsport, as well as Altoona, also plans to open a field office in Bedford this year.

The technical services office in State College will focus on providing technically trained individuals for temporary help and for permanent placement.

Manpower, which saw sales reach \$7.5 billion in 1996, is an international temporary help organization with operations in 37 countries.

■ Moulamatrix Inc.

Moulamatrix is a start-up company that provides technical services to the biotechnology and pharmaceutical

industries in drug discovery and testing.

The company is commercializing the ideas of Penn State chemistry faculty member Nicholas Winograd. Winograd is a principal in the new company along with Robert J. Hessler, a business and marketing consultant. This group has developed a method of mapping or imaging the distribution of medicines in organs, tissues or on the surface of individual cells. In addition to the imaging capability, the company will provide a mass spectrometer-based technology which will characterize drug candidates identified through a new drug discovery process named "combinatorial chemistry." Penn State owns the intellectual property for both the mapping and screening techniques and is licensing them to the new company.

■ TeleBeam Inc.

TeleBeam Inc. is a vertically integrated telecommunications company which operates wireless TV and pay phone systems and re-sells long distance products and services. It currently has 15 employees and launched its wireless TV system in State College in January 1997. Its pay phone system, which was launched four years earlier, currently includes 737 "smart" public pay telephones in eight states.

Smart Choice Long Distance Inc., a wholly-owned subsidiary of TeleBeam, provides the company's long distance products and services. The company has also established a division known as the TeleBeam Research and Development Co. (TRDC), which focuses on developing and expanding the company's wireless systems and developing next generation wireless communications systems. TRDC is conducting its R&D programs in partnership with Penn State's electrical engineering department and the University's Center for Information and Communications Technology Research. The company expects to invest more than \$1.2 million in the partnership over the next three years.

■ Urish Popeck & Co., LLC/BDO Seidman Alliance

Urish Popeck & Co., LLC, one of the largest regional accounting and business consulting firms in Western Pennsylvania, will establish its first full-service office outside the greater Pittsburgh metropolitan area in the new multi-tenant building.

In addition to audit, accounting and tax services, Urish Popeck & Co. provides expert assistance with mergers and acquisitions, business development, litigation support and technological solutions. The firm has a strong focus in healthcare, corporate finance, real estate and manufacturing industries. Professional staff number 53 in the Pittsburgh office.

The firm is the regional representative of the BDO Seidman Alliance, seventh largest accounting and consulting organization in the world.

includes the Technology Center Building; the Conference Center Hotel; and the Materials Research Institute Building. The Technology Center houses the University's Research and Technology Transfer Organization under the same roof with the Chamber of Business and Industry of Centre County office and the chamber's small business incubator.

Penn State also has signed a contract with Children's World Learning Center of Golden, Colo., to design, build and operate a child care and educational facility at the Research Park. The 13,000-square-foot facility, which is next to the Conference Center Hotel, is already under construction and is expected to begin operation in mid-August. The facility will provide

care for approximately 200 infant to school-age children, as well as opportunities for academic research.

The multi-tenant building design team includes Bohlin Cywinski Jackson, architects; EDWA, landscape architects; and Sweetland Engineering & Associates, civil engineers. Alexander Constructors of Harrisburg will build 101 Innovation Boulevard.

Special Olympics

Special athletes compete in 28th annual games

Athletes from across the state, 2,000 in total, once again converged on the University Park campus to take part in the Pennsylvania Special Olympics 1997 Summer Games.

Now in its 28th year, the four-day event offers people with mental retardation the opportunity to participate in Olympic-style sports training and competitions. To be part of the Games, athletes must train at least eight weeks in their sport to qualify.

About 2,500 volunteers from the University and local community helped make this year's games, which took place from June 12-15, happen. The Summer Games is the second largest "conference" at Penn State.

ARTS & ENTERTAINMENT

AT PENN STATE

On stage

Dennis DeYoung, left, Tommy Shaw, James "JY" Young, and Chuck Panozzo, better known as Styx, will appear at The Bryce Jordan Center July 3.

Photo: Greg Grieco

"The Mousetrap"

Pennsylvania Centre Stage's production of Agatha Christie's "The Mousetrap" will open June 13 in The Playhouse on the University Park campus and runs through June 28.

Pennsylvania Centre Stage, the summer professional theatre at Penn State, is a program of the College of Arts and Architecture.

The eerie comedy of murders, set in a snowbound guest house, is the longest running play in the history of the London stage. A classic "whodunit," "The Mousetrap" will keep the most rabid armchair sleuth in spinning suspense as the sordid plot unfolds.

Robert E. Leonard, head of the M.F.A. directing program for Penn State's School of Theatre Arts, directs the production.

The "Mousetrap" plays at 8 p.m.

June 26-28; and 2 p.m. Saturday, June 28. Tickets are \$21 for students and \$24 for non-students.

For tickets or more information, contact the Arts Ticket Center, open Monday through Friday, 8:30 a.m. to 4:30 p.m., at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

"Wall Side Story"

"Wall Side Story," an exhibition of student artwork from the architecture visual communications courses taught by Richard Alden, associate professor of architecture, will be exhibited at Manhattan Bagel, 232 West College Ave., State College, on Saturday, June 28, from 11 a.m. to 3 p.m. The exhibition will be mounted on the exterior wall of Manhattan Bagel facing the College Centre I parking lot. Manhattan Bagel will serve free hot dogs during the exhibition.

"Quilters" at Berks

Quilters, a musical play based on the oral history of women quilters who were the wives, sisters and daughters of America's pioneers, will play at Berks Festival Theatre in Reading through July 6. Berks Festival Theatre is a program of the Penn State Berks-Lehigh Valley College.

In addition to *Quilters*, a quilting exhibition will be featured in the Freyberger Gallery adjacent to the Berks Festival Theatre.

For ticket sales and information, call (800) 450-5502.

"Comic Opera" movies

Two films in the "Comic Opera at the Movies" series will be shown in July. On Wednesday, 9 p.m., Benjamin Britten's "Albert Herring" will play, and on Wednesday, July 23, Rossini's "Il Barbiere di Siviglia" will be featured.

School of Music faculty members will provide brief introductions to each film. The series is sponsored by the Penn State Office of Summer Sessions. Admission is free.

"Images '97"

"Images '97," the fine arts exhibition of the Central Pennsylvania Festival of the Arts, runs through Friday, July 18, in the formal and browsing galleries of the Hetzel Union Building on the University Park campus. Media represented in the exhibition include oil, watercolor, acrylic, pencil, prints, mixed media, photography, sculpture and ceramics.

Lois M. Johnson, chair of the fine arts department at the University of the Arts in Philadelphia, served as juror for the exhibition. An acclaimed printmaker and innovator of techniques in printmaking and the book arts, Johnson selected 76 works from the more than 400 submitted.

The formal and browsing galleries are on the first floor of the Hetzel Union Building, University Park.

In conjunction with the arts festival, the School of Visual Arts will present "Crafts National 31" at Zoller Gallery through July 20 and "SVA20" at the Palmer Museum of Art through Sept. 14.

BYRCE JORDAN CENTER

Sportsman's show

The Bryce Jordan Center will be host for the First Annual Pennsylvania Sportsman's Hunting, Fishing and Outdoor Show on March 26-29, 1998. Show hours are 5-9 p.m. Thursday; 10 a.m. to 9 p.m. Friday and Saturday; and 10 a.m. to 5 p.m. Sunday.

The Bryce Jordan Center expects to be filled with exhibitors featuring sporting equipment, fishing tackle, hunting gear, guides, outfitters, lodges and travel exhibits, taxidermists, archery equipment, sportsmen's organizations and related displays. In addition, there will be daily seminars and clinics on hunting and fishing.

Reservations for booth space are now being taken. Vendors interested in exhibiting may call (814) 863-1570 or (814) 863-5503.

Upcoming events

July 3: Styx and Pat Benatar

Tickets: \$29.50, \$24.50 and \$19.50 for reserved seating, on sale now.

July 4: The Great American Fireworks Festival, noon to midnight.

July 18: Barry Manilow

Tickets: \$39.50 and \$29.50 for reserved seating, on sale now.

Aug. 8: Tina Turner, 7:30 p.m.

Tickets: \$38.50, \$27.50 and \$19.50 for reserved seating.

Tickets can be purchased at the Bryce Jordan Ticket Center, Eisenhower Auditorium South Box Office, selected Uni-Mart ticket outlets, Commonwealth Campus ticket outlets, or by calling (814) 863-5555 locally, or toll-free at (800) 863-3336.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu/>.

Music at Penn's Woods, 7:30 p.m., Eisenhower Auditorium.

Central Pennsylvania Festival of the Arts.

Saturday, July 12
Music at Penn's Woods, 7:30 p.m., Eisenhower Auditorium.

Sunday, July 13
Central Pennsylvania Festival of the Arts.

Monday, July 14
Dance Aerobic "Diversions," 8 to 10 p.m., White Building.

LECTURES

Thursday, July 3
Qi Li on "Science and Technology of Giant and Colossal Magnetoresistance Materials," 4 p.m., The Nittany Lion Inn.

CONFERENCES

Friday, June 27
Master Gardeners, Agricultural Science and Industries Building, through June 28.

Sunday, June 29
Governor's School for the Agricultural Sciences, Agricultural Science and Industries Building, through Aug. 2.

Sunday, July 6
Penn State Rhetoric and Composition Conference, Ballroom C, The Nittany Lion Inn, through July 9.

Sunday, July 13
Food and Agricultural Science Workshop, Agricultural Science and Industries Building, through July 19.

EXHIBITS

HUB Art Alley Cases, Art Alley Panels and Hall Cases

Mixed media of Susan Struble and Alice Ritti, July 2 through July 31.

HUB Browsing Gallery and Formal Gallery
Exhibit by the Central Pennsylvania Festival of the Arts, through July 18.

HUB Hall Cases

Kern Cases
Jewelry by Evelina Francis, July 2 through July 27.

Kern Panels
Photos by John Mannion, July 2 through July 27.

Kern Tall Cases
Embroidery quilt exhibit, July 2 through July 27.

Palmer Museum of Art
"Making History: Historical Narratives in Pennsylvania Prints," through Aug. 31.

School of Visual Arts Faculty Exhibition, through Sept. 14.

"Our Town: A Selection of Town Views from the Pennsylvania Prints," through Sept. 28.

Zoller Gallery
Crafts National 31, through July 20.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://ccac.psu.edu/calendar/>

Music at noon

Students Wook Kim, left, and Sang Hee Ha enjoyed an afternoon lunch outdoors while listening to the Jazz Showcase at Fisher Plaza on the University Park campus recently. The noon-time concert was part of the Summer Music at Noon series. Concerts are held at the plaza each Tuesday and Thursday.

JUNE 27 - JULY 14

Book Shelf

Theatre professor **Mark Fearnow's** new book, *The American Stage and The Great Depression: A Cultural History of the Grotesque*, has been published by Cambridge University Press as part of its series *Cambridge Studies in American Theatre and Drama*.

The book proposes a correlation between the divided "mind" of America during the Depression and popular stage works of the '30s. Theatre works such as Jack Kirkland's comic-horror adaptation of *Tobacco Road*, Olsen and Johnson's "scream-lined revue," Hellzapoppin, and successful plays by Robert E. Sherwood, Clare Booth Luce

and S. N. Behrman are interpreted as theatrical reflections of Depression culture's sense of being trapped between a discredited past and a nightmarish future.

Fearnow analyzes the America of the '30s as an era of the "grotesque," in which the irreconcilable were forced into tense and dynamic coexistence, and by examining these works of theatre as products of particular historical circumstances, argues for a strong connection between cultural history and theatre history.

Through an introduction and five chapters, Fearnow examines several

'30s drama productions on theoretical and cultural terms. At times archival and often anecdotal, Fearnow's book provides insight into a drama once thought separate from its time, and links it to both the time and a larger American experience.

Channel Surfing: Race Talk and the Destruction of Today's Youth, a new book by **Henry A. Giroux**, Waterbury Chair professor of secondary education, points out how the barrage of media images sends a message that sells our children short. The book is published by St. Martin's Press, New York.

From images of model Kate Moss wearing an inviting pout to the movie "Dangerous Minds," which tells the story of South Los Angeles students of color who can only be saved by an angelic, blow-dried Michelle Pfeiffer, Giroux shows how media messages are condemning children to a preconceived role of alienated outcast. The book also calls for a more ethical approach to representations of children and their futures.

Giroux also is the author of *Border Crossings, Living Dangerously, Disturbing Pleasures and Fugitive Cultures*.

EMPLOYEE BENEFITS

the Office of Human Resources

Health plans must comply with new law

Recent federal legislation has imposed restrictions on the ability of health insurance plans to limit payment for treatment of pre-existing conditions.

The Health Insurance Portability and Accountability Act (HIPAA) was enacted in September 1996. While the law does not prohibit health plans from excluding or limiting coverage for pre-existing conditions, it does limit the period of exclusion or limitation to 12 months (18 months in the case of a late enrollment). All health insurance plans must comply with the new regulations with the plan year beginning after June 1. University plan years begin on Jan. 1 and both Healthpass and the Hospital/Surgical/Major Medical Plan (Plan A) will comply with the regulations beginning Jan. 1, 1998. HMO plans do not contain pre-existing condition limitations.

While this legislation will not immediately affect Healthpass or Plan A participants, the law could be of particular importance to faculty and staff members who terminate their employment at Penn State or who have family members whose eligibility for University plan coverage terminates.

The law requires that any health insurance plan that contains a pre-existing condition limitation clause must consider coverage provided under a previous health insurance plan toward meeting the pre-existing condition requirement. Consequently, all health insurance plans are required to provide terminating participants with certification of prior health insurance coverage.

Effective June 1, all participants in University health plans, including those covered under COBRA, will receive the certification of prior health insurance coverage automatically. The certification will provide the dates of coverage or, if coverage was provided for 18 months or more, will indicate that fact. The certification also will provide information for all dependents covered under the plan.

Any questions regarding these new regulations should be directed to the Employee Benefits Division at (814) 865-1473.

Practice makes perfect

Rita Fandrich of Florida Southern College, Lakeland, Fla., practiced last week for a recital given as part of the American Mathway Association's Piano Festival '97, held at University Park June 21.

Proposed federal legislation could devastate tuition benefits for employees, grad students

Editor's note: As the Intercom went to press late Monday, the House bill affecting tuition discounts for University employees had still not made it to the floor for a vote. Both House and Senate members were trying to push through legislation before the June 26 break.

By ALAN JANESCH
Public Information

Tax legislation that could have an enormous negative impact on employees and graduate assistants at colleges and universities has been kicking around the U.S. House of Representatives over the last week, awaiting approval. A Senate tax bill substantially different from the House bill — and believed friendlier to higher education — was approved by the Senate Finance Committee last week and was making its way to the Senate floor for a vote this week.

As approved by the House Ways and Means Committee June 12, the House bill includes a provision that would phase out Internal Revenue Code Section 117(d), which provides tuition discounts to qualified employees of colleges and universities, and their dependents, as well as to teaching and research assistants at the graduate level.

At Penn State, there is a 100 percent tuition discount for graduate assistants and a 75 percent discount for qualified employees and their spouses and dependents. According to one estimate, if these discounts lose their tax-exempt status, employee and graduate student taxes could amount to more than 20 percent of the value of the discount.

The committee version of the House bill also includes a provision that would end the tax exclusion for employer-provided undergraduate tuition benefits on Dec. 31. This benefit is currently allowed under Section 127 of the tax code.

The Senate bill, being amended in the Senate Finance Committee last week, does not address or eliminate the Section 117(d) benefits. It also gives a permanent extension to

the Section 127 benefits, for both undergraduate and graduate students.

"We urge all higher education institutions to look very closely at what the impact would be on their students and staff, and we urge them to act quickly," said Anne C. Gross, associate director of public policy and management programs at the National Association of College and University Business Officers (NACUBO) in Washington, D.C.

"All this is really on the fast track, and it's getting very hard to intervene in the process," she said. "The tax piece of the (federal) budget is what they're moving first and fastest on. With bills being introduced on Tuesday and then amended on Thursday, there is little time to have any input."

The House and the Senate both need to pass tax bills as part of the budget process. After the House and Senate amend or "mark up" their bills in committee, the bills go to the floor of each chamber. After the separate bills pass in the House and the Senate, they go to a House-Senate "conference committee," which resolves the differences in the bills. This year's tax bill is expected to go to conference committee after July 4.

"They didn't get to the House bill as expected last week, so I suspect that some of the things that may need ironed out or may be altered will happen in conference committee, where both senators and representatives are a part of the process," she said.

The committee version of the House bill includes several other provisions relating to higher education. According to the NACUBO, one of the provisions would also affect TIAA-CREF's tax-exempt status. The House bill would remove the 1986 grandfather clause that exempts TIAA-CREF's pension business from federal tax. This adds \$300 million in federal revenue a year, and according to TIAA-CREF, would reduce the retirement income of educators by as much as 3 percent to 5 percent annually.

Maintenance costs spur parking fee increase

Earlier this spring a cost analysis of the parking system at the University Park campus was undertaken by Transportation Services. The findings reveal that the operating cost per parking space on campus exceeded the fees collected for their use. In order to continue meeting the demand for parking facilities on campus, as well as keep pace with the rising costs that affect all areas of the University, it will be necessary to institute a small increase in the current faculty/staff parking registration rates, according to Transportation Services.

Effective July 1, for regular payroll and July 6 for bi-weekly payroll, parking registration rates will increase as follows: The base rate for "open staff" parking will increase by \$1 per month, from \$15 to \$16. "Reserved" area parking will increase by \$2 per month, from \$22 to \$24. Rates for "special" permits, such as Blue 00, Blue R and HFS permits will increase by \$3 per month, from \$23 to \$26. The Red 00 permits will increase by \$4, from \$44 to \$48. Bus service will continue to provide trans-

portation for the commuter lot (Lot 44). The registration fee for this lot will increase by \$1 per month, from \$8 to \$9.

In an ongoing expansion of parking facilities this spring, Transportation Services added 200 spaces to Parking Lot Red A on the west side of campus. During the summer, the Nittany Parking Deck will undergo a major refurbishing and plans are in the works for adding an additional level to the HUB Parking Deck to meet the anticipated demand for parking once HUB expansion is completed.

Annual maintenance on the available parking (surface lots and parking decks) areas on campus includes such things as patching/resurfacing, restriping, curb and gutter/stormdrain repair, sealing parking deck joints and cracks and the repair/replacement of lights and signs. Money collected from the parking registration fees are used to cover all of these things, to improve parking facilities on campus and to support alternative modes of transportation for Penn State faculty, staff and students.

News in Brief

Study participants sought

Participants are needed for a study by Cheryl Achterberg, professor of nutrition, on the dietary patterns of individuals who have made a conscious effort to decrease the fat and increase the fiber in their diet. The study begins July 1.

To be eligible for the Patterns of Dietary Change study, participants must be between 50 and 85 years of age; have resided in the United States for the past five years; have made significant dietary changes over the past five to 10 years; be willing to fill out a questionnaire packet that will take about two hours to complete; and participate in a two-hour interview.

Participants will receive \$50 for successful completion of the study. For more information, call (814) 865-0936.

Summer blood drives

The American Red Cross, Centre Communities Chapter, will conduct four blood drives on the University Park campus this month to help rebuild depleted blood inventories. All blood types are needed, and inventories of type O blood, the universal donor, are in seriously short supply.

The blood drives will be held:

- July 1, 10 a.m. to 4 p.m., HUB Ballroom.
- July 8, 10 a.m. to 4 p.m., 101 Kern Building.
- July 9, noon to 6 p.m., Pollock Building.
- July 15, 10 a.m. to 4 p.m., Housing and Food Services Building.

To give blood, you must weigh at least 105 pounds and be in generally good health. Donors may give once every 56 days. To confirm eligibility, call the regional Red Cross at (800) 54-BLOOD. The entire donation process takes a little more than an hour, including the health check and something to eat. While walk-in donors are welcome, appointments are preferred. Appointments may be made by calling Connie Schroeder, campus coordinator, at (814) 237-2713.

Family research needs volunteers

Friends and family play a central role in the lives of individuals across adulthood. In order to maintain ties with others, people must find a way to handle problems that inevitably arise. Researchers at Penn State would like to discover how adults of different

ages manage positive and negative aspects of their relationships and are interviewing adults in their 20s, 40s, 60s, or 80s about their social ties. The interview takes approximately one to two hours, and will be scheduled at a time and place convenient for the subjects. A \$15 honorarium is offered for those who participate. For more information about participating in this study, please contact Karen L. Fingerman, assistant professor, Department of Human Development and Family Studies, at (814) 863-0241.

Paid volunteers needed

The Food Lab, 226 Henderson Bldg., is looking for non-smoking, non-dieting men and women between the ages of 20 and 45 to participate in a study. The study consists of three to four taste tests with each session lasting 10 to 15 minutes. Participants will be paid up to \$10 and will receive a coupon for a free ice cream cone at the Penn State Creamery. If interested, please contact Sarah at (814) 863-8482.

Panic and anxiety research

Are you experiencing panic attacks? Are you stressed or anxious?

Most people worry but for some, worrying is excessive, uncontrollable or overwhelming. Others experience intense panic attacks. The Stress and Anxiety Disorders Institute is conducting an ongoing research study which offers free therapy if:

- You have experienced at least four panic attacks in the past month which include, but are not limited to, symptoms of shortness of breath, rapid heartbeat, trembling and sweating;
- These symptoms reach a peak in less than 10 minutes;
- At least one attack is unexpected. At least one attack is followed by one month or more of worry about having another attack, worry about the implications of the attacks, or behavior change as a result of the attacks.

OR

- You have experienced excessive and uncontrollable anxiety or worry for at least six months.
- When worried or overly anxious you also experience: feeling keyed up or on edge, muscular tension, restlessness, difficulty concentrating, fatigue, sleep disturbance or irritability.

People (ages 18-65) included in the study will

receive free psychotherapy as well as assessments before and after treatment. A brief telephone call will help researchers make a preliminary determination of the suitability of this program for you. Strictest confidentiality is maintained. If interested, please call (814) 863-0115. Michelle Newman, a professor in adult clinical psychology, is the principal investigator on this study.

"Depressed" people needed

Most people feel depressed at some time or another in their life, but some experience major depression. A study designed to help people with this problem currently is being conducted. You may be experiencing major depression if you:

- Feel depressed most of the day, nearly every day;
- Experience a marked decrease of interest and pleasure in almost all activities;
- Feel fatigue or loss of energy most of the day; 4.
- Feel worthless or excessive guilt; and
- Feel a decreased ability to think or concentrate.

If you believe you are experiencing major depression and would like to be considered for a study being conducted by the Department of Psychology, please call Charles Hines at (814) 863-4833.

Subjects (ages 18-55) included in the study will receive 12 to 20 free sessions of individual psychotherapy, either immediately after being assessed for depression or 12 to 20 weeks later. Subjects also will be asked to complete various questionnaires during and after treatment. A brief telephone interview will help with a preliminary determination of the suitability of this treatment for you. If you cannot be included in this treatment, alternate referral suggestions will be made. Strictest confidentiality is maintained. The principal investigator on this study is Louis Castonguay, assistant professor of psychology.

Winners announced

During the Big Big Show on June 17 at the University Park campus — an annual event sponsored by General Stores that allows vendors and manufacturers to display their products — the Parking Office held a contest for counting Hershey Kisses in a jar. The winners are Niki Alters, who won first prize, and Nevin Cori, who won second prize. Congratulations.

CQI

**CONTINUOUS
QUALITY
IMPROVEMENT**

Strengthening the roster

The list of CQI teams formed at the University since the inception of quality improvement initiatives in 1991 continues to grow. A total of 232 teams have worked to improve processes over nearly six years. The newest teams include:

- The University Health Services General Medicine (GM) Department Patient Flow CQI Team was charged to study flow of patients in the General Medicine Department. The team's sponsor is Larry Dansky and the leader/facilitator is Connie Cavalier.

- The Center for Ethics and Religious Affairs Student Advisory Board Process Improvement Team is working to secure information on the relations between students and staff and to develop ideas for improvement. The leader is Ken Clarke and the facilitator is Andrea Quinby.

- The Student Aid Streamlining Customer Services Team will develop new strategies to maximize access to the student aid process. The team sponsor is Anna Griswold, the leader is Cheryl Gallagher and the team is facilitated by Mary Ellen Litzinger and Barbara Sherlock.

- The Integrating Registration, Student Aid and Bursar Processes at the Start of Each New Semester team will improve the current process of canceling a student's class schedule and aid because of the non-return of the semester bill. Sponsors are John Romano and Kenneth Babe; leaders are Anna Griswold, Roseann Sieminski and Jim Wager.

- Counseling and Psychological Services Clinical Services Database Transformational Management System Team will design a user-friendly database for compiling clinical services information. The sponsor is Dennis Heitzmann and the leader is Wil Wadlington.

- Three equipment training teams are sponsored by Steve Weaver in Housing and Food Services: the Floor Equipment Training Team (leader, Dennis Miller; facilitator, Marc McMullin); the Vulcan Convection Oven Training Team (leader, William McCloskey; facilitator, Sue Oram); and the Groen Kombi Oven Training Team (leader, Richard Crowley; facilitator, Joy Deitz).

Cool job

Rodney Campbell carves a basket out of ice for a display at the Penn State Conference Center Hotel. Campbell, who had been an employee of Scanlon when the company operated the hotel, has joined the University staff as garde-manger chef for Penn State Hospitality Services.

Faculty/Staff Alerts

New phone numbers

Effective July 1, Penn State Berks will adopt a new telephone numbering system. The campus purchased a new block of phone numbers from Bell Atlantic with the exchange of 396 and will no longer use the 320 exchange. The change was made to give the campus more phone numbers. The new number will be (610) 396-6000.

There will be a telephone referral on existing phone numbers for two months to alert callers that the telephone number has changed, followed by the new number. Callers should use the current telephone numbers until July 1.

Early deadline

Because of the July 4 holiday, the *Intercom* staff has scheduled an early deadline for the issue that follows. Also, to accommodate information being released at the July 11 Board of Trustees meeting, *Intercom* will be published on July 14, not July 10 as previously publicized. Instead of the normal Wednesday deadline for copy, Tuesday, July 1 at noon will be the cutoff time for submission of information to appear in the July 14 issue.

Anyone interested in submitting information should send it to lmr@psu.edu. The publication schedule for the remainder of the summer can be found at the *Intercom* Web site: <http://www.psu.edu/intercom/Home.html>.

Internal search under way for outreach positions

Applications are being sought for several newly created regional director positions within the recently strengthened Penn State Cooperative Extension and Outreach. The regional director is the administrative officer and program leader for one of eight designated geographic cooperative extension and outreach regions. Offices will be on a University Commonwealth campus. Regional directors serve as members of the leadership team for the College of Agricultural Sciences, provide direct oversight of cooperative extension and outreach activities within their regions and assist in providing leadership for newly formed Regional Cooperative Extension and Outreach Councils. The regional director works closely with College of Agricultural Sciences administrators, academic unit leaders, state program leaders and other University colleges and outreach units. The person in this position reports to the associate vice president for Outreach and Cooperative Extension.

The position requires an individual with significant leadership skills and the ability to work collaboratively within and outside the University setting. A doctorate in a discipline or combination of disciplines that provides adequate background for administering extension programs in agriculture and natural resources, family and consumer sciences, 4-H and youth development and economic or community development is preferred. However, candidates without a doctorate who have had a significant period of professional and administrative experiences with demonstrated excellence in program leadership will be considered.

This is an internal search and these positions are staff exempt, salary grade 30. Application can be made by including a resume, appropriate references and a letter of interest in outreach and cooperative extension. Applications will be accepted from qualified University employees until July 8, and should be sent to: Employment & Compensation Division Job #1530, Rider Building, University Park, Pa. 16801. Penn State is an affirmative action, equal opportunity employer. Women and minorities are encouraged to apply.

New University-wide advertising policy

The University's advertising policy was recently changed to cover new ways of advertising brought on by rapidly changing electronic communications, such as e-mail and Web sites.

Policy AD08, which covers the purchase of display advertising in commercial print media as well as commercial messages for radio and television, and advertising in official University publications, now includes guidelines which cover advertising through electronic mediums using University facilities.

The new policy states that unless authorized by the executive director of University Relations, the placement of non-University advertisements on electronic means of communications using University facilities (e. Web sites and online publications), is specifically prohibited. Officials believe that advertising on University Web sites not only detracts from the University's image, but also jeopardizes Penn State contracts with IBM that clearly state University equipment may not be used for commercial purposes.

Anyone with questions about this policy change, may call Cynthia Hall, director of University marketing, at (814) 865-7517. The full policy on advertising may be viewed on GURU at <http://guru.sp-psu.edu/policies/ad08.html>

More campaign leaders announced

Leaders for the upcoming capital campaign, Penn State's comprehensive private fund-raising effort, have been named for three different areas within the University. These leaders will help to recruit additional campaign volunteers, identify prospective donors and serve as spokespeople for the campaign.

In the College of Arts and Architecture, **Donald W. Hamer**, Centre County entrepreneur, has been selected as chairman of that college's committee; **John Curley**, chairman, president and CEO of Gannett Co.—publisher of *USA Today*, has been named the College of Communications campaign chair; and **L.J. (Bud) Rowell Jr.**, retired chairman of the board, president and chief executive officer of Provident Mutual Life and former Penn State football player, will lead Intercollegiate Athletics' fund-raising drive in the forthcoming campaign.

College of Arts and Architecture

Hamer, who in 1969 founded State of the Art Inc., a State College-based company that develops and manufactures miniature electronic components for the avionics, space, communications, medical and military industries, has named the Renaissance Man of the Year in 1995 by the Penn State Renaissance Fund board of directors. He holds bachelor degrees from both the University of Illinois and Penn State, and earned his MBA from the University of Chicago. He currently sits on the advisory board to the Palmer Museum of Art on the University Park campus, where he donated the Donald W. Hamer Sculpture Garden. Among his many awards, he has also been named an Outstanding Engineering Alumnus by the College of Engineering, and the University of

Illinois recognized him with the Engineering College Alumni Award for Distinguished Service in Engineering.

Other honors awarded to Hamer include the Microelectronics Society's Daniel C. Hughes Award for his contributions to the advancement of hybrid microelectronics technology; the Buessum Award from Penn State for lifetime achievement in electronic materials; and the Teddy Roosevelt Conservation Award, which President George Bush presented to him in 1992.

College of Communications

Curley has been actively involved in the College of Communications since 1989, when he was appointed to the college's board of visitors—which performs an annual review of the college's teaching, research and service to its students and the media professions. In addition to serving as that board's chair for the past four years, he has supported the college through his financial generosity, as an active participant in the college's activities and as a featured speaker.

Since he first joined Gannett in 1969, Curley has served as an editor of the Rochester, N.Y., *Times-Union*; as the editor and later as publisher of *The Courier News* in Bridgewater, N.J.; as publisher of the *News-Journal* newspapers in Wilmington, Del.; and, for six years, as head of the Gannett News Service, during which time GNS won the Pulitzer Prize for Public Service. The first editor of *USA Today*, which was launched in September of 1982, Curley has been a member of Gannett's Board of Directors since 1983. He worked his way up through the company to become president of its newspaper division in 1983, president and chief operating officer in 1984, CEO in 1986, and chairman in 1989. In May of 1996, Curley was elected chairman of

the Newspaper Association of America, a non-profit organization representing a \$46 billion newspaper industry and more than 1,500 newspapers in the United States and Canada.

Intercollegiate Athletics

Rowell, a four-time football letterman from 1951-54, received his B.S. degree in hotel administration from Penn State in 1955. He spent two years on active duty in the United States Marine Corps, reaching the rank of captain before leaving the service. He completed the Advanced Management Program at the Harvard Business School in 1971. He is a member of the Penn State Board of Trustees and served on the National Campaign for Penn State that raised more than \$350 million. A recipient of the Athletic Alumni Award in 1978, Rowell was an Alumni Fellow in both The Mary Jean and Frank P. Smeal College of Business Administration and the College of Health and Human Development in 1987. He received a Distinguished Alumni Award in 1988.

Rowell serves on the boards of directors of the Southeast Pennsylvania Chapter of the American Red Cross; The PMA Group; the American College; and the Foundation at Paoli. He is a past chair of the major business division of the United Way of Southwestern Pennsylvania; past chairman of the American Red Cross Blood Campaign and a past co-chair of the Annual Financial Tribute Dinner of the Philadelphia Council of the Boy Scouts of America.

In October, the University named alumnus **Edward R. Hintz**, founder and president of the New York investment firm Hintz, Holman and Hecker, as chair of the overall campaign. The dollar goal of the campaign and a kick-off date will be announced later.

Hershey exceeds national rates for three-year patient survival

circulatory support and the medical condition at the time of transplantation. Both of these populations are considered high risk, adding to the complexity of Hershey's patient profile.

Also of note, the transplants performed at Hershey during the reporting period were for a higher percentage of minority patients than the national average, reflecting the diversity of the community served.

More than 200 cardiac transplants have been performed at The Hershey Medical Center.

The United Network for Organ Sharing has recently released survival statistics for cardiac transplantation programs nationwide. The three-year patient survival rate of 93.2 percent at Penn State's University Hospital at The Milton S. Hershey Medical Center exceeds the national expected survival rate of 91.7 percent.

These survival rates were not adjusted for a number of factors that are known to affect patient and graft survival, including the use of pretransplant circulatory support and the medical condition at the time of transplantation. Both of these populations are considered high risk, adding to the complexity of Hershey's patient profile.

Anti-spam ideas

Advertisers have discovered that e-mail is a cheap way to annoy millions more people a day than they could ever have dreamed of doing through more traditional channels. Here are some tips from Ric Ford at MacInTouch for more easily sending this junk mail to the trash:

■ A "positive" filter in your e-mail program is one option. Spam programs rarely put your e-mail address in the To or CC: fields, so you can move messages with your own address to those fields to appropriate mailboxes, leaving spam unprocessed and ready for deletion. (Mailing lists will require additional filters.)

■ Peter Lewis' scribble shareware Finger utility is helpful for tracing spammers. Do a "whois" query at <http://whois.internic.net>, listing the network number or domain name in the user field of an advertiser's message. Then, you'll know where to send a biting e-mail message of your own.

Online publications

The official 1997 *University Editorial Style Manual* is now online in PDF format for downloading and remote printing at <http://www.psu.edu/PUBS/pubs.html>. Other online publications are also available there.

Awards

The Penn State Alumni Association Web site has won a mention as one of the top college Web sites by college guide author Ken Hartman. The association site is check-full of services for alumni, and may be found at <http://www.alumni.alu.psu.edu>.

Virus hoaxes

While there are real computer virus threats out there, the reality of the potential danger is not as frightening as the panicked e-mail messages would sometimes have us believe.

"If you cannot verify a report of a computer virus yourself, do not pass it along. Instead, pass it to an expert with the resources to verify (or refute) it, and to advise you on the necessary preventive measures," said Gerry Santoro, lead research programmer in the Center for Academic Computing.

His suggestion: Buck it to him at gmsantoro@psu.edu or to the Help Desk.

To Contact Doug, send an e-mail to webbrowser@psu.edu.

Anthropology professor earns \$2 million grant

James W. Wood, professor of anthropology and research associate, Population Research Institute, has been awarded a five-year, \$2 million grant from the National Institute on Aging, National Institutes of Health. The study, titled "Biodemographic Models of Reproductive Aging," will examine menopause and reproductive health among a large cohort of U.S. women. The study will assay urine specimens for the principal hormones in regulating ovarian cycles and in signaling reproductive aging throughout the life-course. The aim is to evaluate the effects of women's menstrual, reproductive and health-related histories on the timing and character (e.g., bleeding, follicular depletion) of the menopause transition. Collaborators include Darryl J. Holman and Kathleen O'Connor, research associates, Population Research Institute; Phyllis Mansfield, professor of women's studies and health education, Penn State; and Maxine Weinstein, associate professor of sociology, Georgetown University.

Awards

Faculty, programs and publications earn kudos

A Penn State faculty member and five Continuing and Distance Education programs and publications were honored with awards from the University Continuing Education Association (UCEA) in 1997. They include:

■ **Kamal Rashid**, research associate professor in the Department of Biochemistry and Molecular Biology in the Eberly College of Science, was honored with a Faculty Service Award for his "commitment to continuing education, administrative and academic abilities, fund-raising, international experience and ability to teach students of all ages." He directs the Biotechnology and Bioprocessing Short Courses, which annually attract 150 to 200 participants. He also directs the annual Summer Symposium in Molecular Biology.

■ **The Distance Education 1996-1997 catalog** of the C&DE Department of Distance Education won two awards from UCEA: the Gold Award in the category of general catalog using three or more colors from the Division of Marketing and Promotion and a Distinguished Honors Award for best college program catalog from the Division of Independent Study. Team members included **Erin Wease**, graphic designer; **M. Scott Johnson**, photojournalist; and **Joan Scholten**, publications specialist, all with the Department of University Publications. The catalog also won a Silver Award in the 12th annual Admissions Advertising Awards competition for institutions with more than 10,000 students, and a com-

panion piece — a poster with tear-off, postage-paid reply cards — received a Merit Award.

■ **The Innovate or Die campaign** won a Silver Award in the visual identity implementation category of the Division of Marketing and Promotion. The campaign involved a comprehensive series of materials to publicize the Innovations in Engineering Education conference held last October. Design images from the Stone Age were used to show the need for creative approaches to engineering education. The pieces included a post card, stationery, poster, ad and Web site. The design also was used on the cover of *A Personal Perspective on the Art of Innovation*, a book by **Jack Matson**, professor of civil engineering, College of Engineering. **Tracey Huston**, account specialist with the C&DE Office of Marketing Communications, was the project manager for the campaign. Team members included **Kristin Owens**, conference planner, C&DE Conferences and Institutes; **Dan Goepfert**, senior program planner, C&DE Office of Program Planning; and **James Collins**, graphic designer.

■ **A publication** announcing **Martin Luther King Jr. Celebration Week** at Penn State Great Valley won a Silver Award in the flier (one or two colors) category of the Division of Marketing and Promotion. **Allison E. Jones**, director of continuing education at Great Valley, led the team that organized the series. Team members included **Patty McEnadden**, continuing education program aide; **Jill Eidenberg**,

publications specialist, and **Laura Doughty**, coordinator of alumni and community relations.

■ **The video "A Few Days at Penn State"** won a Bronze Award in the video presentation category of the Division of Marketing and Promotion. The video illustrates Penn State's conferencing facilities and services. **Geoff Conrad**, account specialist with the C&DE Office of Marketing Communications, originated the idea for the video and worked with Penn State Public Broadcasting staff members **Steve Jones**, writer/narrator, and **Patrick Mansell**, producer/director, videographer and editor.

■ **The conference CREAD '95**, a Continuum for the 21st Century, won both a national Exemplary Program Award for noncredit programming in the conferences and institutes category and a UCEA Region II Award of Excellence in Noncredit Programming. Presented in October 1995, the conference attracted participants from nine sites in the Western Hemisphere representing 29 countries. **Janet Patterson**, senior conference planner, C&DE Conferences and Institutes, led the team that developed the conference. Team members included **Armando Villarreal**, executive director, CREAD, The Inter-American Distance Education Consortium; **Judy Hall**, conference planner, Conferences and Institutes; **Catherine S. Grigor**, assistant director for production, Office of Marketing Communications; and **Debra Shafer**, program planning associate, Office of Program Planning.

Shenango announces its teacher of the year

Ruth Raycroft, assistant professor of microbiology,

has received the Penn State Shenango Teacher of the Year Award. The award was instituted at the Shenango campus in 1984, and the winner is chosen through a series of steps which include nomination and recommendation by students and a panel of members of the campus community.

Raycroft, who received her B.S. from Bucknell University and her M.S. from Penn State, has been a faculty member since 1963. During her career with Penn State, she has had many different assignments. She first began as an instructor with Penn State's Continuing Education in the Harrisburg area. After a few years, she moved to the Philadelphia region where she continued providing educational services to diploma Schools of Nursing through CE courses, in addition to teaching at several Penn State campuses. In the early '70s, Raycroft relocated to University Park where she spent the next five years in administration. She continued to teach microbiology along with coordinating and presenting seminars to health care personnel. Her last 20 years have been spent in the Pittsburgh area teaching continuing education and resident instruction for Beaver, McKeesport, New Kensington, Fayette and Shenango campuses.

On June 30, Raycroft will retire from Penn State with more than 34 years of service.

RUTH RAYCROFT

Two cited for dedication to CES athletic programs

Gaylene Doucette, athletic director and assistant professor of physical education at Penn State Shenango, and **Olana Hedrick-Shaeffer**, instructor in health and physical education at Penn State Altoona, were presented the Robert J. Scannell Award during ceremonies at University Park.

The Scannell Award, which is in its eighth year of existence, is presented to administrators, coaches or members of the faculty or staff who served the athletic, intramural and recreation programs in the Commonwealth Educational System with distinction.

Doucette began at Penn State Shenango in 1973.

Throughout her career, she coached both women's basketball and softball teams at Shenango, leading them to several Commonwealth Campus and Western Pennsylvania Collegiate Conference titles.

Hedrick-Shaeffer has been women's volleyball coach at Altoona for the past 21 years, with a record of 63-3 over the past two years. In addition, she has served as women's tennis coach and women's basketball coach.

She received her bachelor of science and master of science in physical education from West Virginia University. In 1989, she received the National Athletic Trainers Certification.

DuBois activities coordinator wins quarterly award

For 10 years **Missy Duttry** has been helping students organize their clubs, events and activities. As activities coordinator for the DuBois campus, she was recently recognized for developing a high-quality student life program and has been named Penn State of the Quarter by that campus.

Duttry joined the Penn State DuBois staff 10 years ago. In that time span, her duties have broadened to include all aspects of student life at the campus. Today, she works with students of all ages to develop activities such as club programs, athletic

and intramural competitions, and campus-wide events. She also coordinates public events. Recently, she joined the admissions recruitment team.

Duttry holds a bachelor's degree in criminology with minors in English and sociology from Indiana University of Pennsylvania.

The Penn State of the Quarter award recognizes, on a quarterly basis, a member of the DuBois campus family who has rendered particularly noteworthy service to the campus and/or the community.

Chemical engineering professor receives Fulbright

Jonathan Phillips, professor of chemical engineering, has been awarded a Fulbright grant to conduct research in the Department of Chemical Engineering at Ben-Gurion University in Israel. Phillips is an expert in heterogeneous catalysis. He is noted for a variety of discoveries, including discovering the mechanism of catalytic etching, an unexplained phenomenon for nearly a century.

Phillips is one of approximately 1,600 U.S. grantees who will travel abroad for the 1997-98 academic year under the Fulbright Program administered by the U.S. Information Agency. The Fulbright Program was established in 1946 by Congress to "increase mutual understanding between the people of the United States and the people of other countries."

Research

How do Americans use their time?

By KIMBERLEY YARNELL BIERLY
Public Information

Though they may not believe it, Americans have more free time than they did 30 years ago. A researcher has shown that Americans have almost five hours more free time per week than in the 1960s. "Most of the time they have gained is used for television viewing," said **Geoffrey Godbey**, professor of leisure studies in the College of Health and Human Development.

He and **John P. Robinson**, professor of sociology and director of the Americans' Use of Time Project at the University of Maryland, have conducted studies showing that the bigger issue is pace of life, because most of the free time comes during the week, but is in small amounts which don't allow a person to undertake more satisfying uses of leisure.

Their source of time-use information, the Americans' Use of Time Project, is the only such detailed historical data archive in the United States. Every 10 years the project has asked thousands of Americans to report their daily activities on an hour-by-hour basis in time diaries. These time diaries offer a more careful and complete account of where time goes because when the federal government measures work, they rely on people's estimates. The results of the time studies find that people are highly inaccurate in estimating their own work time.

Americans over 50 years old are the biggest gainers of free time, studies show. "People think they are working longer hours, but in reality, they mistake pace of work for length of time spent working. On average, the number of hours that people spend working has diminished," Godbey said.

Although many people feel more rushed now than ever, Geoffrey Godbey, professor of leisure studies, has found that Americans have roughly five hours more free time each week than they did in the 1960s.

Photo: Greg Grieco

On average, men and women have about the same amount of free time available to them.

Robinson and Godbey have combined their findings in a new book, *Time For Life: The Surprising Ways Americans Use Their Time*, published by Penn State Press. They go beyond describing their controver-

sial findings to confront the numerous time paradoxes facing Americans, such as feeling more rushed and stressed when we actually have more free time; having free time in periods when it is least useful; and investing time in activities that bring us minimal enjoyment or fulfillment.

Hershey blood supplement should help trauma patients

Trauma-related injuries are the No. 1 cause of death among Americans ages 1-45. For trauma patients at The Milton S. Hershey Medical Center, a new blood supplement will be offered this summer that could greatly improve a patient's chance of survival.

"Only the most severely injured would be eligible for this study and right now 40 percent of these patients die as a result of their trauma. As an addition to all our best treatments, this new blood supplement quickly restores blood volume and increases blood pressure and the amount of oxygen in the blood. We hope we can reduce the number of deaths in this group by 25 percent," said **Maggie Shand**, a registered nurse and supervisor of clinical research for the department of surgery at the medical center.

The medical center is one of about 40 trauma centers nationwide that will be evaluating the use of the new blood supplement called Hemassist. An important part of this study involves a new guideline adopted by the Food and Drug Administration waiving consent for studies in emergency situations.

The blood supplement is made from outdated blood that, in the past, would have been thrown out. A new filtration process allows the protein or hemoglobin to be extracted virtually virus-free from the outdated blood. This means the new blood supplement does not carry any risk of contamination.

Trauma surgeons at the medical center hope to begin using the blood supplement by the July 4 weekend.

Gardeners need to have proper tools for the job

Digging around in your garden is not exactly brain surgery, but like surgeons, every gardener should have the right tool for the right job.

Some may say that a shovel is just a shovel, but a scientist in the College of Agricultural Sciences said real gardeners need a spade — and about four other essential gardening implements.

J. Robert Nuss, professor of ornamental horticulture, recommends five basic tools:

- A long-handled spade. This tool is designed for digging with a straight blade set at an angle so it cuts easily into the soil.
- A spading fork. This tool has flat, square tines and is used for moving heavy soil.
- A steel rake. These large rakes are used to break up clay, smooth out soil and rake in fertilizers.
- A hoe. Hoes are used to form rows, cover seeds, move soil, cut weeds and make holes for planting seedlings.
- A hand trowel. Hand tools are best for marking rows, weeding, making furrows and moving small plants, Nuss said.

Train your plants to survive indoors

Nuss also has tips to help your indoor garden thrive.

Most plants must be carefully prepared for the light conditions inside a building before placing them in a home, he said.

"If a plant doesn't receive enough light it will begin to use its food reserves," Nuss said. "Without adequate light, plants will decline and then die."

Nuss said plants can be trained to accept lower levels of light by gradually reducing their light levels to the point that comes closest to an indoor environment. Depending on the plant, this could take up to 15 weeks.

Nuss recommends starting a plant in a sunny spot and then slowly moving it to areas of lesser light over a few weeks.

"Once the plant has stabilized, you can provide the necessary light with incandescent or fluorescent lights," he said. But indoor light sources can give off a lot of heat, so don't put the light too close to the foliage.

ATHLETICS

A regular column provided by Intercollegiate Athletics

Portland named to USA basketball committee

Women's basketball Coach **Rene Portland** has been appointed as an NCAA representative to the USA Basketball Women's Select Team Committee for 1997 to the year 2000. As a member of the committee, Portland will help identify and select coaching staffs and players for USA Basketball's women's teams competing in the World University Games, the Junior World Championship, the Goodwill Games, the Pan American Games, the R. William Jones Cup and all zonal qualifications.

The coach of the 1996 silver medal-winning U.S. Junior World Qualifying Team, Portland was named head coach of the 1997 USA Junior National Team in January. She will lead the squad at the Junior World Championship Tournament this summer in Natal, Brazil.

Men's b-ball

The inaugural Big Ten men's basketball tournament will be staged at the 23,000-seat United Center in Chicago. The tourney is scheduled for March 5-8, 1998.

All-Americans

Senior catcher **Jared Sadlowski**, who led the Lions with 12 home runs this spring while batting .337 and driving home 46 runs, was named a first team GTE/CoSIDA Academic All-America. Sadlowski posted a 3.77 grade-point-average in management.

In addition, three Nittany Lion soccer players have been named to the National Soccer Coaches Association Scholar-Athlete All-America squad. **Sebastian Gouverneur** and **David Weil** were first team picks, while **David Kaufmann** made the second team.

For the latest information on Penn State Sports, visit the official Intercollegiate Athletics site on the Web: <http://www.psu.edu/> (Click on sports).

For the Record

In a May 29 front page story detailing the University's \$476 million capital construction plan, the amount to be spent on infrastructure upgrades for telecommunications was listed incorrectly. The correct amount to be spent over the next five years in this area is more than \$14 million, not \$11.4 million.

Hard hat area

Workmen shift utility manholes into place at the Pattee Library construction site on the University Park campus. The manholes will allow access to underground utilities.

Photo: Greg Grieco

Construction separates library wings

Pattee Library at University Park, currently undergoing major renovation and expansion work, has now become (for the time being) two buildings. The connector building that joined East Pattee to the rest of the complex was turned over to the contractor June 9. On June 10, the connector was closed to the public. It will shortly be demolished to make way for a new, larger structure on the same site. When this new connecting structure is completed, East Pattee, expanded and rechristened the Paterno Library, will be reunited with the Pattee complex.

East Pattee, which houses the Arts and Life Sciences Libraries, the General Reference section and offices, now has its own separate entrance and circulation area on the ground floor opposite north Burrows Building. Reference services will remain in East Pattee through the summer, but will be relocated to Central Pattee beginning in the fall semester.

In Central Pattee, LIAS terminals and the information desk have moved to Room 105, across from the main circulation desk. The former LIAS Catalog Room to the right of the main entrance will temporarily house the dean of libraries and human resources offices. There are wheelchair-accessible doors at the entrance to East Pattee and at the entrance to West Pattee, which serves the West and Central wings.

The library expansion project is on track for completion by the scheduled 1999 date. At no time is the library expected to close due to construction, nor will any of its collections be rendered inaccessible.

For up-to-the-minute information on the expansion project, the University Libraries maintains a construction Web page at <http://www.libraries.psu.edu/pubinfo/construction/>.

Tuition hike lowest in decades; differential tuition plan adopted

Penn State's tuition increase this fall will be the lowest in decades for most students. Penn State has expanded existing differential tuition rates to reflect more closely the cost of a student's education. The policy keeps the 1997-98 base tuition increase to 3.7 percent for more than 55 percent of its students — the lowest general tuition increase since 1968.

Meeting at Penn State Berks, the Board of Trustees on July 11 approved differential tuition rates at the University Park campus and other campus locations for lower- and upper-division undergraduate students, graduate students and for resident and non-resident students. It also increased and expanded tuition surcharges for high-cost programs.

"Most fundamentally, the change we are implementing this year recognizes the higher costs associated with teaching upper-division students — students who have completed 60 or more course credits," said President **Graham B. Spanier**. "The in-state tuition increase for lower division students at all Penn State locations is less than \$100 per semester or 3.7 percent."

The tuition increase will be slightly higher for upper-division students as the first year of a three-year phase-in of differential tuition. In addition, tuition rates for Pennsylvania resident students in the new colleges at Abington, Altoona and Berks/Lehigh Valley will be brought up to the Uni-

Sloan Foundation gives \$1.3 million to World Campus

By ALAN JANESCH
Public Information

The Alfred P. Sloan Foundation has awarded a \$1.3 million grant to Penn State to help the University launch its World Campus — a University-wide initiative with no walls, where learning is accomplished via the Internet and other new information technologies.

To date, the World Campus is on the cutting edge of a growing distance education movement. As envisioned by University leaders, it will be a distinctive outreach campus of the University and will offer a broad spectrum of educational activities to the global community beyond the existing Penn State system.

The grant is one of the largest awards this year in the foundation's "Asynchronous Learning Networks" program, which supports the use of technology to extend educational access to adult learners. ALN is the foundation's term for the use of online computer networks to provide any, any

Congress to discuss taxability of tuition benefit

Editor's note: As the *Intercom* went to press, the conference committee expected to debate these tax bills had not been named. July 11 was the date set for naming committee members.

By ALAN JANESCH and LISA ROSELLINI
Public Information

The taxability of the tuition reduction benefit offered to many employees of higher education institutions across the nation will soon be the topic of debate by Congress.

Late last month, the House of Representatives passed a bill that could have a major negative impact on college and university employees taking classes with the help of tuition reduction programs — especially graduate research and teaching assistants. The proposed legislation from the House of Representatives imposes a tax on tuition remission given

GLAD you asked

To submit a question for this column, please send e-mail to the address listed below. Submissions must include a contact name and telephone number so that *Intercom* can verify the source. Requests for anonymity will be honored.

Q: Why does Penn State not provide in each building a private area with a chair and an electrical outlet for breastfeeding moms to express milk while they are at work? Not everyone has access to a private office with a door that can be locked to assure privacy.

— New mom at
University Park

A: As I understand it, space assignment is greatly influenced by the administrative area that occupies it. Possibly staff have not been made aware of the need. However, since such a location may not need to be made available in each building all of the time, an alternative might be to make a quiet office available on a regular schedule to accommodate need. For new or renovated space this is an excellent suggestion and I will share it with the appropriate staff.

— Billie S. Willits
Assistant Vice President for Human Resources

Q: Although the University budget is available to the University community, it is my understanding that the Athletic Department budget is not. Why is this and exactly what is the relationship of the Athletic Department to the rest of the University?

— Fiscally conscious at
University Park

A: Penn State's budget, which is available on the World Wide Web at www.psu.edu/dept/budget, includes the entire athletic budget. For many years, the University provided a copy of the budget in paper form at all libraries in the Penn State system, but this spring it was able to place the budget on the Web for the first time. Improvements are anticipated in the Web version in the years ahead.

Another good source of information about athletic income and expenditures is the report the University files annually as part of the Equity in Athletics Disclosure Act. This document provides broad information about income and expenses for men's and women's sports.

The Athletic Department is an auxiliary unit which is subject to University oversight. All of its budgeting and accounting operations are handled within the University system. The Director of Athletics has a reporting line directly to the president.

The Penn State Athletic Department is entirely self-supporting, funding its ambitious program of 29 varsity sports, as well as a large club sport and intramural program, from revenues generated, principally by receipts from football and men's basketball and donor contributions. No tax or tuition dollars are used to support the athletic program.

— Timothy M. Curley
Director of Athletics

Tuition

continued from page 1

versity Park, Erie, Harrisburg and Hershey level over several years.

Nearly 40,000 students or 55 percent of the student population will have a tuition increase of 3.7 percent or less; about 13,000 students or 17.6 percent will have an increase between 3.8 percent and 4.5 percent; about 19,000 students or just over 26 percent will have an increase between 4.6 percent and 5.5 percent; and the increase for just 1 percent or 830 students will be 5.6 percent or higher.

Undergraduate Level

■ Undergraduate tuition charges per semester for the 1997-98 academic year for in-state associate and lower-division students:

—\$2,816 at University Park, Erie, Harrisburg, Great Valley and Hershey, an increase of \$99 over last year's tuition per semester.

—\$2,741 at Altoona, Abington and Berks campuses, an increase of \$110.

—\$2,727 at Lehigh Valley, Schuylkill and the 12 campuses of the Commonwealth College, an increase of \$96.

■ For in-state upper-division students with a minimum of 60 credits the costs are:

—\$2,866 at University Park,

Erie, Harrisburg, Great Valley and Hershey, an increase of \$149 over last year's tuition per semester.

—\$2,791 at Altoona, Abington, Berks, Lehigh Valley and Schuylkill campuses, an increase of \$160.

—\$2,768 the Commonwealth College campuses, an increase of \$137.

■ Out-of-state lower division undergraduates will pay \$6,103 per semester, an increase of \$216 at University Park, Great Valley and Hershey; \$5,887 with no increase at Erie and Harrisburg; \$4,267 a semester at Altoona, Abington and Berks, an increase of \$178; and \$4,239 a semester at Lehigh Valley, Schuylkill and the Commonwealth College, an increase of \$150.

■ Out-of-state upper division undergraduates will pay \$6,153 or an increase of \$266 at University Park, Great Valley and Hershey; \$5,937 or an increase of \$50 at Erie and Harrisburg; \$4,317 or an increase of \$228 at Altoona, Abington, Berks, Lehigh Valley and Schuylkill; and \$4,280 or an increase of \$191 at the Commonwealth College campuses.

Graduate Level

■ Most in-state graduate students will pay \$3,151 or an

increase of \$112 at University Park, Erie, Harrisburg and Hershey, although MBA students will pay \$3,318 or an increase of \$279. Out-of-state MBA graduate students will pay \$6,657 while those in other programs will pay \$6,490.

The surcharge for upper-division students in engineering and related fields at University Park is \$225 per semester. Phasing in a similar fee for students in science, the 1997-98 surcharge in science is \$75. The surcharge for nursing is \$250 per semester.

There will be no change in the student activity fee of \$25, but the computer fee for all students will increase from \$70 a semester to \$75 which will make \$606,000 available to expand student access to technology to expand student access to technology.

"Recognizing the high costs associated with some programs, we are also extending tuition surcharges to science and nursing. Surcharges have been in existence at Penn State for some time for upper-division and graduate students in engineering and engineering technology, earth and mineral sciences, architecture and landscape architecture," Spanier said. "We feel this is an appropriate approach to support the special laboratory and equipment needs of students in science and the high cost or required clinical experiences in nursing."

Debate

continued from page 1

to students and college employees (*Intercom*, June 26). If adopted by the full Congress, faculty, staff and students (including graduate students) who receive a tuition reduction would, for the first time, be required to pay federal income taxes on the cash value of the waiver. The tuition reduction benefit is currently allowed under the tax code.

A letter from the president of the nation's umbrella higher education association urging faculty, staff and students to write to Congress over the possible taxation of the tuition reduction benefit has been sent to more than 3,000 college and university presidents and chancellors.

In addition, President Graham B. Spanier has sent a note to all members of the Pennsylvania Congressional delegation, asking them to support the continued tax deductibility of tuition discounts for graduate students, and staff and their dependents.

The letter from Stanley O. Ikenberry, president of the American Council on Education recommends that university presidents communicate more widely with their staff, faculty and students regarding the pending tax issues. Ikenberry encourages members of the campus community to fax their comments to any member of Congress, since the plans have been fast-tracked in order to finish work on them before the August session. Six presidential higher education associations have endorsed the letter.

In the waning weeks of June, both the House and the Senate passed separate versions of expansive tax bills aimed at helping to balance the federal budget and cut taxes. On June 30, President Clinton also proposed a revised tax plan modifying his previous higher education proposals. Both the Senate's and Clinton's tax plans are friendlier to higher education and do not phase out the tax provision for tuition reduction benefits.

Both the Senate and House bills do include more than \$30 billion in a variety of education-related tax incentives and the presi-

Fax: (202) 225-3103

Rep. John E. Peterson
Fax: (202) 225-5796

Sen. Rick Santorum
Fax: (202) 228-0604

Sen. Arlen Specter
Fax: (202) 228-1229

dent's plan contains \$45 billion for education-related provisions. However, the House bill not only includes the detrimental provision for taxing the tuition benefit, but also includes a provision to remove the 1986 grandfather clause that exempts TIAA-CREF's pension business from federal tax. This adds \$300 million in federal revenue a year, and according to TIAA-CREF, would reduce the retirement income of educators by as much as 3 percent to 5 percent annually. This provision is not in the Senate bill.

The Council of Graduate Schools, the National Association of Graduate-Professional Students, the Association of American Universities and members of the Big Ten, among others, have been working to push for support of the Senate plan (S. 949).

"The House bill (H.R. 2014) runs so counter to every education initiative," said Rodney Erickson, dean of Penn State's Graduate School. "The removal of the tax deductibility of tuition discounts to teaching and research assistants at the graduate level, would be absolutely devastating for graduate education."

In his letter to Congress, Spanier seeks support for the Senate plan, saying that the House provisions are "problematic." Referring to the potential loss of the tax-exempt status of the discount, Spanier said, "This would be particularly devastating to graduate students engaged as teaching and research assistants who

■ On the Web

For more information on the House and Senate bills, or to check on updates to the legislation, visit the Web site of the National Association of College and University Business Officers at <http://www.nacubo.org> or the U.S. Senate at <http://www.senate.gov> or the House at <http://www.house.gov>.

would find their income reduced to the point that graduate school would no longer be affordable."

Roughly three-quarters of Penn State's tuition reduction grants are used by Penn State staff and their dependents and about one-quarter by faculty and their dependents. Penn State believes that its tuition reduction program is a cost-effective way of helping its employees do their jobs better and of recruiting high-quality faculty and staff.

At Penn State, there is a 100 percent tuition discount for graduate assistants and a 75 percent discount for qualified employees and their spouses and dependents. According to one estimate, if these discounts lose their tax-exempt status, employee and graduate student taxes could amount to more than 20 percent of the value of the discount.

The bills passed by both the House and Senate will now go to a joint conference committee, which resolves the differences in the bills. Members of the conference committee were expected to be named July 11. Final committee action on the bills could be taken in late July or early August.

The sections of the tax code the House bill would eliminate are sections 117 and 127.

Anthony Wagner, director of governmental relations for Penn State, said University employees concerned about the issues should write to any member of the Pennsylvania delegation (see box) to express their views as a private citizen. Employees should not write on Penn State letterhead.

"Voices need to be heard on this particular issue that is of critical importance to Penn State and other institutions," Wagner said.

Be our guest

Shelley Leonard, an undergraduate student in education, sets the tables at the Nittany Lion Inn for a luncheon for conference attendees. The Nittany Lion Inn on the University Park campus is the site of about 7,000 conferences per year.

Sloan grant

continued from page 1

where access to learning.

"We decided to give significant support to this University-wide initiative because of Penn State's historical commitment to serving the off-campus learner and the vision and commitment of the president and academic leadership," said Frank Mayadas, foundation program officer.

This grant is one of a select few Sloan is making to major universities which will demonstrate how ALN can be scaled up for large enrollments. The foundation, based in New York City, is a philanthropic non-profit institution that last year alone awarded \$53 million in grants to organizations and institutions for projects in areas covering technology, science, education and selected national issues.

Penn State's approach to the World Campus is to work with academic units throughout the University to:

- convert existing distance education programs to the World Campus environment and develop new courses where demand is high;

- build and support the World Campus's "technological platform" — the computer network needed to deliver World Campus courses; and

- conduct ongoing evaluations, which will not only assess how the World Campus is doing but also ensure that innovations developed for the World Campus can be adopted by the rest of the University.

James Ryan, Penn State's vice president for outreach and cooperative extension, said the way to meet the increasing demand for education and training "is not to build more physical campuses, but to create a new approach to education that effectively uses technology."

Penn State expects to have a core set of Penn State programs available through the World Campus by early 1998. By 2002, more than 30 certificate, degree programs and continuing professional education modules — involving more than 300 individual courses — will be available through the World Campus.

The \$1.3 million grant award represents a continuation of an existing relationship between Penn State and the Sloan Foundation. Earlier, using foundation grants, Penn State developed an ALN that includes a tutoring system for engineers studying for their professional engineering certification and graduate acoustics certification course being developed for an on-demand ALN. A five-course series, it is delivered via CD-ROMs especially created for the acoustics program, Web postings, Internet conferencing, books and e-mail and will be a part of the initial World Campus offering.

When Spanier announced the World Campus initiative in his 1996 State of the University address, he said that "advances in technology are allowing us to expand distance education as a way of dealing with a set of emerging social and economic issues.

From the Trustees Docket

Architects named, building projects approved

By KAREN I. WAGNER
Public Information

The Board of Trustees approved the appointment of architects for an alumni center and a child care facility at University Park, in addition to giving the go-ahead to Penn State Worthington Scranton for a classroom/conference center and Penn State Harrisburg for a science and technology building expansion.

The existing University House building will become the alumni center and additional facilities will be constructed for staff offices, meeting rooms and recognition of outstanding alumni. The center will serve as a gathering point for returning alumni, an information center, a starting point for campus tours and location for special events. Linda O'Gwynn Architects of Philadelphia has been selected to design the \$7 million project. Although Penn State has the largest dues-paying alumni association in the world with more than 140,000 members, it's one of the few major universities that has no dedicated center.

The alumni center will be financed entirely by private funds. Penn State alumni Edward R. and Helen Skade Hintz pledged \$5 million to the University earlier this spring, part of which will go toward the new center.

The board also approved the appointment of the architectural firm of Kieran, Timberlake & Harris of Philadelphia to design a new central campus child care facility. The building will accommodate approximately 150 children and will help alleviate the existing demand for child care.

The new building will supplement the child care facility currently under construction at the Penn State Research Park. Last June, President Graham B. Spanier approved the University Child Care Action Plan that reinforced the University's commitment to providing access to quality child care for faculty, staff and students and made recommendations for both facilities.

Penn State Harrisburg, Capital College, will be the beneficiary of a \$1.2 million, 8,820-square-foot addition to its existing science and technology building. The board-approved project will provide pilot research labs, offices and a multimedia classroom. The addition is being constructed with funding from the Pennsylvania Department of Environmental Protection, which will share in the use of the pilot labs for research.

The Whitaker Foundation, AMP Foundation, GPU Energy and other corporate sponsors also are helping to fund the project.

Penn State Worthington Scranton won board support for its plans to construct a 9,100-square-foot classroom-conference center to support its continu-

Now and later

University House, above, will be expanded and transformed into the University's new alumni center, as seen in the conceptual model shown to the right.

ing and general education programs.

In other business, the board approved University plans to acquire property at several locations, including:

- a Council Crest Colony property to the east of interstate 81 and route 93, Hazleton, which contains 18.7 acres of woodland, for \$250,000;

- the Hawbecker property at Fox Hill Road, Benner Township, adjacent to the University Park Airport, which contains 203.5 acres of farmland, for \$1.7 million;

- the Kline property at 1687 Barn's Lane, adjacent to the University Park Airport, which contains five acres and a one-story, 2,524-square-foot home, for \$325,000; and

- the Frantz property at 1725 Barn's Lane, adja-

cent to the University Park Airport, which contains slightly more than one acre and a two-story, 2,561-square-foot home, for \$202,875.

Consistent with Federal Aviation Administration requirements and with funding provided by the FAA, the Kline and Frantz properties are being acquired due to their location in relation to the proposed flight plan of a new runway for the University Park Airport.

University received a record \$94.9 million in private gifts

Penn State received gifts totaling \$94.9 million from alumni and friends during the fiscal year ending June 30, a 14 percent increase over gift totals from the previous year. The number of donors also increased to nearly 109,000, up from 106,900 in 1995-96.

This is the seventh consecutive year that private giving to the University has increased.

"These gifts will significantly strengthen the quality of our academic programs," said President Graham B.

Spanier. "Our donors have designated their support for a variety of areas that have a critical need for more funds — scholarship endowments and graduate fellowships, new lab equipment, library acquisitions and faculty research, to name just a few. We are very grateful to our alumni and friends for their extraordinary generosity."

Giving was up in all categories. Nearly 63,000 alumni made gifts totaling \$29.7 million, compared with

\$26.9 million in 1995-96. Nearly 5,000 corporations made gifts totaling \$30.9 million, compared with \$24.8 million the previous year. About 1,600 foundations and other organizations made gifts totaling \$19.5 million, compared with \$17.3 million from this source in 1995-96. Gifts from 39,000 nonalumni individuals totaled \$14.9 million, up from \$14.2 million the year before.

Spanier also noted that these gifts would be counted as part of the

advance phase of the University-wide capital campaign that Penn State expects to launch at a later date.

"While we have not yet determined the dollar goal for the campaign, this year's record giving certainly gives our fund-raising efforts strong momentum," he said. "The fact that so many individuals and organizations want to help Penn State is a tremendous source of inspiration as we continue to set the strategic direction of the campaign."

From the Trustees Docket

Retirement facility lease agreement ratified

By ALAN JANESCH
Public Information

The Board of Trustees approved a land lease agreement, with options for future lease or purchase, for an 80-acre University-owned parcel of land. The agreement will allow developers to move ahead with a proposed University-related retirement community project known as "The Village at Penn State."

The parcel, known as the "Farm 8" site, is bounded by the Mount Nittany Expressway and Fox Hool Road near University Park. Initially, up to 30 acres of the parcel will be leased to the Village at Penn State Retirement Community — a group that will have non-profit status but will still pay local property taxes.

Penn State is interested in the development of a retirement community because it believes that the State College area is highly attractive to retirees with Penn State ties, that the University's involvement will help ensure the success of such a community and that the educational and volunteer relationships it makes possible would be beneficial to the retirees and to Penn State.

William H. McKinnon, senior associate vice president for finance and business, said the site is well suited to the project. "It provides University-owned land that can be leased to the development team, and adjacent to the University-owned parcel is privately owned land that can be sold for individual condominium ownership," McKinnon said. "Also, the view from the site to Mount Nittany and the University provides a desired visual relationship between Penn State and the Village."

Under the terms of the agreement, there will be a base lease payment of \$50,000 a year, plus an additional annual lease payment per unit per year. The term of the lease, starting with the closing of financing to build the initial phase of the project, will be 35 years, with the option for two consecutive 15-year renewal periods.

"Retirement community residents could get involved in virtually every part of Penn State, including teaching, volunteering at artistic and cultural events, volunteering in our day care centers or the libraries, or helping at athletic events."

President Graham B. Spanier

There also are options to lease or purchase the remaining portions of the 80-acre site for a period of 10 years from the effective date of the initial lease agreement.

"I'm very pleased that the project is moving ahead," said President Graham B. Spanier. "The idea of a retirement community at Penn State engages me from almost every perspective."

Spanier said that a properly designed and operated retirement community related to the University could provide valuable services to its residents, enhance the already close relationship between Penn State and its alumni and promote increased educational opportunities for Penn State students and faculty. "Retirement community residents could get involved in virtually every part of Penn State," Spanier said, "including teaching, volunteering at artistic and cultural events, volunteering in our day care centers or the libraries, or helping at athletic events."

To develop the retirement community, the University has been working with a project team consisting of Cooperative Retirement Services of America Inc. (CRSA) of Memphis, Tenn., and Pinnacle Development Inc. of State College.

Peter B. Weiler, associate vice president for development and alumni relations, told the board

that a marketing survey done earlier this year had high response rates and significantly positive results.

In general, retirement communities of this kind provide several levels of services for retirees: independent living, for those who can care for themselves; assisted care, for retirees who need some help with personal needs, but are largely self-sufficient; and skilled care, which usually provides high-level care in a nursing-home environment.

As it is currently envisioned, the Village at Penn State would consist of a planned unit development (PUD) for persons 55 and older and a continuous care retirement community (CCRC) for those who want to ensure the availability of long-term care.

Penn State will not use any University funds to develop the project, and will not own or operate the facility. But the retirement village would have access to University programs, services and facilities that would benefit the Village and its residents as well as the University and its students. As a whole, the Village will involve:

- the Penn State Geisinger Health System, in providing medical care;
- the College of Health and Human Development, the College of Medicine and other colleges in doing research and providing services;
- the Penn State Alumni Association; and
- a volunteer program.

In addition, a retirement community associated with Penn State would be able to provide internships and work opportunities to students in health planning and administration, recreation and leisure activities, hotel and restaurant management, human development and family studies, nursing, nutrition, kinesiology, gerontology and other related disciplines. It also will be tied into classes, athletics and cultural events.

Stories in national, regional and area newspapers have described the State College area as a community highly attractive to retirees.

Undergraduate and graduate programs see some changes

For a more complete explanation of the following changes, please see *Intercom's* Web version at <http://www.psu.edu/ur/INTERCOM/Home.html>

■ Undergraduate Programs

The Mary Jean and Frank P. Smeal College of Business Administration

New major announced in management science information systems, and international business; expected to provide a greater degree of internationalization to the curriculum in management science and information systems. For this major, 145 credits are required.

College of Earth and Mineral Sciences

New minor in Industrial Health and Safety. This minor, which will offer a specialized program for students in other broad-based majors, will enable the program to broaden its appeal and, at the same time, satisfy a need for graduates who are trained in the principles of occupational health and safety. For this minor, 18 credits are required.

College of Engineering

Addition of new option to the major in chemical engineering.

— Option in bioprocessing engineering designed

to acquaint the chemical engineering student with the bioprocessing world while building on a strong chemical engineering curriculum; 27 credits are required for this option.

College of Health and Human Development

Change in option in the recreation and park management majors.

- a) Change in name from option in commercial recreation and tourism to option in commercial and community recreation;
- b) Change in name from option in outdoor recreation and environmental interpretation to option in park management and environmental interpretation;
- c) Drop the option in recreation and park management.

■ Penn State Harrisburg, Capital College

New major in electrical engineering; 128 credits are required.

■ Graduate Programs

College of Arts and Architecture

Change in name from Master of Arts Degree Pro-

gram in Music to Master of Arts Degree Program in Musicology.

College of Engineering

Change in program: Doctor of Philosophy Degree in Industrial Engineering.

The change will require the addition of 18 course credits to the Ph.D. program. This change will strengthen the requirements of the industrial engineering program to satisfy faculty desires; and establish requirements on par with those of peer institutions.

College of the Liberal Arts

— New program: Master of Arts Degree in Russian and Comparative Literature.

This new program enables students to concentrate in Russian literature at the graduate level while having the advantages of a comparative context.

— Change in program: Master of Arts Degree program in Speech Communication.

The Department of Speech Communication proposed the addition of a non-thesis option to the master of arts degree program.

From the Trustees Docket

University to deliver papers to residence halls

The University will launch a newspaper delivery program in the University Park residence halls when classes resume on Aug. 27, and also at nine additional campuses that have residence halls.

Students at University Park will have their choice of four daily newspapers when they return to their residence halls. They are *The New York Times*, *USA Today*, the *Centre Daily Times* and *The Daily Collegian*.

An experiment to deliver newspapers to 550 residence hall doors this past spring proved successful enough that the University is expanding the program for the 1997-98 school year. Approximately 17,000 students live in residence halls at the University's residential campuses.

The follow-up survey of the students involved in the 15-week experiment indicated that students who received *The New York Times* and the local newspaper, the *Centre Daily Times*, had a better understanding of local events and a better knowledge of national and international events. The students who took part in the survey also said that access to the daily papers contributed to their overall general education at Penn State and reported that reading a newspaper contributed to their ability to comprehend a debate on a critical issue.

The University also surveyed a group of students in a residence hall where the free newspapers were not delivered to their doors. This group reported they were more likely to get

Synchronized reading

Newspaper reading may become a more common habit at University Park and other campuses with residence halls. This fall, the University will deliver newspapers to residence halls.

Photo: Greg Grieco

news through World Wide Web connections.

"It is clear to us through this experiment that newspaper readership can have a positive impact on the lives of our students and we want to now expand this service," said President Graham B. Spanier, who first suggested bringing newspapers into the residence halls last winter.

Starting with the fall semester in late August, Penn State will purchase several thousand copies of *The New York Times*, *Centre Daily Times* and *USA Today* and place them in common areas of residence halls. Penn State

already contributes \$20,000 a year toward *The Daily Collegian*, the student newspaper, which is offered free at numerous locations around campus.

"We will closely monitor which newspapers are most popular and change the mix of available newspapers accordingly," Spanier said. "We are prepared to make as many copies of the newspapers available as students want, as reading habits and newspaper preferences become more predictable."

"As part of this initiative we also will put in place more convenient distribution of the student newspaper, *The*

Daily Collegian," said William Asbury, vice president for student affairs.

The program will be funded by adding only \$5 a semester to student room and board rates. An increase this small was possible due to extremely favorable rates being offered by the cooperating newspapers.

"It is critical that college students have an understanding of the world, both local and international, where they will soon go out to live, have jobs and raise families," Spanier said. "Reading a daily newspaper is a perfect way to gain a better understanding of that world."

Survey results from the experiment indicate the students who received the papers felt they were more likely to want to continue to read the papers in the future.

The University is going to reap additional benefits as a result of the innovative program. Some of the participating newspapers have indicated they will help establish scholarships for students.

One aspect of the program which a number of students have raised concerns about — recycling of all these newspapers — also has been worked out. The PennMunch company, which implemented research by George Hamilton, senior lecturer in agronomy, to create much from shredded newsprint and other recycled paper, will help recycle these newspapers. It also has indicated an interest in funding a student scholarship as part of the program.

Survey shows support for public higher education funding

Pennsylvanians believe additional tax dollars should be allocated to support public higher education, according to a recently completed study.

The telephone survey of 818 residents of the state was conducted as part of an annual poll of Pennsylvania citizens toward particular issues impacting the state by the Center for Survey Research at Penn State Harrisburg.

The majority of adult Pennsylvanians felt that the state should place high priority on funding its colleges and universities.

The results of the study are consistent with results of previous larger studies by the Gallup Organization.

When asked to consider all the major issues facing Pennsylvania today, and then rate the level of priority that should be placed on funding the state's colleges and universities, 62 percent of the respondents said it should be a "high priority" and 32 percent said it should be a "moderate priority." Only 3 percent of the survey respondents said funding of the state's colleges and universities should rate a low priority.

The majority of Pennsylvania adults believe that the state's funding distribution for higher education is unsatisfactory, favoring more funding for public universities.

Pennsylvania ranks 47th in the nation in support

of public higher education and second nationally in the support of private colleges with tax dollars.

In general, the omnibus study conducted by the Center for Survey Research found:

- Access to an affordable college education is important to most Pennsylvanians. In fact, 86 percent of those surveyed said it was very important to them personally or someone in their household or family.

- The majority (62 percent) of adult Pennsylvanians feel that the state should place high priority (in relation to other issues) on funding its colleges and universities.

- The majority (74 percent) of Pennsylvania adults believe that the state's current funding distribution for higher education is unsatisfactory. Of the respondents, 70 percent said they favor more funding for public universities.

- In general, citizens think that Penn State makes an important contribution to the economic vitality of Pennsylvania.

And finally, the poll asked which Penn State activities they considered important to the welfare of the state.

"Programs to help children in grades K-12," "providing a high quality undergraduate education," "retaining workers," "education programs for school teachers," "providing research and service

to the agricultural industry," "helping small business owners" and "stimulating start-up companies" all received broad support from Pennsylvanians who were questioned in the poll.

In addition to being consistent with previous statewide studies, the findings reflect a national trend recently reported on by the Council for Aid to Education, and sponsored by the RAND Corp.

The good news outlined in that report is that demand for a college degree is increasing. This is perhaps not a surprising trend since over the last 20 years the average earnings of males with less than a bachelor's degree have declined while average earnings for those with a bachelor's degree or more have increased. The trend is even more pronounced for women.

However, at the same time demand is growing, escalating costs and decreasing public financing are expected to culminate in a national crisis. In fact, the council warns that if these trends continue at their current rates, by the year 2015 higher education will fall \$38 billion short of what is needed to serve the student population in that year.

The study of Pennsylvania adults was conducted between May 5 and June 1. Publicly supported colleges and universities include Penn State, University of Pittsburgh, Temple, Lincoln, the 14 colleges of the State System of Higher Education and the state's 15 community colleges.

From the Trustees Docket

Operating budget for 1997-98 meets approval

The Board of Trustees approved a 1997-98 total operating budget of approximately \$1.4 billion that includes several significant changes.

"The budget we are presenting to you today differs from those in recent University history in that a President says," said President Graham B. Spanier in his report to the Board of Trustees. "Happily, it includes a 3.1 percent increase in our state appropriation, in contrast to the more modest increase received last year." The state appropriation increase for 1997-98 is \$8.7 million, for a total appropriation of \$289.7 million.

The budget also contains the largest increase for program allocations in many years, including the addition of more than 100 new faculty positions, about 60 of which will be filled this year, and internal budget reductions of about \$3.5 million. It implements for the first time a President's Excellence Fund to provide additional support for each unit's highest priorities; incorporates differential tuition as a new pricing approach; and reflects The Dickinson School of Law and Penn State Geisinger Health system mergers that became effective July 1.

The Dickinson School of Law budget, which was approved by its board on May 30, is now part of Penn State's total operating budget and adds approximately \$11 million to the total. Budget changes at The Hershey Medical Center include an increase of \$35.7 million for the College of Medicine general funds budget and a \$7 million increase for its restricted funds.

The budget also includes a reduction of \$265 million for the University Hospital and a reduction of \$109 million for auxiliary enterprises at Hershey, reflecting the transfer of much of the operations of the hospital to the new entity, the Penn State Geisinger Health System.

"Putting these two pieces together, the total University budget for next year is \$1.4 billion, including \$56.4 million increase in all areas except Hershey and a net reduction of \$331.8 million at the medical center, reflecting the shift to the Penn State Geisinger Health System," Spanier said.

Penn State will have an active role in and provide oversight for the Penn State Geisinger Health System, whose initial annual budget is estimated to be \$1.1 billion. In addition, the Corporation for Penn State—an umbrella for the development of the research park, the Ben Franklin Technology Center of Central and Northern Pennsylvania, the Bioprocessing Resource Center and other areas—has an annual budget of \$11 million.

Help's on the way

Melissa Chaney, instructor in the School of Visual Arts, left, assists student Ryan Deemer during an outdoor session of an art class. Faculty received good news with the Board of Trustees' approval of the 1997-98 operating budget: the University has budgeted for an additional 100 faculty positions.

Photo: Greg Grieco

Giving further detail on the budget, Spanier told the board that the state appropriation will represent 35 percent of the Educational and General Funds Budget—the portion of Penn State's total budget that is supported by state appropriations and tuition and fees for the teaching and service missions of the University. Student tuition and fees will contribute 57 percent and other income from investments, recovery of indirect costs and departmental services will contribute 8 percent.

Cost increases for 1997-98 of \$26.6 million include a net increase of \$1.2 million in employee benefit costs, including increases in health care, social security and changes in employer contributions to TIAA/CREF and the state retirement system, and an increase of \$14.4 million in salary adjustments and related benefits to bring these more in line with other Big Ten public universities.

"To maintain the competitiveness of Penn State's salaries and to recognize the strong performance that is characteristic of our faculty and staff, we gave as much priority as possible to salary increases," Spanier said. "This budget plan is based on a 2 percent increase for all employees whose performance has exceeded expectations, and another 1 percent of the total salary base for additional merit, market, equity and compression considerations."

John Brighton, executive vice president and provost, outlined a number of program adjustments totaling \$7.4 million of the Educational and

General Funds Budget which are allocated to the 31 budget units for program needs. These allocations were recommended by the University Planning Council based on its review of unit strategic plans and requests. They focus on supporting the University's core academic functions and meeting critical needs.

"One of the things that came across repeatedly as the University Planning Council reviewed the college strategic plans is the need for more faculty members," Brighton said. "By nearly any benchmarking measure that looks at the size of the faculty, we are behind other comparable institutions."

Data from the Joint State Government Commission for Pennsylvania's state-related universities show that Penn State's student/faculty ratio of 18.4 to 1 is higher than those for Pitt at 14.5 to 1 and Temple at 16.9 to 1. It would take about 650 additional faculty positions to bring Penn State's ratio in line with the others.

"Through internal budget reallocations and the proposed new funding for academic programs, Penn State will add more than 100 new faculty positions in the 1997-98 budget year. About 60 of these positions will be filled this year and national searches are in progress to fill the rest for the following academic year," he said. "In addition, the equivalent of 21 additional faculty positions will result from shifting academic personnel with administrative assignments back to the classroom."

A total of \$1.3 million through internal reallocations is included to

fund 25 of those new faculty positions; \$1 million is allocated to add faculty positions and enhance academic programs in the Life Sciences Consortium, including the Eberly College of Science, the College of Health and Human Development, the College of Agricultural Sciences, the College of Medicine, the College of the Liberal Arts and the College of Engineering; and \$4.6 million will support faculty positions and other high priority academic programs.

In addition, more than \$1.4 million, reflecting the changes in tuition, will go to colleges and campuses based on the enrollment in each unit. About \$827,000 for instructional workload adjustments will go to nine of the 10 colleges based on changing enrollment patterns.

Libraries and information technology that support every part of the University will receive a total of \$2.1 million, and \$1 million is allocated for major maintenance of buildings and facilities in addition to the \$7.3 million annually budgeted for major maintenance. Maintenance funds will need to be increased significantly over the next several years to reduce the growing backlog of projects currently estimated to total more than \$170 million. About \$605,000 will go to academic support and administrative support units, and \$250,000 will enhance undergraduate student aid.

On the income side of the Educational and General Funds Budget new funds include about \$1.1 million in grants-in-aid; \$6.5 million in the state appropriation; \$15.5 million from tuition rate changes; \$390,000 from new laboratory and clinical surcharge; \$606,000 from a small increase in the computer fee, \$500,000 from Summer Session tuition increase; \$1.2 million in investment income and indirect cost recovery; and other charges for a total of approximately \$26.6 million in income changes.

Before concluding, Spanier announced that he had established the President's Excellence Fund of \$1.6 million to provide additional support for the highest priority needs within each college and administrative unit.

"The proposed salary increase is clearly short of where we'd ideally like to be, and the program allocations are never enough to meet even the most critical needs. This fund will help to ease these concerns to some extent," he said.

"The use of these funds is to be determined by each unit and may be used to reward unusually meritorious faculty and staff, add faculty positions, support graduate assistantships, meet special departmental allotment requirements or other high priority needs."

New health system is officially up and running

State attorney general signs agreement with the University and Geisinger

As planned, the Penn State Geisinger Health System was formally launched July 1 at a signing ceremony in Danville between officials from Geisinger and The Milton S. Hershey Medical Center.

Just one day before, the state's attorney general forged an agreement with the University and Geisinger. Over the next six months, the system will ensure accessibility to sophisticated health care services for consumers in central Pennsylvania. The Penn State Geisinger Health System must negotiate with all other health plans in a 20-county region of central Pennsylvania to provide tertiary care — sophisticated procedures such as organ and bone marrow transplants.

"The attorney general is pleased we could enter into this agreement," said **Sean Duffy**, spokesman for that office. "We have had good conversations with all parties involved and this agreement protects consumers as well as remaining cognizant of Penn State's and Geisinger's desires — allowing them to move forward and meet their self-imposed July 1 deadline."

The merger of the clinical enterprises of Geisinger and Hershey Medical Center into a new, non-profit, health system establishes a billion-dollar enterprise that is the third largest physician practice in the nation. The merger is the only one between a health system which includes an insurance organization and a school of medicine. The Penn State Geisinger Health Plan, formerly the Geisinger Health Plan, is the largest rural HMO in the nation.

The system will span 40 contiguous counties and will provide increased access to 1,000 physicians through its combined network of 77 clinics. The network will also efficiently serve large employer

"This merger ensures that a strong Pennsylvania health-care system will not only survive but will thrive as organizations consolidate to become more efficient and effective."

Dr. Stuart Heydt
chief executive officer
Penn State Geisinger Health System

with multiple worksheets. According to leaders of the new system, providing physicians for rural areas with large populations of older residents is a major commitment of the Penn State Geisinger Health System.

"This merger ensures that a strong Pennsylvania health-care system will not only survive but will thrive as organizations consolidate to become more efficient and effective," said **Dr. Stuart Heydt**, chief executive officer of the Penn State Geisinger Health System. "As this new system matures and grows, we will continue to look for opportunities for partnership with other health-care organizations."

The new system will provide patient care from primary to the most complex specialty care, with support from research conducted in Penn State's College of Medicine and the Janet Weis Research Center in Danville.

Dr. C. McCollister Evarts, Penn State's senior vice president for health affairs and dean of the College of Medicine, recently told the Board of Trustees that the merger also brings the opportunity for pop-

ulation-based medicine, "enabling us to develop extensive programs focusing on wellness and fitness, behavior modification and outcome studies where part of our attention will be focused on populations as well as individuals."

Evarts noted the significance of education with in the new system. "A system with its own health plan provides the opportunity for our medical students and residents to learn to practice in an environment that focuses on managed care. And, with Penn State Geisinger Health Plan being the largest rural HMO in the United States, students will get acquainted with rural medicine, as well as urban medicine in the more populated areas of southeastern Pennsylvania."

According to Evarts, the system's merged research programs will focus on identifying and solving health problems specific to Pennsylvanians.

Since January, employees at both Hershey and Geisinger have worked hard to ensure a smooth transition.

Frank Henry, chairman of the board of the new Penn State Geisinger Foundation, said, "I would like to acknowledge all of our employees who have shown their commitment to the new system by working diligently — and often overtime — over the past six months to effect a smooth transition. Many employees from both Geisinger and Hershey have participated on joint transition teams that have been meeting to plan the specific details of the new system. To everyone who has helped to get us here today, I simply say, 'Thank you.'"

Henry said that the teams, who have been planning the future of areas like patient care, personnel, finances and communications, will continue to meet in the months to come.

University's bond rating is upgraded

Citing Penn State's substantial name recognition, long-established academic reputation and high student quality, Moody's Investors Service recently upgraded the University's long-term bond rating from A1 to Aa3. The upgrade from the A rating is significant, in that Aa-rated bonds are generally considered to be of "high investment grade."

According to a recent ratings update from Moody's, the large size and scope of Penn State's enrollment "highlights strong student demand. The University generates statewide and even national demand for its instruction, research and public service programs." The update specifically notes that:

■ The changeover to the Commonwealth College system, which took effect July 1, is "expected to bolster University-wide student demand."

■ The recent merger between The Hershey Medical Center and the Geisinger Health System, which also took effect July 1, "reduces risk in a well-diversified revenue stream."

■ Penn State's endowment has grown from \$110.5 million to \$426.6 million in the last decade, triggered by investment gains and successful fundraising campaigns led by strong alumni participation.

Practice makes perfect

The Pennsylvania All-State Lions Band, a program of the Penn State Blue Band, draws youths from across the state to University Park for competition. Shown practicing recently are, from left, Todd Shearer of Lancaster, Laura Smith of York, Mike Marsh of Green Castle and Mindy Davidhizar of Johnstown.

PROMOTIONS

→ Effective July 1, 1997

ACADEMIC RANK

Following are University-wide faculty promotions, effective July 1.

TO PROFESSOR

Marc D. Abrams, forest ecology / physiology
Michele Amateau, art
Sarah M. Assmann, biology
William G. Axinn, sociology
Ayoub B. Ayoub, mathematics, Penn State Abington
Lori J. Bechtel, biobehavioral health, Penn State Altoona
Robert C. Black, biology, Delaware County
S. Diane Brannon, health policy and administration
Susan L. Brantley, geosciences
Richard A. Carlson, psychology
Patrick G. Cheney, English and comparative literature
John M. Cimbala, mechanical engineering
Chitaranjan Das, computer science and engineering
Derek Elsworth, mining engineering
Robert M. Frieden, communications
Aaron D. Gresson, education
Jawaid Hameed, architecture
Rod M. Heisey, biology, Penn State Schuylkill, Capital College
Charles Helou, mathematics, Delaware County
Charles A. Hughes, special education
Sanjay B. Joshi, industrial engineering
M. Arshad Khan, chemistry, Penn State DuBois
Joseph L. Kincheloe, education
Sanat K. Kumar, materials science and engineering
Lee R. Kump, geosciences
Akhlesh Lakhtakia, engineering science and mechanics
Dennis Lamb, meteorology
Les E. Lanyon, soil fertility
Mark Maroncelli, chemistry
Thomas J. McGarrity, medicine, The Milton S. Hershey Medical Center
Sally A. McMurtry, history
Kenneth M. Merz Jr., chemistry
Carl Mitchell, philosophy and science, technology and society

Victor Nistor, mathematics
Edward S. Podczaski, obstetrics and gynecology, The Milton S. Hershey Medical Center
R. Alan Price, English, Penn State Hazleton
William J. Rothwell, education
David W. Russell, electrical engineering, Penn State Great Valley
Victor E. Sanvido, architectural engineering
Dennis C. Scanlon, agricultural and extension education
John L. Selzer, English
Alok Sinha, mechanical engineering
Jill P. Smith, medicine, The Milton S. Hershey Medical Center
Stephen M. Smith, agricultural economics
Paul E. Sokol, physics
Donald A. Streit, mechanical engineering
Stefan T. Thynell, mechanical engineering
Linda K. Treviño, organizational behavior
Christopher E. Uhl, biology
Judith R. Vicary, health education and biobehavioral health
Robert D. Weaver, agricultural economics
James A. Winsor, biology, Penn State Altoona

TO ASSOCIATE PROFESSOR

John V. Badding, chemistry
Donald D. Bergh, management
Ronald V. Bettig, communications
Gary E. Bolton, management science
Barbara A. Bremer, psychology, Penn State Harrisburg, Capital College
Barbara E. Bullock, French and linguistics
David J. Cannon, industrial engineering
Richard G. Caram, theatre arts, Penn State Altoona
Jon M. Carson, engineering, Penn State Wilkes-Barre
Kumkum Chatterjee, history

Zhibo Chen, mathematics, Penn State McKeesport

Peter B. Crabb, psychology, Penn State Abington
John E. Daniel, music
C. Leah Devlin, biology, Penn State Abington
Cheng Dong, bioengineering and engineering science and mechanics
Deborah R. Erickson, surgery, The Milton S. Hershey Medical Center
Dorothy H. Evensen, curriculum and instruction
Mark A. Feamow, theatre arts
Clarence W. Finley Jr., chemistry, Penn State New Kensington
Shelby J. Fleischer, entomology
Peter B. Flemings, geosciences
Katherine H. Freeman, geosciences
Konstantinos G. Goulas, civil engineering
Hassan Gourama, food science, Penn State Berks, Berks-Lehigh Valley College
Mark J. Gultinan, plant molecular biology
Elizabeth A. Hanley, kinesiology
S. Blair Hedges, biology
Benjamin T. Hudson, history and Medieval studies
Timothy F. Hertz, music
Timothy W. Kelsey, agricultural economics
Ronald P. Krahe, engineering, Penn State Erie, Behrend College
Jonathan P. Lynch, plant nutrition
Jeffrey S. Mayer, electrical engineering
Wayne J. McMullen, speech communication, Delaware County
Richard G. Mistrick, architectural engineering
Veronica Montecinos, sociology, Penn State McKeesport
David A. Morand, management, Penn State Harrisburg, Capital College
Daniel J. Nadenicek, landscape architecture
Michael J. Natan, chemistry
Jeffrey T. Nealson, English
Reiko T. Nemoto, comparative literature and Japanese
George J. Olt, obstetrics and gynecology, The Milton S. Hershey Medical Center
Jorge A. Pallin, physics
Jean M. Sanders, art
Dhushyanthan Sathianathan, engineering
Jie Shen, mathematics
Zachary Simmons, medicine, The Milton S. Hershey Medical Center

Thomas W. Smialek Jr., music and integrative arts, Penn State Hazleton
Mario Szaier, electrical engineering
Diane M. Thiboutot, medicine, The Milton S. Hershey Medical Center
Daqing Wan, mathematics
Howard N. Weiss, mathematics
Danny R. Welch, pathology, The Milton S. Hershey Medical Center
Thomas Yahner, landscape architecture
Chengbo Yue, mathematics
Xingqiao Zhang, physics, Penn State Hazleton

TO ASSOCIATE LIBRARIAN

Nancy J. Butkovich, collections and reference services
Kevin R. Harwell, collections and reference services
Bonnie A. Osif, collections and reference services
Helen M. Sheehy, collections and reference services
Diane L. Shenk, collections and reference services
Mila C. Su, information access services, Penn State Altoona

TO SENIOR SCIENTIST

Ram B. Bhagat, Applied Research Laboratory

COOPERATIVE EXTENSION

Following are promotions of staff members in Penn State Cooperative Extension in the College of Agricultural Sciences effective July 1.

TO SENIOR EXTENSION AGENT

Brenda M. Bernatowicz, Erie County
J. Lee Miller, Beaver County
Gary L. Sheppard, Westmoreland County

TO EXTENSION AGENT

Daniel L. Brackett, Venango County
Mary R. Ehret, Luzerne County
Donna L. Foukl, Monroe County
Jeffrey T. Fowler, Venango County
Marlene O. Nash, Bucks County
Pamela L. Paletta, Washington County
Janice E. Stoudnour, Bedford County
Delbert G. Voight, Lebanon County

TO ASSOCIATE EXTENSION AGENT

Melanie E. Barkley, Bedford County
Ryan L. Hockensmith, Lawrence County
Walter E. Whitmer, Juniata County

LECTURES

Number theory conference to be held July 30-Aug. 3

More than 100 mathematicians and others from around the world will gather at University Park for the conference *Topics in Number Theory*, from July 30-Aug. 3.

The conference will feature an international lineup of speakers who are leading researchers in additive number theory, arithmetic geometry, combinatorics, computational number theory, automorphic forms and q-series.

The conference will highlight recent number theory advancements, especially those related to modular

forms and q-series, and the interactions between these two topics.

The conference is a continuing and distance education service of the Eberly College of Science, Department of Mathematics.

For conference information, contact Ken Ono at (814) 865-6642 or through e-mail at ono@math.iast.edu. For information about registration, contact Roberta Moore at (814) 863-5120 or through e-mail at Confence-Info@cde.psu.edu. You also can call (800) 778-8632, or visit the Web at: <http://www.cde.psu.edu/CEG/NumTheory>.

Penn College to hold grammar conference

Summertime is grammar time for English educators from across the country who plan to gather at Pennsylvania College of Technology for the eighth annual conference of the Assembly for the Teaching of English Grammar (ATEG) on July 18 and 19.

The conference attracts nationally known grammarians who will serve as featured speakers including Penn College's own Edward A. Vavra, associate professor of rhetoric; Connie Weaver, author of *Teaching Grammar in Context*; Rei Naguchi, author of *Grammar and the Teaching of Writing*; Bill McCleary, editor of *Composition Chronicle*; and Martha Kolln, president of ATEG and author of *Rhetorical Grammar*.

The event's keynote speech will

be delivered by Art Whimberly, author of *Analyze, Organize, Write* and *Blue Print for Educational Change*. Whimberly, an educational researcher and consultant, also will give a workshop titled "Improving Writing, Reading and Reasoning with Cooperative Learning and Text Reconstruction."

Separate from the conference, he will offer a three-hour workshop for English, math, science and social studies teachers titled "Teaching Reasoning for Reading, Writing and Math Skills."

Registration is open to all educators. For more information on registration fees and events, contact Vavra at (717) 326-3761, ext. 7736 or (717) 327-4503, or via e-mail at evavra@pct.edu.

Faculty/Staff Alerts

Are universities humane?

The extent to which Penn State and other American universities are treating humane and responsible employees and students is the topic of the next edition of "To the Best of My Knowledge," President Graham B. Spanier's monthly call-in program on WPSU-FM (90.1, 91.5 and 106.7), airing at 7 p.m. Tuesday, July 15.

Increasingly, colleges and universities are adopting such progressive business and industry features as flexible, on-site day care and ombudsman programs. Combine these with traditional benefits like tuition remission and reasonably priced medical plans and you have an ideal work setting. Or do you? Why is discontent so prevalent at so many levels of higher education? And why did more than a quarter of Penn State faculty and a third of the University's staff say in a recent survey that they would leave to get another job with equal pay, benefits and working conditions?

Listeners with opinions about these issues are invited to join Spanier and his guest, Robert Hemenway, chancellor of the University of Kansas, by calling 1-800-543-6242 during the one-hour program. Internet users worldwide will be able to link to sound and pictures from the program at www.psu.edu/ur/tech/tech.html; and they will be able to submit questions and comments via e-mail to response@psu.edu.

HRDC courses

The following programs are being offered for faculty and staff by the Human Resource Development Center. To register, complete the form found in the back of the Spring/Summer HRDC catalog, and fax to (814) 865-3522.

- Continuous Achievement: How to Increase Effectiveness at Work — PRO 020
- July 17, 9 a.m. to noon, 319 Rider Building, Cost: \$35.
- Managing Your Career in the New World of Work — PRO 097
- July 30, 9 a.m. to 11 a.m., 319 Rider Building, Cost: \$25.

Network interruptions planned

As part of the University's telecommunications infrastructure upgrade project, access to private fiber networks and the data backbone at some University Park buildings will be interrupted between mid-

night, July 25, and 8 a.m. July 27. The outage is required to splice and relocate fiber bundles into a new telecommunications room that is being created by the project. The move will enhance the reliability of network connections.

On each given day, according to the Office of Telecommunications, the following buildings will experience an intermittent outage during the associated timeframes listed below. Please note that not all buildings mentioned during a particular timeframe will be down for the entire duration. For example, while one fiber bundle is being cut and replaced, the other buildings scheduled for that timeframe will most likely still have service. Once the service is restored, work will commence on the next bundle.

Although all attempts will be made to keep the outage to a minimum, the longest outage during the weekend is expected to be six hours. All other outages should be approximately three hours. The planned outage schedule follows:

- Between midnight Friday, July 25 and 8 a.m. Saturday, July 26: Old Main, EE West, EE East, Steidle, Hosler, Reber, Noll Lab and Power Plant.
- Between 3 p.m. Saturday, July 26, and 8 a.m. Sunday, July 27: Sackett, Hammond, engineering units, Sparks, Hammond, Deike, EE West, Carnegie, Old Botany and Schwab.

A representative from OTC will contact network administrators about when their particular network will be back online. If you have questions, please contact your network administrator or the OTC Network Management Center at (814) 863-HELP (863-4357).

For more information, see the OTC Web site at <http://www.ctic.psu.edu/ur/>.

SK run registration

Registration forms are now available for the ninth annual Chris Poster Memorial 5K run set for Saturday, Aug. 16, at Penn State York. The event is held in memory of Chris Poster, a York Suburban High School runner, and awards scholarships to deserving high school seniors. To date, a total of \$15,000 in scholarship aid has been awarded as a result of the race.

For more information or for a registration form call York campus at (717) 771-4126.

Photos available online

News editors, newsletter editors and Penn State fans can now download art and photographs 24 hours a day, seven days a week from the Department of Public Information's newest service. Computer illustrations, graphs and photographs that accompany daily and breaking news stories are now available, as are those items specially requested by editors and reporters. Public Information also offers a photo archive with a Penn State theme, including President Graham B. Spanier's most recent portrait; shots of Old Main; Beaver Stadium; and general campus shots. More will be added, and your suggestions are welcome.

There are two ways to get to the site. One is to point your Web browser (such as Netscape) at <http://murrow.oud.psu.edu/ART/>

You also may use an FTP client directed at host.murrow.oud.psu.edu
User ID: news (all lowercase)
Password: NEWS (all caps)
Directory: /ART

Search the archives online

If you are looking for an *Intercom* article on someone you know, want to read about faculty research or want to find out if a particular issue was covered by *Intercom* or Public Information, you can search for it on the Web. Children's Miracle Network

During its annual 21-hour telethon May 31 through June 1, the Children's Miracle Network raised \$1,037,500 for the Penn State University Children's Hospital, at The Milton S. Hershey Medical Center.

Hershey Foods employees were the largest employee group, having raised \$122,000, followed by the medical center employees who raised \$80,000. The Children's Miracle Network's corporate sponsors raised more than \$500,000 and community organizations raised over \$100,000.

All funds raised by the telethon locally will support pediatric services at Penn State University Children's Hospital.

■ THE NEW PENN STATE

Penn State, Dickinson School of Law join forces

The partnership, first proposed roughly 30 years ago, became official July 1

Editor's note: The following story is part of an ongoing series focusing on the changes Penn State is undergoing as part of its redesign. Throughout the coming year, the *Intercom* will look into various aspects of the reorganization that became effective July 1.

By KIMBERLEY YARNELL BIERLEY
Public Information

Fourteen days ago, Penn State added legal education to its curriculum when The Dickinson School of Law in Carlisle officially became The Dickinson School of Law of The Pennsylvania State University.

The law school is the oldest law school in Pennsylvania, having been founded in 1834 by Judge John Reed, and was the oldest independent law school in the nation.

There are approximately 530 students, including those enrolled in the master's program in comparative law, at Dickinson. The incoming class this fall will have about 175 students. Dickinson's Dean Peter G. Glenn is proud of the fact that the 1997 entering class will have stronger academic credentials than the class that entered in 1996, despite a nationwide decline in law school applicants.

Glenn is also proud of the fact that Dickinson is probably the only law school in the United States that won't raise tuition this year. Tuition at Dickinson is \$14,500, and the cost for on-campus housing is \$3,000 for the 60 students who live in on-campus residences; and a meal plan, at a cost of \$2,680, is available to all students through the Dickinson College food service. Students also will have \$175,000 more in financial aid available this fall than last year, the dean said.

A quiet merger

The July 1 merger with Penn State, which will not be fully accomplished until the year 2000, is only the latest cooperative venture for the two institutions. Last year, the law school implemented a master's degree in public administration/juris doctorate program in cooperation with Penn State Harrisburg. This summer, Dickinson is collaborating with the College of Agricultural Sciences to begin an Agricultural Law Research and Resource Center at the law school. It is hoped that this center will provide research, outreach and service to the Commonwealth.

Officials also are considering expanding degree offerings to include a combined law degree and MBA with The Smear College of Business Administration, and a law degree combined

"From the law school's perspective, this merger will provide Dickinson's students with enriched programs and cross-disciplinary education and an improvement in technology available for research and learning."

Peter G. Glenn, dean
The Dickinson School of Law of The Pennsylvania State University

Win-win situation

The merger of The Dickinson School of Law and Penn State benefits both institutions. Penn State gains a prestigious law school, and Dickinson gains administrative assistance. In addition, Dickinson is now nationally more visible as a Big Ten law school.

with a master's degree in environmental pollution control, along with joint programs with other Penn State colleges.

"From the law school's perspective, this merger will provide Dickinson's students with enriched programs and cross-disciplinary

education and an improvement in technology available for research and learning," Glenn explained.

The dean is anticipating two new programs, one that would allow highly skilled undergraduate students at Penn State to earn their bachelor's degrees and juris doctorate degrees in

six years and a second that would include those degrees along with an MBA to be earned in seven years.

"I think Dickinson will broaden Penn State's offerings by providing a first rate law school. For Dickinson, it will enable the school to concern itself more intensely with providing a top quality legal education by having some of the administrative responsibilities handled by Penn State, which has a larger staff, more technology and more experience in administrative areas. Penn State has a first rate administrative staff," said Carlisle attorney and Dickinson graduate Robert Frey, who proudly serves as president of the law school's Board of Trustees and who will serve as trustee emeritus of Penn State.

Frey calls Dickinson a "little gem" and thinks the merger is a "win-win" situation for both institutions.

"Penn State is a vigorous, rapidly advancing institution and its goals are not different from Dickinson's in the area of quality," he said.

A long history

Dickinson publishes one of the oldest law school publications in the country. The first issue of *The Forum* was published on Jan. 15, 1897. In 1909, its name was changed to *Dickinson Law Review*.

In the early years of the school, law degrees were awarded under the auspices of Dickinson College, a nearby four-year liberal arts college. The law school's incorporation in 1890 made it independent of the college and the first woman graduated from the law school nine years later, while the first foreign student was from Japan and earned a degree in 1892.

Judge Reed's stated goal in founding the law school was "to prepare students thoroughly for the practice of their profession." Dickinson has been a pioneer in the teaching of legal skills. The forerunners of today's advocacy courses were developed at Dickinson in the 1930s, and the school introduced legal clinic-type activities in the late 1940s and early 1950s. The law school also was an innovator in providing comparative law programs for foreign lawyers when it established a master's degree program in comparative law in 1968.

Among Dickinson's many well-known graduates are former governors Andrew Gregg Curtin, Arthur James and John Fine; current Pennsylvania Gov. Tom Ridge; U.S. Sen. Rick Santorum; and president pro tempore of the Pennsylvania Senate Robert C. Jubilir.

ARTS & ENTERTAINMENT

AT PENN STATE

On display

"Determination," a French ceramic by C. Kelly Lohr of Churdan, Iowa, will be on display at Zoller Gallery at University Park until July 20 as part of the Crafts National 31 exhibition.

Photo: Greg Greco

Centre Stage productions to conclude 1997 season

Pennsylvania Centre Stage's production of "Misalliance" will play at 8 p.m. July 15-19 and 22-26, in the Pavilion Theatre on the University Park

campus, with Saturday matinees at 2 p.m. July 19 and 26.

Pennsylvania Centre Stage, the professional summer theatre at Penn State, is a program of the College of Arts and Architecture.

Tickets are \$21 for students and \$24 for non-students.

The 1997 Centre Stage season concludes with "A Chorus Line," opening at 8 p.m. Friday, July 18, in the Playhouse at University Park. It runs through Aug. 2.

School of Theatre Arts faculty member Cary Libkin directs the musical, which plays at 8 p.m. July 18, 19, 22-26 and July 29-Aug. 2.

For tickets to either production, contact the Arts Ticket Center at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Faculty artists featured in Palmer Museum exhibit

The Palmer Museum of Art exhibition "sva 20," recognizing 20 tenure track studio faculty artists from the School of Visual Arts, is on display at University Park through Sept. 14.

The exhibit recognizes faculty artists as a prelude to the fall celebration of the 25th anniversary of the museum's founding. Participants are Micaela Amato, Charles Cave, Robin Gibson, Kenneth Graves, Julie Helfernan, Marc Hessel, James Hoptensperger, John Kissick, Gerald Lang, Leslie Leupp, Jerrold Maddox, Sallie McCorkle, Thomas McGovern, Stephen Porter, Liz Quackenbush, Jean Sanders, Kristin Breslin Sommesse, Lanny Sommesse, Christopher Staley and Robert Yarber.

Arts Center announces additions to schedule

The Community Arts Center in Williamsport, part of Penn College, has announced additions to its 1997-98 Performing Artist Series.

■ "The Legends of New Orleans," featuring the finest living practitioners of Dixieland jazz, will kickoff the season on Aug. 4.

■ "42nd Street," featuring the tap dancing and American musical standards that made this Broadway musical famous, will come to the stage on Sept. 24.

■ Kathy Troccoli will perform a contemporary Christian concert with an opening performance by Greg Long on Oct. 14. Tickets go on sale Aug. 15.

■ Schoolhouse Rock LIVE! includes nostalgic, groovy tunes that will provide a special family entertainment treat and will be performed Nov. 1. Tickets will go on sale Aug. 18.

■ Philips, Craig & Dean will provide a contemporary Christian concert with an opening performance by Aaron Geoffroy on Nov. 20. Tickets go on sale Oct. 15.

All performances will be at 7:30 p.m. For tickets or more information, call the Community Arts Center Box Office at (717) 326-2424.

BRYCE JORDAN CENTER

Big band music

The big band sounds of The Jimmy Dorsey Orchestra will fill The Bryce Jordan Center at 7 p.m. Saturday, July 26. Tickets are \$19.50 for reserved seating. Group rate tickets (15 or more) are \$17.50 for reserved seating. Call (814) 863-1812 for more group information. Special limited table seating is available and there will be dance floors accessible to all in attendance.

This event marks the first time a big band has performed at the Jordan Center.

Country stars team up

Two of the strongest entertainment forces in country music will team up when Reba McEntire and Brooks & Dunn share the stage in the round at 8 p.m. Friday, Aug. 15, at The Bryce Jordan Center. Tickets are \$41.25 for reserved seating and are on sale now.

McEntire continues to make new strides as one of the top-selling country female artists of all time. Last year, she sold out her concert at The Bryce Jordan Center in just four hours.

Reigning Country Music Association Entertainers of the Year, Kix Brooks and Ronnie Dunn have accumulated more than 25 major industry awards and sold 14 million albums in just over five years since they joined forces.

Upcoming events

■ July 18: Barry Manilow

Tickets: \$39.50 and \$29 for reserved seating, on sale now.

■ Aug. 8: Tina Turner, 7:30 p.m.

Tickets: \$38.50, \$27.50 and \$19.50 for reserved seating.

■ March 26-29, 1998: First Annual Pennsylvania Sportsman's Hunting, Fishing and Outdoor Show

Vendors interested in exhibiting may call (814) 863-1570 or (814) 863-5503.

Tickets can be purchased at the Bryce Jordan Ticket Center, Eisenhower Auditorium South Box Office, selected Uni-Mart ticket outlets, Commonwealth Campus ticket outlets, or by calling (814) 865-5555 locally, or toll-free at (800) 863-3336.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu>.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Tuesday, July 15

Music at Noon: Fisher Plaza, 3 Musicians La Banjo.
 "To the Best of My Knowledge" with President Graham B. Spanier, 7 p.m., WPSU-FM.

"Misalliance" by George Bernard Shaw, 8 p.m., Pavilion Theatre, through July 28. For tickets, phone (814) 863-0255.
 GSA Explazagang, 9 p.m., Fisher Plaza, "Sabrina."

Wednesday, July 16

"A Chorus Line," Playhouse Theatre, through Aug. 2.
 "Up From Down Under: Australian and New Zealand Short Films Today The Younger Generation," 7 p.m., Kern Building Auditorium.
 HUB Lawn Films, dusk, "Space Jam."

Thursday, July 17

Music at Noon: Fisher Plaza, Arthur Goldstein Jazz Quartet.
 Friday, July 18

Ice Cream "Diversions," 7 to 8 p.m., Creamery patio, Baverly Stomper.

Saturday, July 19

GSA Family Films, 8:30 p.m., Fisher Plaza, "Escape to Witch Mountain."

Monday, July 21

Dance Aerobics "Diversions," 8 to 10 p.m., White Building.

Tuesday, July 22

Music at Noon: Fisher Plaza, Bruce and Jesse.
 GSA Explazagang, 9 p.m., Fisher Plaza, "How to Steal a Million."

Wednesday, July 23

Comic Operas for the Movies, 7:30 p.m., Music Building.
 Recital Hall, "Il Barbiere di Siviglia."

Summer Opera Film Series, 7:30 p.m., Recital Hall.

HUB Lawn Films, dusk, "Maverick."

Thursday, July 24

Music at Noon: Fisher Plaza, Redwing.

LECTURES

Wednesday, July 16

Konstantinos A. Lazopoulos on "How to Formulate the Equilibrium Problem in Finite Elasticity," 3:35 p.m., 214 Hammond.

Thursday, July 17

Richard Orday on "Nerve Cell Function: Lessons From Tiny Flies," 4 p.m., Penn State Room, The Nittany Lion Inn.

Thursday, July 24

Karl Mueller on "Spinning, Flipping and Connectivity: Solid-State NMR of Complex Solids," 4 p.m., Penn State Room, The Nittany Lion Inn.

CONFERENCES

Sunday, July 20

"Ag in the Classroom," Agricultural Science and Industries Building, through July 25.

EXHIBITS

HUB Art Alley Cases, Art Alley Panels and Hall Cases

Mixed media of Susan Struble and Alice Rini, through July 31.
 HUB Browning Gallery and Formal Gallery

Exhibit by the Central Pennsylvania Festival of the Arts, through July 18.

Kern Cases

Jewelry by Evelina Francis, through July 27.

Kern Panels

Photobooks by John Mannion, through July 27.

Kern Tail Cases

Embroidery Guild exhibit, through July 27.

Exhibit continues

"Air Conditioned American," a photo collage by Annie-Hannah Mancini of Osceola Mills, is part of Images '97, the fine arts exhibition of the Central Pennsylvania Festival of the Arts. The exhibition is on view through July 18 in the formal and browsing galleries of the Hetzel Union Building on the University Park campus.

Palmer Museum of Art

"Making History: Historical Narratives in Pennsylvania Prints," through Aug. 31.

School of Visual Arts Faculty Exhibition, through Sept. 14.
 "Our Town: A Selection of Town Views from the Pennsylvania Prints," through Sept. 28.

Zoller Gallery

Crafts National 31, through July 20.

■ Reflects an international perspective.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://cac.psu.edu/calendar/>

JULY 15 - JULY 24

New at Penn State

Farm emergencies

A new educational program, "First-on-the-Scene for Farm Families," offered by the College of Agricultural Sciences is designed to help farm workers and members of farm families know exactly what to do if they are the first person to discover a farm emergency.

"Farm workers face many hazards, from tractor overturns to pesticide exposure," Dennis Murphy, program developer and professor of agricultural engineering, said. "Their survival often depends on the individuals—usually co-workers or family members—who find them and must care for them until emergency personnel arrive."

First-on-the-Scene teaches people how to make important decisions that will not further complicate the injured person's medical condition. The program leads participants through various scenarios, forcing them to examine typical injury incidents and to make proper decisions.

For more information about the program, contact the Cooperative Extension office in your county. More information also can be found on the Web at http://server.ags.psu.edu/dept/extension/eng_safety/.

Graduate program at McKeesport

Preparations are under way at Penn State McKeesport to deliver several graduate, continuing and distance education programs formerly offered at the Monroeville Center. The programs were transferred to the McKeesport campus after the center closed at the end of the spring semester.

One program being offered is a master's of education degree in adult education. Students can earn 33 credits required for the M.Ed. program within a 24-month period through part-time evening and Saturday study. That program, along with a certificate program in chemical dependency, a variety of three-credit and one-credit workshops geared toward teacher certification, and a human resource development certificate program are among the current offerings. A 42-credit M.Ed. in counselor education with an emphasis on chemical dependency will be offered beginning in the spring of 1998.

MBA at DuBois

Representatives from Penn State Erie, Behrend College, and Penn State DuBois will present an MBA Forum in the Hillier Building at DuBois campus from 5:30 to 7 p.m. Tuesday, July 15. The forum is designed to address questions from prospective students about the planned MBA degree being made available at the DuBois campus.

Through the combined efforts of Penn State DuBois and Penn State Erie, and with the help of distance learning technologies, students in the DuBois area for the first time will have an MBA program available to them. Penn State Erie has offered the degree since 1985.

Those interested in applying for admission to the program are urged to attend and to bring an undergraduate transcript for an immediate evaluation of qualifications. For more information, contact the Penn State DuBois Office of Continuing Education at (814) 375-4715. Those living outside the immediate calling area can call toll free anytime at (800) 346-ROAR (7627).

News in Brief

Spend a Summer Day

About 6,500 visitors—high school seniors and their families—will visit University Park over July 21, 25, 28 and Aug. 1 for Spend A Summer Day. The annual event, coordinated by the Office of Undergraduate Admissions at University Park, is designed to give high school seniors—many of whom will be seeing

a Penn State campus for the first time—helpful information about the University and a taste of campus life. The event includes tours, presentations and an informational fair.

High school seniors may register by phone to attend. Call the Office of Undergraduate Admissions, at (814) 865-5471.

Student-athletes score high in NCAA study

Penn State student-athletes continue to score significantly higher in graduation rates than the average for NCAA institutions nationally, according to an NCAA survey.

The survey revealed that student-athletes in the University's entering freshman class of 1990-91 had a graduation rate of 81 percent, compared to the 58 percent average for NCAA institutions nationally.

The survey also found that student-athletes at the University Park campus outperformed other Penn State undergraduates by three percentage points. According to the survey, 78 percent was the average six-year graduation rate for all Penn State students in the class of 1990-91.

The University's student-athletes also were well above national norms in football and women's basketball. In football, the Nittany Lions had a graduation rate of 71 percent, compared to the 52 percent NCAA average. In women's basketball, the Lady Lions entering in 1990-91 had a graduation rate of 100 percent, compared to the overall NCAA graduation rate of 67 percent.

In men's basketball, the graduation rate for the class of 1990-91 was only 50 percent, but that reflects the fact that there were only two freshmen in the entering class that season — one of them graduated, and the other didn't. Even so, the Penn State rate is still higher than the overall NCAA rate of 45 percent in men's basketball.

"This is good news," said John Coyle, Penn State's NCAA faculty representative. "Our goal always has been to graduate our student-athletes at a rate consistent with the rest of the University Park student population, and we are continuing to meet

NCAA GRADUATION RATES

How Penn State Compares

Six-year average graduation rates in NCAA Division I institutions for freshmen class entering 1990-91

or exceed that goal. The findings in the report reinforce the great work of our athletic administrators, coaching staff, faculty, academic support center and, most important, the athletes themselves."

Continuing a seven-year trend, graduation rates for African American student-athletes at Penn State were well above the figure for African American student-athletes in the NCAA survey. Led by African American women athletes at Penn State, who had a perfect 100 percent rate, Nittany Lion and Lady Lion African American athletes posted a graduation rate of 78 percent — 32 percentage points above the 46 percent national average for African American athletes at all institutions.

Penn State's Asian/Pacific Islander and Hispanic athletes in the class of 1990-91 also had 100 percent

graduation rates. Female student-athletes at Penn State logged a 96 percent graduation rate, passing their male counterparts, who graduated at a 72 percent rate.

Among student-athletes who exhausted their eligibility, the graduation rate for the survey sample soared to 92 percent.

NCAA bylaws require the University to provide graduation rate information to recruits and their parents. The NCAA provides a compilation of the data to guidance officers and high school and two-year college coaches. The NCAA bases its survey on graduation within six years of enrollment.

This is the seventh release of institutional graduation rates since national "right-to-know" legislation was passed in 1990.

25-year Awards

PETER BEHRENS

LYNN CARPENTER

CAROL A. GIBLE

JANET M. HAMMERS

VALERIE N. STRATTON

ROGER R. ZELLNER

Observing 25 years of service at the University are: Peter Behrens, assistant professor of psychology at Penn State Lehigh Valley; Lynn Carpenter, associate professor of electrical engineering at University Park; Carol A. Gible, coordinator of Student Affairs and health services at Penn State Lehigh Valley; Janet M. Hammers, staff assistant II, Audio Visual Services at University Park; and Valerie N. Stratton, associate professor of psychology, and Roger R. Zellner, associate professor of visual art, both at Penn State Altoona. From Penn State Harrisburg, those observing 25 years of service but who have no photo to accompany this information, are: Charles A. Cole, professor of engineering and acting director of the School of Science, Engineering and Technology; Robert W. Colman, assistant professor of social science and psychology; Clernmie E. Gilpin, assistant professor of community systems and Afro-American studies; William A. Mahar, professor of humanities and music and director of the School of Humanities; Christopher K. McKenna, associate professor of management science; Winston A. Richards, associate professor of mathematics and statistics; James E. Skok, associate professor of public administration and acting director of the School of Public Affairs; and William A. Welsh Jr., associate professor of engineering.

Alien planet game tests critical reasoning skills

By ALAN JANESCH
Public Information

It is the year 2413, and all nine planets in Earth's solar system are running out of room and resources. You, a pilot in the Intergalactic Exploration Squad, are searching the galaxies for a new planet the citizens of Earth can colonize. Your immediate mission: to determine whether an alien planet you are approaching will support human life and to judge whether it is worth colonizing.

This is the scenario for "Alien Planet," a computer-based simulation game University computer science students are developing, in collaboration with a political science professor, to help teach a political science honors seminar in critical reasoning. Their alien planet, not yet fully functional but carefully worked out in concept, can be a dangerous place.

In the air, inquisitive flying lobsters search for their favorite food, the 12-ounce fruits of the beer plant. Moosles, strong moose-like creatures with unusual coloration — plaid with yellow antlers — like nothing better than to catch the lobsters in their antlers, suck out their innards and toss the shells aside. Underfoot, vicious tuna fish — unlike their counterparts on Earth — swim in the sand and attack for no reason.

Into this unfamiliar environment comes the intergalactic pilot, who can send limitless numbers of robot probes onto the planet's surface. The robots can do anything a human being can — test the air for breathability, check the climate or see if something is good to eat. But if the pilot sends out the probe without the right tools, it won't come back with the information the pilot needs to determine if the planet should be colonized.

The game is designed to be fun, but its purpose is serious: to help the students in **Larry Spence's** Political Science 300H class learn principles of critical reasoning. "Critical reasoning involves becoming self-consciously reflective about the ways we know the world," said Spence, director of the Schreyer Institute for Innovation in Learning. "When I was first teaching the course, I would try to come up with situations that would help the students reflect on how they think, on how they make the decisions they make every day. And they'd say, 'Well, I just think.'"

So Spence started to look for situations that were so odd that you couldn't count on your own perceptions. But the ideas he came up with didn't really work. Then, one day, a student had an inspiration. "You know," Spence remembered the student saying, "what you want is a computer game, like one with a planet where things run counter to our ordinary experience. That's how it got started."

At that point Spence approached **Joseph Lambert**, head of computer science and engineering in the College of Engineering. Together, they developed a program through which lower- and upper-division undergraduates would design software packages for

Lobster on the prowl

The computer-based simulation game "Alien Planet" features flying lobsters who consume the fruits of the beer plant. When completed, the game will be used to help teach critical reasoning skills.

"clients" on campus or in the community. (The lower-division students act as software engineers; the upper-division students as project managers.)

Lambert said that projects like "Alien Planet" require students to go off on their own and learn things that aren't part of the normal curriculum. On the one hand, they're learning about the latest developments in graphics interfaces, natural language processing, new programming languages and so on. On the other, they're learning about concepts in political science, teamwork and the ways that projects come together in real life.

"I think the students are learning how hard it really is to come up with a complete project," Lambert said. "Clearly, the students have enjoyed this more and learned more than they would have through a traditional classroom experience."

The project started in spring 1996 and will probably culminate in a finished product in another semester or two — maybe three. At that point the political science students in Spence's honors course will be able to test-drive "Alien Planet" and see how well it helps them learn and practice the critical reasoning skills the course is intended to teach.

Looking back at the work of the past few semes-

ters, project managers **Matt Walnock** and **Dave Soroka** said the toughest part of the job was to keep the "software engineers" focused on working as a group and contributing to the design of the program. Walnock and Soroka, computer science majors, both graduated in May.

"In the beginning," said Walnock, "it was difficult to get across that this wasn't a class where they'd be given some kind of code and have to write it the night before it was due. It was hard to get across to people that they had to design stuff before they could start writing code. It took a semester before they really got a handle on what the problem was. But the following semester they came up with what they wanted the planet to look like."

Spence said that even though the project is taking longer than anticipated, the learning process is at least as important as the final product. "One of the problems, if you can call it a problem, is that the students put almost too much time into the course," Spence said. "They work so hard, and they have learned so many complicated things about computer programs, about new programming languages like Java, about natural language processing — they've got the computer set so that it answers questions posed in standard English. They really like it."

Book Shelf

Robert E. Harkavy, professor of political science, and **Geoffrey Kemp**, director of Regional Strategic Programs at the Nixon Center for Peace and Freedom, are the authors of *Strategic Geography And The Changing Middle East*, published by the Carnegie Endowment for International Peace in cooperation with the Brookings Institution Press.

The authors note that in the aftermath of the Cold War, a new strategic map of the greater Middle East is emerging whose future contours are not yet clear. The future of the Middle East will depend to some degree on the nature of the emerging international

system, they said. With the increasing demand for Middle Eastern oil especially from the booming Asian economies, the region will remain the global strategic prize and point of contention between rival great powers.

Lee Smolin, professor of physics, is author of *The Life of the Cosmos*, a book that contains his new theory of the universe, which has been described as "elegant, comprehensive and radically different from anything proposed before." Smolin's theory is based on his premise that "The underlying structure of

our world is to be found in the logic of evolution." It also is based on recent developments in cosmology, quantum theory, relativity and string theory, which Smolin's clear and articulate text makes accessible to the lay person. The book, published by Oxford University Press, offers an understanding of how these developments may fit together to form a new theory of cosmology that provides a framework for illuminating many intractable problems, from the paradoxes of quantum theory and the nature of space and time to the problems of constructing a final theory of physics.

Summer Sessions programs continue to sizzle

The temperature is climbing and you're looking for a diversion? Look no further than the University Park campus for Summer Sessions programming that includes films, theatre, lectures and concerts.

Remaining events include:

■ July 14
Dance Aerobics Diversions, 8 to 10 p.m., White Building

■ July 15
Music at Noon: Three Musicians La Banjo, Fisher Plaza
Graduate Student Association Explazaganza: "Sabrina," 9 p.m. Fisher Plaza

■ July 16
Pennsylvania Centre Stage: "A Chorus Line," Playhouse Theatre, through Aug. 2
HUB Lawn Films: "Space Jam," dusk

■ July 17
Music at Noon: Arthur Goldstein Jazz Quartet, Fisher Plaza
Summer Science Seminars: Richard Ordway, biology, 3:30 p.m., The Nittany Lion Inn

■ July 18
Ice Cream Diversions: Bavarian Stompers, 7 to 8 p.m., Creamery patio

■ July 19
Graduate Student Association Family Films: "Escape to Witch Mountain," 8:30 p.m., Fisher Plaza

■ July 21
Dance Aerobics Diversions, 8 to 10 p.m., White Building

■ July 22
Music at Noon: Bruce and Jesse, Fisher Plaza

Graduate Student Association Explazaganza: "How to Steal a Million," 9 p.m., Fisher Plaza

■ July 23
Comic Operas for the Movies: "Il Barbiere di Siviglia," 7:30 p.m., Music Building Recital Hall
HUB Lawn Films: "Maverick," dusk

■ July 24
Music at Noon: Redwing, Fisher Plaza

Summer Science Seminars: Karl Mueller, chemistry, 3:30 p.m., The Nittany Lion Inn

■ July 25
Ice Cream Diversions: The Dixie Lions Jazz Band, 7 to 8 p.m., Creamery patio

■ July 26
Graduate Student Association Family Films: "Who Framed Roger Rabbit?," 8:30 p.m., Fisher Plaza

■ July 28
Dance Aerobics Diversions, 8 to 10 p.m., White Building

■ July 29
Music at Noon: Mick and the Mystics, Fisher Plaza

■ July 30
HUB Lawn Films: "Mystic Pizza," dusk

■ July 31
Music at Noon: Red Apple Juice, Fisher Plaza

■ Aug. 1
Ice Cream Diversions: Rich Victor Quintet, 7 to 8 p.m., Creamery patio

■ Aug. 2
Graduate Student Association Family Films: "The Love Bug," 8:30 p.m., Fisher Plaza

For more information, contact the Office of Summer Sessions at (814) 863-4174.

Summer Science Seminar

Martina Morris, associate professor of sociology and statistics, presented a Summer Science Seminar on "Getting the Most Out of Your Data: A Graphical Approach to Measuring Distributional Differences" along with Mark Handcock, associate professor of statistics. There are three lectures remaining in the series.

Smeal, PPG Industries join forces

PPG Industries and The Smeal College of Business Administration have come together to develop an innovative professional development program for PPG's key marketing professionals.

PPG's marketing strategy steering team will join with The Smeal College's Institute for the Study of Business Markets (ISBM) and Penn State Executive Programs to create a series of business marketing courses to be launched this year at PPG sites.

PPG Industries, based in Pittsburgh, is a leading global manufacturer that supplies products for the automotive, manufacturing, construction and chemical processing markets. The company, established in 1883, has about 100 manufacturing facilities, as well as six research and development facilities, worldwide.

The Institute for the Study of Business Markets is an industry-supported center of excellence focused on improving the practice of business-to-business marketing. Founded in 1983, the ISBM is underwritten by more than

40 major corporations and research affiliates worldwide.

Penn State Executive Programs is among the international leaders in leadership and organizational development. Custom programs have helped Fortune 500 firms make major strategic changes. International programs have been delivered in the United Kingdom, Japan, Singapore and Ecuador. As a result of the agreement, ISBM and Penn State Executive Programs will mobilize a faculty of professors from schools including The Smeal College, Babson College, McMaster University, Georgetown University and others.

The program, being developed by Smeal and PPG, will cover areas including value and pricing strategy, segmentation marketing in business markets, new programs for business and industrial markets, competitive analysis and intelligence, and value chain analysis.

Courses, beginning this year, will be offered on a pilot basis with ongoing participation by PPG marketers in the U.S. and abroad.

Statewide labor dispute puts HUB construction on hold

Utility site work for the first phase of the construction project for the new Hetzel Robeson Complex at the University Park campus has been experiencing a delay due to court action involving the state's prevailing wages rates.

The Hetzel Robeson Complex is one of several renovation or construction projects at the University affected by the moratorium, which is holding up more than \$895 million in highway and construction projects statewide. The Palermo/Pattee Library project is not affected by the court action, having begun earlier in the year.

The prevailing wages rates were revised this spring, and a suit was filed against the state Department of Labor and Industry, which oversees the prevailing wage division. Prevailing wages are set by the department based on union scale wages. The rates are used to pay laborers on projects that are at least partially funded by taxes. A decision on the lawsuit is expected at any time from the Commonwealth Court.

A two-year construction project had been scheduled to begin this summer to renovate and expand the Hetzel Union Building (HUB) and house the new Paul Robeson Cultural Center in a single complex at University Park.

The project will be financed with funds generated by a portion of University Park student activity fees, private support, Housing and Food Services and University funds.

■ Pattee Library update

Despite construction, it's business as usual

By WILSON HUTTON
University Libraries

On the morning the East Pattee connector closed to traffic, Jim Petro and his OPP moving crew had a problem. They had seven offices to relocate from East to Central Pattee because of encroaching construction zones. Petro, building services coordinator in the University Libraries' Facilities Department and veteran of many office moves, knew that once the connector was lost, they'd have to take all the furniture out the East Pattee exit, and truck it around to the rear of West Pattee to get it to Central.

In the rain.

They picked up the pace after a worker reported sighting a drywall worker on the floor below. Less than an hour later, a runner brought word: the connector's western entrance was completely framed up. Nothing more could pass through.

"Now, it gets slower," Petro sighed.

A moment later he was back at work, doing it the hard way because that's how it had to be done.

Mention the word "library," and the image that probably comes to most minds is a place of quiet and stillness. But the truth is that a large research library like Penn State's is a hive of activity, even in ordinary times. Hundreds of library faculty and staff move thousands of volumes each day—cataloging, shelving, lending, retrieving and assisting patrons in finding information. But this summer is no ordinary time at Pattee Library with the \$26.5 million construction of a new 110,000-square-foot wing to be called the Paterno Library. Still, all of the Library's routine activities continue unabated.

The Pattee complex has already been divided into two buildings with the closing and demolition of the connector mentioned above. A new, larger connector, complete with a Curtin Road entrance to the library and a circulation desk, will rise in its place. In the meantime, visitors to the Arts and Life Sciences Libraries, which are housed in East, will enter and exit through the building's ground floor entrance.

In the Central Pattee Circulation and Documents areas, the walls are closing in—literally—as the contractor erects protective barriers in preparation for new construction. Some highlights of these improvements are a new circulation center, a new elevator and a new corridor to West Pattee.

The LIAS Catalog Room and the

Separate pieces

Construction workers recently severed the connection between Central Pattee and East Pattee. The demolition of the connector was necessary for the addition of the Paterno Library. Although there are delours and some inconveniences because of the construction, the library resources are still available.

Photo: Greg Grieco

Information Desk have moved temporarily into the former Group Study Room, 105 Central Pattee. The old LIAS Catalog Room has been converted for temporary offices. The book return conveyor will disappear, and a temporary book sorting area will appear in the main lobby, sometime in late July. The construction zone also crosses the West Pattee entrance, to allow for work on the new Central elevator and corridor.

The really big news, of course, is what's happening to East Pattee,

where the five-story wing is going up on the side facing the Palmer Museum. One of the more obvious changes here has been the removal of the wall of windows, and the boarding-up of the first through fourth floors. This work will be completed this month. Once all the windows and the brick facade on that side of East Pattee are gone, the existing building will be ready to connect with the new superstructure of the Paterno addition.

Relocating the more than 80

employees on the fifth floor has been the largest and most complicated of the many office moves this project will require. Acquisitions and Cataloging have moved, for the duration, into the ground floor of Thomas Building. In July, Accounting Operations, Handicapped Services and Binery will move to the West Wing, and the Office of the Dean to 102 Central Pattee. However, it is important to note that none of these offices' mailing addresses will change during these temporary relocations.

No matter how adventurous life may become for the Pattee staff over the next couple of years, the Libraries are committed to minimizing their patrons' excitement level. No service interruptions are contemplated during the two-year construction project and, though some minor inconveniences are inevitable, no collections will be rendered inaccessible. There are two new handicapped parking areas, one on Fraser Road adjacent to West Pattee and the other overlooking the East Pattee construction site and accessible via a driveway opening onto the Weaver Building lot. Both buildings, East and West/Central Pattee, will maintain access for the disabled throughout the construction project.

Summer session hours for Pattee and its various libraries and departments follow:

■ The Arts Library, Documents/Maps, General Reference, Lending Services, Life Sciences Library, Periodicals and Reserve Reading Room/Microforms will be open Monday through Thursday from 7:45 a.m. to 10 p.m.; Friday, 7:45 a.m. to 9 p.m.; Saturday, 9 a.m. to 5 p.m.; and Sunday, 1 to 10 p.m.

■ Interlibrary Loan, Photoduplication, Historical Collections/Labor Archives, and the Rare Books Room will be open Monday through Friday from 8 a.m. to 5 p.m. and closed Saturday and Sunday.

■ The Penn State Room/University Archives will be open Monday through Friday from 9:30 a.m. to 5 p.m. and closed Saturday and Sunday.

■ The Music Listening Room will be open Monday through Thursday from 9 a.m. to 10 p.m.; Friday, 9 a.m. to 6 p.m.; Saturday, noon to 5 p.m.; and Sunday, 1 to 10 p.m.

Want more information? The Libraries maintain a "Construction Site" on the Web featuring up-to-the-minute construction news, photos, project timelines and more. The address is <http://www.libraries.psu.edu/pubinfo/construction/>

Awards

Communications recognizes outstanding work

Several faculty in the College of Communications have been recognized with awards and grants for outstanding performance and forward-thinking.

■ Dean's Awards for Excellence

Richard Barton, associate professor of communications, received the award for Excellence in Teaching, which acknowledges innovation, excellence and dedication. **Jay Calvert**, assistant professor of communications, received the award for Excellence in Research, acknowledging his productivity, publications and quality of research; and **Robert Richards**, associate professor of journalism and law, received the award for Excellence in Research, acknowledging his commitment to enriching the academic life of students and the well-being of the community.

■ Dean's Teaching and Development Grant

Ford Risley, assistant professor of journalism, was the recipient of this grant, which is given to a faculty member each summer for the devel-

opment of new courses and curricula, learning enhancement and other practices related to the improvement of learning and teaching. The grant will allow Risley to further develop his class "Introduction to Online Media," which will create a Web site devoted to reporting how the mass media in Pennsylvania are using online services.

■ Communications Constituent Alumni Society Excellence in Teaching Award

Jeanne Hall, assistant professor of media studies, received the sixth annual Excellence in Teaching Award, sponsored by the College of Communications Constituent Alumni Society. The award honors an outstanding faculty member for exemplary contributions and overall dedication to the art of teaching. Hall teaches the art of cinema and advanced film theory and criticism.

■ Faculty Associates Award

Jeremy Cohen, associate dean for undergraduate education, was one of

several University faculty selected by the Office of the Vice President for Student Affairs to receive this inaugural award, which recognizes those who seek "to strengthen faculty/Student Affairs partnerships, and to pursue activities of mutual interest to faculty and staff in service to Penn State students."

■ Schreyer Institute for Innovation in Learning Grant

R. Thomas Berner, professor of journalism and American studies, was awarded this grant to support his course in Editorial Writing and News Analysis, which introduces advanced journalism students to theory and techniques of writing news analyses, editorials and reviews of culture and the arts. He will create learning groups that will use e-mail to share drafts of editorials for peer criticism and evaluation.

Shari Roberts, assistant professor of media studies, also has received a Schreyer grant to enhance her course in Cultural Aspects of the Mass Media,

which examines the mass media as creators and critics of mass culture in American life and the relationships between the mass media and mass culture.

■ International Council on Distance Education Grant

Robert Baukus, associate professor of advertising, and **Richard Taylor**, Palmer Chair professor of telecommunications and law, were the recipients of an ICDE grant of \$20,000 to conduct a survey of its members on information technology standards. Results of the survey were presented at the 18th ICDE World Conference in State College.

■ Safe Energy Council/ Schumann Foundation Grant

Richard Barton, associate professor of communications, **Virginia Mansfield-Richardson**, associate professor of communications, and **Jorge Reina Schement**, associate dean for graduate studies, have been awarded a grant to study the role of citizen activist groups in 1996.

Professor elected as arts and sciences Fellow

George E. Andrews, Evan Pugh professor of mathematics and head of the Department of Mathematics, has been elected a Fellow of the American Academy of Arts and Sciences.

He is among 515 new Fellows elected this year in honor of their distinguished contributions to science, scholarship, public affairs and the arts.

Andrews, whose work has found major applications in enterprises as diverse as statistical mechanics and computer science, is renowned for his work in number theory and related topics.

He is perhaps best known outside the mathematics community for his discovery of the lost notebook of the late mathematical genius Srinivasa Ramanujan and his work with the formulas it contains. In addition, he is well known among mathematics educators for his involvement in critiquing the current calculus-reform movement.

He is the author or co-author of more than 180 papers published in scholarly journals, the author of four mathematics textbooks and the editor of three books on various topics in mathematics.

Andrews received both bachelor's and master's degrees in mathematics from Oregon State University in 1960. He earned a doctoral degree at the University of Pennsylvania in 1964. He joined the Penn State faculty in 1964 and became head of the Department of Mathematics in 1995.

GEORGE E. ANDREWS

Harrisburg honors faculty and staff

Terry Bosserman, **William Welsh Jr.**, **Richard W. Foxx** and **Joseph J. Cecere** were the award winners at the annual Penn State Harrisburg Faculty and Staff Recognition Program April 17 in the Capital Union Building.

Bosserman earned the Staff Service Award; Welsh was awarded the Excellence in Teaching award; Foxx the Excellence in Research award; and Cecere the Faculty Service award.

A technician with the Office of Instructional and Information Technologies, Bosserman drew praise for his efforts to improve the educational activities on campus through his technology role. He has been on the Penn State Harrisburg staff since 1990.

A 25-year member of the faculty in the School of Science, Engineering and Technology, Welsh is a registered professional engineer and has been an active member of the American Society for Engineering Education since 1973 and the American Society of Civil Engineers since 1961. He earned the James Jordan Award for Teaching Excellence at Penn State Harrisburg in 1976.

A member of the faculty in the School of Behavioral Sciences and Education since 1991, Foxx is extensively published and is a frequent presenter at gatherings both in the United States and abroad. A professor of psychology, he also serves as clinical adjunct professor of pediatrics at the College of Medicine in Hershey.

Cecere, an associate professor of engineering and chair of the Structural Design and Construction Engineering Technology program, has been a member of the Penn State Harrisburg faculty since

TERRY BOSSERMAN

JOSEPH J. CECERE

RICHARD W. FOXX

WILLIAM WELSH JR.

1982. His service to the program and the School of Science, Engineering and Technology has resulted in a number of advances, including the donation of estimating software from a Baltimore corporation and other donated support for academic programs. He has been active in national professional organizations and is frequently published.

Awards

Two lauded for commitment to libraries

Betty Nirnberger, a member of the acquisitions services support team, and Joann Warefield, a library assistant in the Life Sciences Library, have been honored for their commitment to advancing the mission of the University Libraries as the 1997 recipients of the Margaret Knoll Spangler Oliver Libraries Award. The award was established in 1995 by Ronald and Eleanor Smith and Robert Oliver in memory of Margaret Oliver, former assistant librarian at Pattee Library. Both Nirnberger and Warefield were recognized for providing exceptional service.

Nirnberger joined the Libraries in 1980 as an input operator to assist with the conversion of the public card catalog to the online catalog system. In 1981, she worked in the Documents Section and was responsible for processing international documents and public service duties. In 1982, she became a senior clerk in acquisitions and two years later was promoted to invoice/accounts coordinator in

BETTY NIRNBERGER

JOANN WAREFIELD

*Warefield has been a library assistant in the Life Sciences Library since 1973.

She began at the Libraries in 1952 as a secretary in the Agricultural Library, where she remained for 10 years. In 1963, she became a part-time library assistant and began her full-time position 10 years later. She has been a member of the Pennsylvania Library Association and its Support Staff Round Table. She also does volunteer work for the American Lung Association and American Cancer Society's "Relay for Life" and has served as president of the Pleasant Gap Lioness Club in 1996.

the same department. Her post was upgraded in 1991 to acquisitions budget analyst, and she became a member of a self-directed work team in 1994.

Currently, Nirnberger serves on the Libraries' Building Coordination Council, LIAS Acquisitions System Development Team and the Collection Development Advisory Group.

Assistant professor earns teacher-scholar award

Karl T. Mueller, assistant professor of chemistry, has been honored by the Camille and Henry Dreyfus Foundation with the Camille Dreyfus Teacher-Scholar Award.

Considered one of the most prestigious prizes in the field, the award is designed to provide external support to young faculty members during the early stages of their academic careers to assist them in continuing their high level of accomplishment in both education and research.

Mueller says the award will provide support for the "development of novel methods of solid-state nuclear magnetic resonance for the investigation of the structure and chemistry of complex materials." Mueller's research group currently is studying the microscopic structure of amorphous solids such as glasses, the conformations of bound biomolecules, and the chemistry of zeolites, which are used for catalytic cracking of petroleum. Mueller plans to use the award to "push forward a number of new experiments, which can be helped by some

KARL T. MUELLER

new equipment, and to fund both undergraduate and graduate research assistantships as well as to allow students to attend meetings where they can discuss their research results with other scientists."

His previous awards include the Camille and Henry Dreyfus New Faculty Award in 1993, the National Science Foundation Young Investigator Award in 1994, and both the Research Corporation Cottrell Scholar Award and the Arnold and Mabel Beckman Foundation Young Investigator Award in 1996.

Mueller earned his bachelor's degree in chemistry, *summa cum laude*, at the University of Rochester in 1985, was awarded a certificate of postgraduate studies as a Churchill Scholar at Cambridge University in 1986, and received his doctoral degree in chemistry at the University of California at Berkeley in 1991. He then held a postdoctoral appointment at the University of British Columbia until 1993, when he joined the Penn State faculty.

Smeal College lecturer awarded for excellence in accounting education

Ralph D. Licastro has been named the winner of the 1997 Lester L. Shonto Award for Excellence in Accounting Education.

A lecturer in The Smeal College of Business Administration's Department of Accounting, Licastro has been a member of Penn State's business faculty since 1972. He also is a partner with Licastro & Riedy CPAs, State College, and has more than 20 years experience in accounting.

Licastro holds a bachelor's degree in mathematics and master's degree in accounting, both from Penn State. In addition to his CPA designation, he also is a certified valuation analyst and a certified fraud examiner.

The award was created in the memory of the late Lester L. Shonto, a 1966 accounting alumnus of Penn State, who went on to a successful career as a partner with the Big Six firm of Price Waterhouse.

RALPH D. LICASTRO

Howard Hughes Medical Institute taps associate professor

Jerry L. Workman, associate professor of biochemistry and molecular biology, has been appointed as an associate investigator of the Howard Hughes Medical Institute, the largest private supporter of biomedical research and education in the United States. He is one of 70 scientists nationwide selected this year and the first Penn State faculty member to receive the award.

JERRY L. WORKMAN

Workman said he will use the award to further his laboratory's studies into the mechanisms of gene regulation.

"In particular, these funds will help to advance our studies into the identification and characterization of protein complexes that disrupt and/or modify the structures of chromosomes and turn on gene expression," Workman said.

Workman's research concerns a central process in gene regulation — how energy-driven teams of molecules function as chromosome-remodeling machines that unlock the cell's genetic codes. A chromosome, the gene-containing structure in a cell's nucleus, is a rope-like molecule of DNA tangled up with proteins. Genes are sections of the DNA that contain a cell's genetic codes.

"Our studies analyze chromosome-modifying protein complexes from human cells and from yeast cells where a powerful genetic system can be exploited to complement biochemistry," Workman said. "These studies should render new insights into the development of cancers and other human diseases that result from aberrant gene expression."

As a Howard Hughes Medical Institute associate investigator employed by the Howard Hughes Institute, Workman will continue to hold a faculty appointment at Penn State and will conduct his research in a Howard Hughes Medical Institute laboratory on the University Park campus. Workman will continue to teach and fulfill other academic responsibilities, but he will have more time and resources to devote to his research program.

According to the institute, Hughes investigators conduct biomedical research in cell biology, genetics, immunology, neuroscience and structural biology and have made significant discoveries related to obesity, AIDS, cancer, cystic fibrosis, muscular dystrophy and other medical problems. The institute employs approximately 330 investigators based at 72 institutions nationwide.

Partings

Anthropology professor retires with emeritus status

From establishing an obsidian hydration dating laboratory, to directing one of the most important archaeological excavation sites in the state, Joseph W. Michels achieved great success early in his career. Michels, professor emeritus of anthropology, has retired from Penn State after 31 years of service.

Michels originally joined the University as an assistant professor in 1965 and was promoted to associate professor by 1969. In 1973, Michels was promoted to full professor, and by 1984 earned the title of associate dean for research and graduate instruction in the College of the Liberal Arts.

One of his early initiatives includes establishing the Obsidian Hydration Dating Laboratory, where changes in obsidian were measured to determine the length of time the volcanic rock had been buried. Also early in his career, Michels directed archaeological excavations at the Sheep Rock Shelter Site of Huntingdon County, a site which ranks as one of the most important in Pennsylvania. Later, Michels, along with his colleague William Sanders, co-directed an excavation of the ancient Mayan center at Kaminaljuyu in highland Guatemala. Funded by the National Science Foundation and other sources, the excavation resulted in the publication of six book-length monographs, numerous doctoral dissertations and one of the most comprehensive archaeological reconstructions of a pre-Columbian chiefdom.

In northern Ethiopia, Michels undertook an extensive archaeological survey of the Tigrine Plateau. The survey resulted in the discovery of hundreds of archaeological sites and eventually led Michels to reconstruct the evolution of political institutions in one of Africa's earliest states.

On the island of Sardinia in the western Mediterranean, Michels excavated the Margine Plateau which led to his development of the currently accepted model of political evolution among the local populations of the ancient Nuragic culture for which the island is famous.

During Michels' five years as associate dean for research and graduate instruction in the College of the Liberal Arts, he assisted in growing sponsored research and college resources dedicated to supporting faculty in their research efforts. Along with his assistant, Irene Patrick, Michels wrote a proposal which eventually led to the awarding of \$1 million in challenge funds to the college.

At the time of his retirement, Michels had authored or edited 11 books and book-length monographs, and is currently working on his 12th. He has published more than 100 journal articles, book chapters, research notes and in-house technical reports. He is an elected Fellow of the American Association for the Advancement of Science, served as president of the Society for Archaeological Sciences, and served as chair of the University Promotion and Tenure Review Committee from 1990 to 1992.

JOSEPH W. MICHELS

Summer Sessions director served University for 31 years

Nancy M. Tischler, director of Summer Sessions and professor of English and humanities, has retired after 31 years with Penn State.

Tischler began her Penn State career at the Capital College in Harrisburg in 1966 as a professor of English and humanities, and later was promoted to head of the humanities graduate and undergraduate programs. At the Capital College, she was one of the original eight faculty members who designed curriculum and a governance structure. While serving on the faculty and executive councils, Tischler helped to draft the constitution for faculty organization and assisted in the preparation of the campus' first strategic plan. As head of the humanities program, she assisted in the design of both the undergraduate and graduate programs, with particular emphasis on the development of the secondary education and business/humanities options.

Tischler has held many roles within the University, and in 1981-82 was elected chair of the Faculty Senate, serving as a catalyst for constructive dialogue. She was instrumental in the effort to convert the University calendar system to the present semester system with a summer session and is credited with the development of vital summer educational opportunities which

NANCY M. TISCHLER

have evolved into today's Summer Sessions. Tischler served as executive director of the Summer Sessions from 1983 to spring 1997.

As a scholar, Tischler has published extensively in her field, with emphasis on the life and works of Tennessee Williams. She has served as editor-at-large for *Christianity Today* and as a member of the editorial board for *Tennessee Williams Review* (currently the *Journal*). She has served as president of both the North American Association of Summer Sessions and Association of University Summer Sessions. Tischler was a member of the Pennsylvania Humanities Council, Conference on Christianity and Literature, and last year was president of the Lambda chapter of Phi Beta Kappa.

She received her B.S. degree in education and her M.A. and Ph.D. degrees in English. As a Fulbright Scholar, she spent a year at the University College of the Southwest in Exeter, England.

Tischler and her husband, Merle, will continue to reside in Boalsburg, where she plans to continue her work on Tennessee Williams. Currently, she is working with Albert J. Devlin to select and edit letters of Tennessee Williams for publication by New Directions Press in 1999.

Career information management assistant director ends 30-year career

James Philip "Phil" Bucher, assistant director of career information management in Career Development and Placement Services, a division of the Office of Student Affairs, will retire after 30 years of service.

As assistant director of career information management, he was responsible for preparing and distributing of the Post Graduation Activities Survey; managing career resources housed in the Career Information Center; editing several newsletters, including *Career Trends*, *Career Success* and *Career Perspectives for Faculty*; and serving as the director of the Center for the Review of Career Information which reviews commercial career resource materials and publishes resource reviews. Bucher also provided placement advising, conducted outreach programming and coordinated career and workforce information.

For many years, Phil taught job placement skills and strategies both for resident instruc-

JAMES PHILIP BUCHER

tion and as a one-credit correspondence course through Independent Learning. He also served as liaison to the College of Agricultural Sciences since 1977.

Before becoming the assistant director, Bucher coordinated the University's on-campus recruitment process, one of the largest in the nation. He also served as a counselor at Career Development and Placement Services and was responsible for public school placement.

Bucher began his career in June 1967 as an administrative assistant in the Department of History. He has authored numerous articles about career trends and workforce information in professional journals and magazines. He also published a series titled *Careers in Agriculture*.

He earned a bachelor of arts degree in liberal arts from Penn State in 1957 and a master's degree in counselor education, also from Penn State, in 1969.

Partings

Three depart after long-standing careers at ARL

Accounting office head
had 33 years of service

Lee E. Hall, head of the accounting office in the Applied Research Laboratory, retired after 33 years of service. In 1964 he began working at ARL as the assistant to the chief accountant. Before starting this position, he worked at the General Accounting Office in Washington, D.C., for two years, then was employed by IBM for another two years. At one time, Hall was in charge of ARL's accounting and contractual operations. He retained responsibility for the omnibus contract after the formation of the Contracts Office and was involved with renegotiating the last four omnibus contracts with the Navy.

Hall received his bachelor's degree in accounting from Penn State in 1958. Ten years later, he earned his master's degree in business administration from the University.

Hall and his wife, Edie, have two children and one granddaughter. When he retires, Hall, an avid gardener, plans to devote more time tending his vegetable garden. He has raised up to 400 pumpkins on his plot of land (although he did not grow any last year), and once grew an "Atlantic Giant" pumpkin that weighed 235 pounds. His other plans include performing volunteer work, keeping busy in his woodworking shop and attending Lady Lions basketball games.

LEE E. HALL

Head of drafting, design
co-founded Free University

Roger F. Snyder retired as head of the drafting and design department in the Applied Research Laboratory after 36 years of service.

He began his association with the lab when he was an undergraduate mechanical engineering student at Penn State. Upon graduating with his bachelor's degree, Snyder accepted a faculty appointment in 1961. He helped design undersea vehicles for oceanographic research as well as transducers.

His design efforts for undersea vehicles led to two patents and five published articles. In addition, he occasionally taught machine design classes for the Department of Mechanical Engineering and was one of the founders of the Free University, which provided alternative education at no cost.

In 1988 he became head of the drafting and design department.

Throughout his life, Snyder has supported the community through his volunteer work for the State College Presbyterian Church. One of his greatest enthusiasms is antiques. He has been in the retail antiques business for 10 years, and helped found the Nittany Antiques Emporium on the Benner Pike in State College. After retiring, Snyder will run a new antiques co-op on the Benner Pike called Apple Hill Antiques.

ROGER F. SNYDER

Research associate began
State College Area YMCA

Joseph Wakeley Jr., a research associate at the Applied Research Laboratory, retired after nearly 32 years. During his tenure at ARL, he conducted research and development supporting the U.S. Navy technological base and system development torpedo programs.

Wakeley has published papers on underwater acoustic propagation and underwater explosive time and frequency signatures.

Wakeley guided the research of undergraduate honor students and graduate students in acoustics, mathematics and computer science. At the same time, he held a joint appointment as research associate and assistant professor of acoustics.

He received a bachelor of science degree from the University of Pennsylvania and a master of science degree from the Polytechnic Institute of Brooklyn, both in electrical engineering.

He and his wife, Esther, have five children — David, Scott, Tim, Joe and Marion — and 13 grandchildren.

A resident of State College, Wakeley served as a swimming coach for the Centre Region Parks and Recreation Department, founded the State College Area High School Boys and Girls Swimming Team, founded the State College Area Family YMCA, was elected to the State College Borough Council and served two years as council president.

JOSEPH WAKELEY JR.

McKeesport learning center
director retires after 25 years

Barbara McCollum Hart at Penn State McKeesport recently retired after 25 years of service.

As director of the Campus Learning Center, Hart is known as a compassionate yet firm adviser who helps students to help themselves. Under her supervision the Learning Center has provided service to hundreds of Penn State McKeesport students over the years.

Since its inception in September 1984, the Learning Center has meant the difference between success and failure to many of the students who have used this resource. For other students, it has meant an improvement of grades and overall improvement of their GPAs.

Hart began her service as a faculty member in the College of Health and Human Development and became involved with advising students in the Advising Center. She was appointed administrative assistant to the campus executive officer and coordinated special projects, with an emphasis on state and federal programs. In addition, she oversaw all aspects of the commencement program each spring.

From the University of Pittsburgh, Hart holds a master's degree in public administration and urban affairs and a doctoral degree from the Graduate School of Public and International Affairs. She earned a bachelor of arts degree in sociology and political science from Cheyney State College.

Assistant to dean served 33 years

Everett P. "Tiff" Tiffany, has retired as assistant to the dean in the College of Earth and Mineral Sciences after 33 years of service.

Over the years, Tiffany has contributed to the welfare of the college in numerous ways. He originated and managed the Dean's Freshman Scholarship Program, the Wilson Loan Program, Wilson Scholarship Program and the Wilson Fellowship Program, and developed the many awards and gifts given by the college to its alumni, faculty, staff and students.

As human resources representative, Tiffany helped hire, promote, recognize and assist faculty and staff members for 28

EVERETT P. TIFFANY

years. He helped to establish and organize the Staff Advisory Committee, developed the parking policy to allocate spaces to faculty and staff, proposed the first college blood drive, developed and implemented a new statement of roles and responsibilities for fixed-term faculty and established the college staff group.

Before coming to the College of Earth and Mineral Sciences in 1968, Tiffany worked in the auditing

department of the University.

He received his undergraduate degree from Penn State in 1961 in business administration and a master's degree in public administration in 1976.

Appointments

New associate dean to assume Summer Sessions responsibilities

Ingrid M. Blood has been appointed associate dean for undergraduate education in the Office of Undergraduate Education, effective Aug. 15. Blood will assume responsibilities connected with the Summer Sessions, with emphasis on stimulating, facilitating and advancing academic programming. The new strategic plan for the Summer Session envisions new approaches and innovations in learning and teaching. She will also engage in efforts to improve the undergraduate teaching and learning environment across the University throughout the year. Blood replaces Nancy M. Tischler, executive director of the Summer Sessions, who recently retired.

Before coming to Penn State, Blood held faculty positions at both Miami University in Ohio and Radford University in Virginia. In 1988, she assumed her present position as associate professor in the Department of Communication Disorders at Penn State. In 1995, she was appointed professor-in-charge of the graduate program. She also is an affiliate faculty member, Graduate Program in Acoustics in the College of Engineering.

Blood has received numerous distinguished postdoctoral fellowships and awards relating to the advancement of leadership and has been widely recognized in the field of communication disorders.

Blood has a bachelor's double-major degree in communication sciences/disorders and reading instruction from Montclair State University and M.A. and Ph.D. degrees in communication disorders from Bowling Green State University, Ohio.

Altoona welcomes director of Continuing and Distance Education

William G. Curley has been named director of Continuing and Distance Education at Penn State Altoona. In this position, he will provide creativity, innovation and leadership to the planning, marketing and implementation of a comprehensive program of credit and non-credit programs that meet the professional development needs of Penn State Altoona's five-county service area, including Blair, Bedford, Cambria, Huntingdon, and Somerset counties.

Before joining Penn State Altoona, Curley served as acting campus executive officer at Penn State Mont Alto. Before assuming that position, he was director of Business Services and Continuing and Distance Education at Penn State Mont Alto. Previously, he had worked as both an area representative and conference coordinator at the University Park campus. He has been working for Penn State since 1985.

INGRID M. BLOOD

Curley has a bachelor's degree and a master's degree from Penn State and is currently working on his doctorate in workforce education and development.

Continuing and Distance Education adds statewide program director

Ed Donovan has been appointed to the new position of director of statewide programs in Continuing and Distance Education (C&DE). In his new role, he will focus on the development of new credit and noncredit continuing education programs to be delivered at campuses and centers University-wide.

Before assuming this post, Donovan had been director of continuing education at Penn State McKeesport since 1989. During his tenure, the campus' continuing education program grew annually to become one of the largest at the University. The McKeesport campus also was one of only two campuses to operate an off-campus center for continuing education programming.

He joined the University staff in 1979 at Penn State Beaver in its continuing education office, then moved to the McKeesport campus in 1980. In 1987, he was the founding director of Penn State's Pittsburg-Burgh Center for Continuing Education.

Donovan is the recipient of several University awards, including the first Vice President's Award for Outstanding Outreach and Marketing in 1990. Three of his programs: The Emerging Woman Manager, On-site Business Certificate Program for Consolidated Natural Gas and CITE: Continuous Improvement to the Environment for USSteel, have been honored with National University Continuing Education Association awards.

He earned a bachelor of arts degree from Edinboro University of Pennsylvania and a master's degree in adult education from Penn State.

Liberal Arts welcomes three in Alumni Relations and Development

Three people have been recently named to assist with various duties in the College of the Liberal Arts.

Mary Kay Hort has been named the development assistant in the Alumni Relations and Development Office in the college. She will help develop fund-raising programs, support the various programs that advance the College of the Liberal Arts, and write proposals and other materials. In addition, her responsibilities include working to identify and develop prospects as well as solicitation and cultivation strategies.

Hort joined Penn State in 1994 as a writer in the Office of Development Communications and Special Projects. She wrote and edited proposals, fund-raising

brochures, periodicals and other publications such as *Philanthropic Update*. Before joining the University, she was an account executive at the Weightman Group in Philadelphia, where she managed accounts such as Scott Paper, Tastykake and Tidy Cat.

A State College native, Hort received her bachelor's degree in English from Penn State in 1986.

Marc McMullin has been named assistant to the director for alumni relations in the Alumni Relations and Development Office in the college. He will work with the Alumni Society president and board of directors, the college's development staff and the Penn State Alumni Association with managing and providing leadership for the college's alumni relations program. McMullin will initiate, plan and manage special relationships with alumni to increase their involvement with the college.

Previously, McMullin served as an assistant director in the Office of Constituent Relations at Penn State, creating, planning and implementing special events for the president's office, Board of Trustees and development staff. McMullin also assisted with the management of University development's stewardship operation.

Before coming to Penn State, McMullin was a development assistant at West Chester University, working with the director of athletic development in the management of an annual giving program, a volunteer executive committee and the student giving program.

After graduating from the Bellefonte Area High School, McMullin served six years of active duty as a U.S. Marine combat engineer, and was a cum laude graduate with a B.A. in communication studies from West Chester University.

Donna E. Williams has been appointed coordinator of college relations in the Alumni Relations and Development Office in the college. She will be responsible for planning, developing and implementing public relations programs, writing and producing publications and various media materials, and publicizing major gifts and grants to the college.

Before coming to Penn State, Williams was director of public relations at Centre Community Hospital in State College for eight years, and director of development and public relations for four years.

She holds certification from the Healthcare Marketing and Public Relations Association of the American Hospital Association, and attended the Art Institute of Pittsburgh, Penn State and Central Michigan University. She has served on committees and the board of the American Cancer Society, and on the board of directors of Centre County's internet site, The Country Store.

DNA evidence offers proof that Neanderthals were not our ancestors

By ANDREA ELYSE MESSER
Public Information

A team of U.S. and German researchers has extracted mitochondrial DNA from Neanderthal bone showing that the Neanderthal DNA sequence falls outside the normal variation of modern humans.

"These results indicate that Neanderthals did not contribute mitochondrial DNA to modern humans," said Mark Stoneking, associate professor of anthropology. "Neanderthals are not our ancestors."

The research also reaffirms the origins of modern humans in Africa. The research team includes Matthias Krings, graduate student, and Svante Paabo, professor of zoology, University of Munich; Ann Stone, postdoctoral fellow, University of Arizona; Ralf W. Schmitz and Heike Krainitzki of Rhineland Museum, Bonn, Germany; and Stoneking.

Current theory holds that Neanderthals became extinct only 30,000 years ago and co-existed with modern humans in Europe. The team, however, found that Neanderthals and modern humans diverged genetically 500,000 to 600,000 years ago, suggesting that though they may have lived at the same time, Neanderthals did not contribute genetic material to modern humans.

Since 1991, an interdisciplinary project of the Rhineland Museum, headed by Schmitz, was focused on the Neanderthal-type specimen. This specimen

Mark Stoneking, associate professor of anthropology, is part of the research team that has proven through studies of DNA that Neanderthals did not evolve into modern humans.

Photo: Greg Grieco

was found in 1856 near Dusseldorf, Germany. As a part of this project, a sample was removed for DNA analysis.

"The ability to extract DNA from ancient bone is dependent on many factors, including preservation, temperature and humidity," said Stoneking.

Paabo previously showed that even if extracting ancient DNA is possible, it tends to be damaged and degraded, yielding only short fragments. The researchers used a method of overlapping short strands of DNA to obtain a mitochondrial DNA sequence of 378 base pairs. To ensure that errors caused by damaged DNA were not incorporated into the sequence and that modern human DNA did not contaminate

the samples, the researchers ran multiple extractions and amplifications.

They also sent a sample to Penn State's Anthropological Genetics Laboratory where Stone, then a Ph.D. candidate at Penn State, ran a parallel extraction and amplification of the DNA.

The researchers compared the Neanderthal sequence with 2,051 human sequences and 59 common chimpanzee sequences. They found that the differences in Neanderthal DNA occurred at sites where differences usually occur in both humans and chimps.

"The changes reflect the evolutionary pattern typical of mitochondrial DNA sequences of living humans and chimpanzees, not that of random damage or degradation," said

Stoneking. While Neanderthals inhabited the same geographic region as contemporary Europeans, the observed differences between the Neanderthal sequence and modern Europeans do not indicate a closer relationship to modern Europeans than to other contemporary human populations," he said.

The researchers are confident with their results, but they caution that they are derived from only one individual. They also warn that DNA may be difficult to extract from other specimens.

While the results indicate that Neanderthals did not contribute mitochondrial DNA to modern humans, it is still possible that they contributed other genes.

Ocean circulation thought to moderate Greenland temperatures

Going against generally accepted models, Greenland has been cooling during the few thousand years before this century, and surprisingly, winters were cooling more than summers, a researcher has found.

Accepted theory holds that variations in the earth's orbit control a good portion of the seasonal warming and cooling of the planet. These cycles alter the difference between summer and winter.

Currently, the Earth is closer to the sun during the northern hemis-

phere winter than it was a few thousand years ago, and farther from the sun during the northern hemisphere summer, so summers should have been cooling while winters warmed.

"It's a nice story, but unfortunately, it doesn't seem to account for the past Greenland climate record," Richard B. Alley, professor of geosciences, said. "Information from the Greenland ice cores does show that the summers have cooled, but also that the winters have cooled."

Because the ice cores indicate that

the winters have cooled, some other cause must be found. Alley suggests that ocean heat transport may be the key.

"If, over the last few thousand years, the ocean's transfer of heat to the area around Greenland has declined, then this would be a simple explanation for the overall cooling," Alley said. "This is not unlike what happens with the ocean circulation when rapid cooling events have occurred in the past, except more slowly."

Harrisburg to help develop air conditioners for electric buses

The technology to provide air conditioning units for electric-powered buses is being developed by Trans/Air in Dallastown in cooperation with Penn State Harrisburg.

Andrew Lau, associate professor of engineering, and Peter Idowu, associate professor of electrical engineering technology, have teamed with the York-area manufacturing firm to produce an advanced climate control system specifically for electric buses. The ultimate goal of the project is to produce a genuine electric climate control system that will totally satisfy the electric bus builders' and users' needs. This presents a unique challenge unlike conventional vehicle air conditioning, which uses the engine to power the cooling system.

The second goal is efficiency because the on-board energy is limited, therefore the climate control system must use as little energy as possible. Engine-driven systems are not generally designed for efficiency. The third goal is to create a lightweight system, which will help to ensure high efficiency. It is also important that the first prototype use heat pump heating and is environmentally friendly, totally self-contained, and easy to install and service.

The main benefit of this technology is that there are no pollution emissions. California and Tennessee are two states currently using the electric buses, which were initially marketed four or five years ago. Lau said that if incentives emerged in Pennsylvania, we could possibly see them in use in five years.

"The other thing that's important is that they don't use gasoline," Lau said. "They use electricity generated with coal or nuclear energy. So it's a roundabout way to run a vehicle off coal or nuclear power."

The \$283,000 project is partially funded by the Ben Franklin Technology Center of Pennsylvania, which is a state-sponsored program to promote the development of new technology and business within Pennsylvania.

Trans/Air is a relatively small company with about 75 employees.

ATHLETICS

A regular column provided by Intercollegiate Athletics

Sears Directors' Cup

The Penn State athletic program once again showcased its prowess across the board with a fourth straight top 20 finish in the Sears Directors' Cup All-Sports Competition.

The fourth annual survey, an all-sports competition among Division I institutions, is sponsored by Sears, Roebuck & Co., and NACDA, the National Association of Collegiate Directors of Athletics. The Nittany Lions and Lady Lions earned 520 points in the competition, which awards 64 points for a team which finishes first in an NCAA Championship, 63 points for second and so on.

Stanford earned its third title in the four years of the competition with 1084.5 points while North Carolina placed second (804) and UCLA placed third (802). The top three were followed by Nebraska (780.5) and Florida (763) to round out the top five.

CBS will carry game

CBS Sports has announced plans to nationally televise Penn State's football game at Louisville on Sept. 20. The non-conference game will kick off at 12 p.m. in Cardinal Stadium. It is Penn State's second announced television appearance for the 1997 season. The season opener, Sept. 6, with Pitt will be aired regionally by ABC-TV at 3:30 p.m.

Academic All-Americans

Three more Penn State student-athletes have been selected to Academic All-America teams. Men's volleyball National Player-of-the-Year **Ivan Contreras** was chosen to the GTE-CoSIDA at-large men's spring team and javelin thrower **Becky Gusic** to the women's at-large team. All-America **Jamie Cook**, a decathlete, also won his way onto the track Academic All-America squad.

For the latest information on Penn State Sports, visit the official Intercollegiate Athletics site on the Web at <http://www.psu.edu> (click on sports)

We're on the Web

The *Intercom* is available online every Thursday during the academic year at <http://www.psu.edu/ur/> *INTERCOM/Home.html*. During the summer months, it is available every two weeks, beginning on the Thursday it is published.

In addition, back issues of *Intercom* from 1995 on, can be searched online at <http://www.psu.edu/ur/>. Hit the "Search" button.

Quality time

Charlie Moritz, a 1991 alumnus, returned to the University Park campus recently with his family, Elizabeth, left, and Geri. The Moritz family traveled from Houston for an acoustics seminar, but couldn't resist a stop at the Penn State Creamery for some ice cream.

Gannett Foundation gives college \$250,000

The Gannett Foundation has given the College of Communications \$250,000 to renovate space and purchase state-of-the-art technology for a new multimedia classroom — the "Gannett Foundation Classroom." The gift, which will be spread over a three-year period, is the largest ever given to a university or college by the current Gannett Foundation.

The gift marks the first step toward the fulfillment of the college's goal to consolidate and update its production

and audio facilities and equipment. It also will serve as leverage for future gifts toward the creation of a new, unified production facility that will enable the college to better prepare its students for career opportunities in the converging fields of journalism and telecommunications.

The Gannett Foundation Classroom, which will serve as a newsroom, will support the college's online media course and provide more sophisticated training and opportunities for upper-

division students. The college will purchase new computers, up-to-date hardware and software, digital editing equipment, fiber optic cable wiring to adjacent audio and video studios and appropriate wire service feeds. The new classroom is expected to be completed during the 1997-98 academic year.

The Gannett Foundation is a private foundation sponsored by Gannett Co. Inc. In 1996, grants and employee matching gifts totaled nearly \$6.4 million.

What is a "Nittany Lion?" These two have all the answers

By ANNEMARIE MOUNTZ
Public Information

Quick: Where and by whom was the idea for the Nittany Lion mascot first verbalized? Who sculpted the Nittany Lion Shrine?

If you said **Joe Mason** at Princeton and **Heinz Warneke**, congratulations. You're a true, blue-and-white Penn Stater. And if you're like most Penn Staters, you can't get enough information about the University's beloved lion.

If you're not as up on Nittany Lion trivia as you'd like to be, don't worry. University librarians **Jackie R. Esposito** and **Steven L. Herb** have worked hard to put the facts you seek at your fingertips.

Esposito and Herb scoured the University Archives in Pattee Library and interviewed dozens of people connected with Penn State to find out everything they could about the University's famous symbol. Their efforts produced *The Nittany Lion: An Illustrated Tale*, to be published by the Penn State Press in September.

"What is 'Nittany'? What is the Nittany Lion? Why is it Penn State's mascot? Where did it come from? Part of the reason this book got started was to answer some of these questions," said Esposito, senior assistant librarian and assistant University archivist. "People want to know what this Nittany thing is. And you can't just say, 'It's this,' because it's not just one thing."

Most people who use the University archives expect to be able to name a topic and be handed all the information the library has relating to

University to hire 100 new faculty

By LISA M. ROSELLINI
Public Information

In 1994, **Richard Kopley**, then an associate professor of English at the DuBois campus, was asked to take on a three-year assignment as an administrator. Now, in 1997, his term as associate head of the Department of English for the Commonwealth Educational System has expired, and Kopley is returning to his home base—to again teach students full time.

"I'll be writing a lot fewer memos, doing less traveling, fewer evaluations and the focus will be on the classroom in a way that it hasn't been for the last three years," said Kopley, who has taught a class each spring at University Park. "There will be a lot less pressure, but not less time expended. I expect to enjoy it totally."

Kopley's return—like that of numerous other University administrators—is just one step in a mixed approach to beef up the number of faculty in Penn State's classrooms. According to President **Graham B. Spanier**, the equivalent of 21 additional

Veteran CNN newsmen to give Aug. 9 address at summer commencement

A familiar face on the all-news network CNN will be seen by those receiving undergraduate degrees at University Park, while the director of the Life Sciences Consortium will address master's and doctoral degree recipients.

The University will hold 1997 Summer Commencement ceremonies for 1,494 undergraduates and 906 graduate degree students at the University Park campus on Saturday, Aug. 9. An estimated 219 students will graduate with associate degrees, 1,275 with baccalaureate degrees, 673 with master's degrees and 233 with doctorates, for a total of 2,400 graduates.

Undergraduate ceremonies will be held at 10:30 a.m. Saturday, Aug. 9, in The Bryce Jordan Center. The commencement speaker will be **Charles Bierbauer**, senior Washington correspondent for CNN and Penn State Distinguished Alumnus and Alumni Fellow.

See "Commencement" on page 3

Inside

It's time again

Ag Progress Days, featuring more exhibitors and the latest in agricultural advances, is again set to make its appearance at the **Russell E. Larson Agricultural Research Center** on Aug. 18-20. For more information, see page 8.

Picnic season

In the heat of summer, bacteria lurks in fun foods and could prove harmful for those who aren't cautious. For tips on better barbecuing and food handling, see page 15.

Nittany

Continued from page 1

the subject. But that's not how it works, Esposito said.

"You give them what you have, usually bits and pieces, and they look at it and say 'But this isn't everything.' In an archives, researchers have to look here and there, essentially putting together pieces of a puzzle, instead of getting a book and having all the information handed to them in one place."

In an effort to answer the questions about the Nittany Lion more quickly and easily, Esposito started compiling all the different variations of the theme. Her first thought was to put together a small booklet similar to those at historic sites, but also to include some stories for children. Because Herb is a specialist in children's literature and a storyteller by profession, he was a natural partner in the process. That process included a lot of detective work.

"This is a real interesting combination of traditional academic scholarship with creativity and storytelling," Herb said. "We're really doing something, a little different here. It's a trade book, with a scholarly background. The amount of time we spent in the archives for this book is comparable to the time a historian would spend in the archives on a biography because there was a lot to look at, a lot of different stories to put together."

Most of the information in this book existed in some form somewhere, but Esposito and Herb have woven it together into a connected tapestry and in the process discovered things that didn't exist before outside of somebody's head or scrapbook.

Herb, who is not an archivist, found the information-gathering process a learning experience in itself.

"I imagined the archives as a pile of stuff. If you went through it long enough, you'd establish all the facts and everything would be there and you'd write a story," he said. "Well, it's more like an unraveling shirt. You find an envelope full of facts, pull on one and it's like a thread that never, ever stops. In some ways, it's both wonderful and infuriating. It's exciting because there's always something new to discover, but I'm still asking questions and we just can't get resolution for everything."

For example, they found that sometimes photos didn't match up with the facts they uncovered.

"We have a story that seems incontrovertible and then we have a picture that contradicts it," Herb said. "We have them both in the book, hoping someone will figure it out and let us know."

The two authors wouldn't divulge the contradicting information.

Another mystery is a missing mascot.

"Some people think there's a mascot directory somewhere. But it's the first time anybody's put together as complete a list as possible, but the 1961

Mascot on the move

The Nittany Lion mascot, which was created in 1904 in the mind of freshman baseball player Joe Mason, has become a fixture at Penn State sporting events.

mascot's identity is missing," Herb said. "Now there has to be someone who knows who the lion was. We asked the lion before 1960, 'Do you remember who took over after you?' No. We asked the lion after (1962), 'Do you remember who you took over from?' No. The cheerleader at the time? No. No *Collegian* article. No mention, nothing. Isn't that weird? It's almost like we have to publish the book to get that answer."

Esposito offered some explanations, including the possibility that there wasn't a mascot that year, or that a group of fraternity brothers took turns donning the suit.

"For a long time you weren't supposed to say who you were," Esposito said. "That was part of the myth of the man in the suit. Some people took that very seriously."

Esposito and Herb would like nothing better than to see *The Nittany Lion: An Illustrated Tale* in every Pennsylvania library.

"We spent a lot of time on a pretty extensive index and tried to organize it in such a way that even though it's a collection of stories, it would still be a reference work," said Herb.

"It's written so that if you don't know Penn State history you can fol-

low the story and keep up with the social history that's going on at the time," Esposito said.

Still, the appeal to Penn State alumni is not lost on them.

"There are a lot of alumni and I think they're the ones who are most interested," Herb said.

Esposito and Herb are acutely aware that the details in their book will be scrutinized. Although they spent countless hours trying to verify every fact, they're sure they must have missed something.

"We're assuming there's somebody out there who remembers it all and will turn up after the book comes out," Esposito said.

The book will help Esposito answer all those questions she fields about the Nittany Lion. She also hopes people are entertained learning things they thought they knew.

Herb will be happy if he goes into O.W. Houts, a State College variety store, and sees people staring at the bronze lions outside.

"If I see people looking at those lions and petting them, I'll know it was because of us," he said.

Want to know why? Read the book.

The Boast at Princeton

The Nittany Lion was born on a bitterly cold April day in 1904, but not in Happy Valley where he reigns as king. His life began where many of Penn State's sports teams have faced their toughest hurdles — on the road.

The Penn State baseball team awoke that blustery Wednesday morning about to face their strongest opponent of the season. Expectations had not been high for a team that returned only three varsity players to the diamond, and after an opening game win over the Bellefonte Academy at home, the eastern road trip was proving difficult. The men from State were shut out by West Point (1-0) on the 16th and Manhattan College (6-0) on the 18th, all but wiping out any joy they had obtained by beating Bloomsburg Normal in their first contest as the visiting team.

A hard-fought, one-run victory at Fordham the day before had brightened their spirits and now it was the 20th, the final game of the eastern leg of the season, and that meant Princeton. They had beaten Fordham and held their own at West Point, but the Princeton baseball team was tough to beat anywhere and on their own field they were formidable. The Pennsylvania State College nine were tired from all that train travel and looking forward to returning home, but first they had to face the Princeton Tigers.

It is hard to gauge just how certain the Princeton nine were of winning the game that day, but during a morning tour of campus for the Penn State team, a couple of tour guides couldn't resist a pre-game boast. Third baseman Joe Mason remembered it this way four decades later at the dedication of the Nittany Lion Shrine:

"As you students well know, sophomores are generally pretty cocky chaps, and when these two escorted us into their beautiful gymnasium, they stopped us in front of a splendid mounted figure of a Bengal tiger. One chap spoke up: 'See our emblem, the Princeton Tiger, the fiercest beast of all.' An idea came to me, and I replied, 'Well, up at Penn State we have Mount Nittany right on our campus, where rules the Nittany Mountain Lion, who has never been beaten in a fair fight, so Princeton Tiger, look out.'"

— From *The Nittany Lion: An Illustrated Tale* by Jackie Esposito and Steven Herb

Commencement

continued from page 1

Bierbauer covers critical public policy issues including the federal budget, tax reform and health care. As CNN's senior White House correspondent for nine years during the Reagan and Bush administrations, Bierbauer has spent more years at the White House than any U.S. president except Franklin D. Roosevelt. He has traveled with presidents to all 50 states and more than 30 nations and has covered four presidential election campaigns since 1984.

Bierbauer joined CNN in 1981 as its defense correspondent. From 1985 to 1995 he was the host of CNN's "Newsweek Saturday," a weekly report featuring in-depth interviews with leading newsmakers. He holds a bachelor's degree in journalism and Russian and a master's degree in journalism from Penn State.

Graduate School ceremonies for Penn State master's and doctoral recipients will be held at 2 p.m. Saturday, Aug. 9, in Eisenhower Auditorium. The commencement speaker is Nina V. Fedoroff, professor of biology, director of the Life Sciences Consortium, director of the Penn State Biotechnology Institute, and holder of the Verne M. Willaman Chair in life sciences.

Fedoroff is known for her research on the molecular biology of mobile genetic elements in plants and on the developmental regulation of gene expression. She is a member of the National Academy of Sciences, the American Academy of Arts and Sciences, the Phi Beta Kappa and Sigma Xi honorary societies, the board of directors of the Sigma-Aldrich Corp., the international advisory board to the Engelhardt Institute of Molecular Biology in Moscow, and the editorial boards of *The Proceedings of the National Academy of Sciences*, *The Plant Journal* and *Perspectives in Biology and Medicine*.

Fedoroff earned a bachelor's degree in biology and chemistry, summa cum laude, at Syracuse University and a Ph.D. in molecular biology at Rockefeller University.

Degrees for both ceremonies will be conferred by President Graham B. Spanier.

Grad student receives NASA funding

Harrisburg resident William Nordai, a student in Penn State Harrisburg's graduate program in environmental pollution control, has earned a research grant through the National Aeronautics and Space Administration (NASA) to study in-vessel composting for processing and recycling solid waste in outer space.

NASA's Graduate Student Researchers Program will fund Nordai's tuition and research needs as he completes requirements for his master of engineering degree and investigates "Composting Plant and Human Wastes in a Controlled Ecological Life Support System."

Samuel McCintock, associate professor of environmental engineering, will write the proposal to NASA.

New faculty

continued from page 1

faculty positions will result from shifting academic personnel with administrative duties back to the classroom. But that's only one route to easing the University's student/faculty ratio of 18.4 to 1.

Spanier, who during his 1996 state-of-the-university address called the hiring of new faculty "Penn State's highest priority," recently unveiled plans to add 100 new faculty members to the ranks — 60 of whom will come on board during this academic year.

Like Vincent Crespi,

Crespi, a postdoctoral researcher in physics at the University of California, Berkeley, will come on board as an assistant professor of physics on Aug. 15. He is part of the first wave of 25 new faculty who will begin appearing on campus this fall, hired with the help of \$1.3 million in internal budget reallocations. As part of Penn State's 1997-98 state appropriation request, Spanier was asking the Legislature for ongoing funding for 50 additional faculty positions, but the \$2.9 million needed for the hirings didn't materialize this year. Despite this, Penn State made good on its promise to reallocate funds for 25 new positions.

"Data show that Penn State's student/faculty ratio is higher than those for Pitt and Temple," Pitt's ratio is 14.5 to 1 and Temple's is 16.9 to 1," Spanier said referring to the most recent report from the Joint State Government Commission, which collects information every year from state-owned and state-related universities. "It would take approximately 650 additional faculty positions to bring our student/faculty ratio to the average of Pitt or Temple."

Lack of state funding plays a serious role in the problem, Spanier said. Within Pennsylvania, Penn State receives a lower educational and general appropriation per student from the state than any other public college or university. According to the University's Office of Budget and Resource Analysis, in 1995-96 — the most recent year for which comparative data are available — Temple received \$5,630 per full-time equivalent student; Pitt pulled in \$4,750; the state-owned universities were given an average of \$4,580; while Penn State received \$3,350.

"Because this faculty initiative is so vital to the core mission of our University and to improving the quality of our educational programming we are determined to make some level of progress regardless of state funding," Spanier said.

In addition to the 25 new faculty positions already given the go ahead, \$1 million also has been earmarked to add faculty and enhance programs in the Life Sciences Consortium that includes the Eberly College of Science and the colleges of Health and Human Development, Medicine, the Liberal Arts and Engineering. \$4.6 million will support faculty positions and other high priority academic programs across the Penn State system, and \$1.4 million from recent adopted changes in the tuition structure, will go to colleges and campuses based on the enrollment in each unit.

"I see these steps as great first steps," said Louis Geschwindner, professor of architectural engineering and chair of the University Faculty Senate. "I think this will be important for every unit of the University. The biggest value of course is more student interaction with faculty and the potential for smaller classes, but the impact on the entire University is going to obviously be extremely positive."

Geschwindner explained that having new colleagues always provides new opportunities for teaching and research efforts. It is possible that fresh ideas and new hires could result in new courses being designed and offered.

"Adding new faculty could mean new course offerings," agreed Susan Welch, dean of the College of the Liberal Arts. "But this will all take time. Although 100 faculty is good news, it is still a small percentage of overall faculty. We've got to start somewhere and eventually it will make an impact."

Welch, who said her college has been working for years on finding ways to increase its faculty numbers, said the College of the Liberal Arts is an early beneficiary of the initiative, having gained approval for three positions. Two were recently filled — one in religious studies and the other in psychology.

Howard Grotch, dean of the Eberly College of Science, said because his college pro-

vides service instruction at the undergraduate level, the news of additional faculty is a welcome relief. About 75 percent of the student credit hours provided by the College of Science are offered to students outside the college.

"This is an extremely important initiative that will enable class sizes to go down and will allow us to possibly offer more courses for students," Grotch said. "I'm excited about the entire prospect."

Large class sizes have been an ongoing concern of Spanier's, who said that on the whole Penn State classes are manageable, but the need is there for more teachers to truly make the educational experience a valuable one. In the Joint State Government Commission report, Penn State's average class size for undergraduates is 29. In the 1996 fall semester, more than 85 percent of all class sections had 50 or fewer students enrolled, and two-thirds had 30 or fewer, according to information from the Office of Budget and Resource Analysis.

"I think some of the large class discussion is myth," said Diane Enerson, director of the Center for Excellence in Learning and Teaching. Enerson coordinates annual luncheons to promote discussion among faculty members who teach larger classes. "There are some large classes, but we have found that most of those who teach larger classes have an average of 15 years of teaching experience and tend to have a higher level of expertise. The reality is that you can still have an excellent learning experience in a large class setting."

Through the center's program, faculty who teach larger sections exchange ideas on how to improve the large class experience. On another front, Enerson is frantically preparing for the onslaught of 100 new faculty faces. The center has embarked on a new program fashioned after the large class luncheon discussion called the "New Faculty Network." Enerson hopes the structured opportunities the center will provide for new faculty to meet will help them "get their bearings and discover what resources are available to them at the University."

"I think that if these 100 faculty positions are used judiciously they could have a tremendous impact," Enerson said. "Not only on student learning and on teaching, but also on the morale of the entire University."

LECTURES

Molecular biology symposium is Aug 7-9

Penn State's 16th Summer Symposium in Molecular Biology, titled "Microbial Structural Biology," will take place from Thursday, Aug. 7 through Saturday, Aug. 9, at the University Park campus in collaboration with the University of Georgia.

Christopher T. Walsh, professor of biological chemistry and molecular pharmacology at the Harvard Medical School, will present the Thomas J. Watson Jr. Lecture in Molecular Biology at 8 p.m. Thursday, Aug. 7, in Schwab Auditorium. Walsh is a member of the National Academy of Science and is internationally recognized for his pioneering work on the molecular basis of biological catalysis, which focuses on the structure and function of enzymes including enzymes involved in bacterial cell wall biosynthesis.

Wolfgang Baumeister, director of the Division of Molecular and Structural Biology at the Max-Planck Institute for Biochemistry in Munich, Germany, will present the plenary lecture at 7:30 p.m. Friday, Aug. 8, in Schwab Auditorium. Baumeister is internationally recognized for the discovery of, and structural studies

on, novel enzymes and proteins from the Archaea — a recently recognized domain of organisms that is distinct from the bacteria domain and from the eukaria domain, which includes organisms from yeast to humans.

The keynote address and the plenary lecture are open to the public. Also open to the public at no charge are the symposium's industry exhibits on current research directions in molecular biology and the latest biotechnology-oriented products and services. These exhibits will take place on Thursday, Aug. 7, at the HUB Ballroom and Fishbowl from 10 a.m. to 4 p.m.

Among the symposium events are 18 invited lectures and a number of oral presentations and posters, which will be presented in Schwab Auditorium.

The 1997 symposium is organized by the faculty of the Summer Symposium in Molecular Biology with support from many academic units at Penn State, a variety of industrial organizations, and the University of Georgia. For more information or to register for the symposium, contact Carey Shuey, program coordinator, at (814) 863-1918.

Social structures, mobility focus of gerontology caucus

In cooperation with the Geriatric Education Center of Pennsylvania, the College of Health and Human Development is presenting the Penn State Gerontology Center Conference on "Social Structures and Mobility in the Elderly." The conference, a continuing and distance education service, will be held Oct. 13-14 at the Penn State Conference Center Hotel. The event is free for Penn State faculty, staff and students.

Chaired by William Evans, from the University of Arkansas, and Penn State's Martin Pietrucha and K. Warner Schae, the two-day conference will include six presentations: "Sensory and Cognitive Changes with Age," "Limitations of Mass Transportation and Individual Vehicle Sys-

tems for Older Persons," "Cause of Accidents Related to Age," "Used or Developed Improvements for Increasing Mobility and Reducing Accidents of Older Drivers," "Physiological Age Changes," and "Development of Assistive Devices to Improve Driving Skills in the Elderly and Amelioration of Environmental Hazards."

There is a \$90 fee (\$55 for graduate students from other institutions) for registrants other than Penn State faculty, staff and students. To register, call (800) 778-8632. For more information, contact Judy Hall by phone at (814) 863-5130 or by e-mail at Conference-Info1@cdc.psu.edu. You may also visit the Web site: <http://www.cdc.psu.edu/C6/SocialStructures&Mobility/>.

Keynote presenter picked for October conference on future of medicine

Internationally renowned healthcare expert and best-selling author Dr. Andrew Weil will be the keynote presenter for the conference "The Future of American Medicine — Changing Paradigms for Healing," scheduled for October at the Penn State Conference Center Hotel and The Nittany Lion Inn.

Weil, a Harvard-educated M.D., has earned the reputation as one of the world's leading authorities in alternative medicine — a field that has experienced unprecedented growth and interest over the past decade. Along with his noted advances in the alternative healthcare field, Weil has authored six books, including such

best-selling titles as *8 Steps to Optimum Health* and *Spontaneous Healing*.

"The Future of American Medicine" conference will be a three-part event addressing issues such as the role of integrative medicine in today's society; how it will impact on healthcare delivery systems; and future directions in health-based education and research. Among one of the conference highlights will be an evening public lecture by Weil.

"The Future of American Medicine" conference is scheduled for October 20 and 21. For more information, contact Georgia Abbey at the Penn State Conference Center Hotel, (814) 863-5140, or fax (814) 863-5190.

News in Brief

Yoga this summer

The Health Matters Program is still offering summer yoga at University Park. Starting July 30 and continuing through Sept. 10, classes meet Wednesdays, 12 p.m.-1 p.m. in 133-F Johnston Commons. The seven-week session costs \$35, reimbursable to HMO participants taking the yoga series for the first time.

To register, contact Jan Hawbaker at 865-3085 or jgh3@psu.edu.

Cigarette smokers needed

The Department of Biobehavioral Health would like to speak with smokers of "ultra-light" cigarettes (ie. Carlton, Now, Merit Ultima) about their possible participation in a paid research study. The principal investigator on the study is Christine T. Sweeney, pre-doctoral Fellow in Health and Human Development. Please call 865-0089 for more information.

What heat wave?

One group of people found a sure way to stay cool this summer. They attended a Penn State Ice Hockey Camp. Students from around the state come here to improve their skills every year.

Summer sessions programs aid in decision-making

They're leaving home, testing their wings and deciding what they want to be when they grow up.

With support from community leaders, business people and professionals, high school students from Pennsylvania will begin to experience some of life's lessons and consider career paths enrolled as Summer Sessions students at the University Park campus.

Upcoming programs include:

- Staff Assistant Training Program; contact **Steve Hayes**, (814) 865-1387.
- English Department Minority Graduate Summer Orientation Program; contact **Don Bialostosky**, (814) 863-3069.
- Multicultural High School Film and Video Workshop; contact **Ned Faust**, (814) 863-1243.
- Minority Research Apprentice Program; contact **Dan Trevino**, (814) 863-1291.
- Hispanics for Academic Program; contact **Jesus Colon**, (814) 863-2293.
- Bridges to the Future, geared toward low-income students; contact **Earl Merritt** or **Deborah Atwater**, (814) 863-1977.
- Minority Student Apprenticeships in Agriculture; contact **William Henson**, (814) 865-7521.
- Food and Agricultural Sciences; contact **Blannie Bowen** or **Cathy Bowen**, (814) 863-7850.
- Minority Commonwealth Campus Retention Program; contact **Shenetta Selden**, (814) 863-8598.
- Pre-Freshman Engineering and Summer Scholars Program; contact **Sandra Johnson**, (814) 865-7138.
- Wallops Island Environmental Research; contact **Richard Devon** or **Geraldine Russell**, (814) 863-7688.

■ Outreach

ALERT partnership helps increase safety

Carbon, Lehigh, Monroe, Northampton and Schuylkill counties will have safer communities thanks to Penn State and its partners. Penn State Lehigh Valley continuing and distance education, ALERT Partnership and the City of Bethlehem's Police Department were recently awarded a \$480,729 grant from the U.S. Department of Justice to provide training for municipal police in the five-county region.

Goals of the grant include training law enforcement officials and residents to build partnerships that will initiate and sustain community policing by using a community advisory panel. Residents also will work together with the law to incorporate problem-solving techniques and to integrate community policing as a model for all police personnel.

Grant funds will support salaries, training equipment and supplies, Web site and e-mail development, needs assessments in the communities involved and the establishment of community task forces.

All partners in this combination will bring their

New at Penn State

Chicken or the egg?

A new program at Penn State Beaver allows urban youth to follow the life cycle of a chicken from first cluck to final pluck.

As part of an innovative diversity outreach effort to show inner-city children new career opportunities, the project incorporates the help of not only Penn State experts, but individuals from the Beaver County Housing Authority and the Alquippa School District. The program also shows how agriculture relates to the food system.

"It really exposes the children to the reality that chickens don't just appear in the local supermarket," said **Donald Sheffield**, special assistant to the vice provost for educational equity, who conceived the idea. "Someone has to raise them and feed them."

Sheffield said elementary students from Alquippa monitored eggs, incubating and hatching as part of the program. A second group of middle school students researched the feeding and growth patterns of the chicks. Half of the students also traveled to University Park to tour the Poultry Education and Research Center and other University facilities.

"Eventually, I would like to make this a mobile project that can be taken to urban schools and neighborhoods," Sheffield said.

Help for entrepreneurs

The creation of an Entrepreneurial Development Center to serve new and growing businesses in the Capital Region has taken another major step forward with the appointment of Penn State Harrisburg faculty member **Robert Russell** as its director.

The EDC, to be located at 18th and State streets in Harrisburg, is being created through the efforts of the Capital Regional Economic Development Corporation in conjunction with the City of Harrisburg and the region's business, education and public service communities.

The center will provide, under one roof, an entire range of business start-up and development services from pre-operational planning to securing low interest financing to long-term mentoring. Its goal is to facilitate the delivery of services to entrepreneurs either starting or expanding business operations in the region.

Through a combination of on-site counseling, training and linkages to needed business resources, the EDC will aim to minimize time, effort and expense often encountered by entrepreneurs seeking information or assistance. Potential services of the EDC include self-assessment programs, the development of a business plan, local and financial issues, management and training concerns, marketing, technical support, mentoring support and seminars.

Russell has been an assistant professor of management for six years in the Penn State Harrisburg School of Business Administration. He views the creation of the center as "a necessary first step toward building an entrepreneurial network in the region."

Appointments

Editor's note: The following appointments are as a result of the University's reorganization, which became effective July 1.

Four division heads appointed at Altoona

Four new division heads have been appointed at Penn State Altoona: **William C. Engelbret**, Division of Business and Engineering; **Lori Bechtel**, Division of Education, Human Development and Social Sciences; **James A. Winsor**, Division of Mathematics and Natural Sciences; and **Michael W. Wolfe**, Division of Arts and Humanities. Each will be responsible for providing leadership to develop and maintain academic courses and programs within their respective divisions. Altoona campus became a college effective July 1.

Engelbret, associate professor of accounting, received a Ph.D. in accounting from Penn State, an MBA from the University of Pittsburgh and a bachelor of arts degree from Thiel College. He is a member of the Pennsylvania Institute of Certified Public Accountants (PICPA) and has been involved with continuing education for certified public accountants. He has served as chairman of many of PICPA's education committees and has served on its board of directors for the Foundation for Education and Research. He has been a member the ruling body of the State CPA Society and is a member of the Institute of Management Accountants. In addition, he is a member of the American Accounting Association and the American Institute of Certified Public Accountants.

WILLIAM C. ENGELBRET

Engelbret was the recipient of Penn State Altoona's Student Government Association Annual Faculty Award for Outstanding Teaching in 1979, 1982, 1986, 1989 and 1994. In addition, he received the Grace D. Long Award in 1990 and the George W. Atherton Award for Excellence in Teaching in 1992.

Bechtel, professor of biobehavioral health, received a Ph.D. in health education from Penn State; a master of science degree from the University of Illinois; and a bachelor of science degree from Lock Haven State University, where she recently received a Distinguished Alumni Award. She is a member of the Pennsylvania School Health Association; the American School Health Association; Pennsylvania State Association of Health, Physical Education, Recreation and Dance; and a variety of community organizations.

LORI BECHTEL

Bechtel was the recipient of the College of Health and Human Development's Dorothy Jones Barnes Teaching Award and Commonwealth Educational System Faculty Achievement Award in 1995. She also received the Health Educator of the Year Award for the Pennsylvania State Association for Health Education in 1995; the Pennsylvania School Health Association Distinguished Service Award in 1994; Penn State's George W. Atherton Award for Excellence in Teaching in 1993; and the Grace D. Long Award for Faculty Excellence in 1993.

Winsor, professor of biology, received a Ph.D. in

botany; a master of science degree from the University of Michigan; and a bachelor of arts degree from Ohio Wesleyan University. He is a member of the Botanical Society of America, the Ecological Society of America, Pennsylvania Academy of Sciences, Horseshoe Curve Resources Coalition and Altoona's Shade Tree Commission advisory board. Winsor's research interests include plant reproductive ecology. He was the recipient of the Student Government Association's Outstanding Faculty/Adviser Award in 1989 and 1993.

JAMES A. WINSOR

Wolfe, associate professor of history, received a Ph.D. in history and a master of arts degree from Johns Hopkins University. He also received a master of arts degree and a bachelor of arts degree from Boston University. He is a member of the American Historical Association, the Sixteenth Century Society, the Society for French Historical Studies and the Western Society for French History, among others. His research interests include early modern France, religious history, military history and urban history. Wolfe received the Grace D. Long Award for Faculty Excellence in 1995 and the Provost's Award for Innovative Teaching in 1993.

MICHAEL W. WOLFE

Administrative appointments are announced at Abington

Penn State Abington officials recently announced the following administrative appointments, effective July 1:

Paul J. Hutta has been named head of the Division of Science and Engineering at Penn State Abington. Hutta is an associate professor of engineering at Abington. A registered professional engineer, he earned his B.S. in electrical engineering from Penn State and his Ph.D. in physics from Lehigh University.

A recipient of the University's Engineering Society Outstanding Teacher Award, Hutta has taken leadership roles in numerous campus and University professional activities, including serving as chair of the Ogontz Technical Advisory Council and leader of the Electrical Engineering Technology Group. In addition to his academic career, he has worked in a variety of management and technical posts for companies including General Electric Co. and Betz Labs. He is a member of the American Society of Engineering Education, the Institute of Electri-

PAUL J. HUTTA

cal and Electronic Engineers and the American Physical Society and has published scholarly papers in journals including *Materials Chemistry* and *Physics and Inorganic Chemistry*.

Ellen Andrews Knodt has been named head of the Division of Arts and Humanities. Knodt, an associate professor of English and associate director of academic affairs at Abington, is the 1996 recipient of the Atherton Award for Outstanding Teaching. In 1994, she also was selected Outstanding Teacher in the College of the Liberal Arts.

ELLEN ANDREWS KNOTT

Knodt, the author of numerous books, book chapters and scholarly articles, specializes in teaching writing to undergraduate students. In recent years, she has written several texts on writing, including *Understanding Ourselves: Readings for Developing Writers* (Harper Collins, 1996) and *Making Progress: From Paragraphs to Essays* (Harper Collins, 1991). Knodt received her Ph.D. in English from Carnegie Mellon University, her master's in American studies from Purdue University and her bachelor's degree in English from Northwestern University.

James F. Smith has been named head of the Division of Social Science. Smith, a professor of English and American studies, has served in a variety of administrative posts in recent years, including as baccalaureate degree coordinator at Abington; coordinator of the Department of English at Abington; associate head for the Commonwealth Educational System; Department of English; and chair of the University Faculty Senate.

JAMES F. SMITH

Smith is the 1996 recipient of the College of the Liberal Arts Outstanding Advising Award, as well as Abington's Distinguished Service Award and an AMOCO Foundation Award for Outstanding Teaching, among many others. He is the author of numerous books, book chapters and scholarly articles, including *The Business of Risk: Commercial Gambling in Mainstream America*. Smith earned a bachelor of arts in English from Boston College, a master's and Ph.D. in English from Penn State.

Patricia Weaver has been named head librarian. Weaver joins Abington from the Francis A. Drexel Library of St. Joseph's University in Philadelphia, where she served as acting head of the reference division.

Weaver holds a bachelor's degree in English from Millersville University, a master of science degree in information studies from Drexel University and an MBA from St. Joseph's University.

PATRICIA WEAVER

Appointments

Editor's note: The following appointments are as a result of the University's reorganization, which became effective July 1.

Capital College names director of the School of Public Affairs

Long-time Alfred University faculty member Steven A. Peterson is the new director of the School of Public Affairs at Capital College's School of Public Affairs. As a result of the July 1 realignment of the University, Capital College is now a two-campus institution consisting of Penn State Harrisburg and Penn State Schuylkill.

Peterson succeeds associate professor of public administration James E. Skok who directed the school on an interim basis since 1994 and will return full-time to faculty duties. Peterson joins the college as a professor of politics and public affairs.

A 1969 magna cum laude graduate of Bradley University, Peterson earned his Ph.D. in 1974 from The State University of New York at Buffalo. He joined the faculty at Alfred, in New York state, as an assistant professor of political science in 1973. He was promoted to associate professor in 1978 and to professor in 1984. He was awarded the Alfred Excellence in Teaching Award for 1982-83.

A former chair of the Division of Social Sciences at Alfred, Peterson has authored a vast list of publications and articles, including a new book titled *Darwinism, Dominance and Democracy: The Biological Bases of Authoritarianism*, published by Praeger. His prime research areas are in judicial process, public policy, biopolitics, political behavior, American political institutions and political psychology.

The School of Public Affairs has shown rapid growth in the past several years. Included in recent successes have been a new master of public administration program and a joint degree offering with The Dickinson School of Law which enables students to earn a law degree and a master's degree in public administration simultaneously.

Berks-Lehigh Valley College adopts new academic structure

As a result of the July 1 merger between the Berks and Lehigh Valley campuses into Penn State Berks-Lehigh Valley College, the college has undergone organizational changes.

The academic structure of the new college will be organized into three divisions: liberal arts, science and engineering, business, computing and human development.

Michael Riley, associate professor of English at Berks campus, has been named liberal arts division head. He became a Penn State faculty member in 1978, serving first at the Wilkes-Barre campus and moving to Berks in 1981. Riley earned his doctorate and master's degrees from Ohio University. He earned his bachelor's degree from the University of Scranton.

David Sanford, associate professor of horticulture at Berks, was appointed science division head. Sanford, who has served at Berks campus since 1989, is responsible for the construction and maintenance of the campus greenhouses, nursery and display gardens, and he supports southern Pennsylvania's cooperative extension educational efforts in ornamental horticulture. Sanford earned his doctorate from North Carolina State University, his master's degree from Michigan State University and his bachelor's degree from Cornell University.

Carolina "Karr" McCluskey, assistant professor of computer science at Lehigh Valley, was named head of the engineering, business, computing and human development division. A native of the Philippines, she received her bachelor's degree from St. Scholastica's College in Manila and her master's degree from Ateneo de Manila University. She then came to the United States and earned her doctorate from Lehigh University, where she taught computer science. McCluskey also was a post-doctoral fellow at NASA Goddard Space Flight Center.

Great Valley interim appointment now a permanent one for CEO

Madlyn L. Hanes has been named campus executive officer of the Penn State Great Valley Graduate Center and associate dean of the Graduate School.

Hanes, who served as interim Great Valley CEO since March, joined the University in 1988 as director of academic affairs at the Delaware County Campus. From 1995-96, she served a dual role as director of academic affairs at Penn State Great Valley and Delaware County campuses.

Hanes, an associate professor of curriculum and instruction, has served a number of leadership roles in higher education, including a three-year post as chair of Penn State's Commission on Undergraduate Education from 1992-1995. Her international experience includes work with overseas American schools, ministries of education and higher educational institutions in Ecuador, Israel, Korea and Jamaica, and a special appointment to the University Council of Jamaica by the prime minister, among other roles.

Her scholarly interests include professional education and curriculum design. She is the author of two books, 30 articles and monographs and 20 technical reports to sponsors on program development and accreditation, and professional licensure. She currently serves on the state board of the Pennsylvania American Council on Education, and as one of Pennsylvania's three regional coordinators and delegates to the national office of women in higher education administration.

Hanes earned her Ph.D. in curriculum and instruction from the University of Florida, where she also earned her B.A. in English and her M.A. in speech pathology. She is a licensed speech-language pathologist with the American Speech-Language-Hearing Association.

Parallel appointments announced at Penn State Harrisburg

Lois Wenger Jordan is the new director of development at Penn State Harrisburg.

In a parallel appointment, former Penn State Harrisburg director of development Sandra Hafer Friedman has been named the college's first full-time alumni director.

The appointment of Friedman reflects Penn State Harrisburg efforts to build a stronger network with more than 18,000 Penn State Harrisburg alumni, according to John Bruhn, provost and dean for the college. A Lancaster resident, Jordan comes to Penn State Harrisburg following development positions at The Milton S. Hershby Medical Center and St. Joseph Hospital in Lancaster.

For the past 10 years, she has served as associate director in the Office of University Development at Hershey, where she was responsible for the first faculty campaign resulting in a 93 percent participation rate and \$1.3 million in gifts and pledges. She also directed the campaign for the medical center chapel, which raised \$400,000 and exceeded its goal by 25 percent. In addition, she established records for private contributions to the medical center.

Her responsibilities at the medical center also included service as alumni coordinator, during which time she revised the College of Medicine's

alumni constitution and bylaws, developed a mentor program, expanded day care and coordinated the reunion weekend and the presentation of the Alumni Fellow award.

Jordan founded the development office at St. Joseph, serving as its director from 1982 to 1987. She is a former schoolteacher, a graduate of Millersville University and has pursued graduate studies at the University of Edinburgh in Scotland and at Penn State.

Instructional specialist joins team at Penn State Shengano

David Kuskowski was recently appointed instructional specialist at Penn State Shengano. The position is associated with "Project Empower," the University's initiative for Commonwealth College campuses to enhance active and collaborative learning in the classroom through computers and telecommunications technologies.

As instructional specialist, Kuskowski will consult faculty on ways to enhance learning strategies and outcomes and provide support for the creation of multi-media and technology-based learning resources.

Kuskowski earned his bachelor's degree in education from Youngstown State University and previously held the position of academic adviser/admission's counselor at Penn State Shengano.

Penn State Erie gains athletics director

Brian F. Streeter, assistant athletics director at Hobart College in Geneva, N.Y., has been named athletics director at Penn State Erie, Behrend College, effective Aug. 1.

Streeter, who earned a B.S. in health and physical education from Texas A & M University and a master's degree in physical education from Ithaca College, has served as assistant athletics director and head coach for men's basketball at Hobart since 1984. He also has overseen summer programs at Hobart for the past five years.

Before his appointment at Hobart, Streeter served as interim athletics director at William Smith College, also in Geneva, and served two years as head men's and women's tennis coach and intramural director at Blinn College in Brenham, Texas. He has coached football, basketball and track.

Streeter is a five-time winner of the Schoenfeld Regional Sportsmanship Award given by the College Basketball Officials Association. In 1995, he took top honors for the same award nationwide.

Streeter was named Volunteer of the Year by the American Red Cross in 1993, and has served on the school board in Geneva, as well as on the board of Geneva's Boy's and Girl's Club. While at Hobart College, he developed the Rebound and Read program for young people, a program to help develop skills in reading through the sport of basketball.

Streeter will replace Herb Lauffer, longtime athletic director at Penn State-Behrend, who died in January. The new athletics director arrives at the college on the heels of a \$2 million endowment for the athletics program, as well as the release of \$10 million in funding for a new athletics recreation complex. Ground is scheduled to be broken for the complex in the summer of 1998.

Ag Progress Days has something for everyone

By JOHN WALL
College of Agricultural Sciences

Visitors can take a cutting-edge lawn tractor out for a whirl, participate in a high-tech agricultural quiz show or get a close-up look at insects at Ag Progress Days, sponsored by the College of Agricultural Sciences, Aug. 12-14.

This year's theme, "Pennsylvania Agriculture ... A Moving Force in a Changing World," focuses on the economics of Pennsylvania's farms. Ag Progress Days features more than 500 acres of educational and commercial exhibits at the University's Russell E. Larson Agricultural Research Center at Rock Springs, nine miles southwest of State College on Route 45. Hours are 9 a.m. to 5 p.m. Tuesday and Thursday, with extended hours on Wednesday from 9 a.m. to 8 p.m. Admission and parking are free.

Several new exhibits will explore the role agriculture plays in Pennsylvania's economy, as well as the opportunities to market Pennsylvania products on a national and international scale.

At the College Exhibits Building, visitors can see how a family-owned dairy farm, a transportation and trucking firm and a food processing company have changed and adapted to changing market conditions from 1940 to today. A farm finance demonstration, staffed by University faculty, will crunch the numbers in financial questions using a cutting-edge computer analysis program.

Visitors can participate in SciQ, played daily at 10 a.m. and 2 p.m. in the College Exhibits Building Theatre. A special version of the show for children, called SciQ Jr., is played daily at 11 a.m. and Wednesday at 6 p.m.

At the Pasto Agricultural Museum, visitors can examine items ranging from a vintage cream separator to an antique potato harvester and more.

Ag Progress Days' popular Insect Zoo in the new ImAGination Station will feature displays on good bugs and bad bugs, insect pests and such creeping attractions as large lubber

Family-oriented fun

Equestrian events are among the happenings that will appeal to people of all ages at Ag Progress Days. The event will be held Aug. 12-14.

grasshoppers, cockroaches and tobacco hornworms.

Storyteller Jan Kinney will perform in the College Exhibits Building Theatre every day at noon, creating tales from memory for up to 45 min-

utes. The Family Room offers visitors demonstrations on using the food pyramid to maintain a healthy diet. In addition, faculty will offer information on credit, financial management and financial life skills.

Getting there

What: Ag Progress Days
When: Aug. 12-14

Where: Russell E. Larson Agricultural Research Center at Rock Springs, nine miles southwest of State College on Route 45.
Admission: Admission and parking are free.

Another exhibit that will appeal to children and their parents is a display sponsored by Penn State's Students for the Responsible Use of Animals. Young calves, lambs, pigs and other livestock will be on display, and University students staffing the display will answer any questions.

Other family-oriented exhibits include equestrian events, educational displays and food booths offering culinary treats ranging from breaded mushrooms to University Creamery ice cream.

A variety of informative booths can be found at the Conservation Education Tent on West 11th Street on the Ag Progress Days site. Buses will depart from the tent each day to take visitors on various tours demonstrating conservation techniques.

Bus tours leaving from the corn crib throughout each day will illuminate Penn State's scientific work in potato research, integrated crop management, fruit and vegetable production and many other programs.

There will be free CATAs bus service all three days of the exhibition. The shuttle departs from the intersection of College Avenue and South Allen Street at 9:30 and 11:30 a.m. Aug. 13-15. On Aug. 14, when Ag Progress Days remains open until 8 p.m., there will be an additional departure at 2:30 p.m. Departure times for the return trip are at noon, 3 and 4 p.m. Aug. 13-15, with a 7 p.m. shuttle Aug. 14.

For more information, call (800) PSU-1010 through Aug. 15. Or visit Ag Progress Days on the Web at <http://www.cas.psu.edu/docs/CASHOME/APD/APD.HTML>.

25-year Awards

FIOLENA CRAMER

KENT A. CROSSLAND

GERALD K. RIGGART

AUGUST H. SIMONSEN

DORIS WRIGHT-COLDREN

J.L. DUDA

Observing 25 years of service at the University are, from left: Filomena Cramer, staff assistant VIII in the Department of Biochemistry and Molecular Biology at The Milton S. Hershhey Medical Center; Kent A. Crossland, maintenance foreman; Gerald K. Riggart, maintenance mechanic B; August H. Simonsen, campus executive officer; and Doris Wright-Coldren, former acting ODS coordinator, University Scholars adviser and English 4 testing coordinator, all at Penn State Fayette; and J.L. Duda, professor and head of the Department of Chemical Engineering in the College of Engineering.

UNIVERSITY PARK CALENDAR

On stage

Bradford Wallace is John Tarleton and Jacquelyn Poplar is Lina Szczepanowska in the Pennsylvania Centre Stage production of "Misalliance." The George Bernard Shaw comedy runs through July 26. For more information, call the Arts Ticket Center at (814) 863-0255 or (800) 278-7849.

SPECIAL EVENTS

Friday, July 25

Ice Cream "Divisions," 7 to 8 p.m., Creamery patio, The Dixie Lions Jazz Band.

"Misalliance," 8 p.m., Pavilion Theatre, Pennsylvania Centre Stage, through July 26. For tickets, phone (814) 863-0255.

"A Chorus Line," 8 p.m., The Playhouse, Pennsylvania Centre Stage, through Aug. 2. For tickets, phone (814) 863-0255.

Saturday, July 26

Jimmy Dorsey Orchestra, 7 p.m., Bryce Jordan Center. GSA Family Films, 8:30 p.m., Fisher Plaza, "Who Framed Roger Rabbit?"

Monday, July 28

Dance Aerobics "Divisions," 8 to 10 p.m., White Building.

Tuesday, July 29

Music at Noon: Fisher Plaza, Mick and the Mystics. GSA Explazaganza, 9 p.m., Fisher Plaza, "Breakfast at Tiffany's"

Wednesday, July 30

HUB Lawn Films, dusk, Mystic Pizza.

Thursday, July 31

Music at Noon: Fisher Plaza, Red Apple Juice.

Friday, August 1

Ice Cream "Divisions," 7 to 8 p.m., Creamery patio, Rich Victor Quintet.

Pennsylvania Centre State, "A Chorus Line," 8 p.m., Playhouse, through Aug. 2.

Saturday, August 2

GSA Family Films, 8:30 p.m., Fisher Plaza, "The Love Bug."

LECTURES

Thursday, July 31

Summer Science Seminars by Leonid Berlyand, 3:30 p.m. The Nittany Lion Inn.

CONFERENCES

Tuesday, July 29

Summer Science Seminars by Leonid Berlyand, 3:30 p.m. The Nittany Lion Inn.

Wednesday, July 30

"Topics in Number Theory" through Aug. 3.

Thursday, July 31

Advanced Conservation Leadership, Stone Valley, through Aug. 9.

Thursday, Aug. 7

"Microbial Structural Biology," through Aug. 9.

EXHIBITS

HUB Art Alley Cases, Art Alley Panels and Hall Cases

Mixed media of Susan Struble and Alice Ritti, through July 31.

Kern Cases

Jewelry by Evelina Francis, through July 27.

Kern Panels

Photos by John Mannion, through July 27.

Kern Tall Cases

Embroidery Guild exhibit, through July 27.

Palmer Museum of Art

"Making History: Historical Narratives in Pennsylvania Prints," through Aug. 31.

School of Visual Arts Photography Exhibition, through Sept. 14.

"Our Town: A Selection of Town Views from the Pennsylvania Prints," through Sept. 28.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://cac.psu.edu/calendar/>

Book Shelf

Thomas A. Hale, professor of African, French and comparative literature, and Stephen P. Belcher, assistant professor of comparative literature, are co-editors, with John W. Johnson (Indiana University) of *Oral Epics from Africa: Vibrant Voices from a Vast Continent* (Indiana University Press).

The anthology of excerpts from 25 African oral epics is the first volume of its kind to appear in print. Together, the texts represented in it refute the long-held view by scholars that the oral epic does not exist in Africa.

In the introductory chapter, the editors give readers both an overview of the African epic today and insights into current issues such as the evolving definition of the genre, ethno-specific terms for these long, poetic narratives and the existence of epics by women. A map marking the location of the epics, essays introducing the different ethnic traditions, an extensive bibliography and a detailed index help readers to place the diverse text in a comparative context.

Some of the epics in the volume are appearing in print for the first time, while many others have been accessible until now only in French. Nearly all of the texts were recorded during the last two decades and represent the work of a new generation of scholars in African literature. *Oral Epics from Africa* is the third volume to appear in the African Epic Series edited by Hale and Johnson for Indiana University Press.

The latest in a series of all-color, illustrated railroad histories from Jeremy F. Plant, professor of public administration and public policy at Penn State Harrisburg, is now in area bookstores. *Boston and Maine*, by Plant and Jeffrey G. Plant, features the photography of the authors along with contributions from 25 other photographers.

The 128-page, hardcover volume covers the history of the New England railroad in color pictures taken between 1939 and 1989. It traces the dramatic years of change on the Boston and Maine as it pioneered diesel freight power in the East, used steam power in Boston-area commuter service in the 1950s, and declined as a result of competition from roads and highways in the 1960s and 1970s.

The final section of the book notes the Boston and Maine's remarkable recovery from bankruptcy in the late 1970s and early 1980s, the takeover by the Guilford Corp., and the assumption of commuter service on B&M routes by the Massachusetts Bay Transportation Authority.

Beyond Instruction: Comprehensive Program Planning for Business and Education, written by William Rothwell, associate professor of education, and Peter Cookson, professor in the Centre for Distance Education at Athabasca University in Alberta, provides an overview of the program planning process for both new and experienced "directors of learning" in business, education and other organizational settings. The book outlines a systematic planning process that analyzes emerging planner roles and offers guidance for the full range of planning tasks — assessing needs, setting goals, monitoring effectiveness, supervising instructors, budgeting, promoting and recruiting. The book can be used as a how-to manual for those new to the field, or as a reference book for experienced trainers and educators.

Provost appoints data working group

In June, John Brighton, executive vice president and provost, appointed a "data working group" to explore opportunities to better support University-level decision making through the use of information and data analysis. P. Richard Althouse, budget officer of the University, and Louise E. Sandmeyer, executive director of the Center for Quality and Planning, are sponsoring this project.

The members will look at reports currently generated, how well significant University-level information needs are being met, how information crosses units and levels, opportunities for increased effectiveness and efficiency in data collection and analysis, and similar issues. Penn State already has important, related initiatives dealing with the University's operational electronic data bases (such as the data warehouse and the Executive Information System). The focus of this working group is on the use of high-quality, accessible information — from a variety of internal and external sources — to enhance understanding, planning and actions.

Michael J. Dooris, director of planning research and assessment, is chair of the data working group. Members include Robert W. Barlock (Quality and Planning); Leslie Frye and Donley Hogg (the Graduate School); Thomas Gesell (Affirmative Action); Cynthia Hall (University Relations); Edith C. Hertzog, Katherine B. Holsworth, and Richard D. Sheeder (Budget and Resource Analysis); Ronald E. Kreidler (Administrative Systems); Michael R. Laubscher (International Programs); Ralph Locklin (Undergraduate Education); Frederick D. Loomis (Continuing and Distance Education); Thomas A. Moore (Alumni Association); Robert E. Quinn, James J. Wager, and Mark Weaver (Enrollment Management and Administration); Susan R. Rankin (Educational Equity); Stephen R. Selfe (Human Resources); Donald T. Suit (Student Affairs); Kenneth E. Varcoe (Commonwealth College); and Jere J. Willey (University Development).

Faculty/Staff Alerts

Getting more through Broadcast News service

The University is a big place and dissemination of information can be difficult. A new University function called Broadcast News provides a solution.

The concept is simple. Broadcast News uses Web and e-mail technology to deliver news to the existing e-mail in-boxes of subscribers. Composed of various "channels," Broadcast News has two channels in operation: the GURU channel provides notification of changes to University policies and other documents and information available in GURU; the Travel Services channel provides news similar to that provided by the now defunct Travel Services bulletin board in EMC2.

To subscribe, a user initially must go to a Web site and register for each channel he or she wishes to receive. The user must provide a userid and password of their choosing, and e-mail address. The userid and password allow subscribers to change or cancel their subscription any time in the future. And a user may want to

receive news at more than one e-mail account. The user simply enters an additional subscription for additional e-mail accounts.

A channel directory is located at GURU.PSU.EDU/broadcast.html.

Bulletin published on soil climate regimes

The Penn State Agricultural Experiment Station, in cooperation with the USDA Natural Resources Conservation Service's Soil Quality Institute, has published Bulletin 873, "Soil Climate Regimes of Pennsylvania."

The Penn State Bulletin was authored by William J. Waltman, Edward J. Cielkosz, Maurice J. Mausbach, Mark D. Svoboda, Douglas A. Miller and Philip J. Kolb.

It includes a series of color soil temperature-moisture maps, other maps, weather station data and text.

The bulletin is available from the College of Agricultural Sciences, Mail Room, 112 Agricultural Administrative Building, Penn State University, University Park, Pa. 16802.

Penn College has majors accredited

The Accreditation Board for Engineering and Technology (ABET) has accredited Pennsylvania College of Technology's plastics and polymer engineering technology and surveying technology majors. ABET's Technology Accreditation Commission, responsible for engineering technology programs, performed the accreditation function.

The accreditation of plastics and polymer engineering technology, a bachelor's degree major, is one of only three ABET accreditations in the country. The other two accredited programs are at Penn State Erie, Behrend College and Pittsburg State University in Kansas.

Penn College's surveying technology major provides graduates with an associate of applied science degree. Both majors are under the School of Industrial & Engineering Technologies.

ABET is primarily responsible for monitoring, evaluating and certifying the quality of engineering, engineering technology and engineering-related education in colleges and universities in the United States.

Young artists

Children compare their masterpieces in the Castle Creation class at the HUB Center for Arts and Crafts, above. Students made castles, like the ones pictured at right, in the class, taught by Lisa Hill. For information on the variety of classes offered by the center, call (814) 863-0611.

Photos: Greg Grieco

Partings

Fayette bids farewell to four

The Penn State Fayette campus recently recognized four faculty and staff members who have announced their retirements.

Paul Agate has retired after 31 years of service at Penn State. Agate began his career as a physical education instructor and later held the positions of assistant professor of kinesiology and director of athletics, intramurals and recreation. He served as ombudsman and faculty representative to the alumni society and was the recipient of both the Outstanding Faculty Award and the Public Service Award.

Don Leapart has retired after 31 years of service at Penn State Fayette. After beginning his career as an instructor of accounting, Leapart eventually became professor of accounting and management information systems. He served as The Smell College of Business Administration's representative to the Faculty Senate and as chair of the Senate; was an active member of the Fayette campus Speakers Bureau; and served on various faculty committees. Leapart is a certified public accountant and a member of both P.I.C.P.A. and A.I.C.P.A. He assisted with the Fayette campus' basketball team for 26 years.

Nancy Treat has retired after more than 19 years of service at Penn State Fayette, where she served as assistant professor of human development and family studies. She served as the acting director of academic affairs, a member of the University Faculty Senate, chair of the Fayette Campus Faculty Senate and Health and Human Development College representative. During her career at Penn State, Treat received various research grants.

Doris Wright-Coldren has retired after 29 years of service. She began her career as a part-time English instructor and since then has served as Fayette campus' English teachers representative for the Commonwealth Educational System and as a member of the University Faculty Senate and chair of the Fayette campus senate. At Fayette, Coldren served as the coordinator for the Division of Undergraduate Studies, University Scholars Program, English 4 testing, and the Learning Enrichment Center, which she established. She received the OKSAF Research Grant in 1989 and numerous other awards throughout her career.

Maintenance worker served for 26 years

Robert W. Schroeder has retired from Penn State Altoona, after 26 years of service. Schroeder worked for Physical Plant as a maintenance worker.

ROBERT W. SCHROEDER

According to his supervisor, Schroeder was always flexible and willing to take on a job.

"Bob's retirement is his gain, but Penn State Altoona's loss. I always appreciated his candor and honesty — two attributes from which you can never retire," said Rick Wareham, his supervisor.

Several retire from University after many years of service

Sidney E. Barnard, professor of food science in the College of Agricultural Science, from May 1, 1964, to March 1.

Barbara F. Bernard, staff assistant V, University Libraries, from Jan. 28, 1965, to April 1.

Henry D. Bretherick, operations center coordinator, The Hershey Medical Center, from Jan. 17, 1972, to March 28.

Carole A. Brobeck, library assistant II, University Libraries, from Feb. 1, 1967, to April 1.

Betty L. Butler, residence hall utility worker, Housing and Food Services, from Jan. 3, 1983, to June 14.

Carol A. Crawford, campus health services nurse, Altoona campus, from Feb. 6, 1978, to June 16.

Martha M. Dailey, staff assistant VI, College of the Liberal Arts, from June 15, 1970, to May 31.

Mary Ann Dobransky, staff assistant VI at Penn State McKeesport, from Aug. 15, 1977, to June 1.

Marjorie A. Eakin, nutrition adviser, College of Agricultural Sciences, from June 16, 1980, to June 1.

Rosella F. Fetterolf, staff assistant IV, University Libraries, from Nov. 1, 1972, to April 1.

Virginia E. Fetters, press operator, in Business Services, from Sept. 23, 1966, to March 29.

Sandra L. Ficarro, staff assistant VI in Computer and Information Systems-Administrative, from April 1, 1965, to April 1.

Sue Y. Garber, staff assistant V at The Hershey Medical Center, from Feb. 27, 1984, to May 28.

W. Thomas Gingham, research support technologist III, Research and Graduate School, from March 1, 1983, to June 1.

Robert A. Guiser, senior computer specialist in Computer and Information Systems-Administrative, from Nov. 2, 1970, to April 1.

Gordon A. Hamilton, professor of chemistry, Eberly College of Science, from Sept. 1, 1966, to April 1.

D. Fred Horner, coordinator, equipment and stock room, Intercollegiate Athletics, from Sept. 25, 1967, to April 1.

Beverly M. King, staff assistant VIII, College of Education, from Jan. 13, 1975, to May 31.

Marianne V. Matich, staff assistant VI at Penn State Beaver, from July 1, 1983, to June 1.

Marion R. Miles, nutrition adviser in the College of Agricultural Sciences, from Jan. 5, 1981, to May 1.

Garin L. Moore Sr., assistant manager environmental services at The Hershey Medical Center, from Oct. 4, 1976, to May 1.

Thomas H. Obourn, senior extension agent in the College of Agricultural Science, from May 21, 1962, to May 1.

Gilbert R. Steele Jr., director of special projects in Computer and Information Systems-Telecommunications, from Jan. 3, 1984, to May 1.

Miriam R. Smith, staff assistant VI, Corporate Controller's Office, from Aug. 1, 1981, to May 31.

Kenneth L. Wood, cutting machine operator, Business Services, from Feb. 1, 1968, to April 27.

Promotions

Staff

Mary E. Litzinger, quality and planning consultant/facilitator in Office of the Executive Vice President and Provost.

Dayna R. Lowe, staff assistant VI in Business Services.

Jeffrey F. Luck, manager, Information Systems in Continuing and Distance Education.

Steven A. Maczuga, information administration Vice Provost and Dean for Enrollment Management and Administration.

Michelle A. Marquardt, staff assistant V in The Smell College of Business Administration.

James B. McGinley, network coordinator in Computer and Information Systems-Telecommunications.

Robert L. McLaughlin, senior communications engineer in Computer and Information Systems-Telecommunications.

Elaine M. McReynolds, conference planner at Penn State Great Valley.

Theodore A. Mellors, project coordinator IV at Penn State Fayette.

Mary A. Metz, administrative assistant I in The Smell College of Business Administration.

Kevin M. Moroney, assistant director, CBEL in Computer and Information Systems-Center for Academic Computing.

Ellen C. Moyer, administrative assistant II in Eberly College of Science.

Jack E. Moyer, manager, materials and cable assignment in Computer and Information Systems-Telecommunications.

Norma J. Muck, staff assistant V in

Continuing and Distance Education.

Todd E. Myers, network coordinator in Computer and Information Systems-Telecommunications.

Robert E. O'Connor, systems engineer II in Computer and Information Systems-Administrative Systems.

Mark F. Paige, senior network coordinator in Computer and Information Systems-Telecommunications.

Lauren M. Palmer, staff assistant VIII in Applied Research Laboratory.

Virgil N. Perry, counselor at Penn State Delaware County.

Awards

Authors awarded Rhone-Poulenc Prize

The General Prize in the 1997 Rhone-Poulenc Prize for Science Books, which has been described as the most prestigious prize for science writing in the English language worldwide, has been awarded to Alan Walker, distinguished professor of anthropology and biology, and Pat Shipman, adjunct associate professor of anthropology. The Penn State husband-and-wife team win approximately \$16,500 for their book titled *The Wisdom of the Bones: In Search of Human Origins*.

The award, which is sponsored by the British Science Museum, the Committee for the Public Understanding of Science (COPUS), and the Rhone-Poulenc company, honors the best popular science book written for the nonscientist reader and published in England during 1996.

The Wisdom of the Bones, published in the United States by Alfred A. Knopf and in England by Weidenfeld & Nicolson, has been hailed as a thrilling story about the day-to-day realities and higher goals of searching for the origins of modern humans. It tells the story of Walker's discovery in Kenya of the most complete skeleton ever found of *Homo erectus*, a species that proved to be an ancestor of modern humans. The book, selected from more than 80 entries, will be reprinted by Rhone-Poulenc and a copy will be sent to every university, college and high school in England.

PAT SHIPMAN

Mont Alto cites two for their outstanding service

Two Penn State Mont Alto staff members received awards for outstanding service to the campus.

Cathy Staggs, a member of the food service staff, received the Support Service Excellence Award. She has been with the Mont Alto staff for 11 years and resides in Greencastle.

Judy Mellott, program specialist for the Department of Continuing Education, received the Outstanding Service to the Campus Award. She has worked at the Mont Alto campus for 13 years and resides in Waynesboro.

Each year, an awards committee reviews a list of candidates who have been nominated by their colleagues for either the Outstanding Service to the Campus Award or the Support Service Excellence Award.

Penn College honors faculty for distinguished teaching

The Pennsylvania College of Technology announced 1997 Distinguished Teaching Awards. The highest level of college recognition for faculty, the "Master Teacher Award" was presented to **Dennis E. Fink**, assistant professor of horticulture. Receiving "Excellence in Teaching Awards" were **William B. Urosevich**, assistant professor of biology, and **Monica J. Lanczak**, instructor of food and hospitality/culinary arts.

Fink graduated from Penn College's predecessor, Williamsport Area Community College, in 1973 and began employment at the college in August 1974 as an instructor of horticulture. He was promoted to assistant professor in 1995. In addition to teaching, Fink formerly owned and operated a floral and greenhouse business for a number of years.

One of Fink's nominators stated, "He gives you the feeling you can reach your goals and believe in yourself. He treats everyone with a great deal of respect." The Master Teacher is chosen from nominees having at least six years of successful teaching experience and is representative of the best of faculty dedicated to providing the highest quality of experience for students.

Urosevich earned a bachelor of arts degree in chemistry from Wilkes University in 1976, a master of science in systems management from the University of Southern California in 1979, and a doctor of optometry from Pennsylvania College of Optometry in 1983. Urosevich also served in the U.S. Army. He began working at Penn College in August 1992 as a part-time, substitute

instructor of anatomy and physiology. He was employed full time as instructor of biology in August 1993 and promoted to assistant professor that same year. In addition to teaching, Urosevich is the senior partner at Urosevich Eye Associates, a primary care optometry practice in Lewisburg.

"I've never seen or been instructed by a more intelligent, enthusiastic or capable instructor," wrote one nominator of Urosevich.

Lanczak earned a bachelor of fine arts degree from Carlow College, Pittsburgh, in 1975. She received certification as a pastry cook in 1981 and certification as a pastry chef in 1984, both from the Los Angeles Trade and Technical College, American Culinary Federation Apprenticeship. A native of the Pittsburgh area, Lanczak previously worked as a pastry chef at a number of gourmet restaurants and hotels and also served as a culinary institute instructor. She began full-time employment at Penn College as an instructor of food and hospitality/culinary arts in August 1994.

The Distinguished Teaching Awards are sponsored by the Penn College Foundation, with the Master Teacher Award recipient receiving \$1,000 and the two Excellence in Teaching Award honorees each earning \$500. The Distinguished Teachers also receive the opportunity to work on special college projects.

Since 1982, 47 full-time faculty members have been honored for their excellence in teaching and outstanding service to students.

Faculty at Hazleton campus lauded for excellence

Dianna L. Bourke, assistant professor of biology at Penn State Hazleton, has received the 1997 George T. Bobby Excellence in Academic Advising Award. This award is given annually to a faculty member whose academic advising maintains the highest standards.

In addition, **Patricia D. Ferry**, instructor of medical laboratory technology and director of the Medical Laboratory Technology Program at Penn State Hazleton, received the 1997 Teaching Excellence Award from the Hazleton Education Council, the Campus Advisory Board. The council established this award in 1994 to recognize outstanding teaching.

Before assuming her current post at Penn State Hazleton in 1991, Bourke had been course director of the University of Pittsburgh's Department of Physical Medicine and Rehabilitation Residency Program since 1986. In 1985, she was an instructor of human microscopic anatomy at the Community College of Allegheny County.

Two earn kudos for teaching and research excellence

Penn State Beaver honored two faculty members for excellence in teaching and research.

John M. Simpson, assistant professor of chemistry, was awarded the Beaver Campus Advisory Board Teaching Award which recognizes outstanding classroom instruction. Simpson, who has been at Beaver campus for 27 years, was nominated by the students for his availability to them and for the clarity, enthusiasm and organization of his class presentations.

Chuntao "Chris" Wu, assistant professor of math-

Bourke received her B.S. in biology from Penn State and a Ph.D. in anatomy and cell biology from the University of Pittsburgh. She also completed two postdoctoral fellowships and a postgraduate research assignment at the University of California. She has received numerous research grants, published several abstracts and refereed a variety of biology articles.

Ferry has been a Penn State Hazleton faculty member since 1981, serving in her current capacity since 1987. She was previously a lecturer and coordinator of the Medical Laboratory Technology Program. Before joining Hazleton, she worked at St. Joseph's Hospital, Evangelical Hospital and Geisinger Medical Center.

Ferry earned a bachelor of science degree from Bloomsburg University and studied medical technology at Geisinger, where she became registered with the American Society of Clinical Pathologists. She is currently pursuing a master's degree in biology at Bloomsburg.

ematics, was awarded the Beaver Campus Advisory Board Faculty Research Award which recognizes excellence in scholarly research and creative activities. Wu, who has been at Beaver campus since 1992, received the 1994-95 Advisory Board Teaching Award.

Both Wu and Simpson have published in scholarly journals and delivered numerous presentations.

Since the origination of the awards, the Beaver Campus Advisory Board has honored nine faculty members with the teaching award and six faculty members with the research award.

Awards

Worthington Scranton honors three for outstanding service

Penn State Worthington Scranton campus recently announced awards for outstanding service, scholarship and teaching. Honored were Patricia Sweeney, Marilyn Daniels and the late Walter Weber.

Sweeney received the 1997 Gertrude Hawk Chocolates Award. Instituted in 1979 by then-company president Elmer Hawk, the award recognizes a member of the campus faculty or staff who exhibits outstanding performance and service in academic endeavors, co-curricular activities and service to the community.

Sweeney received her master of science degree in nursing from the State University of New York-Binghamton and bachelor of science in nursing from Wilkes University. In addition to serving as an instructor of nursing at the Worthington Scranton campus, Sweeney is a family nurse practitioner. A registered nurse since 1980, Sweeney served as a staff nurse at Community Medical Center's Emergency Department and was an instructor in its former diploma program.

Daniels, associate professor of communications, was awarded the Dr. and Mrs. Richard J. Matthews Award for Excellence in Scholarship. The award was established in 1988 by Dr. Richard and Sally Matthews to recognize outstanding performance in scholarship and research. Daniels received her bachelor of arts and master of arts degrees in communication from the William Paterson College of New Jersey and her doctoral degree in communication from New York University.

PATRICIA SWEENEY

MARILYN DANIELS

WALTER WEBER

Daniels joined the Penn State faculty in 1990. Before her appointment, she taught at Central Connecticut State University, the University of Charleston and the William Paterson College of New Jersey. Active at the state, regional and national levels of the Speech Communication Association, Daniels was awarded the association's 1993

Donald H. Ercoyd Emerging Scholar Award for her research on sign language and language acquisition skills in hearing children. She is the 1992 recipient of Penn State's Roy C. Buck Award, which was given to promote her study of the pedagogy of sign language. She received the Penn State Worthington Scranton Campus 1994 Pharmakon Award for outstanding performance in scholarship and research and 1996 Advisory Board Award for excellence in teaching.

The 1997 Campus Advisory Board Award for Excellence in Teaching was given posthumously to Weber, who served as an instructor of speech communications and theatre at the Worthington Scranton campus. Funded in 1988 by the Campus Advisory Board, the award recognizes a faculty member who has demonstrated innovative and dedicated teaching techniques in his/her academic endeavors.

Weber received his master's degree in theatre communications and bachelor's degree in theatre arts from East Stroudsburg University. He was a faculty member at the Worthington Scranton campus from 1982 until his death in February.

Associate professor named Sloan Research Fellow

The Alfred P. Sloan Foundation has selected Michael J. Natan, associate professor of chemistry, as an Alfred P. Sloan Research Fellow. The foundation awards 100 fellowships annually to faculty in the United States and Canada who are in the early stages of their research careers and who have exceptional promise to contribute to the advancement of knowledge in physics, chemistry, computer science, mathematics, neuroscience or economics.

Natan's research involves the development of chemical methods to make macroscopic materials from particles as small as 10 (superscript)-9 meters in diameter, known as nanoparticles. His work focuses on the self-assembly of single or multiple layers of gold (Au) nanoparticles, which have surface properties that affect the material's electrical conductivity, biocompatibility, and the absorption and reflection of light, among other properties. These surface properties are important for devices involving biological and environmental sensors, as well as for materials applications.

MICHAEL J. NATAN

Natan received his bachelor of science degree, cum laude, from Yale University in 1981 and his doctoral degree from the Massachusetts Institute of Technology in 1986. From 1986 to 1988 he was a National Institutes of Health Postdoctoral Fellow at Northwestern University and from 1988 until 1991 he was a joint post-doctoral fellow at Northwestern University. He joined Penn State as an assistant professor in 1991 and became an associate professor in 1996. He received the Beckman Young Investigator Award in 1994.

Begun in 1955, the Sloan Research Fellowship Program is one of the oldest fellowship programs in the nation. Sloan Fellows receive highly unrestricted grants of \$35,000 for a two-year period, with which they are free to pursue whatever lines of research inquiry are of most interest to them. According to the foundation, this flexibility often is of great value to young scientists who are at a pivotal stage in establishing an independent research program.

English professor wins inaugural Lion Heart Award

Leonard Mustazza, professor of English and director of academic affairs at Penn State Abington, has been named the first recipient of the Lion Heart Award by Abington's Class of 1997.

LEONARD MUSTAZZA

The award, created to honor someone who "has added to the life of the Abington campus and ... expresses the spirit and integrity of the Pennsylvania State University," was given at Abington's spring commencement.

Mustazza was described by members of the class as "bright, competent, generous, tough, fair, creative, approachable, productive, insightful, tenacious, compassionate and understanding."

Mustazza joined the University in 1983 as a lecturer in the department of English at Penn State Opotuz (now Penn State Abington). He was granted early tenure and promoted to associate professor in 1989, and was named professor in 1991. In 1992, he was named campus director of academic affairs.

A prolific author, Mustazza has written, co-authored or edited seven books and more than 25 scholarly papers, won several University teaching awards including The George W. Ahterton Award for Excellence in Teaching, and has played a pivotal role in shaping Penn State Abington. Mustazza received his Ph.D. in English from The State University of New York at Stony Brook.

Center director named Entrepreneur of the Year

John E. Werner, director of Penn State's Ben Franklin Technology Center of Central and Northern Pennsylvania (BFTC/CNP), has been named Entrepreneur of the Year in the Support of Entrepreneurship category in the 1997 Central Pennsylvania Entrepreneur of the Year Awards Program. As an award winner, he is now eligible to compete for the National Entrepreneur of the Year awards in November.

The awards program recognizes successful entrepreneurs and those who encourage entrepreneurs.

As head of BFTC/CNP, Werner is responsible for implementing Pennsylvania's Ben Franklin technology-based partnership program in a 37-county region. The BFTC/CNP invests matching funds in the development of new or improved products and processes with start-up, small and medium size Pennsylvania manufacturing and technology-based companies.

A Penn State graduate with B.S. and M.S. degrees in metallurgy, Werner also has been honored with ASM International (the Materials Information Society) Chapter Awards, the Bradley Stoughton Award and the David Ford McFarland Award for outstanding contributions and achievements in metallurgy. He also is a Penn State Centennial Fellow of the College of Earth and Mineral Sciences.

Penn Staters

Robin Becker, associate professor of English, has won the 1996 Lambda Literary Award in Poetry for her collection of poems, *All-American Girl*. *All-American Girl*, Becker's fourth collection was published by the University of Pittsburgh Press as part of its Pitt Poetry Series.

The Lambda Awards, administered under the aegis of the Lambda Literary Foundation, recognizes excellence in gay and lesbian publishing by mainstream, university and small presses. In its ninth year, the awards involve a three-tier selection process. A list of nominees is assembled from ballots sent in by readers. This year, nearly 50,000 ballots were distributed nationally in all categories.

Robert Bernheim, professor of chemistry, was appointed chairman for Chemical Sciences by the National Research Council Associateships Program. He also serves on the advisory committee for the Associateships Program. The objective of the program is to provide postdoctoral scientists and engineers of unusual promise and ability opportunities for research on problems, largely of their own choice, that are compatible with the interests of various federal laboratories. Indirectly, the associateships make available to the broader scientific and engineering communities the research facilities that exist in federal laboratories.

John W. Black, associate executive director of the Penn State Alumni Association and editor of the *Football Letter*, received the 1997 Lion's Paw Medal Award. The medal honors those who have contributed notable service to the University.

John Comerford, associate professor of dairy and animal science, received the Industry Service Award from the Pennsylvania Cattlemen's Association.

Dennis K. Davis, professor of communications, has been granted a Fulbright to attend a seminar on German media and communication science. This group seminar examines the political, economic and social institutions of Germany, including the five new states in Eastern Germany, in light of their recent history and current development.

Irwin Feller, director of the Institute for Policy Research and Evaluation and professor of economics, gave an invited paper on "Relationships Between Universities and the Private Sector in the Transfer of Technology" at the Eisenhower Exchange Fellowship Conference on "Public and Private Sector: Lessons from Worldwide Experiences," Alicante, Spain.

Richard M. Fox, professor of psychology at Penn State Harrisburg, presented three invited talks on "The Treatment of Severe and Challenging Behavior" in the United Kingdom. The talks were sponsored by St. Andrews University in Scotland and Keele University in England and were delivered in Glasgow, St. Andrews and Staffordshire, England.

Penn State's Urban and Community Forestry Program received the 1997 Volunteer Program National Award in the Sponsored Volunteer Service category. The program is administered by **Henry Gerhold**, professor of forest genetics; **Bill Elmendorf**, instructor in urban and community forestry; **Vincent Cotrone**, urban forester based in Luzerne County; **Julianne Schiefer**, urban forester based in Monticomey County; **Mark Remeck**, urban forester based in Washington County; and **Scott Sjolander**, urban forester based in Crawford County.

Elizabeth Hanley, associate professor of kinesiology, has been elected as president of the National Folk Organization (NFO) of the United States, for a two-year term.

Pu-qi Jiang, director of orchestras, and **James Lyon**, associate professor of violin, were recently guests of the National Music Conservatory/Noor Al Hussein Foundation in Amman, Jordan, where Massimo Jiang conducted an orchestral performance and Lyon was featured as soloist in the Max Bruch Concerto in G minor. In addition, they both conducted master classes for conservatory faculty and students.

Amir Khalilollahi, assistant professor of mechanical engineering at Penn State Erie, Behrend College, authored a technical paper with mechanical engineering seniors **John Gardner**, **Paul Gunshore** and **James Kuhn**. The paper, "Modeling for Design of Swaging Dies," was presented by Khalilollahi at the IASTED/ISMM International Conference on Modeling and Simulation.

Mehdi Khosrowpour, associate professor of information systems at Penn State Harrisburg, delivered several talks, speeches and seminars.

He was keynote speaker at the 1997 Arab Business Conference in Kuwait City, Kuwait, where he spoke on "The Role of Information Technology and Globalization of Arab Businesses." He also conducted a seminar on "Information Technology and Global Strategic Planning" at the University of Wollongong, Sydney, Australia; delivered an invited talk on "The Human Side of Information Technology Management" at the University of Massey, Auckland, New Zealand; and conducted a seminar on "The Role of Information Technology in Formulation of Global Business Strategies" at the University of Auckland, Auckland, New Zealand.

Max King, coordinator, University Scholars Program, and affiliate assistant professor of education, has been elected to the Board of Governors of the National Conferences on Undergraduate Research. NCUR brings together more than 2,500 undergraduates involved in scholarly and artistic activities.

Robert LaPorte Jr., professor of public administration and political science in the Department of Political Science, gave an invited paper on "In Pursuit of Good Governance: Political Developments in Pakistan—50 Years of Independence, Progress, Problems and Prospects in Washington, D.C." The conference was sponsored by the Woodrow Wilson International Center for Scholars.

Cynthia Zelfi Massie, assistant professor of health care administration and policy at Penn State Harrisburg, has been elected president of the Aging Politics and Policy Group within the American Political Science Association.

Eve Munson, assistant professor of communications, was selected by the Association for Education in Journalism and Mass Communication (AEJMC) and the Freedom Forum Media Studies Center to participate as a teaching fellow in a weeklong seminar in Bloomington, Ind.

Masatoshi Nei, Evan Pugh professor of biology and director of the Institute of Molecular Evolutionary Genetics, has been elected as an honorary member of the Japan Society of Human Genetics for his "important contributions to human and evolutionary genetics."

Nei is the founding director of the Institute of Molecular Evolutionary Genetics, an interdisciplinary organization that fosters research on the evolution of genes and organisms. He is a world leader in evolutionary biology and has helped shape the way in which the field of molecular population genetics and evolution has developed.

Robert E. Newnam, associate director of the Intercollege Materials Research Laboratory, has been named Distinguished Life Member by the trustees of the American Ceramic Society. The award was given in recognition for his pioneering research on ceramic composites and their application as "smart" materials and devices; for his "exceptional guidance of students; and for his devotion to international scientific exchange and cooperation."

B. Allan Quigley, associate professor of education, recently received the 1997 Kenneth J. Matran Leadership Award, given by the Commission on Adult Basic Education. The award is considered the highest award in America for work in the field of adult literacy and basic education.

The American Ceramic Society inaugurated a new annual lecture, "Frontiers of Science and Society Rustum Roy Lecture," named after **Rustum Roy**, Evan Pugh professor of the solid state, Intercollege Materials Research Laboratory. The new lectureship recognizes Roy's active role for more than 30 years in the science and society field.

Michael Silsbee and **Barry Scheetz** from the Intercollege Materials Research Laboratory (IMRL), were recently honored by the Pennsylvania Environmental Defense Foundation for the contributions of the Materials Research Laboratory in the reclamation of Babb Creek, Tioga County (1990-1997). The Pennsylvania Department of Environmental Protection has identified Babb Creek watershed in Tioga County as part of Pennsylvania's efforts under the Appalachian Clean Stream Initiative program. **Dean Arnold**, assistant professor of aquatic ecology in the Pennsylvania Cooperative Fish and Wildlife Research Unit at Penn State, was also honored. Arnold has been working with Pennsylvania's Task Force on Dirt and Gravel Roads to reduce the environmental impact of mining activity on roads.

Jerome D. Williams, associate professor of marketing in The Smear College of Business Administration, has accepted a two-year appointment as a visiting senior fellow at the National University of Singapore (NUS). NUS is the country's major research university and Williams will conduct studies on the effects of culture on long-term business relationships and strategic alliances. In addition, he will teach global marketing at the graduate and undergraduate levels, and in the NUS executive education programs as well.

Rita Williams, college health nurse at Penn State Erie, Behrend College, was recently awarded the St. Anne Medal, the highest award in Girl Scouts. The medal was given in recognition of her contribution to the spiritual development of Girl Scouts.

Sam Y. Zamrik, professor of engineering mechanics, was appointed to the American Society of Mechanical Engineers' delegation, which visited Russia on May 19. Zamrik chaired the symposium on life assessment of aged structural components of nuclear power plants, and presented a talk on testing methods and modeling of remaining structural life.

Research

When tested, drivers will defend their parking spaces

By Vicki Fong
Public Information

As you get into your car at the shopping mall, you notice a car waiting to take your parking space. You hurry to get your keys out and drive away. But that's not true in most cases, according to researchers.

"Most people think they leave faster, but in reality, they take more time to leave when another car waits near their space," said researcher Barry Ruback, professor of sociology and crime, law and justice. "And if the other driver honks the horn, people will really slow down their departure just to occupy the parking space a little longer."

The response is called territorial behavior, which involves marking or defending a location in order to indicate a particular place. This behavior is likely to occur if the place has desirable resources such as game for hunting.

"Like our ancestors, we humans still defend territories, but we do so even when they are temporary public areas," Ruback said. This study shows that people demonstrate this response even when the parking space no longer has value for them. People appear to do it merely to prevent another driver from possessing the space.

"Even though people were observing the parking space, departing drivers

Research by Barry Ruback, professor of sociology and crime, law and justice, has shown that people tend to be possessive regarding public parking spaces — even when they're ready to exit the space.

Photo: Greg Grieco

took longer when someone else wanted the space than when no one else wanted the space," the sociologist said. "This reaction is counterproductive because it takes more time and the driver's goal was to leave the space anyway."

"But our research shows that people do become territorial in the face of another driver and

become even more territorial when the driver acts very intrusively, such as honking the car horn," Ruback said.

He and Daniel Jueng conducted three studies in a parking lot at a metropolitan mall.

First, the researchers and a team of students observed 200 departing cars and compared reactions of drivers who were

Barry Ruback

and who were not intruded upon by another car. Then the researchers conducted an experiment with 240 cars by alternately sending in cars and introducing intrusions like honking. Then, they asked 100 individuals to fill out questionnaires about how they would behave under such conditions.

"Respondents saw themselves as more polite than others with regard to a silently waiting driver, but less polite than others with regard to a honking driver," Ruback said. "But their actions did not support their stated beliefs."

One possible explanation is that people were distracted by the waiting car and became more cautious, leaving the space slowly to avoid a collision with the other car. But a honking car should actually then prompt people to leave even faster, and they don't. In fact, people spend even more time making their exit, Ruback said.

Researchers to study the spread of rabies

A team of Penn State and Commonwealth researchers are beginning to track the spread of rabies in Pennsylvania with an eye to limiting the distribution of this disease. "Rabies is an emerging public health issue," said Toni Miles, professor of biobehavioral health and director of the Center for Special Populations.

"Pennsylvania Department of Health data indicates that raccoon rabies

has increased from no cases in 1981 to more than 300 cases in 1996."

This epidemic poses a significant risk to domesticated animals and ultimately to humans. An estimated 15,000 people in Pennsylvania are bitten by animals every year. Some of these bites are inflicted by unvaccinated domesticated animals. Others are from wild animals such as raccoons.

"Although raccoon-transmitted rabies has not

yet been responsible for human deaths, the cost of post-exposure rabies treatment in humans and the cost of domestic animal control are considerable," said Miles.

In the U.S., post-exposure treatment ranges from \$1,500 to \$5,000 per person treated.

The Center for Special Populations in the College of Health and Human Development is sponsoring this initiative. The Penn

State team is headed by Dale Moore, research associate in veterinary science, and includes George Vogler, associate professor of biobehavioral health and associate director of the Center for Special Populations; Donna Pequet, professor of geography; and Peter Gould. Evan Pugh professor of geography. The Pennsylvania departments of health and agriculture will participate in the study.

Keep your cookout safe from food-borne illness

Beware of barbecue bacteria! With the grilling season well under way, and the smell of cookouts a constant, don't let food poisoning spoil your dinner. Along with outdoor cooking comes the high risk of food-borne illnesses.

Stephen Knabel, associate professor of food science, warns that food-borne illnesses peak between May and August, with the highest incidence among children 4 years old and younger. He urges parents to ensure safe cooking of "raw animal products and other foods that can harbor bacteria, the major cause of food poisoning."

The hamburger, a major culprit of food poisoning, should be cooked until its center isn't pink and its juices run clear.

Some other tips suggested by Knabel include:

- Keep hot foods hot and cold foods cold.
- Never eat undercooked meat.
- Keep raw meat, and anything that touches it, separate.
- Chill leftovers immediately.

Symptoms of food-borne illness include stomach pain, nausea, vomiting, diarrhea, headaches and fever.

It's more than just a pretty garden

How does your garden grow? Maybe not with bluebells and cockshells, but hopefully with blooming flowers. If not, stop by the Penn State Horticulture Trial Gardens for some knowledge and inspiration.

The Trial Gardens, a part of Penn State since 1933, serve as an All-American Selections testing site which provides gardeners with the opportunity to determine which plant varieties are best suited for their home gardens. The Trial Gardens, at the corner of Bigler Road and Park Avenue on the University Park campus, are open all year from 9 a.m. to dusk. Interested gardeners can join Friends of the Gardens, a public support group.

Obituary

Senior administrator dies unexpectedly

Jack P. Royer, senior associate dean of the Commonwealth Education System, died July 17 while on his way to work. He was 49.

He was driving near the University Park campus when his vehicle swerved off the road and hit some signs. Police said Royer most likely died of natural causes, and not from the minor traffic accident.

Royer joined the University in 1987 as director of academic affairs at Penn State Fayette and later moved to University Park as associate dean for undergraduate education. In 1991, he was named senior associate dean of the CES and was involved with the restructuring of the CES that became official on July 1.

Royer graduated with honors from Penn State in 1969 with a bachelor's degree in forest technology. He received a master's degree in environmental systems management from American University in 1973 and a doctorate in natural resources from Cornell University in 1980. Before joining Penn State, he worked as a photographer for the U.S. Army and then became assistant professor and acting director of the Center for Resource and Environmental Policy Research at Duke University.

In addition to his duties with the University, Royer was active in State College Little League, coaching the State College National tournament team.

Royer is survived by his wife, Patricia, and two children.

Associate professor finds new species

From the Eberly College of Science and the National Oceanographic and Atmospheric Administration

A team of university scientists has discovered what appears to be a new species of centipede-like worms living on and within mounds of methane ice on the floor of the Gulf of Mexico, about 150 miles south of New Orleans.

Although scientists had hypothesized that bacteria might colonize methane ice mounds, called gas hydrates, this is the first time animals have been found living in the mounds of frozen water and natural gas.

The discovery of dense colonies of these

one-to-two-inch-long, flat, pinkish worms burrowing into a mushroom-shaped mound of methane seeping up from the sea

TO LEARN MORE

To learn more about the find, go to the Web at www.bio.psu.edu/fishermain.html

floor raises speculation that the worms may be a new species with as yet unknown influence on these energy-rich gas deposits.

Using a minisubmarine, scientists observed the worms using their two

Search for dean of largest college turns to World Wide Web for help

By LISA M. ROSELLINI
Public Information

As the University moves through its reorganization, the task of finding a leader for its newest and largest college—which is spread from one end of the state to the other—has been a challenge that only technology could overcome.

The search for a dean for the Commonwealth College has hit the Web and, so far, seems to have conquered the first hurdle in the geographic gap that is a hallmark of this new 12-campus entity.

For the first time in its history, Penn State is conducting an online search to fill a position—a top-level one, no less. As the principal academic leader and campus executive officer, the person in charge of the Commonwealth College will oversee the dozen Penn State campuses from Beaver, near Pittsburgh, to Worthington Scranton, in the northeast, and Delaware County in the southeast, with an enrollment of more

than 14,000 students and a budget of about \$60 million.

"The sheer nature of this position, overseeing a college that is so geographically dispersed, called for a search committee that was also geographically dispersed in order to represent the many interests of the campuses involved," said John Bruhn, chair of the search committee and provost and dean of Penn State Harrisburg. "Posting the information on candidates to the Web where only committee members could view it has worked very well."

With the help of the Center for Academic Computing, Human Resources and the Office of Budget and Resource Analysis, a Web site for the 12-member committee was set up so that information like curriculum vitae and references could be downloaded to their computer desktops, eliminating copying and mailing costs and expediting the search process.

To submit a question for this column, please send e-mail to the address listed below. Submissions must include a contact name and telephone number so that *Intercom* can verify the source. Requests for anonymity will be honored.

Q: I'm often dodging bicycles on University sidewalks. I know bicycles are not allowed on State College sidewalks and I feel much safer! Why do I have to dodge bikes on campus (and skateboards and rollerblades)?

— Out of Breath at University Park

A: Bicyclists are prohibited from using the sidewalks on campus and this regulation is routinely enforced by University Police Services. While we prohibit bicycles being ridden on sidewalks, we do encourage the use of bicycles as a mode of transportation to and from campus, as well as on campus. In doing so, we have recognized the need to develop a north/south bikeway across campus. Currently, bicyclists travel on Burrows, Shortridge and Bigler roads to get from College Avenue to Park Avenue. Last year, a bicycle path was completed from College Avenue to Pollock Road. In the near future, another is scheduled from Park Avenue to Curtain Road.

In the meantime, we will continue to enforce the regulation prohibiting bicycles on sidewalks. If we become aware of specific conflict areas which are safety hazards, we detail more resources to the areas to provide enforcement, education and solutions.

Skateboards are specifically prohibited on campus because of the damage which results from their use. Rollerblades, however, may be operated on pedestrian walkways, but not on streets or in buildings. Copies of the regulations are provided to everyone who registers a bicycle. They are available in the HUB, Kern, the Parking Office and at each parking kiosk location.

— David E. Storrer
Assistant vice president for safety
and environmental services

Q. Who is responsible for maintaining the bike path that parallels College Avenue along the golf course, from Rider Mazda past O.W. Houts? If the University wants to encourage employees not to drive, it would help to have a safer bike path.

— Peter Kaufman
Applied Research Laboratory
University Park

A: The University certainly does encourage bicycle commuting and has created many routes on campus. The route in question has been designated as a "recreational jogging trail" and as such, is not funded for bicycle trail maintenance by the Office of Physical Plant. Penn State is developing a new Campus Master Plan for University Park and the committee will look at many areas, including bicycle transportation. The committee's recommendations will determine official bike routes for West Campus. We certainly agree on the need for proper and well-maintained bike paths and we will implement as many as possible as funding becomes available.

— Paul D. Ruskin
Office of Physical Plant

Spend a Summer Day

About 5,500 visitors — high school seniors and their families — visited University Park over July 21, 25, 28 and Aug. 1 for Spend a Summer Day, an annual event designed to provide information about the University and give prospective students a taste of campus life. Here, Lew Jiling explains to parents and students the benefits of attending Penn State.

Photo: Greg Grieco

Online

continued from page 1

Edith Hertzog, finance and business systems coordinator in the budget office, said the normal procedure during a search of this type is for committee members to come to Old Main to pick up information packets or attend meetings. Conducting the search in the same manner, however, for such a widespread committee would have forced the process to go longer than its planned December deadline. Hertzog got involved because her office recently posted to the Web the University's operating budget — an expansive document that required some ingenuity to allow it to be viewed by the Web-surfing public. Through the use of Adobe Acrobat, free software that can be downloaded from the company's site, both the operating budget and the information on potential dean candidates could be viewed.

Hertzog said the one difference between the operating budget information and the candidate's information is that the budget was already in a text format, making it easier to post and obtain. Although the original call for nominees and applications for the dean's position asked candidates to submit information via e-mail or on disk, all 65 applicants who applied submitted most of their information on paper, leaving CAC to scan the forms creating larger files.

"There were more than 500 pages that could have been accessed and most of the information ended up being scanned images, so there were some issues in terms of access time," Hertzog said. "We got a lot of positive comments from committee members but the size of the files was a major issue. If we use the same technology again, we will divide the information into multiple files to decrease the time it takes to download."

Bruhn said the file sizes were so large in some instances that some committee members' computers could not hold the information. Those "glitches," as Bruhn called them, have been ironed out and committee members are now reviewing a short list of

information on about 10 to 12 applicants.

"This has been convenient and a real time saver. I'd recommend this type of search to anyone," Bruhn said. "We plan to begin scheduling interviews with people in September, with the idea that we will have a list of about four names to submit to John Brighton by late October or early November."

Applicants for the job ran the gamut from a former college president to Penn State deans and department heads, according to Bruhn who said the position attracted a "fair number of internal nominations" and higher education administrators from "all sectors of the United States."

"Geographically, the applicants have come from all over the United States and we had one from a university abroad," Bruhn said. "Some candidates are Penn State alumni and former faculty members, too. We have an excellent mix of male, female and underrepresented groups. This job is broad in scope and kind of a new venture that drew a lot of people with interdisciplinary skills into the pool."

Bruhn said he has been surprised so far at the group consensus in paring down the list of applicants to the dozen who "made the cut."

"People had a pretty good idea in their minds of what they were looking for," Bruhn said.

And what is the committee looking for?

"Someone who has had experience working with more than one campus because we need someone who can bring these 12 campus locations together conceptually and spiritually," Bruhn said. "Innovative, creative and sensitive to diverse student needs."

Bruhn also said someone with strong interpersonal skills would be needed to deal with the many different personalities in the various regions of the state.

The search committee chair acknowledged that the physical location of the Commonwealth College — all over the Pennsylvania map — will prove to be a challenge to anyone who accepts the job, but that new technology has managed to clear the first hurdle in bringing people together. The committee's goal is to name a new dean — one who can galvanize the campuses' efforts — by the end of the year.

Ice worms

continued from page 1

rows of oar-like appendages to move about the honeycombed, yellow and white surface of the icy mound. The researchers speculate that the worms may be grazing off bacteria that grow on the methane or are otherwise living symbiotically with them.

"The old view that the deep sea bottom is a monotonous habitat needs to be discarded. These worms are the major players in a new and unique marine ecosystem," said Charles Fisher, an associate professor of biology at Penn State and the expedition's chief scientist, who discovered the methane ice worms in waters 1,800 feet deep with sub pilot Phil Santos of the Harbor Branch Oceanographic Institution.

The scientists also have managed to keep a number of the exotic worms alive in shore-based laboratories for further study.

"These are not just another common worm in the mud," Fisher said. "We now know that these higher-order organisms can live right on methane hydrates. If these animals turn out to be ubiquitous on shallow seafloor gas deposits, they could have a significant impact on how these deposits are formed and dissolve in seawater and on how we go about mining or otherwise harvesting this natural gas as a source of energy."

"It's very cool that while we're busy speculating about life on other planets we continue to discover new forms of life in the most unlikely habitats on Earth," said Erin McMullin, a Penn State graduate student and a member of the research expedition that discovered the methane ice worms.

Methane ice, a gas hydrate or compound, forms naturally at the high pressure and low temperature of the deep sea, but is usually buried deep in marine sediment. The Gulf of Mexico is one of the few places where hydrate can be found exposed on the ocean bottom. Occasionally this seeping, solid methane bursts through in mounds, often six to eight feet across. Here on the ocean bottom, scientists also find fields of tubeworms, beds of mussels and clams, and even pools of brine surrounded by millions of mussels.

The first leg of the 10-day expedition, which ended July 19, was carried out aboard the Harbor Branch Research Vessel Edwin Link and sponsored by the National Oceanographic and Atmospheric Administration's National Undersea Research Center at the University of North Carolina at Wilmington and the Minerals Management Service of the U.S. Department of the Interior. In addition to Fisher, principal investigators included Jan MacDonald of Texas A&M University, Robert Carney of Louisiana State University, Steve Macko of the University of Virginia, and Alissa Arp and David Julian of San Francisco State University.

and chief scientist for the expedition

New University photo ID cards coming

By KAREN I. WAGNER
Public Information

Get ready to break out your best cheesy grin — Penn State's new photo ID cards are coming soon.

Photo appointments for all Penn State faculty, staff and students will be scheduled throughout the academic year, beginning this fall. The new cards, produced on campus via a digital imaging system, will offer a host of additional "smart card" service options including banking, stored value and long-distance calling, in addition to library and meal service and residence hall security.

"Penn State is negotiating a contract with a local financial institution," said Tom Gibson, assistant vice president for auxiliary services and chairman of the

University ID committee. Gibson said that included in the many features, card holders may eventually access their personal financial account using their ID card.

The new ID cards will use 16-digit identification numbers instead of Social Security numbers. For students, the card could put an end to lines at the Bursar's Office. University grants and loans could automatically be applied to ID card accounts. Faculty and staff could deposit their paychecks and use their ID as a debit card.

Downtown businesses will be participating along with laundry, vending and copy services on campus. Eventually, Centre Area Transportation bus fares and parking fees could be included.

The University ID committee has had wide representation

including Penn State's Office of Business Services, University Libraries, Intercollegiate Athletics, University Safety, faculty and student groups. The committee will be making a series of presentations to interested groups on campus this fall.

Throughout fall and spring semester, faculty, staff and student photos will be captured. A pilot program to test the smart card "chip" will start this fall in residence hall laundries. Faculty and staff at all Penn State locations can expect to receive their cards later in the spring, after program testing and development is completed.

Information on scheduling photo appointments will be announced through Intercom. For more information, contact Joel Weidner at (814) 863-4494.

Rural nursing centers receive \$270,000 boost

The School of Nursing in the College of Health and Human Development has received a \$270,000 gift from the Independence Foundation of Philadelphia to continue the operation of rural nursing centers in an innovative partnership with Home Nursing Agency (HNA). The foundation provided funding to establish the project in 1995.

The joint venture between Penn State and HNA has led to the opening of two nursing centers in rural Pennsylvania, one in Mount Union and one in Port Matilda. In

addition to providing direct, preventive health care and health education for rural residents, the nursing centers involve Penn State students in community and family evaluations, development and promotion of health-related programs, flu immunizations, and outreach to schools, churches, civic groups and local health and human service agencies.

"The Rural Nursing Centers are an example of Penn State know-how at work in the community and of the kind of successful partnership that benefits the citizens of our state," said Barbara Shannon, dean of the college.

The initial success of the project, as an innovative model of health care delivery, was recognized recently by Sigma Theta Tau International through its Archaon award. The new grant will support further development of the centers over the next two years, including the expansion of services and client contacts, and the development and implementation of a comprehensive outcomes evaluation plan.

Tax plan

continued from page 1

of Representatives and the Senate came up with their own versions of expansive tax bills that greatly affected higher education. In addition to providing more than \$30 billion in a variety of education-related tax incentives, the House bill also included a provision to tax for the first time faculty, staff and students who receive a tuition waiver.

The compromise tax legislation does not impose a tax on the tuition waivers. In addition, it also restores for three years a tax-code provision that allows workers to deduct from their taxable income up to \$2,500 a year in undergraduate study financed by their employers.

Negotiators for the House and Senate began meeting in July to try to reconcile the differing tax bills. By July 25, Congress had agreed to kill plans for the tax on tuition waivers. Graduate students across the nation led the charge to preserve the tuition waivers, saying the proposal would have added thousands of dollars to their tax bills and discouraged many students from pursuing graduate and professional degrees.

President Clinton is expected to some time this week sign the bill which, for the first time since

The compromise tax legislation does not impose a tax on the tuition waivers. It does, however, repeal TIAA-CREF's tax-exempt status.

1969, balances the federal budget. According to the White House Web page, this budget plan is the largest investment in higher education since the G.I. Bill in 1945 and spells out a net savings of roughly \$900 billion over 10 years.

However, the compromise plan still includes some unfavorable provisions for higher education, like the section which repeals the tax exemption status for the Teachers Insurance and Annuity Association-College Retirement Equities Fund (TIAA-CREF). As higher education's biggest pension provider, TIAA-CREF predicted that the loss of its non-profit status could cut the retirement income of educators by as much as 3 percent to 5 percent annually.

The move to phase out TIAA-CREF's tax-exempt status adds about \$300 million in federal revenue a year.

LECTURES

International Spanish theatre symposium set for Sept. 18-20

An international symposium on 20th-century Spanish theatre will be held Sept. 18-20 at The Nittany Lion Inn on the University Park campus. The symposium, sponsored by *Estrenio*, the journal of contemporary Spanish drama, will focus on the state of research in Spanish drama at the turn of the century and on new directions for investigation and criticism.

Titled "Entre Actos: Diálogos Sobre Teatro Español Entre Siglos," the meeting will bring together scholars and critics from both sides of the Atlantic to present their perspectives in these areas. Among the plenary speakers are Spanish playwright Josep Maria Benet i Jornet, Jerónimo Mozo, executive secretary of the Association of Spanish

Playwrights, Paloma Pedrero, Fermín Cabal and José María Rodríguez Méndez.

Some 60 other critics and professors from Spain, Poland, Germany, England, Canada and New Zealand will speak in concurrent sessions.

Events open to the general public include a photography exhibit by Candace Leonard of Wake Forest University in the Kern Gallery from Sept. 11 through Oct. 19 titled "Focusing: 20th-Century Spanish Playwrights." Performances in English and Spanish, of three short plays by Paloma Pedrero will be held Sept. 20 at 8 p.m. in the Pavilion Theatre.

For more information on the symposium, contact Martha Halsey, editor of *Estrenio*, at (814) 865-4252.

Blasting conference to serve as statewide forum on Nov. 13-14

The latest products and practices in the blasting industry will be reviewed at "The Eighth Pennsylvania Blasting Conference," Nov. 13-14 at the Penn State Conference Center Hotel.

The conference, serving as a statewide forum, will provide continuing education for licensed blasters, suppliers and other professionals involved in drilling, blasting and explosives. Participants will examine new products and practices for cost savings, improved fragmentation, vibration control, improved safety and regulatory compliance. This conference will feature a major exhibit of products and services available to the blasting industry.

The conference is a continuing and distance education service of the Department of Mineral Engineering and the College of Earth and Mineral Sciences, the Mid-Atlantic Chapter of the International Society of Explosives Engineers (ISEE) and the Pennsylvania Department of Environment Protection.

For program information, contact Jeffery Kohler at (814) 863-4491. For registration information, contact Chris Schultz at (814) 863-5130. For more information, call (800) 778-8632, or visit the Web at <http://www.cde.psu.edu/Mining>.

Rural zones of Near East to be topic of Aug. 29-30 Jewish Studies conference

"Dogpatch: Rubes, Hicks & Hillbillies in the Ancient Near East," is the title of a Jewish Studies Conference to be held Aug. 29-30 at The Nittany Lion Inn on the University Park campus.

The conference, which features a variety of speakers from around the country, will focus on the inhabitants of the rural zones in the ancient Near East. Among

the subjects to be discussed will be the peripheral populations at the dawn of state formation in Mesopotamia; the archaeology of the hinterland at the time of Israel's emergence in Canaan; and textual evidence for the inhabitants of rural and fringe zones in ancient Israel.

For more information, contact the Jewish Studies Program at (814) 863-8939.

Program shows students choices, introduces them to mentors

Noisy chatter fills the room as the "employees" start to meet their production goal of 50, folded, paper flying "Frisbees" in 30 minutes. Laughter and assurances that this job is "a piece of cake" reign, as the cutters start cutting paper to specifications. The folders fold components, the assemblers fold the components together, and the finishers color circles. Thirty minutes later, 36 Frisbees have been completed, only two of which meet the meticulous "client's" standard for quality.

The client announces that he will place future orders with an overseas company. The room is silent as the employees realize their factory is bankrupt and their jobs are gone.

Mentors from Eastman Kodak Co. then lead these "employees"—actually students of color currently participating in Penn State's BEST (Business, Engineering, Science and Technology) Summer Scholars Program—through the problems they encountered in the factory simulation. The mentors help the students discover and understand possible

solutions and the ramifications for their factory and employees. The exercise is designed to teach team-building skills, as well as introduce the students to industrial production line dilemmas, such as employee motivation and productivity.

Twenty-six minority students from Pennsylvania and New York are currently participating in the BEST program on campus, which ends Aug. 9. BEST is sponsored by the Eastman Kodak Co. in Rochester, N.Y.; along with The Smeal College of Business Administration; the Eberly College of Science; and the colleges of Engineering, and Earth and Mineral Sciences.

Participants in the four-week summer program attend math, communications and computer classes each weekday morning. Their afternoons are spent in a variety of educational activities like the "Flying Frisbee Factory" simulation, as well as science and engineering laboratory experiments, attending seminars to explore digital photography or college life, and touring University attractions. Evening

and weekend activities include recreational events.

In addition, a three-day field trip to the Kodak plant exposes the students to career choices as they shadow their Kodak mentor. According to Samuel Wilson, systems analyst for Kodak and a BEST mentor, Kodak sponsors the program to bring in new minority engineers to the company.

"We feel these employees enhance the level of ingenuity, inquisitiveness and resourcefulness in the field of engineering and in our company," he said.

Founded in 1990, the BEST program has produced positive results for both Penn State and Kodak. As of fall 1996, 38 percent of the BEST participants have enrolled at Penn State, and Kodak has hired several former BEST participants as interns and full-time employees.

"Our relationship with colleges is changing," Edwin Garcia, director, diversity initiatives for Kodak, said. "Our company is the customer who hires a college's product—its

Up for the challenge

Lilly Anna Manzur (left) from Philadelphia and Elizabeth Linsey of Rochester, N.Y., listen as Samuel Wilson, a systems analyst for Kodak, talks about working as a team during the BEST Summer Scholars Program, which ends Aug. 9.

graduates. We want to influence the outcome and make sure that the product meets our expectations."

News in Brief

Health Matters programs

The EAP and the Health Matters division of Penn State's Office of Human Resources are offering the following programs for faculty and staff. To register, contact Jan Hawbaker at 865-3085 or JQH3@psu.edu. Cost: None.

Friday, Aug. 15:

■ **The Secret of a Positive Attitude and Humor** — 8:30-9:30 a.m.; 125 Reber Building

■ **Dealing with Difficult People** — 10-11 a.m.; 125 Reber Building.

Stressed or anxious?

Most people worry, but for some, worrying is excessive, uncontrollable or overwhelming. The Stress and Anxiety Disorders Institute is conducting an ongoing research study which offers free therapy if:

1. You have experienced excessive and uncontrollable worry or anxiety for at least six months.

2. When worried or overly anxious, you also experience muscular tension, restlessness, irritability or sleep disturbance. You also may have difficulty concentrating, are easily fatigued and feel keyed up or on edge.

With Michelle Newman, assistant professor of psychology, as the principal investigator, subjects (ages 18-65) will receive free psychotherapy as well as assessments before and after treatment. A brief telephone interview will determine the suitability of this program for you. Strictest confidentiality is maintained. If interested, call (814) 863-0115 and leave a message saying you are interested in the anxiety study.

Panic attack study

You are bothered by panic attacks? The Stress and Anxiety Disorders Institute is conducting an ongoing study which offers free therapy if:

1. You have experienced at least four panic attacks in the past month with symptoms including, but not limited to, shortness of breath, rapid heartbeat, trembling and sweating.

2. These symptoms peak in less than 10 minutes.

3. At least one attack is unexpected. At least one attack is followed by one month or more of worry about having another attack, worry about implications of the attacks or behavior change as a result of the attacks.

With Michelle Newman, assistant professor of psychology, as the principal investigator, subjects (ages 18-65) included in the study will receive free psychotherapy as well as assessments before and after treatment. A brief telephone interview will determine the suitability of this program for you. Strictest confidentiality is maintained. If interested, call (814) 863-0115 and leave a message saying you are interested in the anxiety study.

Students test drive Gov. Ridge's \$127 million technology initiative

By KAREN I. WAGNER

Public Information

Click, click. Tap, tap, tap... You don't even have to ask Chris Freeman what he thinks about the Internet. His steady gaze and furrowed brow give you your answer.

But, ask this 11th-grade Germantown native what he thinks about Link-to-Learn — Gov. Tom Ridge's \$127 million initiative to link Pennsylvania schools via the Internet — and he's got plenty to say.

"Textbooks get old — this is always new. The computer has everything and there's no limit to what you can do," Freeman, who cruises Link-to-Learn's Internet site like a seasoned pro, said. Freeman, who is participating in Penn State's Upward Bound Math and Science program this summer, knows how to save images and sound bytes and how to create "hyperlinks" to new Web sites. He knows how to download "plug-ins."

Link-to-Learn's professional development project, officially opening its virtual doors to the Commonwealth's 100,000 teachers in the fall of 1997, will provide computer training and curriculum resources to help teachers effectively integrate technology into their classrooms and lesson plans.

Kyle Peck, associate professor of instructional systems at Penn State, heads up the team of developers who are busy piecing together a collection of case studies, online discussion groups and activities that will enable Pennsylvania teachers to swap best practices. They can even guide their students through virtual tours of the White House and the Grand Canyon.

Freeman would like to see Link-to-Learn computer resources in his Germantown classroom back home. His theory: "Messing around with computers is fun. Kids would want to go to class!"

But how does he think his own teacher would react if the textbooks disappeared and she was forced to deal with this ever-changing technology?

"Oh, she'd have to be taught how to use it," he admits. "But once she got used to it, it would be easier for her."

Teachers across the Commonwealth will get plenty of help. The Link-to-Learn team has developed six tutorials and two workshop leader's guides that will be distributed to Pennsylvania's teachers via 30,000 CD-ROMs and a Web site. By using these resources, teachers can learn to use the Internet and integrate its resources in the classroom.

Teachers and students can even

Learning the ropes

Dean Dryer, a member of the Link-to-Learn advisory board and residence hall coordinator for Upward Bound Math and Science, helps 11th grader Chris Freeman navigate the Internet.

Photo: Greg Grieco

publish their work on the Internet. The Link-to-Learn professional development team will publish 325 of its own "Quick Success Lessons." Peck's goal is to model effective uses of networked computer technologies in the classroom — and to serve as a springboard for teachers, hosting online conversations that will help teachers think and grow together.

"Many teachers are beginning to understand the importance of integrating technology into the classroom, but they're not sure where to start," said Mark Toci, Penn State doctoral student and senior instructional designer for Link-to-Learn. "We are going to provide the starting point and be there to support them as they grow and mature as users of technology."

Peck, Toci and other members of the development team worked closely with a steering committee of educators throughout the Commonwealth, and they have met with state representatives on a regular basis, to keep the governor apprised of their progress. Teachers will be asked to contribute their comments on an ongoing basis.

"We really see it becoming a meeting place for teachers," Toci said. "A community where teachers can share ideas and work together to become more effective teachers."

Freeman needs no convincing. His experience with Upward Bound, part of Penn State's Academic Assistance Program for Undergraduate Education, has already given him the opportunity to design his own Web page and learn how to do library and Internet research — skills that will be an asset to him when he's looking into post-graduation job prospects. Upward Bound Math and Science encourages high school students, from schools with limited budgets and limited access to computers, to consider college-level study in math and science.

Freeman wants to go to college and study computer programming. He hopes to own his own business one day. How would he, as a future programmer, rate Gov. Ridge's Link-to-Learn project?

"I'd definitely give it an 'A,'" he said. "It's easy to use and it's good all around."

In addition to public schools, Link-to-Learn also will be accessible through Pennsylvania libraries and communities through a series of networks called the Pennsylvania Education Network (PEN). Explore some of the educational resources available, and visit the Link-to-Learn Web site at: <http://L2L2L.psu.edu>

Appointments

Smeal names faculty fellow

Anne Beatty, a member of the accounting faculty in The Smeal College of Business Administration, has been appointed the Coopers & Lybrand Faculty Fellow.

Beatty came to The Smeal College in 1995 from the University of Pennsylvania's Wharton School, where she had taught for four years. Before her academic career, she was an auditor and tax consultant for one of the major accounting firms.

She began her studies at the University of Chicago, earning a bachelor's degree in 1982 and an MBA in 1983. Her Ph.D. in accounting is from MIT's Sloan School of Management.

Pursuing research interests in the economic effects of accounting and other topics, Beatty has written articles for a variety of professional journals. She has presented her work at numerous conferences and seminars, and is a reviewer for several journals.

Beatty has served as the faculty representative to the Big 10 Doctoral Consortium and the faculty adviser for the Deloitte and Touche Case Study Program. She has been a member of the Accounting Department Advisory Committee, the Accounting Department Faculty Recruiting Committee and The Smeal College Faculty Advisory Committee.

In addition to the Coopers & Lybrand faculty fellowship, Beatty has received a Smeal College faculty research grant, SEC Financial Reporting Institute grant, Wharton Financial Institutions Center grant and University of Pennsylvania Research Foundation grant.

New department head appointed for Health Policy Administration

S. Diane Brannon, professor of health policy and administration in the College of Health and Human Development, has been appointed head of the Department of Health Policy and Administration. She had served as interim head since July 1996 replacing Frederick Eisele who returned to teaching and research in the department.

Brannon has been the professor in charge of the HPA doctoral program since 1994. She teaches undergraduate and graduate courses focusing on organizational management and long-term care administration. Her research interests include long-term care management, quality improvement in nursing homes and organizational design. She was awarded the 1994 Research Award of the Foundation of the American College of Health Care Administrators.

She is a member of the Academy of Management, the Gerontological Society of America and the American College of Health Care Administrators.

Brannon received her doctorate in human service studies from Cornell University, and an M.S.S. from Bryn Mawr College, School of Social Work and Social Research. She received her bachelor's degree in sociology from Winthrop University.

Hazleton appoints director of C&DE

Sally A. McGuire has been named director of continuing and distance education at Penn State Hazle-

ton. McGuire will be responsible for administering and overseeing Hazleton's continuing education credit, non-credit, certificate and public service programs. She will work closely with area business and civic leaders to devise strategies for addressing the educational needs of the local community.

McGuire joins Penn State Hazleton after a 16-year career with King's College, Wilkes-Barre, where she had served as director of the Lifelong Learning Center since 1984, and previously as a recruiter and academic adviser. She also gained experience as an administrative secretary in the marketing and sales division of EMC&E Corp., White Haven.

A graduate of King's with a bachelor of arts degree in government and a minor in English, McGuire also completed graduate credits at Marywood College and the University of Scranton.

Active in professional organizations, McGuire is a charter and founding member of the Luzerne County Council on Adult Higher Education, a board member of the Educational Opportunity Center, the moderator of Alpha Sigma Lambda, King's College Alpha Omega Chapter, honor society for students in continuing higher education; and also a member of the Northeastern Pennsylvania Industrial Resource Center; and many other professional groups.

Arts and Architecture adds director of development

Robert L. Mothersbaugh has been appointed director of development for the College of Arts and Architecture.

Mothersbaugh will direct fund-raising and advancement programs for the college's academic departments and the University Arts Services, which includes the Center for Performing Arts and the Palmer Museum of Art.

A 1987 Penn State alumnus and former assistant director of annual giving at Penn State, Mothersbaugh rejoins the University after seven years working in private liberal arts colleges.

He was formerly campaign director at Gettysburg College, which completed an \$83 million capital campaign in 1993. He became chief advancement officer at Lycoming College. While there, he managed a \$25 million capital campaign for endowment and capital improvements to the Williamsport institution.

Mothersbaugh has spent more than a decade in fund raising for higher education and is professionally certified by the National Society of Fund-Raising Executives. He is also an active member of the Council for the Advancement and Support of Education.

Director of outreach comes on board at Shenango campus

Jane Muldoon has been appointed director of outreach and academic program coordination at the Shenango campus.

As the director of outreach, Muldoon will be responsible for all non-credit programs, as well as

JANE MULDOON

off-campus credit and certificate programs. In addition, she will assist the academic affairs director in the implementation of the new Weekend College, program accreditation, institutional assessment and research.

Previous to her new position, Muldoon was the acting director of continuing education at Penn State Shenango for two years and a coordinator in academic affairs for the last several years. Muldoon has been with Penn State Shenango since 1985.

Auditing authority gains professorship in Smeal College

Jane Mutchler, a nationally recognized authority in auditing, has been appointed to the Arthur Andersen Professorship in The Smeal College of Business Administration.

A member of The Smeal College faculty since 1991, Mutchler previously taught at the University of Arizona and The Ohio State University. She holds B.A. and M.Acc. degrees from the University of South Florida and a Ph.D. from the University of Illinois.

Mutchler, who held the Coopers & Lybrand faculty fellowship at Penn State for three years, is the Ph.D. adviser in The Smeal College's Department of Accounting and a member of the Departmental Advisory Committee and the 150-hour Curriculum Committee. She is chair of the Research Colloquium, the Special Task Force to Review the Ph.D. Program and the Recruiting Committee. She is also a member of Penn State's University Fellowship and Awards Committee.

Mutchler is a member of the editorial boards of *Auditing: A Journal of Practice and Theory*, *Contemporary Auditing Research* and *Accounting Horizons*. She is also associate editor of *Accounting Horizons*.

Mutchler has been active in the American Accounting Association (AAA) for more than 10 years, serving in numerous capacities in the auditing section, most recently as president. In addition, she was involved in the organization's management accounting section, the 1990 Corporate Accounting Policy Seminar Committee, and the New Faculty Consortium. Last year, she was chair of the AAA's Doctoral Fellowship Committee.

She has been a member of the Board of Research Advisers of the Institute of Internal Auditors for the past four years and also is a member of the American Institute of Certified Public Accountants.

JANE MUTCHLER

ROBERT L. MUTHERSBAUGH

Appointments

Assistant director of development for Libraries comes on board

Cynthia Asmus has been named the assistant director of development for the University Libraries. In this new position, she will work to identify potential donors and seek support for the pressing needs of the Libraries in the upcoming Capital Campaign.

Asmus joins Penn State from the State College YMCA, where she served for eight years as executive director overseeing a volunteer board of directors, full- and part-time staff members and more than 500 volunteers. Before this, she worked as a program director at Shaver's Creek Environmental Center.

Asmus received a bachelor of science degree in physical education/health from the University of Oregon and a master of science degree in environmental education from Indiana University in Bloomington.

Beaver appoints acting CEO and acting director of academic affairs

Gary B. Keefe, director of academic affairs at Penn State Beaver, has been named acting Beaver campus executive officer, effective July 1. Keefe replaces Dennis M. Travis, who resigned effective July 1. Travis served as the Beaver campus CEO since July 1995. A national search for the CEO will begin this fall.

In addition, Donna J. Kuga, associate professor of kinesiology and athletic director, has been named acting director of academic affairs at the Beaver campus.

Before his arrival at the Beaver campus one year ago, Keefe held the position of interim associate

CYNTHIA ASMUS

GARY B. KEEFE

dean of the College of Engineering and Technology at the University of Nebraska-Lincoln. He also served as vice chairman of the Department of Civil Engineering and was an associate professor in civil engineering. Keefe also has taught at West Virginia University. He holds a Ph.D. from West Virginia University, where his major was environmental engineering and minors were chemistry and chemical engineering. He is a registered professional engineer in Nebraska and was awarded graduate faculty fellow status at the University of Nebraska in 1991.

Keefe is the recipient of the Glen L. Martin Best Paper Award, Civil Engineering Division, American Society for Engineering Education; the Charles B. Dudley Publication Award, ASTM; a West Virginia University Foundation Fellowship Grant for Outstanding Students; and the Phi Kappa Phi Honorary Society Award. He is a member of the Water Environmental Foundation, the American Society for Engineering Education, and the American Society of Civil Engineers. In addition, he has served on numerous committees and his research topics over the years have focused on water and waste water issues and industrial pollution.

Kuga holds a bachelor's degree in health and physical education from Penn State, a master's degree in administration in physical education and athletics from Slippery Rock University, and a doctorate in administration and policy studies in higher education from the University of Pittsburgh. She has been a member of the Beaver campus faculty since 1981 and was appointed director of athletics, intramurals and recreational sports in 1996. Kuga has authored and co-authored more than 20 articles which have appeared in a variety of professional journals and has presented papers at numerous technical and professional meetings throughout the country.

She has served as editor of the *Pennsylvania Journal of Health, Physical Education, Recreation and Dance* and as an editorial board member of the *Journal of the National Intramural-Recreational Sport Association*. In 1995 she received the Outstanding Academic Adviser Award from the Beaver Campus Student Government Association and in 1993 she received the Beaver Cam-

DONNA J. KUGA

pus Advisory Board Research Award, in addition to other awards. She is a member of the American Alliance for Health, Physical Education, Recreation and Dance; the Pennsylvania Association for Health, Physical Education, Recreation and Dance; the National Intramural-Recreational Sports Association; and the North American Society for Sports Management. She also serves as a member of the Beaver Campus Diversity Strategic Planning Committee and the Campus Executive Officer's Council.

In addition to her teaching and scholarly pursuits, Kuga has coached several women's athletic teams.

College of Engineering finds replacement for director

Anita Todd has been appointed director of the Engineering Cooperative Education Program in the College of Engineering, following the resignation of Garth Molschenbacher. She had served as the program's associate director since October 1995.

As director, Todd supervises the cooperative education personnel who work to recruit and train students and to develop relationships with potential employers. She also develops policies and procedures for the program. In her new role, Todd plans to cultivate a system for the co-op program to assist engineering alumni in seeking post-graduate placements.

Todd made many significant contributions to the co-op program while serving as associate director. In addition to restarting Penn State's chapter of Kappa

ANITA TODD

Theta Epsilon — the engineering co-op honor society, she initiated a system of including Commonwealth campus students in the co-op program at University Park.

A 1989 graduate of Penn State with a B.S. in mechanical engineering, Todd was a member of the first class able to use the College of Engineering's co-op program. Through the co-op, Todd was placed as an intern at Walt Disney World in Florida, and Cummins Engine Co. Inc., in New York. She was employed for several years by Cummins and served on the co-op's advisory board before returning to Penn State as assistant director. Todd is currently pursuing an MBA.

Partings

Staff assistant opts for travel after 33 years

Joan Brooks, staff assistant to the assistant dean of undergraduate and summer programs, in the College of Education, has retired after 33 years of service at the University.

For 22 years, Brooks helped coordinate curricular affairs for the college's undergraduate programs, and organize commencements, oversee budgets and undergraduate summer programs.

Brooks started her career with the University in the College of Engineering, working as a receptionist in the dean's office, and then in the mechanical and electrical engineering departments.

She later worked as a staff assistant in the Eberly College of Science for the associate dean of research, and in the Office of Environmental Affairs before joining the College of Education.

Brook's husband, Daniel, also recently retired from his position as assistant manager of the Department of Audio-Visual Services, after 34 years of service at the University. With their newly purchased motor home, the Brooks plan to spend time traveling. This year they will visit Alaska, Florida and Arizona.

Longstanding employees retire

Paul B. Agate, assistant professor of exercise and sports science, Fayette campus, from Sept. 1, 1966, to June 30.

Yildiz H. Akin, senior statistical analyst, College of Agricultural Sciences, from Feb. 11, 1974, to June 30.

Priscilla H. Allison, assistant professor of speech, Wilkes Barre campus, from Sept. 1, 1965, to June 30.

Carol M. Ames, staff assistant V, College of Earth and Mineral Sciences, from Jan. 21, 1961, to July 1.

Frank G. Bamer Jr., advanced engineering aide, Applied Research Laboratory, from March 1, 1984, to June 28.

Jack H. Barton, programs specialist in Undergraduate Studies, Schuylkill campus, from Jan. 1, 1969, to June 30.

ARTS & ENTERTAINMENT

AT PENN STATE

Community Arts Center events continue

The Community Arts Center in Williamsport, part of Penn College, kicked off its 1997-1998 Performing Artist Series on Aug. 4. The Arts Center is celebrating its fifth full year of the arts with a 15-event season titled "New Traditions" at the 2,165-seat, fully restored venue.

Events include: "The Legends of New Orleans;" Tracy Byrd; Bill Cosby; "42nd Street;" Kathy Troccoli; Kathy Mattea; Schoolhouse Rock Live!; Western Opera Theatre performing "Carmen;" Phillips, Craig & Dean; A Judy Collins Christmas; "West Side Story;" "Damn Yankees;" Paul Anka; The Flying Karamazov Brothers and "How To Succeed in Business Without Really Trying."

For tickets or additional information, please call the Community Arts Center Box Office at (814) 326-2424 or (800) 432-9382.

"Man of La Mancha"

Man of La Mancha, a musical that combines the comic eccentricities of the fictional figure Don Quixote with a moving account of the adversities that beset his creator, Miguel de Cervantes, will run at Berks Festival Theatre in Reading through Aug. 10.

The production, a program of Penn State Berks-Lehigh Valley College, is the second for the new Berks Festival Theatre's premiere season and features professional actors, directors and designers on the stage in the Perkins Student Center.

Performances are scheduled for Aug. 7-10. Weeknight and Saturday performances are held at 8 p.m., Sunday performances are scheduled for 2 p.m. Ticket prices range from \$10 for students with valid identification to \$16 for adult weekend night performances. Call the 24-hour ticket hotline at (800) 450-5502 for tickets and information. The Perkins Student Center is located on Penn State Berks campus.

Student art auction

An exhibition and public auction of student art work is taking place in the newly opened Soho Underground gallery beneath Manhattan Bagel, 232 West College Ave. in downtown State College. All proceeds will benefit the Centre County Woman's Resource Center.

The donated work was produced by students enrolled in the ARCH 121 and ARCH 297D visual communications courses taught by Richard Alden, assistant professor of architecture. All bidding ends Aug. 28. For more information, call Alden at (814) 865-3682.

"State Fair" tickets on sale now

The Center for the Performing Arts has added three performances of "State Fair," starring John Davidson, to its fall line-up. The family musical will be performed at 8 p.m. Sept. 4 and 5, and at 2 p.m. Sept. 7 in Eisenhower Auditorium on the University Park campus.

"State Fair," adapted from a 1942 Rodgers and Hammerstein film musical, is a happy, heartwarming musical about a family's adventures at the Iowa State Fair. The Penn State performances will launch the national tour of the production.

Davidson, best known as a host of talk and game shows, will return to the role of Abel Frake. He originated the role in the musical's 1996 Broadway production.

Tickets are on sale now. Special children's prices are available. For ticket information, phone (814) 863-0255.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Tuesday, August 12
Ag Progress Days, Larson Agricultural Research Center, through Aug. 14.
Friday, August 15
Brooks & Dunn and Reba McEntire, The Bryce Jordan Center.

CONFERENCES

Sunday, August 10
Orion, through Aug. 15.
Monday, August 11
AFSCME 13, The Nittany Lion Inn, through Aug. 14.
American Bearing Manufacturers — Introductory course, Penn State Conference Center Hotel, through Aug. 15.
Rotary Wing Technology, The Nittany Lion Inn, through Aug. 15.

Thursday, August 14
Innovate or Die! — education innovations in engineering, science and applied fields, Penn State Conference Center Hotel, through Aug. 15.
Sunday, August 17
Orion — Fall II, through Aug. 22.

EXHIBITS

Palmer Museum of Art
"Making History: Historical Narratives in Pennsylvania Prints," through Aug. 31.
School of Visual Arts Faculty Exhibition, through Sept. 14.
"Our Town: A Selection of Town Views from the Pennsylvania Prints," through Sept. 28.

For a full listing of University Park activities, including sporting events, go to the Web at URL <http://cac.psu.edu/calendar/>

Aug. 8 - Aug. 21

Obituaries

Everett Alderman, associate professor of psychology, College of the Liberal Arts, from June 1, 1947, until his retirement Jan. 1, 1970; died May 7 at the age of 94.

Oscar W. Briggs, Lions Den attendant, Housing and Food Services, from Sept. 19, 1957, until his retirement Jan. 10, 1970; died May 19. He was 92.

Harold E. Byers, head of utilities division, Maintenance and Utilities, from Feb. 1, 1929, until his retirement April 1, 1968; died June 2 at the age of 89.

John H. Ferguson, professor of political science, College of the Liberal Arts, from Sept. 1, 1934, until his retirement July 1, 1967; died May 12. He was 89.

Anna E. Hostler, janitorial worker, University Health Services, from Sept. 9, 1968, until her retirement June 30, 1983; died May 21 at the age of 76.

Yee-haw

John Davidson recreates his original Broadway role of Abel Frake in Rodgers and Hammerstein's "State Fair," playing Sept. 4, 5 and 7 in Eisenhower Auditorium on the University Park campus as part of the Center for Performing Arts series. For more information, call (814) 863-0255.

Faculty/Staff Alerts

President's radio call-in program on Aug. 21

Higher education's efforts to prepare graduates for the global economy and community of the 21st century are the subject of the next edition of "To the Best of My Knowledge," President **Graham B. Spanier's** monthly call-in program on public radio station WPSU-FM (90.1, 91.5 & 106.7), airing at 7 p.m. Thursday, Aug. 21.

Joining President Spanier for a discussion of how best to infuse an international perspective into the academic programs of the nation's colleges and universities will be **Beverly Lindsay**, Penn State's first dean of the University Office of International Programs.

Listeners with opinions or questions about the internationalization of higher education are invited to call 1-800-543-8242 during the one-hour program. Internet users worldwide will be able to link to sound and pictures from the program at www.psu.edu/uc/tech/tech.html; and they will be able to submit questions and comments via e-mail to response@psu.edu.

Hosted by Patty Satalia, "To the Best of My Knowledge" is a series designed to explore topics of concern to higher education and to allow listeners a chance to communicate directly with Penn State's president.

Award nominations sought

The Penn State Alumni Association is seeking nominations for the 1998 Philip Philip Mitchell Alumni Service Award, which is given each year to an alumnus, alumna or friend of the University who has contributed generously to the enhancement, growth, development and improvement of Penn State.

The award consists of certificate, a plaque prominently displayed in the Alumni Lounge with the name of each year's recipient and a cash gift to the University for a purpose designated by the recipient. In 1980, the Board of Trustees established the award to honor "an outstanding alumnus, alumna or friend who has made a significant contribution to the University."

No current trustees or distinguished alumni of the University are eligible. Nominations may be sent to **Rayna Wendell**, Penn State Alumni Association, University House, University Park, Pa. 16802-1439. The deadline for nominations is Nov. 28. For more information or a copy of the Philip Philip Mitchell Award nomination form, contact Wendell at (814) 865-6517.

Libraries Intercession hours

University Libraries on the University Park campus will follow the following

schedule during Intercession Aug. 10-26:

■ **Pattee Library**, Architecture Library, Earth and Mineral Sciences Library, Education Library, Engineering Library, Mathematics Library and Physical Sciences Library:

Sunday, Aug. 10	Closed
Aug. 11-15	8 a.m. to 5 p.m.
Aug. 16-17	1 to 5 p.m.
Aug. 18-22	8 a.m. to 5 p.m.
Aug. 23-24	1 to 5 p.m.
Aug. 25-26	8 a.m. to 10 p.m.

*Historical Collections and Labor Archives, Interlibrary Loan, University Archives / Penn State Room, Pattee Copy Center and the Rare Books Room will keep regular semester hours during this time.

■ Hours for the Music Listening Room:

Aug. 10	Closed
Aug. 11-26	1 to 5 p.m.

■ Pollock Library

Sunday, Aug. 10	Closed
Aug. 11-14	8 a.m.-midnight
Aug. 15-16	8 a.m.-midnight
Aug. 17-21	8 a.m.-midnight
Aug. 22-23	8 a.m. to 10 p.m.
Aug. 24-26	8 a.m.-midnight

Fall semester hours will begin at all libraries on Wednesday, Aug. 27. For more information on hours of library service, call (814) 865-3063, type HELP HOURS when using the Library Information Access System (LIAS), or visit the Libraries' home page at <http://www.libraries.psu.edu>.

Ag Progress Days

The annual Ag Progress Days, featuring more exhibitors and the latest in agricultural advances, is again set to make its appearance at the Russell E. Larson Agricultural Research Center near the University Park campus on Aug. 12 through 14. There will be free CATIA bus service all three days. The shuttle departs from College Avenue and Allen Street (near the Corner Room restaurant) at 9:30 and 11:30 a.m. Aug. 12-14. On Aug. 13, when Ag Progress Days remains open until 8 p.m., there will be an additional departure at 2:30 p.m. Departure times for the return trip are at noon, 3 and 4 p.m. Aug. 12-14, with a 7 p.m. shuttle on Aug. 13.

Tax reminder

Just a reminder, for those employees who used the University tuition discount benefit for summer courses, the University is applying the federal withholding tax in the July, August

and September monthly payrolls.

For those who are paid biweekly, this tax has been applied in the Aug. 1 payroll, and will be applied in the Aug. 29 and Sept. 26 pays. Remember, that this tax only applies to those employees and their spouses who are considered to be graduate-level or higher.

Exhibit available

A traveling exhibit titled "Lesbian and Gay Issues at Penn State, 1971-1996: 25 Years of Progress" is available from the Commission on Lesbian, Gay and Bisexual Equity and University Archives. This exhibit is based on the successful LGB History Month event that took place at University Park from October 1996 through January 1997 where several thousand students, faculty, staff and visitors viewed the history of lesbian, gay and bisexual members of the Penn State community.

Sponsored by the Office of the Vice Provost for Educational Equity, the exhibit tells the story of how events during the last 25 years influenced the University, changing it from a homophobic climate into one that today is supportive of its gay, lesbian and bisexual faculty, staff and students.

The exhibit also includes an information packet containing brochures and resources. The cost of the exhibit is approximately \$40. For more information on the exhibit or for schedule availability, please contact Tracy Leitzel at (814) 863-7696.

Nittany Lions' coverage

Penn State's 1997 regular season football finale at Michigan State will be televised by ABC Sports. The Nittany Lions' Nov. 29 game in East Lansing will be regionally televised by ABC. Kickoff is set for 1 p.m. EST from Spartan Stadium.

The game with the Spartans is Penn State's third announced television appearance for the upcoming season. The Sept. 6 season opener with Pittsburgh will be a 3:30 p.m. ABC-TV regional telecast from Beaver Stadium and the Lions' Sept. 20 game at Louisville will be nationally televised by CBS at noon.

Since joining the Big Ten Conference in 1993, Penn State has won all four meetings with Michigan State, but the Spartans lead the series, 8-5-1. Michigan State was 6-6 last season under Coach Nick Saban, falling to Stanford in the Sun Bowl. Entering his 32nd season as head coach, **Joe Paterno** returns 42 letter winners and 13 starters from last year's 11-2 squad, which won its last five games.

University Web site for international funding

"Faculty Funding and Networking Opportunities" is an internationally focused Internet site which can be

accessed through Penn State's Office of International Programs Web site. Individuals interested in international education and global issues are encouraged to take advantage of this regularly updated, internationally focused Penn State site.

On a weekly basis, International Partnerships and Academic Linkages (IPAL) monitors national electronic information bulletin boards. The address is <http://bluc.uc.psu.edu/psu/ipalcp/IBhome.html>.

For more information contact **Christina Arnoldi** at (814) 865-0414, e-mail: cea40psu.edu, or visit the IPAL home page at <http://bluc.uc.psu.edu/psu/ipalcp/home.html>.

Electronic prescription refills now available

University Health Services Pharmacy has a new service for customers who are either students or faculty/staff/retirees enrolled in the Penn State Maintenance Drug Prescription Program.

If you have a prescription on file at the pharmacy, and you'd like to order a refill for that prescription, orders can be submitted electronically through the University Health Services Web site at <http://www.psu.edu/UHS/pharmacy.html>.

Pick-up orders will be processed within 48 hours. For mail out services, please allow seven to 10 days.

Leadership workshop

Pennsylvania teachers and administrators are invited to nominate young women in grades nine through 12 to participate in "Aim High: A Leadership Workshop for High School Girls" to be held at Penn State Feb. 13-14, 1998.

Aim High, a continuing and distance education service of Penn State, has corporate sponsorship for all program costs, meals and lodging, so there is no charge to program participants. However, participants are responsible for transportation to and from State College.

Aim High is designed to honor selected young women with leadership potential, giving them an opportunity to explore ways in which they might develop and use that potential to further their own careers and to make meaningful contributions to society. Motivational speakers, small group activities and informal interaction with women leaders enable participants to reflect on some of the challenges facing women leaders.

To receive a nomination packet (to be distributed in September), school officials should call 1-800-PSU-TODAY or e-mail: Conferecinfo@cdc.psu.edu

Promotions

Staff

Barry G. Phelps, systems engineer I in Computer and Information Systems-Administrative Systems.

Clifford E. Plank, advanced engineering aide in Applied Research Laboratory.

Todd W. Plummer, network coordinator in Computer and Information Systems-Telecommunications.

Chester M. Poorman, manager, jobs management in Business Services.

Joseph P. Portelli, senior design specialist in College of Engineering.

Jeanette G. Rieck, staff assistant VII at Penn State Delaware County.

James G. Reigh, senior communications engineer in Computer and Information Systems-Telecommunications.

Constance M. Rogus, staff assistant VII in Continuing and Distance Education.

Janet M. Rosenbaum, area representative II at Penn State Wilkes-Barre.

Neil B. Russler, engineering aide in Applied Research Laboratory.

Patricia A. Sames, staff assistant VI in Research and Graduate School.

Molly L. Sampsel, staff assistant V in Continuing and Distance Education.

Mary Jo Schillings, staff assistant V in Continuing and Distance Education.

Judith L. Shawley, staff assistant VI in College of the Liberal Arts.

Carey L. Shuey, staff assistant V in Eberly College of Science.

Denise L. Shuey, staff assistant VII in College of Agricultural Sciences.

Lara C. Simmon, communications support coordinator in Computer and Information Systems-Telecommunications.

Robert A. Smith, senior engineering aide in Applied Research Laboratory.

Amy I. Spangler, staff assistant VI in

College of Arts and Architecture.

Amy I. Spangler, staff assistant VI in Continuing and Distance Education.

Vickie A. Stephens, staff assistant VI in Continuing and Distance Education.

James C. Stine, advanced engineering aide in Applied Research Laboratory.

Stephanie R. Stine, staff assistant V in Eberly College of Science.

Anne A. Stokes, staff assistant VII in College of Health and Human Development.

Ronald A. Strouse, senior network coordinator in Computer and Information Systems-Telecommunications.

Tina M. Supon, staff assistant V in Continuing and Distance Education.

Brenda A. Swires, staff assistant VII in Continuing and Distance Education.

Judy A. Tice, communication systems associate in Computer and Information Systems-Telecommunications.

Jennifer M. Treaster, staff assistant V in Continuing and Distance Education.

Technical Service

Charles M. Behrer, lead plumber-fitter in Office of Physical Plant.

John C. Bickley, snack bar attendant in Housing and Food Services at Penn State Hazleton.

Bradley L. Bressler, janitorial worker in Office of Physical Plant.

Mildred L. Bumbaugh, snack bar attendant in Housing and Food Services at Penn State Mont Alto.

James T. Campbell, maintenance mechanic, utilities piping in Office of Physical Plant.

Mary A. Enama, snack bar attendant in Housing and Food Services at Penn State Hazleton.

Beverly G. Forshey, snack bar work-

er B in Housing and Food Services at Penn State Altoona.

Barbara L. Goodwin, snack bar worker B in Housing and Food Services at Penn State Berks.

Patricia A. Graham, snack bar worker B in Housing and Food Services at Penn State Altoona.

Michael G. Jessup, electronic technician A in University Libraries.

Katherine L. Kustaborder, janitorial worker in Office of Physical Plant.

Ruth A. Maguire, snack bar worker B in Housing and Food Services at Penn State Berks.

Jeffrey C. Marshall, blacksmith and farm machinery mechanic in College of Agricultural Sciences.

Linda L. Null, snack bar attendant in Housing and Food Services at Penn State Mont Alto.

Slawomir M. Okoniewski, food preparer B in Housing and Food Services.

Catherine Payne, snack bar worker B in Housing and Food Services at Penn State Berks.

Karen J. Pcolinsky, snack bar attendant in Housing and Food Services at Penn State Hazleton.

Maureen R. Schubert, snack bar worker B in Housing and Food Services at Penn State Berks.

Rosa E. Shoop, snack bar attendant in Housing and Food Services at Penn State Mont Alto.

Cheryl A. Shuey, janitorial worker in Office of Physical Plant.

Cathy L. Skelley, snack bar worker B in Housing and Food Services at Penn State Altoona.

Cathy D. Staggs, snack bar attendant in Housing and Food Services at Penn State Mont Alto.

Kent A. Weaver, maintenance worker-utility in Office of Physical Plant.

Phyllis L. Weber, snack bar worker B in Housing and Food Services at Penn State Altoona.

Brian K. Woodland, maintenance worker-utility in Office of Physical Plant.

Award

McKeesport staffer named winner of PSEOP award

Marlene B. Hetrick, staff assistant VIII/officer manager for academic affairs at Penn State McKeesport, was named Outstanding Office Professional by the Penn State Educational Office Professionals organization. The award recognizes an office employee who has provided exceptional meritorious service on behalf of Penn State. Criteria for selecting the recipient include: professionalism, leadership skills, teamwork, resourcefulness, problem-solving skills, quality of work, continuous quality improvement and positive attitude.

Hetrick joined Penn State McKeesport in 1987 as secretary to the director of University Relations. She has served in her current position since 1991. She graduated summa cum laude in 1991 from Robert Morris College with a baccalaureate degree in business administration and received an associate degree in business/secretarial science summa cum laude from Robert Morris College in 1968.

She was and was granted an Equal Opportunity Planning Commission grant titled "Breaking the Glass Ceiling," a mentoring program for Penn State's southwest region campuses during the 1997-98 academic year. The purpose of the grant is to identify and train women for effective leadership positions. Hetrick is heading a steering committee to form guidelines for the program.

From 1994-95 she served as president of the McKeesport Campus Staff Association and as vice president from 1995-96. Since 1987 she has served in a number of volunteer capacities with the McKeesport Campus Alumni Society, as a member of the Campus Commission for Women since 1993, and on numerous committees. She also has a long history of volunteerism and membership in community organizations.

25-year Awards

DAVID GESELOWITZ

JOHN A. GILDERSLEEVE

RICHARD L. MARTIN

STEPHEN D. SHIREMAN

KAREN SNARE

Observing 25 years of service at the University are, from left, David Geselowitz, distinguished alumni professor of bioengineering and professor of medicine; John A. Gildersleeve, manager, Respiratory Care and Ancillary Services; Richard L. Martin, supervisor, Respiratory Care; and Stephen D. Shireman, systems coordinator, Building Maintenance, all at the Penn State Geisinger Health System's Hershey Medical Center; and Karen Snare, staff assistant in the Science, Technology and Society Program, in the College of Engineering.

Back from Mars?

This is no space suit. On a recent visit to the Hazmat team headquarters, behind Salvage and Surplus on the University Park campus, a young Sam Dechdel tried on a full-sized training encapsulation suit. The training suits are used for practice drills, while the actual suits—which cost about \$1,000 each—are used in real emergencies. Helping Sam with the suit is Penn State Officer Dave Schultz. The Hazmat crew undertakes occasional educational programming efforts.

Researchers design CD-ROM as tool to educate people about breast cancer

When deadly diseases run in your family, education can be the best prescription for good health. Researchers at Penn State Geisinger Health System, Hershey Medical Center, and the University of Wisconsin in Madison, have designed a new interactive CD-ROM available to educate individuals about genetic testing for the leading cause of cancer death for women between the ages of 35 and 54—breast cancer.

Breast cancer, which affects one out of every eight women, may result from contributing factors including gene abnormalities. Studies show that only 5 percent to 10 percent of women with "breast cancer genes," but those women with a gene abnormality have a 60 percent to 90 percent lifetime risk of developing breast cancer.

Dr. Michael Green, assistant profes-

sor of humanities and internal medicine, has been designing the computer program which will help patients and their families learn more about genetic testing for breast cancer. The CD-ROM will supplement information a patient gets from a doctor or genetic counselor and may even replace or reduce the time needed with a health professional.

Green thinks interactive CD-ROMs will become more popular as a tool for patient education in the future because of their convenience for the patient, privacy, effectiveness, interactivity and potential for saving time and money. He envisions having the CD-ROM available to patients at doctors' offices and, eventually with technological advancements, accessible on the Internet. The project is being funded by a grant from the National Cancer Institute (NCI).

BOOK SHELF

How do Americans use their time? The answers can be found in the new book *Time For Life: The Surprising Ways Americans Use Their Time* by John P. Robinson, professor of sociology and director of the Americans' Use of Time Project at the University of Maryland and Geoffrey Godbey, professor of leisure studies at Penn State.

Though they may not believe it, Americans have more free time than they did 30 years ago. Research done by the authors shows that Americans have almost five hours more free time per week than in the 1960s. "Most of the time they have gained is used for television viewing," Godbey said.

In their book, Robinson and Godbey go beyond describing their controversial findings to confront the numerous time paradoxes facing Americans, such as feeling more rushed and stressed when we actually have more free time; having free time in periods when it is least useful; and investing time in activities that bring us minimal enjoyment or fulfillment.

Their source of time-use information, the Americans' Use of Time Project, is the only such detailed historical data archive in the United States. Every 10 years the project has been asking thousands of Americans to report their daily activities on an hour-by-hour basis in time diaries.

Sridhar Komarneni, professor of clay mineralogy in the Department of Agronomy and Materials Research Laboratory, **John C. Parker** of Nanophase Technologies Corp. and **Heinrich J. Wollenberger** of the Hahn-Meitner Institute in Germany, are co-editors of *Nanophase and Nanocomposite Materials II*, published in 1997 by the Materials Research Society, Pittsburgh.

The book, which compiles papers from 19 countries, is the result of a symposium held at the Materials Research Society 1996 fall meeting in Boston. Paper topics include synthesis, processing, characterization and property evaluation of nanophase oxides and metals, alloys and non-oxides; simulation studies of nanophases; magnetic and metal nanocomposites; oxide, non-oxide and oxide-metal nanocomposites; organic-inorganic and sol-gel nanocomposites; and nanocomposites of layered and mesoporous materials.

Far more than harmless entertainment, TV talk shows are illustrative of commercial television's reliance on ratings and revenues—regardless of the consequences, a new book by two Penn State professors argues.

The result: a troubled America distracted and confused by years of deceptive, sensational television programming that largely focuses on the worst of our society. Professors **Vicki Abt** and **Leonard Mustazza** say in *Coming After Oprah: Cultural Fallout in the Age of the TV Talk Show* (1997, Popular Press) that talk shows are a daily assault on our culture and our consciousness.

Abt, a professor of sociology and American studies at Penn State Abington, became nationally known for her public criticisms of television talk shows. In 1994, she published a sharply critical analysis of the genre, arguing that talk shows' focus on the bizarre and the dysfunctional serves only to undermine Americans' civil conduct. The study garnered national media attention, culminating with Abt's appearance on *The Oprah Show* that year. Since then, Oprah has joined the fray of talk show critics and overhauled her show, focusing on self-help themes and celebrity interviews.

More than a commentary on the aesthetics of the talk show genre, *Coming After Oprah* encourages the public to become more "screen smart" and makes strong recommendations to the government, including beefing up a weak and ineffective Federal Communications Commission. The book uncovers behind-the-scenes economic games and their implications, revealing a complex web of commercial and political interests that influence talk shows' production.

New at Penn State

Weekend College

In an effort to meet the needs of non-traditional students, Penn State Sherman will begin offering a "Weekend College" in the fall, where students can obtain a two-year associate

degree in letters, arts and sciences or earn credits. Classes will be offered on both Saturdays and Sundays. Additional degree programs may be added in the future.

For more information, call (412) 983-2800.

CQI in child care

Recent CQI efforts in the work/life unit of the Office of Human Resources have led to improvements in both the child care enrollment process and the child care waiting list process. Last fall, the unit introduced a "transmittal form" to help ease the transition for the children, their parents and the staff of the University's child care centers by ensuring that accurate information is communicated in a timely manner. The unit has also just finished constructing a database to more easily manage the transition from the waiting list to enrollment. According to Linda Pierce, coordinator of work/life programs and sponsor of the teams, future initiatives include improvements in the billing and payment procedures.

HR policies online

Also in the Office of Human Resources, the Human Resources Policies Team recently completed transferring all human resources policies and guidelines to the OHR Web site (<http://www.ohr.psu.edu/policy/default.htm>). Although the information is available via Gopher, the Web allows for a greater number of people to access the information and, by using hypertext links, allows for easy referencing of related policies.

Improving the parking permit process

A CQI Team has been charged in the Office of Business Services to improve the process for distributing parking permits. Betty Roberts, assistant vice president for Business Services, charged the team in response to feedback received by the Parking Office. Over the next six months, the Parking Operations Permit Process Improvement Team will be examining the permit registration and distribution process and will be recommending improvements to be implemented by Spring 1999.

A complete listing of all CQI Teams and other information on CQI at Penn State is available by contacting the Center for Quality & Planning at (814) 863-8721 or via its Web site at <http://www.psu.edu/president/cqi>.

Search is on for associate dean in engineering

A search is being conducted to replace Michael M. Reichman, associate dean for graduate studies and research in the College of Engineering, who has accepted a position as associate dean of research and faculty development in engineering at the University of South Carolina and director of engineering research with the South Carolina Research Authority.

The associate dean reports to the dean and is expected to provide leadership in the college on matters pertaining to graduate instruction and research, including major policy, planning and development responsibilities. Other activities involve industrial relations and outreach. The position is available on or about Sept. 15.

Nominations and applications for this position are invited from interested people. The candidate should hold a doctoral degree in an engineering discipline and have expe-

rience in teaching and advising at the graduate level and in research. Candidates should have a strong commitment to providing a high quality research and graduate engineering program, a record of college and university service, and strong communications, interpersonal and management skills. Members of underrepresented groups are encouraged to apply.

A search advisory committee will begin to review nominations and applications by Sept. 8. Applications and nominations will be accepted and reviewed until the position is filled. The committee will identify qualified candidates and present evaluations and recommendations to the dean, David N. Wormley. Nominations and applications should be submitted to the chair, Associate Dean Search Advisory Committee, 101 Hammond Building, University Park, Pa. 16802.

Department head needed in Ag Sciences

Applications and nominations are being solicited for the position of professor and head of the Department of Agricultural Economics and Rural Sociology in the College of Agricultural Sciences. Candidates should have an earned doctoral degree in agricultural economics, rural sociology or a related field and a record of scholarly and academic achievement justifying tenure.

The department head provides leadership for academic programs of research, cooperative extension and teaching. The head also exercises administrative responsibility for academic affairs, department personnel, financial matters and physical facilities. A description of the department may be found at <http://www.aers.psu.edu>. A full position announcement is available at <http://www.aers.psu.edu/dnrcw/facjobs.html>.

Milton C. Hallberg has been serving as department head. The previous department head, Theodore R. Alter, had been serving as interim dean of the College of Agricultural Sciences and began a new appointment July 1 as associate vice president for outreach, director of Cooperative Extension and associate dean of the College of Agricultural Sciences.

Applications will be accepted until Nov. 1, or until a suitable candidate is found. Please direct nominations and applications to Robert Herrmann, chair, Advisory Search Committee, The Pennsylvania State University, 207R Armsby Building, University Park, Pa. 16802; telephone (814) 863-8631; fax (814) 865-5746; or e-mail roh2@psu.edu. Penn State is an affirmative action/equal opportunity employer. Women and minorities are encouraged to apply.

Visiting scholars enrich the learning experience

Penn State is encouraging intercultural learning and community education by supporting visiting minority scholars from Puerto Rico and the United States at Penn State's University Park and Lehigh Valley locations.

The "Scholars in Residence" summer program encourages minority faculty to share their experiences and expertise through research, teaching and service. Penn State is hosting seven scholars at its University Park campus. Penn State Lehigh Valley is hosting three.

■ Cecil Giscombe, an associate professor of English at Illinois State University, is consulting on the English Minority Writers Series, participated in the African-American Traditions Seminar in the Arts and Humanities and presented a public poetry reading. His Penn State host is Don Bialostotsky, head of the Department of English. Giscombe will be on campus through Aug. 15.

■ José Esteban Munoz, an assistant professor of performance studies at New York University, taught a workshop for graduate students, consulted with faculty on teaching theories and presented a public lecture and performance. Munoz, also hosted by Don Bialostotsky, was in residence in June.

■ R.S. Fred Nelson, a professor of biology at Jackson State University, led the graduate seminar series,

"Insects of Medical Importance," in addition to participating in a forensic research program. His Penn State host was James Frazier, department head and professor of entomology. He was at University Park for June and July.

■ Eduardo Rivera-Porto, a professor of educational computing at Inter-American University, San Juan, taught the eight-week summer session "Developing Effective Training." His Penn State host is David Jonassen, professor of instructional systems.

■ Carlos Rodríguez, research analyst in higher education at Pelavin Research Institute in Washington, D.C., taught, "Minority Issues in Higher Education" in June. His Penn State host was Roger Geiger, professor of education.

■ Jacqueline Jones Royster, an associate professor of English at The Ohio State University, taught a graduate workshop, gave a presentation at the Conference on Rhetoric and Composition and participated in the African-American Traditions Seminar in the Arts and Humanities in July. Her Penn State host was Don Bialostotsky.

■ David Suleiman, assistant professor of chemical engineering at the University of Puerto Rico, has been conducting research in the Center for the Study of Polymer-Solvent Systems since May. Suleiman's Penn State host

is J. Larry Duda, department head and professor of chemical engineering.

■ Carmen Celeste Morales-Meléndez coordinated the Youth Enrichment Program 2000 and taught a seminar, "Awareness of Multicultural Diversity in the Classroom" during the eight-week summer session at Penn State Lehigh Valley. She is an associate professor of education at the Pontifical Catholic University of Puerto Rico. Her Penn State host is Kenneth McGeary, director of continuing education at Lehigh Valley.

■ Mercedes García Pérez, an associate professor of business English at the University of Puerto Rico, San Juan, has been part of the Youth Enrichment Program 2000, teaching business writing skills to inner-city youth from the Alientown school district during the eight-week summer session. Her Penn State host also is Kenneth McGeary.

■ José A. Gonzalez Robles, associate professor of health at the University of the Sacred Heart in Santurce, Puerto Rico, visited in July. He participated in the Youth Enrichment Program 2000 and collaborated with the Council of Spanish Speaking Organizations of the Lehigh Valley Summer Education Enrichment Program. His Penn State host was also Kenneth McGeary of Penn State Lehigh Valley.

Improving their game

Students gain hands-on experience at Penn State golf courses

By LISA M. ROSELLINI
Public Information

A three-page "wish list" for improving the Penn State golf courses has been whittled slightly with the addition of a new practice area, done in collaboration with students from the turf grass science program.

Every year, the Penn State courses are the site of 78,000 rounds of golf. That's a lot of chipping and putting for a facility that's open, at most, eight months out of 12. The new practice green, built at a cost of \$30,000, was installed by students and a crew from TSG Services, near Philadelphia, who reconstructed bunkers, installed a gravel layer, and shaped and resodded the short game area that will provide additional space for avid golfers working on their game.

The Penn State Golf Courses, which consist of the 18-hole Blue Course, the 18-hole White Course, the six-hole Nittany Course, and now the new practice green, encompass about 320 acres on the University Park campus — making them the perfect hands-on laboratory for students in a variety of majors, including landscape architecture, golf management and turfgrass management.

"We do a lot of experiments on location at the golf course," said Tom Watschke, professor of turfgrass science. "This is an invaluable opportunity for first-hand experience in the field. It's one thing to talk about it in the classroom and another to actually do it yourself, and there is nothing better than having done it yourself. This is a natural fit."

Launched in 1992, Penn State's turfgrass science program was the first of its kind in the nation, preparing graduates for jobs as golf course superintendents, civil engineering firm consultants, athletic field and professional sports complex managers, private business owners, vegetation and lawn care management professionals and sales and service professionals for equipment manufacturers, like Toro. In Pennsylvania alone, the turfgrass industry is a \$1.4 billion business.

Over the past five years, Watschke's students have performed weed control studies at the Penn State courses, extensive probing into insect control and investigations into stunting the seed head formation of grass to make it smoother for putting. In addition, many techniques now used by golf courses worldwide were discovered at Penn State — like using plant growth regulators to aid in renovation and overseeding of the greens. Penn State's turfgrass science program, housed in the agronomy department of the College of Agricultural Sciences, has tapped into a highly competitive market that The Ohio State University and the University of Georgia have now joined.

On this latest golf course project, PennMulch, a material used for mulching turfgrass seedbeds invented by agronomy instructor George Hamil-

You won't find this in books

Students from the turfgrass science program, overseen by Professor Tom Watschke, work to lay down a four-inch gravel drainage base for the new practice putting green. Students in Watschke's classes learn first-hand about the golf industry.

Photo: Greg Grieco

ton, was used to spark quicker seed germination and reduce the potential for soil erosion and weed invasion. Patented by Penn State, PennMulch is now distributed in 30 states and Canada. Other seed experiments also have led to better greens and Watschke said golf courses worldwide now use turf varieties developed at Penn State.

"We like to say that the sun never sets on a Penn State variety, because at any given time somewhere in the world the sun is shining and Penn State turfgrass is being grown," Watschke quipped.

Doug Wert, head PGA golf professional for the Penn State courses, said the work being done by Watschke's students is not only invaluable to the students, but also to the University golf facility. Not only has the new practice area become a reality, but there are currently six professional golf management majors working for Wert, learning the various aspects of the golf world.

"I see a lot of possibility for working very closely with academic programs to make this one of the best courses in the Big 10," said Wert, who has been on board for four months. "This course is not only for recreation but it is an excellent educational tool, particularly for turfgrass students, but it also serves those students taking golf courses. The educational possibilities are endless. From catering to landscape architecture... the professional golf management program (offered through the College of Health and Human Development) is one of the reasons I came here."

Wert praises Penn State for recognizing the business side of golf, which led to the 1991 creation of the golf management major at the University. With nearly 25 million players in the United States alone, golf is a booming industry. In 1994, the last year for which figures are available, golfers spent more than \$15 billion for equipment and play at the nation's 15,703 golf courses, according to statistics from the National Golf Foundation.

"The golf business is changing rapidly and if students have the opportunity to experience those changes first-hand, that will only make them more adaptable and better able to handle the career they are studying for," Wert said. "Not only are students learning here, they're also playing here. During the year, the typical user is a student." The self-sustaining facility overseen by Intercollegiate Athletics offers reduced greens fees for students, faculty and staff.

Wert said future plans for the Penn State Golf Courses include bunker renovations on the White Course and a putting green near the 10th tee on the Blue Course. The PGA professional said he hopes his work with turfgrass science students will help open the door to more collaboration with students in a variety of majors.

"We have one of the top turf grass programs in the nation, we should have one of the top facilities," Wert said.

Health system's Hershey Medical Center named one of nation's best by U.S. News

The Penn State Geisinger Health System's Milton S. Hershey Medical Center was cited by U.S. News & World Report as one of the best hospitals in the nation in three categories, according to its eighth annual rankings, "America's Best Hospitals," in the July 28 issue.

Hershey Medical Center was ranked 31st for its urology service, 37th for gastroenterology, and 38th for cancer treatment.

Additionally, Geisinger Medical Center, Hershey's new partner in the Penn State Geisinger Health Sys-

tem, was ranked 41st for its endocrinology service.

According to a news release by U.S. News & World Report, the listing "assesses care for 17 specialties at 1,800 hospitals nationwide, 135 of which scored high enough to be ranked." Rankings of specialties were based on reputation and various medical data or on reputation alone.

"Any institution listed among the top 42 medical centers in any specialty should be considered a leading center," according to U.S. News, "and the rankings do not imply that other hospitals cannot or do not

deliver quality care."

To produce the rankings, U.S. News, in conjunction with the National Opinion Research Center (NORC), assessed hospital care for 17 specialties. NORC, a noted social science research group at the University of Chicago, mailed confidential questionnaires to a geographic cross section of 150 board-certified physicians in each specialty — a total of 2,550 physicians. NORC asked the physicians to name the five hospitals they consider the best from among 1,800 of the nation's hospitals.

Penn Staters

Farid Ahmed, assistant professor of electrical engineering at Penn State Erie, Behrend College, chaired a technical session titled "Image Feature Extraction and Synthesis for Recognition Applications" at the 1997 International Conference on Imaging Science Systems and Technology. At the same conference he also presented a paper titled "Feature Synthesis for Correlation-based Pattern Recognition."

Gordon Blood, head of the Department of Communication Disorders, received a Distinguished Service Award from the American Speech Language Hearing Association. The award recognized Blood's leadership role in the association's Division of Fluency Disorders.

Joseph L. Cavinato, a member of The Smell College of Business Administration's logistics faculty, taught graduate and undergraduate students and spoke before businesspeople during a recent assignment as a visiting scholar in Sweden.

On a trip funded through a scholarship from the Swedish government, Cavinato, an associate professor of business logistics, conducted seminars for and worked individually with doctoral candidates at Växjö University. He also taught undergraduates at the school and led a program for a group of invited managers.

In addition, Cavinato spoke on "Best Practices in Purchasing and Supply Chain Management" at Linköping University, and conducted a graduate seminar on trends in logistics and purchasing at Lunds University.

Joseph P. Cusumano, associate professor of engineering science and mechanics, has been awarded a summer Osher Fellowship at the San Francisco Exploratorium to develop interactive sculptures for the museum.

The Exploratorium is an interactive educational museum, occupying science, nature, art and technology with more than 550,000 visitors annually and a Web site at <http://www.exploratorium.edu>.

Arlen Etling, associate professor of agricultural and extension education, will receive the 1997 Epsilon Sigma Phi International Service Award. He also received the Outstanding Paper Presentation Award for "A Case Study in Collaborative Consultation" at the Association of International and Agricultural and Extension Education Conference.

Hector E. Flores, professor of plant pathology and biotechnology, gave an invited presentation at a symposium on international agricultural research, sponsored by The McKnight Foundation.

Lonnie Golden, assistant professor of economics at Penn State Delaware County, presented a paper titled "Timing is Everything: Working Time and Proposed Reforms of the U.S. Fair Labor Standards Act Over Time Hours Provisions," at the conference "Law and Economics and the Labour Market" at Utrecht University in Utrecht, Netherlands.

Thomas L. Hemminger, assistant professor of electrical engineering at Penn State Erie, Behrend College, presented "Signal Estimation with Neural Networks for Multipath Mobile Communications" at the IEEE International Conference on Neural Networks in Houston.

Budugur Lakshminarayana, Evan Pugh professor of aerospace engineering, is the 1997 recipient of the International Gas Turbine Institute Aircraft Engine Technology Award presented by The American Society of Mechanical Engineers. This award is made for "sustained personal creative contributions to aircraft engine technology."

Philip Mosley, associate professor of English, communications and comparative literature at Penn State Worthington Scranton, presented a paper titled "Language, Identity, and European Cinema" at the Society for Cinema Studies Conference in Ottawa.

Robert E. O'Connor, associate professor of political science, presented a paper at the annual meeting of the Society for Risk Analysis in Stockholm. Co-authors of "Does Knowledge about Climate Change Relate to Risk Perceptions and Willingness to Sacrifice," include Penn State's **Richard J. Bord**, associate professor in the Department of Sociology, and **Ann Fisher**, senior scientist in the Department of Agricultural Economics.

Eva J. Pell, Steimer professor of agriculture, recently discussed "The Role of Ozone as an Oxidative Stress in Accelerating Plant Aging" at the University of Warwick, England, as part of a "Science of Aging Workshop" sponsored by the Biotechnology and Biological Sciences Research Council.

Donna S. Queeney, director of research and external relations for Continuing and Distance Education, presented a workshop on "Assessing Educational Needs" at the University of Puerto Rico. The workshop was part of the University of Puerto Rico's professional development program for continuing educators and faculty members from all of its campuses.

Raja V. Raman, professor and head of the Department of Mineral Engineering, has been named recipient of the 1997 Howard L. Hartman Award of the Society of Mining, Metallurgy and Exploration Inc. The award recognizes Raman's contributions to the teaching, practice and research of underground ventilation engineering.

Rustum Roy, Evan Pugh professor of the solid state and professor of science, technology and society, gave the opening address to the meeting of the German Ministry for Education and Research in Bonn. Roy discussed his experience with U.S. agencies and at Penn State's Materials Research Laboratory. He also gave a presentation at the Max Planck Institute for Metal Science in Stuttgart, Germany. He discussed the "Three Revolutions in Diamond Synthesis."

Nicholas J. Salamon, professor of engineering science and mechanics, has been elected a Fellow of the American Society of Mechanical Engineers.

Two School of Forest Resources faculty were honored at the 1997 Three Rivers Environmental Awards. **Tom Serfass**, research assistant in the School of Forest Resources, received a Three Rivers Environmental Award in the Higher Education category for his work reintroducing river otters and fishers to Pennsylvania habitats.

William Sharpe, professor of forest hydrology, was a finalist in the Commonwealth/International Education category for his work on drinking water safety, acid rain, water conservation, acid mine drainage and other environmental issues. The awards are sponsored by Duquesne Power and the Pennsylvania Environmental Council.

Gerald A. Smith, physics professor and director of the Penn State Laboratory for Elementary Particle Science (LEPS), and his team of investigators received the 1996 Space Technology and Applications International Forum Outstanding Paper Award from the Institute for Space and Nuclear Power Studies at the University of New Mexico. The award-winning paper is titled "Trapping Anti-matter for Space Propulsion Applications."

The other members of the research team include **Raymond Lewis**, senior scientist; **Michael Holzreiter**, visiting professor; **Jacky Rochet**, technician; and undergraduate students **William Goebel** and **Wendy Schwarz**, who did summer research at LEPS with National Science Foundation support.

Jack Schultz, professor of entomology, presented a lecture on "The Future of Chemical Ecology" and moderated a workshop on the same topic at the

International Chemical Ecology Symposium at Oaxtepec, Mexico.

Pianist **Timothy Shafer**, associate professor of music, made his New York solo recital debut in Carnegie Hall's Weill Recital Hall, New York City. His concert, "Romantic Extremes," featured works exclusively by Franz Liszt and Johannes Brahms. A compact disc recording of the music from the recital is due for release in 1998.

S. Shyam Sundar, assistant professor of communications, won a top-three faculty paper award in the Communication Technology & Policy Division of the Association for Education in Journalism and Mass Communication (AEJMC). His paper, "Does Web Advertising Work? Memory for Print vs. Online Media," was co-authored by **Sunetra Narayan**, **Rafael Obregon** and **Charu Uppal** — all graduate students in the interdisciplinary Ph.D. program in mass communications.

James C. Wambold, professor emeritus of mechanical engineering, has received a 1997 American Society for Testing and Materials (ASTM) Award of Merit, which is accompanied by the title of Fellow. The ASTM cited Wambold for outstanding contributions in the development of standards for pavement skid resistance and roughness measurement and leadership.

Wambold has played a role in the development of seven approved ASTM standards and two draft standards; organized two symposia; and edited or written several technical standards.

C. Eugene Wayne, professor of mathematics, is the recipient of the 1997 Award for Distinguished College or University Teaching. The award was presented by the Allegheny Mountain Section of the Mathematical Association of America in recognition of his extraordinary teaching accomplishments.

The book *Eastern Deciduous Forest Ecology and Wildlife Conservation*, written by **Richard H. Yahner**, professor of wildlife conservation, has been selected by the Conservation Education Awards Committee of The Wildlife Society to receive the 1997 Conservation Education Award in the book category.

Vladimir M. Zatsiorsky, professor of kinesiology and director of the Biomechanics Laboratory, recently served as a physical fitness consultant for the Chicago Bulls, a professional basketball team.

Plants' defenses are being used against them

By ANDREA ELYSE MESSER
Public Information

With their roots stuck in the ground, the only way plants can attract pollinators or deter predators is to produce chemicals that entice beneficial organisms and repel or destroy dangerous ones, according to a researcher.

Defense compounds, colors and flavors have commercial uses, but the plants or plant cells must be coerced into producing them in reliable and sufficient quantities in manufacturing settings. These potential products include vanilla, morphine, taxol, quinine, ginseng and shikonen — a red dye.

"Plants or plant cells only produce these secondary metabolites when they need them, and manufacturers would like a reliable way of producing these chemicals in the factory," Gurmeet Singh, assistant professor of chemical engineering, said. "What we are trying to do is bluff the plant into thinking it is being attacked," Singh said.

Singh's approach, called elicitation, is to grow plant cells in nutrient solutions and to force the cells to produce secondary metabolites by adding dead, cell-wall fragments of fungus. If live fungi were used, they would kill the plants.

"The fungi fragments turn on the secondary metabolite pathways," Singh said. "With this type of prodding we can increase production as much as 500-fold."

Singh said it is not just the defensive chemicals that react to the invasion of fungus, but that flavor and color chemicals also are produced. These same chemical pathways also are turned on if a plant is physically wounded.

In the manufacturing environment, producers want to use just the right amount of fungus fragments to optimize chemical production.

"If manufacturers add too much, they would waste expensive fungus and risk damaging the plant cells, but if they add too little, they might under-exploit the cells," Singh said.

The scientist is looking at the fungus concentration in the liquid and the complicated interaction of this elicitor with the cells to come up with commercially useful formulas for elicitor addition.

Gurmeet Singh, assistant professor of chemical engineering, is working on a way to trick plants into producing their natural defense compounds, colors and flavors in greater quantities because they have commercial uses.

Photo: Greg Grieco

He also is looking at a natural plant compound, methyljasmonate, and its interaction with fungal elicitors. Methyljasmonate is a chemical produced by most plants and is thought to be used to signal other plants. A very volatile compound, methyljasmonate quickly diffuses through the air where it can be sensed by other plants. The exact interaction conveyed is unknown.

"However, when methyljas-

monate is mixed with the fungal elicitor, the amount of elicitor needed decreases dramatically," Singh said. "Since methyljasmonate is much less expensive than fungal elicitors, this could help manufacturers."

Singh does not know the mechanism involved in methyljasmonate's enhancement of fungal elicitors, but he does know that methyljasmonate by itself does not elicit production of secondary metabolites.

Researchers battle against artillery fungus

An artillery fungus, commonly found in wood-based landscape mulch, has a deadly aim, blasting homeowners with \$1 million in damage claims last year in Pennsylvania alone. The fungi, which barely take up the space on a quarter of a match head, violently eject spore masses with a mighty blow of 1/10,000 horsepower force shooting spores as far as 20 feet. The masses adhere to any surfaces they contact, including cars and homes, and cannot be removed from the surface without damaging it. The spore masses are viable for at least 10 years.

Researchers in the College of Agricultural Sciences, including Larry Kuhns, professor of horticulture; Don Davis, professor of plant pathology and Beth Brantley, graduate student in plant pathology, are involved in a five-year study of artillery fungus. The study, supported by the Pennsylvania Department of Agriculture, examines the conditions under which Pennsylvania's native wood can successfully be used as fungus-free mulch. Although the fungus is found almost everywhere in the United States, it is a major problem for New Jersey, Ohio and Pennsylvania because of the type of wood available.

Although the research is in its preliminary phase, Kuhns comments that the fungus seems to grow on either wood chips of "double shaded" bark mulch, which is dark, thin-stranded mulch. The researchers also will be looking at ways to remove the fungus without causing damage to adhered surfaces.

Learn how to protect water resources

The College of Agricultural Sciences and the Department of Agricultural and Biological Engineering funded a 23-minute video titled "The Groundwater Protection Action Group: A Roadtrip to Success," to explain ways to make a groundwater protection action group successful. It is the third educational video in a four-part series about protecting water resources.

For an order form or more information about the videos or groundwater, contact the Department of Agricultural and Biological Engineering at (814) 865-7685 or visit the department's Web site at <http://server.ave.psu.edu/>.

Exxon gives matching gift

Penn State has received more than \$111,000 through a gift matching program from the Exxon Education Foundation. The funds represent the 1997 installment from the foundation's 3-to-1 match of gifts to the University by Exxon employees, retirees and surviving spouses.

This year's total of 73 gifts will support a variety of Penn State programs of the donors' choice. Since 1966, Exxon gifts to Penn State have totaled more than \$4 million.

Through the overall gift matching program, individual donations of up to \$5,000 each year are matched at the 3-to-1 ratio for institutions in the United States with which the donors have an affiliation. The foundation established the program in 1962 and has provided more than \$170 million to more than 1,000 institutions.

In April, the foundation announced that this year's \$13.5 million in unrestricted grants to 885 colleges and universities means the foundation has the largest such program nationally for the third year in a row. Overall, the Texas-based foundation has given more than \$443 million in support of American education since its founding in 1955.

For the Record

In the July 24 *Intercom*, some dates for Ag Progress Days and a bus schedule were listed incorrectly. The dates of this year's event are Aug. 12-14. There will be free CATA bus service all three days. The shuttle departs from College Avenue and Allen Street (near the Corner Room restaurant) at 9:30 and 11:30 a.m. Aug. 12-14. On Aug. 13, when Ag Progress Days remains open until 8 p.m., there will be an additional departure at 2:30 p.m. Departure times for the return trip are at noon, 3 and 4 p.m. Aug. 12-14, with a 7 p.m. shuttle on Aug. 13.

In an appointment story on page 7 of the July 24 issue, some background information on Penn State Shenango's newly named instructional specialist, **David Kuskowski**, was inadvertently omitted. Kuskowski earned a master's degree in education from Youngstown State and a bachelor's degree in education from Ohio Dominican College.

The contact person listed for the Hispanics for Academic Progress program offered through Summer Sessions was incorrect in the July 24 issue. The correct contact person should be **Maria Schmidt** at (814) 865-1773.

Due to a source error, the job title for **Kevin M. Moroney** was listed incorrectly in the "Promotions" listing in the July 24 *Intercom*. His correct title is director, graduate education and research services in Computer and Information Systems-Center for Academic Computing.

Rip snortin' good time

These two piglets, who just arrived on the University Park campus, will soon be viewing video games as part of a research project under the direction of Stanley Curtis, professor of animal sciences. Curtis is looking into the mental processes of pigs.

Photo: Greg Grieco

Cable TV museum moving from Penn State to Denver

The National Cable Television Center & Museum Inc., Denver, Colo., and Penn State recently announced a plan under which existing programs and activities formerly conducted by The National Cable Television Center & Museum at Penn State will be continued by a successor organization at Denver. The agreement also provides for the transfer of certain assets of the original center and museum to the Denver center.

The Organization of Cable TV Pioneers which, jointly with Penn State, established The National Cable Television Center and Museum at University Park in 1985, decided in 1993 to reorganize the center as a free-standing, independent institution.

The new agreement provides, among other things, that the library and museum collections formerly housed at Penn State be relocated to Denver with special provisions

for the retention at Penn State of copies of selected archival and research documents and for expedited access for Penn State students and researchers to the collections at Denver. Transfer of the collections to Denver should be completed by the end of 1997.

The Cable TV Pioneers in 1991 endowed a Chair in Cable Communications Studies in Penn State's College of Communications. Under the agreement, the Denver center and museum would complete funding of that endowment as planned at the time of the gifts. Three endowed telecommunications lectures also will continue: the Donald W. Levenson Memorial Lectures in Cable Engineering; the Marian B. Gardner Memorial Lectures in Cable Accounting and Finance; and the Edward J. Foust Memorial Lectures in Cable Communications.
